VOLUME NO. 3

Floydada, Floyd County, Texas, Thursday, September 15, 1932

NUMBER 40

HOME DEMONSTRATION OFFICE IN COUNTY TO BE DISCONTINUED OCTOBER FIRST, IS COMMISSIONERS DECREE IN MEETING THIS WEEK

Dispelling any thoughts in the minds of Floyd County tax payers that the expense of the office would be continued, the Floyd County Commissioners Court, in meeting Monday and Tuesday of this week, upheld their previous order discontinuing the home demonstration agent's office in the county.

The meeting Monday and Tuesday was a regular meeting of the court but open house was called to allow home demonstration work enthusiasts to present their pleas for the retention of the home demonstration agent's office in the county.

Many Present

More than 100 people including approximately fifty club women and interested taxpayers were present for the Monday afternoon joint meeting with the commissioners court. During the afternoon several prominent club women in the county presented their claims to the court.

Mrs. C. A. Caffee, county chairman, on behalf of the Floyd County Home Demonstration Council acted as chairman of the retainance group, introducing the club women's argument and other speakers.

Mrs. A. R. Hanna, member of the Sandhill home demonstration club gave the many advantages of the home demonstration work indicating that she believed it the wishes of Floyd County women to continue the work.

Mrs. W. E. Miller, also of Sandhill, and better known for her home industry of canning black eye peas, followed Mrs. Hanna, also asking that the extension work not be discontinued in the county.

Mrs. S. M. Lester, of Liberty, a prominent club woman in the county exhibited a home made hooked rug, as an example of the advantages derived from the home demonstration work.

Explains Court Move

Tony B. Maxey, County Attorney, preceding the discussions by the club women, read the Floyd County budget made up for the 1933 year, explaining that the court's motive in discontinuing the agent's office was attempt to balance the budget.

Mr. Maxey carefully explained in detail all items in the budget, which was recently compiled by the Rankin Audit Company and the commissioners court.

All of the club women appearing before the commissioners court explained that the purpose in advising the court was not in a nature of a "fight" against the actions of that body, but merely an attempt to retain a useful work in the county.

Dan Shipley, Floyd County pioneer rancher and farmer, came to the defense of the Commissioners court, commending the county body for their procedure in the reducing of expenses, which will necessarily reduce taxes. He further explained that he favored the home demonstration work in Floyd County but that the added expense of paying the home demonstration agent caused an increase in taxes, which was not, he believed, necessary.

Explained Recent Ruling

Judge L. G. Mathews, local attorney, representing the interests of the home demonstration club movement, read a recent legislation pertaining to the county budget. In his discussions Judge Mathews pointed out the moves to be taken by the county ruling body in the adopting of an annual budget. Mr. Mathews further indicated that he favored the home demonstration work and asked the court, if by any means possible, could do so, to revoke the order discontinuing the home demonstration agents office in the county.

Rev. G. W. Tubbs, acting in behalf of the Floyd County Taxpayers League, commended the commissioners court on their stand taken in the reduction of taxes and economy measures one of which was the order discontinuing the county home demonstration agents office.

Commissioner Zeb Reed also discussed the action taken by the commissioners court when the order was passed discontinuing the home demonstration work in the county.

District Agent Here

Miss Myrtle Murry, district home demonstration agent, was present for the joint meeting with the court and presented further reasons why, she felt, the order discontinuing the home demonstration work should be revoked.

\$1,000 Damage Done By Fire at Gibbs Residence Tuesday Night

Damage, estimated at \$1,000.00, was done by a fire at the home of Mr. and Mrs. Cecil Gibbs, Tuesday night at 11:20 o'clock. Approximately \$500 damage was done to the furniture and the same amount to the house.

The fire, the origin of which is unknown, was extinguished by the Floydada Fire Department by use of chemicals, after being called.

The entire interior of four rooms of the dwelling were heavily damaged and furniture was damaged. Mr. and Mrs. Gibbs home is at the lower end of West Kentucky street.

The loss was covered by insurance, \$2,000.00 being in effect on the house and \$1,000.00 on the furnishings.

Daylight Burgars Enter Residence, Steal Rings, Clothing and Money

Thieves entering the apartment occupied by Mr. and Mrs. J. W. Stevens, 320 South Second Street, Tuesday morning at 10 o'clock stole two rings, clothing and other articles valued at approximately \$150. The robbery was unusual in nature in that the act was committed in broad daylight.

Mrs. J. W. Stevens and Miss Kathleen Snodgrass, who were at home just before the robbery, were visiting with neighbors when the burglars ransacked the house. Mrs. C. Snodgrass occupies the south apartment of the house.

Mrs. Stevens and Miss Snodgrass were gone about twenty minutes and when they returned they found their home had been entered and many articles taken, among which were two dresses, two rings, a fountain pen, some of Engineer Steven's tools, other clothing and small articles. Some canned food was taken from the Snodgrass apartment.

The thieves apparently were in no great hurry as they proceeded to eat food that Mrs. Stevens was preparing for lunch. A grocerman making a delivery frightened the burglars from the house but they escaped with the valuables.

Mrs. Stevens and Miss Snodgrass notified local officers of the robbery but no clues leading to the arrest of the guilty parties have been obtained, by officers after investigations. A man who just before the burglary came to the house asking for work or money, was apprehended and questioned concerning the robbery.

Miss Murray indicated that it would be satisfactory with the home demonstration department, which she represented, to take script in payment for the agents salary. Miss Murray asked that if the permanent order was not revoked, that the court allow the extension work to go on under the agent's supervision until January first.

Bob Bennett, of Lockney, appeared following Miss Murray, in behalf of taxpayers in general of Floyd County. Mr. Bennett, one of Floyd County's largest taxpayers, said that he believed that the expense of the home demonstration agents office was not essential to the welfare of Floyd County citizens.

Court was dismissed Monday afternoon at five o'clock without a definite action being taken by the commissioners. Several club members and the district home demonstration agent, presented their claims again Tuesday morning. A number of club women brought their lunches and spent the morning at the court house, in the county court room.

County Judge J. W. Howard announced Tuesday afternoon that the decision of the commissioners court was unaltered and that the home demonstration agents office would be discontinued October first of this year.

Under the order, passed by the court, the existing contract with the extension department will not be renewed this year.

Actions taken by the commissioners court will mean a primary saving of \$1,500.00 annually, the salary paid the home demonstration agent.

An Awful Load for the Old Bus

DEMOCRATS ADOPT PLANKS URGED BY FERGUSON

Platform Embodies Ten Planks on Which Vote Drive Made

Convention Hall, Lubbock, Sept. 13.—Texas Democrats, shortly before adjourning their state convention here today, adopted a platform written by James E. Ferguson and embodying the 10 planks upon which his wife, Mrs. Miriam A. Ferguson, the party's nominee, made the race for governor.

The convention followed the example set by the national Democratic convention in Chicago in adopting a brief platform. Mrs. Ferguson's 10 planks constitute the bulk of the document.

It evaded entirely the prohibition issue which had been expected to develop into one of the party's big fights.

Invited To Appear

Ferguson was invited to appear before the resolutions committee to outline a platform that would be favorable to the administration of his wife. When his recommendations had been read they met with such hearty approval from the committee that they were adopted as the party platform, with only three dissenting votes.

State Senator W. K. Hopkins succeeded in amending the platform with four words which pledged the party to a reduction of "at least one-fourth" in public expenditures.

Pleads for Harmony

Ferguson pleaded for party harmony, and especially urged the committee to stay off the liquor question.

"Please do not go on record as being opposed to the national platform's prohibition plank," Ferguson said. "I am as good an anti as the best, and it is my opinion that the national platform handles the matter to the satisfaction of all."

Briefly, the platform reaffirmed the allegiance and devotion of Texas Democrats to the principles of Jefferson and Jackson, endorsed the national platform and the national nominees, endorsed the nomination of all candidates for office who were nominated by the majority vote of the people in the last Democratic primary, and especially Mrs. Ferguson, and her 10-plank platform, pledged the party to promote and aid agriculture and the rights of labor, and to materially reduce taxes and expenditures.

As In Campaign

Mrs. Ferguson's 10 planks were those on which she and her husband campaigned for election.

The resolutions committee, in addition to the platform, adopted three resolutions, one of which rebuked the old executive committee for its action in charging illegal voting in the run off primary and asking for a recount to determine "the true vote" cast.

L. M. King, 29, Died Sunday Morning at Home of Parents Here

L. M. King, 29, died Sunday morning at 4:37 o'clock, death being caused from a tumor of the brain, from which he had been suffering for several months. He was a son of Mr. and Mrs. J. L. King of this city and was reared in Floyd county.

L. M. King was born August 2, 1903. He attended school in Floydada, being a member of the Floydada High School football team in the fall of 1922.

Funeral services were conducted Monday afternoon at 2 o'clock from the Cumberland Presbyterian Church in this city, with Rev. W. H. Cheatham in charge and sermon by Rev. R. E. Bost, pastor of the first Baptist Church of Dimmitt, Texas. Rev. Cheatham and Rev. Bost were assisted by several other Floydada pastors.

Active pall bearers were: R. E. Fry, Jack Hurlison, Oran Cantwell, B. F. McIntosh, Carl Minor and John Buchanan. Honorary pall bearers were Bill Dailey, Terrell Loran, Leroy McDonald, Rene Nelson, Lorrain Britton, Bob Kubank, Kenneth Henry and John Shipley, all members of the football team on which the deceased played. J. C. Wester, another honorary pall bearer was coach of the football team. Other honorary pall bearers present were: Ernest Boothe, Hodge Henderson, Jim Stiles, Gaines and Raymond Teeple.

Survivors include the widow, Mrs. L. M. King, and baby son, Phillip; the parents, Mr. and Mrs. J. L. King; one brother, Pierce King, of Floydada; four sisters, Mrs. J. W. Burgett, Floydada, Mrs. Horace Marble, Floydada, Mrs. R. A. Baker, Weatherford, and Miss Madell King, of Floydada. All were present for the funeral services with the exception of the baby son, Phillip, and a sister, Mrs. R. A. Baker.

Interment was made in the Floydada cemetery, immediately following the funeral services. A. L. Mayhew of F. C. Harmon Funeral Directors, was in charge of arrangements.

Mr. and Mrs. Clifford Rhodes, of Springfield, Missouri, came recently for a visit of indefinite period with his parents, Mr. and Mrs. W. J. Rhodes of near Floydada and other relatives.

Artie Baker, of Lockney, was a business visitor in Floydada Thursday of last week.

to be the chief service that the executive and legislative departments can now render to a distressed people.—Copied from The Amarillo Daily News.

COMMISSIONERS FORMALLY APPROVED BUDGET FOR COMING YEAR IN TUESDAY'S MEETING; EXPENDITURES REDUCED \$10,800.00

746 Enrolled in Floydada Schools at Close of First Week of Term

746 students were enrolled in the Floydada Public Schools at the close of the first week of the 1932-33 school term which opened last Monday morning.

In the Andrews Ward, 291 students are enrolled in the first four grades and 186 enrolled in the fifth, sixth and seventh grades, making a total of 477 in the ward school division. 269 students in Floydada High School had been issued books up until noon yesterday, according to records kept by Miss Veva Swinson, Librarian.

Classes are well underway this week and schedules have been completed in most instances by students. Organizations and classes are expected to complete plans for the year's work in the Floydada High School next week.

E. S. Randerson Succeeded J. M. Wright as County Sheriff

E. S. Randerson, elected sheriff in the recent primary democratic election, assumed charge of the office Monday morning. Mr. Randerson succeeds J. M. Wright as sheriff, following the latter's resignation which became effective September 12.

Sheriff Randerson named G. Scott King as his Floydada deputy and Morgan Wright as deputy sheriff at Lockney. Although his regular term was to have started January first, Randerson was appointed by the Floyd County Commissioners court to become sheriff.

T. T. Hamilton, deputy under J. M. Wright, said Monday that he, too, expected to return to the farm. This decision was announced also by J. M. Wright who has moved from the sheriff's home in the jail building, for a short rest and then plans to go to the farm.

Mr. Randerson and family moved to the home in the jail building Monday of this week.

Cafeteria Opened at Andrews Ward School This Week for Students

The cafeteria opened this week at the Andrews Ward School. Lunches will be served to students who desire to eat at the school rather than bring their lunches or go home for lunch.

A well balanced meal will be served at a minimum cost the management of the cafeteria indicates.

Floydada Magnolia Dealers Attended Demonstration at Plainview

C. W. Ginn, wholesale agent, H. O. Cline, manager of the Magnolia Service Station, Arel Rainer and A. J. Cline attended a district Magnolia dealers and employees meeting at the Hilton Hotel in Plainview last night.

Mr. Womack gave a demonstration on Mobilgreases, explaining advantages of Waterpump, Shaekle, Wheel-bearing and Chassis greases. In his demonstration Mr. Womack showed the advantages of Mobilgreases over ordinary high pressure greases.

"Mobilgreases will stay on five times longer than other greases and give better lubrication during the time", H. O. Cline said the demonstrator explained. None of the greases are effected by water and will not be lost when your car is washed, Mr. Cline further said.

"I have all of the kinds of Mobilgreases and I would like the opportunity of showing its qualities to the car owners of Floydada, and if possible grease their cars. Mobilgreases jobs cost the same as others", Mr. Cline said.

The Mobilgrease demonstration is being given again tonight at Plainview and some of the local dealers will be in attendance.

W. A. Amburn, Jr., was a business visitor in Lockney several days of this week. He is representative for Fuller Brush Company.

Formal and final approval of the budget for Floyd County for the ensuing fiscal year was made by the Floyd County commissioners in the regular meeting Tuesday of this week.

The budget as approved calls for expenditures reduced \$10,800.00 over the current year. The reduction in the budgeted expenditures was made primarily in the general or third class fund.

Work on the budget has been underway for the past two months following the report of the Rankin Audit Company, of Houston, which was made July first of this year.

Several economy measures have been necessitated, which includes reduction of salaries and general expenses which are incurred by Floyd County, as well as wholly discontinuing salaries of sheriff department deputies and the home demonstration agent. The latter becomes effective October first.

W. C. Fyffe, Former Resident, Died Thursday Night at Plainview

W. C. Fyffe, aged 79, died Thursday night at 11:30 o'clock at his home in Plainview, following a long illness that had extended over more than two years. He was the father of D. W. Fyffe of this city and was a former resident of Floyd County.

William Clinton Fyffe was born in Calhoun, Tennessee, March 1, 1852. At the age of 17 years he came to Campbell County, Texas, where he lived until coming to the plains country about 26 years ago. During the 26 years that he was a resident of the plains he had farming and business interests in Floyd and Hale Counties.

He was married to Miss Alice Flippin on December 31, 1873, at Campbell, Texas. Three daughters were born to that union, two of whom survive, who are: Mrs. G. W. Yancey and Mrs. Maggie Romine, of Plainview. Following the death of his first wife, he was married on May 11, 1887, to Miss Emma Cramer at Campbell. One son, DeWitt, was born to that union and survives his father, and is a Floydada resident.

Funeral services were conducted Friday afternoon at 3:30 o'clock from the family home 222 West Fifth Street in Plainview. Rev. J. L. Standridge, pastor of the Church of Christ, officiated.

Pall bearers Friday afternoon were Mr. Fyffe's grand sons and grandsons-in-law, as follows: Clinton Fyffe, of Floydada; Myron Yancey, Dee Yancey, Roy Golden, R. H. Brown and Charles Vanderpool. Flower girls were his grand-daughters, as follows: Enna Lea, Bonnie, Inis, and Ariene Fyffe, of Floydada, and Mrs. R. H. Brown and Mrs. Charles Vanderpool.

Interment was made in the Plainview cemetery with arrangements in charge of Roy R. Wood funeral home.

October Term of Floyd County District Court to Open October 10th

The next regular term of Floyd County District Court will open October 10, according to Roy O'Brien district clerk. The term will continue for five weeks.

Docket for the court has not been set. Several cases have been transferred from other courts which will be announced later.

RETURNED FROM VISIT

Mrs. W. L. Bloodworth returned Tuesday morning from Jack County, Texas, where she had been visiting for five weeks. Mrs. Bloodworth went to Jack county after being informed of the death of her brother-in-law, C. C. Bloodworth, five weeks ago. She was called back to Slaton, two weeks ago following the death of a nephew, Woody Tudor, who was killed. Mrs. Bloodworth returned by Olney where she visited with relatives.

J. G. Martin and W. M. Mascoe were visitors in Lubbock Tuesday of this week. They attended the state democratic convention there.

Movable Hog Houses Bring Good Results

Profit to Raiser Through Better Sanitation.

(By GEORGE R. HENDERSON, Agricultural Extension Agent, Colorado Agricultural College.)

Sixteen hog producers using movable farrowing houses saved an average of 5.9 pigs per litter from 415 sows and marketed 200-pound pigs at an average age of 210 days, as compared to 22 other farmers using stationary houses, who saved 4.3 pigs per litter and sold 200-pound pigs at an average of 234 days. The two systems show a difference of 1.6 pigs per litter and 24 days' time in the fattening pen. The reason for this difference is probably the better sanitation possible with the movable houses. Worm eggs and parasites abound in the soil and surroundings where hogs have been kept from year to year. When movable houses are used they can be located on different ground each year and the small pigs will have clean ground on which to run.

In addition to saving pigs, the movable house is much more easily cleaned. On the other hand the stationary house is rarely cleaned sufficiently and parasitic infection is almost sure to result if little pigs are raised on the same lots year after year. All types of houses should be cleaned thoroughly by sweeping and scraping out all dirt, mud and accumulation, then by scrubbing with a solution of hot water and lye. For this work, one pound of lye to twenty gallons of hot water will be effective. After this, some kind of a disinfectant should be applied to the walls and floors. Unless this is done there are bound to be losses in pigs and time.

Machinery and Failure Not Always Connected

During hard times various self-styled authorities rush into print with reasons and partial reasons why such conditions prevail. Some of these recent writers have even asserted that the American farmer is being ruined by the purchase of expensive, modern machinery. This may be true in individual cases but on the average, it is our own opinion that profitable farming in the future will require more, rather than less, machinery.

Foreclosed farms are definite evidence of failure in management and if that failure was due to heavy investment in machinery the fact ought to show up clearly. Preliminary investigation, at least, does not point to implement purchase as a major cause. On 257 foreclosed farms in Minnesota, recently studied by the University of Minnesota, the average amount spent on machinery was \$750. On an equal number of solvent farms in the same territory the average was \$700. Nothing in that information should discourage a farmer from trying to cut production costs with modern cultivating and harvesting implements.—Exchange.

Alfalfa Best Pig Pasture

In tests conducted at Ohio State university, alfalfa and clover pasture outranked all other kinds for pigs. Soybean, while proving to be exceptionally palatable to pigs, produces little new growth after being grazed, has relatively low carrying capacity and provides forage for only a comparatively short period of time. On good soils rape proved to be an excellent pasture crop. Rape, however, sometimes caused blistering or sun-scald. On this soils a mixture of spring-seeded winter wheat and alfalfa or sweet clover made a serviceable pasture. Sweet clover alone was all right for the first year, but the second year's growth was too coarse and woody for the pigs to get much good from it.—Prairie Farmer.

Agricultural Hints

Deep and thorough preparations of the soil is required for sweet peas. Early planting is essential.

"Top lamb prices for every producer" will be the aim of a Minnesota lamb grading campaign to be conducted during July and August.

Tests at the Ohio State university have shown that, on strong, productive soil, Evergreen and Country Gentleman varieties of corn planted in 34-inch rows give highest yields.

Asparagus acreage has increased threefold in the past ten years, spinach six times, lettuce ten times. Carrot acreage doubled and fresh pea acreage has increased ten times.

Ground limestone should be applied to the ground at least a month before acid phosphate is to be used. The two react to each other, and a loss is experienced by their simultaneous application.

Farmers can make a lot of good feed by planning a mixture of one bushel of cowpeas and 20 pounds of sorghum seed per acre on good moist land. The combination makes a very nutritious feed, says F. W. Horns of Auburn college.

MRS. A. L. HOLLUMS AND MRS. T. J. GILL HONORED WITH BIRTHDAY DINNER

A dinner, honoring Mrs. A. L. Hollums and Mrs. T. J. Gill, was enjoyed Sunday at the home of Mrs. Gill in the Center community. A reunion of the families of Mr. and Mrs. T. J. Gill and Mr. and Mrs. Hollums was also held in connection with the dinner. The dinner honored Mrs. Hollums and Mrs. Gill on their birthday.

Those present for the reunion and dinner were: Mr. and Mrs. A. L. Hollums, Elizabeth and Susie Hollums, T. C. Hollums, John Hollums, Collis Roland, Mr. and Mrs. Walter Hollums and family; Mr. and Mrs. T. J. Gill, Mr. and Mrs. Elvis Gill and son, A. H. and Mrs. Mathews and family and Mr. Harbor.

MISS LULA MAE BRIGGS AND MARK DUNCAN MARRIED AT LUBBOCK THURSDAY

Miss Lula Mae Briggs, of Lubbock, and Mark W. Duncan, formerly of this city, were married last Thursday evening at 8:30 o'clock at Lubbock. The marriage was solemnized at 1711-B Thirteenth street with the Rev. J. O. Haynes, pastor of the First Methodist Church officiating. A few friends of the couple were present for the wedding.

The wedding had been scheduled for last Sunday morning but was rearranged when it was learned that the bride's parents, Mr. and Mrs. T. A. Briggs, of San Antonio, could not be present. The bride's sister, Miss Euda Briggs, of Abilene, was among the guests.

Mrs. Duncan chose a wine velvet dress with black accessories, for wear for the wedding.

Mrs. Duncan is supervisor at the Southwestern Bell Telephone Exchange and is a former student of Simmons University at Abilene. She is a daughter of Mr. and Mrs. T. A. Briggs, of San Antonio.

Mr. Duncan is a son of Mrs. A. B. Duncan of this city and was reared in Floyd County, being a member of one of Floyd County's pioneer families. He graduated from Floydada High School with the class of 1924, following he entered Tech college at Lubbock and later the University of Texas. He also attended the State Medical College at Galveston. Mr. Duncan recently purchased a drug store stock in Lubbock and is operating a drug store there at the present time.

The couple will make their home at Lubbock.

MISSIONARY SOCIETY ZONE MEETING HELD IN MATADOR TUESDAY OF THIS WEEK

Several members of the Methodist Missionary societies of the Floydada Church were present for the quarterly zone meeting of zone four, Plainview District, held with the Matador Methodist Church society members as hostess, Tuesday of this week.

Mrs. James Colville, of the adult Missionary Society of the First Methodist Church here, zone leader, presided over the all day meeting.

Others attending the conference from the Floydada Methodist charge were: Mrs. A. A. Beedy, Mrs. John L. West, Mrs. R. L. Henry, Rev. and Mrs. I. A. Smith, Mrs. Geo. Dickey, Mrs. Geo. Smith, Rev. and Mrs. F. O. Garner and Mrs. M. L. Solomon; Misses Nora Smith, Eula Mae Gulion, Madge Dorsey, Veda Wooten, Bernice Bishop, Helene Hay, Wilmina Sallsbury, Georgia Lee Assiter, and Elizabeth McKinney. The group went to Matador Tuesday morning and returned Tuesday afternoon.

Representatives were present from Dougherty, Fairview and Lockney, in Floyd County, and Plainview, in Hale County, White Flat and Matador, in Motley county. Mrs. S. S. Stoneker, of Plainview, district secretary was in attendance at the meeting.

Program for the day included interesting discussions by Mrs. G. W. Bailey, Plainview, director of young peoples work; Mrs. Duffen, of Matador, who discussed children's work. Several special numbers included readings and musical selections by the Matador auxiliaries and a two-act play by members of the Heister West circle of the Methodist church here. A number of visiting ministers were also present for the conference.

Dougherty was selected as the place for the next zone meeting which is to be in November, the exact date to be announced later.

Mr. and Mrs. Kite Dickey, of Phoenix, Arizona, arrived Sunday of this week for a visit with his parents, Mr. and Mrs. J. C. Dickey and other relatives in Floydada.

Mr. and Mrs. O. S. Cutbirth and daughter, Miss Betty, and Miss Simmons, of Quitaque, spent Sunday in Floydada as guests of Mr. and Mrs. Paul Snyder.

Profitable Use of Runoff Water in West Texas

The Spur Experiment Station reports the use of a simple and inexpensive system of diversion terraces for impounding the runoff water on June 29 from a two-inch rain resulting in the application of seven inches of water on a 120-acre tract of land. Sudan grass was planted on thirty-five acres of this land, and as a result of this artificial irrigation 62 head of Hereford yearlings and 15 head of work stock and milk cows were grazed on the 35 acres from July 18 to August 15, the Hereford yearlings making a gain in this period of 3856 pounds worth at 5 1/2 cents, \$212.08, or \$6.00 per acre, not including the grazing of the 15 head of work stock and milk cows for the period. In addition to the grazing, a hay crop of 30 tons was harvested, and at the end of the period the grazing on this tract was considered better than at the beginning, which illustrates the practicability of using waste rainfall water to great profit by diverting it onto farm land.

Round Dozen Bridge Club Met With Mr. and Mrs. J. I. Hammonds

Mr. and Mrs. J. I. Hammonds were host and hostess to the Round Dozen Bridge Club at the regular meeting last Thursday evening, at their home 129 West Houston street.

The room where the games were at play were attractively decorated with cut flowers. Delightful refreshments were served by the hostess at the conclusion of the games. High score in the games for the evening was held by Mrs. H. B. Sams and L. W. Condra.

Those playing were: Mr. and Mrs. H. B. Sams, Mr. and Mrs. S. W. Ross, Mr. and Mrs. Luther Fry, Mr. and Mrs. L. W. Condra and Mr. and Mrs. J. I. Hammonds, members and Mr. and Mrs. Edd Johnston, guests.

Mr. and Mrs. Tony B. Maxey will entertain the club at the next regular meeting, Thursday evening, September 22.

MISS JESSIE MALLORY AND SAM GEORGE MARRIED SUNDAY IN PLAINVIEW

Miss Jessie Mallory, daughter of Mrs. Pat Mallory, of Belton, and Sam George, son of W. George of Amarillo, both of this city, were married Sunday at high noon in Plainview. Rev. Bailey, pastor of the First Methodist Church, read the ceremonies at the parsonage.

The wedding ceremonies were witnessed by a number of friends and relatives of the bride and groom, as follows: Mr. and Mrs. Rex T. Westerfield, Floydada; W. George, Mrs. H. O. Hamrick, Misses Edith George, Ethel Hicks and Mamie Gill, all of Amarillo; R. P. George, Bernice Payne and David Hamrick, of Amarillo.

Mrs. George is a graduate of Belton High School and was a student for two years in Baylor University at Waco. Mr. George is a graduate of Amarillo High School and made his home there prior to coming to Floydada six weeks ago to be employed at Mallory Grocery. The bride has resided here for three weeks.

Mr. and Mrs. George are at home at 729 South Main Street in Floydada.

J. C. Wester, I. D. Roberts and Polk Goen were among those attending the State Democratic Convention at Lubbock this week.

How One Woman Lost 20 Pounds of Fat

Lost Her Prominent Hips—Double Chin—Sluggishness

Gained Physical Vigor—A Shapely Figure.

If you're fat—first remove the cause!

Take one half teaspoonful of Kruschen Salts in a glass of hot water in the morning—in 3 weeks get on the scales and note how many pounds of fat have vanished.

Notice also that you have gained in energy—your skin is clearer—you feel younger in body—Kruschen will give any fat person a joyous surprise.

But be sure it's Kruschen—your health comes first—and SAFETY first is the Kruschen promise.

Get a bottle of Kruschen Salts from any leading druggist anywhere in America (lasts 4 weeks) and the cost is but little. If this first bottle doesn't convince you this is the easiest, SAFEST and surest way to lose fat—your money gladly returned. (Adv.)

If You Can't Find It In Floydada

COME TO PLAINVIEW TO W. H. SEALE DRY GOODS

Where you will find one of the most complete lines of Men's, Boys, Ladies and Growing Children's Shoes—Widths from AAAA to EEE—Sizes 2 1/2 to 10.

POULTRY CHICKS THRIVE ON MILK AND ALFALFA

Ration Furnishes Vitamin of Prime Importance.

Milk and alfalfa are cheap feeds and supply certain essentials to the normal growth and health of poultry. It is good business to add these two feeds to the ration, when possible, Arthur T. Ringrose of the Cornell poultry department states. He explained that animal protein is necessary to build body tissue, and that milk is a good source of animal protein. Milk is even more valuable as a source of vitamin G. This has been proved by experiments at Cornell and elsewhere. Several vitamins are required for normal growth and health of poultry. One of these can be supplied cheaply by only milk and alfalfa. Vitamin G, discovered about five years ago, is important in that its lack causes nervousness, skin lesions, sore eyes, and a general weakened condition. It is believed that a certain leg weakness is also caused by the lack of vitamin G or a closely associated factor. The use of milk and alfalfa for feeding prevents or helps to prevent these conditions.

Twenty-five chicks received no vitamin G in a test lasting eight weeks. At the end of the period, only eight chicks were living; the rest died of diseases caused by lack of vitamin G. The average weight of the remaining eight chicks was five ounces. Another pen of 25 chicks, fed vitamin G, in ample amounts, were all living at the end of eight weeks, and were on the average, one pound and nine ounces. In a Kentucky experiment, the use of milk in place of meat scrap with laying hens increased egg production in the winter from 32.7 to 43 eggs to the hen, he said.

Poultry Raisers Save Money by Home-Mixing
Poultry raisers who grow grain and who wish to feed at the lowest cost can save considerable money by mixing their own mash and scratch feeds, says A. C. Smith, poultry chief at Minnesota University farm. Persons not having mills undoubtedly could arrange with local dealers to grind their grains, which when mixed in the proper proportions and supplemented with the proper amount of animal and mineral matter will provide satisfactory rations at the lowest possible cost. Complete directions for mixing laying mash may be obtained by writing the poultry division, University farm, St. Paul, Minn. Dairy farmers with an abundance of skim milk from creameries also may secure from the poultry division information on how to use by-products to the best advantage with their laying flocks.

Control of Worms
C. M. Ferguson, speaking on the control of worms in chickens, the Ohio Farmer reminds its readers, said control of parasites is dependent on a knowledge of the life cycle of the parasite and breaking this cycle. For this purpose confinement, range rotation, wire floors and cinder yards are beneficial. Worm remedies, says Ferguson, should not be used until one is sure that a flock is infested. Treatment should then be given according to the kind of worm found.

POULTRY NOTES
The measure of a poultryman's success is his ability to produce poor pullets. . . . It is difficult to keep a brooder house dry when it is crowded. Moist litter helps spread disease. . . . Success in poultry raising depends to a large extent on how well young stock is brooded and grown. . . . Never neglect to cord the chick-box well; otherwise some prying hand may open the lid en route to customer. . . .

Save by Growing Legumes at Home

Production Costs Lowered Without Bad Effects on Rations.

(By C. L. BLACKMAN, Dairying Extension Specialist, Ohio State University.)

Low prices paid for milk and cream at the farm make it more than ever necessary to reduce production costs. One sure way to cut costs is to grow more legume hays. Legume hays are far more valuable than corn stover, straw or non-legume hays because they are more palatable and are relatively richer in protein and lime. When low protein roughages are fed it is necessary to balance the ration by the purchase of large amounts of high protein factory by-products such as cottonseed meal, oil meal, etc., which usually are high in price. The usual recommendation is to feed a grain ration carrying 17 to 18 per cent of digestible protein with timothy. With legume hay, 12 to 14 per cent of protein in the grain ration is sufficient. A 17 per cent grain ration contains about 33 1/2 per cent of high protein feed. A 12 to 14 per cent ration which is adopted to legume hay only need contain from 15 to 20 per cent of high protein concentrates. So a direct saving in cash outlay is made by growing legumes at home.

Molasses as Factor in Food Ration of Steers

Molasses was tested out as a supplemental feed for steers at the Ohio experiment station last year. Five different lots of steers were used and each lot received a basic ration of 2 pounds of protein supplement, 6 1/2 pounds of corn silage, and 1 1/2 pounds of mixed hay each day. In addition lot one received all the shelled corn they would consume and lot two had 2 pounds of shelled corn daily and enough cane molasses to give them the same amount of feed by weight that lot one consumed. Lot three received 2 pounds of cane molasses and all the shelled corn they would eat, and lot four was self-fed molasses in addition to a full feed of corn. The fifth lot received 2 pounds of beet molasses per steer in addition to all the corn they would eat. In general the molasses-fed steers made substantially greater growths than the others, lot four showing the greater daily increase. While it was very definitely proven that molasses feeding is not a profitable practice at last year's prices, yet there were indications that the molasses contained a growth factor which would be important in a long-time feeding period.—Successful Farming.

"Rust Buster" Clubs
Black stem rust of wheat, oats, rye and barley is harbored by barberry bushes as one of its hosts, so that destruction of this intermediate host is essential in grain-growing countries. In 15 Iowa and Minnesota counties, boys and girls "rust buster" clubs have been formed for the purpose of locating and reporting the presence of these bushes, and explaining the need for their removal. These boys and girls last year located 200 properties containing these barberries. The barberries are spread widely in that country by seed dropped by birds that have eaten the berries.—Rural New Yorker.

Study Shipping Fever
A systematic study of the causes of hemorrhage septicemia, commonly known as shipping fever, in live stock and methods of controlling this disease is under way in several states. Tests are being made by vaccinating stocker and feeder cattle before shipment to market, some ten to thirty days, and others one or two days before shipping; by vaccination in the stock yards where the cattle are marketed, and by vaccinating the young calves on the home premises. Appropriate numbers of untreated control animals are provided in each instance.—Ohio Farmer.

Fertilizer Values
While increase in yield is usually the principal effect of fertilizers, other effects, such as improvement in quality, earlier start, earlier maturity, and greater disease resistance are frequently of equal value, says a writer in the Wisconsin Agriculturist. Harder, more mature corn, earlier and plumper small grains, better grading potatoes, heavier heads of cabbage, better to-bacco—these are common, rather than unusual effects of good fertilizer treatment.

Wash Fertilizer Down
Fertilizer will wash down into the soil. It washes almost straight down, but it takes time and rain or hosing to make it go down. If you want that fertilizer to work on the rose roots or corn or other roots immediately work it into the soil with hoe or trowel and put the hose on it, too. Many gardeners plan a series of fertilizations throughout the summer, hoeing the plant food down to the roots, where it may be relied on to do the most good.

Attain Highest Speed Of All Humans

Major Jimmy Doolittle, left, and Jimmy Hazelip, right, meet at Cleveland air races the day after both had set two new world air marks. Jimmy Doolittle attained a speed of 293 miles per hour, (unofficially) in his Gee-Bee Bumble-Bee plane . . . new world record, while Hazelip set a new coast to coast record of 10 hrs., 19 mins., 4-5 sec's . . . thus clipping 57 minutes off Doolittle's former record.

After Lost Laurels

Max Schmeling, German heavy-weight and former world champion, returns to the U. S. for a battle with Mickey Walker, his first start since losing the title to Jack Sharkey of Boston. Max thinks he can regain his crown.

Miss America Favorite

All Philadelphia is backing Miss Roslyn Schultz, 17, high-school girl, to win the 1932 Miss America title and national beauty contest at Wildwood, N. J. Miss Roslyn eliminated 31 rivals in the Quakertown finals.

Knows No Depression

William (Billy) Snelling, 11, of Allentown, Pa., came into possession of a chemical set and he went into the basement to experiment. He came out later with a high-grade blue-black permanent ink. Now he is making it and selling it at a profit.

Miss Margaret Sims, who is at Plainview, was a visitor in Floydada Sunday with Mr. and Mrs. J. C. Dickey and other relatives.

Mr. and Mrs. A. L. Seoggin and family, of Lubbock, were visitors in Floydada Sunday with Mr. and Mrs. J. C. Dickey and other relatives.

Mr. and Mrs. Ray Dickey, of Lubbock, were visitors during the week end with Mr. and Mrs. J. C. Dickey in Floydada.

HELP YOURSELF To Health and Happiness at The BAKER HOTEL

"The South's Finest Resort Hotel"

Mineral Wells, Texas

"Where America Drinks Its Way To Health"

You come to this luxurious resort hotel for a rest, to build up strength for future work . . . and you find . . . not only perfect rest, but recreations that enable you to enjoy a delightful holiday while building new zest and energy—in the low Palo Pinto mountains—in a climate that is ideal.

The celebrated mineral waters at Mineral Wells are a big reason why so many come here; why physicians send so many, who are not ill, but are immeasurably benefited by the water, especially persons of gouty or rheumatic tendencies. For those who want them, there are health baths . . . and the services of capable physicians.

Rates: \$2 per Day and Up. Reduced Rates to guests who stay a week or longer. Special Tourist Rates: Three or more in same room, \$1.00 each.

McCOY CHURCH ANNOUNCEMENT

The following church services will be held at McCoy next Saturday night and Sunday and Sunday night: Preaching Saturday night at 8:15 and conference immediately afterwards.

Sunday school Sunday 10 a. m. Preaching 11 a. m. B. Y. P. U. at 7:15 p. m. Preaching at 8:15 p. m. Everybody is cordially invited to all services.

REV. G. W. TUBBS, Pastor.

Baird Bishop, of Kress, visited in Floydada Sunday with Mrs. Jennie Bishop and other relatives.

Mr. and Mrs. B. B. Caudle, of Amarillo, visited in Floydada Sunday with Mr. and Mrs. J. B. Bishop and family. Mrs. T. A. Caudle and Mrs. Will Walker returned to Amarillo with them and will visit there.

Mr. and Mrs. Glad Snodgrass and daughter, Miss Gwendolyn, left Sunday for Belton where Miss Snodgrass will enroll for the fall term of school at Baylor College. Mr. and Mrs. Snodgrass returned this week. Miss Snodgrass was a student in Ward Belmont at Nashville, Tennessee, last year and spent the summer visiting with her parents in Floydada.

Miss Selma Linder, student in Wayland Baptist College at Plainview, visited last week end with her parents, Mr. and Mrs. Geo. A. Linder in Floydada. Miss Linder is a member of the 1932 graduating class from Floydada High School.

Miss Golden Louise Steen left Friday morning for Belton, Texas, where she will attend Baylor College for women this year. She spent the summer vacation with her parents, Mr. and Mrs. Homer Steen.

Mr. and Mrs. Paul Snyder, of this city, spent Monday night visiting in Spur, Texas, with their daughter, Mrs. Dick Speer and Mr. Speer. Mrs. Speer and daughter, Marian, returned with them and is visiting here this week.

Miss Bama Gene Smalley came Sunday for a week's visit with her mother, Mrs. Ama Smalley, prior to returning to Canyon where she will enroll for the fall term of West Texas State Teachers College.

Mrs. John Farris attended the Texas State Democratic Convention at Lubbock Tuesday of this week.

G. W. deCordova went to the State Democratic Convention at Lubbock Tuesday of this week.

H. B. Sams attended the State Democratic Convention at Lubbock this week.

Judge and Mrs. L. G. Mathews and Tony B. Maxey attended the State Democratic Convention in Lubbock this week. They went to Lubbock Monday afternoon late.

C. W. Mitchell of Big Spring was a business visitor in Floydada this week.

Let Cavanaugh do your Printing.

Field Notes of Survey On Houston and Second Sts. Adopted by Council

The City Council, in regular meeting last night, ordered the field notes in connection with the designation of the State Highway on Houston and Second streets, recorded. The motion was made by T. P. Collins and seconded by W. E. Weatherbee.

According to the field notes the street is to be 80 feet in width, being 40 feet on each side of the described line of the survey.

In further actions of the council, a motion was made by T. P. Collins seconded by W. U. White and carried ordering all bills and accounts against the city presented paid, with the exceptions of two which were to be carried over for further information.

LOWELL GAMBLIN SUSTAINED BROKEN COLLAR BONE IN BALL PRACTICE

Lowell Gamblin, 18, son of Mr. and Mrs. J. M. Gamblin of this city, sustained a broken collar bone yesterday afternoon while practicing football at the Floydada High School.

Lowell is a high school track star, and a promising football player on the Floydada High School whirlwind squad. Following the injury Lowell was taken to the Smith and Smith Sanitarium where a brace was put on the injured collar bone.

MRS. G. L. KIRK RECOVERED

Mrs. G. L. Kirk, who has been seriously ill for several days last week and the first of this week, has been released from the Smith and Smith Sanitarium where she had undergone treatments. Mrs. Kirk is able to be up this week.

A. V. HAYNES SLIGHTLY IMPROVED THIS MORNING

A. V. Haynes, who had been critically ill for several days, is reported to have rested well last night and is slightly improved this morning. Mr. Haynes has been in failing health for the past few years and has been confined to his bed for several months.

House of the Dead

In the Chinese cemetery at Panama, a strange building has been erected. Although modern in construction, it is designed after ancient Chinese architecture, preserving the oriental lines of decoration. The building contains 150 separate compartments for coffins. The Chinese who die in Panama are "buried" temporarily in this building. When all of the vaults are occupied a ship is chartered and the 150 coffins are shipped back to China. According to the religious belief of the Chinese, the soul will not gain immortality unless the body is buried in Chinese soil.

Army Distinction Badge

More than 150 years ago General Washington wrote the general order establishing the Purple Heart as a badge of distinction in our army. The badge was to foster and encourage every species of military merit and reward not only instances of unusual gallantry, but also of extraordinary fidelity and essential service. Those to whom it was awarded were permitted to wear on the facings over the left breast the figure of a heart in purple cloth or silk, edged with a narrow lace or binding.

Debtor's Life Made Burden

A man in eastern Turkestan who does not pay his debts leads a dog's life until he comes through. He is shadowed night and day. If the creditor is of the same caste as the debtor, he does the shadowing himself. If not, he hires some one to do it. If the debtor goes to market, the creditor goes along, a silent advertisement that the man he is following is not to be trusted. The creditor sits where his man eats, and sleeps by his door.

Woolen twine should never be used for tying fleeces. The coarse twine fibers get mixed with the wool. A paper twine is made especially for tying wool.

Work horses should be turned out to pasture at night, especially mares raising colts while working, advises W. H. Peters, animal husbandry chief, Minnesota University farm.

Wood fence posts and ground timbers in buildings will last 15 to 20 years longer if crosscoated before using. The cost of crosscoating for butt-treating an ordinary post is about 5 cents.

In March, 1932, 632,631 cattle, 429,434 calves, 1,427,739 sheep and lambs, 1,055 goats, 3,664,092 swine and 3,128 horses were slaughtered under federal inspection, according to the United States Department of Agriculture.

Fertilizers Do Much to Improve Pasture

Records Prove Value of Treatments.

What will fertilizers do for pastures? Twenty-six farmers in southeastern Ohio answered the question by making fertilizer trials. Each laid out seven plots and under the direction of D. R. Dodd, soils and crops specialist for Ohio State university, gave varying treatments to the different plots and kept records of the pastureage yield.

The most profitable treatment was 50 pounds of nitrogen, 120 pounds of phosphoric acid and 80 pounds of potash an acre. Plots which received this application yielded 4,116 pounds of grass an acre compared with 1,473 pounds where no fertilizer was applied. The treatment cost \$10.63 an acre which left \$32.58 profit. Grass from the untreated plots was valued at \$14.08 an acre. An increase of 2,447 pounds of grass was credited to an application of 50 pounds of nitrogen and 120 pounds of phosphoric acid an acre. The cost was \$9.33 and the value above cost was \$31.53.

Other treatments and the returns above costs were: 120 pounds phosphoric acid an acre, \$16.57; 120 pounds phosphoric acid and 80 pounds potash, \$19.23; 50 pounds nitrogen, \$23.82; 25 pounds nitrogen, 120 pounds phosphoric acid and 80 pounds potash, \$26.24; 50 pounds nitrogen, 30 pounds phosphoric acid and 20 pounds potash, \$29.52.—Capper's Farmer.

Cheap Crop Protection in Treatment of Seed

Treating seed is a common practice on modern farms. Farmers have accustomed themselves to protecting potatoes, oats, barley and wheat from attacks of bacteria and fungus diseases. Experiment stations are finding that corn also suffers from fungus diseases through which losses of varying extent result. These stations have also discovered that proper treatment will save these losses. Such treatment has added substantially to the yields of the resulting crops while the cost is not more than five cents per acre.

The Illinois experiment station makes this statement: "Some very striking increases in stand, vigor and yield of corn have been obtained from seed treatment. Even with the very best seed obtainable, seed treatment, in Illinois experiments, has usually proved worth while. Treated seed can be planted earlier with greater safety than untreated seed, for there is less danger of damage because of unfavorable weather conditions, in case it should lie on the ground a long time before sprouting. Seed treatment may also be of special benefit in case the soil is wet when the corn is in the seeding stage."

Terracing Costs

Cost of terracing cultivated land varies from \$3 to \$4 an acre to as high as \$12 to \$15, depending largely upon character of soil, slope of land, and amount of erosion that already has taken place, says the bureau of agricultural engineering, United States Department of Agriculture. It is more expensive to terrace a field that is badly cut up with gullies than one which has a comparatively smooth slope. Gullies have to be crossed by terraces, and much work is necessary to strengthen terraces at such points. The bureau believes that \$4 to \$5 an acre is a conservative estimate of the average cost of terracing.

Potatoes and Potash

Potash is needed in large amounts by potatoes, according to fertilizer experiments being conducted at the Ohio experiment station. Since farm manure is high in potash, averaging about ten pounds per ton, eight tons or more per acre will maintain the potash supply. In recent years, large acreages of potatoes are being grown without manure, cover crops being plowed down to give the proper physical condition. With this system, at least 80 pounds of potash are required in the fertilizer to insure a yield of 30 bushels per acre.—Wallace's Farmer.

Agricultural Squibs

Feeding cattle dry hay just before turning them on rich, legume pasture reduces danger of bloat.

Wheat conditions in Australia and Argentina this season are more favorable for seeding than last spring and some increase in acreage is expected.

Peonies and iris like plenty of water as they are coming into bloom. Remember the big overhead they are producing and give them water accordingly.

Fertilizing corn by the hill-drop method weakened the root anchorage and cut the yield an average of eight bushels an acre in tests conducted by the University of Illinois.

Plant potatoes at least 3 or 4 inches below the level surface of the field. The tubers set deeper are less subject to blight, rot, sunburn, second growth, and other tuber defects.

Watch Work Horse During Hot Wave

When Animal Goes "Off Its Feed" It Should Be Allowed Rest.

(By J. L. EDMONDS, College of Agriculture, University of Illinois.)

Hundreds of Illinois farm work horses which died during the torrid weather of last summer probably were being worked when they were off feed. This is a dangerous and costly practice which farmers might well guard against this season. At present prices it takes a good many bushels of oats or corn to replace a good, young sound work horse.

Management and heredity are both factors in producing good, hot weather work horses. The inheritance of sound wind, high quality, a vigorous appetite and an even, cheerful temperament are all highly important.

For best results horses should be brought to both their work and full rations gradually. The old precaution about making haste slowly applies here. Hot weather rations should be ample and regular in their supply of energy and should be easily digested. Rations which cause a dry dung are not at all suitable. Oats, mixed hay and pasture after corn-planting time will fill the bill.

During extremely hot weather a barrel of water and a pail should be taken to the field for watering the horses. Horses should be worked shorter days and stopped more often for rest in torrid spells such as visited the corn belt last summer. Work can be started at daylight and stopped before noon. When a horse refuses his feed, he should be kept in the barn or in a shady pasture until his appetite comes back. Otherwise he is likely to topple over dead in the cornfield.

There is not much danger as long as horses are sweating freely. The time to be alarmed is when they dry up and start panting. They are still further gone when they reel at the walk and stand with legs braced and drooping ears. When the first signs of overheating occur, the horse should be gotten into the shade. Cold water applied to the head, spine and legs will reduce temperature. Serious cases require the veterinarian. Prevention is cheaper and more satisfactory than a cure. A horse once overheated, even though he apparently makes a good recovery, is never very useful again at high temperatures.

Cross-Bred Hog Shows Gain in Vigorously

Research work with many species of animals indicate that added vigor is imparted by cross-breeding. Many good hog men prefer crossbred pigs for producing market hogs. The extra vigor tends toward increasing the number of pigs saved and to more rapid gains. C. D. Lowe writes, in Capper's Farmer.

Crossbred hogs won the first four years of the Iowa pork production contest. Winners were determined by the highest average pounds of pork produced a sow, when pigs were six months old. The 40 leading herds, for the four years, contained 4,522 pigs of which 2,347 were crossbreds and 2,175 purebreds. The crossbreds averaged 213 pounds at six months, the purebreds 190 pounds. The average crossbred litter weighed 1,810 pounds at six months; purebreds, 1,695 pounds. The average litter contained 8.5 pigs.

The Adaptable Soybean

Our soils have been running in the cornfield all winter. The attraction was the soybeans which had been planted with the corn. The exercise has been great for the hogs and the soybeans have furnished protein. If sows slack up on going to the field some corn can be scattered about as an added incentive.

Our clover seeding for this year is very spotted due to the severe dry weather last year. The stand varies from perfect in some places to absolute bareness in others. It is too good to plow up and yet not good enough to leave.

The good spots we have left undisturbed. Where the clover is fair we broadcast oats in this spring and disked them in; where there was no clover we plowed and planted soybeans. In this way, unless something unforeseen appears, we will be able to take a hay crop from the whole field and not disrupt our rotation.

Soybeans, when properly inoculated, are nitrogen gatherers; that is, soil builders.—Farm Journal.

Cake-Fed Calves Profitable

Calves wintered on North Park hay plus three-fourths of a pound of cottonseed cake per head daily put on almost three times as much weight as a similar lot of calves fed North Park hay only during a calf-wintering experiment at the experimental station of the Colorado Agricultural college.

Both lots of calves were exactly the same age, even to the number of days, it was emphasized by H. B. Osland, assistant in the animal investigations, in announcing the results of the wintering test.—Farm and Ranch.

Mrs. W. E. Miller Made First Shipment of Peas Saturday to A. & M.

Mrs. W. E. Miller, of Sandhill, made the first shipment of black eye peas to A. & M. College Saturday morning. 2,000 cans were shipped to fill two thirds of the entire contract which calls for 3,000 cans.

"We intended to ship the first of the peas at an earlier date but due to delay in receiving the packing crates were unable to do so," Mrs. Miller said.

This is the second year that Mrs. Miller has been awarded the contract to supply peas to the A. & M. College mess hall, being given the contract last year.

Work was begun the first of this week on the completion of the pea canning which is 1000 cans. The contract will be filled this month.

HI-LEAGUE PROGRAM

Sunday night at 7 o'clock, September 18, the following Hi-League program will be given:

Songs. Prayer. Scripture reading—Leader, Louise Gound. A God Who Cares—Mary Anna Ross.

Milton Sims left Monday morning for College Station, Texas, where he will attend A. & M. College this fall. He was a member of the 1932 graduating class from Floydada High School.

Mrs. Frank Moore in Lubbock Sanitarium Following Major Operation

Mrs. Frank L. Moore of this city underwent a major operation at the Lubbock Sanitarium and clinic at Lubbock Tuesday of this week. Mrs. Moore went to Lubbock Monday and the operation was performed Tuesday.

Mrs. C. Snodgrass accompanied her daughter to Lubbock and will remain there with her this week. Mrs. Moore is reported convalescing from the operation and is expected to return in two weeks.

N. A. Armstrong Shipped Carload of Cattle to El Paso

N. A. Armstrong, Floydada cattle dealer, shipped a carload of cattle to El Paso markets Friday of the past week.

HI-LEAGUE MEMBERS ENJOYED LAWN SOCIAL AT HOME OF MISS SMITH

Members of the Hi-League, of the First Methodist Church, enjoyed a lawn social and watermelon feast Saturday evening at the home of Miss Margaret Smith, 1020 South Wall street.

Miss Peggy McKinney, leader, had charge of the games for the evening. Following the series of games the group present enjoyed a watermelon feast.

Mr. and Mrs. J. D. McDPhaul, of Lubbock, visited in this city Saturday and Sunday with Mrs. McDPhaul's parents, Mr. and Mrs. R. F. Jackson.

NEWS! NEWS!

The greatest advance ever made in gasoline...

Mobilgas

with CLIMATIC CONTROL*

At last a gasoline has been made that gives the highest usable level of performance in all kinds of weather and at all altitudes. Climatic Control is the greatest thing that has ever happened to gasoline!

HOT • COLD RAIN • SHINE It's all the same to Mobilgas!

In addition to the outstanding advantage of Climatic Control, Mobilgas has an unusually high ANTI-KNOCK rating. All this at no increase in price. Mobilgas is a regular-priced gasoline!

There's a new driving sensation waiting for you at the Mobilgas pump. Fill your tank today and breeze ahead.

*CLIMATIC CONTROL is the preadjustment of the specifications of Mobilgas, before it is placed on sale in your locality. It automatically adapts itself to the variations in "engine heat", caused by changes in temperature, altitude, humidity and road "pull". In the Mobilgas Research Laboratories all these changing climatic conditions have been "manufactured" in hot and cold testing-chambers. The road performance of Mobilgas is thus scientifically verified at different "engine heats".

Stay with

MAGNOLIA

and You Stay ahead

Mobilgas logo, Magnolia Gasoline logo, Mobiloil logo, Metro logo, and the text 'Each Best in ITS Class C-13-MG'

"ENGINE-HEAT" READINGS (Above) On this control panel the exact performance of Mobilgas under the different "engine heats" produced in special hot and cold room tests is measured and recorded. Then Mobilgas is preadjusted to provide it with Climatic Control.
