The bill creating the Texas Technological College in West Texas seems to be highly favored in both houses of the legislature, and no doubt will be passed and signed by the Governor. The bill as drawn seems to be acceptable to all in West Texas. The letter written by President J. A. Hill of the West Texas State Normal College probably had more to do in getting West Texas together on the proposed school than any other one thing. West Texas had been demanding a separate and distinct school; yet the bill as introduced called for only a branch of the A. & M. College, and to be named "West Texas College" which is too nearly the same name as the school in this city. The stand taken by President Hill has been highly commended by Sam Braswell, president of Panhandle-Plains Chamber of Commerce and editor of the Clarendon News. The following is from Mr. Braswell: "Pres. Hill of the West Texas State Normal at Canyon has something to say regarding the proposed bill creating the West Texas College as presented jointly by Senator Bledsoe and Rep. Chiffwood. Pres. Hill rightly contends that the name is too like the name of his Normal school. Pres. Hill is right, and much confusion would ensue. Pres. Hill is opposed to the new school coming under the control of the present board of the A. & M. Hill is right, and it would more nearly fit under the control of the state university than that of the A. & M. The better plan, however, is to create a new and individual board for the new school, as we have before observed."

Randall county farmers are urged not to send away for cotton seed before thoroughly investigating the car of seed that is being bought by the business men of Canyon to be sold at cost to the farmers. Good seed is more essential to our farmers just going into the cotton raising business than any other thing. It is more important than having a gin in the county. The seed that is being shipped here is guaranteed pure, and best adapted to this section. Several farmers have bought seed at a little lower price, but when the seed came by express or local freight, it cost more than the \$2.00 that seed may be bought from this car which is going to Canyon about the middle of March. Another great advantage will come next fall if all of the seed is uniform this spring; the farmers will be able to sell seed next year at a good price, while if there is a great mixture of varieties in the county this year, the seed cannot be used for planting next year to so good advantage, and the price of the seed will not be so good. If you are going into the cotton business this year, buy good seed.

Letting the state do it, is the common cry these days. The state is supposed to do any thing and everything, with the idea that it won't cost the people so much, or possibly nothing at all, if the state does the work. On the heels of the investigation of the Textbook Commission comes the proposal for Texas to establish a printing plant to print her own textbooks. The idea is absurd, but even the most absurd things sometimes are seriously considered. The state's printing establishment would mean another political job, more expenses to the people, less production for the money, and cheap shoddy books. The texts would be of little value, as they could be used alone in Texas, since all of the good texts are now under contract of the large publishers. The whole idea is exceedingly absurd.

A NATIONAL PARK FOR THE PANHANDLE
From the Prairie—
There is a move to make the Palo Duro Canyon into a national park. We who know our canyon feel that it has every claim to government recognition. It differs from most canyons in this respect: It is a break in the level

surface of the earth and is not dependent upon surrounding mountains for its scenery.

If color is wanted, it is there in abundance. The browns, yellows, grays, and reds of the walls, the various greens of the trees, the blue of the sky reflected in the sparkling water, and the emerald shadows that hover all is surpassed nowhere.

If beautiful bits of scenery are wanted, they may be found around every bend, in every nook and corner. Is there anything more beautiful than the "Devil's Kitchen," "The Park," "The Lighthouse," the various water falls, the rapids, the fern caves, and the trees?

If more delicate beauty is wanted, find the delicate ferns, the many-headed flowers, the tiny pebbles that glisten like jewels in the rock-bed, and the baby trees struggling for existence.

If music is wanted, the listening ear can hear it in the whisper of the leaves, the chatter of the brook, the thunder of falling water, the song of birds and "kay-dids," the call of the coyote, the reverberating echoes, and the chorus of all nature as she sings her praises to her maker.

If curious formations are looked for, our canyon has them equal to those of the "Garden of the Gods." Imagination made that spot famous. Let some one furnish the imagination and our canyon will furnish the curiosities.

If geological specimens are needed for interest, search for the fossils, the geodes, the many kinds of rocks, and the varying strata, etc.

If vastness is demanded, it is there. Begin with the mere break in the plains and trace its windings for miles and miles. You will find its width grows from feet to miles, its depth from a few feet to thousands of feet.

If grandeur is expected, look at the jagged chasms, the massive boulders, the perpendicular walls, and the noble trees.

If historical background is necessary, this region is rich in historical lore, and the canyon is full of Indian relics.

What else is needed to make this one of the points of interest to the whole nation?

Nature has a wonderful influence upon man. He sees its beauty, he hears its melody, he feels its strength, and it all becomes a part of him. If you really wish to get inspiration that you could never forget, visit the canyon at sunrise. See the delicate pastel coloring of the clouds just above the rim. Watch the mystic veil as it lifts from the face of the cliffs giving place to the golden sunshine. Listen to the chorus that greets the king of day. Drink your fill of the delicious morning air, and come home a conqueror.

The Palo Duro Canyon is one of God's beautiful gifts to man, and it is a pity for its potential powers for good to be lost upon the cattle that roam within its walls. Use all your influence to make this a National Park.—O. D. H.

Tony was an ignorant Polish laborer who in 1921 earned \$17 a week. By disobeying orders that he did not comprehend he lost three fingers in a machine. The compensation that the lay allowed him was \$12 a week for 150 weeks. Happily, however, New Jersey, where he lived, has a Rehabilitation Commission. It sent him to a trade school where he learned to be an acetone worker, and in spite of his handicap, he now earns \$42 a week. It is a good law that saves a man from the industrial scrap heap.

A traveler called at a Paris hotel, and enquired what the rates were: "Thirty francs for a room on the first floor, twenty francs for the second, and ten francs for the third," said the proprietor. The traveler thanked him and turned to go. "Doesn't that please you?" asked the hotel proprietor. "Yes, your prices are all right," said the traveler, "but your hotel isn't high enough."

DON'T TAKE A CHANCE
Canyon People Should Act in Time.
If you suffer from backache;
If you have headaches, dizzy spells;
If the kidney secretions are irregular
Don't Delay—likely your kidneys are sick.

Thousands recommend Doan's Kidney Pills.

And hundreds reside right in this locality.

Read the statement of this nearby resident:

John Clint, 1001 N. Grant St., Amarillo, Tex., says: "I had kidney trouble and there were symptoms of gravel. My back was sore and lame through the small part and when I bent, a pain shot through my back and shoulders and I became dizzy. My kidneys didn't act right. A friend advised me to try Doan's Kidney Pills, so I took two boxes. Doan's cured me, but I still use a few to keep me in good shape."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Clint had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

PALO DURO—A WONDERLAND IN TEXAS

(Below is to be found the prize winning essay written by Miss Hazel Kelly, a member of the Freshman English class, on the Palo Duro Canyon. The prize was offered by Prof. T. A. Fritts, teacher of the class, and about thirty students took part in the contest).

A sudden opening in the earth after miles of flat, treeless plains; a gorgeous, glittering, laughing waterfall booming over high crags and falling to the bottom of the rock-embedded streams, then gliding softly away down the canyons amid jutting boulders, and tall swaying trees with birds carolling from their tops; caves, secret springs, wooded groves, in fact, nearly everything that gives beauty and pleasure to the world, has nature lavished upon the people of Texas in the form of Palo Duro Canyon.

And now the question arises, why not make this garden spot a place where all people may come and enjoy their vacations, by making it a state, or even a national park? Surely Texas needs one, for there are thousands of people who, each year go to other state parks and play-grounds. Why not utilize our own gifts of nature, and not only make a park for Texas but the other states to enjoy as well? Palo Duro would make an ideal state park

PHONE THE NEWS.
The Randall County News is very anxious to get all of the news of Randall county. Much valuable news is liable to escape if you do not assist us a little.

We will appreciate it very much if you will phone us all of the news during 1923. This would mean a better newspaper and a more valuable newspaper for Canyon and Randall County.

because of its size, location, and beauty. Under these main topics are many sub-topics which will be brought out later.

The size of a park is a very important factor, for without plenty of room in which to participate in sports and have adequate lodgings, no joy is derived from the outing. Palo Duro has the room. There are many places where good swimming pools, tennis courts, croquet grounds, and bridle-paths may be constructed. Even a zoo could be established, for surely there is enough natural background for any wild animal. The lodging for visitors could be well taken care of as there are many desirable locations for cottages and tents.

The location of the canyon could not be better. For worn nerves, and tired hearts, there is a message of peace and comfort in the gentle breezes, and in the whisperings of the trees. For young and boyant hearts, seeking life and joy, there is an air of adventure and newness in the high, craggy cliffs and deep dark caves. The good qualities of its location may be summarized in the following lines:

Out where the sunshine's a little warmer,
Out where the birds sing a wee bit stronger,
Where the air is pure, and men live longer,
That's where Palo Duro begins.

Every park should be beautiful, no matter whether it is a man-made park or a nature-made one, it must be beautiful in order to fulfill its purpose. Palo Duro is beautiful. No one can deny that. With its luxuriant foliage, sparkling waters, wild flowers, and many geological wonders, it far surpasses any man-made park in this country. "True beauty is the soul's delight." Surely then many a tired soul, harrowed by the strife and confusion of the city will seek and find delight in the beauty of Palo Duro. Let us, then, all unite in making this wonderland into a park of rest and play for the people of this country.

Facts About Child-Birth

An eminent physician has shown to thousands of expectant mothers just how to be free from dread, and from much of the suffering which many mothers experience for months, right up to the moment when the little one arrives!

Mrs. Wm. Washington, 107 Louise Ave., Nashville, Tenn., says: "There is positively no woman on earth that would be without 'Mother's Friend' during expectancy if she only knew the value of comfort."

"Mother's Friend" is externally applied to the region of the abdomen, back and hips. It relieves the tension on nerves and ligaments as month follows month. Finally, it makes child-birth a joy instead of a painful dread.

Use "Mother's Friend" as our mothers and grandmothers did. Don't wait, start today, and meanwhile write to Bradford Regulator Co., 2A-47, Atlanta, Ga., for a free wonderful book containing information every expectant mother should have. Get a bottle of "Mother's Friend" today. It is sold by all druggists—everywhere.

STOP THAT WASTE

By Dr. Frank Crane

The other day the postmaster at Chicago had placards put on the motor vehicles operating in the Postal Service reading as follows:

"Stop This Waste, 25,000,000 pieces of mail annually are delayed or not delivered at all because they are incorrectly addressed or improperly packed."

The postal authorities call our attention to the fact that there are 25,000,000 pieces of mail that they must handle three to seven times oftener than they would have to handle them if they had been properly prepared. And even after they have exhausted every means of identification and salvage they succeed in delivering only slightly more than one-fifth of that amount.

And this does not include vast quantities of circulars and newspapers which are not properly addressed, and which are destroyed because they can not be delivered.

In Chicago there is one building that is used as a storage place for mail of obvious value and for mail of first class which cannot be delivered. Twice a year the contents are auctioned off, because there is no way of finding the owners. In this building are bins of shoes, quantities of clothing, dress goods, automobile parts and tires, sporting goods, suit cases—everything from a bird cage to a mouse trap. These are lost to both the one who sent them and the one who should receive them because somebody was careless in tying a knot, or used flimsy wrapping paper, or put on a defective address.

Nearly 300 employees are engaged in correcting the common, preventable errors of the people. The only reason the post office can stand this drain of carelessness upon its resources is that the people pay the bill.

There ought to be a general campaign of education with the object of impressing upon the people the importance of properly preparing and addressing anything they put in the mail box.

Another waste, caused by sheer thoughtlessness, arises from the custom of many business houses holding their mail until the close of the business day, when they release it to the postoffice in a perfect deluge. All day

cancelling machines, distributing cases and the other facilities for handling mail lie practically idle, and just after 5 p. m. they are taxed beyond their capacity. If people would simply change their mailing habits to the extent of depositing their mail even two hours earlier than they do at present, it would revolutionize the Postal Service.

This article is written in the hope that many people will adopt the idea of paying better attention to their mail matter.

After all, the postoffice is the great public servant, and it behooves every citizen of the country to make that servant as efficient as possible.

Much of the criticism leveled at the post office is due to the carelessness of the general public.

Normal College Sends Delegate To M. E. Conference

Elmer G. Marshall has been appointed by President Hill to represent this college at a meeting of the Methodist students of Texas next February 2-4 at Southwestern University, Georgetown, Texas. Miss Mary Moss Richardson will also attend this meeting.

Delegates from all the colleges of the state will convene to form an organization similar to the Baptist Student Union, which has been functioning successfully for several years. Mr. Marshall will represent not only the Methodist students of this institution, but also the "Y's" and the Life Service League, religious organizations of general purposes. The sending of a delegate was made possible by the support of the faculty and the Epworth League. It is interesting to note, as Miss Richardson suggests, that representatives of this college will arrive in Georgetown with the intention to cooperate, while about three days before our basketball team will arrive with the determination to overcome the team's work at Southwestern—all round representation, it seems.

From Georgetown Mr. Marshall will go to Runge, Texas, to visit his parents. He expects to spend a day at the University of Texas, and return by way of San Antonio.

Students Organize Press Club

On Friday afternoon, January 25, about twenty students of the West Texas State Normal College met in room 201 for the purpose of organizing a Press Club.

The need for such a club has long been felt in the school. The club is not only expected to aid in bettering the College publications, but will give instruction in journalism to students for the purpose of developing interest in that field. Modern weekly and daily newspaper methods will be studied, local and Amarillo plants visited, and practice work done in the writing of news stories, feature articles, editorials, etc.

Blackheaded Pimples Quit With S. S. S.

Why? Pimple-Poison Goes When Red-Blood-Cells Increase! S. S. S. Builds These Red-Blood-Cells.

You can be sure of this, nature has no substitute for red blood-cells. Pimple-poison can't live in the red rivers of your blood as long as there are enough rich red-blood-cells in it. More red-blood-cells!

That is what you need when you see pimples staring at you in the mirror. Black-headed pimples are worse! Eczema is worse yet! You can try everything under the sun—you'll find only one answer, more cell-power in your blood! The tremendous results, produced by an increase in red-blood-cells in one of the A. B. C.'s of medical science. Red-cells mean clear-pure rich blood. They mean clear, ruddy, lovable complexions. They mean nerve power, because all your nerves are fed by your blood. They mean freedom forever from pimples, from the blackhead pest, from boils, from eczema and skin eruptions, from rheumatism, impurities, from that tired, exhausted, run-down feeling. Red-blood-cells are the most important thing in the world to such of us. S. S. S. will build them for you. S. S. S. has been known since 1826, as one of the greatest blood-builders, blood-cleansers and system strengtheners ever produced. S. S. S. is sold at all drug stores in two sizes. The larger size bottle is the more economical.

GREATEST POULTRY SHOW IN COUNTY HELD IN CANYON FRIDAY-SATURDAY

The breeders who exhibited in the Randall County Poultry Show Friday and Saturday were extremely well pleased with the results of the show, both as to size and quality.

The show was easily one hundred percent greater than any previous show held in Canyon, and the competition was exceptionally keen. More than three hundred birds were in the show, while it was not expected that the number would exceed 200.

The winners of grand championships were C. F. Walker, grand champion male bird on his Black Langshan; Mrs. R. A. Campbell was awarded grand championship female on her Buff Orpington; J. C. Copeland of Hereford was awarded grand champion pen on his Rhode Island Reds.

The breeders exhibiting in the show got together Saturday morning and organized the Randall County Poultry Association, electing A. B. Haynes as president, Mrs. Geo. Bishop, vice president, and W. L. Browning secretary-treasurer. A yearly dues of \$1.00 will be charged to pay incidental expenses. Forty breeders joined the organization.

Dr. H. W. Duke of Amarillo was the judge, and complimented the breeders upon the fine showing made in the show and the spirit of cooperation for forming the poultry association.

The following were the awards of the judge:

The Royal Gorge of Texas

By Phebe K. Warner in Sunday's Star-Telegram.

This is the first day of the week set apart by the Palo Duro Park Association as educational week for the purpose of a real study of the Palo Duro Canyon of Texas as a most fitting location for a state park. The letters that have been received by different members of that association asking for information and literature on the canyon prove without a doubt the interest that the people are wanting to take in this new state project as soon as a way is opened for them to help with it. In answer to these letters a few facts might help different clubs and schools with their programs.

First of all some of you may be wondering what in Texas the Palo Duro Park Association is. It is just what its name implies. It is an ORGANIZATION, a real organization composed of men and women from all over the Panhandle of Texas to work for the realization of the Palo Duro Park. Until this year the people of the Panhandle have only TALKED for the park. From this week on they are going to WORK for the park. And to this end an association has been formed with Mr. Riggs of Amarillo as president and Miss Laura V. Hamner of Amarillo as chairman of education on all park plans. There is also an executive board and a board of directors in this association who are busy NOW planning ways and means to carry on the work of the park project. And this association means BUSINESS. They mean to DO something and to do it THIS YEAR that will get the Palo Duro Park on foot and prove to all the people of the State that there is a place in the Panhandle that is going to be used as a state park some day if not soon.

Some of you may still be wondering what the Palo Duro Canyon is, where it is and what it means. The Palo Duro Canyon is the Royal Gorge of Texas. It is located almost in the center of the Panhandle of Texas and its course divides the Panhandle into what is called the North Plains and the South Plains. Its name as explained by Col. Charles Goodnight, who was the first white man to build a home in the canyon and who is still living on the brink of this royal gorge, means, "Hard Pole" taken from the little hard brush in the canyon from which the Indians made most of their poles for all their structures. Therefore Palo Duro Canyon means Hard Pole Canyon. It sounded prettier before you heard the meaning, therefore forget it and think only of the beautiful term Palo Duro Park.

How can you reach it? That's the trouble. You can't reach it. If you could it would have been a state park long ago. When Mr. and Mrs. Charles Goodnight reached it 45 years ago last Fall they stopped on the cap rock, and took their wagons to pieces and loaded the pieces and the contents onto the mules and let them find their way down to the river. They turned the cattle loose to meander around and get down or fall down as it happened. It took them eight days to get their wagons and supplies down that first trail that a woman ever followed into the Palo Duro Canyon, where the first home in the Panhandle was built. Since then a few roads have been built up to add into the canyon but never has there been a road built through the canyon so that a traveler or tourist as most folks are these days, could start into the canyon and travel from one end to the other through its varying and wonderful beauty.

The canyon with all its tributaries touches at least a half dozen counties, including Potter, Randall, Armstrong, Swisher, Briscoe and Donley. The deepest and probably the most picturesque part of the canyon is to be found in Randall and Armstrong Counties, where it reaches for miles from wall to wall. In these counties it reaches

a depth of 1,500 feet and a width of from one to 15 miles. At the deepest point the canyon is about 10 miles across. Before the days of automobiles there were a few roads across the canyon but since the auto has come into universal use in the Panhandle people prefer to drive around in cars rather than driving across in wagons or buggies and the roads have been neglected until most of them are impassable now for anything except a horse or burro. No one but those who have lived along the canyon for 40 years can realize what a gulf it is and how it has divided the people in these adjoining counties. Not in spirit but in every activity of life. Why, most of us can get on the train and be in Fort Worth, 300 miles away, quicker than we can cross the canyon and get to our neighbor in the same county if he were to get sick or need our help. One good road through the Palo Duro Canyon would unite the Panhandle people as they have never been united and make one big family of the Panhandle folks. That alone would be worth the cost of the road. But the whole State needs the rest and recreation that the Palo Duro Park would make possible.

D. 1923, the same being the 26th day of February, A. D. 1923, then and there to answer a petition filed in said Court on the 24th day of January, A. D. 1923, in a suit, numbered on the docket of said Court as No. 961, wherein The First State Bank of Canyon, Texas, a Corporation, with J. M. Black as its President is Plaintiff, and Jas. J. Leavitt, Mary E. Leavitt, Mose Leavitt, Esther Morgan, Walter Leavitt, Dixie Louise Leavitt and each of their heirs and legal representatives and the unknown heirs of James M. Leavitt, deceased, are out side of the State of Texas and unknown to plaintiff, are Defendants, and said petition alleging:

March 16th, 1922. The Defendant Jas. J. Leavitt and James M. Leavitt, executed and delivered to the Plaintiff for a valuable consideration a note for the sum of six-thousand dollars payable to order of Plaintiff, at First State Bank of Canyon, Texas, in Randall County, Texas, due on September 1st, 1922, bearing ten per cent interest per annum from maturity until paid, and further providing as follows: "And if default is made in the payment of this note at maturity and it is placed in the hands of an attorney for collection, or suit is brought on the same, then an additional amount of ten per cent, on the principal and interest of this note shall be added to the same as collection fees," and the Plaintiff says that said note was not paid at maturity, but wholly made default, and the same was after default placed in the hands of B. Frank Bule an attorney for collection and suit, and the principal, interest and attorney's fees are now due, owing and unpaid, to the Plaintiff's damages in the sum of the Principal, interest an attorney's fees called for in said note.

Second. That in order to secure the payment of said note, the said Jas. J. Leavitt Defendant executed and delivered to Plaintiff, a chattel Mortgage on the following described personal property, to-wit:

Survey 199, Block, M-6, Original Grantee, Stone Kyle & Kyle, Certificate 242, Abst. 517, Acres 640.

Survey N½ 200, Block M-6, Original Grantee, Stone Kyle & Kyle, Certificate 242, Abst. 1261, Acres 320.

That James M. Leavitt died in Logan County, Illinois, since signing said note and was the owner of said land when he died, and the same passed to his heirs subject to his debts in Texas. And the said land is liable to the Plaintiff for the note herein sued upon, and the Plaintiff asks that an attachment issue attaching said land, that it may be brought under Jurisdiction of the court, and sold to satisfy the balance owing on the judgment in this cause after the sale of the said personal property and then applying the proceeds of said sale of the said personal property to the judgment of this court which may be rendered in this cause.

Plaintiff prays for personal judgment against the Defendant Jas. J. Leavitt for its debt principal interest Attorney's fees and for cost of suit and for a foreclosure of its chattel mortgage lien on all of said personal property and order of sale of the same and if not enough to satisfy said judgment

"All the hogs I own consisting of not less than fourteen brood sows, one male hog and twenty five pigs, all red hogs, all the mules, horses, mares and colts that I own and consisting of not less than twenty five head. All the farm machinery I own and described as follows: One 12-20 Heider Gas Tractor, One J. I. Case T. M. Co. grain separator, with all the attachments size 20 inch, One 5 Disc engine plow, Emerson Make, One 8 foot tandem Disc Harrow, Emerson Make, One Wheat Drill, 12-hole Superior, One twelve foot push header McCormick Make, Two Deering row binders, One 8 foot broad cast binder, Acme make. One two row John Deere go-devil, One farm wagon size 3 1-4 inch, B. F. Avery and Sons make, with box complete, One Stover feed mill with bundle grinder, with power attachment, One ensilage cutter, One Ford Truck, with Pneumatic tires, in good repair. All the sheep I own and consisting of not less than eleven head, all located on my farm in Randall County, Texas. Also 220 head of high grade Hereford Cattle, branded L, on right hip, subject to a prior debt of \$4925, with interest from May 1st, 1922, and Plaintiff says all this 220 head was sold by the Mortgagee Stockmans Cattle Loan Co., Kansas City Mo., and applied to the payment of said debt, except 45 head, which was left, and is subject to Plaintiff's mortgage and they are located in Randall County, Texas. That said Jas. J. Leavitt has no other property clear of indebtedness subject to execution known to Plaintiff. That at the time James M. Leavitt signed said note, he owned in Randall County, Texas, One and one half sections of land, described as follows:

Survey 199, Block, M-6, Original Grantee, Stone Kyle & Kyle, Certificate 242, Abst. 517, Acres 640.

Survey N½ 200, Block M-6, Original Grantee, Stone Kyle & Kyle, Certificate 242, Abst. 1261, Acres 320.

That James M. Leavitt died in Logan County, Illinois, since signing said note and was the owner of said land when he died, and the same passed to his heirs subject to his debts in Texas. And the said land is liable to the Plaintiff for the note herein sued upon, and the Plaintiff asks that an attachment issue attaching said land, that it may be brought under Jurisdiction of the court, and sold to satisfy the balance owing on the judgment in this cause after the sale of the said personal property and then applying the proceeds of said sale of the said personal property to the judgment of this court which may be rendered in this cause.

Plaintiff prays for personal judgment against the Defendant Jas. J. Leavitt for its debt principal interest Attorney's fees and for cost of suit and for a foreclosure of its chattel mortgage lien on all of said personal property and order of sale of the same and if not enough to satisfy said judgment

by applying the proceeds on the same, then that Plaintiff's attachment lien on said land be foreclosed and sold to satisfy the balance of said judgment, or a sufficient amount of said land be sold to satisfy the said judgment.

Herein fail not, and have before said Court, at its aforesaid next regular term, this writ with your return thereon, showing how you have executed the same.

Given under my hand and the Seal of said Court, at office in Canyon, Texas, this 24th day of January, A. D. 1923.

ETHEL WOODS, Clerk, District Court, Randall County, Texas.
 By R. C. Brown, Deputy.

A true copy I certify.

OLD INFORMATION IS MISINFORMATION

The World changes. Old governments are passing; new governments, territories and parties are in the forming. The old-fashioned, bound, stitched and glued encyclopaedia served its purpose in a past generation. A new age demands a new Encyclopaedia—a reference work that can keep pace, step by step, with the New World.

Nelson's Loose-Leaf Encyclopaedia, with its patented loose-leaf binding device, is the only Encyclopaedia, that can discard the old and out-of-date and substitute the new and living in its place. IT IS THE ONLY PRACTICAL PLAN FOR RELIABLE INFORMATION.

NELSON'S PERPETUAL-LOOSE-LEAF ENCYCLOPAEDIA AND RESEARCH BUREAU FOR SPECIAL INFORMATION

A few of the many reasons why you should own Nelson's

- It covers the whole field of knowledge—over a million topics—from the dawn of civilization to September, 1922.
- It is accurate, concise, authoritative—with over 1,600 contributors, each a specialist in the subject assigned to him.
- It is fully and beautifully illustrated—over 7,000 illustrations, colored plates and maps, photographs, reproductions of famous paintings and line drawings.
- Its Editorial and Advisory Boards include the finest minds of the world—men at the very head of the various fields which they represent.
- It is always new—kept constantly down-to-date by the issue, every six months, of 250 or more new pages, old out-of-date facts and figures being eliminated and new ones supplied to take their place.
- It is supplemented by a Research Service Bureau which will supply, free of cost, any additional material which you may desire.
- It is an authority, used by government departments, libraries, schools, and educational institutions, throughout the country.
- It is, like history itself, by means of the patented loose-leaf binding device, continually in the making—always complete, but never completed.
- It saves you the expense of buying a new Encyclopaedia every five or six years. It is a complete Reference Library and equal to a College Education.
- It is American, made in America, for Americans. Librarians everywhere, when asked where to find the latest and most accurate information, answer

It's always new LOOK IT UP IN NELSON'S—Cannot grow old

Panhandle Champs To Be Decided on Feb. 9 and 10

The champion high school basketball team of this district of the Inter-scholastic League will be decided in the Normal College gymnasium on February 9 and 10.

Eight high school teams will represent as many sections of the district at the meet. Canyon and Amarillo High Schools have already won the championship of their respective sections and will be contestants at the meet. The other section winners will be decided by the end of this week. The champions at the Canyon meet will represent twenty-four Panhandle counties at the State meet at Austin.

PANHANDLE STOCK CONTEST TO BE HELD AT CANYON

At the Panhandle district stock judging contest to be held at Canyon on Feb. 16, Prof. J. W. Ridgeway, educational director for the Associated Creameries of Texas, has been chosen as judge of dairy cattle. He will also deliver a lecture on "The Dairy Industry in Texas" at the banquet which is to be given by the business men for the visitors.

The contest is to be held at the West Texas State Normal College and more than 100 of the most progressive farmers of West Texas, as well as the agriculture teachers and students of this section who will participate in the contest are expected to attend.

1. Each school shall be represented by three boys who are studying vocational agriculture. Two additional boys may be run through the contest for practice work only, and the teacher shall designate the three that he is entering in the contest separate from these two additional boys.
2. Each student shall be graded fifty points for his placing of the animals and fifty points for oral reasons given before the judge.
3. On each class of livestock eighteen minutes will be allowed the boy to make his observations and record his placings and take such notes as will assist him in remembering the classes when he appears before the judge. No boy shall be allowed to hold any paper or card, however, when he appears before the judge except his placings card.
4. Each boy shall appear before the judge and be allowed not over two minutes to give oral reasons for placing each class of animals.
5. Each class of livestock, unless otherwise agreed upon by all coaches present at the contest, shall consist of four animals, and they shall be numbered, ONE, TWO, THREE and FOUR.
6. The agriculture teachers of the different schools, together with the judges, shall select and arrange for the appearance of all livestock to be used in the contest.
7. The school having three boys whose total score, counting placings and reasons, is the highest number of points will be given a silver trophy, which is to be kept for one year. The school winning this trophy three times will retain it permanently.
8. At nine o'clock Friday, February 16, the boys will assemble in the auditorium of the West Texas State Normal College building and will be divided into two different sections. No

two boys from the same school will be in the same section.

9. Other details of the contest will be explained at the Friday morning meeting.

MAKING MONEY

If there are any persons in the United States whose views on making money should be received with respect, they are Mr. John D. Rockefeller and Mr. Henry Ford. Both men have made extraordinary fortunes, and, as it happens, both men are generously willing to advise their fellow countrymen who are ambitious to follow in their footsteps.

Unfortunately for their eager disciples, they disagree about one of the fundamental processes of money-making. For many years Mr. Rockefeller has been preaching to all who would listen the necessity of the most careful thrift. "Save the pennies," is his watchword. From boyhood he was careful to save his own pennies; and see how many dollars he has now! He would admit, if pressed, that you must do something else with your pennies beside saving them,—invest them, for example in some sound and profitable enterprise,—but he has been diligent in creating the impression that thrift is at the bottom of all money-getting. Thrift alone will not make you rich, but will certainly keep you from being poor, and without thrift there is but a slim chance of your making a fortune.

Mr. Ford is the child of a younger generation. He doesn't think much of penny saving. "It's a good way to keep a young man poor," he says. "Two kinds of people urge young men to save their money. Their parents want them to save it in order to hoard it, and the bankers want them to save it so they can speculate with it. To make money you must spend it; not throw it away, but spend it wisely." On education, we suppose, and on travel and on advertising and on this, that and the other way of getting real business experience and a knowledge of the things in which you deal.

The ideas of the two multimillionaires are characteristic of the period in which each made his fortune. The difference is one of emphasis. Mr. Rockefeller insists on the saving, though he knows that using wisely what you have saved is quite as important. Mr. Ford is voluble on the use of money, though he knows that most people will have no money to use unless they save it to begin with. As a matter of fact, advice of this sort is wasted on most people. Making a fortune is the result of certain inborn qualities or certain favorable opportunities—usually of both. A man in whom the acquisitive and speculative faculties are strongly marked, and who has cool, sound judgment to accompany them, will get comfortably rich without any help either from Mr. Rockefeller or from Mr. Ford. And a man who has not those faculties will never get far on the road to a fortune in spite of all the advice successful millionaires can give him.

Bulgaria has a labor army of conscripted workers. Every man between the ages of 20 and 50 is liable to obligatory labor. They argue that this is the only way that Bulgaria can get back on her feet economically and restore the value of her currency. No man, no matter what his rank and wealth, is excused from eight months' compulsory service. The law will apply to women soon.

Judge Ben Lindsey, head of the Juvenile Court of Denver says: "My experience, study and investigation of juvenile life has convinced me that parents need to be taught the fundamentals of child rearing. I firmly believe that not more than 20 per cent of parents are relatively, and comparatively, competent to raise children." The judge is directly and indirectly responsible for the enactment of 52 Colorado laws for the protection of women and children, not one of which has been repealed and 42 of which have been copied in other states.

Not a solitary dyed-in-the-wool fisherman or lover of the outdoors is ever found behind prison bars, according to the Rev. Preston Bradley, pastor of the People's pulpit in Chicago. "Bad men have no love for the out-of-doors!" he stated. "They can't stand it to be alone with themselves. Statistics will show that not one of the major criminals of today liked to fish or loved a dog."

A French military aviator has beaten all glider records by keeping in the air seven hours and three minutes in a regulation army airplane, with the propeller previously wedged to prevent its operation. The machine carried an extra weight of 500 pounds in addition to its gasoline, motor and oil supplies and was in no way modified for gliding.
