First Hundred Steps the Hardest -

COMMISSIONERS COURT TO BE ASKED TO REVOKE ORDER DISCONTINUING HOME DEMON-STRATION AGENTS OFFICE IN COUNTY

of Floyd County this week, the repassed in a session of the Commissioners Court last week provides for the discontinuing of the home demonstration agent, effective October 1 of this year.

A meeting of some thirty or thirty five extension work enthusiasts was held in the district court room Saturday afternoon beginning at 2:30 o'clock. The session was presided year for the past three years: over by Mrs. C. A. Caffee of Antelope Home Demonstration Club. Those present included interested members of home demonstration clubs in Floyd County and Floydada women, members of various clubs and

introduced by Mrs. Caffee, chairman. Speeches made during the afternoon were of an optimistic nature, all speakers favoring the home demonstration office work and of the opinion that it should be retained in Floyd County. Although all speakers advocated the retaining of the office of the home demonstration agent in Floyd County, no feasible plan was presented for financing the work. Chiropractors to Hold Roy L. Haynes in his discussious during the afternoon suggested that the salaries of the Floyd County Commissioners be reduced and allow this saving to finance the home demonstration agents office.

Several petitions were given to various community residents, which are being circulated this week to obtain signature's of "any and all persons in sections of the county." Literature outlining the merits of the Dr. Pruitt will sponsor the local home demonstration agents's office clinic. is also being distributed. It is planned by the group in charge of the plans to present the petitions to the and an intepretation and prognosis Commissioners Court at the next of each case making an appointment, meeting which is September 12, and will be made, it is stated. ask that the home demonstration In the visiting party will be Dr. office be retained.

PRICES ARE GOING UP

dity prices has begun. That is what all the economic authorities have been saying must happen before prosperity can come back. Cotton is up, and silk went up so high and

With raw materials rising, it follows that the prices of goods manufactured from them must speedily rise, and that brings the matter right home to everybody in this town. Now is the time to buy.

It is believed by many that commodity prices are not going any lowple who have been waiting to make W. I. Norman and er. They have touched bottom. Peotheir purchases until they were sure that the bettom had been reached had better dig into their purses now and buy while the merchants' shelves are still stocked with low priced goods. They are not going to remain on the shelves very long, and the next lots which our local dealers buy are going to cost them more and will have to sell for more.

We have a distinct feeling that we have turned the corner on hard times. We find that all over the country almost everybody shares the same feeling. We all want prosperity back, and we want it back as quickly as we can get it. The quickest way to bring it back is for everybody goods or furniture, as it will today. and Verner, all of Floydada. Mrs. It will be many, many years, we to buy such bargains as are available all around us today.

The people who have been wis enough to kang on to their money during the depression are setting the One Of Three Robbert example for all the rest of us. They are buying in the stock market, they are buying in the grain market, they are buying in the wool market, they are buying in the cotton market, they are buying in the silk market. That means that "big money" has got over being afraid, and we think it is time for lesser people with little money to overcime their own timidity and begin to spend.

By buying now you speed the ra turn of prosperity.

Word "Daughter" Traced Understood by Apostle

Back to Sanscrit Root family words is daughter. In old tish loch. The root of the word is doch or duch; the "ter" signifies, the bishop of Ephesus in succession just as it does in pater and mater, to Timothy. Although generally

a doer of things. The word's history runs back through old English, German, Greek and Sanscrit to duhitar. The "h" in this last word is a peculiar one, for it was pronounced almost like the "ch" just mentioned. But duhitar does not mean just a female child. It means a milkmaid. Our early ancestors were a farming people, and when a girl baby arrived they said, "Here's another little milkmaid."

There are many other words of ancient lineage used every day. Mill is a word that, after countless strongly as ever. Beef, market, dome, car, day, night, queen, sit and stand-all these have pedigrees so long that they go back thousands of years beyond the oldest of the pyramids.-London Tit-Bits.

Genius as Understood by Old English Writer

By genius I would understand that power, or rather those powers of the mind, which are capable of penetrating into all things within our reach and knowledge, and of distinguishing their essential differences. These are no other than are both called by the collective name of genius, as they are of those gifts of nature which cerning each of which, many seem most romance writers to have the more, and so the word signifies, contemplation.-Henry Fielding.

Washington's Inventions

George Washington granted the first of the 1,800,000 American patents that have marked the inventive progress of the United States, according to H. H. Dyke of New York.

Mind's Relaxation Well

That the partridge, one of the most timid and least confiding of birds, may be tamed is shown by a story told of the Apostle St. John active in the prosecution of his Divine Master's business he was amusing himself by playing with a tamed and petted partridge, when a huntsman passed by. How could ford. Other officers elected for the so holy and privileged a man so waste the precious time? he queried. "What is that in your hand?" inquired the apostle. profession I am a hunter, and that is the bow I use with my arrows in the chase," he made reply. "But and unfit for use," said St. John. "Yes, it is unstrung," returned the sportsman, "for if it was always centuries of use, is still going as strung it would lose power and become useless. To be in good order, it must ever be unstrung, when not actually being used." "Just so," quietly remarked the wise old man, "and in like manner must the mind of man be released and unstrung sometimes if it is to be always fit for my Master's use." And as the huntsman thoughtfully pursued his way, St. John turned again to amuse himself, and rest his mind, by playing with his partridge.-

Hotels Long Centers of

Montreal Family Herald.

Public Life in America After the Revolution that made us a nation, the life of American cities was for more than a century and a quarter publicly centered and democratic institution called the ho-The club, an Eighteenth-century aristocratic outgrowth of exsmacking, therefore, of privilege, had to wait until the 1830s or so for serious revival. The hotelwhich succeeded the tavern-became every citizen's club.

In a little city there was one hotel, says a writer in the New York Times. Every visitor must come to it and every real live inhabitant must drop around to look the stranger over. In a bigger city there might be several hotels. But usually one hotel was the hub of community activity in any city.

From decade to decade it was apt to be a different hotel as progress, fashion and favor determined. Nevertheless, at any given period, when you said Boston or Baltimore or New Orleans, or, later, Chicago, St. Louis or San Francisco, the name of a particular hotel popped into the mind of every traveler or informed person.

Eskimo History

The Eskimos seldom are thought of today as a people who once dwelt in the interior, far from the sea. Yet that was their earlier history. They were, as archeological investigation seems to have established, part of the offshoot of the earlier migration from Asia; and they established themselves in the the past week end visiting in Floydwhere they dwelt, apparently for a John L. West.

considerable period. For some reason-whether be cause of pressure from more vigorous tribes to southward or because of an incurable nomadic instinctthe Eskimos began at last to push northward till they reached the verge of the Arctic. They spread over the coasts and the adjacent islands. Some of them filtered back over the straits into sub-Arctic Siberia. Others passed toward Greenland, where, nine centuries ago, they met the Norsemen .- Boston Post.

About Wheelbarrows

A barrow has only one wheel for various reasons, mainly because it is easier to push one wheel than two, there being less friction-or less resistance. A barrow requires no back wheels because the place of back wheels is taken when at rest by wooden legs, and when in motion by human legs. Likewise, it does not require two wheels in front for balancing purposes, as the legs keep it straight. Therefore, two wheels in front would simply make it more difficult to push and much more difficult to tip over. The single wheel is really a very clever

Revolutionary Hero Benjamin Stoddert, the secretary

of the navy, who also was secretary of war, dled at Bladensburg. Md., and was buried in the churchyard of the Addison chapel, Church of St. Matthew's, Prince George county, Maryland. He died December 18, 1813, aged sixty-two years. He had served in the Revolutionary war with the rank of major, but was so severely wounded at the battle of Brandywine that he was compelled to retire. He was born in Charles county, Maryland, and did a mercantile business at the ports of Bladensburg and Georgetown.

"Tools" Washington Used in His Surveying Work

The George Washington bicen-39-2tp ing Washington's period of activity were the chain and an instrument for measuring angles. For the first, Washington used what is called the Gunter chain. The instruments for measuring angles then in use were the plane table, circumferentor and theodolite. The first was of restricted use, being 44-tfe confined to small inclosures, and it is not likely that Washington used it to any extent, if at all. The theodolite then, as now, was elaborate and costly, and it is doubtful whether Washington ever had one, County Surveyor's office Dona although it would probably be necessary to go through his invoices carefully in order to determine the I bye cash buyer for 160 acre matter finally. It is known, however, that he did have a circumferentor, so that it is safe to consider that this was his chief, if not his only, instrument. He may have had a protractor and, of course, he possessed other necessary instruments for plotting, including com-26-tfc passes, scales, etc., but these were for outdoor instruments. His tripod is still at Mount Vernon.

38-1tph Battles Really Series

of Personal Combats

It was in the Twelfth century that the Japanese, who until that time were fighters only for defensive purposes, came under the sway of the military organizations. Feudal chiefs gathered bands around them to protect their fiefsand help them collect taxes from their subjects. An early Japanese battle resembled a gigantic fencing match. It was opened with a human sacrifice, usually a prisoner or a condemned criminal. Nobody advanced until notice of attack was given with a singing arrow.

These early warriors had an ultra-courteous way about them, says the Milwaukee Journal. Each marched out, singled out a foe and addressed him personally, proclaiming his name and titles and often adding his father's records.

Then the two went to it-like hundreds of others were doing around them.-Detroit News.

Historic Matches

Doctor Saugrain, a French physiian, who had settled in the Spanish garrison at St. Louis in 1800, made the matches that Lewis and er the depression"-See R. E. FRY. Clark carried on their expedition You can pay premiums monthly, to the West. In "The Conquest" it is stated that "he made matches for Lewis and Clark that were struck on the Columbia a generation before Boston or London made ise of the secret. With intense interest Captain Lewis stood by while the chemist-physician dipped sulphur-tipped splints of wood into phosphorus, and lo! his little matches glowed like Lucifer's own. 'You can make the sticks yourself,' he sald. 'I will seal the phosphor-YOU ARE HEREBY COMMAND- us in these small tin boxes for

Cost of Civil War

In the Civil war, according to Elson, "the expense to the government reached an average of nearly paper is published once each \$3,000,000 a day, and there was a public debt in August, 1865, of \$2,-845,000,000. These figures take no account of the separate expenditures of the state and cities, amounting to nearly \$500,000,000 nor of the expense to the South, nor of the incalculable destruction of property. To all this must be added the interest on the public debt and the pensions paid to the soldiers, to the widows, and the orphans. The total cost of the war no doubt exceeded \$10,000,000,000."

Muddled

The churchwarden was to be narried to a nurse from a local hospital, and it was decided by members of the congregation to give him some token of esteem. committee decided on a sum of money in a net-purse worked by the curate's wife.

The decision was announced at a church meeting by the curate, a nervous little man.

"My dear friends," he said, "It has-er-been decided-er-to present to our esteemed friend, Mr. L-, on the-er-occasion of-erhis marriage twenty-five poundsand a pet nurse!"-London Tit-

White House's Gold Piano

The gold plane in the East room of the White House cost \$15,000. A plate attached to the instrument bears the following inscription: "This plane was made for and presented to the United States government, Theodore Roosevelt being President, January, 1903, by Steinway and Sons. R. M. and J. H. Hunt, designers of the case. Decorations painted by Thomas W. Deming. Advisory committee, Edwin H. Biatchfield, Thomas W. Deming, Frederick Howes, Richard M. Hunt and J. Burr Tiffany,"

Economical Steam Enginee Engines operated by heating wa ter in one cylinder and cooled in the other to move pistons, invented in England, are asserted to be more economical than steam en-gines of equal power.

No Knowledge of First

English Poet Laureate There is no authentic record of the origin of the office of poet laureate of England; it is said to have been created during the reign of Edward IV (1461-1483), though earlier than this date, during the reign of Henry III (1216-1272), there was a king's poet who was paid 100 shillings a year. Goeffrey Chaucer, who lived from 1328 to 1400, assumed the title of poet laureate, and in 1389 received a royal grant of a yearly allowance of wine. But the first poet laureate in the modern sense was Edmund Spenser, who was granted a pension of £50 by Queen Elizabeth in 1591. Ben Jonson was the first to receive the office by formal letters-

The appellation is derived from a custom of the English universities, which continued until 1512, of presenting a laurel leaf to graduates in rhetoric and versification -the "King's Laureate" being a graduate rhetorician in the service of the king. It was formerly the duty of the poet laureate to write an ode on the birthday of the king, but this custom was discontinued in the reign of George III.

Maoris Firm in Belief

That "Tiki" Brings Luck Although the Maoris are becoming civilized to an extent where they can send intelligent representatives to the New Zealand parliament, they nevertheless cling religiously to the green-stone charm called "tiki," which they superstitiously believe will ward off all evil. The stone is of small value, so it is an easy matter for even the poorest to provide themselves

They usually cut it into grotesque figures, or heads, with eyes boldly open and the tongue sticking out in defiance, or derision, the idea being to frighten away anything that might be harmful. The women wear these charms on chains around their necks, and no native woman is considered fully dressed without this superstitious challenge to fear.

Like other South sea Islanders, the Maoris believe in the tapu, or tabu. They are taught not to touch the things that are forbidden, and if the tapu is broken the transgressor suffers great agony of mind. Some have died in agony after hearing that they had eaten some food that was forbidden.

World's Silver Output

All the silver mined in the world since man began to use the metal would make a cube only 115 feet on a side. This is no mean quantity, however, for it would pave an avenue 144 feet wide 6 inches deep for

It is estimated that the amount of silver mined in the world since 1492 is about 15,000,000,000 fine ounces, and of that amount, 40 per cent has been obtained in the last 30 years.

The May marriage season in Inin the movement of silver in the world. The metal is used in large quantities for bridal ornaments that become the "rainy day" fund of the family.

Stained With Royal Blood A unique carpet, stained with the blood of the murdered Russian czar. Paul I, has been added to the Museum of Applied Arts in Leipzig. In 1782, the carpet was presented by the French king, Louis XVI, to Paul of Russia, who was then crown prince. Paul succeeded his mother. Catherine the Great, to the throne in 1796. His short rule was marked by various oppressive measures taken against the Russian peasants. Thousands of free peasants were made serfs and given away to his favorite courtiers. A palace con-

Where Rhine Is "Lost" The mighty Rhine river, flowing through half of Europe, is camouflaged when it reaches Holland. The traveler need not ask, when in Holland, where is the Rhine? Not even the natives know.

spiracy put an end to his reign

and life. When he was assas-

sinated the carpet now acquired by

the Leipzig museum was drenched

with his blood.

The river branches into many outlets when it reaches Dutch soil, and each outlet has been given an individual name, the Dutch being careful to avoid the use of "Rhine." The Waal is part of the Rhine, uniting the Maas, which is known in its southern course as the Meuse, and then on its way to the North sea is neither the Rhine nor the Waal but the Maas.

Modern Gabriel's Horn British scientists have developed

a device which will multiply the sound of the human voice 8,000,000 times. One of the uses to which it will be put will be to warn, exhort or frighten British subjects who threaten to become unruly. Used from an airplane, it is easy to understand what this "thundering voice from the sky" would mean to the superstitious. Speaking in Arabic, it might pretend to come from Mohammed himself, in Chinese from Confucius, or in Hindu from

S. M. Cole Returned Tuesday From Down State, Reports "Showers"

S. M. Cole returned Tuesday night from Waco, Corsicana, Streetman and other points down state. Mr ole had been to Waco to carry Mrs ole and daughter Marilyn, who will ttend school there this year.

They left last Thursday and Mrs. ole and Marilyn will make their ome in Waco on account of the later's health.

"They sure had a nice shower own state, had about fifteen to ighteen inches in parts of the counry where I was", Mr. Cole said. Highways and lowlands were floodd near Streetman and many other owns further south are under vater", Mr. Cole stated.

"I had muddy roads all the way rom the paving on the return trip and it sure was hard driving."

Mrs. J. W. King, Grandmother of J. G. Deakins, Died Saturday at Snyder

Mrs. J. W. King, 66, grandmother of J. G. Deakins of this city, died Saturday of last week at her homat Snyder. Cancer of the breast wa said to have caused her death

Mr. Deakins and Mrs. Deakins of his city went to Snyder Saturday to be present for the funeral services which were held Sunday. Interment was made in the Snyder cemetery nmediately following the funeral

Mrs. King's survivors include Mrs. Mabel Deakins, of Snyder; John B. King, of Snyder; Bert King of Dallas; Guy King, of Detroit Michigan and the husband, J. W. King of Snyder.

Mr. and Mrs. Deakins returned Monday from Snyder.

Two New Members Elected to Fire Department Tuesday Night

The regular monthly business meet ng of the Floydada Fire Departnent was held Tuesday evening of this week at the City Hall. Two vacancies in the membership of the lepartment were filled.

Sam George and Dudley Hill were elected to take place of Dee Johnston and Lorraine Britton. An amendment was made to By-Laws which allows members to join the fire department at the age of eigheen, providing they have consent of arents or guardian.

Other minor business was discuss ed in addition to adding the mem bers to the department.

JUST WHAT ITS NAME IMPLIES, a trench silo is simply a trench dug into the ground into which chopped feed crops may be stored for feeding as succulent ensilage to dairy cows, beef cattle and work stock during periods of dry pastures or bad weather. Cheap, easily dug, easily filled, ensilage easily removed, the big disadvantage of a trench silo is excessive sporlage which may be avoided by proporly filling, and by providing drainage. More than 200 were dug Texas in 1931 and county agent reports indicate a big increase for 1932, especially in West Texas.

"With reference to the size of the

Lists Soybean and Alfalfa Varieties

Advice Given on Record and Performances.

Low soybean and alfalfa seed prices this year may result in more of these two crops being grown, according to R. D. Lewis, extension specialist in farm crops at the

Ohio State university. Because of the fine record and available locally, the variety Manchu should be preferred in 1932 for hay or grain production, he believes. There is a specially selected strain of Manchu here in Ohio that is superior to strains from other states. Peking, Virginia, and possibly Wilson are superior hay beans for southern Ohlo. Only soybean seed that has been tested recently for germination should be

Alfalfa seed prices also are very low in 1932 and in some cases may be obtained as reasonably as red clover. On suitable soils some of it may well be included in the regular hay mixture. Pure stands may be seeded at low costs where all nditions as to drainage and line forecast successful results.

For best performance and persistent stands, Lewis recomi the variegated alfalfas. Of these, the new Hardigan alfalfa from Michigan is superior. . Grimm is a close

Good Growth of Alfalfa

Depends on Many Things Careful planning is necessary to insure a good stand and growth of Many prospective fields have been unprofitable because they were not carefully selected and planned. Unsuitable fields, improperly prepared seedbeds, too thick and growthy nurse crops, and unadapted seed, are causes of failure that are most common.

Alfalfa requires a good loam soil that is well drained. Usually it does not do well on clay and most sand soils lack fertility to give it a good chance. A soil underlaid with gravel to provide natural drainage is desirable. It is useless to sow alfalfa on sour soils. If a soil tests acid it should be treated with limestone. Alfalfa feeds heavily on phosconform to the size of the herd that phorus and potassium, and as a crop of alfalfa is left for three or four is to be fed, but a shallow trench, years, it is essential that the soil be well supplied with these plant

In selecting seed, get clean seed free from weeds. The seed should have been produced in a climate as severe as where the crop is to be last minute purchases may be disappointing.-Prairie Farmer.

When Burning Trash

filled immediately, and then if the some extent, although most of the Such a litter weaned as soon a eggs and larvae are in the ground safely below the heat zone. It should be kept in mind, however, that burning off a heavy growth of grass or weeds under a galvanized barbed or woven wire fencing will generate heat enough to melt or blister the zinc galvanizing and materially shorten the life of fencing. If it seems necessary to happens that we get a variety that burn fence rows, it is advisable to rash, disk the fence row thoroughid and well braced, then restretch the fence tightly .- American Agriulturist.

> Alfalfa for Ewe Flock Alfalfa hay is a wonderful help to e stockman in winter, not only because of its nutritive quality, but on account of the mineral content, which prevents what is commonly known as "calcium deficiency" in the ration. This is an important natter with the ewe flock. They nay rob their bodies of lime in growing the lambs and, the first one nows, they are down and perhaps Correction of such troubles before they even start is the point of importance. Alfalfa or good clover hay, and turnips or other suitable roots, are the best winter nsurance for the flock.-Rural New

Agricultural Hints It pays to use good seed because it means larger yields of better quality crops.

A farm business without records is like a clock without hands. You cannot tell whether it is gaining or losing nor even where it stands at any time.

Karakul sheep, valuable in the fur trade, might well be raised by more farmers in this country, particularly in the Southwest, says the

Twenty principal crops in Illinois 1931, according to A. J. Surratt,

Calves Do Well on Dry Mixture

Calf Starter Lets Young Animals Feed Selves, and Saves Money.

If the boys feed the calves there s little to choose between three of the common calf feeds Charles H. Crawford, of the New tork State College of Agriculture, explained to performance made by soybean seed dairymen at farm and home week at Cornell. Skimmilk reconstituted skimmilk, and dry calf starter cost about the same for ingredients, but the labor required to feed calves with the different feeds, however, vary considerably.

Experiments in Ohio, he said, showed it took most labor to feed calves skimmilk, nearly as much labor for reconstituted skimmlik, but only half as many hours when dry calf starter was used.

Dry calf starter, he explained, is comparatively new feed made of feeds which are so balanced that young calves are able to thrive when the calves get whole milk only during the few weeks. In nearly three years of experiment at Cornell, calves weaned from milk when seven weeks old, that received dry starter until they were sixteen weeks old, have made a stendy gain from birth until six months of age. Eighteen Holstein calves fed the dry mixture made an average gain of 1.54 pounds a day from birth to six months old. Individual calves in this group gained as much as 1.84

pounds a day. The dry calf starter used at Cornell contains: 25 per cent yellow corn. 80 of rolled oats, -15 of wheat bran, 8 of linseed oil meal, and 22 per cent of dry skimmilk. Copies of the feeding schedules used in feeding the culves are available, free, on request to the department of animal husbandry at Cornell university, Ithaca, N. Y.

Hog Raisers Differ on

Early or Late Weaning Hog feeders are not unanimous in best age at which to wean young pigs, and it is evident that the differences coincide quite closely with the general feeding plan followed. Those who self-feed are usually definitely in favor of leaving the litters on the sows for at least eight, and sometimes ten weeks. Feeders who hand-feed, and particularly those who feed soaked feed are more apt than not to prefer to wean their pigs at an age of from four to six

Nor is the practice of early weangrown. Seed produced in mild cli- ing entirely a matter of following mates should not be used. The seed a custom of earlier days, for it is should be secured in advance, as a very common experience with hogmen who breed the more prolific breeds, that up to the age of four or five weeks a litter of twelve or fourteen pigs appears as thrifty as could be wished for, only to have Many farmers are tempted to them from that time on begin to burn the weeds and trash along slow up in growth, lose their baby their fences to destroy weed seeds blooms, and perhaps divide up into and the eggs and larvae of insect five or six husky ones while the rest pests. Such burning will help to seem to stop growing altogether. these symptoms first appear will usually come on far better than if left on the sow for another two or three weeks.

Test the Apples

When planting new varieties of apples in the orchard, it sometimes does not suit us. Instead of waittake down the fencing, burn the ing for the young tree to come into bearing to find this out, we save a see that the corner posts are few of the prunings from each young shrub and graft them by topworking onto a thrifty tree of bearing age. In this way I get a sample of the new apples in about 20 months, and if they do not suit me I grub out the young tree and

replace it with some other variety. This plan enables us to keep our orchard free of undesirable varieties, and is a big help in detecting trees which are not true to name. The grafting job can be done by any farmer after a little practice, and it has proven successful with us in all varieties of apples.-F. R. C., in Rural New-Yorker.

Walnuts Source of Income That black walnuts can be made to supplement the family income with but little expense or special equipment is pointed out by the United States Department of Agriculture. There is usually a good demand for well-prepared black walnut kernels. Care in gathering and husking the nuts and extracting the kernels, however, is necessary for the best results. Those who place this product on the market should Tealize the importance of offering only clean, sound nut kernels.

The Mortgage Debt

The farm mortgage debt in th United States is estimated at \$9,-241,000,000, January 1, 1930, which is a decline of 2.4 per cent from the United States bureau of animal in- peak of farm mortgage debt in 1928, according to the United States De partment of Agriculture. The farm mortgage total in 1920 was \$7,857,stelded a return of \$190,000,000 in 000,000. It is pointed out that substantial amounts of the decrease agricultural statistician. This is a since 1928 have been due to fore-decrease of \$76,000,000, or about 29 closure of morigaged farms and to per cent from the value of 1930 evaling down of loans as a condi-
