**NEWS 'N' NOTES**

(by Sharon Hillis)

A measles epidemic may hit Texas and other states in 1979—because many children immunized when vaccine was first available are not completely safe from measles (rubella or 10-day measles). Measles outbreaks are occurring in Texas and elsewhere—with East Texas counties also reporting cases among students in grades 7-12.

**Vaccinate These Children**  
Health authorities urge parents to have the following children immunized:  
• Children you think are immune because "they already had measles" but who saw no physician during the illness—and never received a doctor's diagnosis.

• Only if a doctor diagnosed measles can parents be sure children are safe.  
• Children who were immunized with a killed measles virus vaccine.  
• Children who were immunized with a live virus vaccine before 1968.  
• Children who had the measles immunization before

department for advice.  
**What To Ask For**  
According to health authorities, to be safe from measles, children need the "live, further-attenuated measles vaccine" which is in current use.

This vaccine has proven to be safe and effective, they report.  
**Why The Problem?**  
Today's threat of epidemic partly stems from the not-so-effective measles vaccine given to children at the age of 12 months. Cases of measles

their first birthday.  
• Parents who are not sure of their child's immunization record—or safety from measles—should contact their physician or local health officer now being reported in these children who were thought to be fully protected.

New findings show that vaccination with a live virus at the age of 15 months or after is more effective.

**Measles Can Be Harmful**  
It is important to protect children against measles and its complications which include encephalitis and brain damage.

Death also may occur in one of every 1,000 reported measles cases.

**World Day Of Prayer March 2 At First United Methodist Church in Floydada**

Annual World Day of Prayer will be observed in Floydada on Friday, March 2 at the First United Methodist Church. The program on that day's theme, "Spiritual Unity," will be presented by the Christian Women's Church of the First Christian Church. The two churches are sponsoring a special invitation to all denominations to join with them for World Day of Prayer service beginning at 8 a.m.

Hagood, Dolly Emert, Sandy Campbell, Flo Jarnagin, and Martha Farris. Lisa Howard will lead the Lord's Prayer in the language of her native country, Samoa. World Day of Prayer dates back to 1887 and this year women in 140 countries and 33 islands will unite in prayer on this historic day. The service for this year was written by students in the Pan-African Leadership Course for Women at Mindolo Ecumenical Foundation in Kitwe, Zambia. The five-month leadership course trains up to twenty women each year employed by churches, other voluntary organizations, and governments from various African countries. The purpose of the course is to give women leadership training skills in areas in which women carry the main responsibility. The women are then equipped to

promote women's advancement and to head women's organizations and programs in their respective countries. Each year, women in a different nation are asked to write the World Day of Prayer service based on themes chosen by the International Committee for World Day of Prayer. Church Women United is the officially-recognized sponsor of World Day of Prayer in the United States. The women of Africa send this message: "Our warm greetings to all the Christians around the world who are coming together from different places for the World Day of Prayer 1979. We hope the voices of the Pan-African Leadership Course at Mindolo can be heard in solidarity with the voices of women in the world as we pray together on World Day of Prayer 1979."

### Lockney 4-H Members To Participate In Houston Calf S

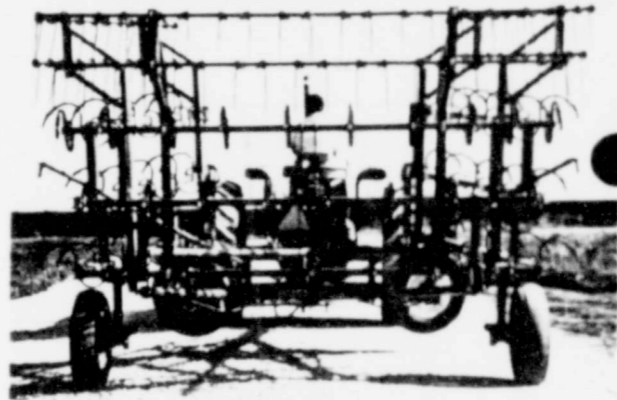

Two 4-H Club members from Lockney, Ty Williams and Kyle Brock, will participate in the beef cattle scramble at the 1979 Houston Livestock Show and Rodeo. Ty, 15-year-old son of Mr. and Mrs. Jerry Williams, and Kyle, 14, son of Mr. and Mrs. Byron Brock, will scramble during the March 3 matinee performance in the Astrodome. Not only will they have the opportunity to catch a calf, he will be part of the Saturday afternoon entertainment package that includes the best rodeo contestants in the world and stars Kenny Rogers and Dottie West as the featured entertainment.

Always a favorite with rodeo audiences, the calf scramble begins as an athletic event in the rodeo arena. However, for the contestants who manage to catch a calf, halter it and drag it across a finish line, the scrambling is only the start of a year-long educational experience. Each winner in the calf scramble receives a \$275 calf purchase certificate which enables him to purchase a purchased, registered heifer that he agrees to feed, fit, groom and return to the Houston Livestock Show for

special competition the following year.

Each winner also agrees to keep accurate monetary

records, submit monthly progress reports both to the livestock show and to his individual sponsor, photographically chronicle the progress of his calf and prepare a 500-word essay on his project. Every performance of the 1979 Rodeo will feature a calf

**Cotton like you've never seen**

This great new variety was introduced for wide area planting only one year ago. And already it's becoming one of the most popular cotton varieties in the Southwest. If you've seen it are excited about its performance, what they liked about Lockett 77:

- "Disease was not a problem." Multiple disease tolerance includes protection against the fusarium wilt-nematode complex.
- "It came out of the ground real fast." Excellent seedling disease escape and tolerance provide good early-season yields.
- "It fit my conditions exactly." Early maturity makes Lockett 77 a good choice for short season production.
- "The lint tested out real well." Fiber qualities are outstanding with good strength and uniformity ratings.
- "Lockett 77 was a beauty in the field." Foliage is sparse on short- to intermediate size plants. Short, close-fruiting branches make Lockett 77 ideal for stripper harvest.
- "The field looked white with my narrow row planting." An excellent stripper cotton.

If you weren't among the farmers who planted Lockett 77 last year, talk to your ginner. If he doesn't have a sample in hand, he can get it for you. You're going to be really excited about the first field of Lockett 77 you see. It might as well be yours.
