Volume 84, Number 24

Junk car ordinance being enforced by city

In the monthly meeting of the Lockney City Council on June 4, aldermen were updated on the enforcement of the city's junk car ordinance.

It was reported to the council that Mayor Dan Smith and Police Chief Tim Thompson have identified "about 150 junk cars in the area of the city west of Main Street and north of Locust, approximately two thirds of the city." The other part of the city will be checked in the near future.

Though many cars have been removed, fencing has been constructed, and cars have been removed from public view, there are still a great

number of vehicles which are considered junk and are not in compliance with the city ordinance," according to

A junk car, according to the ordinance is a vehicle which has no current registration or inspection sticker and is not enclosed from the public view.

The junk cars within the city limits were supposed to be removed by May 16. Notification of the owners of the vehicles which still remain in violation of the ordinance is imminent, according to city officials.

The city has the authority to have these vehicles removed and sold for the

expense of removal and/or the owners of the vehicles may be fined \$200 per day of noncompliance with the ordin-

Owners who wish to keep a vehicle which is considered junk by ordinance standards must remove the vehicle from the public view. It must be housed behind a fence, in a garage, or hidden from the public view by trees or shrubbery.

PAVING NOT APPROVED

In a split vote members of the council failed to approve a motion which would have allowed for the paving of the city

right-of-way on the Senior Citizens parking lot.

The council considered a request from the Senior Citizens organization to pave a 22 foot wide by 150 foot long strip which borders the group's building on the west side. The right-of-way adjoins First Street.

City attorney Paul Lyle informed the council that it would be legal for the city to pave the area, however the council could set a precedent which would require it to do the same for anyone who would want their right-of-way paved if this were approved.

Alderman Jerry Johnson made the motion to pave the area and alderman Ronnie Aston seconded the motion. Johnson and Aston voted for the motion and aldermen Kenneth Wofford, J.D. Copeland, and Gary Marr voted a-

TELECOMMUNICATIONS

In other action the council approved a motion to approve an ordinance calling for a 1 percent taxation of telecommunications services. City officials explained that the ordinance would not cause a raise in any phone customers billing. "It allows the city to tax telecommunications companies, whereby any long distance phone call originating from the city of Lockney, through any long

paid back to the city. This tax ordinance could mean as much as \$5,000 per year for the city. It comes from one percent of the long distance companies gross for the year from calls which originate from the city.

distance company, would mean money

In other action the council approved new office hours for City Judge Lester Green. The city judge will now be in his office from 9:00 to 11:00 a.m. and from 2:00 to 4:00 p.m., five days per week.

They also approved a contract with the Floyd County Appraisal District for assessment and collection services from January 1, 1988 to December 31, 1989. Also on the slate was the approval of a top wire cover for the cages at the city dog pound. Problems with stray dogs,

BUILDING DESTROYED — This small house, located just east of the John T. Carthel home, was almost totally destroyed by a fire last Friday afternoon at about 3:00 p.m. The Lockney Fire Department responded immediately to the call but arriving on the scene, they found that the fire had been burning for some time and was well involved. Firemen

spent nearly an hour on the scene putting out the blaze and removing smoldering contents from the building. It apparently started from a fence charger. One family member reported that many family keepsakes and treasures were lost

- Staff photo

'great for Lockney'

The Mackenzie Water Authority "was a life-saver. That's one of the best things we've ever had," W.L. Carthel says in reviewing his "almost 23 years" with City of

He remembers that some people were opposed to the water project when it was proposed.

Another major development was "the federal grant which allowed us to get water, sewer and pavingcurbing-guttering in the northeast part of town.'

"The big chance has been in the street department," says Carthel, who served as water-street superintendent prior to his May 31 retirement. His "last working day" was

Friday, May 29. A lifelong Lockney community resident, except for 31/2 years spent in the Air Force during World War II, he joined the city staff on Aug. 1, 1964. After working with Burl Holt for almost nine years, he succeeded Holt as superintendent of the water-street department in April

'I ENJOYED EVERY MINUTE'

Carthel's attitude toward his job differs from many persons. "I enjoyed every minute of it. I wish I

could go back for 23 more years." Richard T. (Dickie) McCarty, who has been associated with Carthel and the city since May 1982, is the

new superintendent. "Things changed very drastically" during the 23 years, Carthel says. When he became a city employee, "we did all our work manually, and now all the lines are installed with equipment. Everything is more mechanized."

In 1964, "Burl and I were the two outside men. Junior Brotherton later joined the staff for a few months," he remembers. Madge Jones King and Betty Jamerson were the office personnel.

"I was real fortunate with my employees through the years," Carthel says. "Oh, I had some duds, but they didn't last long. If they were just looking for pay day and quitting time, we didn't jibe too

He points out that "It is the policy of the city to read every meter each month. I told my employees that if they tried to skip some I would find out. As far as I know, I never had any problems along this line. I've had some fine employees."

The former water-street superintendent can remember "nine men who worked with me - not for me" during his tenure. "I never asked them to do anything I wouldn't do myself."

HONESTY STRESSED

These nine men were not the "duds," but those who "made a hand" and stayed with the city for a significant period of time. In addition to a strong work ethic, honesty was the foremost thing Carthel asked of his employees. The nine were "pretty equally divided" between Hispanic and anglo.

"We took care of all our equipment, except for mechanic work, ourselves," he points out. "As best we could, we kept it in good order."

Carthel appreciates the fact that "All the time I worked for the city, I had very considerate councils and mayors. There were very few things I asked for, if they were within reason, that I didn't get."

Ironically, he worked under only four mayors and two city secretaries - Madge Jones King and Erma Lee Duckworth — during his 23 years with City of Lockney. O.C. Bailey was the mayor when Carthel joined the city staff of 1964. Claude Brown took office the following April and served as mayor for 18 years. J.D. Copeland sat in the mayor's chair for four years, and Dan Smith was sworn in this past April.

"Except for some mechanization," the city operation has remained "pretty much the same" during the almost quarter of a century Carthel was associated with the city.

LITTLE METER CHANGE Likewise, Lockney's population

Commodities given next Monday

Caprock Community Action will distribute commodities at the Community Center on Monday, June 15, from 2:30 to 5:00 p.m.

New applications for recertification

will be processed at the Community Action office on Friday, June 12. New applications must bring proof of residence, such as a utility bill and an identification card such as a driver's

Wheat crop 'short' due to freeze and insect problems

Lockneyites have seen three new businesses open in their town in recent weeks. The unique - and nice - part of it is that all three owners are young, home-grown products.

We like it! Lots of luck to each.

PLENTY OF ROOM

Sheriff Fred Cardinal and a companion drove out to Muncy "about three years ago" to watch a threatening "wall cloud that was moving pretty fast." They talked with Herman Graham for some while before he departed.

Suddenly, a tornado dropped from the cloud and moved along the edge of the highway from the west toward

The sheriff had parked his car on the crossroad beside the culvert at Muncy. As that twister rapidly approached, he and the companion abandoned the car in favor of the culvert.

"You could hear the tornado as it went over," Sheriff Cardinal remembers. "I just knew the elevator was gone, but nothing was hit." He recalls that weeds west of Muncy were leveled by the tornado "just like you had run a lawnmower over them.'

The sheriff climbed into the north end of the culvert and his companion Continued on Page Three

An extremely large and hard freeze. coupled with insect problems, have drastically cut wheat acreage. However, opinions vary on the quality of wheat remaining to be harvested.

Most producers "hayed out, grazed out or plowed up" wheat, in the opinion of Delton Stone, general manager of Lockney Cooperatives. Some wheat land has been planted to cotton following the devastating March freeze.

"It's going to be a very short wheat season," Stone believes. He estimates yields will be "down 50 percent or

"If we hadn't had that freeze, we would have a sure enough good crop," says Buddy Graham, manager of Attebury Grain Co.

Although acreage is down, Graham believes "There are some pretty good patches. Some of it may be better than we thought."

He admits "there is a lot of freeze and insect damage," which reduced both acreage and quality in many fields.

Another source says some producers 'pretty much gave up on their crop' following the freeze. Insects then attacked the fields, and, in some cases, did more damage than the freeze when they were not combatted.

Harvest is "just around the corner" if the weather cooperates.

Lambert Spraying Service-Store latest in series of new businesses

third new Lockney business to be established in recent weeks. Housed in the former Lockney Lumber & Supply facilities at the southern end of Main Street, the venture is an extension to Lambert Spraying Service, which has operated for several years.

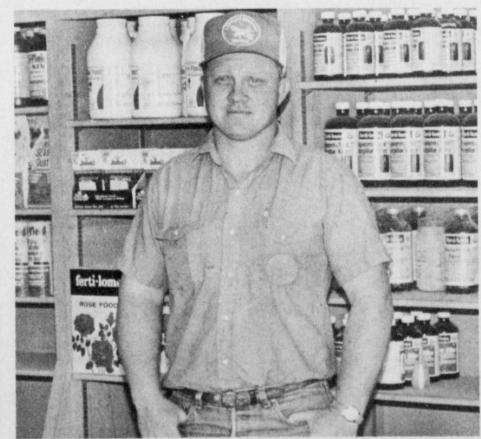

Dickie Lambert is the owner. Manager of Lambert Spraying Service-Store is Denny Quisenberry, with Donnie McLaughlin and B.J. Wofford assisting on a part-time basis.

Lambert says the firm, open from 7:30 a.m. to 5:30 p.m. Monday through

Lambert Spraying Service-Store is the Friday and from 7:30 until noon on Saturday, offers "a full line of lawn and garden supplies, including fertilizers, spreaders and equipment, garden seeds and chemicals and bedding plants. We have everything that might be needed for home lawn and garden use."

Lambert says his firm has "a complete line of farm chemicals.'

Potting soil and pet supplies also are stocked, along with dog and cat food, cattle and horse feeds and mineral and salt blocks. Home bug treatments are

Senior Citizens Center improvements progressing

According to spokesmen for the Lockney Senior Citizens, "work on the building is progressing well. Both restrooms have been completed and floor covering, appliances,

and the cabinets can be installed." There are now 153 members of the organization and a supper for members is planned for Friday, June 12 at 6:30 p.m. at the

Community Center. Sandwiches, salad, brownies, and cookies will be served and all members are encouraged to attend.

The Senior Citizens have planned a fund raising bake sale for Friday, June 19, "just in time for Father's Day." The bake sale will begin at 9:00 a.m. at the Senior Center and will continue till all goods are sold.

In times like these... By Mary Jo Fielding

Even as many other communist countries are experimenting with economic reforms of one kind or another, Cuba has chosen to move in precisely the opposite direction. Within the past year Fidel Castro has pulled the plug on the country's once-thriving system of free-market farmers' stands and a program that allowed Cubans to build, buy and sell private homes on the open

market. These two factors are touches

of capitalism that he has permitted to

take root in 28 years of rule. A

personable correspondent recently visit-

ed Cuba with an American delegation

from Indianapolis, host city for this

year's Pan American Games, in which

Cuban athletes will compete.

According to her report, Castro put in one appearance during the visit of the Indianapolis delegation. Asked whether he planned to go to the games himself, the Cuban leader made light of the commotion his attendance would cause. Glancing at Indianapolis Police Chief Paul A. Annee, Castro deadpanned, "I think it would multiply his work."

In fact, Castro is well aware that relations between Cuba and the U.S. remain far too icy for him to expect an invitation. Washington has not even decided whether Cuba's athletes will be allowed to travel to Indianapolis on a Cuban airline, which would technically violate a 27-year-old U.S. boycott on

Lockney Care Center

By Lanita Cantwell

One of the first activities here at Lockney Care Center each week is the bus ride. Those who go regularly are Billy Probasco, Bonnie Julian, Linnie Gilbert, Mary Jo Fielding, Earl Mercer, Bessie Mack Hunt and Bessie Jackson. Wilma Payne drives the bus and we appreciate her providing safe rides for us. The Sonic and McDonald's treat us to ice cream cones or cokes. If any other drive-in would like to treat seven or eight Senior Citizens about once a month, please give us a call at 652-2513.

In our craft classes we are painting wood cut-outs. When the painting is finished, we will decorate them with bows. This project will continue for some time and we hope our class grows. We plan to have these items for sale at a later date.

We are having a Bingo tournament for the entire month of June. The persons who wins the most games will win the grand prize. At the end of the first week, Nellie Stephens and Mary Jo Fielding were tied for the lead at four games each.

We want to wish Bonnie Julian a speedy recovery. She underwent surgery this week and we miss her. We look forward to her being back real

We have had a number of visitors the past week. Among them were: Marie Kline of Levelland, Mr. and Mrs. John Hunter and Susanne of Lubbock, Bill Bradley and Jim and Ruby Whitcher of Shafter, California, Retha Moss of Anson, Leslie Beard of San Angelo, Jack and Bonnie Bradley of Dalhart and Dick and Opal Taylor of Quitaque. We appreciate all our visitors.

LAVONA PITCHFORD

Lavona Pitchford returns to care center as administrator

Lockney Care Center announces that Lavona Pitchford, a former employee of the center, will be returning to Lockney to assume the position of administrator at Lockney Care Center.

A party will be held in her honor on Wednesday, June 17, at 10 a.m. The public is welcome and encouraged to join in the celebration. Appetizers and refreshments will be served.

Ms. Pitchford, born and raised in Lockney, served as the director of nursing at Lockney Care Center for seven years until 1980. She will obtain a bachelor's degree in Business Administration in the Health Care Field from Wayland Baptist University in Plainview, in August of 1988. She most recently served as administrator at Tulia Care Center.

"I am thrilled to be returning to my hometown," said Ms. Pitchford. "I fully intend for Lockney Care Center to be the finest nursing home in the South Plains area. I want nothing less for my community."

Ms. Pitchford resides with her husband, Bill, who runs heavy equipment for the Appian Corporation, Floydada. They have four daughters: Becky, Margaret, Teresa and Brandy. Becky is currently the activities director and office manager at Tulia Care Center.

Ms. Pitchford's parents are Cecil and Charlotte Carthel of Lockney.

Lockney Care Center is operated by Unicare Health Facilities, Inc., which owns and operates 140 health care facilities in 17 states.

Teutons surprised with party

Paul and Laura Teuton were pleasantly surprised on Sunday, May 31, by a visit from all their children. They came prepared to celebrate their parents 40th wedding anniversary and Paul's birth-

Their children are: James and Paula Jane Teuton and David of Borger, Pam and Douglas Smith and Jason of Amarillo and Paula Funnell of Amarillo. Jerry (Paula's husband) was unable to come because of his work.

Paul and Laura Teuton were married June 1, 1947 in Houma, Louisiana. His birthday is June 2.

Three make Dean's List

which were turned into the pound, were mysteriously being let out and turned in again. So a wire cover will be installed to stop this problem.

City officials also want to remind citizens that any stray dog turned in to the pound is worth \$5.00. "This is one way to get rid of the stray dogs in town and also helps to remind dog owners that any dog in the city limits is to either be held on leash or must be in a fenced yard," commented officials.

DILAPIDATED BUILDINGS

Council members were informed during the meeting that several buildings in the city have been found to be uninhabitable and are in violation of the dilapidated building ordinance. Owners of these buildings will be notified in the near future to either fix the buildings or tear them down.

Though no action was taken during the June meeting, council members were informed that in the near future a fee must be charged for new water meters installed within the city limits. "In the past we have only charged for

materials used in the installation of meters. We will now have to charge for labor also," reported Mayor Smith. Other matters in which no action was

taken were the Energas Franchise tax. No representative of the company was present for the meeting. It was tabled until the July meeting.

Aldermen also discussed writing a new zoning ordinance. "The present one was written in 1959 and a new one needs to be established," according to Mayor Smith. All aldermen voted to pursue the writing of a new ordinance.

Present for the meeting were Mayor Smith, alderman Wofford, Aston, Copeland, Marr, Johnson, city attorney Paul Lyle, and city secretary Erma Lee Duckworth.

CALLED MEETING

City officials met on May 26 for a called meeting to discuss the paving of Lavada Drive. Present for this meeting were Mayor Smith, aldermen Johnson, Aston, Wofford, and Copeland.

Council members voted to pave Lavada Drive for the first 150 feet off Eighth Street. It will be curbed and guttered on both sides of the street. In addition they approved paving the next 200 feet as a half street only, which will

entered the south end. Cardinal says one's instincts "take over" during a period of danger.

What the men failed to realize was that a skunk was also sitting out the storm inside that culvert. "I didn't see that skunk when we went into the culvert. I didn't bother that skunk and he didn't bother me."

"I let him keep the culvert," the sheriff explains. But not until after the threatening cloud had passed. "I didn't see him until I was in there and I sure didn't get out," he explains.

On a serious note, the sheriff says he has learned from experience - and warns others — not to follow a tornado cloud too closely. Funnel clouds are capable of making sudden turns, and those too close to the action can find themselves in trouble.

HOW MANY TWISTERS? On the subject of tornadoes, how many can you remember which caused

damage within Floyd County? Fortunately, this county has never experienced a "grandad" tornado which leveled a town with the destruction suffered by Silverton, Lubbock, Hale Center, Matador, Plainview

However, we can recall several through the years which have resulted in deaths, injuries and property loss.

and other towns/cities on the South

If memory serves, one to three family members lost their lives in the 50s when a twister struck their home. The location could actually have been in the southern edge of either Briscoe or Swisher

A couple who lived north of Providence slept a matter of feet from their cellar entrance when a tornado demolished the house and killed them. This probably was in the 60s.

Dougherty had property loss from a tornado several years ago.

It seems that the South Plains most prevalent "tornado alley" is from Cotton Center, through Hale Center and Plainview and on to the northeast. Nobody knows how many tornadoes and would-be funnel clouds have traveled this path through the years.

QUESTION

One question: With new, more healthy and better tasting dog (and cat) food introduced frequently to the American public, who does the tasting?

THE FARMERS AND RANCHERS PRAYER

As farmers and ranchers, dear God, give us the patience and wisdom to understand why a pound of steak at \$1.80 is "high," but a three ounce cocktail at \$1.50 is acceptable.

And Lord, help me to understand why \$3 for a ticket to a movie is "not bad," but \$3.50 for a bushel of wheat that makes 50 loaves of bread is considered unreasonable.

And a 50-cent Coke at the ball game is "OK," but a 20-cent glass of milk for

breakfast is inflationary.

Cotton is "too high" at 65 cents a pound, but a \$20 shirt is viewed as a

And corn is "too steep" at 3 cents' worth in a box of flakes, but the flakes are sold for 50 cents a serving.

And also, Lord, help me understand why I have to give an easement to the gas company so they can cross my property with their gaslines, and before they get it installed the price of gas has

doubled.

And while you're at it, dear God, please help me understand the consumer who drives by my field and raises his eyebrows when he sees me driving a \$30,000 tractor that he helped put together so he could make money and drive down that right-of-way they took from me to build a road on so he could go hunting and fishing.

Also, dear Lord, try to help me accept the fact that for years I have labored and tilled the soil and paid my income taxes; and then after me and ma are gone our kids will probably have to pay more in death taxes than the farm cost in the first place.

Thank you, God, for your past guidance. I hope you can help me make some sense out of all this. And please, God, send some rain. -Source Un-

YARD WORK

Spring is the time of year when a little work on your lawn will repay you with a lot of hard work later on. - Burnis Lawrence, The Crosby County News

FAMILY, FRIENDS IMPORTANT TO TODAY'S TEEN LEADERS

Family and friends may be a key ingredient in teenage achievement, according to the most recent Survey of High Achievers conducted by Who's Who Among American High School

America's teen leaders are most likely to come from homes in which the child's natural parents are still married to each other. Results of the Seventeenth Annual Survey of High Achievers, conducted in 1986, show that 79 percent of teen leaders' natural parents are married to each other, though the national divorce rate is 50 percent.

A mother's employment seems to have little effect on teen achievement. Sixty-four percent of teens surveyed note that their mother is employed every night." outside of the home. And, besides their friends, teen achievers are most likely to confide in their mothers.

Though teens are reticent to talk with their parents about sex — 41 percent state they would rather not discuss sex with their parents - most teens have spoken with their parents about the other "big" teen issues: drugs and alcohol. In fact, 64 percent of the teen achievers surveyed state their parents have talked openly and honestly with them about alcohol; 57 percent say their parents have been open and honest about drugs.

Teen leaders also note they make friends easily. Only 15 percent say they have difficulty making friends. Among these who don't make friends easily the greatest percentage (54 percent) are afraid that others won't like them.

If you lie or steal, teen achievers are not likely to want you as their friend. Lying (81 percent) and stealing (75 percent) were the most cited reasons for not wanting to be friends with someone, followed 'by: disloyalty (67 percent), taking drugs (64 percent) and selfish-

ness (56 percent). Characteristics that win points with high achievers are reliability (85 percent) and honesty (83 percent). Teen leaders also look for friends who are: sensitive to others' feelings (75 percent), share mutual interests (65 percent) and are intelligent (50 percent).

Parents may be surprised to learn that friends have little influence over teen leaders in the areas of drugs and alcohol and sex. Only 25 percent of teen leaders state their friends have influenced their attitude toward drugs and alcohol; 22 percent have been influenced by their friends regarding

Teens do count on input from their friends regarding social activities (62 percent), appearance (54 percent) and social behavior (50 percent).

Female friends are the most confided

confide in their female friends. Only mothers come close, at 34 percent. Male friends are confided in by 18 percent of teen leaders, followed by a romantic

in, with 37 percent of teens stating they

interest (17 percent), then fathers at 10

percent. Only two percent of teens note

they confide in a guidance counselor or

religious leader most.

A DAY OFF So you want the day off. Let's take a

look at what you are asking for.

There are 365 days per year available for work. There are 52 weeks per year in which you already have two days off per week, leaving 261 days available for work. Since you spend 16 hours each day away from work, you have used up 170 days, leaving only 91 days available. You spend 30 minutes each day on coffee break that accounts for 23 days each year, leaving only 68 days available. With a one hour lunch period each day, you have used up another 48 days, leaving only 22 days available for work. You normally spend 2 days per year on sick leave. This leaves you only 20 days available for work. We offer 5 holidays per year, so your available working time is down to 15 days. We generously give you 14 days vacation per year, which leaves you only 1 day available for work and I'll be darned if you're going to take

INCOME TAX CHEAT

A fellow wrote to the IRS and explained: "I can't sleep at night because I cheated on my taxes last year. Enclosed is \$50. If I find I still can't sleep, I'll send you the balance."

BRIGHTENED LIVES

A new father explains: "Our new baby has really brightened up our home. The lights are on most all night,

Have a good week!

water district as 'great for Lockney'

Continued from Page One

hasn't varied greatly. The number of water meters has spanned "from around 800 to 830" during the period.

Since he can't turn back the clock and spend another 23 years with the city, Carthel is taking retirement in stride, just as he did his job.

He and his wife, the former Clementine Clark — who he married July 11, 1942 in Portales, N.M. - plan to "work around the house, go when we're ready, come home when we're ready and visit the kids and grandkids." For starters, they are undertaking an addition to their residence.

The couple is active in Lockney Senior Citizens (which he serves as vice president) and the Church of Christ, West College and Third.

They are parents of four offspring: Priscilla Yarbrough of Lubbock; Wayland Carthel, a veteran of 20 years in the Air Force who presently is stationed in Okinowa, Japan; Sue Swaffar of Lubbock; and Debbie McCarty of Lockney. There

are nine grandchildren and "two great-grandbabies in Corpus Chris-

W.L. and Clementine Carthel will always call Lockney "home."

A son of the late W.A. (Babe) and Lillie A. Carthel — a pioneer family - he was "number seven" in a family of 10 (who reached adulthood). Nine of the 10 are still living, and most make their homes in Floyd

"Born and raised in Lockney," he was graduated from Lockney High School in 1940. That was during World War II, and he volunteered for the Air Force at age

Returning 31/2 years later, he farmed for six years, worked at Carthel Oil & Butane in Floydada for two years and operated a service station at Aiken for two years before becoming a City of Lockney em-

Given an opportunity to start over, W.L. Carthel wouldn't change his career with the city because "I enjoyed every minute of it."

Surprise retirement party

W.L. Carthel, City of Lockney water and street superintendent the past 14 years, was honored Saturday evening, May 30, with a surprise retirement party at the Golden Corral Restaurant in Plain-

Mayor Dan Smith presented Carthel with a plaque commemorating 23 years of continuous service to the City of Lockney.

Among those gathered to honor the retiring superintendent were his wife, Clementine; his children, Dickie and Debra McCarty, Dana and De De of Lockney, Sue and Gene Swaffar, Bradley and Regina of Lubbock.

The gathering included Mayor Dan and Reeda Cay Smith and former mayors Claude Brown and Wilma and J.D. Copeland and Arla.

Also present were city council members Kenneth Wofford and Retha, J.D. Copeland and Arla, Ronnie Aston and Treena; and former council members Myrt Hill and James, Pat Frizzell and Susie, Paul Reecer and Zora.

Current and former city employees in attendance were Charlotte and Berry Hooten, Glenda and Archie Jones, Art and Ofelia Mata, Melba and Kenneth Tate, Rhonda and Tim McCain and City Secretary Erma Lee Duckworth and Frank. Special guests were City Engineer A.C. Bowden and his wife, Jo, of Lubbock.

Bank franchise tax given to taxing entities

More than \$34,000 has been returned to taxing entities in Floyd County this month. State comptroller Bob Bullock says that checks totaling \$55.5 million were sent out in the first allocation of this tax for 1987.

Floyd County was the recipient of \$5,779.83, a drop of 13.59% from last year's first payment of \$6,689.22.

The Floydada Independent School District received a check for \$12,430.31 this year compared to \$11,874.39 last year. This represents an increase of 4.68%. Lockney Independent School District garnered a check in the amount of \$3,474.60, an 11.68% increase over the 1986 payment of \$3,111.14.

Caprock Hospital District received \$2,922.06. This payment is up by 7.76% over the 1986 payment at this time of \$2,711.49. Lockney Hospital District got \$1,191.11, an increase of 11.82% over the \$1,065.20 received during the first allocation of last year.

The City of Floydada received 4.73% increase by percentage with 19.08% of this year.

more coming in this year than last. The payment this year was \$1,157.20 as opposed to a payment of \$971.76 last

In addition to the \$34,054.82 in franchise taxes returned to these local entities, additional funds benefit Floyd County in the monies received by Mackenzie Municipal Water Authority District. Their share of the franchise taxes during this first allocation period were \$12,812.94. This is a decrease from the \$14,107.69 received last year.

Bank stocks were liable for local property taxes until 1984 when the legislature exempted bank stocks from property tax and brought them under the franchise tax. Collections are prorated among local taxing entities according to their tax rates. Banks are taxed at the same rate as other Texas corpora-

A number of filing extensions were granted during this first allocation period. The estimated taxes due from more this year. The first allocation of these banks could top \$8.2 million. last year was \$6,778.73. The first Returns on these extensions are due on allocation this year came to \$7,099.71. June 15. The next allocation of bank Lockney showed the largest overall franchise taxes will be made in August

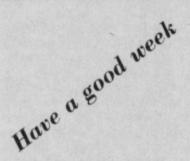

OUTSTANDING PHARMACY students at Southwestern Oklahoma State University in Weatherford were recognized with awards and scholarships at the annual Pharmacy Spring Banquet held

recently on the Southwestern Oklahoma State University campus. Rob Scheele, Lockney, was the winner of the Roche Pharmacy Communication Award and the \$100 Upjohn Company Achievement Award.

Scheele named to honor list

Robert Ralph Scheele, son of Albert and Otera Scheele of Lockney, has been named to the President's List at Southwestern Oklahoma State University in Weatherford, Oklahoma.

In order to be named to the President's List a student must maintain a 4.0 grade point average while taking 15 or more semester hours. Scheele was one of 145 students named to the list.

Nutritious snack ideas

Children always seem hungry and ready for a snack. When their hunger strikes, don't panic. Snacks are a perfect way to give them a little extra nutrition.

"Fresh fruits, celery, carrot sticks, and cheese are just a few ideas for some good nutritious snacks," says Marilyn Haggard, a nutritionist with the Texas A&M University Agricultural Extension Service. "They don't take much more time to prepare than other types of snacks and they're much better for children."

Other good ideas for nutritious snacks are popcorn, dairy products, small sandwiches, and any of the variety of crackers, muffins, and breads.

Since as much as one-fourth of their day's calories come from snacks, it's important to watch what children eat.

"Children will eat whatever food is around. The best way to keep them from eating junk foods is to keep more nutritious snacks in the house," the specialist says.

"A bit of dip on vegetables and fruits may make them more attractive. Just be careful not to give the child too much because dips often are high in fat and salt content," says Haggard.

When feeding small children, be careful about the size of the portion served. The specialist says they need snacks made to a size they can handle, and shouldn't be given round, hard or slippery pieces of food that they can choke on. Peanut butter may also be a little too difficult for small children to

"Snack times may be hard to enforce, especially if a parent isn't around, but they can be a good idea. Appointing a certain time as snack time may keep children from eating too close to meal time," she says.

Haggard adds, "It's important to set good eating habits early on. If children are encouraged to eat nutritious snacks they will learn to like those tastes and are more likely to continue to enjoy those foods throughout their lives."

CHOLESTEROL CLINIC-Faye Ferguson has her cholesterol level checked by Terry Keltz, registered Lab Technician at a recent clinic held in Lockney.

TMA decides to improve Medicare review process

Texas Medicare patients, the Texas Medical Association approved 29 recommendations at its recent policymaking meeting in Houston.

TMA and Texas Congressmen have been critical of the process used to assure that quality care is delivered to Medicare patients, stating that rural doctors are being held to unrealistic standards and that availability of care is being threatened.

Among the recommendations is that rural hospitals be encouraged to seek agreements with larger nearby hospitals and clinics to assist in peer review. This more regional approach would make physician review more effective by including needed specialty expertise that may not be available in small rural hospital settings. The majority of sanctions in Texas have been against doctors in rural parts of the state. TMA also approved narrowing the definition of "gross and flagrant" violations to include actions that constitute an immediate health threat to Medicare patients. They also agreed that such violations be reported immediately to the Texas State Board of Medical Examiners and to the hospital where the physician has staff privileges. The review process has been criticized for its subjective and sometimes misunderstood definition of "gross and flagrant"

In other action, TMA's policy-making body, the House of Delegates, voted to oppose including physicians' fees in the Medicare diagnostic related groupings

In a move to improve the process (DRGs). DRGs seek to reduce the cost of used to review physicians who treat hospital care by assigning a predetermined payment to certain diagnosis. The federal Office of Management and Budget has proposed that payments for radiology, anesthesiology, and pathology services performed in a hospital be included in the DRG payment system. By including these fees in the DRG system, there is a concern that such care could be compromised as part of the effort to control costs.

> In a related item, TMA agreed to draw increased public attention to the financial hardships faced by Texas' small rural hospitals because of Medicare's reimbursement system. Specifically, the resolution noted an American Medical Association report which presented compelling evidence that rural hospitals are not being adequately reimbursed under the Medicare program. In addition, depressed economic conditions are leaving many residents without necessary care.

> On issues of public health, TMA voted to oppose routine testing of the general population for AIDS at this time, including premarital screening, because it is not cost effective and because testing of the general population results in a large percentage of error. A voluntary effort to encourage Texas motorists to use headlights during daytime hours to reduce highway accidents also was approved. The association also adopted a policy that all-terrain vehicles—those that are not licensed, have three or four wheels, and can be driven off the road-are especially dangerous for children.

18 small Texas hospitals close in '86

In 1986, 18 Texas hospitals closed, according to the Texas Hospital Association, a trade association representing the hospital industry. This compares with nine closures in 1985, and eight in 1984.

"Nearly all of the 35 community hospitals in Texas that closed during the past three years were relatively small and the majority (19) were located in rural (non-MSA) counties," said Karl Shaner, Dr. P.H, vice president, research and information services. All but one of the closed hospitals had less than 100 beds. "With regard to their ownership status at the time of closure, seven hospitals were publicly-owned, 10 were private/non-profit institutions and 18 were investor-owned, either by individuals or a corporate system," Shaner noted.

The problems experienced by small, rural hospitals are caused by many of the same factors affecting urban hospitals such as lower occupancy rates, more intensely ill patients, stricter enforcement of regulatory requirements, closer scrutiny in the delivery and utilization of services by the peer review organization (PRO), and inadequate payment from Medicare/Medicaid programs.

"In Texas, small and rural hospitals account for 270 of the hospitals in the state, and serve an estimated three million people. Recent changes in the payment and review of care provided Medicare beneficiaries have had dramatic effect on these hospitals," Bailey said. "Because small, rural hospitals also serve a greater than average proportion of Medicare patients, changes in payment policies have a more profound effect on their facility and its ability to preserve financial stability,"

Since 1980, hospitals have seen a decline in discharges and in their average daily census; however, this has affected small and rural hospitals more severely. "In the first half of 1986, occupancy rates were 25 percent or less in small hospitals with fewer than 25 beds, and 35 percent for hospitals with 26-49 beds," Bailey said.

Small, rural hospitals also have experienced a decline in net patient margins while experiencing higher expenses, including higher malpractice insurance costs. "The net effect of these changes is that many small. rural hospitals are in financial distress, affecting the accessibility to health care services of those living in many rural communities in Texas," Bailey said.

"Changes in the reimbursement of small, rural hospitals is essential if rural hospitals are to survive and needed services are to continue to be provided

PHONE INNOVATIONS — Bill Hinkle of Southwestern Bell Telephone Company discusses new developments in the telecommunications field with members of the Lockney Rotary Club. He addressed both county Rotary clubs last week. — Staff

to persons living in rural communities," Bailey said

Among the recommended changes in the treatment of rural hospitals are:

* Consider exempting rural hospitals from the prospective pricing system

* As an alternate, change the PPS to more adequately reimburse rural hospitals in such areas as reducing the differential of payment between rural and urban hospitals, revising payments to reflect severity of illness, changing the definition and payment of "sole community providers," establishing low-volume adjustment payment, revising outlier payment policy and continuing pass-through of capital

* Increase the flexibility of the Application of Medicare Conditions of Participation to rural hospitals.

"Rural hospitals also face the problems of attracting sufficient numbers of qualified professional personnel and physicians, less access to capital and insufficient funding for marketing and diversification in order to respond to a more competitive health care market," said Charles Bailey, JD, vice president of legal affairs and THA's liaison with smaller hospitals.

Congressman **Beau Boulter** Reports from Washington

OF DOCTORS AND BANK ROBBERS

I have often noted that with regard to the Texas Medical Foundation and peer review of rural doctors, bank robbers and other criminals have enjoyed more due process.

For example, if a man is convicted of a crime, he has the opportunity to appeal his sentence before he ever serves a day in jail for his crime. However, under the peer review process used in Texas, a doctor is considered guilty until proven innocent. He does not enjoy the right of appeal until after his sanction is in effect.

Because this is unfortunately true, several of my Texas colleagues and I in the U.S. House of Representatives have introduced legislation to restore fairness and due process to the Texas Medical Foundation's peer review process, which is used to insure that Medicare patients receive quality health care.

And while no one wants to defend a truly negligent doctor, in rural or urban areas, a disproportionate number of rural physicians have been sanctioned by the Texas Medical Foundation (TMF). Because we in Texas have a bureaucracy out of control, the Texas Medical Foundation, and because Medicare patients in many small towns represent more than 50% of the family doctor's practice, my colleagues and I have felt compelled to improve the peer review process.

My concern is that rural doctors are being unfairly treated, and, as a result, many rural communities like Perrytown and Lockney and Henrietta and Archer City and Canadian-all towns under 5,000 people in my district where doctors have been targeted by the TMF—will be left without adequate and readily accessible medical care.

In fact, of the 23 doctors in Texas that have been sanctioned by the Texas Medical Foundation, none of those doctors are in towns larger than 12,000 people. Does this mean there are no bad doctors in Dallas or Houston or Austin or San Antonio?

Of course not. But the TMF has adopted procedures and criteria that are simply unfair to rural doctors.

To correct this situation, Charlie Stenholm (D-Stamford) and Ralph Hall (D-Marshall) and I have proposed legislation on the floor of the Congress to bring fairness and due process to this system.

This legislation would give our rural doctors (and any urban doctors, if ever sanctioned) the opportunity to appeal sanctions before they go into effect, a basic right doctors in Texas and other states do not presently enjoy.

This bill would also require that peer review organizations, like the Texas Medical Foundation, place greater emphasis on educating rural doctors. I was shocked to learn that any money to be used for educational programs for local doctors must be taken out of the TMF's operating budget. As a result, plush offices for the Texas Medical Foundation in Austin have won out over bringing our good doctors up to speed with medical advancements and medical regulations.

As a member of the Rural Health Care Coalition's steering committee, I will continue to work to see that those of us who chose to live in the smaller communities of rural America still enjoy the high standard of medical care we are used to insure that our local doctors are treated fairly by the Texas Medical Foundation

Social Security Report

By Terry J. Clements

Most Social Security benefits to dependents or survivors of retired, disabled, or deceased workers end if the person divorces or marries.

But, there are exceptions to this rule. Benefits will continue unchanged for widows and widowers, including surviving divorced spouses, who remarry at 60 or older and to disabled surviving spouses who remarry at 50 or older.

Benefits to a child will end if the child marries. Checks to a spouse getting benefits on the record of a retired or disabled worker will end if the marriage ends in divorce unless the spouse is 62 or older and the marriage lasted 10 years or more.

Checks for a widowed mother or father getting benefits because she or he is caring for an entitled child will stop if the mother or father remarries.

Another exception provides that if an otherwise eligible person getting benefits as a widow, widower, or adult disabled in childhood marries a person who also gets one of these benefits, he or she can continue to get benefits.

Benefits will also continue if a person receiving benefits as a widowed mother or father or adult disabled in childhood marries a person getting benefits as a retired or disabled worker.

A retired or disabled worker's benefit

is never affected if he or she marries or

People who get benefits as a dependent or survivor should immediately report marriage or divorce so Social

Security records can be kept correct. More information about how divorce, marriage, or remarriage affects Social Security benefits can be obtained at the social security office

Disability, retirement

benefits

In this column, I regularly explain your rights under Social Security. It is important for you to know about monthly disability, survivors, and retirement benefits and how to get them. And you should be aware of what Medicare provides if you are 65 or

But there's another side to the coin. It is also essential that you clearly understand certain responsibilities you have under Social Security. Here are some prime examples:

*When you file a claim — Benefits are not paid automatically when you become disabled, retire, or after your death. An application must be filed with Social Security and certain evidence submitted. It is up to you to find out what is needed and to cooperate fully in providing needed proofs or information.

*When you get benefits — You must properly report events that may affect your payments. For example, notify social security when you: change your address; expect earnings from work to exceed the allowable limit (or any amount if you get benefits due to disability); or you marry while getting dependent or survivor payments.

There may be other responsibilities involving Social Security, too. For instance, the Tax Reform Act of 1986 requires you to have a social security number for each dependent age 5 and over whom you list on Federal tax returns due after December 31, 1987.

Supplemental security

Unlike applicants for Social Security benefits who need credit for a certain amount of work, aged, blind, and disabled individuals who have never worked may be eligible for monthly supplemental security income (SSI)

SSI is a Federal program that provides monthly checks for aged, blind, and disabled people who have limited income and resources. Eligibility is based in part on need rather than on a person's work history, as is the case with Social Security beneficiaries. In fact, a person may receive both SSI and Social Security payments. In such cases, however, the SSI payment is usually reduced.

An individual or couple may have some income and resources and still receive SSI payments. Resources refer to the things a person owns, such as real estate, personal property, a savings or checking account, stocks and bonds, and even cash.

Some resources are not counted when eligibility for SSI is determined. Depending on their value, for example, personal and household goods, insurance policies, and a car may not count. Neither is the individual's or couple's home counted if it is the principal place of residence. In addition, up to \$1,500 in burial funds an individual and his or her spouse have is not counted when eligibility is determined.

Under the law, SSI payments may begin only with the date of application or date of eligibility, whichever is later. Therefore, anyone who believes he or she may be eligible for SSI payments should not delay making application.

If you need more information about the SSI eligibility requirements you may contact us at 1401-B West 5th Street, or call us at 293-9623. Appointments can be arranged if desired.

Farm News

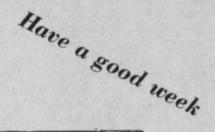

Barley potential as major crop for plains increasing

The potential for barley as a major crop for farmers on the High Plains is increasing, says Dr. Wyatte L. Harman, agricultural economist for the Texas Agricultural Experiment Station in Am-

He says farmers should consider rust resistance, grazing potential and water use before deciding to use barley as a

By omitting one irrigation cycle when market prices are low, the farmer could benefit from more profits then if he added the last water and increased

Cattle grazing is another important consideration for farmers. Harman says grazing barley has had favorable results. When making decisions on various varieties, the farmer should note that some cattle prefer certain varieties, Harman advises.

The rate at which cotton deficiency payments are figured next January or February is a significant consideration seven months of the calendar year (last will continue throughout this year's growing season. That explains the rash of calls to Plains Cotton Growers, Inc., asking for information on what the final rate is likely to be.

Unfortunately, say PCG officials, currently available figures are both too meager and too unreliable for anything like an accurate projection.

Price action to date this year had led most in the industry to assume the rate will equal the difference between the 79.4-cent target price and the weighted average price paid to farmers for the 1987 calendar year.

In what PCG says is the most unlikely event that the average farm price falls below the loan level, proving that assumption false, the rate would be the maximum 27.15 cents per pound, the difference between 79.4 cents and the 52.25 cent base loan rate.

prices and sales volume, are reported monthly by the National Agricultural Statistics Service, but all are preliminary and subject to revision before final determinations are made. Preliminary figures received by PCG

The figures used to calculate farm

price average, including both average

are complete only through the end of April. At that time the weighted average price came to 50.78 cents on total reported marketings of 1,858,000

For the same four months of 1986 marketing volume was 2,666,000 bales, indicating that prices early this year may carry less than normal weight in

the full-year 1987 average. Revisions of the figures for the first seven months of the August-July marketing year) usually are published in November. Preliminary monthly prices for the first seven months of 1986 were revised upward an average of 1.8 cents per month, PCG notes, adding that

The average farm price moved above the 1987 loan level of 52.25 cents for the first time this year in April. The April

price average was 52.5 cents, up from 47.7 cents in February. And the mid-month price for May has been reported at 58.9 cents, which PCG sees as an obvious upward trend. Another factor in the rate calculation

will be the change in method of setting the loan repayment rate for the 1987 marketing year. Through July of this year, the repayment level is fixed at eighty percent of the loan.

Beginning August 1, the loan repayment rate will equal the variable adjusted world price, most recently reported at 67.05 cents, well above the 52.25-cent loan. Thus the August through December farm price this year will be figured from the loan, as opposed to the current method which uses 80 percent of the loan as the starting point.

All things considered, concludes PCG Executive Vice President Donald Johnson, it's probably safe to assume that the payment rate will be below the maximum. "But predicting how much below the maximum at this point would

succeed, these bacteria could eventually replace some chemical herbicides if applied to the soil every few years, said Robert J. Kremer, a mircobiologist for USDA's Agricultural Research Service.

His studies are the first to show that certain strains of bacteria that live in the soil-known as rhizobacteria-rot weed seeds by overcoming their natural defenses. Some rhizobacteria do this with enzymes they produce, he said.

In laboratory tests, rhizobacteria attacked seeds of velvetleaf, which can escape soil-applied herbicides because its seeds germinate deep underground and can stay viable for 40 to 50 years. The bacteria also attacked seeds of jimsonweed, pigweed and morning glory. All four weeds are pests of row crops such as corn and soybeans, especially in the Midwest-and morning glory is one of the worst.

Kremer also discovered that some rhizobacteria rob weed seedlings of vigor, interrupt their flow of nutrients or make their roots susceptible to diseasecausing microbes. One way the rhizobacteria do this is through by-products that are toxic to the seedlings.

"We don't yet know everything we need to know about these rhizobacteria, but eventually they should be a commercially feasible means of weed control that will allow less use of chemical herbicides," said Kremer, who is seeking patent protection on his dis-

Many bacteria known to attack weeds also harm crops-a flaw not found in the rhizobacteria he is investigating at the agency's crop production research laboratory in Columbia, Mo.

Weeds cause an estimated 12 percent annual loss in crop yields across the United States, which translates to a \$20 billion loss in production and cost of weed control to farmers and consumers.

Weed seeds have hard-to-penetrate coats and toxic chemicals that ward off enemy fungi. Some seeds even get protection from "friendly" soil microbes, but Kremer says the rhizobacteria overcome these defenses, too.

"Our challenge now," he said, "is finding how to apply these bacteria in the field so they will cause the seed to decay before it can sprout. Applying the bacteria to the soil every few years should keep their numbers high enough to keep the weeds under control."

He is testing 500 to 600 different strains of rhizobacteria for their potential as natural weed-seed herbicides for crop fields and gardens. Most of these strains are Bacillus, Erwinia, Pseudomonas or Flavobacteria.

vary greatly from one fiber to the next. Farmers, especially in West Texas where nonuniformity is particularly high, lose money in the marketplace because of variations in quality.

"It's impossible to make a nice, uniform fiber when you don't understand the stages of elongation and secondary wall deposition. We can study these factors now and maybe someday control fiber characteristics."

The work is also important, Berlin said, because it allows a glimpse at the regeneration process. Individual cotton cells, like the cells of most complex plants and animals, contain all the genetic material necessary to reproduce a whole new organism. Cells from the leaf, root or seed of a cotton plant can be made to produce cotton fibers.

'We can regenerate the whole cotton plant from a single cell. We haven't been able to do that with animal cells," he said. "We don't understand what had done to the cotton plant, but it was amount of secondary cell wall present triggers the regeneration process in

> Boulter, Fair coalition work to halt U.S. subsidies of foreign commodities

A coalition of 10 agricultural associations and four lawmakers, including 13th District Congressman Beau Boulter, announced the formation of a coalition to support reform in the lending practices of international fi-

nancial institutions. The group, A Coalition for Foreign Agricultural Investment Reform (FAIR), joined together to support a bill in Congress that would end U.S. subsidies of agricultural and mineral production of commodities that are in world surplus.

According to Congressman Boulter, such practices not only hurt the already depressed farming industry but also cost the American taxpayers huge amounts of money.

At a press conference on Capitol Hill, Boulter called for support of his FAIR bill to stop American subsidies of foreign agriculture production. According to Boulter, in many instances the very commodity the U.S. government is subsidizing overseas is at the same time in surplus on the world market.

As an example, Boulter pointed to the World Bank, which is responsible for a \$350 million loan to Argentina to encourage wheat and soybean production, commodities both intensely produced in Boulter's district. Boulter also called attention to a \$1.5 billion,

interest-free loan to China in 1982. The FAIR bill would require that U.S. representatives on the boards of multilateral lending institutions oppose loans granted to increase foreign production of commodities that are already in surplus on the world market. In addition, if such loans are approved by these institutions, American objections notwithstanding, the United States government would be required to terminate its contribution to the institution in question.

Association members of the FAIR Coalition include:

Uniform fiber goal of laboratory-grown crops

Questions that couldn't even be asked by studying field-grown cotton may someday be answered in research with laboratory-grown crops.

In September 1985 when Texas Tech occurs at the other end of the fiber, University biologists announced that for the first time cotton fibers had been grown in the lab from single cotton cells without growing any other part of the plant, they received international attention for the scientific breakthrough.

They had planted the seed for a totally new way of studying cotton production and quality by using the test-tube cotton as a research tool. Answers to questions which can now be posed may result in improved cotton.

"In the past, we would go into the field and inject a cotton boll with a certain kind of chemical to study fiber development," said Jerry D. Berlin, chairman of the Department of Biological Sciences who along with J.R. Goodin, dean of the College of Arts and Sciences, heads the cell culture re- and diameter which determine cotton search. "We really had no idea what we quality and price are related to the the only way available to study fiber on the fiber," Berlin said. "Cotton development.

"Using this new research tool, we can do numerous experiments with cells developing in culture in the lab. It's a new way to look at the differentiation and growth processes."

One of the first areas they will study is the initiation of elongation process through which cotton fibers begin growing from the seed.

"Before the initiation of elongation. the cells are just sitting there and then the cell gets a litle nub which gets bigger and bigger," said Dr. Berlin. "This is the initial stage of development of a cotton fiber."

In a cotton plant growing in the field, only one in 10 cells initiate elongation and become cotton fibers, he said. But in culture all cells elongate.

"In the real plant many cells which have the potential to become cotton fibers don't," Berlin said. "We want to know what causes some cells to initiate elongation and others not to. If we could even get it down to where one in nine cells produce a cotton fiber, we could increase production by 10 per-

begins to grow out from the seed. One end of the fiber remains connected to the seed and elongation essentially

"In culture, both ends elongate. That's not important as far as changing the plant because in real plants one end of the fiber will always be connected to the seed. But the discovery suggests that the fiber has the ability to regulate its own elongation rather than being regulated by the seed."

Berlin said.

If genetic research were conducted to try to stimulate plants to produce longer fibers, the efforts might be focused on the fiber itself because of this finding, he said.

In the third stage of fiber development the fiber thickens as it takes on a secondary cell wall - the cellulose which is the bulk of the fiber produced.

"Fiber characteristics such as length

vary greatly from one fiber to the next. Farmers, especially in West Texas where nonuniformity is particularly high, lose money in the marketplace because of variations in quality.

Boulter, Fair coalition work to halt U.S. subsidies of foreign commodities

A coalition of 10 agricultural associations and four lawmakers, including 13th District Congressman Beau Boulter, announced the formation of a coalition to support reform in the lending practices of international financial institutions.

The group, A Coalition for Foreign Agricultural Investment Reform (FAIR), joined together to support a bill in Congress that would end U.S. subsidies of agricultural and mineral production of commodities that are in

According to Congressman Boulter, such practices not only hurt the already depressed farming industry but also cost the American taxpayers huge amounts of money.

At a press conference on Capitol Hill, Boulter called for support of his FAIR bill to stop American subsidies of foreign agriculture production. According to Boulter, in many instances the very commodity the U.S. government is subsidizing overseas is at the same time in surplus on the world market.

As an example, Boulter pointed to the World Bank, which is responsible for a \$350 million loan to Argentina to encourage wheat and soybean pro-

Vernon Norris

Plainview Independent School District

NOTICE TO RECEIVE BIDS PLAINVIEW INDEPENDENT SCHOOL DISTRICT

The Plainview Independent School District will receive bids for the

(1) Ceiling Replacement and Air Conditioning & Heating of Estacado

Sealed bids should be returned to Mr. Vernon Norris, Plainview I.S.D.,

P.O. Box 1540, Plainview, Texas 79073-1540 or delivered to Mr. Norris at the

Administration Building, 912 Portland, Plainview, Texas. The bids will be

received until 10:00 A.M. on Friday, June 26, 1987, when they will be opened

and tabulated. Bids received after the above deadline will be returned unopened. Bids mailed will be deemed as delivered only when they are received by Mr. Norris. The bids will be presented to the Board at a special called meeting to be held in the Administration Building at 12:00 noon on Friday, June 26, 1987. At this time the contract will be let. The Board

reserved the right to accept or reject any and all bids. This is a solicitation for

bids and is not an offer. All bids and information received in response to this

Information concerning bid forms and specifications may be obtained by

contacting Mr. Norris at the Administration Building, or by calling (806)

296-6392. Plans and specifications will be available from B.G.R. Architects and Engineers, 2118 34th Street, in Lubbock, Texas. They will also be on file

at the F.W. Dodge Plan Room at 4601 50th Street, in Lubbock, Texas.

solicitation will become the property of the Plainview I.S.D.

Coalition include:

*American Farm Bureau Federation *American Soybean Association

*National Cattlemen's Association

*National Corn Growers Association

*National Grain Sorghum Producer's *Women Involved in Farm Economics

duction, commodities both intensely produced in Boulter's district. Boulter

also called attention to a \$1.5 billion,

interest-free loan to China in 1982.

The FAIR bill would require that U.S. representatives on the boards of multilateral lending institutions oppose loans granted to increase foreign production of commodities that are already in surplus on the world market. In addition, if such loans are approved by these institutions, American objections notwithstanding, the United States government would be required to terminate its contribution to the institution in question.

*American Sugarbeet Growers *Fertilizer Institution

For the same four months of 1986 marketing volume was 2,666,000 bales,

New natural enemies of weeds-bacteria that attack both weed seeds and seedlings without harming crops—have been identified by a U.S. Department of Agriculture scientist.

If field tests planned this year

Farm News

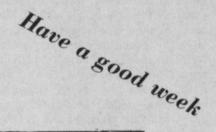

Barley potential as major crop for plains increasing

The potential for barley as a major crop for farmers on the High Plains is increasing, says Dr. Wyatte L. Harman, agricultural economist for the Texas Agricultural Experiment Station in Am-

He says farmers should consider rust resistance, grazing potential and water use before deciding to use barley as a major crop.

By omitting one irrigation cycle when market prices are low, the farmer could benefit from more profits then if he added the last water and increased

Cattle grazing is another important consideration for farmers. Harman says grazing barley has had favorable results. When making decisions on various varieties, the farmer should note that some cattle prefer certain varieties, Harman advises.

The rate at which cotton deficiency payments are figured next January or February is a significant consideration seven months of the calendar year (last in 1987 cotton production decisions that will continue throughout this year's growing season. That explains the rash of calls to Plains Cotton Growers, Inc., asking for information on what the final rate is likely to be.

Unfortunately, say PCG officials, currently available figures are both too meager and too unreliable for anything like an accurate projection.

Price action to date this year had led most in the industry to assume the rate will equal the difference between the 79.4-cent target price and the weighted average price paid to farmers for the 1987 calendar year.

In what PCG says is the most unlikely event that the average farm price falls below the loan level, proving that assumption false, the rate would be the maximum 27.15 cents per pound, the difference between 79.4 cents and the 52.25 cent base loan rate.

The figures used to calculate farm price average, including both average prices and sales volume, are reported monthly by the National Agricultural Statistics Service, but all are preliminary and subject to revision before final determinations are made.

Preliminary figures received by PCG are complete only through the end of April. At that time the weighted average price came to 50.78 cents on total reported marketings of 1,858,000

indicating that prices early this year may carry less than normal weight in the full-year 1987 average.

Revisions of the figures for the first seven months of the August-July marketing year) usually are published in November. Preliminary monthly prices for the first seven months of 1986 were revised upward an average of 1.8 cents per month, PCG notes, adding that whether that is an indication of what may happen this year is anybody's

The average farm price moved above the 1987 loan level of 52.25 cents for the first time this year in April. The April price average was 52.5 cents, up from 47.7 cents in February. And the mid-month price for May has been reported at 58.9 cents, which PCG sees as an obvious upward trend.

Another factor in the rate calculation will be the change in method of setting the loan repayment rate for the 1987 marketing year. Through July of this year, the repayment level is fixed at eighty percent of the loan.

Beginning August 1, the loan repayment rate will equal the variable adjusted world price, most recently reported at 67.05 cents, well above the 52.25-cent loan. Thus the August through December farm price this year will be figured from the loan, as opposed to the current method which uses 80 percent of the loan as the starting point.

All things considered, concludes PCG Executive Vice President Donald Johnson, it's probably safe to assume that the payment rate will be below the maximum. "But predicting how much below the maximum at this point would be no more than a guess.'

Bacteria puts whammy on weeds succeed, these bacteria could eventually replace some chemical herbicides if applied to the soil every few years, said Robert J. Kremer, a mircobiologist for USDA's Agricultural Research Service.

His studies are the first to show that certain strains of bacteria that live in the soil-known as rhizobacteria-rot weed seeds by overcoming their natural defenses. Some rhizobacteria do this with enzymes they produce, he said.

In laboratory tests, rhizobacteria attacked seeds of velvetleaf, which can escape soil-applied herbicides because its seeds germinate deep underground and can stay viable for 40 to 50 years. The bacteria also attacked seeds of jimsonweed, pigweed and morning glory. All four weeds are pests of row crops such as corn and soybeans, especially in the Midwest-and morning glory is one of the worst.

Kremer also discovered that some rhizobacteria rob weed seedlings of vigor, interrupt their flow of nutrients or make their roots susceptible to diseasecausing microbes. One way the rhizobacteria do this is through by-products that are toxic to the seedlings.

"We don't yet know everything we need to know about these rhizobacteria, but eventually they should be a commercially feasible means of weed control that will allow less use of chemical herbicides," said Kremer, who is seeking patent protection on his discoveries.'

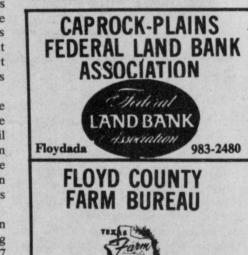

Many bacteria known to attack weeds also harm crops-a flaw not found in the rhizobacteria he is investigating at the agency's crop production research laboratory in Columbia, Mo.

Weeds cause an estimated 12 percent annual loss in crop yields across the United States, which translates to a \$20 billion loss in production and cost of weed control to farmers and consumers.

Weed seeds have hard-to-penetrate coats and toxic chemicals that ward off enemy fungi. Some seeds even get protection from "friendly" soil microbes, but Kremer says the rhizobacteria overcome these defenses, too.

"Our challenge now," he said, "is finding how to apply these bacteria in the field so they will cause the seed to decay before it can sprout. Applying the bacteria to the soil every few years should keep their numbers high enough to keep the weeds under control."

He is testing 500 to 600 different strains of rhizobacteria for their potential as natural weed-seed herbicides for crop fields and gardens. Most of these strains are Bacillus, Erwinia, Pseudomonas or Flavobacteria.

Foster named Academic All-American

demy announced recently that Shawnda tion to excellence and achievement," Ann Brock Foster has been named a Collegiate Academic All-American.

The USAA has established the Academic All-American Collegiate Award Program in order to offer deserved recognition to superior students who excel in the academic disciplines. The Academic All-American Collegiate Scholars must earn a 3.30 or better grade point average. Only scholars selected by a school official or other qualified sponsor are accepted. These scholars are also eligible for other awards given by the USAA.

Shawnda who attends Texas Tech University was nominated for this National Award by Kappa Alpha Theta Sorority. Shawnda will appear in the Academic All-American Collegiate Directory, which is published nationally.

"Recognizing and supporting our youth is more important than ever before in American history. Certainly, winners of the Academic All-American Collegiate Awards should be congratu-

The United States Achievement Aca- lated and appreciated for their dedicasaid Dr. George Stevens, Executive Director of the United States Achieve-

Shawnda is the daughter of Byron and Charlotte Brock and the granddaughter of Melvin Brock. She is married to Jody Foster, the son of Eddie

Aubrey Kirk, Diana Lemons, Brady

Marr, Cynthia Martin, Deidra Mc-

Fourth grade - Scott Turbeville,

Mark Terrell, Jared Mosley, Coby

Marr, Mandy Hunter, Joe Cruz, Tiffany

Donald, Lisa Perez, Tikka Smith

Elementary School Honor Roll

The following Lockney Elementary School students have maintained an "A" average for the entire 1986-87 school year.

First grade — Stacy Bigham, Darrell Crowe, Carson Johnson, Coye Robbins, Callie Wilson, Amy Watson, Sarah Hernandez, Noemi Sepulveda, Adam Cummings, Leslianne Hickerson, Wesley Hunter

Second grade - Amy Anderson, Shon Dale Baeza, Kelli Clark, Mandy Gallaway, Dewayne Jones, Allison Mangold, Kaci Mathis, Tim Mitchell, Johnnie Mosley, Denise Sherrill Third grade - Randi Jo Henderson,

Ellison, DeDe McCarty, O'Brien Mc-Donald, Amanda Watson, Chris Guerrero, Alfred Martinez, Mary Lindsey

> Fifth grade - Melissa Salas, Debbie Pyle, Rusty Purser, Allen Martin Rhanda Hickerson, Amy Hernandez, Jerod Glasson, Angie Clark, Maggie

Duenas and Patricia Garcia.
