Funeral Services Were Held Friday For Elbert W. Holmes

Funeral services were conducted here Friday afternoon at 3:30 p. m. for Elbert W. Holmes by Rev. J. L. Henson, of Lockney, at the First Methodist Church.

The deceased died last Wednesday instantly from gun shot in his hotel room in Gladewater. Before making his home there he lived in Dallas. He was a refiner before his death. Mr. Holmes had made his home in Floyd county for a number of years. He was born September 12, 1902.

Survivors are his mother, Mrs. E. W. Holmes, one sister, Mrs. Fred Taylor, of Sandhill Community; and four brothers: S. L. and J. K. both of Starkey Community, O. W. of Wichita Falls, and Roy Holmes, of Floydada. Forrest Johnson, of Dallas, who was a close friend of the deceased, attended the funeral services.

Pall bearers were: Wayne Gound, Burl Bedford, T. A. Norman, B. K. Barker, R. C. Henry and E. L. Norman. Flower girls were: Misses Ena Lea Fyfe, Helene and Maurine Hay, Mrs. J. B. Claiborne, Mrs. R. T. Terrell, Miss Oleta Jackson, Mrs. T. A. Norman and Mrs. Irene Wright.

F. C. Harmon Funeral Home had charge of the funeral arrangements. Interment was made in the Floydada Cemetery.

1,300 Confederate Pensioners Dying in Texas Yearly

AUSTIN, Texas, May 5—Confederate pensioners, soldiers and widows in Texas are dying at the rate of about 1,300 annually. The rolls now carry 802 men who fought in the Civil War and approximately 6,600 widows. Of the veterans 258 are married.

Because of the heavy toll the payment of the pensions to veterans may end during the next decade. Widows probably will be carried on the rolls for many years.

The average monthly payment last year was \$206,558, with a monthly maximum of about \$250.00. Payments on the first seven months of the current fiscal year averaged \$186,063 and are declining rapidly. The highest monthly payment this fiscal year was \$191,255 in September. The average monthly total in 1934 was \$238,333.

Texas, celebrating its 100th birthday, still is paying pensions to widows of soldiers who fought in the War with Mexico. Five pensioners, each receiving \$37.50 a quarter, are carried on the rolls. They are Mrs. Julia Redfield of Giddings, Mrs. Matt Smith of Bell County, Mrs. Mary Longley of Elkhart and Mrs. Mary C. Berry of Callahan County.

Payments started in 1889 when the Confederate pension law was passed. The law was amended by succeeding Legislatures and its qualifications were revised.

The fund now has a deficit of about \$5,000,000. This is because of the liberalization of pension requirements and decreased revenues from the State tax of 7c per \$100 valuation. The estimate is made by officials that the fund will be balanced about 1945 and will show a surplus after that.

The burden on the fund was increased by five major changes in the law from 1929 to 1931. The revisions made other than native Texans eligible for pensions, increased the pensions to \$25 for single veterans and widows and \$50 monthly for married veterans increased mortuary payments and placed thousands of widows on the rolls from 1900 to 1930.

Relatives Visited Mr. and Mrs. R. F. Jackson Sunday

Numerous Improvements Being Made for Cowboy Reunion at Stamford

STAMFORD, Texas, May 14—Numerous improvements which will add to the attractiveness of the area are being completed at the Texas Cowboy Reunion grounds, well in advance of the seventh annual Reunion which will be held here July 2, 3 and 4.

Probably the most important of these, from the standpoint of visitors, is the application of a preparation for eliminating the dust in the rodeo arena. This dust laying preparation is being installed at a considerable outlay and will add greatly to the comfort of rodeo spectators.

Grandstand No. 3 on the north side of the arena has been remodeled and comfortable seats of the type of more recently constructed stands installed. The roof of this section has been extended to keep out the sun and a similar improvement has been made on the roof of the south grandstand to give better shade.

Other improvements include erection of a new grain house, tool house, additional stalls and the painting of all buildings, gates and roofs of grandstands. Twenty-five shade trees—pecans, wild china and hoid—are—have been planted around the shore of the lake on the grounds, which is now brimful of water. Around the cowboy bunkhouse and about the chuck wagon area, 150 pecan sprouts and 50 lantanas have been planted.

A new high wire fence has been built on three sides of the grounds and a woven fence and steel gates erected at the main entrance.

Additional parking space has been provided at the cowboy bunkhouse and gravelled drives constructed in this new area. The Reunion grounds were enlarged this year by the purchase of 11 acres of land, making the total area now 42 acres.

Political Meeting Was Held at Center Friday Evening

A political meeting was held last Friday evening at the Center Community school. Speeches were given by nineteen candidates. Olin Miller had charge of the gathering.

The community was well represented and also people from other communities attended the meeting.

Floydada Rural Route Postal Boxes Were Inspected Last Week

Every year during the month of May the local postmaster is required, by postal laws, to make an inspection of each rural route to see if requirements are met. Mr. Smith finished his inspection last Friday. The majority of boxes were in good condition with the exception of paint and names. The requirement concerning this reads: The box and its support should be painted white and the name of patron inscribed on both sides of the box in neat black letters about an inch in height.

The box of J. R. Holmes on Route 4 is the only box that conforms to this regulation and rates 100 percent.

Mrs. Smith requests all patrons to paint boxes and place name on box in neat black letters. Many Centennial visitors will pass through Floyd County during the next six months. Let them remember Floyd as the county that had the most attractive mail boxes in the state of Texas.

Juniors Honor Seniors With Banquet Friday Night at Andrews Ward

The Senior Class of Floydada High School was honored with the annual Junior-Senior banquet at Andrews Ward gymnasium Friday night.

The Texas Centennial idea was carried out in the program and decorations. A color scheme of blue and pink were used. A fence was constructed around the room made of cedar posts. Cactus plants were arranged on the stage with a miniature farm placed in the center. A old miniature covered wagon was sitting near the farm.

The tables were covered with pink and blue crepe paper with a small cactus bur placed in the center. Place cards were cut in the shape of a star with Texas Centennial 1836-1936 printed on the front.

Mr. Bert Williams gave the opening invocation followed by a toast by Truman Kirk, president of the Junior Class, with the response given by Joe Dolph Montgomery. Miss Irene Mathews read the Senior class poem, which was followed by a novelty song arranged by Charles Kiker. The class prophecy was presented by Miss Marilyn Fry, followed by a piano solo by Miss Juanita Kushing. Harold Chapman read the Senior class Will, after which another musical number was given under the direction of Mr. Kiker. Superintendent A. D. Cummings delivered the main address of the evening. The program was closed following "Home on the Range" being sung by all.

The menu: Fruit punch canopies, candle light salad, pressed chicken, green beans, buttered potatoes, ripe olives, celery, iced tea, butter, rolls, strawberry ice cream, angel food cake, nuts and mints.

The banquet was prepared by the ladies of the First Methodist and First Baptist Churches.

Girls of the Home Economics Class of Floydada High School served the meal. The girls were dressed in pink and blue dresses and wore pink and blue aprons with matching headbands.

The Goodyear Rubber Industry Completes 250,000,000 Tires

AKRON, OHIO, May 14—Reaching a production milestone unequalled in the rubber industry, completion of 250,000,000 tires was announced by the Goodyear Tire & Rubber Co. last week.

As the company entered into production of its second quarter-billion tires, first casing to come out of the molds was an All-Traction tractor tire, a type which although announced but a few months ago, has already gained wide approval.

In view of Goodyear's pioneering work on pneumatic tires for farm use, Goodyear officials regarded it as particularly fitting that the first tire in the second quarter-billion should be designed for use on the farm.

Interesting statistics in connection with production of 250,000,000 tires were given by Goodyear engineers. The tires, if stacked one on top of the other, would reach a height of 17,750 miles. If laid side by side, they would encircle the globe four and one-half times, or reach nearly one-half the distance to the moon.

Converted into tire mileage the 250,000,000 tires would equal 3,000,000,000 miles, or more than enough for 60,000 round trips to the moon. If a single motorist, averaging 10,000 miles a year, tried to wear out this enormous production, it would take 75,000,000 years.

Construction of the tires consumed approximately 1,200,000,000 pounds, or 2,400,000 bales of cotton, and approximately 2,750,000,000 pounds of rubber. At the present rate of rubber production, this would amount to the world's supply for a year and a half. Placed in box cars the tires would make up a train that would stretch more than two-fifths the distance across the United States.

While embers glowed, reconstruction started

Before the flames had reached the telephone switchboard in a little Arkansas town—before the swirling wall of smoke had driven operators from their posts—plans for rebuilding the fire-doomed office were under way.

At a great warehouse in a distant city, men were loading a new switchboard, new telephone cable, new office equipment, into express cars. Nearer to the spot, cable splicers and workmen skilled in telephone construction were being taken from their jobs and rushed toward the office about to be destroyed by fire.

While embers still glowed in the fire-twisted skeleton of the old office, the work of reconstruction was under way.

One advantage of the Bell System's far-flung organization is this: When disaster flattens the telephone system, men and money and materials are instantly available for the prompt repair of the damage.

To the Citizens of the City of Floydada, Texas:

After full investigation and consideration, your City Council has unanimously determined to submit to your vote, at an election to be held May 30, 1936, the proposition for the issuance of Revenue Bonds of the City, in an amount not to exceed \$120,000.00, for the purpose of purchasing and constructing a municipal power and light plant.

A full official notice of such election appears elsewhere, but your City Council desires, in this informal statement, to call your attention to the following important facts:

1. The Bonds to be issued are not tax bonds, and cannot and will not be paid or payable out of funds raised by taxation; and each of such Bonds is required by law to contain the following provision:

"THE HOLDER HEREOF SHALL NEVER HAVE THE RIGHT TO DEMAND PAYMENT OF THIS OBLIGATION OUT OF ANY FUNDS RAISED OR TO BE RAISED BY TAXATION."

2. The Bonds to be issued will be secured by mortgage upon the plant to be constructed, and by pledge of the net revenues of such plant after payment of expenses of operation and maintenance, and by pledge of the net revenues of the City water system after payment of expenses of operation and maintenance to the extent of one-half the yearly maturities of principal and interest upon such Bonds but not to exceed \$400.00 per month in any event.

3. The City is not at this time, and will not be by a majority vote in favor of the Bonds, committed or under obligation to issue the full amount of the Bonds authorized, nor to let the contract for the purchase and construction of the proposed plant to any person, firm, or corporation; in the event of a majority vote for the issuance of the Bonds, your City Council will, as required by law, advertise for bids upon such contract for the construction and purchase of the proposed plant, and the contract will be awarded the lowest bidder, and Bonds issued only to the extent necessary to pay the contract price.

4. The meaning and purpose of the second proposition mentioned in the official election notice, and upon which you will vote May 30, 1936, is simply this: Prior to the adoption of Acts 1934, 43rd Leg., 4th C. S., P. 49, Ch. 18, by the Legislature, a City which had pledged the revenues of any utility, such as a light plant, for the payment of a debt, could not use the revenues of such plant for any purpose other than the payment of that debt until such debt was fully discharged; but since the adoption of the Act of the Legislature above referred to, any City adopting the benefits of the Act may, in the same situation, after making provision for the payment of the debt, use the excess revenues for any municipal purpose. Thus, in the event your City constructs the proposed plant, it will be enabled, by the adoption of the Act of the Legislature, to use the excess revenues of such plant, after making adequate provision for payment of the Bonds, to pay general expenses of the City and other indebtedness of the City.

Your City Council unanimously favors the construction of a municipal power and light plant, but the final decision is up to you; space will not permit a detained discussion of the benefits of a municipal plant, but as concrete examples of such benefits, your attention is directed to the nearby Cities of Spur, Lubbock, Brownfield, and Tulsa, in each of which a municipal plant has proved a marked success, not only in providing substantially lower electric rates, but in materially reducing taxation and improving the financial condition of the City.

Respectfully submitted,

YOUR CITY COUNCIL

"Magnolia Lounge" at the Texas Centennial

The Magnolia Petroleum Company is building "Magnolia Lounge" on the Texas Centennial Exposition grounds, Dallas, at a cost of more than \$75,000, to provide rest and entertainment for weary sightseers.

BE OUR GUEST AND REST AT THE MAGNOLIA LOUNGE

Planned to typify the friendliness of the South west and its picturesque history of its various sections, the Magnolia Lounge is rapidly approaching completion on the Central Exposition Grounds of the Texas Centennial. Fred M. Lege, Jr., vice president in charge of marketing for the Magnolia Petroleum Company, announced this week. A two-story building of ultra-modern design, completely air-conditioned by its own 20-ton refrigeration plant, and an adjoining cactus garden will provide a unique method of restful entertainment for weary sightseers and will represent an expenditure of more than \$75,000, Mr. Lege said.

Magnolia Lounge will offer a glimpse of the past and the present of the five states of Magnolia land and a sample of Texas hospitality. All Centennial visitors will be invited to relax in cool comfort, among the interesting surroundings, as guests of the Southwest's first petroleum producing, refining and marketing organization.

Entering the Central Centennial Exposition grounds through the Grand Avenue entrance, visitors will find Magnolia Lounge near the Hall of Natural History, Fine Arts Gallery and other buildings in the civic and cultural group which sur-

round a spacious lagoon. The approach to the building, an extensive terrace, is to be planted with many rare species of cactus native to the Southwest, with each plainly marked to show its nature, locale and history. The building itself is of stucco on concrete with hollow tile walls. An elevated promenade deck reached by an outside stairway extends over a sheltered area on the ground floor and will be equipped with comfortable chairs and tables for guests. Beautiful interior decorations and furnishings are by Neiman-Marcus of Dallas. Rest rooms for men and women will be handsomely finished in exotic marble and tile.

In the spacious lounge room where comfortable seats for 100 persons will be provided, continuous talking motion pictures will be projected on a translucent screen in such a manner that they will be clearly visible while the room remains lighted. Throughout the past year Magnolia has been producing these pictures

with the utmost care in order to give Centennial visitors a true Centennial picture of the Southwest as it is today with a historical background depicting its romantic past.

Completely non-commercial, the Magnolia Lounge has been planned in every detail solely to give the Centennial visitors a comfortable rendezvous where they may rest and at the same time become better acquainted with the great Southwest of yesterday and today. Magnolia invites Centennial visitors to "Be our guests and rest at the Magnolia Lounge."

Ford Exposition to Show How Southwest's Products Are Employed in Manufacture of Modern Motor Car

The opening in Dallas June 6 of the great Ford Exposition will show to the Southwest how its own products make the Ford, the Lincoln and the Lincoln-Zephyr automobiles possible. This unusual photograph well pictures the vast proportions of the Ford Exposition building, in which will be housed an exhibition showing how importantly Southwestern raw materials enter into the making of modern cars.

The huge Ford Exposition building, erected especially for the Centennial Exposition in Dallas, Texas, opening June 6, will be devoted largely to showing how importantly the raw materials of the Southwest enter into the manufacture of Ford V-8, Lincoln and Lincoln-Zephyr motor cars.

Forty-three thousand of a total of 55,000 square feet in the great air-conditioned structure will house an interesting group of manufacturing and testing exhibits, a pageant of transportation, dioramas showing the use of raw materials of the Henry Ford trade school at Dearborn, Michigan.

Displays carrying out the principal theme of the Ford Exposition show how such Southwestern products as cotton, mohair, wool, corn, cattle, soy beans, resin and rice are

employed in the making of Ford and Ford-sponsored automobiles.

Five hundred and fifty-eight thousand acres, producing 160 pounds to the acre, raise the cotton used in each one million Ford units. A working exhibit at the Ford Exposition will show how cushion tops for Ford V-8's are stitched at the average rate of one every five seconds—consuming annually more than 57,000,000 pounds of cotton. How some of the millions of pounds of cotton used by the Ford Co., any is processed in its final stage at the factory will be shown in the demonstration of the machine known as the "multi-pleater."

Used in making seat cushion tops and backs, the multi-pleater can sew at one time as many pleats as desired. In producing Ford V-8 cushions, eight pleats are made simult-

aneously. At the same time, cotton batting is fed into the machine, sewed into place, and the cushion cover is sewed to the cotton sheeting. The machine in regular production makes 24,000 stitches a minute and turns out 12 to 14 cushion tops every sixty seconds. This machine is but one example of how Southern agriculture contributes to the automobile industry.

With the Firestone Tire & Rubber Company exhibit in the Ford Exposition building showing another important use of cotton, the making of fabric for tires, it is further revealed that for one million Ford units, 25,000,000 pounds of cotton are required. It has been estimated that in production of Ford units this year, approximately 116,000,000 pounds of cotton will be used.

STEEL MAKERS say—"Ford buys the best steel." Other suppliers of materials and parts will tell you—"Nobody checks up as closely on quality and price as Ford."

This means a great deal to you as a motorist. It is our way of safeguarding the interests of every purchaser and it leads to this—"The mechanical depreciation on a Ford is less than most cars, especially after the first year."

This is one sign of the extra value in the Ford V-8. Accuracy in manufacturing is another. (The Ford is made to unusually close precision limits.) And there is a long list of fine-car features that are exclusive with Ford in the popular field.

Have you a V-8 engine in your car? You pay \$1645 for it in any other car but Ford.

Does your car have Center-Poise Riding? Ford gives you this modern feature—"a front-seat ride for back-seat passengers."

Does your car have fool-proof Super-Safety Mechanical Brakes? The Ford V-8 gives you this proved design, with 186 square inches of braking surface.

Does your car have a genuine steel body structure? Does it have Safety Glass all around? Ford is the only low-price car that gives you this extra protection without extra cost.

You get these fine-car features in the Ford V-8 because of Ford manufacturing methods and low-profit policy.
