

## Baseball-sized hail shells town

A storm cropped up in the Lamb County area Monday night and built in intensity as it moved across Hale County. Funnel clouds were reported in several different areas in the Lockney vicinity, one passing between the towns of Lockney and Floydada.

The worst of the damage seemed to be confined to the town proper. Hail from pea size to baseball size was dropped on the town anywhere from 20 to 40 minutes. Rain varied from 1-1/8" to 1-1/4" within the city limits.

Clyde Stapp brought a sample of the random-shaped and sized hailstones to the Beacon office. The largest he found landed in his yard and buried up in the mud except for a section that protruded above the surface. Stapp recovered it from his yard after the storm passed. The hailstone measured 11" in circumference.

Stapp said he had lived at Lockney 55 years and in Oklahoma before that and he had never seen hail to compare with that.

Sallie Reyes and her eight-year-old son, Robbie, also brought in hailstones from golfball to baseball size.

The hailstones brought in by Stapp were a culmination of many different smaller stones frozen together to form one huge stone. Hailstones brought in by the Reyes were one smooth egg-shaped ball of ice.

Intentions made by the hail in the ground were deep enough for a person to insert their fingers to full length, but not big enough to accommodate the size of a fist.

Broken windows were reported at the Jim Bob Martin and the Terry Keltz residences. Cleatis and Betty Hayes experienced a leak in their bedroom caused by a hailstone smashing the top of their trailer.

The storm covered a strip about 4 to 5 miles wide from the Hale County border to Aiken, across Lockney toward Cedar Hill.

Jett Major, County Agent, reported damage to crops light. He said he had

seen wheat damaged 50 to 60%, but considering that a wheat crop could be totally destroyed in five minutes with small hail and a wind, the area farmers were extremely lucky.

Some damage was done to corn, wheat, cotton, and milo. The corn and milo will recover, Major said. Most farmers will plant soybeans in place of cotton this late, he finished.

Paul Schacht reported 1-3/4" of rain with hail west of town.

1/10 inch rain with light scattered hail was reported on the Don Sutterfield farm 1-1/2 mile southeast of Lockney.

In the Sterley community on the Boyce Mosley farm about 1/2" rain fell. Small hail that fell straight accompanied the rain causing little damage.

Michael O'Connor reported having attended a dinner in Abernathy with several men from the Lockney Methodist Church. On their return trip they encountered light rain at Hale Center. They ran into hail in the eastern part of Hale County about the Hale and Floyd County line. The men continued on their way, to reach the bus barn where they were held up until 10:15. Their van was fortunately not damaged beyond a couple of minor dents.

One hailstone was cut in half and it was discovered to contain 33 growth rings.

Ten to twelve hailstones were weighed and they averaged a pound a piece.

ROBBIE REYES, 8-year-old son of Manuel and Sallie Reyes, is pictured with some of the golf ball and baseball size hailstones that fell in Lockney Monday night along with better than an inch of rain. Some damage to buildings and some broken windows were experienced by town residents but crop damage was light.

## Five factors affect replanting decisions

Five factors should be considered by producers trying to determine whether to replant or replace with alternate crops their corn which has been severely damaged by hail, says an agronomist with the Texas Agricultural Extension Service.

When hail damage occurs on corn early in the growing season, as it has recently on the High and Rolling Plains, replanting may not be possible and deciding whether to plant an alternate crop may be difficult, noted Dr. Kirby Huffman, the Extension agronomist.

"Even though the plant looks ragged, it may be able to recover and produce a good crop despite the condition it is now in," Huffman said.

In making this decision, producers must consider stand reduction, leaf loss, weed control, insect control and calendar date, he said.

"The remaining stand is the first consideration in deciding whether to leave this crop or plant an alternate crop," Huffman stressed. The condition of the growing point will help determine stand potential and help in decision making, he said.

The growing point of corn remains below ground level for two or three weeks after the plant emerges. It is also protected from hail injury by the leaf sheaths that surround the growing point. If the growing point is okay, corn can recover and perform better than a replanted crop or possibly an alternate crop, the Extension agronomist said.

To inspect the growing point, split the razor blade, he advised. If the growing point is okay, it will be white in color and will be firm textured. If the growing point has been damaged, it may be discolored and soft. This may allow bacteria or other disease organisms to penetrate into the growing area and cause problems.

"Corn can recover but may have the leaves bound together in the whorl in a condition called buggy-whipping," he said. The plants can recover and yield well. However, recovery may require more time than the producer is willing to give in making a decision. In this case, these plants should be considered as dead plants when the stand count is made, he explained.

Stand count can be made by measuring a set length of row per the row width of an operation, the agronomist said. This is 13-feet-1-inch for a 40-inch row, 13-feet-9-inches for a 38-inch row and 14-feet-6-inches for 36-inch rows. "Make a stand count several places in the field to determine what kind of recoverable stand is still present," Huffman said.

"If you decide that you have enough stand, but plants are ragged, then you may want to use leaf loss to help make a decision," he said. When the leaves are lost at a younger stage it does not affect the yield of corn plant as much as later leaf loss, he explained. At the ten-leaf stage, the yield loss may be as high as 15 percent if severe leaf damage occurs. Losses increase with severe defoliation and then decrease after tasseling to maturity.

If you decide to go to an alternate crop, there are several things you need to look at he said. Weed control and herbicides already present are important factors to consider.

The main problem is that the herbicides that have been used are not all labeled to cover the alternate crop, the agronomist cautioned. The dinitroaniline herbicides such as Treflan and Prowl, do carry a label for post emergence weed control in corn and sorghum. However, these particular herbicides are not labeled for pre-emergence use.

Therefore, if these have been used, a producer would need to plant soybeans in order to utilize the herbicide that is present and avoid herbicide injury to a grass plant such as sorghum. If a producer has used Dual and wants to plant grain sorghum, he needs to use Concep-treated seed which protects the seed from the effects of Dual. Several companies have Concep-treated seed at this time but you should order seed as soon as possible, he noted.

"Other herbicides may cause problems to the alternate crop that you plant behind the corn or cotton crop. Look at the labels, talk to your supplier, and investigate other problems in order to make an intelligent decision," Huffman urged.

"At this time, spraying with all kinds of wonder products probably is not going to help," the Extension specialist said. Foliar feeding of fertilizer and fungicide of this crop is probably not going to make that much difference and now is not the time to spend extra money on a crop that may or may not make it, he cautioned.

"You need to look at the crop, make a sound decision, either keep the crop that you have and live with it, or go to an alternate crop as soon as possible in order to minimize losses and try to make money and pay your bills at the same time."

If producers have questions concerning this, their county Extension agent has a publication in his office concerning leaf loss and information that might help in making a decision, Huffman said.

## Water cut-off charges raised by city council

Bids were opened for water and sewer improvements in connection with the Community Development Block Grant at the regular City Council meeting last Thursday morning. Low bidder was Rhode Pipe Company of Silverton with a bid of \$107,603.00. The council accepted this bid and awarded the bidder the contract.

A steering committee had been appointed to consider an electric rate hike by the Southwestern Public Service Company. The council voted to accept the increase rate of 9% agreed upon between the committee and SWPS. Southwestern had asked for a 12.2% increase.

Ordinance No. 219, an ordinance relating to a water supply contract, was passed.

The form of such contract approved and authority designated to Mayor J.D. Copeland in behalf of the City of Lockney, declaring an emergency. The contract was signed with Mackenzie Municipal Water Authority.

A model structural ordinance, Ordinance No. 220, was passed, establishing minimum standards governing the use,

occupancy and maintenance of buildings, dwellings, dwelling units and structures. It also established minimum standards governing supplied utilities and facilities, and other physical things and conditions essential to make buildings safe, sanitary and fit for human habitation.

The minimum standards governing the condition and maintenance of buildings, dwellings and structures was established. Certain responsibilities and duties of owners and occupants of buildings along with penalties for violators were fixed by the ordinance.

A model property maintenance ordinance, known as Ordinance No. 221, was also passed at the Thursday meeting also. That ordinance requires weeds and grass to be cut upon premises and that rubbish and trash be removed therefrom. A penalty for failure to comply with such ordinance provides that the same shall be done by

the city in the event of such failure and provides for the filing of a lien upon property for exposure incurred in removing. The ordinance declares the allowing of weeds to grow and/or trash

and rubbish to accumulate to be a nuisance.

Ordinance No. 220 and 221 can be found in the Public Notice section of this paper in their entirety.

The charge for water cut-off was raised to \$10.00.

The attorney for the city was asked to draw up a new ordinance prohibiting livestock in the city limits.

Immediately following the regular meeting, the council went into executive session to consider a personnel grievance. The grievance was settled acceptably to all parties.

In last month's meeting the paving contract was awarded to High Plains Pavers, Inc. of Plainview, who submitted the lowest bid of \$12,376. The paving is expected to be completed by the first of September.

## Livestock Company given award

BY KEN V. CAMPBELL  
In June of 1981 Floydada Livestock Sales Co. joined a state wide voluntary program to finance more aggressive beef promotion.

Under the program, which has been endorsed by five leading livestock organizations in the state, 25 cents per head is collected on cattle and calves sold through participating markets, packers and order buyers.

Collected funds are remitted to the Beef Industry Council of the National Livestock and Meat Board for distribution of the collected funds for education, promotion and research of beef cattle.

The Floydada Livestock Sales Co. has

collected an average of \$1,000 per month for their first nine months in participation of the beef promotion program, which is an excellent record.

This, I believe is an extra bonus for the Floydada business man because of the number of beef producers and buyers from other counties coming to the Floydada area.

On April 12, 1982 the first National year-long Beef Promotion Campaign using T.V. as well as popular magazines was launched.

Floydada beef producers and consumers may see their investment in the beef promotion program in this month's edition of Family Circle or next months

July edition of Better Homes and Gardens. In months ahead such magazines as Sunset, Woman's Day and McCall's will feature beef promotion ads. T.V. ads are being used in high populated areas such as Dallas, Houston, etc.

Such a program carries out Farm Bureau's policy of having producers voluntarily financing beef consumer education, promotion and research.

Let me emphasize the fact that the program is voluntary. Any cattle producer may elect not to participate by telling the attendants on duty at the market, prior to the sale, not to deduct the 25 cents per head.

## Land Bank interest hike

Interest rates on all Land Bank variable rate loans will be increased to 11-1/2 percent on farm loans and 12 percent on rural residence and farm-related business loans, said Tommy R. Ogden, Manager of the Federal Land Bank Association of Floydada.

These rates became effective June 1, 1982.

According to Land Bank President Thomas H. Benson, "Marketing conditions have prompted the Bank, with full cognizance of the problems facing agriculture, to recommend the increase."

"Refunding maturing bonds having a face rate ranging from 6.65 percent to 8.70 percent, with new ones in the 14

percent range continuing to cause obvious pressure on the Bank's earnings," Benson said.

The Federal Land Bank Association of Floydada makes long-term real estate loans on farm and rural residence property in the counties of Floyd, Motley, and Briscoe.

## Old Fashion Saturday date set in August

The Lockney Chamber of Commerce met Monday morning, June 7 at Strickland's Cafe for their breakfast meeting.

The membership drive has been completed. J.D. Copeland gave a financial report.

Plans were discussed for Old Fashion Saturday scheduled for Saturday, August 21 from 10:00 a.m. to 5:30 p.m.

A sidewalk sale will set the pace for the day's activities beginning at 10:00 a.m.

A swap area was discussed, along with children's games for the younger set and an old time gospel sing for the older set.

Gale Kring and Sam Fortenberry, co-chairmen of the committees responsible for planning Old Fashion Saturday were asked by President Clar Schacht to bring their final plans with confirmations to the meeting next month.

A square dance will probably be provided for the occasion, but no definite time was set for it until each club could be contacted.

A report given on Clean Up Day on May 27 indicated some 30 dead and unwanted trees had been removed. Additional loads of trash were also picked up, making the clean-up a success.

GEORGE ALBERT watches as a crew starts to reshingle the Evans Baptist Church on Locust Street. Further remodeling is planned for the future to the inside of the building.

### This Week

#### Softball

A double elimination men's softball tournament will be held at Lockney beginning at 10 a.m. Saturday and continuing Sunday afternoon.

The public is invited.

#### Bible School

The First Baptist Church will have pre-registration for their Vacation Bible School Saturday, June 12.

It will also be Kite Flying Day. Those attending will fly kites starting at 10 a.m. and enjoy a sack lunch together, finishing by noon.

The Vacation Bible School will be held Monday through Friday, June 14-18 from 8:30 a.m. to 11:30 a.m. daily.

#### Choir

The Harvesters, a choir from the Southwestern Assemblies of God College in Waxahachie, Texas, will be at the First Assembly of God Church located at East Second and College Streets in Lockney on Friday, June 11 at 7:00 p.m.

The public is invited to attend this concert. No admission will be charged.

#### Executive Committee

The Executive Committee of the Floyd County Program Building Committee will meet at 7:15 a.m. Thursday, June 17 at Stricklands. All Executive Committee members and other interested persons are urged to attend.

**THE COUNTRY MUSIC ROAD SHOW, "Ralsin' a Ruckus!", will be presented at the football field in Floydada June 15.**

Produced by South Plains College and sponsored by the Floydada Chamber of Commerce, the show will begin at 8 p.m. Gate admission is \$2. Featuring a 12-member cast and more than 50 classic and contemporary music hits, "Ralsin' a Ruckus!" is an extravaganza of music, lighting, costumes, skits and dance which runs the gamut of country music taste. The show's producer will present film clips of the show at the 6 a.m. Chamber of Commerce breakfast to be held June 14 at the Massie Activity Center in Floydada. Breakfast charge is \$2 per plate.

## Demo runoff results

Floyd County went with the state choices in two of the four Democratic Primary races in last Saturday's election, and gave only a one-point lead in the Attorney General race.

Floyd County gave Representative Jim Mattox 80 votes to 79 for former U.S. Attorney John Hannah for the attorney general nomination.

State-wide, Hannah pulled 7,012 to Mattox's 6,886 for his spot opposite Republican nominee Bill Meier of Eulless in November's general election.

Floyd County picked state Senator Pete Snelson of Midland over Austin lawyer Garry Mauro 99 to 58. State-wide, Snelson took 8,413 votes to Mauro's 5,201 in the bid for the land commissioner seat.

Snelson beat Mauro in the May 1 primary, but Mauro picked up the endorsements of the third and fourth place finishers state representative Dan Kubiak and farmer George Fore of Paducah.

The Republican nominee for land commissioner is Woody Glasscock of Hondo.

The Democratic judicial races had Dallas lawyer John Humphreys against Austin lawyer Charles Campbell in a run-off for one seat on the Texas Court of Criminal Appeals and State District Judge Bill Black of Belton against Dallas County Criminal Court Judge Chuck Miller for the other.

Humphreys took 81 local votes to Campbell's 71. State-wide, Humphreys had 6,262 votes to Campbell's 5,201 in the Place 1 nomination. Republicans do not have a candidate for the seat opposite Humphreys.

The Republican nominee for the seat

sought by Black and Belton is Ray Moses. Black was ahead locally with 86 to Miller's 64. State-wide, Miller took 5,975 votes to Black's 5,669 for the nomination. Place 2 on the Court of Criminal Appeals.

## Letter to the editor

Dear Editor:

Most people may not realize the generosity offered by Floydada merchants. This letter is an attempt at showing appreciation for that generosity of all merchants with special emphasis on two, who, as of late, came to the rescue of the 1956 Junior Study Club.

We originally established the arts and crafts festival to help generate more participation and activity in conjunction with the county's celebration of the Old Settlers Reunion. However, we met great difficulty in locating a location suitable for such a project. Last year Kirk and Sons aided us by allowing us to use a vacant building of theirs. This year, City Auto went to much trouble to make everyone involved with the show comfortable. They not only afforded us a building to use that entire day, but helped prepare the showroom for the festival, were gracious hosts during the festival, and even did much of the clean-up after the festival. We are very grateful for their generosity.

With sincere gratitude,  
1956 Junior Study Club

## Letter to the editor

TO THE EDITOR:

The day to day management of any hospital has become very complicated within the past twenty years. Every hospital must deal with over one hundred Local, State and Federal Agencies.

The Hospital Administrator must keep abreast of rapidly changing rules and regulations and strive to abide with all of the various regulations. The Administrator must be concerned with controlling costs while continually striving to improve patient care. This means the Administrator is constantly walking a tight wire.

No one in the community with the exception of the Administrator can possibly be aware of all the problems being faced by today's hospitals.

No matter how good the intentions of the Governing Board may be, they cannot be expected to understand the Nuts and Bolts of Hospital Administration. Physicians rarely have any expertise in managing Hospitals and Hospital Department Heads seldom see the total picture and are primarily interested in their own department. Many tax payers are only interested in lower taxes.

It is the responsibility of the Hospital Administrator to attempt to deal with all of the above people in order to continually provide good patient care. Herein lies the problem, it is impossible to please all of these people. Therefore they assume that the Administrator is indifferent to their problems or is not performing to suit them and should be replaced or pressured to do things in a different manner.

It has been my pleasure to know Mrs. Gayle Fortenberry for the past five years or so. I have always been impressed with her desire to improve the Lockney Hospital and her genuine concern for good patient care. She has been active in Local and State Health Care Organizations that promote better patient care.

Gayle does not know that I am writing this letter and it probably will not affect her resignation. I merely wished to present my feelings and thoughts to the people of Floyd County so that you might be more understanding of your next Administrator and hopefully that person might receive the support and backing necessary to properly manage your Hospital.

There is an Old Hospital Proverb that goes thusly, "The Function of the Physician is to Heal. The Function of the Board is to Set Policy. The Function of the Administrator is to implement policy and manage the Hospital."

Sincerely,  
Gerald Moore, Administrator

## City-wide blood drive set

The Memorial weekend that has just been; the Fourth of July weekend coming up, both will make a critical drain on the blood supply in our area.

A blood drive, sponsored by the Floydada Women's Chamber of Commerce will be held at the First National Bank Community Room, Thursday, June 24, from 4 p.m. to 7 p.m.

A goal of at least 35 pints is projected for this community.

### The Donation Process

Donors give blood in one of two ways. They either go to a blood center, or the blood center staff comes to them through a mobile blood drive.

Blood donors at either location receive specialized attention so that the experience is as pleasant, safe and brief as possible. First, the prospective donor is registered and asked some simple questions about current health and medical history. A mini-physical examination is conducted to check the volunteer's temperature, blood pressure, iron level, and pulse. For the protection of both donor and patient the volunteer must meet basic qualifications to donate.

If all the checks show the volunteer to be healthy, he or she is escorted to the donation area. While relaxing on a lounge, the donor's arm is cleaned and a unit of blood (approximately one pint) is collected. The blood flows into a bag and is immediately mixed with an anticoagulant and preservative. The donation itself only takes about 5 minutes. The donor then rests a few minutes, has a light snack and beverage, and returns to normal activities.

The donation of blood is the first and most important step in the lifeline to the patient. However it is only the first step in preparing a unit for transfusion to the patient. It must now undergo a series of tests and processing steps before it may be used.

In a complicated, time-consuming process the blood must be typed, tested for antibodies and hepatitis, and in some cases divided into components. It is then carefully labelled and distributed to the hospitals. The entire processing routine takes about six hours. For this reason, an ample supply must be ready at all times, before it is needed. It is too late, once an emergency occurs, to begin the process.

Blood centers don't need blood, people do—people like you and me, young, old, rich, poor, black, white, or brown—six of every ten people will

**CAPROCK HOSPITAL received a Community Service award in recognition of continued participation in providing the Gift of Life. It was presented by Jo Landrip, who is with United Blood Service of Lubbock. She is presenting the plaque to [l-r] Jean Appling, Director of Nurses; Joe Rice, hospital administrator; and Nell McClung.**

need blood in their lifetimes.

Many people never think of where blood comes from. The assumption is that when blood is needed, it will be on the shelf in a hospital. The truth is that unless people give blood, it will not be available. It will not magically appear on the shelf, nor can it be conjured up in some laboratory. The only way to get blood is from a healthy human being.

Blood banking began only a quarter of a century ago when Dr. Charles Drew, a black physician from North Carolina, discovered a means of preserving plasma by the freeze dry process. He established one of the first blood banks in the United States and became one of the foremost authorities on the storage of blood and blood plasma. He organized banks for the Red Cross and the National Research Coun-

cil. He also headed the Blood for Britain Project, chosen unanimously for the job by this fellow scientists.

In addition to Dr. Drew, Dr. Elmer DeGowin of Iowa and Dr. John B. Alsever of New York developed long-term preservatives. Their work made it possible to store blood for 21 days.

New preservatives have since made it possible to store blood for 35 days.

Blood is living tissue which literally is the "river of life." It carries food, oxygen, waste products, water, and infection-fighting bodies to all parts of the human body. Without this lifegiving river, the human organism could not survive.

For more information contact, Darlynn Hambricht, 983-3498. "Your donation will be much appreciated," Darlynn said.

## Puppets found effective in vacation bible schools

Puppets have been used in the Vacation Bible Schools in Lockney this is an effective means in telling stories and singing songs. A visual aid has been proven to make a bigger impression than an audio aid.

The Main Street Church of Christ also used a computer with good results. Cherilen Russell, director, said she has been working with the Christeens, a group of young people who have been the operators and voices of the puppets.

The Christeens helping with the puppets were Aaron Kidd, Ron Cates, Jerry Klein, Betty Cates, Terri Hill, and Virie Annie Harris.

The puppets introduced on Monday were Robin, a twelve-year-old boy, and his eight-year-old brother, Rusty.

Ralph Red Elk and Ronsy, friends of Rusty's, were introduced on Wednesday.

Today Tonya and her friend were also brought in as new puppets.

The Methodist Muppets were made by Molly Huffman, who disclosed she made the seven muppets in a week for the Vacation Bible School.

The theater was cut out by Mike Mooney and Warren Mitchell. The United Methodist Youth assisted.

Joel and Matt Mitchell painted it.

Scripts for each age level have been written by Linda Terrell, Dana McCarty, Jason Johnson, Matt Workman, and Kori Kellison, first and second graders operated the puppets for the photographer.

The Rev. Michael O'Connor's

## Perspectives

BY MICHAEL O'CONNOR

What is the source of war in our midst. According to the Biblical writer James, the reason is "you want and do not have." A quick examination of the wars in the last couple of centuries would confirm that observation. Either they have been primarily economic in scope, or wars have been fought to gain territory or power.

We have in the U.S. seen ourselves as the defenders of freedom, and have supposedly only fought in wars to attain the preservation of that goal. Thus, we are supposed to have fought only on the highest principle. Would we ever then become the aggressor, the one to start a war, one in which nuclear armaments would be used?

The answer most commonly heard is, "Certainly not!" But, I am not so nearly convinced. A recent movie showed us going to war with the Russians over an economic conflict. In the end, convinced the Russians would fire nuclear weapons at the U.S., the President orders our own arsenal turned loose. While movies are certainly not authoritative, such a plot is not all that far fetched. If we thought we were facing massive destruction, we would quite likely shoot first. This because of the nature of the weaponry. Howitzers do not wreak the kind of damage bombs do, and conventional explosives do not radiate innocent people to death hundreds of miles away from the target.

Certainly in war innocent people die, but a conventional bomb dropped in Amarillo will not kill people in Lockney, and certainly will not continue to kill for years afterward.

Chemical and germ warfare is often decried as immoral for the reason that its effects are not limited to the area under attack, and are not controllable. The same hold true for nuclear weapons, and yet we are still trying to defend having them.

Is just war possible? If I were asked that question ten years ago, when I was trying to figure out how to stay out of the draft, I would have said the answer was a resounding "No!". While I am still convinced that most of the wars we see going on, and most of the ones fought in history were not just wars, I

would have to say there were times when our forefathers went to war with proper justification. World War II is an obvious example.

On the whole, however, wars are not fought in order to stop some crazed madman bent on destroying a large part of the human race. Currently we are seeing several major conflicts. In the Falklands, the major issue seems to be national pride and greed. In Israel and Lebanon, you have defense of territory opposed to national identity. And in Iran, you have a "holy war."

In the case of the first, I doubt there is much "just-ness" involved, though the parties involved are most assured of the rightness of their actions. The other two conflicts are measured by one's perspectives and loyalties.

The criteria for determining just-ness vary with the individual making the statements. For some the preservation of human dignity and freedom are tops, for others simply the preservation of life in the face of an aggressor. One thing that shines through in almost any treatise is the one waging a just war should not be the one who begins that war.

That rule becomes more difficult to follow in the case of nuclear arms. If the enemy has the power for near complete destruction, and that enemy is apparently going to use that power, should he be stopped at any cost and with any means at your disposal? That depends on what it is you think you are defending. If it is your own life, the answer tends to be "yes." If it is an ideal, such as freedom, or religious liberty, or some other concept, the answer is much more dependent on the depth of one's commitment to that ideal.

If then we are defending "freedom" and we feel that concept is threatened, then we may well decide to launch pre-emptive strikes to preserve that freedom. Such is the case in the current Israeli conflict. But then that person becomes the aggressor, the striker of the cheek, so to speak. Sympathy does not tend to go to the initiator of conflict.

Is there any basis for becoming the aggressor, either in Hebrew or Christian thought? The argument for and against will be the subject next time.

Wes Brown

## Journalist joins Hesperian

Wes Brown, an award winning journalist, began editorial and photographic duties at the Floyd County Hesperian on Monday.

Brown, 22, has been a student at Texas Tech and Amarillo College, completing all required journalism courses including editing, photojournalism, and layout and design.

He served as features editor of The Ranger, the Amarillo College student newspaper, and received the Ranger Commendation Award for photo layout/design in the Spring of 1982.

As staff writer, he received the Texas Community College Press Association Second place award for magazine

layout.

As a 1977 graduate from Iraan High School, he served as yearbook editor and staff photographer. He received a \$600 performance scholarship in journalism for Amarillo College.

Born in Gorman, Texas, Brown moved with his family to Iraan and lived there for 16 years.

His father, Ray, is butcher at the H&H Grocery Store in Iraan. His mother, Shirley, is bookkeeper at Garrison's Welding Co.

## McCain graduates in advanced banking

Larry McCain, son of Larnce and Clara McCain of Lockney, graduated with 253 classmates when they participated in graduation ceremonies at the Southwestern Graduate School of Banking on the Southern Methodist University campus in Dallas May 4, 1982.

The school is a three year course in advanced banking techniques. McCain,

his wife Debbie, and their two children Dale and Christy live in Santa Fe, New Mexico, where he is employed with the First Interstate Bank of Santa Fe. He is Vice President and Manager of the Cerrillos Road Branch.

McCain has been employed with First Interstate Bancorp for the past 10 years, having worked in San Francisco, California prior to his present location.

MRS. PAUL NASH

## Schreiner, Nash repeat vows June 5th

Mr. Paul Duane Nash, son of Mr. and Mrs. J.D. Nash of Floydada married Miss Stephanie Schreiner, daughter of Mr. and Mrs. Robert T. Schreiner of Lubbock on Saturday, June 5 at 10:30 a.m. during a special worship service at Second Baptist Church. Dr. Hardy Clemons and Mrs. Dorothy Thompson officiated at the ceremony.

Mrs. Kathy White and Mr. Jesus Rangel, Dallas, served as honor attendants.

The bride wore a gown of ivory peau de soie, Venetian lace embossed with seed pearls and chapel-length train. Her Tudor head-dress, covered in Venetian lace, was completed with a bouffant veil of ivory illusion. She carried white roses, stephanotis and needle-point ivy.

The matron of honor wore an Edward-

ian gown with ivory bodice and peach skirt of muslin de soie over summer taffeta. Her bouquet included pale peach rosebuds and stephanotis.

The wedding processional was led by eight members of the church liturgical dance ensemble, wearing ecru muslin costumes and floral coronets of small peach and ivory blossoms. The church choir accompanied their entrance and provided special wedding anthems.

Miss Schreiner, a graduate of Baylor University, is a teacher of Honors English and Creative Writing at Coronado High School, Lubbock. Mr. Nash, Texas Tech University graduate in Landscape Architecture, is presently employed as Operations Manager of Caprock Growers, Inc.

After a wedding trip to Sante Fe and Estes Park, the couple will make their home in Lubbock.

## Double-ring ceremony weds Morris, Campbell

Adeana Morris became the bride of Gale Campbell during a double ring ceremony Saturday, May 22, at 6 p.m. in the home of the bride's parents. Performing the exchange of vows was the Rev. Floyd C. Bradley, pastor of the First Baptist Church, Floydada.

The couple are the son and daughter of Mr. and Mrs. Dean Morris, Floydada, and Mr. and Mrs. David Campbell, Floydada.

White bird cages with doves and satin streamers marked the entrance to the wedding. A white archway en-pined with lemon leaves held large baskets of coral gladiolas. Gracing each side of the archway were matching baskets of gladiolas with leather leaves and ivory bows.

Musical selections were presented by Jo Payne, pianist, who sang "One Day At A Time" and the "Wedding Prayer." Vocalist Karen Wason, cousin of the groom, presented "The Rose" and "The Wedding Song."

Guests were registered by Miss Camille Petty, cousin of the bride, of Ratliff City, Oklahoma. The glass and brass register table was centered with a plaque of the couples wedding invitation and a small arrangement of coral gladiolas and baby's breath.

Given in marriage by her father, the bride wore a formal gown of ivory organza. The gown featured a scoop neckline outlined in Venice and Brussels lace. Seed pearls on lace adorned the bodice, the long full sleeves of imported English net were cuffed with a wide border of Brussels lace. Pearls in lace encircled the cuffs. The full A-line skirt had motifs of Venice lace and a wide scalloped border of Brussels lace with multiple tiers of tiny, pleated deep ruffles forming the chapel-length train.

For her headpiece the bride chose a picture hat of ivory silk organza. A waltz length illusion veil cascaded and drapes effect. The hat was completed with tiny seed pearls encircling the inside brim. She carried a bouquet of imported hand blown glass with silk, sweetheart coral rosebuds and ivory satin and lace ribbons entwined in the glass.

Following tradition the bride carried a small Bible given to her as an infant for something old. Something new was her wedding attire, something borrowed was a single stand of cultured pearls with bracelet and earrings completing the set borrowed from her mother. Something blue was the blue ribbon in her ivory garter.

Miss Shele Morris attended her sister as maid of honor. Matron of honor was D'Lyn Morris, sister-in-law of the bride, of Plainview and Jennifer Campbell, niece of the groom, of Herkimer, New York, served as Jr. bridesmaid. Jessica Campbell, niece of the groom of Herkimer, New York, and Kizzy Petty, cousin of the bride of Ratliff City, Oklahoma, were flower girls.

The bridesmaids original gowns were of coral taffeta with deep ruffles forming an off the shoulder neckline. The fitted bodice and full length gathered skirt featured a crushed cummerbund at the waist. The Jr. bridesmaid wore a short coral dress of organza with a skirt of miniature pleats. Bridesmaids carried cascades of coral gladiolas and baby's breath. Flower girls were dressed in identical short dresses of pale apricot silk organza with tiers of ruffles and lace. They carried matching ivory lace baskets with coral sweetheart rosebuds and imported ivory baby's breath. All attendants wore matching halo's of baby's breath.

Gary Campbell, brother of the groom from Herkimer, New York, served as best man. Greg Campbell, Wichita Falls, and Shad Morris, Floydada, brothers of the groom and bride, respectively, were groomsmen. Ushers were Lindan Morris, brother of the bride of Plainview and Ron Graham, Floydada.

The grooms formal tailored tuxedo was caramel with an ivory pleated shirt. The tux was completed with an ascot tie. Groomsmen and ushers were dressed identical to the groom and wore matching bow ties.

### RECEPTION

A reception following the ceremony was hosted by the bride's parents in their home.

The bride's table of oak and burlwood was covered with an imported Quaker lace runner. The bride's chosen colors, ivory and coral, were carried out with a centerpiece of ivory roses and coral sweetheart roses held in silver with coral tapers on each side. Coral, white chocolate bells and buttered pecans were served. The three-tiered ivory on ivory cake was topped with a handmade porcelain bell. Silver and crystal appointments were used.

The groom's table was covered in an ivory cloth with a silver candelabra holding sculptured tapers of the couple's chosen colors. The groom's cake made of German chocolate held the inscription of Romans 3:1, in newness of life. Trays of finger sandwiches and a silver coffee service completed the table.

Clear wedding bells holding birdseed were passed out by Becky Reeves of Floydada and Michelle Petty of Ratliff City, Oklahoma.

### REHEARSAL DINNER

A rehearsal dinner was given at the Floydada Country Club by the groom's parents following the rehearsal on Friday.

Bar-b-que brisket with beans, potato salad and cole slaw was served with fresh apricot cobbler for dessert. The bride and groom exchanged wedding gifts at this time and members of the wedding party were given gifts of appreciation from the couple.

Following a brief wedding trip the couple will reside in Floydada.

MR. AND MRS. GALE CAMPBELL

## Hobby Club enjoy homemade cookies

The Sandhill Hobby Club met June 3 in the home of Mrs. Neva Smith.

Each club member brought homemade cookies and took them to patients in the rest home at Lockney.

They toured the beautiful Garden Room at the First Baptist Church in Lockney and also visited the Health-Fitness Center.

Glenna Miller conducted the business

session. The officers that served the past year were elected for the coming year: President, Glenna Miller, vice president, Ruth Trapp and secretary-treasurer, Mary Lou Bullock.

Those present were Ruth Trapp, Billie Hanna, Glenna Miller, Mary Lou Bullock, Nora Hatley and the hostess, Neva Smith.

ASHLEY WESTER, JEANYE HUNTER

## Hunter, Wester plan summer wedding

Mr. and Mrs. John T. Hunter of Shallowater announce the engagement of their daughter Jeanye Elayne, to Ashley Blake Wester, son of Mr. and Mrs. Ed Wester of Floydada.

The couple will be married July 31 in Westmont Christian Church in Lubbock.

Miss Hunter was graduated from Shallowater High School and Texas

Tech University. Wester was graduated from Floydada High School and attended Tech.

### FLOYD DATA

Mr. and Mrs. Grady Walker spent several days at Lake Whitney. Over the Memorial holiday they were joined by Mr. and Mrs. Ray Walker, Ashley and Garrett and Mr. and Mrs. Jay Bedford, all of Dallas.

Hinsley, Floydada; Nell and Dub Eubanks, Dallas; Bob and Lois Kerr and Kelbye Bouldin, Lubbock; G.B. and Naomi Johnston, Lockney;

Hubie E. Huckabee and Gloria C., Lubbock; Elanie Stout Mychelle, Barbie and Natalie, Muleshoe; Joyce and Jimmy Ownes, Jason, Dustin and James, Floydada; Georgeaon Mycon and Mike Kattcer, Lubbock; Mr. and Mrs. Winston Gray, Clarendon; Jerry and Darla Chappell, Floydada; La Nell, Stacy, Kristie, Todd Hinsley, Charlene Brown and children, Floydada; Mrs. Ola Warren, Floydada; Mrs. Fred Battey, Floydada; Julie Eubanks, Lubbock; Lourie Johnston, Lubbock; and Mr. and Mrs. Earl Huckabee, Dumas.

## Harrison, Wilks to wed Sat., August 7th

Mr. and Mrs. Joe Max Harrison of Floydada announce the engagement of their daughter, Debbie Lynette to Gregory Lee Wilks, son of Mr. and Mrs. Robert L. Wilks of Brownfield.

The bride-elect is a 1980 graduate of Floydada High School and is currently attending Angelo State University

majoring in Nursing.

The prospective groom is a 1979 graduate of Union High School and is also attending Angelo State University majoring in P.E.

The couple plans an August 7, 1982, wedding in the Bible Baptist Church in Floydada.

GREGORY WILKS, DEBBIE HARRISON

## Nance hosts Lone Star Homemakers Club

The Lone Star Extension Homemakers Club met June 1 in the home of Lorraine Nance in the Lone Star Community.

Roll call was answered with "why I feel safe in my home."

The scripture from II Timothy 4:18 was read by Syble Teeple.

The President, Lorraine Nance, presided over the business meeting. A very interesting program was presented by two 4-H members, Karyn Foster and Earl Broseh, who presented their method demonstration on embryo transfers in dairy cattle. Karyn and Earl will be competing at Texas 4-H Roundup at

Texas A&M University in June.

The next meeting will be June 22 at the Lighthouse Electric building in Floydada with the Homebuilders Club of Floydada serving as hostess to the county wide meeting. Each member is asked to bring something to sell at the auction to be held that day. Proceeds going to help defray the expenses of the delegates going to the state meet to be held in El Paso in September.

Refreshments were served to Syble Teeple, Vera King, Maudie Lawson, Elvira Stewart, Lorraine Nance, Helen Huffman, and visitors Karyn Foster and Earl Broseh.

## Methodist Women enjoy salad supper

The United Methodist Women of Lockney United Methodist Church held their regular quarterly general meeting on Tuesday June 1 in the fellowship hall at 7:00 p.m. A salad supper was enjoyed by members of all three circles within the group.

Edna Cox, president, voiced the prayer of thanks for the meal and presided over the business meeting. Members of the Hill Circle, leader Dahlia Hight, prepared the tables with

beautiful roses and daisies in crystal vases. Colorful place mats were at each place. The Wesley Circle, leader Helen Holt, presented the program.

Declare the wonderful deeds I Peter 9 reporting on our work through our National and World Divisions and inspiring us to do even greater deeds next year. The Ruth Circle, leader Helen Huffman, cleared the tables and cleaned the kitchen.

## Garrett honored with Birthday Coffee

The Dorcas Sunday School Class of First Baptist Church met Thursday, May 27, in the home of Mrs. Cleo Goins with a birthday coffee honoring their teacher, Mrs. May Garrett.

Mrs. Eula Parrock, a guest, gave a prayer of thanks before coffee and tea was served by Mrs. Vada Meredith. Other refreshments were sausage balls, bananas, date, fresh apple cake and a large crystal bowl of strawberries and pineapple.

Mrs. Mary Wilson opened the program by reading "Give me Patients — But Hurry." Also a poem, "God Bless You," was read. Mrs. Ethel Warren also read a poem named, "Cheerful."

The birthday song was sung by all and gifts were presented to Mrs. Garrett.

Present were May Garrett, Myrtice Rainer, Valree Turner, Ethel Warren, Mary Wilson, Lula Stewart, Lois Dur-

ham, Mildred Fuqua, Carrie Cline, Vada Meredith, Cleo Goins, Mable Meeks, Beulah Denison, and guests, Edith Muncy, Eula Parrack and Roberta Hardin.

## Women's softball

Lockney Women's Softball got off to a good start with the local participation in full force.

Anna Anderson, Commissioner of the League, stated "We have a lot of real lively swingers participating this year, and we look forward to not only a good time with all of them, but also hope to keep our funds growing for making our field improvement or obtaining new ones. We are at present looking for a new area in which anyone who would be interested in helping us out is urged to contact me at 652-2753.

"We feel a new field or improved field will keep a larger interest by surrounding teams that may eventually join us or help us get tournaments going as regular interest.

"We appreciate any clubs or businesses that could or would donate to this cause in anyway to do so and urge each and everyone of you to join us in the summer fun."

Season's scores will be posted after

each week's playing.

June 1-4

Monday, June 1: Providence 15, vs. Rookies 10

Floydada 3 vs. DI's Devils 16.

Thursday, June 3: Pink Panthers 6 vs. Frankie's Knockouts 17; Floydada 17 vs. Providence 7

## Men's softball tourney set for this weekend

The Lockney Baseball Association is sponsoring a Men's Softball Tournament (slow pitch) Saturday and Sunday, June 12 and 13.

The tournament will begin Saturday at 9:00 a.m. with a total teams from Lockney, Tulia, Floydada, Plainview, Crosbyton, Silvertown, Ralls, Quitaque,

and Lubbock competing.

Sunday play will begin at approximately 1:00 p.m.

The purpose of this double elimination tournament is to raise money for the baseball league.

The public is invited to attend any or all of these games.

## Today's Lifestyles

by Marilyn Tate

County Extension Agent

### Floyd County Cannery Shortcourse

The Floyd County Extension Service is sponsoring a special one-day short-course on safe and correct cannery operation on June 15, beginning at 8:30 a.m. This shortcourse is for everyone who uses the cannery, so make your plans to attend.

The training will be conducted by Dr. Wagner of the Extension Service, Ray Ashley, Food and Drug inspector from the Texas Department of Health, and Marilyn Tate, County Agent. The shortcourse is free. Location will be the Texas Engineering Extension Center on the Matador Highway (across from Lighthouse Electric).

### Pressure Canner Testing

If you do any canning at home, now is the time to get your equipment in good working condition. Remember that the dial gauge on a pressure canner should be checked at least once a year. An inaccurate gauge can result in either under-processing or over processing your food.

Marilyn Tate, County Agent, will be testing canners with dial gauges on June 11 and June 25, in her office. You are asked to take your canner in, at your convenience, and leave it to be tested. This service is free of charge, and food preservation booklets will be available.

### Machine Embroidery

If you wanted to take a class in machine embroidery in March but couldn't fit it into your schedule, here is another chance! Classes will probably be on Thursday evenings (beginning June 10), but this is subject to change.

All you need is a machine with a zig-zag stitch. Call Marilyn Tate immediately if you are interested - 983-2806. Cost will be \$30 for 12 hours of instructions.

### REFINISHING WICKER FURNITURE

After a piece of wicker furniture has been cleaned and necessary repairs have been made, it is ready for refinishing. Wicker that has never been painted may be given a clear protective finish or it may be painted. Wicker that has been previously painted may be repainted to change colors or to renew the finish, but it is next to impossible to remove old paint from wicker. Unfinished wicker that is to be left "natural" may be protected with a clear coat of varnish or polyurethane. New wicker that is to be painted should be sealed with a wash coat of shellac.

In selecting a paint for wicker, keep in mind that high gloss enamels and polyurethane provide a tough, glossy, finish that resists chipping, scuffing and soiling. Such a finish can be periodically washed or scrubbed down without damaging the appearance or strength of the surface. Low luster paints, on the other-hand, provide a softer, glare-free finish but their surface will hold dust and soil. Low luster finishes will not withstand scrubbing without noticeable change in the appearance.

Of course, the paint-application method you use also will affect the choice of paint. Because of the thousands of intersecting reeds in a piece of wicker furniture, applying a smooth, glob-free finish poses a challenge.

There are three methods for applying paint to wicker—with a brush, aerosol spray or spray gun. It is difficult—but possible—to paint wicker with a brush, even though the finishing material tends to settle in the crevices. Spraying, however, provides a faster and more successful paint finish for wicker. Either a spray gun (for large jobs) or an aerosol-spray paint (for small jobs) may be used.

Most types of paint can be obtained in a pressurized spray can, though they are generally much more expensive than brush-on paints. (Of course, spray guns use the brush-on paints, after they are thinned to spraying consistency with the proper thinning medium.)

Since aerosol spray paints are more expensive, they are not practical for finishing large items. However, for small items, such as a footstool, plant stand or small chair, the aerosol spray

method of application is ideal, because it is quick, easy and not too costly.

Whether spraying or applying paint with a brush, the proper sequence for best results is to work from (1) inside out and (2) from bottom to top. On a chair, for example, this would mean turning the chair upside down to spray the legs and rungs first. Then, place the chair right side up and spray the back, side posts and seat.

If you choose the brush method of applying paint, for the best results, use a clean, stubby brush that will enable you to scrub paint down into the hollows of the woven material. Pour paint into a shallow pan, dip the tip of the brush in a daub or blot it onto the wicker, tamping it up and down so that the bristles carry the paint down into every section. Never load the brush with paint and draw it over the surface, because then it only covers the surfaces and does not fill the hollows without unsightly puddles of paint.

If you choose the spray method, remember one of the biggest problems in using spray paints is confining the overspray or mist to the immediate work area. Small particles will drift and settle on surrounding areas, so it is important to screen off and protect nearby floors, walls and other items.

Because aerosol paints are flammable, it's best to work outdoors on a calm day or in an area protected from the wind. If spraying is done indoors, make sure the area is well ventilated.

Applying spray paint to a wicker surface will likely require some practice. Distance from the spray nozzle to the work surface should be about 12 to 15 inches. If the nozzle is held closer to the surface, too much paint will be applied, causing runs and sags. Holding the nozzle farther away will result in particles of paint drying out before they reach the surface. The resulting finish will be gritty and rough. Always move the can in a straight uniform manner at right angle and parallel to the surface. If the can is moved in an arc instead of parallel to the surface, the resulting finish will be poorly distributed. Too heavy a coat will be applied in the center and a very thin coat at the ends of the stroke. Be sure that each stroke overlaps the preceding stroke by one-half. This will assure a streak-free finish. Keep a small clean paint brush nearby to dab up any blobs

of paint that collect in the wicker crevices. These practices apply also to application with a spray gun. When using aerosol paint finishes, be sure to read the manufacturer's instructions before applying the finish.

A professional looking paint finish on large wicker pieces can best—and most economically—be obtained by using a spray gun.

It is vital that the finishing material—whether polyurethane, latex or oil base enamel—be thinned to spraying consistency with the proper thinning medium. Consult the directions on the paint can. Some enamels require dilution with naphtha rather than turpentine. Polyurethane can usually be thinned with mineral spirits.

Spray guns may be rented from paint stores or rental outlets. Some vacuum cleaners are equipped with special attachments that may also be used.

As with aerosol sprays, experiment to be sure you have a smooth, even spray, and practice the kind of strokes and the distance away from the work necessary to get the paint well inside the weaving of the wicker than just covering the surface.

If the paint is too thick, it will clog the spray gun and build up between the reed.

If it is mixed too thin, it will require several coats to cover. Usually if thinned to the consistency of coffee cream, good coverage can be obtained. One coat may be adequate where new paint is the same color as that already on the piece.

If the existing finish is in poor condition, or if the new finish is a different color from that on the piece, two or three light coats may be required.

It is a good idea to spot prime bare spots before spraying. A nail polish brush is ideal for applying paint to areas where the reed is exposed. Spot priming will result in a smoother and more even finish.

Reference to commercial products or trade names is made with the understanding that no discrimination is intended and no endorsement by the Cooperative Extension Service is implied.

Educational programs conducted by the Texas Agricultural Extension Service serve people of all ages regardless of socioeconomic level, race, color, sex, religion or national origin.

## Floydada Nursing Home Happenings

BY LINDA EMERT

The weather has been cold one day and hot the next. The farmers are about to get the cotton planted. And the wheat is getting ripe and getting ready to cut.

Well, Monday was a holiday so Kim didn't come from Plainview for the music therapy so we played bingo. On Tuesday we had Bible study. One Wednesday we played bingo and the ones that won this week were W.C. Cates with two games, Una Clark with two games, Vera Duke with three games, E.D. Lawrence with two games, and Sue Thompson with one game. On Thursday we have arts and crafts. On Friday we have two movies.

We are glad Mr. Goolsby is back with us at the home again and feeling better.

Here is a list of our visitors for the week: Christine Robertson, Lucille Lobban, Estelle Hinkle, Burmah Probasco, Gene Baird, Dorothy Neff; Mr. and Mrs. Jess Glover, Joyce and James Crowley, Thelma Fawver, Analee Brown, Dana and Jo Lee Ellis, Ethel Sawyer, Helen Breed, Sherry Colston, Ross and Zane, Maurice and Ella Goodwin, Dixie Harris, Gene Baird, Paul and Hauteen Woody, Leona McNeill, Ethel Cross, Mr. Wallace Jackson, Kim Ellis, Todd Anderson, Ruby Gooch, Evelyn Crull, Worth Gwendolyn Howard, Charley L. Berry, Sr., Volleie and Leona McNeill and Otis and Dana Ellis.

## L.V.N. Exam scheduled

The L.V. N. Aptitude for Nursing Exam will be given at 8:30 a.m. this Friday, June 11th. It will be held in room 101 of the Wheeler Building on the South Plains College at Plainview campus located at 8th and Yonkers. The fee will be \$4.00, payable at the time of registration.

Anyone wishing to take the exam must be present by 8:15 a.m. and have with them a completed admissions form. These may be picked up at the college from 8:30 to 5 p.m. Monday through Friday. For more information, call Rick Hudson at 293-3605.

## "Laugh Lines"

BY DON AND SARA PROBASCO

### Bits of Humor, Trivia, and an occasional Word of Wisdom

There's a Texas psychiatrist that's been lecturing to PTA groups around the state on the subject: "Alaska: How to explain it to your children."

Speaking of children, you know you're a success when you earn more than your kids can spend.

Considering the language in some films these days, maybe silent movies weren't so bad, after all.

Did you hear about the doctor who advised a woman that her husband required absolute rest and quiet? "But, doctor," she answered, "he won't listen to a thing I tell him." "A good beginning, Madam. A very good beginning," replied the doctor.

If you want the world to beat a path to your door, just try taking a nap some Sunday afternoon.

We don't mind, though. That's why we offer 24-hour locksmith service at Pro-Lock Shop. If you lock yourself out, even on Sunday, give us a call, and we'll beat a path to YOUR door.

## Lockney Care Center Capers

BY VICKIE HUTTON

This has really been an eventful week. We had three blackout winners this week. Birda Foster, Richard Lanham, and Bill Holt. Mr. Holt is on a winning streak, he has been a blackout winner 4 times in a row. Boy, our bingo cards really get a working over.

Our birthday honorees for June are Euna Bradshaw and Jewell Miller. In addition to the lovely birthday party the ladies of the Main St. Church of Christ gave Mrs. Miller's daughter, Alice Mitchell brought ice cream bars for after bingo Tuesday and we all wished Mrs. Miller a happy birthday and many more.

Thursday we had a special treat when the Sandhill Hobby Club came and served cookies. We really enjoyed meeting these special ladies and the cookies were delicious.

## Hamilton receives degree

Clay M. Hamilton of Floydada received an undergraduate degree in animal science at Texas A&M University's spring commencement exercises.

A total of 3,115 degrees were awarded, including 2,689 undergraduates, 347 master's and 79 doctorates.

Thomas Jones and Joseph Gilmore were able to return home from the hospital. We know they are feeling better because they still have their sense of humor.

Walter Craft is still in Methodist Hospital recovering from surgery. Last report was that he was doing real well. We hope he will be able to come home soon. After writing this I learned Mr. Craft was able to return. Welcome home to all our special people.

Our ceramic class is really a pleasure. Chuck Shockley really knows how to make the class enjoyable. We have made many beautiful things and invite everyone to come and see all the beautiful things.

Until next time; enjoy life, it's the greatest gift "God" has given us.

AWARDS WERE GIVEN at Floydada Junior High to [l-r] Ty Stovall, Outstanding 7th grade boy; David Coronado, Outstanding 8th grade boy; Jaime Thayer, Outstanding 8th grade girl; Paige Cannon, Outstanding 7th grade girl; and Alissa Hambright received a citizenship award.

## Jr. High students receive awards

During Awards Day at Floydada Jr. High School, over 60 students were recognized for their achievements during the school years.

Named Outstanding Girl and Boy for the 7th grade were Paige Cannon and Ty Stovall.

The Outstanding 8th grade Girl and Boy awards were presented to Jamie Thayer and David Coronado.

Citizenship award was given to Alissa Hambright, 7th grade, and to Sandy Carr, 8th grade.

Jr. High graduation was held Wednesday, May 26, at 3 p.m. Eighty-two students received their diplomas from Principal Jimmy Collins.

Tana Perry was pianist for the graduate procession. Jerry Keen gave the Prayer and Pledge to the Flag.

## Beedy finishes at A & M

Tracy L. Beedy, son of Mr. and Mrs. Austin Beedy of Lockney, received an undergraduate degree in agronomy at Texas A&M University's spring commencement exercises held May 7 on the college campus at College Station.

Beedy was a 1978 graduate of Lockney High School. He plans to work for his dad this summer and go into consulting primarily.

A total of 3,115 degrees were awarded at the May 7 graduation, including 2,689 undergraduates, 347 masters and 79 doctorates.

LAURE DADE, 432 E. Ross, proudly shows his ten foot century plant bloom. The century plant is so named because they are believed to bloom once every 100 years. The bloom may reach a height of several feet.

## Commencement to be held Friday

Commencement and Family Night activities for boys and girls who have been attending Vacation Bible School at First Baptist Church this week will be at 7 p.m. Friday. Parents and friends are invited.

Commencement will be in the auditorium, and will feature a portion of the Joint Service that the boys and girls

have been participating in throughout the week. Every boy and girl who has attended will receive a certificate, and those with perfect attendance will also receive a perfect attendance certificate.

Following the commencement exercise, the children and workers will host their parents and friends in their

departments to display their handwork and Bible study activities. Preschoolers will not participate in the Commencement at 7 p.m., but will go directly to their departments. Refreshments will be served in the Fellowship Hall. The church bus will cover its regular route for children who have ridden the bus all week.

## Brandes Stars in Luther movie

Lee Roy Brandes, a pastor of the American Lutheran Church, starred in a film "A Man Called Luther" in the Crawford Hall at the First United Methodist Church in Plainview Sunday night. The presentation was attended by some 200 people.

Brandes grew up in the Providence community and graduated from Plainview High School in 1942.

He graduated from Texas Lutheran College in 1945 and Trinity Lutheran Seminary in Columbus, Ohio in 1949 before he took his first parish in Wichita Falls.

He also had a parish in Seguin at Imanuel's Lutheran Church in the '60's before moving to California.

Brandes pastored two California parishes in Banning and Torrance. He obtained his doctorate in 1972 from the

Baptist Seminary in West Covina, California in counseling and communication.

He has travelled extensively in North America, Europe, Asia and Africa.

Brandes married the former Laura Sammann from the Prairieview Community near Plainview.

Relatives from the area attending the showing of the film Sunday night included Mr. and Mrs. L.B. Brandes, a brother, of Lockney and Mr. and Mrs. Ted Boedeker, of Lockney and Mrs. Clara Stueky of Plainview, sisters of Laura Brandes; Mr. and Mrs. Albert Sammann of Plainview and Mr. and Mrs. Ernest Sammann of Dimmitt, brothers of Mrs. Brandes; the Martin Stoerners, the Wilfred Stoerners, and the Louie Bybees from the Providence community; Mr. and Mrs. Merlin Boedeker of Plainview; Mr. and Mrs. R.L. Ammons of Plainview; and Mr. and Mrs. Alfred Sammann and Mr. and Mrs. Charles Sammann, both of Dimmitt.

Brandes portrayed Martin Luther in the movie as a Reformation leader. Brandes produced the movie, having filmed the production last September in Germany where Luther lived and experienced much of the Reformation period.

The family reported the scenery particularly beautiful. Brandes had said they found the East Germans to be cooperative with their efforts.

Brandes is the founder and president of a company "Encounter". The company has been established for the enrichment of human relationships. He, along with the board of directors of the company, have chosen their series of workshops and correlation of sessions that may be implemented by companies, churches, or other interworking groups as the best medium of presenting a vision of extending the Christian faith.

"A Man Called Luther" is used to set the stage for the Encounter workshops.

# did you know?

Southwestern Public Service Company is part of the Southwest Power Pool, a voluntary group of power suppliers. Membership in this pool increases the reliability of SPS' electric service, since such membership allows transfer of power from another utility system to ours if necessary. Power pools are guided by many checks and balances, and are regularly reviewed by the Federal Energy Regulatory Commission (FERC).

Oscar Hernandez, Local Manager, Tucumcari.

SPS is planning for your future energy demands. Because it takes many years to finance and construct a power plant, SPS' long-term forecasters begin planning 15 to 20 years before the plant will be needed. Through "load forecasting," SPS can predict how much electricity our customers will require in the future. If our forecast is too high, we could build expensive plants prematurely. If it is too low, we might not have enough energy to go around. SPS takes its forecasting responsibility seriously, to bring you reliable electric service next week, next year, and into the next decade.

Larry Simms, Division Superintendent, Lubbock.

Buildup of indoor pollutants may present a serious health risk, since people spend more than 85% of their time indoors. Indoor pollutants can be found in some furniture cleaners, office machinery, fireplaces and building materials. SPS encourages our customers to insulate their homes, yet they should be aware that an airtight home requires daily airing, particularly during winter months or on cleaning days, when household cleaners that may contain dangerous chemicals are used.

Joe Don Parrott, Building & Records Coordinator, Amarillo.

Knowing what electricity is worth is worth knowing. For answers to your questions, call or write your SPS manager.

## Cattlemen's Assn. to hold convention

The Independent Cattlemen's Association is having its eighth annual convention and trade show in Corpus Christi, June 17-19.

South Texas cattle feeder Leon Miller will be the keynote speaker of the event hosting commercial cattlemen from throughout the state. Ben Baisdon, Director of Marketing for the Texas Department of Agriculture and Hilmar Moore, National Chairman of the Beef Industry Council will also address the assembly.

All meetings and activities will be at the Bayfront Plaza Convention Center. The headquarters hotel is the Sheraton Marina Inn.

"Our theme for the meeting of 'Serving and Saving Rural Texas' will be carried throughout presentations by our speakers and business proposals, all in the scenic surroundings of the gulf coast," said ICA President Roy Wheeler of Pleasanton.

Registration for the convention is slated for 2-5 p.m. at the Sheraton Thursday, June 17. It will continue in the Bayfront Plaza Convention Center from 6-8 p.m.

Those who register are invited to attend a cocktail party on the second floor of the convention center from 6-8 p.m. Thursday evening.

Friday, June 18 at 9:30 a.m. Miller will address the first general session with suggestions on expanding the

cattle economy of the U.S. and Mexico. He will be followed by Baisdon, Moore and Becky Terry, president of the Texas Cowbelles. Becky Dobson, editor of the Independent Cattlemen, will be the final speaker of the morning. A luncheon is scheduled at 12 noon with nation-wide farm realtor Greg Bamford speaking.

Afternoon sessions Friday will be highlighted by a concentration on ICA service to youth. Tyler Thomas, regional field coordinator for Texans' War on Crime and Drugs, will detail possible ways for ICA to assist in deterring crime since it is increasing in rural areas faster than in urban areas. Erlene Goertz, Bastrop county ICA chapter secretary, will describe her involvement in Thomas' program.

## Family night hosted by Silverton Young Farmers

Silverton Young Farmers hosted a family night at the school gym on Saturday May 15.

Basketball, volleyball and lots of visiting was enjoyed by all. Sandwiches, chips, cake and tea were served.

Those attending were Mr. and Mrs. Bill Reid, Mr. and Mrs. Donnie Perkins,

Four leaders of youth organizations will follow at 3 p.m. with suggestions on how ICA can better serve their groups. These organizations include the FFA, 4-H, FHA and Texas Young Farmers.

Friday will be capped by a dance with music by top rated singer George Strait from 8-12 p.m.

Saturday, June 19, the morning general assembly will begin with an update on national issues by Congressman Wes Watkins, ICA political consultant Larry Meyers and Agriculture Coordinator for the Office of State-Federal Relations, Ken Jordan.

The ICA House of Delegates will vote on resolutions and the election of new officers the remainder of the morning.

All ICA members and friends are urged to attend.

Mr. and Mrs. George Martin, Mr. and Mrs. Fred Minyard, Katrice and Anthony, Mr. and Mrs. Fred Hill and Staci, Mr. and Mrs. Hand Baird, Russ and Kerry, Mr. and Mrs. Jerry Baird and Kori, Mr. and Mrs. Wayne Stephens, Stephen, Jeannita and Christina, Calvin Shelton, Tobe Riddell and Clinton Dickerson.

## Cattle movement restrictions tightened

Oklahoma and Missouri are two of several states which are tightening brucellosis regulations on Texas cattle. Dr. John W. Holcombe, executive director, Texas Animal Health Commission reports.

Missouri has already imposed stiffer entry requirements on Texas livestock, and Oklahoma's tougher regulations go in effect July 1. Iowa has also put in effect a regulation which would treat Texas as a Class C state instead of a B and C state as provided for in federal regulations. That means more testing of this state's cattle for entry into Iowa.

"It appears that Texas livestock producers can expect more states to increase their requirements for Texas' cattle relating to brucellosis," Dr. Holcombe said.

He cited a couple of reasons for this:

1. Several states are taking action to comply with proposed federal rules;
2. States free or 'virtually free of brucellosis want to remain that way, and thus are imposing the more stringent regulations.

Missouri probably has the most stringent regulations on receiving Texas cattle:

All cattle moving into Missouri, including steers, will require a prior permit from the Missouri Department of Agriculture Animal Health division. Other requirements include: individual identification on health certificates; two consecutive negative tests before movement for females over 18 months of age, followed by a 60 to 120 day quarantine and retest at owner's expense; and one negative test within 30 days of movement for females between four and 18 months of age followed by the same quarantine and retest.

Also, male or female calves under 12 months of age from quarantined herds and adult vaccinated cattle from Texas would not be allowed entry into Missouri under any circumstances. "These same restrictions apply to cattle from Oklahoma, Florida, Louisiana, and Mississippi entering Missouri," Dr. Holcombe noted.

Effective July 1, all female cattle born after January 1, 1982, which are four months of age or older, entering Oklahoma, must be official brucellosis vaccinates, S branded, or sprayed prior to entry.

S branded cattle may move only to a quarantined feedlot or directly to slaughter. S branded cattle are those which may have been exposed to brucellosis.

In addition, out-of-state farm origin

cattle may be consigned to an approved market in Oklahoma without prior test, permit, or vaccination. Before being released from such market, they must meet all of Oklahoma's requirements.

According to records of the TAHC, Oklahoma received 213,000 head of cattle and calves in 1981, Missouri received 4,000 head, and Iowa received 47,000 head. "This will give us some idea as to the amount of trading we do with just those three states," Dr. Holcombe said.

Nationwide, Texas shipped more than 2,046,000 head of cattle to other states in 1981. "The Texas' livestock industry

does indeed depend on other states for markets, so it is imperative that we in this state get on with the job of controlling brucellosis," Dr. Holcombe said.

He said the Texas brucellosis plan is geared to control and eventually eradicate the disease, and a great deal of progress has been made in the past two years when revised regulations were put in effect.

"Cooperation of livestock producers in Texas is on the increase, and this is the key to cleaning up Texas' brucellosis problem," Dr. Holcombe said.

## Annual Swine Short Course set for June 17th

Efficiency, agriculture's priority for the '80s, is important for swine producers looking to improve profits.

Addressing efficiency of the swine breeding herd at the 30th Annual Swine Short Course at Texas Tech University Thursday, June 17, will be Dr. Jack Britt from the Department of Animal Science at North Carolina State University.

Registration that day will begin at 8 a.m. at the Texas Tech Livestock Arena located on the corner of Indiana Avenue and the Brownfield Highway. Fee for the course is \$10 and includes complimentary lunch and coffee breaks. Registrant's spouses, 4-H and Future Farmers of America members will be admitted free.

Speakers for the morning session, which begins at 9 a.m., are Dr. Samuel E. Curl, dean of the Texas Tech College of Agricultural Sciences; Dr. Jack E. McCroskey, chairman of the university's Department of Animal Science; Dr. Gary Smith, animal science professor at Texas A&M University; and Britt.

Subjects to be discussed include variation in pork carcass composition, management during gestation and lactation to improve rebreeding performance and an update on Texas Tech swine research.

The afternoon session will begin at 1:15 p.m. following a noon lunch. Afternoon speakers include Britt, who will address management after weaning to improve rebreeding performance, and Ken Woolley, president, Pig Improvement Co., who will speak on

contributions animal breeding can make to future hog production.

Also included in the afternoon session will be Dr. Rodney L. Preston, Thornton professor of animal science at Texas Tech, who will address animal care.

A question-and-answer period will follow each address. Commercial exhibits by swine industry suppliers will be on display in the Livestock Arena.

The swine short course, organized by Dr. Donald E. Orr and Dr. Leland F. Tribble of the university's animal science department, sponsored by the Texas Pork Producers Board, Texas Pork Producers Association and Texas Tech. Approximately 150 producers from Texas and New Mexico are expected to attend.

For more information or pre-registration forms contact Dr. Leland F. Tribble or Dr. Donald E. Orr, Department of Animal Science, Texas Tech University, Lubbock, Texas 79409, or call (806) 742-2826.

## TCFA 1982 convention set

The 1982 Annual Convention of the Texas Cattle Feeders Association is scheduled for November 7-10.

This year's Convention will be headquartered at the Hyatt Regency, Austin, according to TCFA Membership Director Jim Peterson, who will handle Convention arrangements.

**ELANCO**

TO: SOUTHWEST COTTON GROWERS

Many growers, because of lack of moisture, tight money, and the late season, were not able to get their weed control chemicals down like they wanted to this spring. Chances are some growers will pay the price this fall - the price in a problem harvest and grassy bales; problems no one needs at today's cotton prices.

If you didn't get your herbicide down this spring or banded your chemical, you ought to consider the new TREFLAN® "Culti-Save" option.

A new Texas state registration for TREFLAN® now allows you to protect your investment and your crop from troublesome summer weeds and grasses.

You can now apply TREFLAN® broadcast (either by air or ground rig) to cotton past the four true leaf stage of development and after final bed preparation. One pass with sweep type or rolling cultivator can be used for incorporation.

This new clearance has been obtained to help southwestern growers insure the kind of weed control that only TREFLAN® can offer.

See your chemical supplier for more information about the new "Culti-Save" program for TREFLAN®.

ELANCO PRODUCTS COMPANY

John Deere Super Tractor Savings

**EARN \$1,400 TO \$12,900\***

Buy your new John Deere tractor in June...get bigger-than-ever savings in John Deere money

Take your pick from the 15 new John Deere tractors listed here... 40-hp to 300-hp. Beyond our good deal, you'll qualify for Super Tractor Savings directly from Deere.

\* Pay cash for your new tractor...or finance it with Deere (without waiver)...or lease it from Deere, and you'll qualify for Super Tractor Savings: \$1,400 to \$12,900 in John Deere money, depending on model selected. John Deere finance and lease plans are subject to approved credit.

However, if you finance with Deere and prefer to have finance charges waived until January 1, 1983, you'll still qualify for a bonus from \$900 to \$8,200 in John Deere money (see chart at right).

Your money bonus will be mailed to you after we deliver your new tractor. You can use this John

Deere money bonus to purchase any equipment or services we offer.

Super Tractor Savings at this level run through June 30 unless the offer is withdrawn earlier. Don't miss out!

Tractor Model	Super Tractor Savings	John Deere Bonus
8850	\$12,900	\$8,200

# Pseudorabies threatens swine

Swine producers in Floyd County should keep their guard up to prevent pseudorabies from infecting their herds.

The virus disease has been a major problem in the Midwest but a recent case in Texas has resulted in a number of herds being quarantined, points out Jett Major, county agent with the Texas Agricultural Extension Service, Texas A&M University System.

Pseudorabies is caused by a herpes virus which affects the respiratory, reproductive and nervous systems of animals. The virus has the ability to remain alive in recovered animals, and these apparently normal animals are then a source of infection for susceptible animals.

Most outbreaks occur after infected feeder pigs or breeding stock are introduced into a herd. Once the disease is established in a herd, it spreads to other swine on the farm or on neighboring farms by direct contact between infected and susceptible animals or by way of contaminated clothing, boots or equipment. Dogs, cats, and many wild animals also can spread the disease. The virus can survive and move to other farms in waterways and surface drainage.

According to Major, symptoms of pseudorabies in swine are variable. Baby pigs may die suddenly without showing any symptoms or they may live several days and show signs such as vomiting, diarrhea, listlessness, weakness and loss of appetite as well as incoordination, violent shaking, circling, paddling movement of legs and convulsions. Their temperature may exceed 105 degrees F. The mortality rates for pigs under two weeks of age can be 100 percent.

Older pigs may show similar symptoms and also signs of respiratory involvement such as sneezing, coughing, rubbing of the nose and a nasal discharge. Death losses will range from 5 to 50 percent.

Mature swine are more resistant than younger pigs and symptoms and death losses are not as severe. Pregnant sows may abort or give birth to mummies, weak or stillborn pigs. Sow infected early in pregnancy may return to heat.

To prevent pseudorabies, purchase herd additions only from herds free of the virus. Breeding stock purchased from out-of-state must be negative to a blood test made not more than 30 days before entry into Texas. Regardless of the source of stock, hold new purchases in strict isolation for 30 to 60 days and retest before adding them to the herd.

Restrict visitors from areas where swine are kept. Require clean clothing, and scrub and disinfect boots before entering swine areas. Scrub and disinfect instruments and equipment before using them in swine areas.

Other precautions are to keep dogs and cats away from swine, burn or bury dead animals deeply, fence swine away from waterways and drainage

channels, and keep them from contacting swine on neighboring farms.

Affected herds should be quarantined. Unaffected pigs should be separated from sick pigs and movement between them strictly controlled. Dead pigs should be buried deeply or burned. Recovered pigs should be sold only for slaughter.

Swine recovering from pseudorabies are immune for long periods of time. They can, however, remain carriers of the virus and a source of infection for susceptible pigs.

Temporary immunity is passed to

baby pigs from immune sows by way of the colostrum, but this immunity is not always sufficient to protect young pigs from infection.

A modified live virus vaccine is being used in some states to prevent pseudorabies. It is administered to baby pigs at three days of age and repeated every six months. A high level of immunity is attained, but vaccinated swine can be carriers of the virus and react positively to a blood test. In Texas, a vaccine can be used only with permission from the state veterinarian.

With the recent siege of adverse weather in Floyd County, farmers are once again faced with some serious management decisions concerning the fate of crops damaged by hail, wind and/or washing rains. Many producers have already replanted damaged cotton acreage to cotton again - some doing this whether they wanted to or not due to Federal Crop Insurance Guidelines. Others are going back with soybeans or sunflowers, and still others are waiting to see whether or not the damaged stands will recover.

In spite of very thick crusted soils, wind-beaten seedlings and a significant increase in thrips population, some of the damaged cotton stands have shown enough signs of recovery to justify leaving the field alone. Other crops in the county have also been damaged, but cotton seems to have taken the worst beating. Although several acres of wheat have been hailed out or received heavy hail damage in the county, most of the wheat acreage is in good condition and with the arrival of hot weather to ripen the grain, harvest

## HOME LAWN WEED CONTROL

Home lawn weed control can be very frustrating. Following a good maintenance program will help a lot in building a dense turf that will discourage the invasion of weeds. On the other hand, a weak, thin turf will allow weed seed germination and establishment. This is a case where an ounce of prevention is worth a pound of cure. In other words, \$1 worth of fertilizer, water, and mowing may save you from having to

buy \$5 worth of herbicides.

Once a weed is established, it can either be removed physically by digging, or it can be removed chemically. Physical digging is fine if the weeds are few and if they do not have underground reproduction organs. Dallisgrass is a good example of just such a plant. You can dig it up but the chances are it will just regrow from the underground parts that you don't get.

When considering chemical weed control, it might be well to remember that you are trying to remove an undesirable plant that is growing among desirable plants and many times it is not an easy task.

Herbicides used in chemical weed control in lawns are usually one of two main categories: either pre-emergence or post-emergence. Since it is too late this year to obtain pre-emergence control of most weeds, this article will deal with only post-emergence control.

Generally, lawn weeds may be divided into two groups, those that have broad leaves such as chickweed, henbit, spurge, etc. and those that have grassy type leaves such as dallisgrass, crabgrass, goosegrass, etc.

Grassy type weeds may be controlled in bermuda lawns with either MSMA (monosodium methanearsonate) or DSMA (disodium methanearsonate). Several applications may be necessary and the bermuda may turn yellow, but it should recover. Grassy type weeds cannot be selectively controlled in a St. Augustine lawn. They may be removed by spot treating just the individual weed with either of the above chemical or with glyphosate (trade name - Roundup or Kleenup).

An innovative homeowner can borrow a trick from the farmer in controlling grassy weeds (and broadleaf weeds as well) in his lawn. That trick is the use of a ropewick applicator with glyphosate (Roundup). A hand wick applicator can be either bought or built for next to nothing. Mix one part Roundup with 3 or 4 parts water for use in the wick applicator. Allow the weeds (whether broadleaf or grassy) to grow well above the lawn, then take the wick applicator and treat the weeds, being careful not to get any Roundup on the lawn. After treatment allow 2 days before watering the lawn, and 10 days before mowing.

Broadleaf weeds are usually controlled with products containing the hormone herbicides 2,4-D, MCPP, and dicamba (Banvel). Many times these will be mixed and sold with dry fertilizers. These chemicals are not safe for every lawn or for every situation. The only way to be sure is to check the label on the container. Be sure the chemical will control the weed you are after, is safe to use on the type of lawn you have, and will not injure nearby ornamental plants.

Be especially careful of applying products containing dicamba to lawns with trees or other ornamentals. They may take the chemical up thru their root system and be killed, even though you were careful not to get any of it on the foliage.

For best results, apply the herbicide only when the weeds are actively growing. The hardest time to kill a weed is when it is hot and dry and the weed is under moisture stress. Try to pick a cooler day with little wind movement and when soil moisture levels are fairly high.

Always follow the directions on the label. Reference to commercial products or trade names is made with the understanding that no discrimination is intended and no endorsements by the Cooperative Extension Service is implied.

## THIS IS BEAUTIFUL

Gardeners may go to a great deal of trouble to make sure the soil is properly prepared, correct fertilizer nutrients added and rows constructed exactly as directed.

They may use plants or seeds of adapted varieties, seed at the proper depth and adhere to correct cultural techniques. Then if Mother Nature cooperates, gardening success seems certain. Yet even with such preparation, the gardening effort can still go wrong.

## Fruiting Pattern of Cotton in a Typical Crop on the Texas High Plains

Week of Blooming	% of Blooms to Set	Bolls per Pound of Seed Cotton	% of Total Crop		
			Blooms	Bolls	Seed Cotton
1	96	78	5	8.3	8.3
2	84	77	19	27.6	28.8
3	76	79	21	27.6	27.8
4	63	82	17	18.4	17.9
5	43	86	16	12.0	11.3
6	27	89	12	5.5	5.0
7	6	94	7	0.7	0.6
8	2	112	3	0.1	0.07

## FRUITING AND FIBER DEVELOPMENT

The interval between production of flowers on successive nodes up the main stem of the plant (vertical) is 2 to 3 days, and the interval between successive flowers on the same fruiting branch (horizontal) is 5 to 6 days.

Boll period, the days between white bloom and boll opening, is affected by the season. Bolls developing late in the season have a longer boll period than those developing earlier in the season. Boll period is temperature controlled, with lower temperatures increasing the boll period. On the High Plains, boll period will generally fall with in the

ranges listed below:

Date of White Bloom	Range of Boll Period
July 1	45-55 days
August 1	50-62 days
August 15	55-68 days
September 1	60-75 days

## Development of the Cotton Plant as Influenced By Planting Date

Phenological event	For May 1 Planting		For June 7 Planting	
	Days after planting	Calendar date	Days after planting	Calendar date
Planting to stand	10	May 10	6	June 13
Appearance of first True leaf	19	May 19	15	June 22
Appearance of first squares	47	June 19	41	July 18
Appearance of first blooms	69	July 11	63	August 9
Peak bloom period	97-104	August 8-15	74-84	August 20-30
Most effective fruiting period	60-104	July 11-August 15	63-84	August 9-30
First open boll	125	September 5	125	October 10
25% of crop open	151	October 1	151	November 5
50% of crop open	167	October 17	161	November 15
75% of crop open	186	November 15	171	November 25

TABLE 2 ESTIMATIONS OF BOLL MATURATION PERIODS FOR BOLLS INITIATED BETWEEN JULY 5 AND AUGUST 30 FOR THE YEARS 1965-1978 AT LUBBOCK, TEXAS. (The numbers in parenthesis represents the percentage of the boll period completed by bolls which did not reach full maturity.)

Year	Boll maturation periods (days) for bolls initiated on:											
	July 5	July 10	July 15	July 20	July 25	July 30	Aug 5	Aug 10	Aug 15	Aug 20	Aug 25	Aug 30

PIANO STUDENTS—Award-winning Elaine Hardy piano students from Lockney are [l-r] Amy Shaw, Shandra Bybee, Amy Kring, Rachelle Ford, and Stephanie Bybee. Not pictured are Amy and Jody Ansley.

PIANO STUDENTS—Floydada award-winning Elaine Hardy piano students are, back row [l-r], Cindy Burk, Mitzi Julian, Leatherman, Amy McCormick, Andrea Bonner; front row, Anita McCormick and Bryan Jarnagin. Not pictured is Christi Norrell.

## Hardy piano students enter guild auditions

Elaine Hardy took the majority of her piano students to Lubbock to enter the 43rd National Piano Guild auditions held at the Garden and Arts Center in Lubbock. Rodney Hoare of San Antonio served as judge.

He has done judging for many piano contests and for several years. Mr.

Hoare was born in England and studied with many well known teachers in England including Mattahay. He also studied in France with Alfred Cortot. Since coming to the U.S. he has taught in New York and San Antonio.

Twenty-one of the students received a grade in the Superior bracket and the

remaining four in the Excellent category. Christi Norrell received the Critic Circle rating given only to "Top Talent" and given very rarely.

Students entering were Amy Ansley, Jody Ansley, Andrea Bonner, Cindy Burk, Shandra Bybee, Stephanie Bybee, Laron Check, Chad Edwards,

Shannon Edwards, Karen Ford, Rachelle Ford, Bryan Jarnagin, Mitzi Julian, Amy Kring, Cathy Langly, Mike Leatherman, Tammy Leatherman, Amy McCormick, Anita McCormick, Christi Norrell, Amy Ogle, Amy Shaw, Tricia Steele, Jamie Thayer and Cherie Parish.

## Recital presented Sunday afternoon

Due to bad weather, the piano recital of Elaine Hardy's students was cancelled Thursday and moved to Sunday afternoon at 2:00 at the First Christian Church.

An Honors recital of the students that had prepared a 10 piece program of the older students was presented by Andrea Bonner, Laron Check, Shannon Edwards, Jamie Thayer, Tammy Leatherman, Mitzi Julian, Amy Shaw and Christi Norrell.

A reception then followed in the fellowship hall and the second portion of the recital continued entitled "Let's Make Music Fun." A variety of instruments were used by the students — the Yamaha Porta-Sound, organ, electric piano and piano. An ensemble group composed of Karen Ford, Rachelle Ford on the organ, Jamie Thayer on

piano, Shannon Edwards on the Yamaha Porta-Sound, Tammy Leatherman on the electric piano accompanied singers Karl Bunjes, George Finley, Craig Edwards and Keith Jackson assisted by Keith Owens on the drums sang Elvira. Also a trio of Mitzi Julian, Christi Norrell and Elaine Hardy played the organ, electric piano and piano, respectively, played "Chariots of Fire."

Awards for the year were presented to High Point students Anita and Amy McCormick and Amy Ogle. Cherie Parrish received an award for "Coming the Farthest in the Shortest Time." She had studied for 4 months three years ago before moving back to Brazil and practiced on a portable organ before moving back to continue her studies in the fall. Jody Ansley received the most improved award and Mitzi

Julian the Theory Award.

All the Honor students were recognized again with gifts being presented to each. All the students were given a composer statue for their years work. Students participating were Josh Thayer, student of Christi Norrell, Bryan Jarnagin, Amy Ogle, Anita and Amy McCormick, Inez Gibson, Dee Casey,

## Carthel, Tyer graduate

More than 700 students at West Texas State University have been listed on the president's and dean's honor rolls for the 1982 spring semester.

The Dean's List includes 621 students who have earned grade point averages of 3.25 to 3.84 based on a 4.0 scale.

The Dean's List includes Dara G.

Chad Edwards, Karen Ford, Tricia Stelle, Betty Cates, Rachelle Ford, Mike Leatherman, Cindy Burk, Cherie Parish. Unable to attend but participating in the yearly enrollment were Amy Shaw, Amy Ansley, Jody Ansley, Tana and Kim Perry, Laurie King of Petersburg, Mitzi Nixon and Amy Kring.

Carthel, a freshman Radio-TV major and Tracy A. Tyer, a junior elementary education major, both from Floydada.

On the President's List are 124 students whose grade point averages range from 3.85 to the perfect 4.0.

Students must be enrolled in at least 12 semester credit hours to be included on the honor roll.

Dear Friends & Customers:

We have sold our business to Mr. Rex and Edmund Brown effective June 1, 1982.

We sincerely appreciate your business and friendship over the years and we will appreciate your continued patronage of our successors.

Their firm name will be Floydada Auto Parts.

# OBITUARIES

**MRS. MAGGIE L. LATHAM**  
Mrs. Maggie L. Latham, 69, died Saturday morning.

Services were at 2:30 p.m. Monday at First United Methodist Church in Dumas with the Rev. Bruce Parks, pastor, officiating. Burial was in Northlawn Memorial Gardens Cemetery in Dumas under direction of Morrison Funeral Directors.

Mrs. Latham, born in Hunt County, Texas, lived in Dumas since 1956. She had also been a resident of the Ralls-Crosbyton area. She was a member of First United Methodist Church. Her husband, William "Bill" Latham, died in 1981.

Survivors include two sons, Charles of Los Banos, California, and Willie E. of Dumas; two daughters, Mrs. Pat Fowell of Dumas and Mrs. Willie Mae Marricle of Floydada; a sister, Mrs. Argaree Bishop of Littlefield; a brother, George Berry of Kerrville, Texas; a half brother, Charlie Berry of Floydada; 14 grandchildren and 10 great-grandchildren.

**LESOL PARKER**

Lesol Parker, 77, of Floydada died at 5:15 a.m. Wednesday, June 2, in Caprock Hospital, Floydada, where he had been a patient for four days.

Services were at 2 p.m. Friday, June 4, in New Salem Primitive Baptist Church in Floydada. Officiating was Elder Fred Boen of Tuscola, Texas, assisted by Elder Joe Jackson and Elder Jim Jackson. Burial was in Hale Center Cemetery by Moore-Rose Funeral Home of Floydada.

**Mr. Parker, born August 1, 1904 in Jones County, moved to Floyd County in 1967 from Plainview. He was a retired farmer and a member and deacon of New Salem Primitive Baptist Church.**

He married the former Lois Christine Boen July 15, 1925 in Roby. Parker was preceded in death by one daughter, Bernice, three sons, Aubrey Wayne, Doyle, and James and one sister.

Survivors are his wife; two daughters, Frances Oneta Finklea of West Monroe, Louisiana, and Delores Jeanette White of Pelzer, South Carolina; one son, Elvin Parker of Floydada; three sisters, Ruby Speckman of Nebraska, Clyda Belle Miller and Erma Lee McCall, both of California; seven brothers, Olen, Ted, Wylie, Leslie and John Parker, all of California, Arlis Parker of Oregon and Douglas Parker of Wyoming; 17 grandchildren and nine great-grandchildren.

**REMEMBER your loved ones with a living memorial to the Caprock Hospital Auxiliary Memorial Fund. Mrs. Ben Whitaker, Treasurer.**

**BONNIE BENNETT**

Bonnie Bennett, 85, of Lockney died at 7 a.m. Wednesday, June 2, at her home.

Services were at 3 p.m. Thursday, June 3, in First Baptist Church of Lockney with the Rev. Travis Gibson officiating, assisted by the Rev. Murle Rogers, pastor. Burial was in Lockney Cemetery directed by Moore-Rose Funeral Home of Lockney.

Mrs. Bennett was born in Ranger October 25, 1896 and moved to Floyd County in 1908 from Grayson County. She married Robert Irving Bennett October 6, 1917 in the Pleasant Valley Community near Lockney. He died June 15, 1976. Mrs. Bennett was a member of First Baptist Church, Lockney.

Survivors are a daughter, Beth Kropf of Lockney; two sisters, Elizabeth Rigdon and Ruby Irby, both of Amarillo; two grandchildren and two great-grandchildren.

Pallbearers were Kenneth Gregg, Sam Fortenberry, Olin Poteet, R.V. Webster, M.D. Arterburn and Jerry Johnson.

**ANNA B. HYNDS**

Anna Belle Hynds, 79, a former Amarillo resident and sister of two Amarillo women, died Tuesday, June 1.

Services were at 10 a.m. Thursday, June 3, in First Baptist Church. Burial was in Gentry Cemetery.

She was born September 17, 1902 in Cottle County and came to Floydada at an early age. She lived here many years. She was a retired practical nurse. She nursed here in Floydada for Dr. Lon and Dr. George Smith for several years.

She lived in Amarillo 10 years before moving to Gentry about 30 years ago. She was a Baptist.

Survivors include two sons, Bob Hynds of Wayne, Oklahoma and Tom Hynds of Austin, Texas; three daughters, Charlene Cox of Dawn, Texas, Dixie Grimes of Gentry and Sammie Lee Harrison, both of Fort Worth; a brother, Ardell Donathan of Wildorado, Texas; eight sisters, Mrs. Rosa Camden of Slaton, Texas, Mrs. Minta Hall of Hereford, Texas, Mrs. Virgie Leatherman of Millsap, Texas, Mrs. Pernie Leatherman of Floydada, Mrs. Bernice Lewis of Collinsville, Texas, Mrs. Dovie Mallow of Plainview, and Mrs. Laura Peek and Mrs. Oleta Elkins, both of Amarillo.

**New business review**

## Elaine's Monogramming now open

Elaine Giesecke Ruland opened a specialty monogramming shop this week in the White's Auto building. Her specialty is applique and both the applique and monogramming can be done on most fabrics.

The shop, remodeled on the furniture side of the White's Store, has its entrance on California Street.

"I'll be in the shop on Tuesdays and Thursdays to take orders and help people select the designs they want," Elaine said. "but most of the work will be done in my home." The shop will be open from 12 noon to 5 p.m. on Tuesdays and Thursdays.

Elaine was an art major at San Angelo State University for two years.

She attended classes in monogramming and applique and proved to have a natural aptitude for the art form.

"I enjoy the applique the most," Elaine said, "but the monogramming is fun, too."

It is obvious that Elaine enjoys the work and is enthusiastic about the shop potential.

She can copy most designs that customers bring as well as having patterns in the store and sample designs "to give the customers ideas."

Elaine has many samples of both applique and monogramming on towels and linens.

She does the stitching on denim such as blue jeans, from tiny size twos up through the sizes to adults.

Monogramming, always a popular addition to clothing, has grown in demand as people seek to individualize their wardrobes.

The personalized touch for gifts has also become more popular, especially

for special occasions such as weddings, graduation, and Mother's and Father's Days.

The practical side of monogramming Elaine will be doing is to add names and names of businesses to work clothing.

Elaine plans also to include the sale of

gift items. She has a fine selection of pen-drawn glass wall pictures.

Elaine and her husband, live at Barwise. Michael is employed at Bratcher Lincoln-Mercury in Plainview. The couple has a daughter, Jalanda, who is a year-and-a-half old.

ELAINE RULAND

FLORENCE REYES AND SON BERNIE

## El Rancho Restaurant located at the "Y"

El Rancho Restaurant, located on Houston Street at the "Y", is owned and managed by Pedro and Florence Reyes and their children.

Serving both Mexican and American dishes, they open at 7 a.m. and feature Huevos Rancheros, one of the most popular Mexican egg dishes. They also serve flour tortilla tacos with a choice of: beans, beans and beef, chorizo and eggs, or chorizo and beans. Chorizo is a spiced Mexican type of sausage.

The breakfast fare also includes the staple American dishes of eggs and bacon, sausage or pancakes and French toast.

The Reyes's remodeled the old Whirlwind Drive-In and opened their restaurant about four weeks ago.

The family has lived in Floydada about 26 years, and Florence has worked as cook in two local restaurants.

All sauces used in the Mexican dishes are especially prepared by Florence. The Mexican dishes include chile rellenos, enchiladas, tacos and tostadas.

Open until 9 p.m., they also serve chicken fried steaks and hamburgers. All meals begin with tortilla chips and hot sauce.

The restaurant is open from Monday thru Saturday.

"Sometimes we have stayed open until 11 p.m. on Saturday night because people keep coming in," Florence said.

Pedro is employed at Russell Equipment. The Reyes's children: Bernie, 7th grade; Moises, who graduated from FHS this May; and Joe and Adella help their parents in the restaurant.

**BENNY CASE** is the new manager of the Floydada Allsup's convenience store located at 120 E. Houston.

Benny said his primary objective is now to "go ahead and restock the store and get it fully stocked for the convenience of the people."

For the past five years Benny, his wife Pat and two sons Bobby, 8 and Bryan, 4 have lived on their farm near Hale Center. Here they intend to raise race horses. They now have one horse in training and own three others.

Pat works for USDA and Bobby and Bryan go to school at Hale Center. Benny was raised in Petersburg, Texas and had worked for Braniff Airlines for ten years before coming to Allsup's.

# 10 YEAR NO SWEAT WARRANTY

**If Air Conditioning doesn't have it here it probably doesn't have it.**

**Gas Air Conditioning Has It!**

No other air conditioner has a warranty like a gas air conditioner because no other air conditioner is built like a gas air conditioner.

Gas air conditioning has fewer moving parts and no compressor to wear out or break down. This means less wear and tear and lower maintenance costs.

That's why gas air conditioning is so dependable and why it has a warranty that's twice as long as other types of units... a full 10 years!

Find out more about the air conditioning that's backed by the best warranty available. Call Energas today for a free cooling survey and cost estimate. There's no obligation.

**Remember, all air conditioning was not created equal. And we have the paper to prove it!**

Manufacturer's limited warranty covers all defects in materials and workmanship on the sealed refrigeration unit for ten years from the date of installation of the air conditioner when it is installed in a single family residence. All other parts are warranted for one year from date of installation.

## ENERGAS

### ORDINANCE 221 MODEL PROPERTY MAINTENANCE ORDINANCE

AN ORDINANCE REQUIRING WEEDS AND GRASS TO BE CUT UPON PREMISES AND THAT RUBBISH AND TRASH BE REMOVED THEREFROM; FIXING A PENALTY FOR FAILURE TO COMPLY WITH SUCH ORDINANCE; PROVIDING THAT SAME SHALL BE DONE BY THE CITY IN THE EVENT OF SUCH FAILURE; AND PROVIDING FOR THE FILING OF A LIEN UPON PROPERTY FOR THE EXPENSE INCURRED IN REMOVING AND DECLARING THAT ALLOWING WEEDS TO GROW AND/OR TRASH AND RUBBISH TO ACCUMULATE TO BE A NUISANCE.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF LOCKNEY, TEXAS:

#### SECTION 1. PROHIBITED CONDITIONS DESIGNATED - STAGNANT WATER.

It shall be unlawful for any person who owns or occupies any lot in the City to permit or allow holes or places where water may accumulate and become stagnant to be or to remain on such lot or to permit or allow the accumulation of stagnant water thereon or to permit the same to remain thereon. It shall be the duty of such person to keep the area from the line of his property to the curbline or street adjacent to it free and clear of accumulations of stagnant water.

#### SECTION 2. SAME - ACCUMULATION OF TRASH, CARRION, FILTH, ETC.

It shall be unlawful for any person who owns or occupies any house, building, establishment, lot or yard in the City to permit or allow any trash, rubbish, carrion, filth or other impure or unwholesome matter to accumulate or remain thereon or therein. It shall be the duty of such person to keep the area from the line of his property to the curbline or street adjacent to it free and clear of the matter referred to above.

#### SECTION 3. SAME - WEEDS AND OTHER UNSIGHTLY VEGETATION.

It shall be unlawful for any person owning, claiming, occupying or having supervision or control of any real property within the City to permit weeds, brush or any objectionable or unsightly vegetation to grow to a greater height than twelve (12) inches upon any such real property within one hundred (100) feet of any property line or within fifty (50) feet of any structure. It shall be the duty of such person to keep the area from the line of his property to the curbline or street adjacent to it free and clear of the matter referred to above. All vegetation not regularly cultivated which exceeds twelve (12) inches in height shall be presumed to be "objectionable and unsightly" within the meaning of this section.

#### SECTION 4. SAME - ABANDONED VEHICLES AND APPLIANCES, ETC.

It shall be unlawful for the owner or occupant of a residential building, structure or property to utilize the premises of such residential property for the open storage of any abandoned motor vehicle, ice box, refrigerator, stove, glass, building material, building rubbish or similar items. It shall be the duty and responsibility of every such owner or occupant to keep the premises of such residential property clean and to remove from the premises all such abandoned items as listed above upon notice from the City of Lockney, Texas.

#### SECTION 5. OBSTRUCTION OF VIEW OF TRAFFIC BY TREES, SHRUBS, ETC.

Trees, shrubs, bushes, plants, grass and weeds growing at or near intersections in such manner as to obstruct the view of approaching traffic from the right or left are hereby declared to be a nuisance and the City Secretary is hereby authorized to remove the same.

#### SECTION 6. NOTICE TO CORRECT OR REMOVE CONDITION.

In the event that any person owning, claiming, occupying or having supervision or control of any real property permits any condition to exist hereon in violation of this article, the City may notify such person of his failure to comply and direct him to correct, remedy or remove such condition within ten (10) days after such notice. Such notice shall be sent to the person at his post office address by regular mail. If the person's address is unknown or if notification may not be obtained by letter, then notice may be given by publication in any two (2) issues within ten (10) consecutive days in any daily, weekly, or semi-weekly newspaper in the City. It shall be unlawful for any person to fail or refuse to comply with such notice.

#### SECTION 7. PENALTY FOR REFUSAL TO CORRECT OR REMOVE CONDITION.

Any person notified as provided in Section 6 who fails or refuses to correct or remove the condition specified in such notice within ten (10) days after the date of notification by letter or within ten (10) days after the date of second publication of the notice in the newspaper shall be guilty of a misdemeanor and issued a warrant to appear in Municipal Court and upon conviction shall be fined in any sum not exceeding two hundred dollars (\$200.00). Each and every day that the violation remains uncorrected shall constitute a separate and distinct offense subject to penalty under this Section.

#### SECTION 8. CORRECTION OR REMOVAL OF CONDITION BY CITY.

If any person notified as provided in Section 6 fails or refuses to correct, remedy or remove the condition specified in such notice within ten (10) days after the date of notification by letter or within ten (10) days after the date of the second publication of notice in the newspaper, the City may go upon the property and do such work or make such improvements as are necessary to correct, remedy or remove such condition in those cases which may present a serious threat to the health, safety and general welfare of nearby residents. The expense incurred pursuant to this Section in correcting the condition of such property and the cost of notification shall be paid by the City and charged to the owner of such property. In the event that the owner fails or refuses to pay such expense within thirty (30) days after the first day of the month following the one in which the work was done, the City shall file with the County Clerk a statement of the expense incurred. When such statement is filed, the City shall have a privileged lien on such property, second only to tax liens and liens for street improvements, to secure the payment of the amount so expended. Such amount shall bear interest at the rate of ten (10) percent from the date the City incurs the expense. For any such expense and interest, suit may be instituted and recovery and foreclosure had by the City. The statement of expense filed with the County Clerk or a certified copy thereof shall be prima facie proof of the amount expended on such work, all as more particularly specified in Article 4436, Vernon's Annotated Texas Civil Statutes, which is hereby adopted.

#### SECTION 9. REPEAL AND DATE OF EFFECT.

All ordinances and parts of ordinances in conflict with this Ordinance are hereby repealed and this Ordinance shall be in full force and effect immediately upon its adoption and its publication.

PASSED AND APPROVED THIS 3RD DAY OF JUNE, 1982.

J.D. Copeland, Mayor

ATTEST:  
Erma Lee Duckworth, City Secretary

## McCarter, Moats make WTSU Deans' List

Karla McCarter and Donna K. Moats were among the more than 700 students at West Texas State University, who have been listed on the president's and dean's honor rolls for the 1982 spring semester.

Karla is the daughter of Mr. and Mrs. Bill McCarter of Lockney. She will be a senior when she returns to school next fall. Her major is physical education.

She will be doing her student teaching in the fall. This summer she is working fulltime in the Albracht Chiropractor Clinic in Amarillo.

Donna is the daughter of Mr. and Mrs. Billy F. Moats. She will be a junior elementary education major in the fall.

This summer she is working at the YMCA Day Camp in Plainview.

The Dean's List included 621 students who have earned grade point averages of 3.25 to 3.84 based on a 4.0 scale. On the President's List were 124 students whose grade point averages range from 3.85 to the perfect 4.0.

Honor roll students represent schools and colleges including School of Agriculture, College of Arts and Sciences, School of Business, College of Education, School of Fine Arts and School of Nursing.

Students must be enrolled in at least 12 semester credit hours to be included on the honor roll.

**FABRIC FOR BLANKETS**—Retired Senior Volunteer Program obtained fabric to make baby blankets from the Texas Tech University Textile Research Center. The blankets will be made by senior volunteers for the Well Baby Clinic and non-profit day care centers. From left, are, Ruth Rieken, senior citizen volunteer, Nesa Jackson, TRS Head Representative, and Mary Vanell, RSVP coordinator. Nesa Jackson is a graduate of the Texas Tech Home Economics Department. She is presently working on the staff at the Textile Research Center in Public Relations. She is the daughter of Mr. and Mrs. Jim H. Jackson of Floydada. For information on volunteering to make the blankets call 742-2423. RSVP is sponsored by Tech's Home Economics Department, Family Management in Housing and Consumer Science.

### ORDINANCE 220 MODEL STRUCTURAL MAINTENANCE ORDINANCE

AN ORDINANCE ESTABLISHING MINIMUM STANDARDS GOVERNING THE USE, OCCUPANCY AND MAINTENANCE OF BUILDINGS, DWELLINGS, DWELLING UNITS AND STRUCTURES; ESTABLISHING MINIMUM STANDARDS GOVERNING SUPPLIED UTILITIES AND FACILITIES, AND OTHER PHYSICAL THINGS AND CONDITIONS ESSENTIAL TO MAKE BUILDINGS SAFE, SANITARY AND FIT FOR HUMAN HABITATION; ESTABLISHING MINIMUM STANDARDS GOVERNING THE CONDITION AND MAINTENANCE OF BUILDINGS, DWELLINGS AND STRUCTURES; FIXING CERTAIN RESPONSIBILITIES AND DUTIES OF OWNERS AND OCCUPANTS OF BUILDINGS; AND FIXING PENALTIES FOR VIOLATIONS.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF LOCKNEY, TEXAS:

WHEREAS, within the area of jurisdiction of the City of Lockney, Texas, there are or may be buildings, dwellings, dwelling units and structures which are unfit for human habitation or use due to inadequate maintenance, obsolescence or abandonment; containing defects which increase the hazards of fire, accident or other calamities; and which by reason of the lack of maintenance, inadequate ventilation, light and sanitary facilities or other conditions render such buildings, dwellings or structures unsafe, unsanitary and dangerous or detrimental to the health, safety, morals and general welfare of the community; and

WHEREAS, experience and accepted national housing surveys have clearly demonstrated that such conditions result in large measure from improper maintenance, unavailable or insufficient financing, inadequate sanitary facilities, overcrowded conditions in residential occupancies, buildings and premises and from general neighborhood neglect; and

WHEREAS, it has become common knowledge that these conditions can be relieved, in a measure prevented and often eliminated through planned and properly enforced minimum structural standards, resulting thereby in the upgrading of living conditions, improving the quality of life and an overall enhancement of the general health, safety and welfare of all residents and property owners of the community;

NOW, THEREFORE, BE IT ENACTED, THAT:

The provisions herein shall be controlling in the use, maintenance and occupancy of all dwellings (permanent, movable and mobile), dwelling units and/or structures within the area of jurisdiction of the City of Lockney, Texas.

#### TITLE AND SCOPE

The provisions embraced in the following sections shall constitute and be known as THE STRUCTURAL STANDARDS CODE of the City of Lockney, Texas.

The Code establishes minimum standards for occupancy, and does not replace or modify standards otherwise established for construction, replacement or repair of buildings.

Every buildings, structure or dwelling, permanent, movable or mobile shall conform to the requirements of this Code regardless of the primary use of such building, structure or dwelling, and regardless of when such building, structure or dwelling may have been constructed, altered or repaired.

This Code is hereby declared to be remedial and shall be construed to secure the beneficial interests and purposes thereof (which are public safety, health and general welfare) through structural strength, stability, sanitation, adequate light and ventilation and safety to life and property from fire and other hazards incident to the construction, alteration, repair, removal, demolition, use and occupancy of buildings, dwellings and structures (permanent, movable or mobile).

The Code does not alter the provisions for the immediate security or demolition of hazardous structures in cases where these exists imminent danger to human life or health.

#### EXISTING BUILDINGS

The provisions of this Code shall apply to any building, dwelling or structure regardless of when said building, dwelling or structure was constructed, altered or repaired.

#### MAINTENANCE

All buildings or structures, both existing and new and all parts thereof, shall be maintained in a safe and sanitary condition. All devices or safeguards which are required by this Code in a building when erected, altered or repaired shall be maintained in good working order. The owner, or his designated agent, shall be responsible for the maintenance of buildings, structures and premises to the extent set out in this Code. The tenant shall be responsible for the maintenance of buildings, structures and premises to the extent set out in this Code.

#### MOVING DWELLING AND STRUCTURES

No structure or building shall be moved from one lot to another or erected within the City Limits until a permit shall have been issued and no permit shall be issued for the removal if the structure is not in conformity with this Ordinance.

Any structure hereafter erected or moved without a permit and not in conformity with this Ordinance shall be removed at the owner's expense.

#### PENDING ACTIONS

Nothing in this Ordinance or in the Code hereby adopted shall be construed to affect any suit or proceeding now pending in any court, or any rights acquired or liability incurred, nor any cause or action accrued or existing, under any Act or Ordinance repealed hereby. Nor shall any right or remedy or any character be lost, impaired or affected by this Ordinance.

#### MINIMUM STANDARDS FOR BASE EQUIPMENT AND FACILITIES

##### Section 1 - General

No person shall occupy as owner-occupant or let or sublet to another for occupancy any dwelling or dwelling unit designed or intended to be used for the purpose of living, sleeping, cooking or eating therein, nor shall any vacant dwelling building be permitted to exist which does not comply with the following requirements.

##### 1.1 Sanitary Facilities Required

Every dwelling unit shall contain not less than a kitchen sink, lavatory, tub or shower and a water closet, all in good working condition and properly connected to an approved water and sewer system. Every plumbing fixture and water and sewer pipe shall be properly installed and maintained in good sanitary working condition, free from defects, leaks and obstructions.

##### 1.2 Location of Sanitary Facilities

All required plumbing fixtures shall be located within the dwelling unit and be accessible to the occupants of same. The water closet and the tub or shower shall be located in a room affording privacy to the user and arrangements of fixtures shall provide for comfortable use of each fixture and permit at least a 90 degree door swing.

##### 1.3 Hot and Cold Water Supply

Every dwelling unit shall have connected to the kitchen sink, lavatory and tub or shower an adequate supply of both cold water and hot water. All water shall be supplied through an approved pipe distribution system connected to a potable water supply.

##### 1.4 Water Heating Facilities

Every dwelling shall have water heating facilities which are properly installed and maintained in safe and good working condition and are capable of heating water to such a temperature as to permit an adequate amount of water to be drawn at every required kitchen sink, lavatory basin, bathtub or shower at a temperature of not less than 120 F. Such water heating facilities shall be capable of meeting the requirements of this sub-section when the dwelling or dwelling unit heating facilities required under the provisions of this Ordinance are not in operation.

##### 1.5 Heating Facilities

(a) Every dwelling unit shall have heating facilities which are properly installed, are maintained in safe and good working conditions and are capable of safely and adequately heating all habitable rooms and bathrooms in every dwelling unit located therein to a temperature of at least 70 degrees F. at a distance three (3) feet above floor level under ordinary minimum winter conditions.

(b) Where as gas or electric central heating system is not provided, each dwelling unit shall be provided with sufficient fireplaces, chimneys, flues or gas vents whereby heating appliances may be connected so as to furnish a minimum temperature of 70 degrees F measured at a point three (3) feet above the floor during ordinary minimum winter conditions.

##### 1.6 Cooking and Heating Equipment

All cooking and heating equipment and facilities shall be installed in accordance with the City's building, gas or electrical code and shall be maintained in safe and good working conditions.

##### 1.7 Garbage Disposal Facilities

Every dwelling unit shall have access to adequate garbage disposal facilities or garbage storage containers, the type and location of which comply with the regulations for solid waste disposal.

#### Section 2 - Minimum Requirements for Light and Ventilation

No person shall occupy as owner-occupant or sublet to another for occupancy, any dwelling or dwelling unit designed or intended to be used for the purpose of living, sleeping, cooking or eating therein, nor shall any vacant dwelling building be permitted to exist which does not comply with the following requirements:

(a) Every habitable room shall have at least one window or skylight facing directly to the outdoors. The minimum total window area, measured between stops, for every habitable room shall be at least seven (7) percent of the floor area of any such room. If light obstructing structures are located less than five (5) feet from the window, and extend to a level above that of the ceiling of the room, such a window

Continued On Page 5C

**SHOP  
COMPARE**

# WANT ADS ARE YOUR BEST BUY!

Continued From Page 4C

shall not be deemed to face directly to the outdoors and shall not be included as contributing to the required minimum total window area. Whenever the only window in a room is a skylight type window in the top of such room, the total window area of such skylight shall equal at least ten (10) percent of the total floor area of such room.

(b) Year-round mechanically ventilating conditioned air systems may be substituted for windows, as required herein, in rooms other than rooms used for sleeping purposes.

#### 2.1 Habitable Rooms

Every habitable room shall have at least one window or skylight which can easily be opened or such other device as will adequately ventilate the room. The total or openable window area in every habitable room shall be equal to at least forty-five (45) percent of the minimum window area size or minimum skylight-type window size, as required, or shall have other approved equivalent ventilation.

#### 2.2 Bathrooms

Every bathroom shall comply with the light and ventilation requirements for habitable rooms except that no window or skylight shall be required in adequately ventilated bathrooms equipped with an approved ventilation system.

#### 2.3 Electric Lights and Outlets Required

Every dwelling shall be wired for electric lights and convenience receptacles. Every habitable room of such dwelling shall contain at least two (2) separate floor or wall-type electric convenience outlets; and every kitchen, bathroom, laundry room, furnace room, corridor, hallways and porch shall contain at least one supplied ceiling or wall-type electric light fixture. Every such outlet and fixture shall be properly installed in accordance with the City's codes, shall be maintained in good and safe working conditions and shall be connected to the source of electric power in a safe manner.

#### 2.4 Light in Public Halls and Stairways

Every public hall and stairway in every multiple dwelling containing five (5) or more dwelling units shall be adequately lighted at all times. Every public hall and stairway in structures devoted solely to dwelling occupancy and containing not more than four dwelling units may be supplied with conveniently located light switches, controlling an adequate lighting system which may be turned on when needed, instead of full time lighting. All public outdoor walkways or sidewalks within multiple complexes shall be adequately lighted at all times. Adequate lighting shall be defined as an average horizontal foot candle level of 0.2 lumens per square foot with no value of less than 0.02 lumens per square foot.

### Section 3 - Minimum Requirements For Electrical Systems

No person shall occupy as owner-occupant or let or sublet to another for occupancy any building, dwelling or structure nor shall any vacant building, dwelling or structure be permitted to exist which does not comply with the following requirements.

#### 3.1 General

All fixtures, receptacles, equipment and wiring shall be maintained in a state of good repair, be safe, be capable of being used and be installed and connected to the source of electric power.

(a) Where the determination is made, upon examination of the existing electrical service supply that such electrical service supply is obsolete or is being used in such manner as would constitute a hazard to the occupants or would otherwise constitute a hazard to life and property, the following shall be used for determining the adequacy of such service supply and main disconnect switch:

Total Number of Lighting Electrical Outlets Only	Capacity of Main Service Supply and Main Disconnect Switch
0-24	60 amp service
25-50	100 amp service

(b) The minimum capacity of the service supply and the main disconnect switch shall be sufficient to adequately carry the total load required.

### Section 4 - General Requirements For The Exterior and Interior of Structures

No person shall occupy as owner-occupant or let or sublet to another for occupancy a building, dwelling or structure nor shall any vacant building, dwelling or structure be permitted to exist which does not comply with the following requirements.

#### 4.1 Foundation

The building foundation walls, piers, or other structural elements shall be maintained in a safe manner and be capable of supporting the load which normal use may cause to be placed thereon.

#### 4.2 Exterior Walls

The exterior walls shall be substantially weathertight, watertight and shall be made impervious to the adverse effects of weather and be maintained in sound condition and good repair.

#### 4.3 Roofs

Roofs shall be maintained in a safe manner and have no defects which might admit rain or cause damage in the walls or interior portion of the building.

#### 4.4 Means of Egress

Every dwelling unit shall have safe, unobstructed means of egress with a minimum ceiling height of seven feet (7') leading to a safe and open space at ground level.

#### 4.5 Stairs, Porches and Appurtenances

Every inside and outside stairway, porch and any appurtenance thereto shall be safe to use and capable of supporting the load that normal use may cause to be placed thereon and shall be kept in sound condition and good repair.

#### 4.6 Protective Railings

Protective railings shall be required on any unenclosed structures over five (5) feet from the ground level or on any steps containing four (4) or more risers.

#### 4.7 Windows and Doors

Every window, exterior door and basement or cellar door and hatchway shall be substantially weathertight, watertight and rodent-proof and shall be kept in sound working condition and good repair.

#### 4.8 Windows To Be Glazed

Window panes or an approved substitute shall be maintained without cracks or holes.

#### 4.9 Window Sashes

Window sashes shall be properly fitted and weathertight within the window frame.

#### 4.10 Windows to be Openable

Every window required for light and ventilation for habitable rooms in dwellings or dwelling units shall be capable of being easily opened and secured in position by window hardware.

#### 4.11 Hardware

Every exterior door shall be provided with proper hardware and maintained in good condition.

#### 4.12 Door Frames

Every exterior door of a dwelling or dwelling unit shall fit reasonably well within its frame so as to substantially exclude rain and wind from entering the dwelling building.

#### 4.13 Screens

Every door opening directly from a dwelling unit to outdoor space shall have screens and a self-closing device and every window or other device with opening from a dwelling unit to outdoor space, used or intended to be used for ventilation, shall likewise have screens.

Dwelling buildings containing central heating furnaces and air-conditioning equipment for mechanically ventilating the building year round are not required to have screens on door openings.

#### 4.14 Protective Treatment

All exterior wood surfaces, other than decay resistant woods, shall be protected from the elements and decay by painting or other protective covering or treatment.

#### 4.15 Accessory Structures

Garages, storage buildings and other accessory structures shall be maintained and kept in good repair and sound structural condition.

#### 4.16 Interior Floor, Wall and Ceilings

Every floor, interior wall and ceiling shall be substantially rodent proof, shall be kept in sound condition and good repair, and shall be safe to use and capable of supporting the load which normal use may cause to be placed thereon.

#### 4.17 Structural Supports

Every structural element of a building, dwelling or structure shall be sound and show no evidence of deterioration which would render it incapable of carrying the loads which normal use may cause to be placed thereon.

#### 4.18 Protective Railings for Interior Stairs

Interior stairs and stairwells of more than four (4) risers shall have handrails located in accordance with the requirements of the building code. Handrails or protective railings shall be capable of bearing normally imposed loads and be maintained in good condition.

### Section 5 - Minimum Dwelling Space Requirements

No person shall occupy as owner-occupant or let or sublet to another for occupancy any dwelling or dwelling unit designed or intended to be used for the purpose of living, sleeping, cooking or eating therein nor shall any vacant dwelling building be permitted to exist which does not comply with the following requirements.

#### 5.1 Required Space in Dwelling Unit

Every dwelling unit shall contain at least 300 square feet of floor space for the first occupant thereof and at least 100 additional square feet of floor space per additional occupant.

#### 5.2 Required Space in Sleeping Rooms

In every dwelling unit of two or more rooms, every room occupied for sleeping purposes by one occupant shall contain at least 100 square feet of floor space and every room occupied for sleeping purposes by more than one occupant shall contain at least 55 square feet of floor space for each occupant thereof.

#### 5.3 Minimum Ceiling Height

At least one-half of the floor area of every habitable room, foyer, hall or corridor shall have a ceiling height of at least seven feet (7'), and the floor area of that part of any room where the ceiling height is less than seven feet (7') shall not be considered as part of the floor area in computing the total floor area of the room for the purpose of determining the maximum permissible occupancy thereof.

#### 5.4 Occupancy of Dwelling Unit Below Grade

No basement or cellar space shall be used as a habitable room or dwelling unit unless:

(a) The floor and walls are impervious to leakage of underground and surface runoff water and are insulated against dampness;

(b) The total of window area in each room is equal to at least the minimum window area size as required in Section 2 of this Code;

(c) Such required minimum window area is located entirely above the grade of the ground adjoining such window area; and

(d) The total of openable window area in each room is equal to at least the minimum as required under Section 2 of this Code, except where there is supplied some other device affording adequate ventilation.

### Section 6 - Sanitation Requirements

No person shall occupy as owner-occupant or let or sublet to another for occupancy any dwelling or dwelling unit designed or intended to be used for the purpose of living, sleeping, cooking and eating therein nor shall any vacant dwelling building be permitted to exist which does not comply with the following requirements.

#### 6.1 Sanitation

Every owner of a dwelling containing three or more dwelling units shall be responsible for maintaining in a clean and sanitary condition the shared or public areas of the dwelling and premises thereof.

#### 6.2 Cleanliness

Every occupant of a dwelling unit shall keep in a clean and sanitary condition that part of the dwelling, dwelling unit and premises thereof which he occupies and controls or which is provided for his particular use.

#### 6.3 Garbage Disposal

Every occupant of a dwelling or dwelling unit shall dispose of all his garbage, any other organic waste which might provide food for rodents and all rubbish in a clean and sanitary manner by complying with the applicable City Ordinance.

#### 6.4 Extermination

Every occupant of a single dwelling building and every owner of a building containing two or more dwelling units shall be responsible for the extermination of any insects, rodents or other pests within the building or premises.

#### 6.5 Use and Operation of Supplied Plumbing Fixtures

Every occupant of a dwelling unit shall keep all plumbing fixtures therein in a clean and sanitary condition and shall be responsible for the exercise of reasonable care in the proper use and operation thereof.

### Section 7 - Rooming Houses

No person shall operate a rooming house or shall occupy or let to another for occupancy any rooming unit in any rooming house which does not comply with the provisions of any section of this Code except the provisions of Section 1 and Section 6.

#### 7.1 Water Closet, Lavatory and Bath Facilities

(a) At least one flush water closet, lavatory basin and bathtub or shower properly connected to a water or sewer system and in good working condition shall be supplied for each four (4) rooms within a rooming house wherever said facilities are shared.

(b) All such facilities shall be located on the floor they serve within the dwelling so as to be reasonably accessible from a common hall or passageway to all persons sharing such facilities.

#### 7.2 Water Heater Required

Every lavatory basin and bathtub or shower shall be supplied with hot water at all times.

#### 7.3 Minimum Floor Area for Sleeping Purposes

Every room occupied for sleeping purposes by one person shall contain at least 100 square feet of floor space and every room occupied for sleeping purposes by more than one person shall contain at least 55 square feet of floor space for each occupant thereof.

#### 7.4 Exit Requirements

Every rooming unit shall have a safe, unobstructed means of egress leading to safe and open space at ground level, as required by the laws of the City or of the State.

#### 7.5 Sanitary Conditions

The operator of every rooming house shall be responsible for the sanitary maintenance of all walls, floors and ceilings and for maintenance of sanitary conditions in every other part of the rooming house. He shall be further responsible for the sanitary maintenance of the entire premises owned, leased or occupied by the operator.

### Section 8 - Unsafe Structures

All structures, dwellings, apartment houses, rooming houses, buildings or outbuildings which are unsafe, unsanitary, unfit for human habitation or which constitute a fire hazard or are otherwise dangerous to human life or which in relation to existing use constitute a hazard to safety or health by reason of inadequate maintenance, dilapidation, obsolescence, abandonment or lack of adequate egress are generally in violation of this Section. All such unsafe buildings are hereby declared illegal and a public nuisance and shall be abated by repair and rehabilitation or by demolition in accordance with the provisions of this Ordinance and the laws of the State of Texas.

### Section 9 - Definitions

For the purpose of this Code, certain abbreviations, terms, phrases, words and their derivatives shall be construed as set forth in this Section.

Words used in the present tense include the future. Words in the masculine gender include the feminine and neuter. Words in the feminine and neuter gender include the masculine. The singular number includes the plural and the plural number includes the singular.

The following definitions shall apply in the interpretation and enforcement of this Ordinance:

**ALTER OR ALTERATION** shall mean any change or modification in construction or occupancy.

**PREMISES** shall mean a lot or parcel of land including the buildings or structures thereon. In the case of multi-dwelling units, each dwelling unit is defined in this Ordinance shall be considered a separate premise.

**PUBLIC AREAS** as used in this Code shall mean an unoccupied open space adjoining a building and on the same property that is permanently maintained, accessible to local fire officials and is free of all incumbrances that might interfere with its use by fire officials.

**REPAIR** means the replacement of existing work with the same kind of material used in the existing work, not including additional work that would change the structural safety of the building, or that would affect or change required exit facilities, a vital element of an elevator, plumbing, gas piping, wiring or heating installations, or that would be in violation of a provision of law or Ordinance. The term "repair" or "repairs" shall not apply to any change of construction.

**REQUIRED** shall mean required by some provision of this Code.

**RESIDENTIAL OCCUPANCY** shall mean buildings in which families or households live or in which sleeping accommodations are provided. All dormitories shall be classified as "Residential Occupancy." Such buildings include the following: dwellings, multiple dwellings and rooming houses.

**ROOMING HOUSE** shall mean any dwelling, or part of any dwelling containing one or more rooming units, in which space is let by the owner or operator to three or more persons who are not husband, wife, son, daughter, mother, father, sister or brother of the owner or operator.

**ROOMING UNIT** shall mean any room or group of rooms forming a single habitable unit used or intended to be used for living and sleeping, but not for cooking or eating purposes.

**RUBBISH** shall mean combustible and non-combustible waste materials, except garbage. The term shall include the residue from the burning of wood, coal, coke and other combustible material, paper, rags, cartons, boxes, wood excelsior, rubber, leather, tree branches, yard trimmings, tin cans, metal, mineral matter, glass, crockery and dust.

**STAIRWAY** means one or more flights of stairs and the necessary landings and platforms connecting them to form a continuous and uninterrupted passage from one story to another in a building or structure.

**STORY** means that portion of a building included between the upper surface of any floor and the upper surface of the floor next above, except that the topmost story shall be that portion of a building included between the upper surface of the topmost floor and the ceiling or roof above.

**STRUCTURE** means that which is built or constructed, an edifice or building of any kind or any piece of work artificially built up or composed of parts joined together in some definite manner. The term structure shall be construed as if followed by the words "or part thereof."

**SUPPLIED** shall mean paid for, furnished or provided by or under control of the owner or operator.

**TEMPORARY HOUSING** shall mean any tent, trailer or other structure used for human shelter which is designed to be transportable and which is not attached to the ground, to another structure, or to any utilities system on the same premises for more than thirty (30) consecutive days.

**VENTILATION** shall mean the process of supplying and removing air by natural or mechanical means to or from any space.

**YARD** means an open, unoccupied space on the same lot with a building extending along the entire length of a street or rear or interior lot line.

### Section 10 - Severability

If any provision of this Code or the application thereof to any person or circumstances is held invalid, the remainder of the Code and the application of such provision to other persons or circumstances shall not be affected thereby.

### Section 11 - Penalty

Any person, either by himself or agent and any firm, corporation or other entity which violates any of the provisions of this Code shall be deemed guilty of a misdemeanor and issued a warrant to appear in Municipal Court. Upon conviction of any such violation, he shall be fined in a sum not to exceed Two Hundred Dollars (\$200.00) and each day during which such violation continues shall constitute a separate and distinct offense. In any case of violation of any of the terms or provisions of this Ordinance by any corporation, the officers and agents actively in charge of the business of such corporation shall be subject to the penalty herein provided. Any offense defined herein which has been defined by laws of the State of Texas as an offense and for which penalty has been prescribed shall be punished as provided in said State law, and nothing herein shall be held as fixing any penalty provided by the laws of the State of Texas.

### Section 12 - Date of Effect

This Ordinance shall become effective immediately upon its passage and publication in a newspaper of general circulation in the City of Lockney, Texas.

Passed and Approved this 3rd day of June, 1982.

ATTEST:  
Erma Lee Duckworth,  
City Secretary

J.D. Copeland, Mayor

**TYE COMPANY TENNIS TOURNAMENT WINNERS** display trophies won recently at the annual company-sponsored tournament held recently in Lockney. Left to right are: Ricky Vasquez, Danny Huffine, Dennis Wilhoit, and David Perez. Vasquez captured first prize trophy in the singles event, followed by Huffine in second place and Perez, third place winner. Vasquez and Huffine teamed up to take first place trophy in the doubles event, followed by the second-place team of Perez and Dennis Wilhoit.

## Mosquitoes affect health of both man and animals

BY JETT MAJOR

Rainy weather, standing water and that familiar pest, the mosquito, add up to a problem which affects the health and well-being of man and his domestic animals all across Texas, cautions County Extension Agent Jett Major.

Right now, mosquitoes are only a nuisance pest. The so-called floodwater mosquito is the predominant species in the area. Mosquitoes develop over a 10-14 day period and adults live for about 10 days. Therefore, problems are usually cyclic and of short duration this time of year.

Effective mosquito control is often a complex, expensive task requiring the cooperative efforts of individual homeowners as well as organized groups, communities and local and state government. But there is much the individual can and should do around the home, the agent stressed.

The first thing to do is eliminate their breeding sites, the county agent advised. Standing water from rain showers provides excellent breeding grounds for mosquitoes.

"Mosquitoes can lay eggs wherever standing water is available for a week or longer," Major said. Old tires, tin cans, birdbaths, roadside ditches, rain gutters, temporary water containers and swampy places all can hold enough water to enable mosquitoes to breed.

Empty out old tires and place them where they cannot collect additional water. Flatten and discard tin cans. Change the water in birdbaths every week. Clean out rain gutters, remove temporary water containers and see that rain barrels and water storage tubs are tightly covered. Drain standing water from ditches and swamp areas.

"If there is stand water that serves as a breeding site but cannot be drained or eliminated, treatment with a larvicide will be necessary," Major said.

One of the most effective larvicides is No. 2 diesel oil with a biodegradable spreader, applied at a rate of 20 gallons for each surface acre of water, or approximately 6 ounces per 100 square feet of surface.

Abate malathion or Dursban applied to standing water at rated indicated on their labels also are effective larvi-

cides the county agent said. But he warned that labels should be read carefully to determine the hazards these insecticides pose to persons applying them and to fish and animals that may use the water.

Control of adult mosquitoes offers the most immediate relief. Inside the home, aerosol bombs containing pyrethrin offer quick knockdown of adult mosquitoes, the Extension agent said. The killing effect of pyrethrin is very short-lived, so frequent application will be necessary to control adult mosquitoes inside the house. The "pest strip" offers effective indoor control for long periods. One pest strip for each average size room is necessary to control mosquitoes.

Adult mosquitoes around the home can best be controlled by space or residual treatments of insecticides such as malathion, Dibrom, methoxychlor, or Dursban, he suggested. Space treatments, generally fogs, have very little residual activity and require repeating at frequent intervals. Space treatment should be done during the cool hours of the night or early morning and when wind velocity is less than five miles an hour.

Residual treatment applied as mists or sprays to the resting sites of adult mosquitoes gives longer-lasting control than space treatments. These should be applied to vegetation, eaves of roofs, under porches, and similar shaded areas where adult mosquitoes rest by day.

Light traps are quite popular in some communities for adult mosquito control. Unfortunately, there is no data to support their utility for mosquito control. Extension entomologists report. Quite the contrary, they say, these light traps can actually draw more mosquitoes in from surrounding areas and increase the problem, rather than alleviating it.

Reference to commercial products or trade names is made with the understanding that no discrimination is intended and no endorsement by the Cooperative Extension Service is implied.

Educational programs conducted by the Texas Agricultural Extension Service serve people of all ages regardless of socioeconomic level, race, color, sex, religion or national origin.

## Travel studies added to Wayland's list

Two more travel studies have been added to the list of classes scheduled for the summer Microterm sessions at Wayland Baptist University, Plainview.

Tours to Mexico City during the first summer Microterm (May 31-June 17) and New York during the last summer session (August 2-20) bring to four the total number of travel studies scheduled by Wayland during the coming months.

The university's second annual Hawaii Travel Study, slated for June 3-24, is also on tap, along with a week-long trip to Taos, New Mexico for a study of "Indians of the Southwest" during the third summer term (July 12-30).

Under the direction of Dr. Lee Garcia, associate professor of modern languages, the Mexico City travel study offers participants three hour college credit in Conversational Spanish, an upper-level course designed to increase speaking ability in the language.

Students will stay at the Mexican Baptist Seminary and will visit such sites as the famous pyramids, Cuernavaca, and the University of Mexico.

Cost of the trip is \$755 per person and covers tuition, housing, meals, and transportation.

The New York Theatre Visit is scheduled for August 14-19 and offers three hours credit in speech/theatre, according to tour director Roland W. Myers, assistant professor of drama.

Participants will view six plays and/or musicals, including three on Broadway and three in off-Broadway theatres, the latter of which serves as training grounds for future Broadway actors, writers, and directors.

"Some of the productions under con-

sideration are '42nd Street,' 'Evita,' 'Joseph And His Amazing Technicolor Dreamcoat,' and 'Children of a Lesser God,'" Myers said. "Most of the performances will be in the evening, leaving the daytime hours for theatre-connected tours of such places as the Lincoln Center and the famous Shakespeare in the Park's Public Theatre, as well as typical siteseeing."

Participants will also attend an opening seminar with nationally-known theatre critic T.E. Kalem of Time Magazine and will have the opportunity to visit with cast members after performances about the plays and their productions.

Cost for the trip, including tuition, transportation, tickets, and housing accommodations, is \$950 per person. A deposit of \$150 must be made by June 1, with the balance due July 1.

A very limited number of places are still available for the Hawaii Travel Study, which offers four semester hours of credit. Students may choose from three hours credit in theology, history or sociology, in addition to one hour credit in physical education.

The study of the contemporary Far East will focus on cultural contrasts, comparative religions, cultural mores, and historical developments and sites of interest on the island of Oahu.

Cost of the total package is \$1,325 per person and covers tuition and fees, transportation, lodging and meals. A \$350 deposit is required at the time of registration.

Plans for the Taos travel study will be announced at a later date, according to tour director Eddie Guffee.

For more information on any of the trips call 296-5521.

### Card of Thanks

I wish to express my appreciation to all my friends and loved ones during my stay in the hospital. Your prayers, cards, calls and flowers were so appreciated. May God bless each and every one of you.

Otis Anderson  
6-10p

We wish to extend our heartfelt appreciation for the many kind expressions of sympathy by our friends and neighbors during the recent loss of our loved one.

She was a dear person and we will miss her for we all loved her so very much; however your words, gifts of food, cards, floral offerings and contributions to worthy causes have made our sorrow a little easier to bear. We love and thank each and every one of you.

The Family of Bonnie Bennett  
Beth Kropp, Paulette Savage  
and Brady  
Bob, Susan  
and Paul Kropp  
(the entire Biller  
and Bennett families)

### THANK YOU

Annie Mae and J.B. Mercer wish to thank our dear friends for the prayers, visits, cards and kind words during Annie Mae's stay in both hospitals.

L6-10p

We would like to thank the Floydada Fire Department for promptly coming to our aid.

Mr. & Mrs. J.R. Noland  
Mark Noland

## More Classified

We wish to thank each and every one who has expressed love and concern in the recent passing of our beloved husband and father, Lesol Parker.

Thank you for food, flowers, cards and most of all - your prayers.

Special thanks to Dr. Hong and the nurses for their care and also to Alton Rose and his staff for their congenial services.

Mrs. Lesol Parker  
Mr. & Mrs. Elvis Parker  
and family  
Mr. & Mrs. Wilbur Finkles  
and family  
Mr. & Mrs. Charles White  
and family

## Public Notice

### INVITATION FOR BIDS

The Housing Authority of the City of Floydada, Texas (hereinafter called the Local Housing Authority) will receive bids for a single construction contract with an add alternate for the total Modernization of forty (40) Dwelling Units including mechanical, electrical, plumbing, interior remodel, exterior utilities and etc., and all other work as noted on drawings and in the specifications until:

THURSDAY - JUNE 24, 1982 - 2:00 P.M., CST  
OFFICE OF THE LOCAL HOUSING AUTHORITY  
201 EAST CALIFORNIA, FLOYDADA, TEXAS

at which time and place all bids will be publicly opened and read aloud.

Proposed forms of contract documents: including plans and specifications are on file at the office of the Architect - Whitaker McQueen Jones & Assoc., 2517-74th Street, Lubbock, Texas, (806) 745-5485, and the Dodge Plan Room in Lubbock.

Copies of the documents may be obtained by depositing \$25.00 with the Architect for each set of documents so obtained. Such deposits will be refunded on return of the plans, specifications, and other documents in good condition within 10 days after bid opening.

A certified check or bank draft, payable to the Local Housing Authority, U.S. Government Bonds, or a satisfactory bid bond executed by the bidder and acceptable surety in an amount equal to five (5%) percent of the bid shall be submitted with each bid.

The successful bidder will be required to furnish and pay for satisfactory performance and payment bond or bonds.

Attention is called to the provisions for Equal Employment Opportunity as reflected in these documents.

Attention is called to the fact that not less than the minimum salaries and wages as set forth in the specifications must be paid on this project, and that the contractor must perform with his own forces at least the construction branches of carpentry.

The Local Housing Authority reserve the right to reject any or all bids and to waive any informalities in the bidding.

No bid shall be withdrawn for a period of sixty days (60) subsequent to the opening of bids without consent to the Local Housing Authority.

HOUSING AUTHORITY OF THE  
CITY OF FLOYDADA, TEXAS  
Ina McDowell - Executive Director

Date: June 8, 1982

### NOTICE TO BIDDERS

STATE OF TEXAS

COUNTY OF FLOYD

Notice is hereby given that the Commissioners Court of Floyd County, Texas, will receive bids for the purchase of the following described equipment until 10:00 a.m., Monday, June 14, 1982, being the regular June Term, 1982, of said Court; at which time all bids will be opened and read aloud. Said bids as follows:

Two (2) 1982 long wheel base 1/2 ton pickups. Approximately 300 H.P. V-8 engine, dual gas tanks, 4-speed transmission, P-225 tires. Power brakes and steering. Heavy duty radiator, gauges, cigarette lighter, AM radio, hitch, bumper guard, heavy duty springs, light color.

Trade in on the above one (1) 1974 International pickup one (1) 1970 Ford pickup. Said pickups can be inspected on June 4 & 11 at County Barn, Floydada, Texas.

All bids shall be sealed when presented and will be opened at the above time and date. The Court reserves the right to reject any and all bids, and waive all formalities.

This the 31st day of May, 1982.

Choise Smith  
Floyd County Judge

# Vacation Bible School highlights busy summer

**BY MRS. MURRAY JULIAN**  
South Plains, June 7th:  
This is a busy time of year with Vacation Bible School going on during the afternoons, from 2-5 p.m. at the South Plains Baptist Church, and farmers in their fields, early and late, as ground has dried out enough so they can get their cultivating and replanting finished.

Lon Colvin, of the Lockney Co-op Gin and Elevator here at South Plains, has reported the work on building and re-doing of the gin here is progressing very well. They hope to have the building and remodeling finished in about two months. They are putting in 3 new stands at the gin. These are 3 - 128 Lummus Stands. They are also enlarging the building, making it about 20 feet wider.

Mrs. Jerry Taylor and Rhonda from Amarillo came Thursday to spend the night with her mother, Mrs. Letha Mulder, and then she got Candy Taylor and took her home after she had spent the week here with her grandmother and uncle and aunt, Nathan and Kathy Mulder. They all enjoyed the birthday Friday evening in a family get-together

for Mrs. Letha Mulder whose birthday was May 29th.  
Family night for the Vacation Bible School is now in session at the South Plains Baptist Church from June 7-11th with family night held at the Baptist Church at 6:30 p.m. on Sunday June 13th. Cookies and punch are served each afternoon to all attending.  
Mr. and Mrs. Carlton and Diane

Johnson from our South Plains area were named to the planning committee for the last Lighthouse Electric Co-Op annual meeting and barbecue which was held in the beautiful new building in Floydada. These couples who help make the annual meeting the good meeting that it always is, take many hours and lots of time, so we thank them, too, for their work and time.  
We are hoping that E.J. Kinslow gets to come home from the Methodist Hospital in Lubbock this Thursday, as was indicated. He has been down there a week with a chest infection.  
Mrs. I.H. Parks (Maurine) is still

there at the Methodist Hospital in Lubbock, taking therapy for her knee

which was recently operated on. We hope she too, can soon be home.

Mrs. Corda Taylor of Muleshoe was a visitor at the Baptist Church Sunday morning, and then returned to her home in Muleshoe that afternoon. She had spent some time here with her children, Rev. and Mrs. Cecil Osborne and their granddaughter, Jaime and Jennifer Somers of Mineral Wells, who have been visiting here at the parsonage with their grandparents, and with their grandmother, Mrs. Osborne, had gone to Muleshoe to visit Mrs. Taylor earlier in the week.  
It was just great to see Mrs. Raymond Upton back in church and able to be out Sunday morning. She has been on the sick list for several weeks, but was able to be out and around last week.  
John and Olita Wilson had been away at their home in Cloudercroft, New Mexico the past few weeks, and now they are home and we were glad to have them back in church Sunday.  
Mrs. Louzella Nichols went to Lockney to church services at the Methodist Church Sunday, and during the afternoon she later visited with her brother and wife, Mr. and Mrs. Vera and John Cox who live near Lockney.  
We were sorry to hear that Sylvan's father, J.A. Kinnibrugh of Vera had been taken to the hospital at Seymour over the weekend, but is doing better this Monday

trip which included Washington, D.C.  
Mrs. Ethel Warren reached home Tuesday from a visit with son John and family of near Lubbock.  
The landscape around here looks much better after all the lawn mowing.  
Mrs. Cora Hartline reports that her grandson Blake, son of Mr. and Mrs. James Hartline of Levelland, has been dismissed from a Lubbock hospital.  
Steve Green, son of Victor Greens of Plainview, is home on vacation from Brown University of Providence, Rhode Island.  
A recent letter from Mrs. Ruth Jordan Moss - Mrs. J. Ulmon Moss - stated that they are winding up their missionary stint of over 30 years in South America and Mexico. After their furlough they are to be at home in Cleburn. Don't we hope they will be present at Center homecoming on the Labor Day weekend? What alot of good they have done for the world!

ton and Diane Johnson and Deneen Johnson and Keith Merckle.  
Dishes that were taken to the Frank McClure home with food last week may be picked up at the basement of the South Plains Baptist Church where they were taken by members of the McClure family.  
Mr. and Mrs. Bobby Craddock who live at Sundown, were visitors at the

South Plains Baptist Church Sunday morning, and they had spent the weekend here with her parents, Mr. and Mrs. Richard Sanders, Renee, Stanley and Layne. Renee has been here with her parents for some months, and this weekend she has moved to Aiken, so that she can get back and forth to work easier, as she is employed in Lockney.  
Hi! Aunt Mary.

Miss D'Lee Marble, bride-elect of Dale Powell, was honored with a miscellaneous bridal shower in Floydada, Saturday morning, June 5th, at the home of Mrs. Travis Young. The wedding of Miss Marble and Dale Powell will be on Friday, June 18, at 7:30 p.m. in the First Baptist Church in Floydada with a reception following the ceremony at the Wall Street Parlor of the Baptist Church.  
Mr. and Mrs. Carlton and Diane Johnson were hosts at their home for a barbecue supper, hay ride to the canyons and games of volleyball and horseshoes Saturday, May 29, beginning at 6:30 p.m. The couples went on a hayride to canyons, where they had prepared the barbecue supper of beans, slaw, potato salad, barbecued meat, bread and topped off with homemade ice cream. At dark all returned back to the Johnson home where they had more games of volleyball and a time of visiting and more refreshments.  
Those who went on the hayride and enjoyed barbecued supper afterwards were Messrs. and Mmes. Nathan and Connie Johnson, Dwight and Helen Teeple, Renee and Nancy Young, Bernice and Cindy Ford, Ronnie and Treva Aston, Randy and Nancy Henderson, Danny and Kim Lambert, John and Deneen Burson, Brad and Shari Smith, Zach and Sandra Cummings, Larry and Cathy Barnett, Ricky and Marilyn Biggs, Bill and Gail Howard, Greg and Brenda Mangold, hosts Carl-

ton and Diane Johnson and Deneen Johnson and Keith Merckle.  
Dishes that were taken to the Frank McClure home with food last week may be picked up at the basement of the South Plains Baptist Church where they were taken by members of the McClure family.  
Mr. and Mrs. Bobby Craddock who live at Sundown, were visitors at the

South Plains Baptist Church Sunday morning, and they had spent the weekend here with her parents, Mr. and Mrs. Richard Sanders, Renee, Stanley and Layne. Renee has been here with her parents for some months, and this weekend she has moved to Aiken, so that she can get back and forth to work easier, as she is employed in Lockney.  
Hi! Aunt Mary.

## Center News

### Center receives rain

**BY MRS. J.E. GREEN**  
June 7 & 8:  
Schools are all out, vacations on. Field work for the farmer. Weather warm. Ground dry even ten days after a 4 inch rain. It is summer. Grass and weeds also grow.

Among the sick, Wiley Rogers and wife are back home after his many weeks in the hospital. Mr. Hubert Davis is in a Plainview hospital.

Otis Anderson went home last week after some days in the hospital.

The Henry Brewers reached home last Monday nite after visiting in Littlefield with all her brothers - from Louisiana, Ft. Worth and Wichita Falls, and all were at the bedside of the oldest brother, Buren Forman, of the Littlefield Rest Home. Let us remember all the sick and the anxious loved ones in our prayers.

Sunday, Irving Brewer and family of Lubbock visited briefly with his parents on the way home from their vacation

trip which included Washington, D.C.  
Mrs. Ethel Warren reached home Tuesday from a visit with son John and family of near Lubbock.

The landscape around here looks much better after all the lawn mowing.

Mrs. Cora Hartline reports that her grandson Blake, son of Mr. and Mrs. James Hartline of Levelland, has been dismissed from a Lubbock hospital.

Steve Green, son of Victor Greens of Plainview, is home on vacation from Brown University of Providence, Rhode Island.

A recent letter from Mrs. Ruth Jordan Moss - Mrs. J. Ulmon Moss - stated that they are winding up their missionary stint of over 30 years in South America and Mexico. After their furlough they are to be at home in Cleburn. Don't we hope they will be present at Center homecoming on the Labor Day weekend? What alot of good they have done for the world!

## WHY BUY A GAS GRILL NOW?

Now is a great time to buy a new gas grill. Choose from 7 quality models ... save a big 20% ... and take the heat out of your kitchen, too.

You'll really enjoy the convenience of cooking out with a natural gas fired grill ... love the flavor of outdoor cooking without the mess of charcoal or the hassle of LP tanks.

Order your gas grill from any Energas employee now and make the most of summer.

# HOLD IT!

## THERE'S STILL TIME FOR

# Treflan

### WITH CULTI-SAVE

- 1 Apply Treflan after cotton is past the four true-leaf stage.
- 2 You may apply Treflan as a broadcast or post-directed spray.
- 3 If cotton foliage prevents uniform coverage, use drop nozzles.
- 4 Incorporate within 24 hours using one pass with a sweep-type or rolling cultivator.
- 5 Wheat or barley can be planted in the fall following this application at the recommended rates.

Application rates		
Treflan (Pints per Acre)		
Soil Texture	E.C./M.T.F.	PRO-5
Coarse	¾-1	0.6-0.8
Medium	1-1½	0.8-1.2
Fine	1½-2	1.2-1.6

Refer to the Treflan label for additional information before use.

See your dealer for details.

FROM ELANCO

### PATIO KITCHEN

PK grills provide the convenience of natural gas fired barbecuing ... have heavy top and bottom aluminum castings and H-shaped stainless steel burners for years of long wear ... and exclusive Range Rock briquettes with controlled porosity for even heat and less flare-up.
