#### **VOLUME 44**

# Here In HICO

Tonight, as 22 young men and women glue their eyes on space and reach out for imitation sheepskins, they will probably be conscious only that their clothes hang awry or that Mama and Papa are out in the audience watch-ing them graduate. But there, in the high school auditorium, much more than sheepskins will be changing hands.

Is that the proper way to begin a school-closing, editorial? Here in Hico hopes it is not, for young men and women grow tired of the proper things of life; rather, they grow tired of the things that generations of even of the things that generations of custom-worshipers have dubbed proper.

Propriety is largely a matter of judgment until morality takes a hand. been told too many times that to be proper one must conform to ancient ways of doing things. And as any school teacher or guardian of the law will tell you, youngsters will not do things properly just because their grandparents have done them properly. They must have proof outside reunion. the realm of custom.

The age of puritanistic discipline is gone—if, indeed, it was ever here. In the seventeenth and eighteenth centuries a fellow with a rabbit's foot on the end of a long pole was com-missioned to awaken sleepers-at-the-church. "Thou shalt" and "Thou shalt not" were the watchwords of the fathers, and they did not stop to tell any reasons why.

History, much to the discomfiture of many self-named Puritans of 1929, proves that the settlers of Jamestown and Boston were not so righteous, after all. Historians who seek the truth rather than a smear of whitewash have uncovered enough scandal in Puritan neighborhoods to put today's improprieties to begging. Haw-

ance the evil. Children tired of too captains. much negative control are openly re- A date has not been set for the big

County Agent William Mienscher outlined a general plan for organizing bull circles in Hamilton county when he appeared before the local Lions Club last Friday afternoon. He suggested that a circle be composed of four blocks, each block to contain as many as 40 dairy cows. Each male would stay in a block for two years, giving him a total of eight years in the entire circle, as he alternates from block to block

BULL CIRCLE IDEA

GIVEN NEW LIFE BY

block to block. Mr. Mienscher told of results in a number of states where bull circles have been tried. The first generation increase in milk over a number of states amounted to 13.5 per cent, while the butterfat increase was 14.6 per cent. Later generation increases were even greater.

No meeting has yet been held by the Lions Club bull circle committee One thing the matter with the to take definite steps toward organi-young people today is that they have zation of one or more circles, due to zation of one or more circles, due to the absence from town of Harry Gleason, one of its members. A committee composed of E. H. Elkins, Fred Wolfe and A. A. Brown was appointed by President H. E. Mc-Cullough, to select a manager and to arrange dates for the annual fall

Twenty-three Lions were present at last week's meeting.

**Fats and Leans to Go** to Arms on Diamond New Director Takes

#### Buzz-z-z-z-z-z!

A score of Hico business men grab their hats. They leave their beds, their church pews, their customers. In less than a minute most of them are hanging onto the fire truckslosing time-risking the ruin of their clothes-dashing away to fight a fire that will not put a penny into their own pockets.

But there's going to be some more running-base running-before many days have passed. The fats and the leans are going to have a big ball day's improprieties to begging. Haw-thorne was not dealing in figures of speech when he wrote of Hester Prynne and "The Scarlet Letter." \* \*

Unlike the seventeenth and eigh-teenth centuries, this is a generation of openness. If evil is done openly and above-board, so is good done in quantities sufficient to counterbal-oreo the sufficient to counterbal-

ance the evil. Children the of too much negative control are openly re-be lious when once they harbored sullen hatreds that finally burst into consuming flames when the parental will practice at night, and the big boys claim that they will make short work of the tall fellows.

#### HICO, TEXAS, FRIDAY, MAY 24, 1929

## AUGUST 8-9-10 CHOSEN GAS LINES DELAYED AS DATES OF REUNION AGENT MIENSCHER Directions for Killing

Grasshoppers have already invaded many parts of the county, according to information reaching County Agent William Mienscher during the past few days. In order to cut damages by the insects to a minimum the fol-lowing formula is recommended by Mr. Mienscher:

Twenty-five pounds of wheat bran, one pound of white arsenic or Paris green, six lemons, two quarts of cane or sorghum molasses, two gallons of water.

Mix the wheat bran and poison thoroughly while dry. Dilute the mo-lasses with the amount of water named. Squeeze the lemon juice into this diluted molasses, then grind the rinds of the lemons with a meat chopper and add this also to the liquid. Now mix the liquid with the poison bran mixture. After an even mixture has been obtained, add more water and mix until a mash is obtained so that after being squeezed in the hand, it has been held. readily falls apart.

Grasshoppers feed in the morning, and as the bait loses its attractive-ness when dry, it should be applied Begin in Hico Jun so as to be as moist as possible at this time. This mixture should be put out before sun up; it should be scat-

tered as sowing seed. This mixture should be made exact-ly as directed, leaving out no part.

# Charge of Hico Band greatest spiritual awakenings in the

A band director, Mr. Calloway; of Hamilton, has been selected to lead the Hico musicians. The county seat man, who comes here each Monday, has been on the field two Mondays ing. He is a deeply consecrated man since his selection. tor states.

The new leader is said to be an accomplished musician, and has made an outstanding success as conductor of the Lions Club band at Hamilton. Coggin Avenue Baptist church of He gives private lessons during the day each Monday and then conducts known over the state as a reviva the entire organization in the evening. He will accompany the band members on any special trips they make.

The former meeting nights of the band were Tuesday and Thursday. Monday has replaced the Tuesday practice, but the players will con-tinue to practice without the regular leader each Thursday evening.

Grasshoppers Listed August 8, 9, and 10 are the dates selected by the reunion committee for Hico's forty-seventh annual celebration.

S. J. Cheek, who was selected to make the picnic an even greater success than it has been in previous years. He has already started working on concession, entertainment and other phases of the big event, and expects to have many additional at-tractions on the grounds when August 8 rolls around.

Mr. Cheek has had experience in handling the reunion here before, and was selected because he proved him-self capable of handling every feature of one of the biggest drawing cards in Central Texas.

Since the reunion is a civic undertaking, the Lions Club appointed a that he believed the field would eascommittee at it's last meeting to select a manager and set dates. This committee, composed of Earl Elkins, Fred Wolfe and A. A. Brown, will work with Mr. Cheek until the reunion

#### No Closed Season on **Squirrels After June**

Closed season on squirrels in Hamlton, Bosque and Hill counties will **Begin in Hico June 9** be a thing of the past after June 15, according to District Game Warden J. M. Adams of Carlton.

The state commission recently made a ruling that certain counties, where squirrels did much damage to grain and nut crops, were to be exempt from closed season. The three counties in Mr. Adams' district were included in

the group. The warden states that game law violations in his district have been at a minimum. Fishermen on both the Bosque and Leon rivers have reported good luck this season, he says. Hunters are promised good luck, too, when quail season opens in December, for the birds are to be found in large numbers in this district.

All teachers with the exception of Mr. few additional dollars will be raised Smith and Miss Turner were elected among local business men this week. to the same places they held this year.

ginning, looking toward one of the hurch's history. Dr. Roy S. Holloman, pastor of the College Avenue Baptist church, Bryan, a leader in Texas denominational

work, will preach during the meetand a great gospel preacher, the pas-

apron string was broken.

Now, a high school senior must be given a reason for doing the thing that is proper to be done. If not, he will do the thing that is proper in his own eyes. . . .

It is far from the purpose of this columnist to convince parents that they should turn their children loose to the guidance of their own minds; or to convince young people that they should not heed the experiences of their elders. But young people have minds of their own, however much some of the older generation would like to deny it; and the way to guide those minds is not to use only "Thou shalt nots" as reins. "Why?" is the ever-present question that leaps up in every growing mind, and if an answer is not given, the young man or the young woman will seek one.

If the graduate, then, goes off on a road to hell as he seeks an answer to his question, perhaps the parent or the teacher with so-called puritanistic ideas is to blame.

The commencement speaker who says high school graduation is the first big step in the developement of a young life is "all wet," in the parlance of 1929. The things learned before one is past the teens are more memorable than those learned after the so-called commencement is over.

Two boards nailed toremoving old fences, cleaning out gether lengthwise and at right angles like a common hog watering trough, with a carpenter's quarter round nailed into the angle is ed and dragged back and forth lengthwise over the ridge separating the two furrows. This reduces the sloping sides to a fine dust and at the same time forms a shallow depression at the apex of the ridge into which the coal tar is poured. By throwing the two furrows together the coal tar is poured. By throwing the two furrows together the coal tar barrier may be used alone as well as in combination.

## Mel-Roy Pleases With **Program** at Theatre

Mel-Roy will repeat his blindfolded drive through the streets of Hico Saturday afternoon at 3 o'clock. From the interest manifested by the large audience last night Mr. Elkins, the manager of the Palace

theatre, is looking forward to capacty houses tonight and tomorrow Mel Roy, "the man who tells of to-norrow," held his audience last night for over an hour with a wierd and most interesting program ever offer-

ed in this city of its kind. Mel-Roy lived up to his tion in demonstrating his psychic ability by answering many questions merely thought of by the audience, and during the course of his demonstration, never touches any thing handled by the audience and you

hold your own question. His ability to peer into the future and reveal events of general and personal matters cannot be question-

Mel-Roy, "the man who tells of tomorrow," claims that mental telepathy, or what is commonly known as mind-reading, is merely an advanced step in the principles of radio, and not only claims such, but will prove his unique claim at every performance

His demonstration is known as "Human radio attuned to a mysterous Unknown," whereby he grasps thought vibrations from the minds of members of the audience, interprets same and using as an aid to concentration, a genuine gazing crystal, in answering this mental query. A careful survey has proven conclusively that 90 per cent of his answers are correct, and his record for receiving vibrations is almost perfect. Mel-Roy was put to the test by many prominent people yesterday, some bringing their questions from home on their own stationery knew that no one knew what they had written, but Mel-Roy, without speaking a word read and answered the questions. Your questions never leave your hands and he warns you to guard them closely and not allow anyone to see or know what you wish to have advice or information

> You can bank on the quality of a cigarette that continues to be the biggest success in smoking history

# (CAMEL CIGARETTES

#### WHY CAMELS ARE THE BETTER CIGARETTE

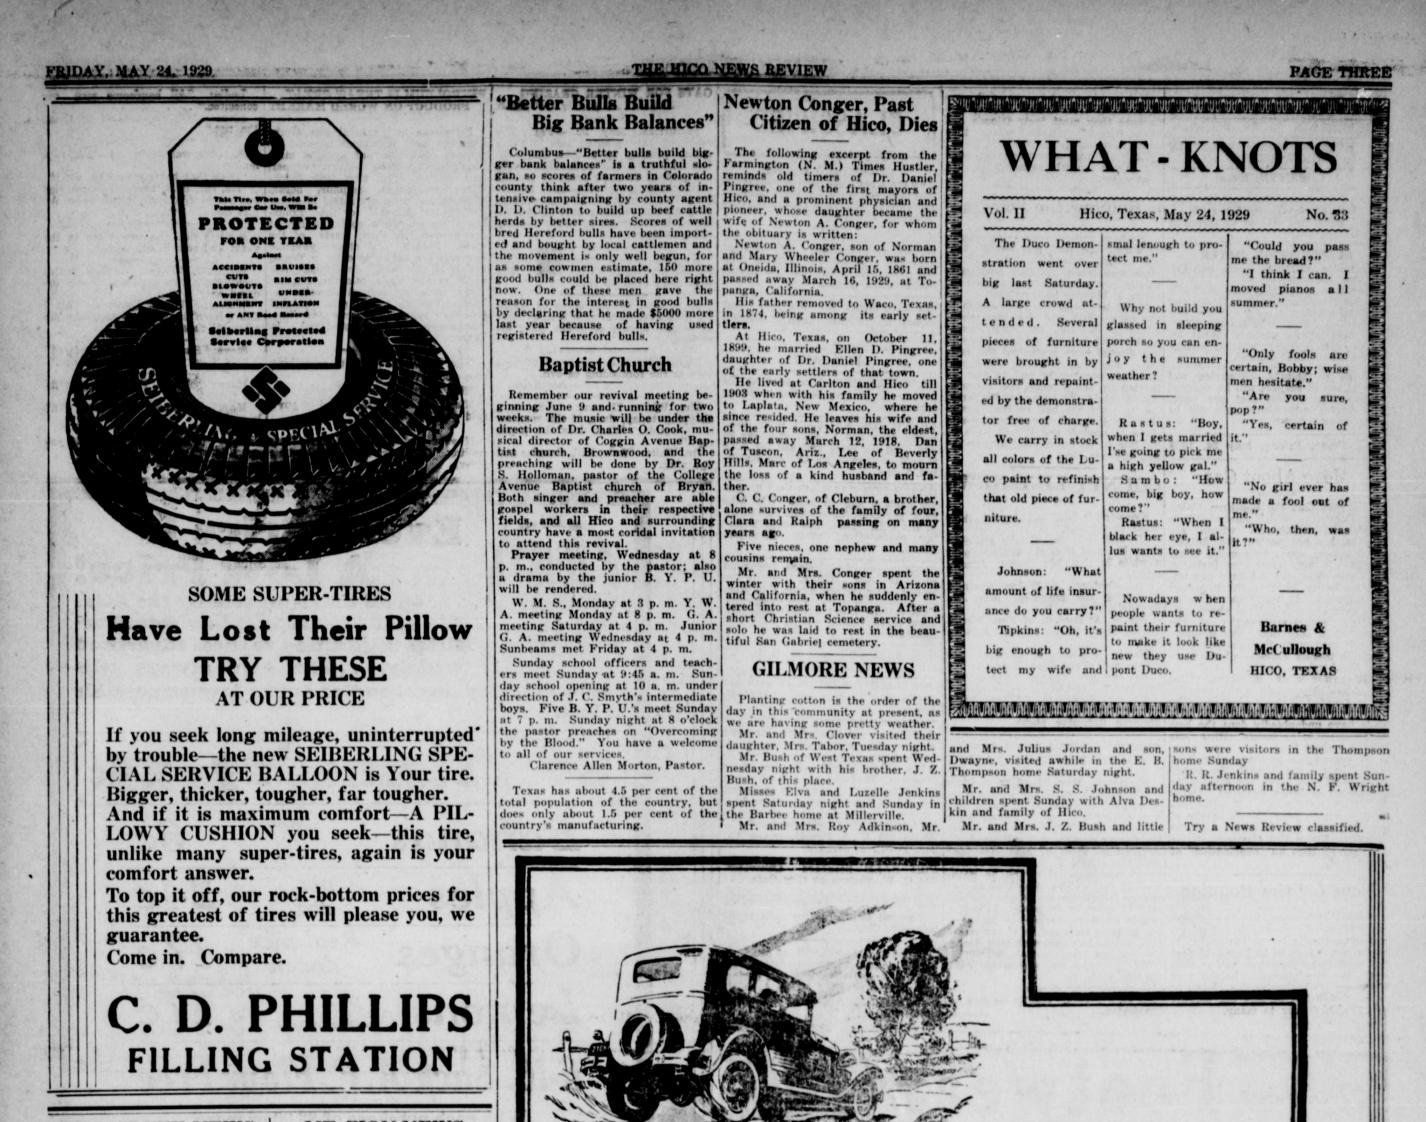

Camels contain the choicest tobaccos grown . . . expertly blended for matchless taste and fragrance.

They have a welcome mellowness and mildness that you will find in no other cigarette. Smoke them as often as you like, Camels never tire your taste.

The quality of Camels is never permitted to vary.

Only a superior cigarette could have won and held world leadership for all these years as Camel bas done.

#### HILL CREEK NEWS

# The crops are looking fine. We are expecting harvest pretty soon for

the grain is getting ripe fast. We had a large crowd at prayer

meeting Sunday night. A few of the Hill Creek people at-tended the singing at Valley View Walnut Springs Sunday.

Sunday. There was a nice party at the Bus-

ter Glenn home Saturday night. All Sunday. enjoyed it. Many games were played. Mrs. A. E. Hosenquist and Mrs. Mingus and daughter, Frances, spent Monday with Mrs. J. C. Royal,

Everybody come and help out with the Sunday school and prayer meeting Sunday and Sunday night.

A nice crowd was present at the club meeting last Wednesday night.

We had a nice little program and a box supper, which everybody enjoyed.

Try a want ad in the News Re-view. It pays.

.......

Here's where a car leads a tough life

TO General Motors car is turned out of the factory until a I fleet of exact duplicates of that model has been found good by the engineers at General Motors' Proving Ground.

Such an advance model must prove itself from stem to stern. The tests involve speed, power, endurance, braking, riding comfort, handling ease; fuel, oil, and tire economy; body strength-every phase of car construction and performance. It's a tough life.

Such testing would be beyond the means or resources of an individual. 1268 acres of land at Milford, Michigan, are devoted to this outdoor laboratory where hills are steep and roads are vicious. Men who are among the world's best automotive engineers conduct the tests.

This tested performance is as much a part of a General Motors car as the chassis. You can't see it. You don't pay extra for it. But you know it as you give the car long use on the road.

# GENERAL MOTORS

#### "A car for every purse and purpose"

CHEVROLET. 7 models. \$525-\$725. A six in the price range of the four. Smooth, powerful 6-cylinder valve-in-head engine. Beautiful new Fisher Bodies. Also Light delivery chassis. Sedan delivery model, 11/2 ton chassis and 11/2 ton chassis with cab, both with four speeds torward

#### FRIDAY, MAY 24, 1929

(Continued from last week)

And I would growl. "Yes, by Joe, ev erything is drenched, even my papers." Two days later a southwest wind sprang up. The moment was at hand. To go raiding in a sailing ship and that sailing ship with the name of Irma painted on her bows-ab. It seemed more like a dream than like setting out on a real adventure. It seemed as though all the events of my life had been designed to converge to this one glorious point. Our one hundred-and-seventy-foot masts creaked. Our nine thousand square feet of sail bellowed before the wind. We sailed north under a full spread. CHAPTER III

Running the British Blockade Sails bellied and motor humming, we parted the waves and left a path of foam in our wake. On deck we devoted all our spare time to more dress rehearsals.

My boys took a particular relish in putting me through the "third degree." as you call it. One of them played the part of a British search officer.

"Now, Captain, what is the name of your ship?" he bellowed.

"She is the Irma, and as good a fullrigged ship as ever crossed the North sea.

"Have you any brothers and sisters, Captain?"

"Oh, yes, a lot of them. There are Olga, Ingaborg, and Oscar who live in Hatfjelddalen. Dagmar and Christian are seamen like myself. Lars runs a salmon cannery in British Columbia, Gustaf and Tor are lumbermen somewhere in America. And then we have another brother, Eric, whom we've lost track of."

While trying to make the narrow channel of Norderaue we hit a sand bank. The ship creaked and the masts trembled, but somehow we pushed across-further proof that the Scots of Glasgow still know how to turn out a sturdy clipper ship.

At ten o'clock we passed the Horns reef and continued along the Danish coast. At eight bells we hoped to reach the Skagerrak, and then turn her west to give the enemy the impression that we had come from a Scandinavian port. Shortly before daybreak, the wind shifted abruptly from southwest to due north. Against such a stiff breezee we could make little headway. On our right were the low rocky flords and reefs along the coast of Ringkjobing and Thisted. To the left were British mine fields. We didn't dare run into a Danish harbor for fear of being interned. So we must either turn back or take a chance on slipping through the mine fields. It is always possible to sail through a mine field-provided you sail under a lucky star with a guardian angel at the helm.

bird, fearing every minute that our sails and masts would go overboard. We lay on the yards and scanned the horizon with our glasses. Half-past eleven! We were in the midst of the blockade line. Where were the cruisers and destroyers? All we could hear was the whistling of the wind and the rushing of the water beneath our bows. All we could see, the blackness of the night. Twelve o'clock and still no sign of the enemy. Even our binnacle and compass lights were out, for any ray of light might betray us. By one o'clock we knew we had passed the last line.

The British, warned by the falling barometer, had taken their guard ships to shelter in the lee of the islands. There was nothing else for them to do in such a storm. Even if they saw a ship, it would be hopeless to try to board her. And if Beatty's fleet had kept to sea, there would have been grave danger of their running one another down. We couldn't help recalling the old saying that it is indeed an ill wind that blows no one any good.

I thought now that, under cover of darkness and with the aid of the storm, we might shorten our voyage to the Atlantic by cutting through the channel between the Orkney islands and the Shetlands. I was about to order the nelm changed, when the hurricane shifted abruptly from southwest to southeast. The change came so suddenly that the twisting winds nearly ripped our masts out by the roots. Somehow, that seemed to be a warning to us, a warning not to ge through that channel.

A sailor believes in signs. And something told me to take a more northerly course, nearer the Arctic Circle and the Faroes. Later, we learned that the German submarine Bremen had tried to pass through that channel and was never seen again. The channel had recently been mined. But for that sudden shift of the storm, we too would have shared the fate of the Bremen. With sails still full spread, we continued north, nearer and nearer the Polar zone. It grew bitterly cold. The waves dashed over us, and the water froze where it fell. Our timber cargo was so coated with ice that not a stick of lumber could be seen. The deck was like a skating rink, and the ship's bow one huge cake of ice. Everything froze, including the sails. The ropes became coat-

A SOLE SAVING

Institution

Music charms the SOUL,

"Hard aport! We'll risk it, boys." With a full spread of sail, we turned straight west.

Now, a tacking ship heels over. The more sail you carry the more she lays over, and the less water she draws, That was our chance. The mines were nearly always planted several feet under water, just out of sight. Perhaps we could slide right over them. Lifeboats were lowered, and every man adjusted his lifebelt. Before the But we all kept to the foreship. We were lower aft than fore, and if a mine went off it probably would be aft. But our luck held and we got through in safety.

Our sourse lay around the northern end of Scotland, along the usual shipping route from Norway to the Atlantic. To be sure, we could have hugged the Norwegian coast, but the blockade was even tighter there. That was the natural course for one of our she were headed off by Beatty, she could turn quickly into a neutral Norkeep to the middle of the North Sea, but with the idea that our one path breaker!" of safety lay right under John Bull's land and Scotland.

ade. The first lay across the North around with the new wind, and our Sea from the Scottish to the Danish hearts sang for joy. Each day we coast. We must run this one first.

ometer fell. Anyone on the North Sea re-entered the Atlantic. Axes and on the twenty-third of December, 1916, will remember the hurricane that came. It was one of the worst storms now that we were getting warm of years. The wind was cyclonic in force, and lashed the shallow North and out of the Arctic-and now to Sea into a cauldron. Running before it we carried every foot of sail we dared, every stitch except the royals and gallantsails and smaller staysails. they call it a blockade!" We could take chances.

We sped right through the first line of the blockade without sighting a ship and as though the whole North Sea were ours. Instead of going up, the barometer continued to fall. Loud-er roared the storm, and more and more mountainous became the waves. We passed the second line of the blockade. Still not a ship in sight. Midnight grew near, and still that wild heaven sent hurricane kept up. We can before it like a frightened

the blocks. We tried to thaw them with oxygen flame, but they froze again the moment the flame was removed. Unable to change the sails, we were helpless.

To turn on the motor would only make matters worse, because that would carry us toward the Pole all the faster. We knew that unless the hand of God intervened within a few days we would be hopelessly caught in the Polar pack and probably never heard of again. So long as the wind blew from the south, we were sure to continue on north. We were in the region of eternal night now, except for a few minutes each day. The sun rose at eleven and set at half-past eleven. If we continued this crazy, frozen voyage to the Nor pole we would be smashed in the ice, y Joe. Christmas eve came, and we prayed mast, the sailors; aft, the captain. God to send us the one Christmas present, the only one that could save usa north wind to blow us south. My men in the hold, my fighting crew, huddled together to keep from freezing. They were prisoners, for the

waves and spray had swept over everything until our secret hatches were frozen as solid as concrete. My false Norsemen on deck slid about on the icy planks, and every man suffered from frostbite. No one tried to turn in to sleep. The tension on our raiding armored cruisers to take, so, if nerves was too great. Only one thing was warm and steaming-the kettle of grog. You landsmen have no idea of 1 wegian port and accept internment what grog means to a sailor under rather than capture. We didn't even such conditions. No wonder seamen call a glass of schnapps "an ice-

As suddenly as it had come, the nose, we followed the coast of Eng south wind died down and a breeze There were three lines of the block- sprang up in the north. Our frozen ship creaked, laid over, and came seemed to thaw out a bit more. Soon The wind grew stronger. The bar- we passed to the east of Iceland and picks were busy chipping away the ice. It was hard work, but who cared again? We were through the blockade test the "Freedom of the Seas" and give the allies a touch of high life. "By Joe," I said to my boys, "and

You would have thought the fellow in the lookout was answering me. "Steamer aboy," he sang out. What? A steamer in these parts? I climbed aloft with my glasses. Sure enough, there was a British ar-mored cruiser steaming toward us at full speed. She had the signal flying: "Stand by or we fire!"

Such bad luck after such good luck ! Sis second Christmas present was not so smusing. But now for our

with an officer coming aboard, they were standing as stiffly as if at attention. "Take the line, by Joe. Give a hand,

by Joe. Don't stand there like wooden men, by Joe." Then, too, it would sound natural to

hear a Norwegian skipper swearing at his men. The search officer clambered aboard,

"Merry Christmas, Captain." "Merry Christmas, Mister Officer," replied, using the kind of broken English I thought a Norwegian skipper would use. I talk English with

an accent, luckily about the same brand you would near in a Scandinavian port. "But," I continued, "if you want to see what kind of Christmas we have had come along down to my cabin."

"A bit of a nasty blow this past week, eh. what!" agreed the officer, and from the look of your deck you've had more than your share of it. We went in behind the islands and waited for her to blow over."

"Yes, luckily for us," I thought to myself.

"I must see your papers, captain." He got right down to business. Just then the gramophone struck up "Tipperary," and he began to whistle the tune while his men made for the galley. I ushered the two officers to the cabin. The one who stuck his head in first retreated holding his

"What a h-ll of a smell!" "Excuse me, Mister Officer, but my stove is out of order. I could not know you gentlemen were giving me

a visit today." "Oh, never mind, captain, that's all right, that's all right."

I had purposely hung my underwear up to dry so it would be in their way and so that, in stooping to get under it, they would see the name "Knudsen" embroidered on it. As the chief search officer crossed the cabin he suddenly saw my charming wife Josephine, with her blonde wig, her swollen jaw, and the rug blding her big feet.

"Oh, excuse me "That is my wife, Mister Officer. She has been having a bad go with the toothache."

He was chivalrous, just as most Englishmen are. He might have been talking to a court lady, instead of that rascal Schmidt.

"Sorry, madam, to intrude like this. but we must do our duty." "All right!" said my lovely but somewhat distorted better half in a high falsetto voice out of one corner

of her mouth. "By Joe, captain, you haven't much cabin left, have you? You have been through some rough weather!" "I wouldn't mind the regt. Histor

sed vigilance of the blockade had not thought of it. Here was the one detail that we had neglected to provide for in our elaborately detailed preparations. Even if I had been in the best of health, I should not have known what to reply. With that tobacco quid running around inside of my body I could only pray to God for help.

Again Leudemann saved the situation. He was a little fellow and simple-hearted, but a great character. When bad times came, Leudemann was at his best.

"We didn't lie there for pleasure," he said in his dry way as he looked up at the big Englishman. "We had orders from our owner not to sail until we got word." "How so?"

"Haven't you been warned then about German cruisers?" "What's that?"

"Haven't you heard about the Moewe and auxiliary cruiser, Seeadler?"

The search officer turned to me. "What about this that your mate is saying, captain?"

My stomach felt much better, now that Leudemann had spoken. So 1 thought I might as well give the Englishman a good dose.

"There were rumors at home in Norway that two cruisers and sixteen German submarines had put out of port."

The search officer's comrade, who had been looking around the cabin, came over to us when he heard all this.

"I think we had better be going." he spoke up suddenly.

"Yes," replied the other, and they went on deck.

They made no attempt at questioning the sailors or investigating the sailors' belongings.

"Your papers are all right, captain," said the search officer, "but you will have to wait here for an hour until you get a signal to proceed." "All right, Mister Officer."

One of my boys, who was of a pessimistic turn of mind, heard this. As he walked away from my cabin he said out loud to himself:

"Everything is lost."

Down below were the members of my other crew, waiting in the dark. They were right beneath the floor of the deck, straining their ears to catch any word that might give them an idea how things were going on deck. They heard the exclamation, "Every-thing is lost," and took it for the official word that we were discovered and for the command to do what was to be done in that case. They lit the fuses of the three bombs that were to blow up the ship, and waited for the hatchen, to be opened to let them
