#### Pledge Card Week,

During the week of Oct. 28 to Nov. 4, every home in this county will be visited by the County Food Administrator and his assistants for the purpose of enlisting all our people in the cause of saving all of the food which has hitherto been wasted or allowed to spoil. Our Food Administrator is a busy man this week making plans for the great drive beginning Monday morning, and his assistants will be thoroughly trained is conservation of that which has been by the opening of the campaign. Never Fails Please

Burns all the gasses in coal which in soft coal amounts to more than half the fuel and which are wasted up the chimney with the ordinary underdraft stove. The two top drafts discharge highly heated air into the combustion chamber with a rotary motion, which mixes it with the rising gases more thoroughly than ig possible with a single draft and these gasses are thus oxidized and burned. The stove has a larger positive radiating surface than any other stove of the same diameter. Its handsome appearance with door surfaces milled air tight are additional points in its favor and are not found in any other hot blast. Avoid so-called airtight stoves having side feed doors

Frightful stories of German autrocities have appauled the world, and the staggering awfulness is so incomprehensive that many of our people were fain to discount these stories as wild stories of yellow journalism. Now comes definite and authentic proof that all of these stories are true and even more frightful things have happened than has ever been circulated in this country. If the American men would stop and realize for one moment that only France and the Atlantic lies between the Prussian monster and their wives and mothers and daughters, the coffers of the United States would overflow with the deluge of money in this Liberty Loan eampaign, and there would be no need of preaching food conservation in almost unheeding ears.
