You Just Think You Save Money

ORDERING JOB PRINTING FROM OUT-OF-TOWN!

Mr. Merchant, let's lay the cards "face up" and see what they reveal See, in other words, if patronizing out-of-town printing concerns means money to you.

Candidly, we say no, because for the simple reason the money you send out of town for printing supplies never comes back to Floydada and it has reduced the buying power of employes of the local newspaper. If the money you spend out-of-town was spent here instead, even if it might cost a few cents more, in a year's time you will have realized a dividend from the investment.

We don't care what you want printed we will do it—and give you a better job (nine times out of ten) than you will get from some of these throat cutting city print shops.

Furthermore, the money you could spend for printing, locally, would help carry on the schools, (to educate your children) as well as paying other taxes; it would help keep YOU IN BUSINESS!

Pointedly, Mr. Merchant, you do not like for your Floydada friends to go elsewhere and buy their drugs, hardware, groceries, furniture, dry goods, etc., and when they do you complain. What about the Printer—a Floydada business institution?

All we want is to serve you and help you succeed; you help us succeed, and then Floydada will be a much better town.

Let's forget what the out-of-town firms can do, and instead, let's all work for each other's cause. IT PAYS!

Investigate and seee if there is something in the printing line you need. Then call 187. We will be right there, and as for service, no out-of-town firm can compete.

HARVESTING and threshing is over in one, speedy.
thorough operation with the McCormick-Deering No. 11 Harvester-Thresher. This combine harvests and threshes 25 to 50 acres a day with surprising saving over

any other method of harvesting and threshing. Two men can easily operate the McCormick-Deering Harvester-Thresher one on the tractor and one on the platform where he has full control of the machine. Besides this saving in labor, twine bills and grocery bills are eliminated, and the women folks have no large crews to feed.

Grain buyers say they like the grain which comes from the McCormick-Deering because it is threshed clean, and is more uniform in grade and color than when cut with headers and threshed the old way.

The McCormick-Deering threshes soy beans, flax, and sorghums, as well as grains. Come in and ask us to go over its features with you. Also ask us about the windrow-harvester and pick-up attachment for McCormick-Deering Harvester-Threshers.
