

"By Helping Business You Help Yourself"

The Floyd County Plainsman

Floydada, Floyd County, Texas, Thursday, September 28, 1939

Number 44

Soil Conservation District Act Elicits Much Discussion On Plan

the most logical one that can be devised, and if formation of the district is justified.

It may be determined that additional territory should be included; if so, the hearing may be reconvened at a later date.

On the basis of the hearing, the Board will deny or affirm the petition. If denied, another petition may be filed after a six month interval. If affirmed, the Board will define the legal boundaries of the proposed district and will give notice of an election.

Election to form a district will be by secret ballot, supervised by State Board. To be eligible to vote, an individual must be both a landowner within the boundaries of the proposed district and a qualified voter.

A two-thirds majority of the votes cast is necessary to form the district, and results will be published by the Board. Even a two-thirds majority, however, may not result in the formation of a district, for the Board will exercise its judgment on this score. If, for instance, there were 200 votes for a district and 100 against, but 2,600 qualified voters did not cast a ballot, the Board might deny the petition on the ground that the vote was not representative.

If the petition is affirmed on the basis of the election, the Board will appoint two supervisors. These appointed supervisors will present an application for charter to the Texas Secretary of State. Within 30 days after the charter is issued, nominating petitions may be filed with the State Board to nominate candidates for three elective superiors. Each petition must be signed by 10 or more landowners.

Then follows another election, with all landowners eligible to vote for three of the candidates. The three elected supervisors will then join the two appointees to form the governing body of the district. The three elected supervisors will serve for a term of three years; the two appointees for one and two years as designated.

Under the law, the supervisors' power and duties are to engage such employees as they may require, collect pertinent information, provide for execution of surety bonds, carry out control measures on state lands and other lands with the consent of the owner, acquire, maintain, and dispose of property, require contributions in the form of services, materials, and so on from the landowners, to sue and be sued in the name of the district, execute contracts and instruments, and, among other things, to enter into cooperative agreements with governmental agencies and landowners.

Also among the duties of the supervisors is the presentation of ordinances or land use regulations to the landowners within the district. This is one of the most discussed phases of the law.

Enactment of ordinances or land use regulations involves an election supported by a 90 per cent majority vote of landowners who cast votes. To repeal such ordinances, once enacted, requires only a petition of an individual followed by a simple majority vote of landowners in the subsequent election.

To enforce an ordinance, supervisors must prove that such land use regulations as may be drawn up are not being observed on particular lands, and that such non-observance not only tends to increase erosion on such lands, but is interfering with the prevention or control of erosion on other lands within the district.

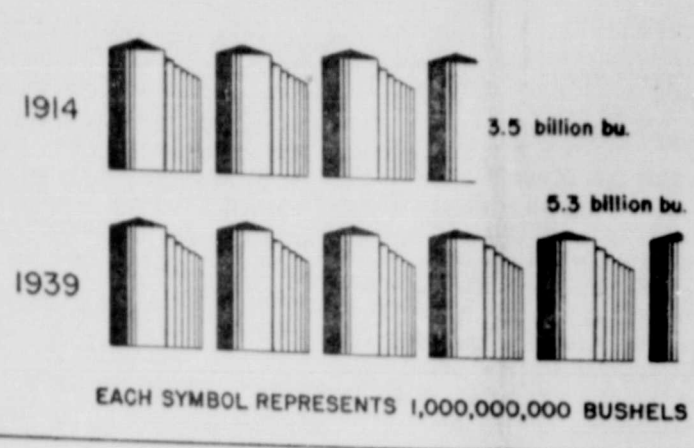

Experience in other states has shown that there is seldom any necessity for the enactment of ordinances. It is thought that very few, if any, districts will ever use this provision.

After a district has been formed through election, charter issued, and so on, it cannot be discontinued for five years. Once this period is over, discontinuance of a district requires a petition signed by 50 landowners within the district followed by a simple majority vote of landowners in the election that follows.

Responsibility for initiating and carrying out a coordinated program of soil and water conservation and proper use, under the law, is placed squarely upon the landowners themselves. Duly elected landowning farmers and ranchmen will conduct the affairs of organized groups with the assistance of any public agencies whose cooperation they may see fit to request through the State Soil Conservation Board.

Conservation authorities believe that the two long time benefits resulting from formation of soil con-

WORLD WHEAT SUPPLY LARGEST IN HISTORY

Funeral Services Friday For McNeill Infant

Funeral services were held Friday afternoon at 2 o'clock at the Harmon Funeral Home for Donald Wayne McNeill, infant son of Mr. and Mrs. Bill McNeill, of the Dougherty community. The child was born September 21, and passed away within a short time after birth. Rev. Jno. E. Eldridge officiated. Survivors besides the parents are one brother, Troy Lee, and one sister, Barbara.

Interment was made in Lakeview Cemetery with Harmon Funeral Home in charge of arrangements.

Wheat Crop Insurance Deadline near

College Station September 27.—With 2,528 applications for 1940 wheat crop insurance received from 69 Texas counties, the State Agricultural Conservation Committee here has issued a final warning on application deadlines for insurance.

For the 38 counties in the Panhandle area, everything North and West of King County, final date to apply for crop insurance is September 30; for the rest of the state the deadline is October 15.

The committee pointed out that farmers who want insurance on their 1940 crops must apply before seeding their wheat and that premiums are payable either in bushels of wheat in the form of a warehouse receipt or the equivalent in cash, when the application is filed.

Meanwhile, payments for damage to 1939 wheat crops continued with 998,145 bushels, or the cash equivalent of \$925,223, having been paid out by the Federal Crop Insurance Corporation in 63 counties according to a report from E. R. Duke, state crop insurance supervisor at Amarillo. The farmers receiving indemnities had paid 8,547 bushels in premiums for the insurance.

Leading the list in amount of insurance claims paid is hard-hit Briscoe county where 100,801 bushels in indemnities have been paid on 134 policies.

Still pending in Texas are claims in 74 policies for 24,650 bushels. These claims, Duke said, are being audited and will probably be paid in a short time.

Fire Destroys Old Splawn House In East Floydada

Fire of unknown origin destroyed the old Splawn home located in east Floydada early Friday morning. The blaze was first detected at 3:10 and warning was sounded by the Q. A. & P. Railway switch engine whistle. The house and its contents were completely destroyed.

Johnnie Cantrell and family were living in the building and did not awake in time to save any of their household goods or wearing apparel, barely having time to escape the flames themselves.

The local fire department answered the call, but the fire had reached such headway before their arrival, it was impossible to render any aid in saving the property, Chief Vern Elliott explained.

Miss Julia Rebecca Fulkerson Weds John Peeler Truett

John Peeler Truett of Chehalis, Washington, Route 3, Mary's Corner, and Miss Julia Rebecca Fulkerson, of Whiteflat were married at Matador Saturday, September 23, with Rev. G. W. Tubbs officiating at the ceremony. The bride is the daughter of Mr. and Mrs. Cudd Fulkerson, of the Whiteflat community.

Following the ceremony the couple left for California where they planned to attend the World's Fair before going to Washington to make their home. Mr. Truett is engaged in business at Chehalis, Washington.

Second National Letter-Writing Week, Oct. 2 to 8

In view of the splendid success of National Letter Writing Week, observed last year from October 2 to 8, it has been decided to repeat the event this year. The period, October 1 to 7, 1939, has been selected for this purpose.

Do you owe a letter or a vote of thanks or sympathy. If you do, write it next week.

W. M. MASSIE HOME FROM LUBBOCK HOSPITAL

W. M. Massie who had been in a Lubbock hospital for several weeks suffering from an infected wisdom tooth, returned home last Thursday the much improved. Mr. Massie had the tooth extracted several days before he left the hospital.

Conservation districts will come through efficiently of cooperative effort and by more effective use of technical aid now offered by the SCS, Extension Service, and vocational teachers.

James D. Herring, Former Resident of McAdoo Dies

James D. Herring, age 63 years, passed away Thursday, September 21, at the home of his daughter, Mrs. Fred Norville, of Moran, Texas. Mr. Herring was a former resident of McAdoo, but in recent years had resided with his daughter. Deceased was born October 10, 1875, in Hill County, Texas, and was married to Miss Elsie Izora Brown also of Hill county. His wife preceded him in death 13 years ago.

Eight children were born to this union, seven of whom survive. One daughter, Mrs. Iva Gilmore passed away June 7, 1934. Surviving are three sons, J. C. Herring, McAdoo; H. O. Herring, Littlefield; W. C. Herring, Moran, Texas; four daughters, Mrs. Fred Norville, Moran; Mrs. T. B. Bass, Morton; Mrs. J. H. Greenwood, Deming, New Mexico; eleven grandchildren survive, one grandchild preceded him in death. All the children were at his bedside when he passed away except one daughter, Mrs. J. H. Greenwood, of Deming, New Mexico, who has been ill for sometime and was unable to be with him.

Funeral services for Mr. Herring were held Friday afternoon at the Methodist Church at McAdoo. Rev. C. E. Pipkins, of Matador, Methodist minister officiating, assisted by Rev. Finas Williams, of Moran, Baptist minister, Rev. Russell M. Pike, McAdoo, Methodist minister, Rev. J. A. Branaman, Baptist minister, McAdoo. Deceased was united with the Methodist church in 1906. Interment was made in the McAdoo cemetery beside his wife. Harmon Funeral Home had charge of arrangements.

Pallbearers were: T. J. Turner, Breckenridge; M. T. Dwiggins and H. L. Lenair, San Angelo; W. A. Brantley, H. D. Nichols, and Jno. A. Allen, all of McAdoo.

Flower bearers were: Mrs. Inez Dennis, Mrs. W. A. Brantley, Miss Nadene Nettles, Miss Lucile Aull, Miss Reba Deiter and Miss Dorothy Lee Early.

Allen and Carmack Show Winners at Tri-State Fair

C. B. Carmack and Oliver Allen were awarded the following winnings in the Tri-State Fair Poultry Show at Amarillo:

CLASS 112 REDS
Oliver Allen showed 25 birds and won 11 exhibits; 1st cock, 1st hen; 1st cockerel; second and third pullet; first old pen; first and second young pen.

Allen showed the best parti-color cock, cockerel and pen; best 20 birds of American class; best cock, cockerel, hen, pullet and pen in show. The cockerel that won first and sweepstakes was judged best bird in the show—all breeds competing.

WHITE ROCKS
C. B. Carmack was awarded first white rock cockerel; second pullet; first cockerel, fourth pullet; cockerel was judged best solid colored cockerel in show in this class.

BARRED ROCK
First cockerel, second and third pullet.

Vacationing In Florida

Mrs. Nora Hatley, local manager of the Western Union, and husband, H. B. Hatley, left Friday for a two weeks vacation trip to Florida. Mrs. Hatley is being relieved by John Allen, Western Union relief manager.

The party plan to spend most of the time in Florida, and will likely make a short trip to Havana, Cuba, while at Miami, Florida.

SCHOOL OPENING BOOSTED SALES OF MERCHANDISE FOR TEXAS BUSINESS

Austin, September 27.—School days for Texas 1,400,000 students—calling for new shoes, shirts, frocks and hats—boosted August sales of Texas department and apparel stores 22.9 per cent above July, University of Texas economists announced today.

One hundred stores and shops reported to the University Bureau of Business Research that their August business more than doubled the usual 10 per cent seasonal increase from July to August.

Commissioners Court Call Special Election For November 4th to Create County Superintendent Office

O. L. Stansell Cow Wins Grand Champion Banner at Amarillo Fair

At the Tri-State Fair held in Amarillo last week Randall and Floyd Counties were winners in the Jersey Class. To Allen Premier Peggy, senior cow belonging to O. L. Stansell went the grand champion cow banner while Pansy's Dreaming Sam, belonging to Tierra Blanca Farms of near Canyon, was named grand champion bull.

P. E. Premier Champion, belonging to W. H. Brock, of Floydada, was junior and reserve champion bull while Knight's Sweet Buttercup of Tierra Blanca Farm, was junior and reserve champion cow.

More than 100 head of Jerseys were entered in this year's show. Approximately 440 head of cattle—165 Herefords, 100 milking shorthorns, and 175 dairy cattle—were entered in the show.

Certificate of Title Act Will Be Effective October 1

On October 1, 1939 the new certificate of title act goes into effect. Same having been passed by the last Texas legislature.

All tax collectors of Texas are the designated agent for the department of public safety, and will take the application at the tax collector's office, the application will be forwarded to the department of public safety at Austin, and within 10 days the certificate of title will be mailed direct to the owner of the vehicle.

A fee of 25c is charged for the certificate of title and is payable to the collector when the application is made.

As a convenience, it will pay every owner of a motor vehicle to get his title as early as possible, while it is not compulsory that he secure the title at once, but a person cannot sell or transfer an automobile without first obtaining title to same, and would eliminate waiting 10 days to obtain same from the department of public safety.

The following information is required to obtain the certificate of title:

- The name and address of the purchaser and seller at first sale or transferee and transferee at any subsequent sale.
- The make of vehicle.
- The body type.
- The motor number.
- The serial number.
- The number of the license plates currently assigned thereto and the state of issuance, whether in this or any other state.
- The names and addresses and dates of any liens on the motor vehicle, in chronological order of recordation.
- If no liens are registered on the motor vehicle, a statement of such fact.
- A space for the signature of the owner and the owner shall write his name with pen and ink in such space upon receipt of the certificate.

S. N. McPeak's Barn Destroyed By Fire

S. N. McPeak's barn was destroyed by fire of unknown origin early Monday. Mr. McPeak had considerable wheat, cotton seed and maize stored in the barn that was a total loss. The stock that was in the lot was saved, but they were unable to save any of the feed.

Mr. McPeak lost his home by fire about two months ago, and has under construction a new home that will be finished within the next two weeks.

MRS. JIM BANDY ILL

Mrs. Jim Bandy who has been ill for several days was moved to the Plainview hospital Sunday for treatment. Mrs. Bandy is the daughter of Mr. and Mrs. A. S. Hollingsworth.

The Commissioners Court met in special session Monday for the purpose of acting on a petition presented to the court signed by 321 voters, asking that the court call a special election to create the office of County Superintendent of Floyd County. This office was automatically created in June 1924, when the total scholastic rolls of the county reached 3101. At the present time the scholastic roll is approximately 2,600, and due to the loss in scholastics of the county it becomes necessary for the court to call the election creating the office permanently. Otherwise the office will, January 1st, 1940, be combined with the County Judge's office as it existed before the scholastic enrollment reached 3,000.

Price Scott was appointed by the Commissioners Court as Floyd County's first Superintendent effective July 1, 1924, and at present Mr. Clarence Guffey is filling the unexpired term of Walter Travis, which terminates January 1, 1940.

Millions Are Paid To Cotton Farmers In Adjustments

College Station, September 27.—Texas cotton farmers who are getting their 1939 price adjustment checks at an exceptionally fast clip, are reaping the fruit of simplicity.

B. F. Vance, assistant state administrator, said more than \$7,521,454 in 1939 cotton payments has been certified for payment in the last three weeks, and that most of the remaining 13 million dollars due of this series of checks in the state probably will be paid by the middle of October if the present rate of disbursement keeps up.

More than 12 million dollars has been paid out to date in the 1939 cotton price adjustment program.

Main factor in the speedy service, Vance explained, is the use of an exceptionally simple application-for-payment form. It records what the farmer has done to qualify for payment.

As many as 8,500 of these forms have been audited and certified here in a single day, and rarely has an application spent more than 3 days in the state office before going to the disbursing agency in Dallas, Vance added.

"The accuracy which has characterized the work in county offices has been every helpful," Vance said. "And of course the simple application form would not have been possible had there been any fundamental changes in the farm program, from 1937 to '39, as there had been from year to year during the program's previous history."

Important Meeting Of School Officials To Be In Lubbock

An important meeting of county superintendents, principals, teachers, trustees and school patrons will be held in Lubbock High school auditorium Friday afternoon at 2:30, Oct. 27, at which time State Superintendent L. A. Woods, along with other officials, will speak.

School people of district two will be in the meeting. Senator Olan R. Van Zandt, chairman of the joint legislative committee of district nine, Tigua, and H. E. Robinson, director of equalization, state department of education, will address those attending. Principal discussion subject will be the new equalization law.

South Side Baptist Church Calls Pastor

The South Side Baptist Church has announced that their congregation recently called Judge Hill Stewart as local pastor of their church. Judge Hill will assume his duties Sunday at 2:30 and will also hold services Sunday night. All members are urged to be present.

Rev. Stewart plans to bring a delegation of several cars of people from Lubbock Sunday for the afternoon services.

RATE ORDINANCE

ORDINANCE NO. 211

AN ORDINANCE FIXING AND PRESCRIBING MINIMUM RATES FOR ELECTRIC SERVICE, AND ADOPTING RULES AND REGULATIONS AS TO SUCH SERVICE.

WHEREAS, on the 25th Day of September, 1939, a hearing was had, in accordance with the provisions of the Charter of the City of Floydada, Texas and Ordinance No. 207 of said City, relative to the regulation of the rates and services of persons, firms, or corporations (private or municipal) selling or furnishing electricity for public use or for the use of any person, firm or corporation within the City of Floydada, Texas:

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF FLOYDADA, TEXAS:

ARTICLE I
DEFINITIONS

(1) The term "utility", as used herein, means all corporations (whether private or municipal), persons or firms, now or hereafter operating in the City of Floydada, Texas any generating plants, any distribution systems, any wires, poles or lines, property or equipment, while using any of the streets or alleys within said City, for the purpose of carrying on its business of generating, distributing or selling electric current for light, power or other purpose.

(2) The term "consumer", as used herein, means any corporation

(whether private or municipal), person or firm using any electric current from any utility as herein defined.

ARTICLE II
SCHEDULES

(1) The hereinafter prescribed rates shall, unless and until changed by ordinance of the City Council, be the minimum rates fixed by the City Council of the City of Floydada, Texas for electric current for light, power or other purpose, furnished or sold by any utility to any consumer within the City of Floydada, Texas; and this Ordinance shall not prevent any utility from fixing maximum rates in accordance with its desires; but all rates must be the same for all consumers who come within, or are classified within, each class of users, and no combination of schedules shall be permitted which will reduce the minimum rates as hereinafter fixed; nor shall any utility make any agreement for electric current or service, whereby any consumer shall receive such electric current or service at a rate lower than the minimum fixed herein; nor shall any utility give or grant to any consumer directly or indirectly by any means, arrangement or device, any rebate upon or reduction of any minimum rate herein specified.

(2) The following schedules of rates are hereby adopted and fixed as the minimum rates which shall be charged for electric current or service hereafter furnished by any utility to any consumer:

SCHEDULE B—RESIDENTIAL SERVICE

ENERGY CHARGE: First 30 KWH per month at 9c per KWH, Next 100 KWH used per month at 3c per KWH, Excess KWH used per month at 1.8c per KWH

MINIMUM MONTHLY BILL: \$1.50. The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to the net bill. SERVICE: 110-220 Volt—Single Phase.

APPLICATION: This rate is applicable for all regular domestic uses of electricity. This rate shall not apply to apartment houses and other buildings in which there are two or more tenants served through one meter.

SCHEDULE CL—COMMERCIAL LIGHTING AND OR COOKING AND OR HEATING AND OR REFRIGERATION

ENERGY CHARGE: First 50 KWH used per month at 7c per KWH, Next 200 KWH used per month at 5c per KWH, Next 750 KWH used per month at 3 1/2c per KWH, Next 2,000 KWH used per month at 3c per KWH, Excess KWH used per month at 2c per KWH

MINIMUM MONTHLY BILL \$1.50. The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to the net bill.

APPLICATION: This rate is applicable for service to all commercial places of business, stores, shops, factories, hotels, lodges, churches, apartment houses, public buildings (except schools), served through one meter; and to all classes of business where single phase, 110-220 volt service is supplied, including sign and awning lighting when connected to the regular commercial lighting meter.

SCHEDULE CP—COMMERCIAL POWER (SECONDARY VOLTAGE)

DEMAND CHARGE: None. ENERGY CHARGE: First 50 KWH used per month per KW connected at 5 1/2c per KWH, Next 50 KWH used per month per KW connected at 4c per KWH, Next 300 KWH used per month per KW connected at 2 1/2c per KWH, All over 400 KWH used per month per KW connected at 1c per KWH. MINIMUM MONTHLY BILL: \$1.25 PER KW CONNECTED. The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to net bill. SERVICE: Three phase, 220 volt, 60 cycle for all motors in excess of 3 HP except in cases where three phase service is not available in which case motors

up to 10 HP may be connected on 220 volt, single phase service. Small motors up to 3 HP capacity may be connected on single phase service. APPLICATION: This rate is applicable for all classes of commercial power service including commercial heating and cooking devices, rectifiers, battery chargers, X-ray machines and other miscellaneous commercial apparatus except lighting.

SCHEDULE EW—ELECTRIC WELDING

SERVICE CHARGE: \$1.00 per month per each KW of welding transformer capacity as per manufacturer's name plate rating, which service charge entitles the customer to 20 kilowatt-hours use of energy per month per KW of welding transformer capacity installed, plus

ENERGY CHARGE: Next 500 KWH used per month at 5c per KWH, Next 1,000 KWH used per month at 3c per KWH, Excess KWH used per month at 2c per KWH

MINIMUM MONTHLY BILL: Service Charge as above. The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to net bill. SERVICE: Power service supplied will be 110 volts, single phase, 60 cycle (with reasonable variation in voltage and in cycle). APPLICATION: This rate covers service furnished for Arc Welding Machines, and none other.

SCHEDULE CHC—COMMERCIAL HEATING AND OR COOKING

ENERGY CHARGE: First 30 KWH used per month per KW connected at 4c per KWH, Excess KWH used per month per KW connected at 2c per KWH

MINIMUM MONTHLY BILL: \$1.50 per KW for each KW connected. The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to net bill. DETERMINATION OF KW CONNECTED: The KW Connected shall be determined by the manufacturer's name plate rating of all equipment connected, or at the option of the utility may be determined by measurement.

SCHEDULE DHCR DOMESTIC HEATING AND OR COOKING AND OR REFRIGERATION

ENERGY CHARGE: All Energy used per month at 4c per KWH. MINIMUM MONTHLY BILL: \$2.50 per month. Above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to net bill. SERVICE: Single Phase, 110-220 volt, 2 or 3 wire. APPLICATION: This rate is applicable to domestic heating, cooking and refrigeration, or either of them, where customer desires this class of service on a separate meter. No lighting equipment shall be connected under this rate, and this rate shall not apply to apartment houses and other buildings in which there are two or more tenants served through one meter.

SCHEDULE SAW SIGN AND OR WINDOW LIGHTING

ENERGY CHARGE: All KWH used per month 6c per KWH. MINIMUM MONTHLY BILL: \$1.50. The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to net bill. SERVICE: Single phase, 110 volt, 2 wire. APPLICATION: This rate is applicable only to lighting of signs, windows, and awnings of commercial establishments, and not to ordinary interior lighting of such establishments. Customer shall make all installations and furnish all lamp renewals.

SCHEDULE WP WHOLESALE POWER PRIMARY SERVICE—LIMITED DEMAND AVAILABILITY

This rate is applicable for industrial electric service where the contracted load is not less than 25 hp, only where customer agrees to limit his power requirements during the hours of peak or maximum demands on the utility's system each day in the months from October to February, both inclusive, should they be requested to do so, and is to be used only when customer executes utility's standard form of contract for this service, guaranteeing a minimum billing for service. Where the customer's connected load is 25 hp or over, incidental lighting required by the customer in the manufacture of its product will be allowed up to 15% of the contracted load; under no circumstances shall energy required for lighting purposes be allowed on this rate unless the customer's connected load is 25 hp or above. RATE: \$2.25 per month per kilowatt of maximum demand, which entitles customer to use during that month sixty (60) kilowatt-hours per kilowatt of maximum demand. .02 per kwh for the next 30 kwh per kilowatt of maximum demand. .0125 per kwh for the next 120 kwh per kilowatt of maximum demand. .01 per kwh for all current in excess of above stated amounts. The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to net bill. DETERMINATION OF MAXIMUM DEMAND: The customer's monthly maximum demand shall, at the option of the utility, be determined by estimate or

SCHEDULE MS MUNICIPAL SERVICE

WATER PUMPING: All KWH used per month 2c per kwh. STREET LIGHTING: 100 Candle Power Lamp, all night service 87 1/2c per mo. per lamp. 250 Candle Power Lamp, all night service \$1.25 per mo. per lamp. MINIMUM MONTHLY BILL None. Above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to net bill. APPLICATION: The above rates are applicable to the City of Floydada, Texas, for the specific purposes of pumping water for the municipal water system, and lighting the public streets in said City, respectively.

SCHEDULE PS—PICTURE SHOW

SERVICE CHARGE: 75c per KW connected as determined by manufacturer's name plate rating, or at the option of the utility by demand metering equipment, plus. ENERGY CHARGE OF: First 100 KWH used per month at 4c per KWH, Next 900 KWH used per month at 3c per KWH, Next 2,000 KWH used per month at 2c per KWH, Excess KWH used per month at 1c per KWH

MINIMUM MONTHLY BILL \$60.00

The above rate is net if paid on or before the 10th day of the month following that in which service is rendered. If not so paid, 5% will be added to the net bill. SERVICE: 110-220 volt, single or three phase, 2 or 3 wire.

(3) Whenever temporary service is required by the consumer, the utility shall have the right to charge, in addition to the rates above set out, the actual cost of making any necessary connections from the lines of the utility to the consumer's lines and of the disconnecting thereof, or such part of such cost as may be agreed upon by the utility and the consumer as being reasonable.

ARTICLE III REGULATIONS

(1) PAYMENT OF BILLS. All bills for electric service shall be rendered monthly (unless shorter term is made by disconnection, in which case bill shall be due upon disconnection), on the first day of the month following the month in which service is rendered, and if any bill is not paid on or before the 10th day of the month following the month in which service is rendered, such bill shall be delinquent and a penalty of Five (5%) Per Cent of the amount thereof shall be added thereto and collected from the consumer when the bill is paid; and if such bill including penalty is not paid on or before the 15th day of the month following the month in which service is rendered, service of such consumer shall be disconnected, to be reconnected only upon payment of the delinquent bill including penalty. Failure of consumer to receive bill shall not postpone date of delinquency.

(2) SECURITY OR DEPOSIT. Any utility as hereinabove defined may require reasonable security for the payment of its bills and no current or service shall be furnished to any consumer who is in default in payment of any indebtedness owing to such utility for electric current or service theretofore furnished by such utility. (3) SERVICE. The service furnished the consumer shall be of such voltage, frequency, and phase as specified in the Schedules of Rates. The utility shall maintain the service up to the "point of delivery", and meet all necessary requirements up to the point of delivery.

(4) POINT OF DELIVERY. The point of delivery shall be where the utility's wires or apparatus ties to the consumer's installation. (5) CONSUMER'S INSTALLATION. All wires, switches, appliances and apparatus of an electrical energy consuming character, located on the consumer's side of the point of delivery and including service leads from the point of delivery, whether owned outright, or leased by the consumer, shall be installed and maintained by the consumer, at his own expense, in accordance with good electrical practices and all applicable laws of the State of Texas and Ordinances of the City of Floydada, Texas.

(6) SERVICE WIRES AND SERVICE LEADS. The wires of the utility shall be referred to and known as the Service Wires and shall be connected through necessary meter to the Service Leads of the consumer's installation at the point of delivery. (7) CONNECTED LOAD. The term "connected load" as used herein, means the combined nominal rated capacity of all motors or other energy consuming devices installed on consumer's premises which may, at the will of the consumer, be operated with energy supplied by the utility. By contract the utility and the consumer may agree for seasonal or periodical connected load, provided, that such contract shall not be for current for a period of less than four months, nor shall the rate provided in such periodical or seasonal contract conflict with the rate schedules herein provided.

(8) ACCESS TO CONSUMER'S PREMISES. The duly authorized agents of the utility shall have access at all reasonable hours to the consumer's premises for the purpose of inspecting wiring and electrical devices, removing the utility's property, reading and testing meters, and any other purpose incident to carrying out the utility's contract with the consumer. The utility, however, does not assume the duty of inspecting the consumer's wiring or apparatus, and shall not be responsible therefor.

(9) PROTECTION OF UTILITY'S PROPERTY. The consumer shall protect the utility's property on

the consumer's premises, and shall not permit any one except the utility's agents, or any person authorized by law, to inspect or tamper with the utility's wiring and apparatus. (10) CONSUMER'S RESPONSIBILITY. The consumer shall assume full responsibility for the electric current at and from the point of delivery upon the consumer's premises, and for all wires, apparatus and appurtenances connected therewith. Consumer shall provide and at all times maintain, free of expense to the utility, and at a suitable and easily accessible location within the premises to be supplied with electric current, sufficient and proper space for the installation of meter or meters, or other devices of the utility's, and shall provide necessary meter board, wiring and meter loops when required.

(11) METERS AND MEASURING DEVICES. The utility shall supply electric current only through meters or other measuring devices furnished and owned by the utility. Meters shall be supplied by the utility without rental, and shall be of the integrating or demand type, or both, and shall be of an approved make and design and conform to the latest N. E. M. A. standards. The City of Floydada, Texas, or any of its duly authorized agents shall have the right at any time to inspect any meter installation and pass such regulations as may be necessary for testing to insure proper accuracy. Consumers must notify the utility when they desire to have metering equipment installed, relocated, changed or removed. (12) CHANGE OF OCCUPANCY. When change of occupancy takes place on any premises supplied with electric current from the utility, written notice must be given at the utility office three (3) days prior to the date of change by the outgoing consumer, who will be held responsible for all the electric current used until written notice is received.

(13) CONSTRUCTION. In case of conflict between any provision of any Rate Schedule set out in this Ordinance and the Regulations contained in this Article of this Ordinance, the Rate Schedule shall control. ARTICLE IV PENALTIES (1) The penalties for violation of any provision of this Ordinance shall be those set out and provided in Ordinance No. 207 of the City of Floydada, Texas, as follows: Any person or corporation who violates any provision of this Ordinance, or who fails, omits or neglects to obey or comply with any lawful order or ordinance or any part of its provisions thereof, legally promulgated by the City Council involving any of the matters herein contained, upon conviction in a court of competent jurisdiction shall be fined in any sum not to exceed \$100.00 for each offense; and each day of such violation, omission, or neglect to obey or comply with such order or ordinances promulgated hereunder, shall be deemed a separate offense. In construing and enforcing the provisions of this Ordinance relating to Penalties, the act, omission or failure of any official, agent or employee of any corporation, or other person acting within the scope of his employment shall in every case be deemed also to be the act, omission or failure of such corporation. All penalties accruing under this Ordinance shall be cumulative, and suit may be brought by said City in any court having jurisdiction of the cause of action against the offending utility for the recovery of such penalties, and a suit for the recovery of one penalty shall not be a bar to or affect the recovery of any other penalty or forfeiture, nor shall it be a bar to any criminal prosecution. Actions brought to recover penalties under this Ordinance shall be brought in the name of the City of Floydada, Texas, and all criminal prosecutions shall be brought in the name of the State of Texas. ARTICLE V. Should any Section, Article, provision or any part of this Ordinance be held and declared to be unconstitutional or void by a court of competent jurisdiction, such decision shall in no wise affect the validity of any of the remaining parts of this Ordinance, unless the part held unconstitutional or void is indispensable to the operation of the

ble to the operation of the parts. The City Council of Floydada, Texas hereby that it would have passed of this Ordinance which and omitted any part or may be unconstitutional it had known or been void at the time of the this Ordinance.

ARTICLE VI. The City of Floydada, Texas, hereby repeals and annuls any ordinance or resolution of the City of Floydada, Texas, in conflict herewith, and any other ordinance or resolution which may be in conflict herewith, after passed, relative to subject matters contained herein.

ARTICLE VII. All ordinances or resolutions, in conflict herewith, repealed insofar as they herewith. Passed by the City Council of the City of Floydada, Texas, on the 25th Day of September, 1939.

umber Museum Said to be Drawing Students and Teachers

September 27.—Although the season in West Texas is under way, several school groups have visited the West number of Commerce Re-Museum Institute here. Dean J. Thomas Davis of John Tarleton Agricultural College said every educator in West Texas should visit the hall and school groups should be sent to see the exhibits. Dr. Kirk Bryan, Harvard University professor, on visiting the WTCC hall was much impressed with the displays and praised their educational value. Many other educators have made similar comments, including President Clifford B. Jones of Texas Technological College, Lubbock; President, J. E. Hill of West Texas State Teachers College, Canyon, and President H. W. Morelock of Sul Ross State Teachers College, Alpine.

Crop Parasite Control Study at Texas University

Austin, September 27.—Crop parasite control—a problem of vital concern to thousands of Texas farmers—was last week voted a research subsidy by the newly launched University of Texas Research Institute. To blanket a field outside such specific University research channels as business, industrial chemistry, economic geology, municipal government, engineering and social sciences, the institute this fall becomes a major addition to University fact-finding agencies, expanded 50 per cent. Eight other grants already awarded account for about one-sixth of the agency's initial annual budget of \$25,000. Dr. A. P. Brogan, institute director and graduate school dean, has announced. First project approved for the institute's 1939-40 program include: chemical examination of the petroleum hydrocarbons; biological research in genetics and sex-determinants; engineering projects studying earth currents and seeking more efficient means of commercial heating and cooling; research to curb the inroads of crop parasites; chemical isolation of harmful acids in petroleum. Also approved were department of English studies on the letters of Thomas Jefferson and the popularization of learning during the Italian Renaissance.

SCHOOL OPENING BOOSTED SALES OF MERCHANDISE FOR TEXAS BUSINESS

Austin, September 27.—School days for Texas 1,400,000 students—calling for new shoes, shirts, frocks and hats—boosted August sales of Texas department and apparel stores 22.9 per cent above July, University of Texas economists announced today. One hundred stores and shops reported to the University Bureau of Business Research that their August business more than doubled the usual 10 per cent seasonal increase from July to August. Sales last month were almost 1 per cent ahead of those in August last year, and 1939 total sales for January to August were 0.9 per cent above those of the corresponding first eight months of 1938.

Orchards Without Money Simplified By 4 H Girls

College Station, September 27.—Securing an orchard with a little money is not always easy, but lack of capital is a problem 4-H club girls of Texas are meeting successfully, says J. F. Rosborough, horticulturist for the Texas A. and M. College Extension Service. For example, 6,800 berry sprouts were planted last year by 4-H club girls in Cooke county, and from these over 5,000 berry vines are now growing. These same girls put out 4,260 grape cuttings resulting in 1,500 grape vines. All this has been accomplished with little or no expense. Miss Nette Shultz, Cooke county home demonstration agent, has reported that berry sprouts were given to the club members by orchard owners when they plowed out their rows. Last summer these girls saved 11,000 seed from peaches which they covered

Lights of New York

Mrs. Ida Harris is 60 years old. For many years she has been selling newspapers at a stand at Wall and William streets. Every day except Sunday, through the heat of summer, the cold of winter, snow, sleet and rain, she is at her stand from seven in the morning until ten at night. Her patrons are her friends. Many men and women of the financial district stop for a little chat with her when they are not too hurried. Forty years ago she came to this country from Lithuania. She married and eventually her husband became an assistant superintendent in the state employment office. But there were children, two boys and a girl, to whom she wished to give educational advantages she had not enjoyed herself. That caused her to take up paper selling. Six years ago, her husband died. Since then the newsstand has been her sole source of income.

When her children were small, Mrs. Harris, of course, did not have much time to herself even on her own day off. But because she liked to make things with her hands, with stiff paper and crayons, she produced paper flowers which gave her much pleasure. Her children are now grown. One son is a mechanic. Another is a pharmacist. Her daughter, who has two degrees from Fordham university, is a school teacher. The daughter's husband is a dental mechanic. Work is scarce these days. Another baby is expected so the daughter isn't teaching. That means that Mrs. Harris is practically the sole support of another family. But that doesn't keep her from using her hands on Sundays. Only now, instead of making paper flowers, she does sculpturing.

When Mrs. Harris decided to take up clay modeling, she didn't have any money to spare for tools. Undaunted, she made some out of wood. The kitchen table was good enough for a bench. Clay isn't expensive. Each Sunday morning, right after breakfast, she goes to work and doesn't quit until late in the afternoon. She especially likes to model hands. Hands have much character and tell more than words, she holds. When she does something that affords her pleasure, she takes it to her newsstand that she may study it for defects while selling papers. Recently, a member of the Sculptors guild happened to see some of her specimens. And thus, the biggest day of her entire life.

When the Sculptors guild held its annual outdoor show at Park avenue and Thirty-ninth street, Mrs. Harris was present. Not merely as one of the many spectators, but as a guest of honor. From the guild, she received a set of the finest sculptor's tools that could be bought and a hundred pounds of the best modeling clay was sent down to the Peck Slip apartment which she occupies with her daughter's family. All that was extremely thrilling. But there was still a bigger thrill for the woman who sells papers in Wall street—Adolph Wolff, well-known sculptor, chatted with her about art more than an hour. Then he modeled her head. The head, with the title "The Venus of Sixty," will be a part of his forthcoming exhibition.

After her day of days, Mrs. Harris went back to selling papers and she's still at Wall and William day after day. Her Sundays, however, are spent with her beloved clay. Clay is her pleasure. The newsstand is her independence. And there are seven grandchildren who must have an education. She is determined that they have it, for to Mrs. Harris education is the very best thing one can get out of life.

The city of New York should get a commission from hat makers... The city owns and operates the Independent subway... and many a male passenger has been made hatless when speeding trains pass... Raymond Paige ran across a colored lad who used to run an elevator in the apartment in which he lives but who had been fired for gambling... "Are you working yet?" asked the orchestra leader... "Not yet, Mr. Paige," was the reply. "I can't find mah dice." (Bell Syndicate—WNU Service.)

Huge Underground Lake Lies Beneath Dust Bowl

TOPEKA, KAN.—Western Kansas counties may be dry on the surface, but only a few feet underground is enough water to float a fleet of battleships, according to M. H. Davison, an engineer for the state department of agriculture. The huge underground lake is from 10 to 100 feet below the surface, Davison said, and the water could be pumped up profitably for irrigation of row feed crops that could be used for fattening cattle. However, the cost of lifting the water would make it impossible to irrigate wheat profitably, he said.

Hall Filled With Specimens at State Fair, Dallas

Dallas, September 27.—Forty different sets of farm Chemurgic material, some covering 150 square feet of space, will be exhibited in the Hall of Chemurgy at State Fair of Texas at Dallas, beginning October 7, fair officials announced today.

Harry L. Seay, president of Dallas fair, said his organization was particularly pleased with interest being shown in the exhibits and for splendid array of products, pictures, and illustrative charts and stories being assembled for the Chemurgic shows by East Texas Chamber of Commerce. Similar enthusiasm is coming from officials of South Texas State Fair at Beaumont, who are co-sponsors of Chemurgic exhibits and where it will show beginning October 26, according to Hubert M. Harrison, general manager of East Texas regional body.

Homer D. Jones, of Garland, spent the week end with his brother, W. O. Jones and family.

Mrs. A. C. Sullivan is visiting in Austin with her daughter, Mrs. E. T. Miller.

X-Ray Proves Valuable In Studying Paintings

The X-ray, probing beneath the surface of famous paintings, has aided modern art students by revealing the technique of old masters and determining the authenticity of questioned paintings, a display of more than 100 photographs at Harvard university's Fogg art museum showed.

Under the Roentgen or X-ray, the original and retouched parts of a picture are immediately revealed. Thus students are learning the art of restoring damaged parts of paintings by studying those which already have been skillfully retouched.

The museum's research department also has used both the short infra-red and long ultra-violet rays in addition to the X-rays to determine whether several questioned paintings were genuine. A portrait by the colonial artist Copley, when examined under these tools of modern science, showed that another artist had not only retouched damaged parts, but had painted over the entire original work.

In another case, an anonymous artist, realizing that part of a masterpiece which he had "touched up" was not as good as the original, painted over the entire canvas, thus concealing, until the advent of the X-ray, a valuable piece of work.

The Roentgen ray will even show what part of a picture has been painted first. It revealed that when artist Niccolo da Foligno painted the central figures of one composition, he left the rest to be filled in later by an assistant.

Forest Fires Decrease Game and Fish Supply

Fires probably destroy more forest game and fish, directly and indirectly, than guns of all the hunters and hooks of all the anglers. Thus does the United States forest service summarize the toll levied on wildlife by forest fires, 90 per cent of which are caused by users of the woodlands and are largely preventable.

Reports of game experts tell of natural breeding places of birds and animals, the nests, eggs, and even the young destroyed by fires. The cool waters of woodland streams, in which so many game fish are found, become too warm when the forest cover is destroyed. Trees tend to keep cool the stratum of air overlying the water and prevent the stream bed and surrounding ground from absorbing the heat of the sun during the day. Furthermore, the lye in wood ashes dissolved in the streams destroys the aquatic life upon which fish feed.

Forest fires eventually affect the floor of lakes and streams as much as the forest floor. There is less control of run-off water when the forest cover disappears, so that water levels rise and fall more rapidly. Both tend to destroy the aquatic plants and smaller animals on which fish depend for food.

"Forests," says the forest service, "furnish three essentials of wildlife: food, breeding grounds, and protection. Green forests mean wildlife. Forest fires mean destruction."

Homogenizing Milk

Homogenizing, with reference to milk, means to break up the fat globules and make milk and cream more uniform in composition. There is a machine, called a homogenizer, which does this by forcing the milk and cream under a pressure of 1,000 to 3,000 pounds through various openings. After the milk and cream have gone through the machine the fat globules are separated from the milk serum and rise to the top. In modern milk, homogenization is used in the preparation of sweet milk and cream. Cream that has been homogenized is of a smooth and uniform body. The fat does not separate later and the cream appears to be of a higher bodily fat content than it really is. Homogenization is also used in the manufacture of butter, chocolate milk and ice cream.

Aged Wine

At Friends' House in Euston road, the headquarters of the Quakers in London, is preserved a solitary bottle of port which has a curious history, reports the Milwaukee Journal. More than 150 years ago it was sent into the old Fleet prison by a sympathizer for the use of three Quakers who had been confined for non-payment of tithes. The trio, however, decided that it should be preserved, unopened, until the severance of church and state should abolish tithes forever. The time has not arrived so the bottle remains closely sealed, in company with specimens of the broad-brimmed hats of the old Quakers, the demure poke bonnets of their womenfolk and other relics of far-off days.

Dog's Life

The shepherd-spaniel of the late Mrs. Hattie A. Fletcher of San Diego, Calif., knows now what it is to be treated like a dog. When Mrs. Fletcher died in 1937 she left the dog \$10,000 in her will, assuring it an easy and luxurious old age. Recently a court decided in litigation over the estate that "provisions for trusts in perpetuity cannot be fulfilled by a dog," ordered the money turned over to another legatee. And so the dog, now without a penny, an object of charity, was placed in a veterinarian home.

Freight Rate Equality Federation to Have New Secretary-Manager

Arlene, Sept. 26.—The Freight Rate Equality Federation will have a new secretary-manager to direct its widely watched campaign for equalizing the level of Texas freight rates with the level applying in Central Freight Association states east and north.

To that post the Federation's officers have named Max Bentley, activities manager of the West Texas Chamber of Commerce, to serve free during the time that his chief, D. A. Banteen, is engaged in his duties as member and secretary of a statewide fact-finding committee appointed by Gerald C. Mann, Attorney General of Texas, to assist him in investigating the structure of transportation charges affecting this state.

Banteen was elected secretary-manager of the Freight Rate Equality Federation upon its organization last May. He is also general manager of the West Texas Chamber of Commerce, which created the freight rate equality campaign. The West Texas chamber's officers, in turn have named Max Bentley acting secretary of its traffic board of which B. Reagan of Big Spring is chairman.

BANDEEN GIVEN A LEAVE
Action by both groups was taken on Banteen's request for a leave of absence from his executive duties with the FREF for the duration of his engagement on General Mann's statewide committee. The committee has started its work.

J. M. Wilson of Floydada is president of the Freight Rate Equality Federation. He said: "General Mann's state committee is a research and fact finding body that will be completely non-partisan. The Freight Rate Equality Federation is in every respect a partisan body organized on the premise that the Texas rate level is high to the point of discrimination and working to bring them down to the level of CFA territory. For that reason we acceded to Mr. Banteen's request for a leave of absence from his Federation duties, and we have designated Mr. Bentley as his acting successor."

Vice presidents of the FREF H. S. Hilburn, Plainview, and B. Reagan, Big Spring. The directors hail from all sections of Texas, and authority lately has been given to increase the board from ten members to fifteen. This will increase the representation from East, South and North Texas.

President of the West Texas Chamber of Commerce is E. K. Fawcett, of Del Rio, who said: "Our organization is happy to serve the state by making it possible for Mr. Banteen to contribute his services and a part of his time to this work, without cost to the state."

TRIBUTE TO MANN

"The Federation and the West Texas Chamber of Commerce are encouraged and happy over continued progress registered in the great campaign to free Texas from the discriminatory toll it pays in transportation charges," said Bentley. "Now that the state of Texas has moved to the front of the battle, we may confidently look for further progress and for final victory. The official state campaign is the responsibility of our
