

STOLEN GAME GOES TO AMARILLO TEAM

Seventy-five percent of the 1000 Amarillo fans who witnessed the Canyon-Amarillo game Monday in Amarillo were crying thieves at the Amarillo team when the umpire called a Canyon pinch hitter out in the ninth inning because he had not been announced by the Canyon team. The Amarillo boys justify the decision by rule 51, section 1, which refers only to men batting out of their turn and not to pinch hitters. Rule 28, section 4 covers pinch hitters, and it says that where substitutions are made "whether as batsman, base-runner or fielder, the captain of the side making the change must immediately notify the umpire, who in turn must announce the same to the spectators. A fine of \$5.00 shall be assessed by the umpire against the captain for each violation of this rule, and the President of the League shall impose a similar fine against the umpire, who, after having been notified of a change, fails to make proper announcement." There is nothing in the rule to signify that unannounced batter would be out—as Umpire Walter Crossett called Jones out Monday.

Outside of the unpleasant feature of having the game outright stolen in the last inning, the game was the best of the season. Both teams played fine ball. Only one error was registered against Canyon, while three were made by Amarillo.

Word pitched his usual good consistent game for four innings, striking out two, walking one and allowing three hits, two of which were drives down the third base line in the third inning which were responsible for Amarillo's two scores. Prichard went in for the remainder, striking out three and allowing two hits.

Crotty pitched fine ball for Amarillo, striking out seven, walking two and allowing seven scattered hits.

In the seventh Campbell was put out on an attempted squeeze play or the score would have been tied at this point as Bill Black landed on a single just after the put out.

The Canyon boys bitterly protested Crossett's decision in the ninth, but to no avail. Scores of Amarillo fans gathered around the Canyon boys, congratulating them on the fine game and charging the home team with a stolen victory.

The games between the two teams now stand two to three in favor of Canyon. Canyon is ready to play Amarillo at any time. All we ask is fair decisions and the boys will look after the rest.

All Day Meeting Tomorrow.

All day meeting will be held at the Methodist church tomorrow by the Missionary society. Mrs. J. T. Bloodworth of Ft. Worth and Mrs. Persons of Amarillo will have charge of the meeting and will deliver interesting addresses along missionary lines.

The ladies will take their luncheon which will be served in the Sunday school rooms.

Neal to Graham Monday.

Rev. F. M. Neal will go to Graham next Monday where he will conduct a two weeks revival. Fred Poulter of Amarillo will accompany him and have charge of the singing. Mr. Poulter was here last year.

PUBLIC SCHOOLS TO OPEN MONDAY

All of the members of the faculty for the public schools have arrived in the city and ready for the opening day next Monday. The faculty is exceptionally strong and Supt. King believes that this year's work will be the best the schools have ever done.

A. R. Kennedy has been elected to high school faculty to teach English. His sister was elected to this position several weeks ago, but owing to an operation she was unable to come. Mr. Kennedy is a graduate of Georgetown university.

Grand Jury Report.

To Hon. J. N. Brownrig, Judge of the 47th Judicial District of Texas:

We the Grand Jury empaneled for the August Term of the district court in Randall county having made diligent inquiry in to all matters brought to our attention submit this our report and ask to be discharged:

We have examined 57 witnesses and have found six true bills, four being felony and two misdemeanor bills.

We have examined the county jail, the court house and public school building and have found them in good condition and have no recommendations to make with reference to them.

Respectfully submitted,
J. B. Hensley, Foreman.

Public Sale.

I will sell at public sale at my place in Canyon, Saturday, September 19, beginning at 1:30 p. m. one horse and buggy, one good piano and all other household and kitchen furniture.

It H. E. MULDRON.

HENRY RUSSELL MILLER

Henry Russell Miller, the young Pittsburgh lawyer-novelist, who is known for his political stories which have appeared during the last few years, has distinguished himself again through the production of another story, "The Ambition of Mark Truitt"—a story of social and industrial Pittsburgh—which critics say is far better than either "The Man Higher Up" or "His Rise to Power," his two earlier political stories. We have secured this story as our next serial, and the first installment will appear in an early issue.

For a number of years Mr. Miller has exhibited a great interest in the steel industry. He has made the acquaintance of many of the big men as well as the laborers in the mill towns, and from them has learned a great deal about the game.

"The Ambition of Mark Truitt" is a story that is not only tremendously interesting, but one that will cause readers to stop and think.

NORMAL OPENED MONDAY WITH 155

The fifth year of the Normal opened Monday with an enrollment of 155. There are a number of students in the city who have not enrolled and many will arrive before the end of the week. It is expected that the attendance will reach 200 by next week and 300 before the end of the year.

It was expected that the attendance would be materially decreased this year owing to the session being held in the temporary buildings. However, the strenuous financial condition throughout the state caused by the slump in the cotton market has been a leading factor in keeping large numbers out of school, and were it not for this the attendance at time would no doubt be near the 250 mark.

The training school opened Tuesday morning with an attendance of 142.

Society Notes

Mesdames J. B. Gamble and J. E. Winkelman entertained the members of the Merry Maids and Matrons club, their husbands and friends Thursday night at the Winkelman home. Forty two was played at twelve tables. The home was decorated in golden red and fall grases. A musical program was given by Mesdames Luke and Word and Ingham. Refreshments were served of chicken patties, sandwiches, marshmallow and grape salad, pickles, coffee and mints. The following were guests of the club: Messrs. and Mesdames Hager, Hanna, T. C. Thompson, Harrison, Coss, Reeves, Haynes, Misses Guenther, Casseday, Stafford, Harrison, Black, Messrs. Campbell Stafford and Black. Misses Ingham, Fickey, Keiser, Stewart and Winkelman assisted in the serving.

Mrs. T. H. Stewart entertained the Merry Maids and Matrons club Friday afternoon at the Winkelman home. The decorations were yellow and white sunflowers. The score cards were hand painted sunflowers. Refreshments were served of ice cream, cake, mints and ice tea. The following were guests of the club: Mesdames King, S. S. Coffee, Oldham, Hanaford, Holland, Holland, Harrison, Coss, Misses McMillan, Mills and Stafford.

Thursday night the members of the Golden Links class of the Methodist Sunday school were entertained by the Rooters at the W. J. Flesher home. Numerous games were played after which refreshments were served. The guests of the classes were Misses Louella Younger, Ora Thompson, Winnie Reid, Thelma Reid, Enod Grundy, Messrs. Gerald Lancaster, Gray Dean Foster, Tommie Harrison.

Miss Ora Thompson entertained a number of friends Tuesday night. The evening was spent in various games and amusements. Refreshments were served of ice cream and cake, after which the guests assembled on the lawn where a number of the good old fashioned games were played.

At the home of Miss Lottie Lofton a very pleasant time was had by the young people on Monday night. The evening was spent at contests, forty two and other games. On the lawn watermelons were served by the

CHALLENGE ISSUED TO AMARILLO TEAM

Manager F. P. Luke yesterday mailed a challenge to the Amarillo ball team containing the following provisions:

A series of three games, by the players in the game Monday, one to be played in Canyon, one in Amarillo and the third to be decided by lot. The entire gate receipts of the games played to go to the team winning the majority of the games; together with the difference in the amounts received by Canyon and Amarillo in the game Monday, when sixty per cent was given Amarillo and Canyon forty per cent, which amount was about \$50—shall be deposited in an Amarillo or Canyon bank, along with the receipts of each game. In addition, each team shall deposit at least twenty four hours before the first game \$100 in said bank. In the event of Amarillo winning the series \$100 of the money deposited by the teams shall be paid to the parties in charge of the Potter county exhibit at the Panhandle State Fair. The remaining \$100 and the total proceeds of the games to go to the Amarillo City League. If Canyon wins, \$100 goes to Randall county's Panhandle State Fair exhibit committee, the remainder to the ball team. Two umpires shall officiate at each game, one selected by Canyon and one selected by Amarillo.

The Canyon team awaits with interest the decision of the Amarillo management.

hostess after which Misses Zerah McReynolds and Renna Craig favored the guests with music. Refreshments were served of punch and cake.

Miss Kathleen Stewart entertained at a forty two party Tuesday night. The guests were favored by music on the piano, violin and guitar by Miss Reid, Mr. Ingham and Miss Lofton. Croquet was played on the lawn by some of the guests. Refreshments were served of chocolate ice cream and cake.

Football Begins Next Week.

No call was made this week in the Normal for football men. Coach D. A. Shirley announces that he will make the first call next week and will then proceed to whip the men into shape. Meanwhile he has his eyes open for new material. There are quite a number of the old men back and are ready for a strong schedule.

Institute Has Interesting Program.

The teachers institute for Randall and Deaf Smith counties opened at the high school building Monday morning and will close Friday night. The attendance reaches to nearly fifty. The program has been very interesting and all of the discussions have been very fine.

Jennings Home Completed.

Practically all of the work on Sheriff Worth A. Jennings home was completed yesterday and he will move during the next few days. The home is one of the prettiest and most up-to-date of any of the new cottages in Canyon.

Mrs. G. R. Reid has moved to her house across from the Methodist church. She is having the house painted, remodeled and bath fixtures installed.

HEREFORD WINS IN TENNIS TOURNAMENT

Tennis teams from Hereford, Tulla, Amarillo and Canyon participated in a tennis tournament in Canyon Friday which resulted in a victory for the Hereford players.

In the morning Canyon defeated Amarillo. Canyon won over the Hereford second team. In the afternoon Hereford's first team defeated Amarillo. Hereford's first team defeated Tulla.

Hereford and Canyon then played for the championship, the game going to Hereford.

Bright and Jeffries played all of the games for Canyon.

In the singles Park of Canyon defeated King of Amarillo.

Tafel of Amarillo defeated Woodburn of Hereford.

This is the second tournament held among these four teams, and players hope that they may get together several times a year for games.

Book Club Begins Work.

The Woman's Book Club met Wednesday afternoon at the home of Mrs. R. B. Cousins, president of the club, for the first regular meeting of the year. The following was the program:

President's greeting.
Roll call—Current events.
Discussion of duties of officers and members—Mrs. Ingham.

Methodist Stewards Picnic.

The stewards of the Methodist church entertained their wives and families at a picnic at the Meyers pasture Friday evening. A bountiful picnic supper was taken out and served by the men.

Mrs. A. McElroy is spending the week with her son near Umlinger.

If you have struggled in privation
If you have dwelt with plenty and known a woman's love in either
Then you'll see yourself in

The Novel of a Typical American

Our Next Serial!

Watch for It!

The Ambition of Mark Truitt

It has meat and backbone to it.—Minneapolis Tribune.

Forceful, sane, and convincing. In the idyllic phases the reader is reminded of James Lane Allen.—St. Louis Post-Dispatch.

Contrasts in the quality of women's loves give wonderful color to Mark's career and his final contentment in fulfilled ambition. A human interest novel convincingly evolved.—Chicago Examiner.

JUDGES OUT IN KAFIR CONTEST

H. M. Bainer, L. L. Johnson and J. L. Pope of the Santa Fe agricultural department have been in Randall county the past week judging the crops of the boys and girls who were entered in the Kafir Club. The business men of Canyon and Amarillo last year offered prizes in gold to the amount of \$875 for the boys and girls of Randall and Potter counties raising the best crop.

The work done by the members of the club has been very good this year. Uniformly the crops raised by the club members are better than those raised by their fathers. The young people are taking great interest in their work and the educational value of the contest cannot be estimated.

The crops are judged first from their general appearance. Next the heads for fifty feet in any row that the contestant may select are cut off and weighed. Third, the contestant cut the ten best heads he can find on his acre and send them to Mr. Bainer who tests the grain. Lastly, the contestant is required to write a story of his year's work, giving dates of plowing, planting, cultivating, etc. He is expected to give all possible information concerning the raising of the crop.

Mr. Bainer says that Randall county boys and girls are going to win some of the big prizes this year. In fact, the News would not be surprised to hear that a majority of the prizes came to this county, although Mr. Bainer is not giving out any information on this subject.

The contest will be decided by the latter part of this month. A full list of the winners and story written by the winners in each the kafir and maize contests will probably appear in the first October issue of the News.

48 Year Old, Never Paid Interest.

Will Foster has a unique record. He stated Monday that he would be 48 years old in January and had never paid a cent of interest in his life. He has never signed a note of his own and only on one occasion has signed another man's note for security. However, he had nothing to pay on this note as the first party paid off the obligation without trouble, but Mr. Foster decided that he would never go on another note nor ask any man to sign a note with him.

This is a record that few men can show.

Netherton Will Leave.

The year's work of Rev. T. G. Netherton has closed in the city and he has been given a month's leave of absence, during which time he is visiting in Oklahoma with a view of finding a new location. The local church has not decided upon a new pastor but expects to call one within the month's time. Rev. Netherton has been successful in his work in this city and has many friends who are very sorry to learn that he expects to leave soon.

Brotherhood Meeting.

The Brotherhood of Canyon met Sunday afternoon in a very interesting program with Supt. E. F. King as leader.

The meeting next Sunday will be held at the Methodist church with B. T. Johnson as leader.

The Gober and McIntire families drove to Tulla Sunday.

Man's Most Faithful Friend Is His Dog
By ALLEN STEVEN, Chicago

Probably the most faithful friend to man outside of the horse is the dog. We may have an anguished soul, a sorrowful heart, longing for companionship, or wish to pour out our secrets where we can see sympathy and feel it returned. It makes no difference what occurs, we may unburden ourselves to the faithful brute and he will not be a talebearer or backbiter. He whines out his sympathy or licks one's hands. He may still remember that you took him in when he was like a man without a country and had to travel hither and yon. In the middle of the night when many people are protecting themselves with "shooting irons," with the possibility of mistaking a member of the family for a burglar, the watchful dog guards you from all harm. He will defend you from all intruders, or give a bark that will startle the neighborhood.

When you speak to him in the night, "thump-thump-thump-thump," comes back the answer, as his tail strikes the floor. You shout back "Keep still!" and "thump-thump-thump" comes back another message with possibly a yawn thrown in, as much as to say, "One o'clock and all is well." You then turn over and sleep like a baby, feeling absolutely secure until the dawn of day.

In the streets one sees two men on each side of a boxed-up wagon, with looped wires in their hands ready to hook the first unlicensed dog they see. As one of these men starts after a thirsty, half-starved cur, which is unable to run fast, with that spirit of American liberty that flows in one's veins, one hopes deep in his heart that the poor brute has strength enough to make his "getaway." But, no, he is looped and he lets out a short yelp as he is thrown in with the other jailbirds to be tried, convicted and shot without a jury trial, unless some one appears to take his part, buy him a license to live, pay his back board and take him home.

If one does this, but fails to give him good cold water to drink whenever he wants it and necessary nourishment, it were better that he had been left where he was. It behooves every person who owns a dog to give him the necessary care to avoid the terrible rabies. There is untold satisfaction in caring for the dumb as well as for those who can speak.

Crime Is Result of Brain Disease
By ALLEN SINSHEIMER, Cincinnati, O.

Disease or imperfection of the third frontal convolution, causes partial or total loss of the speech; disease or imperfection of the occipital convolution destroys the power of sight, disease of the temporal convolution destroys the hearing, and an idiot usually has a cerebrum more or less stunted.

There is no cause without an effect. Is a "moral defect" a lack of conscience? Conscience is different in every one. A pickpocket's son trained in the steps of his father has no qualms of conscience when stealing and may be very conscientious in other respects.

No white man's conscience would allow him to scalp a man, while an Indian has no conscience while doing that act.

It is my belief that crime is a result of disease of the brain and may be due to the organization of the brain in the man whose brain was so organized at birth or to hereditary traits or environment.

I regard my soul as a purely physiological function and as material as my stomach or heart, and I therefore hold to the belief that crime is a disease of the brain, and that as no man's will is free no man can be said to merit punishment for committing a crime. At the same time I concede that many a criminal's diseased mind can be cured by proper teaching, whereas, in other cases, while the criminal should be kept out of the community for the benefit of the community, he should not be punished for committing an act effected by a cause.

Man Who Knows Everybody in Town
By MORRIS CONNOLLY, Washington, D. C.

Did you ever meet the man who knows everybody he sees and is continually shaking hands? I know a fellow out in Iowa who never fails to ask who a person is if he happens not to know him. He prides himself on his wide acquaintanceship. If he sees a man he doesn't know, he makes it his business immediately to find out who the man is, and it doesn't take long for him to get acquainted. The fellow is absolutely obsessed with the idea of knowing everybody. You've seen the type? Once introduced to a man, the next time he sees that man he greets him as a lifelong friend. Of course, such men have a marvelous memory for faces and names. It's too bad all of us who have to campaign can't keep a mental index of every person we meet.

One time not so long ago I was visiting Denver with some friends, who were likewise friends of the man of whom I speak. It's true, the fellow knew a lot of people in Denver. For a joke we telegraphed him that we had scoured Denver and were surprised to find there were two persons in the city who were unacquainted with him. "Please wire an explanation," we requested.

Our friend was right there with an answer. He admitted there might be a few persons in Denver who didn't know him by his right name, but suggested that at times he traveled under an alias, and while perhaps the men who disclaimed acquaintance with him didn't know him by name, they undoubtedly knew him by one of his aliases.

Does the Nippur Tablet Ante-Date Moses?
By REV. C. S. MACK, Toledo, Ohio

There are appearing in the press comments upon the Nippur tablet now being translated, said to ante-date Moses by 1,300 years and to contain such accounts of the creation and the fall of man as show that Moses was not the author of the record credited to him. Swedenborg says that there was a Bible before the one we have—that from it Moses copied the first seven chapters of Genesis and most of chapters eight to twelve. He says that three books named and quoted in our Bible (Num. 21:14, 15, 27-30; Josh. 10:12, 13; Sam. 1:17, 18) were books in that more ancient Bible.

He says ideas from that Bible were widely disseminated in Asia and the East—that they became embodied in myths and gradually spread to Greece and Rome; that there are points of resemblance between the various ethnic religions is due to the fact that each of these religions derived truths—some more directly, some less so—from that more ancient Bible.

Swedenborg says that the people who had that Bible were not expected to understand it literally, but that they understood the symbolism in accordance with which it was written—a symbolism not artificial but natural and true.

DUKE IN THE MOVIE BUSINESS

Manchester Becomes Exploration Secretary of Church and School Service Corporation.

New York.—The duke of Manchester, son-in-law of Eugene Zimmerman of Cincinnati, has gone into the moving-picture business as the exploration secretary of the Church and School Social Service corporation, at No. 18 East Forty-first street. The president of the corporation is the Rev. William Carter, at one time pastor of the Madison Avenue Reformed church and later on the national board of censors for moving pictures.

The purpose of the company, the idea of which originated with the duke, is to supply moving pictures of an educational and moral value to churches, Sunday schools, Y. M. C. A. branches and lyceums throughout the world. As a starter the company will canvass 115,000 Protestant churches and it expects the Catholic churches to become a patron of its religious films.

At the offices of the corporation it was said that the enterprise was purely commercial. Some of the executive staff named are Dr. Charles H. Parkhurst, vice-president; S. S. McClure, executive secretary, and Henry Clews, treasurer.

The duke of Manchester, who has had much experience in exploring, will devote one-half of his time to the affairs of the company.

FINDS WILDEST OF SAVAGES

British Captain So Characterizes the Daffas of Northern India to Geographical Society.

London.—There is a "River of Doubt" outside of Brazil. Before the Royal Geographical society, Capt. F. H. Bailey, whose earlier stories of the Can-po, or Upper Brahmaputra—the "mystery river" of Tibet and far northeastern India—are known to geographers, gave an account of the more recent exploration of 380 miles of that great stream. One hitherto "unconsidered trifle" discovered by the travelers was a peak 24,469 feet high. It will be called Gyalia Peri on the new map of the unknown land. Captain Bailey says of the Daffas, a savage people of that region: "They are the wildest wild men I ever saw. They had never heard of white people. They knew nothing about India. They would not accept money for their honey; they appeared to be rather afraid of it. They wanted nothing but white beads and salt. They dress their hair by tying it in a knot over the forehead, through which a brass or bamboo pin, about a foot long, is passed horizontally. In this is often a tuft of palm leaves."

CANAL AID TO SANITATION

Conditions in "East End" at Rio de Janeiro, Made Much More Sanitary by Big Drain.

Rio de Janeiro, Brazil.—Conditions in the "East End" at Rio de Janeiro, Brazil, where the land is rather low and swampy, have been made much more nearly sanitary by the recent construction of a broad canal. This drains the marshy ground and acts as an outlet for the torrents of water

This Picturesque Waterway Aids Sanitation at Rio de Janeiro.

which often rush down upon the lowlands from the surrounding hills, following freshets. The canal stretches down the middle of the Avenida do Mangue and is flanked by double driveways. Rows of stately palms line the banks, which with the romantic surroundings make the place picturesque and beautiful.—Popular Mechanics.

BABY LAYS LOW A "HOODOO"

He Is Made the Fourteenth at a Wedding Feast and Removes Superstitions of Bride.

Sacramento, Cal.—A wee infant in swaddling clothes saved the wedding breakfast of Mr. and Mrs. Adolph Manne from being a failure here. When the wedding party sat down to the breakfast the observant bride counted 13 guests. The bride balked at remaining at the feast and all the guests were unwilling to miss the fun.

Then one of the party thought of the baby next door. The mother's consent was gained and the youngster was propped up in a chair in the seat of honor, thereby removing the superstitions of the bride about "thirteen."

COME TO THE PANHANDLE THIS YEAR

MAN has acquired a hunger for land which he can call his own. The supply is limited—the demand unlimited! Land values have risen to prohibitive prices in older settled states!

The Panhandle is Ready for the Farmer

Here is a deep, rich soil, ready for the plow. An ample rainfall and a most healthful and splendid climate. Adequate railroad facilities by which to reach the markets of the world.

A return to normal climatic conditions, a greatly increased acreage of winter wheat, spring wheat, oats and barley, an unqualifiedly successful demonstration that Kaffir corn and Milo maize cannot be excelled as material for ensilage, the "better farming" spirit and the results of studying and developing this land assures a prosperous year.

Farms can be bought here now cheaper than they can later on, at prices which are certain of a steady advance as the summer and fall emigration stimulates the demand.

My farms are all favorably located, as regards towns and railroads and give the buyer a wide range in selection. All the improved farms are rented to good farmers and will produce a substantial revenue this year.

I am in a position to give terms to suit the purchaser.

C. O. KEISER

Keota, Iowa

JAPPY MOTHERHOOD

The happiness of motherhood is too often checked because the mother's strength is not equal to her cares, while her unselfish devotion neglects her own health. It is a duty of husband or friend to see that she gets the pure medicinal nourishment in Scott's Emulsion, which is not a drug or stimulant but nature's concentrated oil-food tonic to enrich and enliven the blood, strengthen the nerves and aid the appetite. Physicians everywhere prescribe Scott's Emulsion for overworked, nervous, tired women; it builds up and holds up their strength. Get Scott's at your nearest drug store.

A son was born to Mr. and Mrs. Robt. Rowan at Waco last week. Mr. Rowan formerly lived here and Mrs. Rowan was Miss Fern Churchill, a graduate of the normal.

H. W. Geller returned Sunday from a two weeks vacation spent in Duluth Minn.

Misses Gladys Rogers and Ruby Muldrow left Sunday for their school work at Washburn.

Miss Hazel Wright of Amarillo visited over Sunday at the T. V. Reeves home.

Cures Old Sores, Other Remedies Won't Cure
The worst cases, no matter of how long standing, are cured by the wonderful, old reliable Dr. Porter's Antiseptic Healing Oil. It relieves Pain and Heals at the same time. 25c, 50c, \$1.00.

REMEMBER YOUR LAST DOSE OF CALOMEL?

You probably recall the bad after-effects of the calomel more than the sickness you took it for. You need never again go through with being "all knocked out for a day or two by calomel."

Next time your liver gets sluggish and inactive, we urge that you go to Holland Drug Company for a bottle of Dodson's Liver Tone, a splendid vegetable liquid medicine that will start your liver as sure as calomel ever did and with none of the after-effects of calomel. It is absolutely harmless both to children and adults and demands no restriction of habits or diet.

A large bottle of Dodson's Liver Tone costs only fifty cents and the druggists who sell it guarantee it to take the place of calomel, and will refund your money if it fails in your case or if you are not satisfied.

SAVES DAUGHTER

Advice of Mother no Doubt Prevents Daughter's Untimely End.

Ready, Ky.—"I was not able to do anything for nearly six months," writes Mrs. Laura Bratcher, of this place, "and was down in bed for three months."

I cannot tell you how I suffered with my head, and with nervousness and womanly troubles.

Our family doctor told my husband he could not do me any good, and he had to give it up. We tried another doctor, but he did not help me.

At last, my mother advised me to take Cardui, the woman's tonic. I thought it was no use for I was nearly dead and nothing seemed to do me any good. But I took eleven bottles, and now I am able to do all of my work and my own washing.

I think Cardui is the best medicine in the world. My weight has increased, and I look the picture of health."

If you suffer from any of the ailments peculiar to women, get a bottle of Cardui today. Delay is dangerous. We know it will help you, for it has helped so many thousands of other weak women in the past 50 years.

At all druggists.

BRILLIANT AUTO SHOW.

1915 Models Shown First Time in America at Coming State Fair.

Dallas.—Dealers in automobiles are preparing for a marvelous exhibit of 1915 models in their own building at the coming State Fair of Texas, which begins Saturday, October 17. This will be the first showing of 1915 models in America. Every make sold in Texas, every model and kind will be on exhibition.

Remember the dates: State Fair of Texas, Dallas, Saturday, October 17, to Sunday, November 1.

Style Show at Fair.

Dallas.—A style show of the latest imported and domestic designs in women's wear and millinery will be one of the features of the 1914 State Fair of Texas, which begins in this city Saturday, October 17, and continues sixteen days. New York and Paris will be ransacked to bring to Dallas the latest and most beautiful creations in hats, gowns, frocks and dresses.

The Value of a Telephone

in the farmer's home cannot be measured in dollars and cents. It may be the means of saving your property from destruction by fire, your family from serious illness, your products from a drop in prices.

Thousands of farmer's telephones are connected with the vast system of this Company. The cost is most reasonable. Inquire of our nearest Manager.

CLASSIFIED ADS

For Trade—One four year old mare for mule colts. T. P. Turk. tf

Wanted—Good clean cotton rags at News office. It

For Sale—Hard coal stove, cheap. Call News office. tf

Lost—One red and white cow with brands HD (connected) on right hip and two or three letters on left side, first being "M". Notify C. C. Thomas, Buchanan St., Amarillo. p1

\$2.50 Reward—For the return of a cameo pin lost last week. Return to News office. t1

Notice—I want to buy a good gentle milk cow. W. J. Thomas.

For Rent—Modern six room house one block from campus. See W. J. Thomas of Canyon or D. E. McIntyre of Amarillo. p1

For Rent—Rooms for light housekeeping. Electric lights and bath. Mrs. S. J. Moreland. 24t2

One seven room house and two blocks of land in Canyon City, Texas, that I have for exchange for a real good sandy land farm in Wise County, Texas. We would pay some difference in cash. L. G. Conner, Canyon City, Texas. 24t3

For Sale—Good wind fall apples. \$1 per bushel. Walter E. Johnson, eight miles west of Canyon. 24p2

How To Give Quinine To Children.

FERRILINE is the trade-mark name given to an improved Quinine. It is a Tasteless Syrup, pleasant to take and does not disturb the stomach. Children take it and never know it is Quinine. Also especially adapted to adults who cannot take ordinary Quinine. Does not cause nervousness nor ringing in the head. Try it the next time you need Quinine for any purpose. Ask for 5-ounce original package. The name FERRILINE is blown in bottle. 25 cents.

Headache and Nervousness Cured.

"Chamberlain's Tablets are entitled to all the praise I can give them," writes Mrs. Richard Oip, Spencerport, N. Y. They have cured me of headache and nervousness and restored me to my normal health." For sale by all dealers.—Advertisement.

For Sale—one pair three year old work mules, one Johnson row binder. T. P. Turk. tf

For Sale or Rent—My home, modern containing six rooms good barn and coal house. One block from campus. W. J. Thomas. 22p4

For Sale—Some choice sows bred to registered males. Also ewes and lambs. L. T. Lester. tf

For Sale—Seven room brick house, basement, half block land, good outbuildings at sacrifice, three blocks from depot. John Begrin. tf

Best Diarrhoea Remedy.

If you have ever used Chamberlain's Colic, Cholera and Diarrhoea Remedy you know that it is a success. Sam F. Guin, Whatley, Ala., writes, "I had the measles and got caught out in the rain, and it settled in my stomach and bowels. I had an awful time, and had it not been for Chamberlain's Colic, Cholera and Diarrhoea Remedy I could not possibly have lived but a few hours longer, but thanks to this remedy, I am now well and strong." For sale by all dealers.—Advertisement.

One way second class Colonist excursion fare to points in west and northwest at approximately \$30. Tickets on sale daily Sept. 24-Oct. 8.

Annual convention American Institute of Banking, Dallas, Sept. 22-24. Fare and one-third for round trip. Tickets on sale Sept. 20-21-22, limit Sept. 30.

Hale County Fair, Plainview, Sept. 22-24. Fare and one-third for round trip. Tickets on sale Sept. 21-22-23, return limit Sept. 25.

East Side of Square **Holland Drug Company** Canyon Texas

Miss Francis McCart of Ft. Worth is visiting Miss Kelly at the McDade home.

Misses Alma, Annadell, Margaret and Erna Guenther visited last week with friends in Amarillo.

Miss Rambo returned Sunday from a two weeks visit at her home in Illinois.

Mrs. Travis Shaw returned Saturday morning from Detroit where she spent a month with her mother.

Miss Kathrine Howard of Gainesville spent the week end with Miss Elsie Guenther.

Mrs. Florence B. Brown left Friday for her home in east Texas where she will make a short visit.

Mr. and Mrs. D. A. Park were at the M. S. Park home in the northern part of the county Sunday. Mr. Park reports very fine crops in that section.

T. P. Turk of Hillsboro arrived Monday for a two weeks business stay in the city.

Brightening up time! Get your paint, glass and wall paper of S. V. Wirt. Best line in the city.

Mr. and Mrs. Oscar Hunt were in Amarillo Wednesday.

Mrs. H. W. Stilwell and children left Wednesday for Amarillo where she will make a short visit with Mrs. R. W. Hall.

Only One "BROMO QUININE"
To get the genuine, call for full name, LAXATIVE BROMO QUININE. Look for signature of E. W. GROVE. Cures a Cold in One Day. Stops cough and headache, and works off cold. 25c.

Rev. J. E. Bates of Greenville passed through the city Wednesday on his return from Olton where he has been conducting a meeting. He was accompanied home by Averill Bates who will make a two weeks visit.

Wm Bright left Wednesday for Panhandle where he will teach this coming year.

Mrs. M. S. Gatewood visited from Friday until Saturday with her daughter Mrs. J. H. Miller in Hereford.

T. V. Reeves has moved to the Kleinschmidt house next to the Stafford home.

Monday was Labor Day but none of the business houses were closed. The postoffice observed holiday hours.

The Baptist Baraca and Philathea classes will give an ice cream supper Monday, Sept. 14 on the west side of the square. The Canyon band, under the direction of Miss Wiggins, will make music. Normal students and everybody else are invited to come. The proceeds will be used for church purposes.

Dr. and Mrs. G. T. Vinyard of Amarillo spent Wednesday at the B. T. Johnson home.

Mrs. Battials of Georgetown arrived yesterday to visit at the home of her daughter, Mrs. H. W. Morelock.

Our new vulcanizer will be ready for business next Tuesday. Bring us your tires in time of trouble. Canyon Machine and Auto Co.

Honfer Taylor of Centralia, Wash., Mr. and Mrs. W. H. Grubbs of Stamford are visiting at the parental Price Taylor home.

Mrs. George Frank left Friday for Illinois to visit at her old home.

W. L. Harris and J. F. Lackey of Hutchinson county were in the city Saturday. W. L. Harris recently traded for the J. P. Winder property.

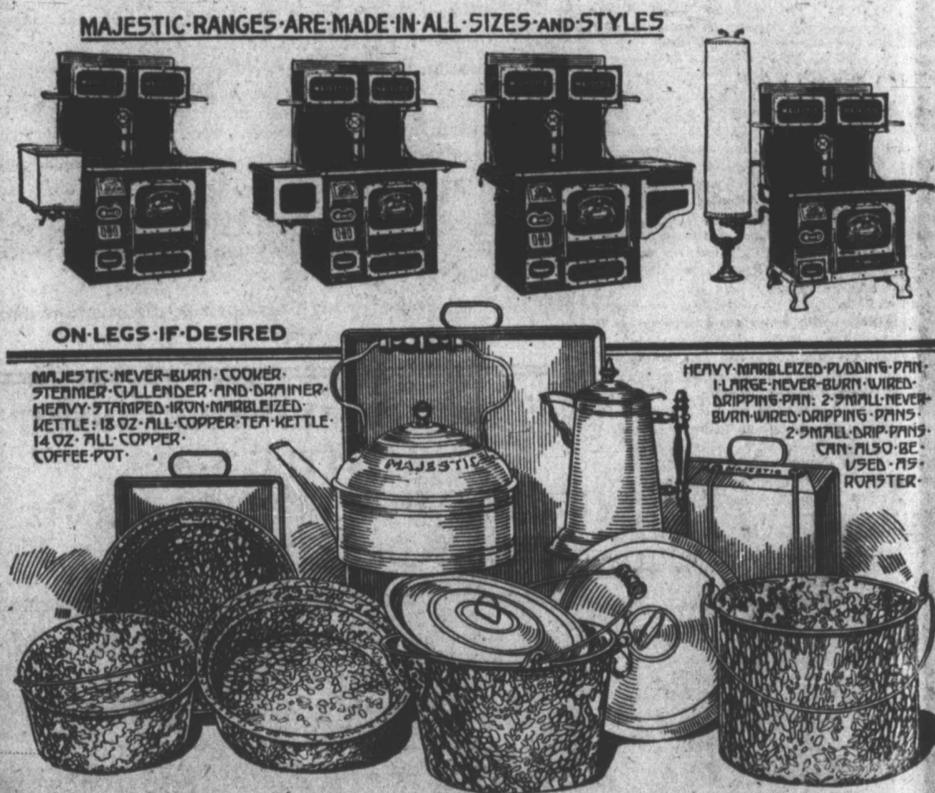

Tom Lowery of Amarillo spent Sunday in the city. He sang at the Methodist church in the morning.

Rev. J. T. Burnett preached at the Baptist church Sunday.

Piles Cured in 6 to 14 Days
Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days. The first application gives Ease and Rest. 50c.

MAJESTIC DEMONSTRATION ALL NEXT WEEK

MAJESTIC RANGES ARE MADE IN ALL SIZES AND STYLES
ON LEGS IF DESIRED
MAJESTIC NEVER-BURN COOKER, STEAMER-CALENDER AND DRAINER, HEAVY STAMPED IRON MARBLEZED KETTLE: 18 OZ. ALL COPPER TEA KETTLE, 14 OZ. ALL COPPER COFFEE POT, HEAVY MARBLEZED PUDDING PAN, LARGE NEVER-BURN WIRE DRIPPING PAN, 2 SMALL NEVER-BURN WIRE DRIPPING PANS, 2 SMALL DRIP PANS CAN ALSO BE USED AS ROASTER.

SOUVENIR Set of Majestic Ware FREE

If you will call at our store during our Majestic Demonstration Week and allow us to show you the many advantages and superior qualities of the Great and Grand Majestic Range, and will purchase one at the regular price, we will give you FREE the beautiful and useful Souvenir Set of Ware illustrated in this advertisement. This ware is made to match the quality of the Majestic Ranges, and we know all ladies will see the beauty and utility of this set, especially the first three pieces, which are entirely new and cannot be had alone by purchase, except at a very high price; The prices of Majestic Ranges are the same, but we give the set FREE with each Majestic Range bought during demonstration week only.

Reasons Why the Great Majestic You Should Buy

- 1st. It has the reputation of being the best range money can buy.
- 2nd. It not only has the reputation, but IS the best range made, and we will prove this to you if you will let us.

3rd. It is constructed of malleable iron (material you can't beat) and of Charcoal Iron (material that resists rust 300 per cent better than steel), is riveted together air-tight. No heat escapes or cold air enters range, thus uses very little fuel to do perfect work.

4th. The reservoir alone is worth the price of the range over any other reservoir made. It boils 15 gallons of water; is heated like a tea kettle, with pocket against left-hand lining, and is movable, and sets on a frame, hence cannot wear out. When water gets too hot it can be moved away from fire.

MAJESTIC RANGES use less fuel; heat more water—and heat it hotter; costs practically nothing for repairs; last three times as long; bake better; easier to keep clean and give better satisfaction than any other range on the market. If you knew positively that the above statements were true, wouldn't you buy a Majestic AT ONCE? Come in during Demonstration Week and we will prove it to you.

SUBMARINES TO DRIVE BATTLESHIPS FROM SEAS

KEY DOTLED UP IN HARBOR BY SUBMARINES

So eminent an authority as Admiral Sir Percy Scott of the British Navy declared the other day that the doom of the dreadnaught had been sounded by the development of submarines. He asserted unequivocally that even the superdreadnaughts were archaic and that experiments had proved conclusively that no fighting ship was safe from the attack of the submarine day or night. Why, then, spend millions for armorclad titans? he asked.

The pronouncement is the more impressive because Admiral Scott has probably done more than any other living naval man to make the battleship the offensive fighting machine it is today. By a system of director firing he improved the capability of making hits quite 100 per cent, and showed how a whole battery of monster rifles could be manipulated as a unit and the tremendous salvo brought to bear upon a distant target with amazing precision. In a word, he made the dreadnaught a wonderfully formidable instrument of attack, and yet today, in the face of that unparalleled record, he says: "I see no use for battleships."

There is in this country an authority of a kindred way of thinking, Simon Lake, who has done a great deal toward making the submarine what it is. In substance, Simon Lake anticipated Admiral Sir Percy Scott by many years in predicting the passing of the heavy ships of the battle line. He was asked the other day for his opinion of the British admiral's sweeping views.

"I still believe, as I always have, that the submarine will drive the heavy armored battleship from the seas," he replied, "and that it will be the means employed by all countries with a seaboard to prevent invasion from the sea."

"The partisan of the battleship points with reasonable pride to the spectacular performances of his giant turret guns, and he tells you of the many inches of hardened steel that the points of his armor-piercing projectiles can perforate. Truly these doings are little short of marvelous. But the advocate of the gun is a prejudiced expert withal, for he will not believe the torpedo to be a formidable rival. Why? Simply because generally he takes little interest in this order of weapon."

"But the torpedo is coming into its own. It is an instrument of precision and stupendous destructive might. Where it could not travel more than 1,800 yards with any chance of hitting the target a few years back, it can now cover a distance of 12,000 yards and make that run at an average of nearly 30 knots."

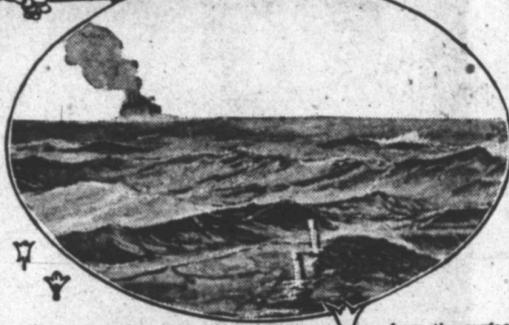

"In some particulars it is even more accurate than the gun. It travels far enough below the surface to be unaffected by the state of the sea. With its warhead charge of several hundred pounds of high explosive, attacking a ship where she is least prepared for assault, the detonation of that substance will cause a far greater wound than it is possible to produce with a number of the biggest projectiles."

"Yes, I think Sir Percy Scott is right, and his admission means much more because it comes from an expert who has heretofore favored the gun and the dreadnaught."

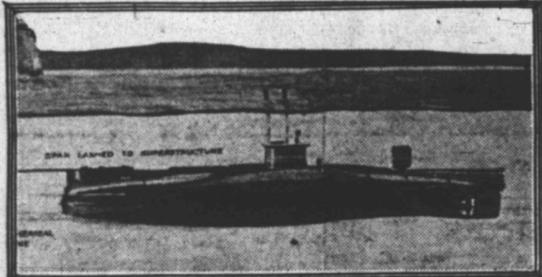

"What do I think of the submarines of the future? How big do I think they will be? Well, I have done some prophesying in the past and have been frankly pook-pooked by the unbelievers, so you will understand my present reluctance to predict just how large submarines will eventually be built. There are mechanical problems that must be overcome first. The development of the submarine has not been as rapid as I anticipated, and this has been due to the difficulty of securing satisfactory engines."

"The gasoline engine has been somewhat discredited as a motor for underwater boats because of the explosive character of its fumes. We have had a number of distressing accidents due to the unexpected ignition of the fumes of gasoline. Yes, the heavy oil engine promises to meet the needs, but there has been a good deal of difficulty in securing a reliable heavy oil, reversible, internal combustion engine. Thanks to the genius of Dr. Rudolf Diesel, the way to success has been blazed, and as the heavy oil engine evolves the size and the speed of submarines will increase proportionately."

"As a matter of fact, we have already in mind

SUBMARINE WAITING TO ATTACK

SUBMARINE ENTIRELY SUBMERGED

submarines of 2,500 tons, with the speed of a battleship, and it may be possible to build them of a speed equal to that of the fast cruisers, but the handicap in properly engineering them has caused us to hesitate in putting propositions forward for their construction. The moment a reliable engine is provided that will furnish a speed equal to that of the surface vessel, of whatever type such surface vessel may be, that moment surface vessels of that order will become obsolete for purposes of war; their only use will be to train seamen and to carry the flag in times of peace.

"How did I begin my work in submarine navigation? Well, the story is not a long one. Of course, you will expect me to tell you that Jules Verne's 'Twenty Thousand Leagues Under the Sea' was my inspiration, and you shan't be disappointed. From my boyhood days that scientific romance gripped me irresistibly, and I was not more than nineteen when I began experimenting in a crude way."

"It was then 1885, and I was living at Toms River, N. J. My preliminary investigation was in an overturned rowboat, under which I crawled to see how long I could survive in the air confined close up to the inner bottom of that craft. I stayed there so long that a passing fisherman thought me drowned and righted the boat, expecting to tow it ashore and to report my loss."

"In 1893, as you possibly recall, the navy department asked for bids for a submarine boat. I submitted the design of one intended to travel on the surface, in between the bottom and the surface or on the waterbed—a sort of underwater automobile, so to speak. I had no financial backer, and the government exacted that the successful bidder should put up a bond as a guarantee of contract fulfillment. Needless to remark, I did not get any recognition of a substantial sort, but I did obtain favorable comment from some of the official critics. That, at least, gave me encouragement."

"Shortly afterward I moved to Atlantic Highlands, and there, thanks to the financial assistance of an aunt, I built the submarine which I jokingly named Argonaut, Jr. That was in 1894. The Argonaut, Jr., was a coffinlike box built of yellow pine timber in two layers, coated with coal tar and lined with felt to make it water tight. It was 14 feet long, 4 1/2 feet wide and had a depth of 5 feet. It was mounted upon wooden wheels."

"The vessel was intended to navigate only on the bottom and was driven by hand power; a crank shaft, ending outside with sprocket wheels, was geared by a chain belt to the two rear drivers. Inside, the bow part of the boat was partitioned off by an air-tight bulkhead which made the foremost compartment a veritable diving bell, with a water-tight door in the floor that could be opened."

"For air storage the boat carried a soda water tank, and a plumber's hand pump did duty as an air compressor. When the confined air reached a suitable pressure the bottom door could be dropped without fear of the water coming in when the Argonaut, Jr., was submerged."

"The craft was finished on Christmas day of

POSITION OF SUBMARINE'S OUTSIDE HARBOR

1894 and then launched, but she was not in the water more than a quarter of an hour when a sudden storm swept her ashore and damaged one of the wheels. When the spring of 1895 came I was face to face with something of a problem. The Argonaut, Jr., was at the bottom of 14 feet of water and partly buried in soft mud. My task was to refloat her and to make her ready for further experiments and for demonstrations looking to the interesting of very much needed capital. Now, regular diving suits are an expensive matter, and my funds were

so extremely low that I had run around well nigh barefooted during the winter in order that every penny available could be used in connection with my embryo submarine. "When milder weather came I had ready a diving dress of my own devising. For a helmet I utilized a framework of light iron rods covered with painted canvas and made it fit snugly over my shoulders and to strap under my arms. For a face plate I used the glass deadlight from the air port of an abandoned sloop, and to help me to submerge I tied sash weights to my legs. Common garden hose wound with wire served to carry my air supply from the surface. In this fashion I reached the Argonaut, Jr., closed her up and put in pipes to pump her out. In my anxiety to succeed I toiled under water for several hours, and in consequence spent the better part of a week in bed afterward. In that brief time I lost 40 pounds in weight, but I didn't mind that because the boat was afloat again."

"The Argonaut, Jr., was not designed to submerge deeper than 20 feet, and my main object in building her was to show how a craft of that nature could be made to travel around on the bottom and, by means of the diving compartment, make it possible to recover things lying upon the waterbed. To make a long story short, my performances were so successful that I obtained money and we organized a company in November of 1895. But we did not have funds enough to build the big boat I had planned, and accordingly we had to curtail our ambition and confine our efforts to a smaller craft for the purpose of demonstration and as an inducement to additional capital. Fortunately I won the confidence of the late William T. Malster of Baltimore, then president of the Columbian Iron works and afterward mayor of the town."

"The Argonaut was a cigar-shaped structure of steel, 36 feet long and 9 feet of beam, and was fitted with an 80 h. p. gasoline engine, a dynamo, an air compressor, a searchlight, water ballast pumps—the apparatus necessary for successful submarine navigation. She had accommodations inside her for a crew of five, and during 1898 a cruise of more than 2,000 miles was made in the Chesapeake bay and on the Atlantic coast, traveling both on the surface and submerged, and over all kinds of bottom. That boat, designed for commercial purposes, was the pioneer of a larger military underwater craft which we built in Bridgeport some years later."

"As far back as 1901 I offered our navy department a boat that could carry guns in addition to torpedoes. I was generally laughed at, as I was for my bottom-traveling wheels. As you know, most of the big British submarines now carry guns and other nations are profiting by those examples. The big boats built by me in Russia for the czar's navy were designed to have this very feature."

"In view of the actual advances, and knowing the increasing destructive might of the torpedo, I find no difficulty in subscribing to Admiral Sir Percy Scott's prediction. Yes, of course, the idea is of revolutionary portent, but with the gun to batter her above water and the torpedo to do even greater damage below, what chance of surviving has the accepted order of dreadnaughts?"

"The Proctor was the first underwater craft to provide comfortable quarters for her crew and to be equipped with cooking facilities in order that they might live aboard of her. Even so, the ruling spirit of our naval board of inspection in 1903 pook-pooked this provision, declaring that a mother ship would always be necessary and that the men would live aboard the larger craft. How far that mistaken authority erred can be gathered from the performance of a sister boat."

"After that little vessel became part of the czar's fleet she made a run from Kronstadt to Libau in October of 1905. The official report of the commander of the vessel best tells the story:

"This trip confirms once more the good seagoing qualities of boats of this particular type, as several times we were out in cold weather and exposed to high winds and heavy seas, yet notwithstanding these conditions, the submersible stood the weather every time quite easily. At one time, for 24 hours, by reason of the violence of the wind and the nature of the sea, it was not possible to pass food from the conveying vessel. During that period the deck was swept by heavy seas and the crew were able to take the air only on top of the conning tower; but notwithstanding this when I proposed to them the next day that they might go over to the convoy if they liked they again asked permission to remain on the submersible."

"Yes, the underwater craft are coming into their own."

Fundamental Principles of Health

By ALBERT S. GRAY, M. D.

(Copyright, 1914, by A. S. Gray)

WHEAT FLOUR.

Of the protein substances used for food none is of more importance than those contained in wheat. Next to rice, it is today the most largely used grain.

The wheat berry is a fruit and not a seed. The actual wheat seed is the germ or embryo, a kidney-shaped body which is found at the base of the berry and connected with the root through the placenta, which is in effect a cord joining the berry with its stalk. Botanists distinguish six skins on the wheat berry—epicarp, mesocarp, endocarp, epispERM, tegmen and perispERM.

Wrapped up and thoroughly sealed within these many skins lies the floury kernel, the endosperm, in intimate contact with the inner skin. The endosperm consists of starch granules held in a network of minute fibers of gluten. This glutinous portion is of great importance to the baker, because on its quantity and quality depends the "strength" or raising power of the flour.

The placenta serves to filter the food which the plant sucks up from the ground. First the mineral and gluten skeleton is formed and then the berry fattens by extracting out of the air under action of sunlight the carbon necessary to build up the starches and sugar. A good deal of the matter filtered by the placenta is mineral in nature and such portions as are not digested remain in the crease. A grain of wheat is composed approximately as follows: Water, 12 per cent; protein, 13 per cent; fat, 2 per cent; carbohydrates, 71 per cent; mineral salts, two per cent. These mineral salts consist of potassium, sodium, calcium, magnesium, iron, phosphorus, sulphur, silicon, chlorine, iodine and manganese.

Until recent years the whole berry was broken up and triturated in one operation, and the flour necessarily contained a large proportion of branny particles, in which cerealin, an active digestive constituent, was present in very sensible proportions. Unless the wheat was thoroughly matured and dry it was difficult to produce a good keeping flour.

The patent roller process crushes the berry in such a manner as to chip off the woody skins and flatten the germ. Thus their removal by mechanical means is made easily possible. In this way is removed from the floury starch granules the bulk of the mineral matter and the digestive ferments. This makes a better keeping flour and gives clear, white bread and cakes of fine texture, very attractive to the eye. Patent process flour is graded as follows: First patent, second patent, first clear or straight, second clear and red dog. Ordinary or "straight flour" is the third; the fifth is chiefly used in the arts and for feeding animals. The rest of the wheat berry constitutes several grades of bran and shorts. The United States department of agriculture "standard" permits not less than 8.5 per cent protein, or four per cent ash, and not more than 13.5 per cent moisture.

The two per cent of mineral salts in wheat makes the "ash." While the mineral contents of whole wheat are two per cent, the mineral contents of fine white flour are about one-half of one per cent. The more thoroughly the mineral matter and the digestive elements are eliminated from flour, the whiter bread it makes and the better the flour keeps under all conditions of climate.

Moisture and the diastase cause the catalyzers to work and digest or decompose the flour. It is in just this difference between the contents of the whole wheat berry and the flour from which "the staff of life" is made that undoubtedly will be found the key to much of our trouble. It is admitted that neurashtenia—"Americanitis," as it is jokingly called by the rest of the world—is due to some type of "malnutrition," meaning, in plain English, starvation—a lack of balance between the energy expended and that developed. How much of this is due to our devitalized food? Hunt reports in bulletin 69, hygienic laboratory, United States treasury department: "In extreme cases mice after having been fed upon certain diets recovered from forty times the dose of acetonitrile fatal to mice kept on other diets. It is, moreover, possible to alter the resistance of these animals at will, and to overcome the effects of one diet by combining it with another"—the point he was working to establish being that unnatural diets lower resistance and restoring the diet balance raises resistance.

We do not know much about digestion; we do not know much about the cause of many diseases—cancer, for

instance. Cancer is on a steady increase and no man has yet been able to demonstrate the cause; but when the cause is located it will, undoubtedly, prove to be closely related to some slight form of starvation, as is our other scourge—tuberculosis.

The future field of medicine lies along the lines not of determining how many organs may be removed from mankind without immediate destruction of life, not in discovering the particular remedy required to overcome the distress resulting from some diseased condition, but in determining and teaching men so to live that they may prevent the lowered resistance that makes them subject to disease—how to maintain normal resistance to disease.

INERT FOOD.

Life in the furnace giving out life conserving heat into the house means that something has to be continuously "dying" in the furnace. For to maintain that heat some form of potential energy has got to be continuously released in the furnace, and this is achieved by digesting, or decomposing, or in plain English, by burning coal or some other form of carbon in the firebox. Whether it be in your furnace or in your own body, in the wheat plant or in the single-celled amoeba, life is a continuous process of dying.

All organic life exists in a state of continuous decomposition and rebuilding, a perpetual state of mutation. What is true of the fire is equally true of ourselves, the principles being identical. As soon as decomposition ceases, reconstruction ceases; as soon as we cease dying, we cease living. Life in man, plant, amoeba or the furnace is merely vibration, an individual transformation of potential energy that varies only in degree.

All living matter contains substances of peculiar molecular structure and composition far more complex than any compounds found in inorganic nature. But the difference between these, organic and inorganic substances is only a difference of degree, and many of the most characteristic of the substances have been artificially made in the chemical laboratory.

Built up out of the commonest elements on the surface of the earth these organic compounds are grouped into three classes: Carbohydrates (sugar, starch and cellulose), fats and proteins. Of these three compounds the proteins are by far the most important, for while the molecule of fat, or carbohydrate, consists entirely of various combinations of the three elements, carbon, hydrogen and oxygen, the protein molecule always contains, in addition, nitrogen and sulphur.

The carbohydrate and the fat, so far as we know, appear to be only heat and energy-giving compounds exactly equivalent to the coal we burn in the furnace or in the firebox of a steam engine. But the proteins have at least a double function to perform—and probably others we have not yet grasped—for not only must they supply energy but also the structural material, the brick, stone, mortar, iron and other inorganic material out of which our bodies are composed.

It is no more possible for us to maintain our bodies in health without a generous supply of these inorganic elements than it would be for us to keep a gasoline engine running for an indefinite period of years by merely feeding it gasoline. Common sense tells us that the engine must be taken to the shop every so often and the worn parts renewed if we are to secure continuous action or any sort of efficiency from the oil consumed.

All organic life rests on one fundamental and vital fact, which is that the seed bearing plants have, with few known exceptions, the exclusive power of absorbing energy direct from the inorganic under the stimulus of sunlight. In the action of chlorophyll (the green coloring matter of plant life analogous to the red coloring matter in human blood) in sunlight undoubtedly lies the key to the mystery of life. But with the sublime assurance of ignorance, we step in and deliberately break this cycle of life by discarding elements that offend our color sense or that interfere with our business.

If, for instance, wheat flour will not keep, we remove the bran, the woody matter and the mineral salts, together with a portion of the protein-matter and the germ; it makes a much whiter and lighter bread, anyway, and the experts tell us that it is more digestible, too; and besides, the "insoluble by-products" make fine food for stock. Cattle, chickens and other forms of life grow fat and sleek on a diet to which these "waste by-products" are added.

Evidently these "waste products" have a very profound influence on the metabolism of the lower forms of life, but it is argued that that has nothing to do with man. We are still hitched to the idea that man is a thing apart from all the rest of creation and that if anything becomes the matter with his machine it is because an evil spirit gets in and he must pour some vile tasting combination down his throat to drive the evil thing out. Meantime the fact that some fifteen millions of our nineteen-odd million children enrolled in the schools are shown to be more or less physically defective from insufficient building material supplied in their food, and the fact that we are experiencing a constantly increasing economic loss through the premature death of our matured lives, do not appear to be so important to us as that we shall have nice white foods that will keep.

WOMEN ILLOGICAL?

By ELMER PHILLIPS.

Doctor Syntax was not more than forty, though he seemed bowed beneath the weight of his recondite investigations. He was seated at his library table, looking out across the quiet village street toward the campus, inside the halls of those magnificent Gothic buildings which he could just see from his library he had taught for 15 years.

When Aloysius Benton, his friend and colleague, died, ten years before, leaving his twelve-year-old daughter to Doctor Syntax, it was the most natural thing in the world that the kindly old doctor should take the child into his household. After old Janet died, Milly quite naturally became the doctor's housekeeper.

And now certain persons had whispered that it was not proper for an unmarried man, even a professor, to live alone in the house with the girl.

With Milly! Why, she ruled him with an iron hand, cased in velvet though it was! Did a north wind blow, his peace of mind was not worth a moment's purchase unless he put on his comforter to step across the campus. He was sent to bed even in the midst of the most abstruse problems, when eleven o'clock arrived, and he had a lecture on the following day. Nevertheless, life without Milly seemed an impossible, hopeless thing.

Doctor Syntax had been in love when he was a young man. The object of his devotion had married another; but, though he had long ceased to think of her, the memory of that first love had clung around him like a radiant cloud, softening his spirit and fitting it for high idealism. Sometimes the thought of Milly had, of late, unaccountably revived that memory. The professor did not at first understand why.

But when the ultimatum went forth that society considered Milly ought to be relegated to another sphere, the professor had a ridiculous dream. It was absurd, to hope that Milly, the belle of the little town . . . and he an old fogey of forty! But he continued to dream it. Even a professor of mathematics has the right to dream.

At any rate, he must tell Milly. And he did so, when he met her in the

"Can't You Solve It by Algebra?"

library after dinner, which the professor always took alone, because he had to read and eat at the same time. This was the only point on which he had never ventured to defy Milly.

"My dear," he said, "I have an unpleasant thing to say to you. It is a problem—"

"Can't you solve it by algebra?" inquired Milly, looking at him with a twinkle in her eyes. "You know, you always say everything can be solved by algebra."

"And so it can, my dear," said Doctor Syntax. That was one of his pet theories.

"You remember how you found your spectacles," pursued Milly mischievously.

The discovery of Doctor Syntax's lost spectacles had really been a triumph of defective-algebraical application. X was supposed to be the place where they had been placed, Y the spectacles, Z the unknown coefficients, N the known ones. From an examination of an equation compounded of the various symbols, the spectacles were ultimately discovered on the professor's nose.

"But this is serious, Milly," said Dr. Syntax. "Some people in this town have apparently been putting their heads together and have come to the conclusion that it is not right for a single girl, even an adopted daughter, to keep house for an old bachelor like me. It is a preposterous idea, but the force of public opinion is like the symbol X, always handed when it is not wanted and never translatable into precise terms until the final solution."

"Well, I have come to the same conclusion myself," said Milly calmly.

"What!" exclaimed Dr. Syntax. He had expected a scene, strife, war—and here was Milly calmly acquiescing in his decision. "But what are you going to do, my dear?" he continued. "I can't bear the thought of losing you!" "You needn't lose me," said Milly, with preternatural gravity, studying her plate. But even then there was a mischievous twinkle in her eyes. "This is very strange, my dear," said

Dr. Syntax. "You have accepted the public opinion as to the inadvisability of your remaining here as my housekeeper, and yet you say that I need not lose you. Logically, that implies that you could propose to remain here in some other capacity; and yet I fail to see what that could be, or how it could affect public opinion—"

"Which we have designated X," said Milly, raising her eyes to the professor's for one fleeting moment. And in that moment the professor felt strangely disconcerted, and yet strangely glad. Unconsciously he threw back his shoulders.

"Well, my dear, suppose the variants are Y and Z," he said. "Now we have an indeterminate equation. X equals Y or Z multiplied by the unknown factor, which shall be N."

"Why not make it U?" asked Milly. "Make it U, Milly? The letter U is never used in mathematics except when the other letters of the alphabet have been almost exhausted."

"I should really prefer you to make it U," persisted Milly.

"Very well. U it shall be, then," said the professor.

"Oh, I'm afraid that would never do," Milly. But, seeing that the professor was only staring at her in perplexity, she resigned herself. "Very well! Go on," she said.

"It is obvious, then, that X equals YU or ZU," said Doctor Syntax, warning to his task.

"YU, I think," said Milly gravely.

"In that case," said the professor, X, the unknown factor, equals Y divided by U. Now, algebra helps us no more unless we can state U in positive terms. Now let E be the possibility of your remaining here in the capacity of—secretary, let us say, and F the possibility of becoming—let us say my stenographer. Then U equals—"

"YF," said Milly triumphantly.

"Eh?" asked Doctor Syntax. "No, my dear, it couldn't equal YF, because—"

"Then I shall go," said Milly, rising from her chair, and the professor was amazed to hear a strangled sob.

"Now, Milly," he said gravely, "really you women are very illogical. YF is impossible. Stop! Listen to me, Milly, before you go out of that door. I—er—"

Suddenly an amazing thought came into the professor's head. It was not an algebraical thought at all. And Milly, seeing the reflection of it upon the professor's face, halted, with her hand on the doorknob.

Doctor Syntax sprang toward her and clasped her in his arms. "Milly!" he cried. "I've—I've—I've found my spectacles!"

SOME WITTY WEDDING TEXTS

Have Humor, Though None Can Rightly Deny Their Appropriateness to the Occasions.

Parson Turell, of Medford, who, to the reputed disappointment of many languishing maidens and aspiring mothers of his own parish, selected his wife, a very beautiful brunette, in another town, caused a stir of interest less devotional than human, when, leaving the lovely stranger seated, shy, but conspicuous, in the ministerial pew, he ascended the high pulpit and gave out in rotund and challenging tones the text:

"I am black but comely, O ye daughters of Jerusalem!"

Another worthy pastor chose a text the application of which was not to his bride, but to himself. He was a small, elderly, rather wizened little man, already twice a widower; and it was common knowledge that he had recently proposed to, and been rejected by two of the prettiest and best dowered girls in the village. Undismayed by their rebuffs, he had sought further afield, and had finally been accepted by a widow, fair, fat, much more than forty, and far wealthier than anyone in his parish. His text was:

"Cast not away therefore your confidence, which hath great recompense of reward."

Perhaps the most amusingly apt of all recorded wedding texts was that selected by Abby Smith, the high-spirited daughter of Parson Smith, for him to preach from on the occasion of her marriage. She had married John Adams, in spite of the most vigorous-paternal remonstrances; in fact, her reverend parent had been extremely rude to the young man, even after the affair was settled, and would not permit him to be invited to a meal in his house. Abby's choice, which speaks more for her wit than her devoutness, was:

"John . . . came, neither eating bread nor drinking wine; and ye say, he hath a devil."

How Loch Awe Was Formed. Highland tradition gives a quaint explanation of the creation of Loch Awe, that noble mirror of the mountains in the magnificent scenery of Argyllshire, Scotland. The bed of the loch was once, it is said, a fertile valley, with a fairy spring, which had always to be kept covered, bubbling from the mountain side. A careless girl, however, having drawn water, forgot to re-cover the well. All through the night the spring flowed and by the morning Loch Awe had come into being.

No one need regret the carelessness of that Highland lassie. Loch Awe is now one of the most exquisite of beauty spots in Great Britain—a charming sheet of water, studded with pretty islands, while around the shores are many places associated with interesting legends and historic incidents of the Highlands.

PLAINVIEW TEXAS

To the People of Northwest Texas

We take pleasure in announcing the Second Annual Exhibition of the

Panhandle State Fair

at Amarillo, Texas,

Friday, September 25th, to Thursday, October 1st.

The exhibition facilities of the Fair have been greatly enlarged this year, owing to the increased demand for space from every section of the Panhandle.

With the marvelous agricultural showing throughout our country this season, visitors may rest assured that the exhibition of products of the farm at the Fair will compare most favorably with that of any similar exhibition in the entire country.

In the Live Stock Divisions there will be nothing wanting, the entries promising a showing which would do credit to a live stock exhibition of national pretensions.

In the Poultry, Milling, Manufacturing, Garden, Kitchen and other departments the exhibits promise a revelation to all

THE RACING PROGRAM

Will include several fast events each day, many of the famed harness horses of the country having secured entry in the various races.

ALLMAN BROS. CARNIVAL CO.

The classiest carnival attraction in the United States, carrying 18 carloads of equipment and a Band of Thirty pieces, has been engaged for the entire Fair, thus assuring to Fair visitors the best of entertainment.

All Panhandle people, all Texas people, all the people of all the States are invited to the Fair. Come and enjoy a week's holiday. We promise you an enjoyable and profitable time at the Fair. Special Fair Rates on all Railroads. For any information address

Panhandle State Fair Association,

J. F. McGregor, Secy.,

Amarillo, Texas.

We use and have for sale the highest grades of electrical goods only.

Cheap, shoddy electric supplies are not only unsatisfactory but often dangerous. Buy your lamps and other electric devices from the Light Company and you'll be safe.

Canyon Power Company

"IN A BAD WAY"

Many a Canyon Reader will feel grateful for this information. If your back gives out; Becomes lame, weak or aching; If urinary troubles set in; Perhaps your kidneys are "in a bad way."

Doan's Kidney Pills are for weak kidneys. Local evidence proves their merit.

C. P. Shelnett, Canyon, Texas, says: "Doan's Kidney Pills proved beneficial in our family. I can heartily recommend Doan's Kidney Pills for trouble with the kidney secretions. You are at liberty to use my statement praising Doan's Kidney Pills as heretofore. Whenever I have used Doan's Kidney Pills the results have been satisfactory."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Shelnett had. Foster-Milburn Co., Props., Buffalo, N. Y.

Whenever You Need a General Tonic Take Grove's

The Old Standard Grove's Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

Cured of Indigestion.

Mrs. Sadie P. Clawson, Indiana, Pa., was bothered with indigestion. "My stomach pained me night and day," she writes. "I would feel bloated and have headache and belching after eating. I also suffered from constipation. My daughter had used Chamberlain's Tablets and they did her so much good that she gave me a few doses of them and insisted upon my trying them. They helped me as nothing else has done." For sale by all dealers.—Advertisement.

Happy Items.

Mr. Bateman has sold his restaurant business to W. H. Miller.

Miss Lola Estis of Waco came in last Saturday. She has spent her vacation at home and is back to begin her school duties.

Mrs. C. G. Innes and Miss Julia Mulkey are attending Institute at Tulia this week.

J. P. Glover is busy this week filling his three silos.

The Studden family and company, Mrs. Strong are spending the week end at the Canyons.

The young peoples class will hold a free melon social Wednesday night at the J. M. Evans home.

Mr. and Mrs. J. M. McNaughton and Mrs. E. A. Logan attended O.E. S. school of instruction at Tulia Tuesday and Wednesday.

Miss Gladys Neff left Monday to attend the Normal for the coming year.

Miss Howard Hagan went to Canyon Sunday to attend institute. She will teach at White Deer this fall.

E. P. Guenther returned Saturday from Dalhart where he conducted the teachers institute. An extended account of the institute was published in the Dalhart Texan in which were many praises for the work of Mr. Guenther.

A daughter was born to Mr. and Mrs. Will Myers Saturday.

Rev. and Mrs. A. B. Haynes are moving from their farm to the Presbyteaian manse.

The Baptist Baraca and Philathea classes will give an ice cream supper Monday, Sept. 14 on the west side of the square. The Canyon band, under the direction of Miss Wiggins, will make music. Normal students and everybody else are invited to come. The proceeds will be used for church purposes.

Cecil Reid left Sunday for Lamesa where she will teach school this year.

J. O. Sharp of Durant, Okla., has moved to the city and taken charge of the Reid boarding house near the Normal.

Mrs. B. T. Johnson attended the Wheeler county Baptist association Friday.

Miss Ruth Stafford left Monday for her school in Ft. Worth.

Catarrh Cannot Be Cured,

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly upon the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free. F. J. CHENEY & CO., Props., Toledo, O. Sold by Druggists, price 75c. Take Hall's Family Pills for constipation.
