WHAT HAS GONE BEFORE

Standing on a New York street corner, a young woman suddenly discovers that she does not know her own name nor how she got there. Everything in her past is a blank. She knows only that her man who lives at the hotel where she is registered as Eve Nobody of Nowhere, which she had written in French. Eric Hamilton calls in a nerve specialist, but Eve slips out of the hotel, goes to a little apartment house, where she meets a professional dancer who gets her a job in a cabaret.

As a cabaret hostess she meets many curious people. Then, one nize her comes in. She is afraid of him and runs tway, back to the hotel to Eric Hamilton. She has her hair dyed and changes her manner of dress, so that the stranger out of her old life will not recognize her. Then Hamilton persuades her to go through a marriage ceremony with him. As they return to the hotel the man she fears is waiting. Hamilton sends her up stairs and turns to the other man, who says his name is Samuel Henderson, of Chicago.

Henderson identifies Eve to Hamilton. She is Eve Carrington, a famous concert singer and Henterson was not only her manager but had hoped to marry her. She had collapsed after trying to save four children of a friend from an everturned rowboat in Lake Michigan, two of them drowning before her eyes, She had slipped away from the nurse on guard in Chiand completely vanished. .. "There never has been such a motor oil until now"

It's our business to know oils. And when we say that there never has been such a motor oil until now we mean exactly that. For the new Texaco Motor Oil is different from any oil you could ever buy before. It's longer-lasting! It's crack-proof!

And this is why it's different - There were some oils that were dewaxed. There were others that formed no hard carbon. A few others had an exceptionally enduring body. But no one oil had all the desired qualities. The new Texaco has them all! And because it is crack-proof it will not break down under the terrific heat and pressure developed by the modern high compression engine so as to form hard carbon. Naturally it lasts longer.

The new Texaco is manufactured in five grades: C, D, E, F, and G, corresponding in body to S. A. E. (Society of Automotive Engineers) viscosity ratings. The price is 30c a quart (35c for grade G). The correct grade for your car is ready for you. Drive up to any of our stations.
