Electric Co-ops are DEMOCRACY

Rural electric cooperative systems were created by ru-ral Americans themselves to bring electricity to their farms and homes and business enterprises, when ser-vice was unavailable elsewhere.

Motivated only by the need of the consumer-member and based on sound demo-cratic principles, our enter-prise has helped bring the benefits of Twentieth Cen-tury progress to rural areas, and has proved itself a model of democracy in action. of democracy in action

The Church is God's appointed agency in this world

for spreading the knowledge of His love for man and

of His demand for man to respond to that love by

loving his neighbor. Without this grounding in the

love of God, no government or society or way of life

will long persevere and the freedoms which we hold

so dear will inevitably perish. Therefore, even fram

a selfish point of view, one should support the Church

for the sake of the welfare of himself and his family.

Beyond that, however, every person should uphold

and participate in the Church because it tells the truth

about man's life, death and destiny; the truth which

alone will set him free to live as a child of God.

LEGISLATIVE REFORM URGED—

House Speaker Ben Barnes believes powr of legislative conference com-mittees (which wrote at least two dozen of the bills passed in the last week of the Legislature's session) should be reduced. Rank and file lawmakers also should have more to y about how state money is spent,

"There were riders in the last appropriations bill I didn't know were there myself," Barnes admitted. "It you take the rider provision away rom conference committees, that would accomplish a lot. The public suffers more from riders than from dollars and cents changes in con-terence committee."

Barnes made the comments while

In Texas.

Increasing maintenance cost of the farm-to-market system has become a major budget item of the Texas Highway Department — some \$21 million a year.

Total cost of the present farmto market system — including initial cost, improvement and betterment— amounts to about \$830 million. Much of the increased cost of construction amounts to about \$830 million. Much of the increased cost of construction and maintenance of the FM roads has resulted from the higher-type construction and traffic service demanded by modern-day traffic. Some of the FM roads are four-lane, divided with paved shoulders and other refined features undreamed of 15 years ago.

One other task remains for those of us who in living for our nation face the task of supporting those who memorial Day never lived to know raise is badly overdue. I hope a

that their valor is indeed justified.
General Eisenhower once said that "To live for your country is as demanding a duty as to die for it."
Indeed, a free nation really is the sum total of the people who live in it, added to the inheritance of those who have gone before. A free nation is what its people make of it, bullding on the foundation of the past.

It is impossible for me to comprehend the present priorities under which untrained, school drop-outs in the Poverty Corps are paid more per month than the soldiers, sailors, and immediately in the protect our nation. This inequity must be remedied immediately.

I think these tasks of support for incompleted complex training and are offering their lives to protect our nation. This inequity must be remedied immediately.

I think these tasks of support for our defenders are appropriate for when Memorial Day, Flag Day, and Independence Day call upon us to reaffirm our support of the miracle that is America.
