

# "By Helping Business You Help Yourself"

# The Floyd County Plainsman

Floydada, Floyd County, Texas, Thursday, April 25, 1940

Number 22

## Parade Opens Clean-Up Monday Morning at 9:00

A long parade of high school and R. C. Andrews ward students and other citizens, both white and colored, opened Floydada's clean-up campaign Monday morning at 9 o'clock.

The high school band lead the parade through the main streets of the city and around the courthouse square followed by several hundred marching pupils and local people in automobiles, tractor-drawn floats and other vehicles.

Enthusiasm ran high and the notes from instruments of musicians and yells of the marchers, had all the appearance of an old-settlers holiday parade. The mayor, the Chamber of Commerce secretary, and other outstanding figures of the community were on hand for the successful carrying out of pre-arranged plans for the clean-up of Floydada.

JOHN D. COPELAND, JR. of Austin, Will be Candidate for Texas Railroad Commissioner

## Mahon Predicts Passage of Lower Interest Bill

Washington, April 23.—Early enactment of a bill continuing for a five year period the reduction in interest rates on Federal Land Bank and Land Bank Commissioner loans to farmers was predicted this week by Congressman George Mahon in Washington. Legislation providing for a reduction of interest rates on such loans for one year periods was passed each year from 1935 to 1938. The 1938 act provided a legal interest rate of 3 1/2% for a period of two years on Land Bank and 4% on Commissioner loans, instead of the contract rate of 4% or more on Land Bank and 5% on Commissioner loans. The reduction provided for in the 1938 act expires July 1, 1940.

The present bill would set the interest rate at 3 1/2% for both Federal Land Bank and Land Bank Commissioner loans until June 30, 1945. This measure passed the House on March 18th and is now pending before the Senate. Congressman Mahon, who was instrumental in the passage of this measure and the previous measures reducing interest rates to farmers, said that he felt confident that the Senate would act favorably on the present bill within the next few weeks.

The 3 1/2% rate would mean a substantial saving in interest payments to approximately 12,000 Federal Land Bank and Land Bank Commissioner borrowers in the 25 counties of the 19th Congressional District.

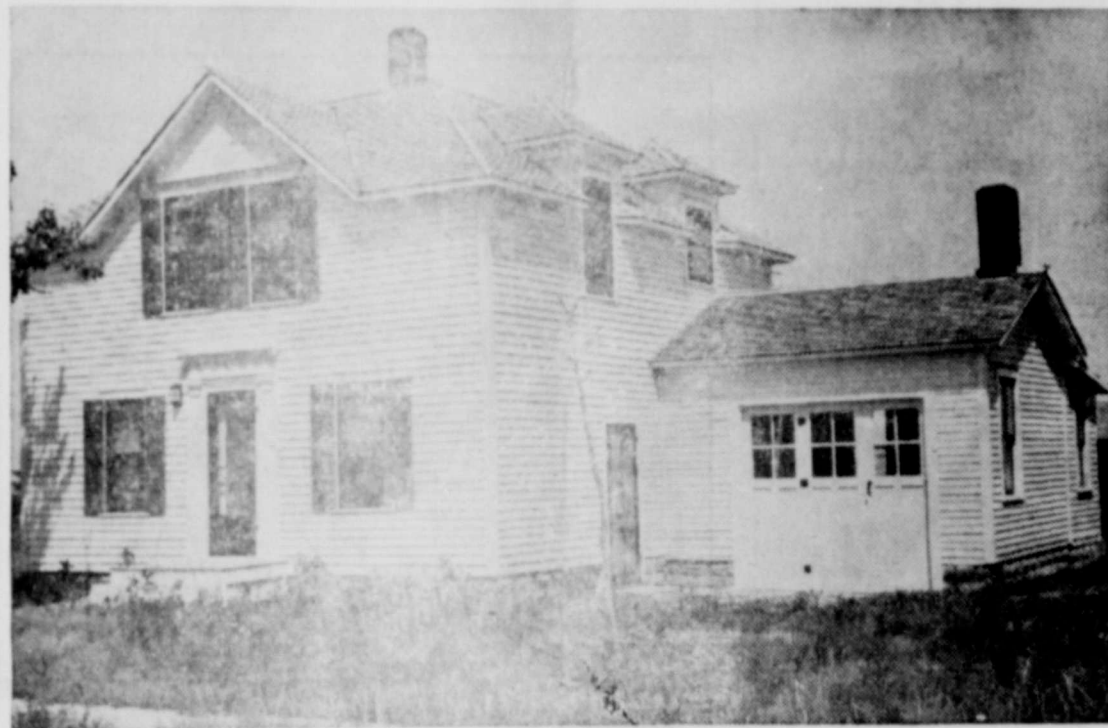

### SANTA CARLOADINGS

The Santa Fe System carloadings for the week ending April 20, 1940, were 18,406, as compared with 18,875 for the same week in 1939. Received from connections were 6,536, as compared with 6,558 for the same week in 1939. The total cars moved were 24,942, as compared with 25,433 for the same week in 1939. The Santa Fe handled a total of 23,119 cars during the preceding week of this year.

Misses Bill and Chlotida Abernathy, of Lubbock, spent the week-end with their parents, Mr. and Mrs. Robert Abernathy.

Mr. and Mrs. Virgil Williams and son, Virgil, Jr., spent the week end visiting relatives in Slaton.

## Improved Appearance—Increased Value

No complicated mathematics are involved in the transaction which saw the value of this house rise as the appearance was improved. Located in North Dakota, this \$1,200 HOLC home was given a modernization treatment costing \$1,045. Today the home is valued at \$2,500.

The old porch, expensive in upkeep and a tie-back to an architectural style of another day, was removed, and the inconvenient kitchen wing was converted into a garage. Among numerous small improvements were the addition of attractive shutters and an overall painting. Work of this type may be financed with funds obtained from private qualified lending institutions under the Modernization Credit Plan of the Federal Housing Administration.

## Farmers Striving To Protect Insured Crops for 1940

College Station, April 24.—Wheat farmers with all-risk crop insurance contracts are doing everything possible to protect their crops against wind erosion and to produce a crop even though they are guaranteed three-fourths of an average crop by the insurance corporation.

Farmers who have suffered total losses are being authorized to devote this land to other uses, E. R. Duke, state crop insurance supervisor, pointed out, but if the insured farmer failed to take protective measures against wind erosion, where such measures were needed, he may not collect an indemnity since the producer is not insured against neglect of a crop.

Of the 11,000 insured producers in the state who are guaranteed a 1940 production of more than 5,000,000 bushels, only a very few have failed to take such measures in blow areas, Duke said. Because of the recent rains, he predicted that losses in Texas would not be as heavy as they were in 1939, the first year of the crop insurance program. Reports from the southern section of the wheat belt indicate that relatively few losses will be suffered there, and prospects are much better for the state as a whole than last year.

## Local Students in Play at Tech College

Three Floydada boys who are members of the "Weezy Players" Tech College will appear in the play to be presented April 23, titled "Light," written by Alfred I. Took. Joe Smith, son of C. B. Smith of Oarr's Chapel, will play the part of Barker. Miss Ouida Johnston, Miss Norma Jean Moore, Bonnie Fuqua, and Gail Gregg, Douglas Hardy and Charlie McCormick will also appear in the play.

## Prepare for Cut Worms Ahead of Time is this Year

Along this time of year cut worms work havoc with spring gardens. What makes most gardeners so mad is that the worms apparently work for spite. Instead of eating the plants they have cut down, they move on to others.

Cut worms like tomatoes best of all but they will work on almost anything.

Several thicknesses of newspapers, when wrapped around the tomato plant stems, will foil the worms to some extent, or at least make them work for what they get.

For real satisfaction in cut worm control—and a gardener who has lost a row of his pet tomatoes wants all the satisfaction he can get—Cameron Siddall, entomologist of the Texas A. and M. Extension Service, recommends a poison mash.

The formula for the mash is 3 ounces of white arsenic or Paris Green, 5 pounds of coarse wheat bran, 1/2 pint of molasses, and enough water to make the mixture sticky.

He says to "strow" it along the row late in the evening so that the worms can get a dose of it that night.

## Larry Joe Hollingsworth Has Birthday

Larry Joe Hollingsworth celebrated his sixth birthday Wednesday, April 16th at the home of his parents, Mr. and Mrs. A. S. Hollingsworth, on West Missouri Street, when he entertained a number of his little friends with a birthday party. Balloons and wass-whats were used as favors.

Cake and ice cream was served to the following: Don Hagood, Don Don Daniels, Bob White, Linda Lou and Sadra Fowler, May and Roberta Garrett, Ann Carolyn Welborn, Norma Jean Moore, Bonnie Fuqua, Franklin Stovall, Glad Lynn Norman, and Billy Burt Grimes.

## Local Bankers Attend Meeting in Lubbock

Charley Bedford, O. M. Watson, E. J. Norman, Tucker Teutsch, J. D. Moore and Kenneth Bain, Jr., of the West National Bank, attended the South Plains Bankers Association in Lubbock Monday.

Big Spring was selected as the meeting place for 1941. C. A. Hollingsworth of Lamesa was elected president of the association. Other officers selected were John O. Gillham, of Brownfield, vice-president, and W. R. Sewell of Levelland, secretary-treasurer.

The local bank was closed Monday in observance of San Jacinto Day.

## Mrs. V. Andrews Will Present Pupils April 29th

Speech pupils of Mrs. V. Andrews will be presented in Miscellaneous program Monday evening, April 29th at 8 o'clock at high school auditorium.

Mrs. Andrews will be assisted by M. T. Camp who will render band selections. Miss Caldwell in vocal solos. Mrs. Pearl Fagan in violin numbers, and Mrs. Clement McDonald piano selections. Margaret and George Tubbs will sing. Miss Marjorie Hart will assist for accompanist.

The program is so varied there will not be one tiresome moment. A cordial invitation to all. "No charges."

Dr. and Mrs. V. Andrews and Mrs. Bess Cantwell visited in Amarillo Sunday with Dr. Andrew's daughter, Mrs. C. E. Deik and Mr. Deik.

Mr. and Mrs. John W. Lanier and A. A. Tubbs, Bob Gary, Gould Snodgrass returned Sunday from Houston where they attended a Co-operative Ginners Convention in that city last week.

LET CAVANAUGH DO YOUR JOB PRINTING.

MAY EVANS With Brunks Comedians playing in Floydada all next week.

## BRUNKS COMEDIANS TO SHOW IN FLOYDADA ONE WEEK SPONSORED BY FIRE BOYS

Brunk's Comedians the popular Texas tent show will be in Floydada all next week, starting Monday night, April 29, sponsored by the Fire Department. Brunk's Comedians made their first appearance in Floydada in 1919—twenty-one years ago, and haven't missed since. All new plays and vaudeville will be offered in their big waterproof tent theatre. The big tent will be located across the street from the Floyd County Plainsman office.

Monday night, for their opening play, they will present: "Because She Loved Him So." Will be seen on the stage with vaudeville between acts.

Be sure and clip the coupon from Brunk's ad in this issue of the Plainsman.

## West Texas C. of C. Will Meet May 16-18th

Big Spring, April 23.—Red letter dates on the West Texas calendar for May are Thursday, Friday, Saturday the 16th, 17th, and 18th. The West Texas Chamber of Commerce will be convening—its 22nd annual session with Big Spring as host.

Though the convention is nearly a month away, things are happening nearly as rapidly as if the delegates were already thronging the hotel lobbies. Program has been announced for the first business session; a transportation group conference with Jerry Sadler, railroad commissioner, as the speaker. Details are in the making for an All-Youth Parade on Friday, May 17th, in which more than 1,000 Boy Scouts, 4-H Club members and Future Farmers of America will march with banners proclaiming the blessings of the "American way of life." Mrs. Dorothy Lawrence and her Big Spring committee are working on the night shows—the annual convention Revue at which sponsors from West Texas towns are honored. It is announced the four night dances will be played by Joe Buzze's orchestra of Waco and Floyd Graham's stage band from the North Texas State Teachers College at Denton. In addition to all of this, convention committees have been appointed, and entries are pouring in from sponsors, the My Home Town contests, and West Texas bands.

## Texas U. Co-Eds Sponsor Amateur Horse Show

Austin, Texas, April 23rd.—The Southwest's first ranking amateur horse show, given annually by Bit and Spur, University of Texas co-ed riding club, will be held April 27 at Hobby Horse Stables near Austin.

Entries from all major stables of the State are on the books of the show which is one of three Texas shows that includes jumping classes. Other events among the 22 classes are polo, colt, three-gaited pair, and road hack. Competing in horsemanship competition will be members of Bit and Spur in one class, University boys and riders from Texas A. and M. College in another.

Bit and Spur riders are well known in Southwestern riding circles, membership in the club being limited to horsewomen who have demonstrated their proficiency in riding try-outs.

Mr. and Mrs. Dorris W. Jones and daughter, Linda Gay, of Matador, spent the week end visiting Mr. and Mrs. W. O. Jones.

## District 127 Rotary Will Meet Sunday

Sweetwater, Texas, April 23.—The annual three-day conference of District 127 of Rotary International will convene here in Sweetwater next Sunday, and the capacity of Sweetwater Bowl, seating 10,000 persons, is expected to be taxed for the opening Sunday night program on which Marcus Tollet, governor of the Finland district of Rotary, will be the principal speaker.

The celebrated Hardin-Simmons University Cowboy Band will play a concert on this program, and the McMurry College Chanters will be featured in a program of sacred music. Both these musical organizations are from Abilene.

The Cowboy Band will play the Finnish national anthem as the Finnish flag is raised in honor of the noted visitor from England.

Director M. B. McClure, conductor of the Cowboy Band, will also present a medley of Southern American Republic airs, will swing from this medley into the Eyes of Texas as the Texas flag is raised, and will play the Star Spangled Banner for the finale, when the American flag will be raised.

Hiram Arrant, professor of chemistry at Hardin-Simmons, who is this year's governor of Rotary District 127, will introduce Governor Tollet of the Finland district of Rotary.

The Rotary convention will be continued through Monday and Tuesday, and the host Sweetwater club is making intensive and elaborate plans to entertain visitors from the 55 member clubs in District 127.

## Wool Growers Meet in Lockney Saturday

Twenty odd wool growers met in the office of the Lockney Beacon Saturday, April 20th, for the purpose of further discussing the possibilities of concentrating their spring clip for 1940 market. C. J. Taylor of Lockney was added to the list of committeemen who are Lon Davis, C. V. Lemons, Ed Bonds, F. L. Brown, Charlie Merrick and Clyde Applewhite.

At this meeting the committee was instructed to make arrangements for storing of wool during the period of concentration; to contact as many wool merchants as possible; to give date when this clip will be offered for sale; to set a date for the sale of the wool; and to investigate the possibilities of securing a government licensed grader who will grade the wool before it is offered for sale.

At this meeting a survey was made among the sheep men and it was found that a carload or 40,000 pounds of wool would be available at the first of May and it was the opinion of the wool growers that as some of the growers would delay clipping until the latter part of May, that it might be wise to offer wool for sale in carload lots and that one carload would be offered for sale around the 15th of May.

Anyone wishing information in regard to the concentration of wool should contact one of the committeemen or the County Agricultural Agent, who is rendering assistance to the committee and wool growers in the marketing of their clip.

S. R. LEMAY of Athens, Texas, Announces Candidacy for office of State Superintendent of Public Instruction.

Mr. and Mrs. Wilmer Jones, Jr., visited in Lubbock Sunday the guests of Mr. and Mrs. Denzil Probasco.

## ADVERTISING RATES GIVEN ON APPLICATION

### NOTICE!

Any erroneous reflections upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Floyd County Plainsman will be gladly corrected upon its being brought to the attention of the publisher.

### HIGHWAY TOLL IS TERRIFIC

Ten armadillos, 182 rabbits, 15 house cats, 15 lambs, 6 ewes, 4 cows, 8 dogs, 5 skunks, 2 hogs. No that isn't the inventory of a strange butcher shop, but a list of the number of animals killed on the state highway in Brown County, Texas, during one month and observed by a state highway foreman at the request of a State Game Department warden. In addition, there were so many dead chickens that no count of them was kept due to the fact many of them probably were thrown out of trucks after dying while being taken to market.

Occasional checks like the one above show the motor car takes a terrific toll of wildlife. No check was made in this instance of the game, song or insectivorous birds. The animals listed above totaled 232. Multiply that by 254, the number of counties in Texas, and you can see how many animals perish on Texas highways monthly.

## Save that Thiamin By Careful Cooking of Vegetables

Careful cooking will save more of the vitamin B1, or thiamin, in foods than has heretofore been believed possible, according to a study recently completed by the USDA Bureau of Home Economics.

Some of this vitamin goes into the cooking water, but this can be recovered if the 'pot liquor' is served. The cook who adds a 'pinch of soda' to hold the green color in vegetables reduces thiamin values considerably. Here are the results of some of the tests:

Carrots cooked in very little water lose none of their thiamin, either when boiled or cooked in a pressure cooker.

Potatoes, pared and boiled, lose around 30 percent of their thiamin, and another 10 to 15 percent goes into the cooking liquid. Baked potatoes lose only about 15 percent of the vitamin.

About 20 percent of the thiamin value in spinach is destroyed by cooking, and an additional 5 to 10 percent more may be lost in the cooking liquid if this is not used. The less water added, the less the vitamin loss.

Green peas keep 80 percent of their thiamin if soda is not added, but up to 90 percent can be saved if the amount of cooking liquid is kept at a minimum and if all the juices are served with the peas.

## Compliance Checking Starts in Valley of Texas

College Station, April 23.—Starting in the Valley and working north, the AAA this week begins the tremendous task of checking the compliance with the farm program of more than 400,000 agricultural producers. The work will be completed by the last of August.

In each Extension Service district meetings of county committeemen, Agricultural Conservation Association secretaries, and county performance supervisors will be held as the work moves northward. B. F. Vance, assistant state AAA administrator explained. Following the district meetings, sub-district and county meetings will be held for the training of county performance reporters.

All county performance reporters are local men employed by the local associations, the administrator pointed out. In checking compliance on a farm, the reporter uses an aerial photograph, measuring all the fields on the farm, numbering them on the photograph, and identifying all crops, land uses, and soil-building practices.

Checking of compliance on a farm is done only when the producer or his authorized representative is present, Vance declared, and in most cases the producer assists the reporter in his work.

## The Basic Transportation of America

As Robert S. Henry has written, "Great risks were taken in building railroads. Men staked their capital on uncertainties. Some won great fortunes, more lost. But win or succeed in transforming a continental wilderness into a great nation, within the short space of a century. It did succeed in creating a continent-wide system of transportation which carries every sort of freight, over all distances and between all stations, in all seasons and in all weathers, at an average revenue of one cent for hauling a ton one mile—the basic, essential transportation of America."

Many of us tend to think of the railroads as empire builders of the past—a form of transport whose greatest services to the nation belong to yesterday. Nothing could be more erroneous. If anything, the railroads are today more vital to the nation than in any previous time. Without them, the intricate industrial machine which feeds and clothes and otherwise serves this vast land of ours, would be demoralized. It is true that other carriers have appeared, each offering a valuable if limited service. But these carriers, to the thinking man, emphasize rather than diminish the value of the railroads. The truck, the airplane, the pipe line all do good jobs—but none of them, nor all of them combined, can be mentioned in the same breath as the railroads when it comes to extent, certainty, efficiency and economy of transportation service for men and goods.

## War and Trade As Seen By A. and M. Economist

College Station, April 23.—The occupation of Denmark and Norway by German troops probably will have little immediate effect upon the export of farm products from the United States.

If England does not trump the German occupation, she may turn to the United States for the products she normally imports from Scandinavian countries. T. R. Timm, economist in farm management with the Texas A. and M. Extension Service, believes.

The United Kingdom drew heavily on Denmark for bacon, eggs, butter, and similar items.

All of the Danish supplies now are likely to be diverted to Germany. Economists of the US Department of Agriculture doubt, according to Timm, that Danish production can be maintained at anything like recent levels.

In the first place, production will be distributed by the occupation. In the second place, Denmark had to import feed supplies and it will be difficult to obtain the corn and other grains she bought from Argentina and the United States.

That means that part of the American market for grains is gone and that our grain will have to compete with the surplus that will result from Argentina's loss of market. On the other hand, the United Kingdom will doubtless turn to America for the food she formerly bought from Denmark and, to a lesser degree, from the other Scandinavian countries.

Mr. and Mrs. Robert Earl Linder, Jr., are the parents of a son born April 23, at the Floydada Hospital and Clinic. The child has been named Robert Earl Linder, 3rd. Mr. Linder is a teacher in the Floydada High School.

Mr. and Mrs. Dorris W. Jones and daughter, Linda Gay, of Matador, spent the week end visiting Mr. and Mrs. W. O. Jones.

Mr. and Mrs. Bill Dyer and family spent the week end in Carnegie, Oklahoma, visiting with relatives.

## H-SU Cowboy Band to Play for Rotary Convention

The celebrated Cowboy Band from Hardin-Simmons University, in Abilene, will be featured on the program of the annual conference of District 127 of Rotary International, in Sweetwater, April 28, 29 and 30. The band, directed by Conductor M. B. McClure, will play a concert for an expected gathering of 10,000 in the Sweetwater Bowl, on Sunday night, April 28. Marcus Toller, governor of the Finland district of Rotary International, will be the principal speaker at that convention session, and the H-SU band will play special Finnish music in his honor.

## Chevrolet Sales Show Increase Over Last Year

Detroit, April 23.—An average gain of more than 1,000 units a day, over the corresponding period last year, marked Chevrolet dealers' new car and truck sales in the first 10 days of April. The announcement was made here today by W. E. Holler, general sales manager, who reported that sales for the period totaled 32,895 units, an increase of 51.3 per cent over the same period last year.

This upswing is also impressive, Mr. Holler asserted, in comparison with the first 10 days of March, when Chevrolet dealers retailed 27,148 units. The April increase is 21.2 per cent over the March figures, which contributed to a March total of 106,108, the best sales total for any month since April, 1937.

Mr. and Mrs. Trenton T. Davis and children visited in Lubbock Sunday and Monday with Mrs. Davis' parents, Mr. and Mrs. T. T. Hamilton.

## Political Announcements

Those whose names appear below have authorized The Floyd County Plainsman to announce their candidacy for nomination for the office under which their name appears, subject to the action of the Democratic Primary Election of July 27th, 1940:

For Congress  
GEORGE MAHON

Candidate for the Legislature for the 120th Representative District of Texas:  
L. G. MATHEWS

For County Clerk:  
B. NICHOLS

For Commissioner Precinct Four:  
H. J. (HUGH) NELSON  
C. M. LYLE

For County Treasurer:  
MRS. O. M. CONWAY

For County Judge:  
G. C. TUBBS

For Sheriff:  
FRED N. CLARK, Re-Election.  
E. S. RANDERSON

For Commissioner of Precinct No. 1:  
A. S. CUMMINGS  
GEO. M. FINKNER  
EMMETT E. FOSTER

For Tax Assessor and Collector:  
M. L. PROBASCO  
GEO. B. MARSHALL  
ROBERT FISHER

For District Clerk:  
ROY A. HOLMES  
MILTON (BUCK) SIMS

For District Attorney 110th Judicial District:  
JOHN A. HAMILTON

For County School Superintendent:  
CLARENCE GUFFEE

For County Attorney:  
JOHN STAPLETON

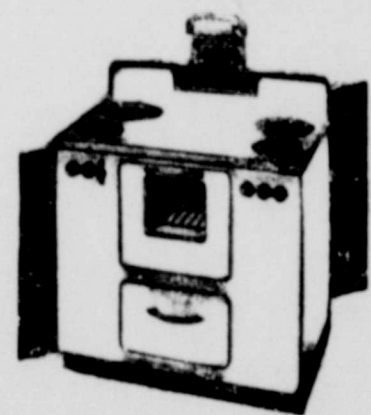

For Justice of the Peace Precinct No. 1:  
B. P. WOODY

## "NO MORE HOME LAUNDRY FOR ME!"

It's Cheaper to Send it to the Floydada Laundry

This housewife, just as many other enlightened Floydada wives, has found that "amateur" home laundering cannot compare with "professional" laundering. We can do your laundry because we are organized solely for that purpose. Give us a try!

HERE'S WHY THE LAUNDRY CAN DO IT BETTER!

1. We have all the latest scientific laundering equipment.
2. Our personnel is thoroughly trained, capable and experienced!
3. We do a volume business, and use large-scale methods.

## FLOYDADA STEAM LAUNDRY

Phone 141 for Pick-Up and Delivery Service!

Let Cavanaugh do Your Printing

**Early Roman Theaters**  
Theaters of early Rome were built by dropping a beam of wood, not by raising a wall. This view, according to the modern view, is supported by archeologists in their excavations of the old records and remains of Roman dramatic scenes. During the reign of Augustus, theaters were built without roofs. The curtain was held high on each side of the stage and as the play got on, the audience, by means of braces holding the curtain up, released, dropping the curtain a slot at the front of the stage. In early Roman theaters "movie palaces" were used for comparison; the theaters of three Augustan theaters seated 10,000 persons, while the largest seated 17,000.

**Boost for Barley**  
The husbandmen of the United States boost barley as a crop for fattening. They credit it with a value of 10 cents, when corn is 15 cents. Their tests show that receiving barley, plus silage, and cottonseed meal to full feed more rapidly greater daily gains, at higher prices than those of some amounts of corn.

**Waiting the Lovebird**  
A pair of lovebirds is supposed to pine to see the American Magistrate. Hazel Heald, Cambridge, Mass., lost one of her lovebirds. The other was inconsolable. She placed a mirror in the cage. He immediately regained his appetite, and has been happy for three years with the same image.

**Hamper is Convenient**  
A hamper lined with a rubber net bag saves precious time when it's time to relegate clothes to the tub, the washer, or the laundry man. Spare bags are so ready to snap in place, the hamper itself is floorless and stands on the ground on tiny legs, insuring a constant circulation of air.

**Beefsteaks Numbered**  
In Holland, has a restaurant famous for its beefsteaks. The more famous for the fact that one sold is numbered. The restaurant began when the restaurateur in 1870 and visitors told that their beefsteak is on the check with a number over four million.

**Well-Groomed Eyebrows**  
Eyebrows smooth, glossy, and well-groomed dip an eyebrow in soapy water and stroke gently after new facial cream is put on. This does not mean the eyebrow brush with the soap and water washing that all beauty paraphernalia.

**Case of Honey Dew**  
Honey dew, the saccharine exudate on the leaves of many plants in hot weather, is sometimes carried by the punctures of aphids and insects and sometimes produced by fungi. It is eagerly sought for by ants and also used by wasps and other insects.

**Reducing Tire Costs**  
If your car owners would find a way to reduce the cost of tires, they would find it in the fact that if they all had the opportunity of the latest advances in tire design, they would be saving a great deal of money. A. R. Ellis, president of the Pittsburgh Testing Laboratory, Pittsburgh, Pa.

**Heart's Madonna**  
The minutes' walk from Pomona to the Valle di Pompelli, a town known to most tourists but visited by thousands of people annually. There is found the Madonna who answers prayers for those seeking love.

**Explorer's Dairy Foods**  
Dairy foods to be used by the men during their stay include: dried pea powder with whey powder; a mixture of potatoes, skimmilk, and candies containing vitamins.

**Texas Trucking Law**  
Texas says it is unsafe to load more than 7,000 pounds on a truck, except when going to a railroad station, where 10,000 pounds may be hauled.

**Forty-Minus' Club**  
A 27-year-old night student of the University of Cincinnati, founder of a "Forty-Minus" club, help find jobs for men under 40.

**Teaching Chemists**  
Estimated that from 12 to 15 percent of all chemists are engaged in teaching, says a report by the American Chemical Society.

**Eye Manufacturer**  
A New York descendent of the first man to manufacture eyeglasses in the United States are trying on the same business.

**Marker Hill Monument**  
The cornerstone of the Bunker Hill Monument was laid by Lafayette on the fiftieth anniversary of the battle.

**How Dough Cosmetics**  
A few days ago, women put raw dough on their faces at night to improve their complexions.

**Light on Purification**  
The prophets of old called for purification. Modern health workers call for hygiene. The former gave a religious explanation which primitive man accepted. The latter have given us scientific reasons for many cleanliness practices which date back to ancient days. Out of the gropings of the past has come a science which has thrown new light on sources of infection which the ancients but dimly grasped. But the warning of sanitarians, like that of the prophet, includes, "Wash your hands. Be clean."

**Home Finish Repairs**  
Perhaps you've been advised to use mercurchrome, iodine, red ink, vinegar and such to doctor unsightly marks on your furniture. One of the best things about such recommendations is that they usually do diminish the unsightliness of marks without doing further damage, and are safe in the hands of inexperienced persons. If a mahogany piece is valuable, and the damage serious, however, by all means have it repaired by an expert.

**Traces of Sun-Worship**  
On the Swedish island of Gotland, in the Baltic sea, can be found a curious vestige of an ancient religion involving sun-worship. On Thursdays, the day of the storm god, the peasants neither spin nor dance; for in the pre-Christian era it was the one day in the week when offerings could not be made to Bal, the sun god.

**More Tractor Power**  
A two-plow tractor, made to sell within the usual price range of one-plow tractors, is now on the market. It is a two-row cultivating type, with either rubber tires or steel wheels. It will do the work of six to eight horses in the field, and is equipped for belt and power takeoff work at the barn and about the place.

**Comfort Transportation**  
The "world's most comfortable way to go to work" has been devised by the Freeport Sulphur company for its workers. They take a half-hour ride in streamlined power boats every morning from the company's model community at Port Sulphur, La., on the Mississippi to the mines 10 miles away.

**Canadian Competition**  
Complaining that the Dionne quintuplets had drawn honeymoon visitors from Niagara Falls to the babies' home at Collander, a Niagara Falls member of the Ontario legislature declared: "We've got some plans for counter-attractions up our sleeve—not sextuplets, but something quite different."

**Farm Marketing Progress**  
The first co-operative farm marketing organization in America was a "cheese ring" set up in 1841 by a farmer at Rock Lake, Wis. This farmer agreed to manufacture cheese for three of his neighbors, in turn being supplied with their farm products.

**Norway Tourist Fishing**  
Norway is one of the few countries of Europe which remembers that when an American wants a real holiday he wants to go fishing. It issues guide books for fishermen only, which tell of its 200 salmon rivers, and lake trout of 40 pounds.

**Free Return Tickets**  
If you spend a vacation in Yugoslavia the railway companies say you can spend even your return railway fare for they will present you with a free ticket to the place where you entered the country provided you stay at least a week.

**Original News Agency**  
The first news agency was organized by Charles Havas in Paris in 1835. Havas began by translating articles for the French press. In 1840, he established news service by carrier pigeon between Paris, London and Brussels.

**Redwood Honors Spaniard**  
Mendocino county, California, location of vast forests of age-old giant redwood trees, was named by Juan Rodriguez Cabrillo in 1542 for Don Antonio de Mendoza, first viceroy of New Spain (Mexico) appointed in 1535.

**Tailless Dogs**  
Many of the old English sheepdogs are born tailless or with bob-tails. The Rottweiler has a stump tail and the Belgian Schipperke usually has no tail.

**Dangerous Home Accidents**  
Falls in the home caused more deaths in 11 months in one state than did automobile accidents, according to that state's department of health.

**Colorado River Silt**  
The Colorado river in 24 hours carries more than 1,000,000 tons of silt and sand past a gauging station on the floor of the Grand canyon.

**Liechtenstein's Dead Soldier**  
Liechtenstein, tiny central European principality, has no army. Andreas Klieber, last surviving soldier, died recently at 95.

**Frozen Fruit Juices**  
Well adapted to freezing are the juices of apple, cherry, rhubarb, pineapple, currant and raspberry.

**Speedy Reducing Harmful**  
Flabby muscles, wrinkles, and actual illness may result from attempts to reduce too rapidly.

GIRDLES	\$1.00 to \$3.98

What a Striking "BRA"

You'll agree that this brassiere is perfect... fashioned not only to "style" the bust, but to contribute comfort and "eye appeal" as well. Yes, and the beautiful soft, satin elastic, combined with dainty, exquisite lace does make it irresistible.

Madame Grace BRASSIERES

Price \$1.00

Madame Grace BRASSIERE THAT ACCENTS Youth.

For Young Moderns who must have today's smartest lines, this lovely bra is the answer. Wide shoulder straps eliminate shoulder cutting and the lace-lined bust—firms—uplifts—and separates—giving your frock a mark of sophistication. Style 1102 is of the same design, but slightly heavier for Young Matrons who desire just a little more control.

Price \$1.50

## Streamlined Texas Tour Scheduler for Mon., June 10th

Dallas, Texas, April 24.—A streamlined tour of Texas from the oil fields of East Texas to the Great Plains, across the Rio Grande River into Mexico, and on to the Gulf Coast will start from Dallas on Monday, June 10, for the forty-eight school children of the state who win awards in the Know Your Texas Contest, sponsored by the Texas Almanac and the Dallas Morning News. The contest will close May 1, the entries to be sent to the News.

The winners of the all-expense tour, the first of its kind to be conducted by the Texas Almanac and State Industrial Guide, will gather in Dallas on Saturday, June 8, for a dinner complimentary to the prize winners and their parents who might desire to make the trip with them to Dallas. Other towns which are expected to extend invitations to the party will be visited.

The pupils will make a tour of Dallas on Sunday, June 9. Early on Monday, June 10, they will leave in two air-conditioned Bowen Motor Motor Coaches for their circle around the state.

Accompanying them will be Arthur L. Maberry, deputy state superintendent at Tyler, Mrs. Baberry, and other attendants including a nurse. The WFAA sound truck will make the tour with the busses for broadcasting.

The tentative itinerary includes Fort Worth, Wichita Falls, Vernon, Lubbock, Odessa, Pecos, the Davis Mountains, Fort Davis, the McDonald Observatory, and Alpine. The young travelers will follow Highway 90 into Sanderson and the Roy Bean country dipping into Mexico either at Del Rio or Eagle Pass. San Antonio will be reached either through Uvalde or the Winter Garden section.

SOUTH SIDE SQUARE

### Sentinels of Health

Don't Neglect Them! Nature designed the kidneys to do a marvelous job. Their task is to keep the blood free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all week out. Frequent, scanty or burning passages are sometimes further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Doan's Pills. They have had more than forty years of public approval. An endorsed remedy ever. Doan's Pills. Sold at all drug stores.

### X-Rays of 'Voice Box' Aids Study of Larynx

If you stutter, don't blame it all on your tongue or your facial muscles. More probably it's the fault of your larynx.

That is the conclusion of Dr. Harold Westlake, instructor in speech at the Pennsylvania State college, based on an analysis of 1,500 original X-ray pictures of the mouth and "voice-box" of several hundred persons of all ages and both sexes, some of them stutters.

"In singing, in speech instruction for the deaf and in voice correction, we have been over-emphasizing the tongue simply because we didn't know how important the larynx might be," he said. "The X-ray pictures show that this is important—that the obscure vocal folds and the back cavities of the throat influence our speech very decidedly."

In producing vowels, for instance, it was found that the hidden motions and placements of the larynx play a bigger role than the position of the tongue. With consonants, on the other hand, the major function is supplied by the tongue.

Pictures of stutters revealed that in most cases spasms occur in the larynx before they are discernible at all in the tongue or facial muscles. The traditional treatments have dealt almost exclusively with the visible organs.

Dr. Westlake believes that as the larynx becomes better known, it will assume great importance in speech instruction. Electrical instruments are already available, he said, to measure the amount of energy being expended in the larynx, and these will facilitate correctional treatments.

### New Archeological Find Aids Study of Greece

An elaborate early Greek structure discovered by University of Cincinnati and Greek archeologists has definitely been identified as the palace of King Nestor, the kindly and aged monarch of Pylos made famous by Homer. It has been revealed by Prof. Carl W. Blegen, of the University of Cincinnati.

More than 600 inscribed clay tablets were found in the palace ruins and, when deciphered, are expected to add considerably to man's knowledge of the period, Professor Blegen said. Their recovery in what is believed to have been the archives room of the building "will necessitate some revision of certain current theories regarding the state of Greece," he declared.

The discovery, made by a group headed by Professor Blegen and Dr. K. Kourounletis, director of the National museum at Athens, came more than 35 miles from Triphtylis, where German archeologists believed they found the palace in 1907.

### Smoke Evil

Discoveries announced by the American Chemical society promise to free cities from the dangers of sulphur dioxide, the noxious gas from which the smoke problem chiefly arises. Sulphur dioxide, which is unavoidably formed in the burning of coal, and which, escaping from industrial smoke stacks, causes heavy losses in corrosion of buildings and menaces health, will be eliminated from the atmosphere if a method successfully worked out in the laboratory of Robert D. Snow, of the University of Illinois, becomes industrially feasible. Dr. Snow, solving the problem theoretically, shows that the sulphur can be removed from the coal before it is burned. Dr. Snow's method involves the processing of coal at the mines before it is shipped. The coal is first ground, and then treated with an acid solution of ferric sulphate. The treated coal is washed and heated in the presence of hydrogen. The hydrogen removes the remaining sulphur in the form of hydrogen sulphide.

### Handkerchief Habits

As soon as the baby has passed the toddler stage he should have his own supply of handkerchiefs. Teach him to put the soiled ones into the hamper and to help himself to a fresh one once a day or oftener if necessary. This is good training in self-reliance. More than that, it is one of the habits that make for good health, for clean handkerchiefs, properly used, are one of the indispensable adjuncts of disease prevention, particularly colds. Handkerchiefs may be washed more easily if they are separated from the rest of the laundry and soaked for a while in cold water to which a handful of salt has been added. Plenty of soap and warm water is ordinarily sufficient for washing. If used by persons suffering from colds, they should be washed in the usual way and then boiled.

### Typical American Dance

Gene Snyder, who dreams up dance routines for theaters and night clubs on a mass-production scale, reported recently that the tap is the true form of American folk dancing. Outlining the development of this particular type of terpsichore, the 29-year-old dance director said that the greatest strides have been made in the last decade—since ballet technique had been added—"but the surface hasn't been scratched." "Americans have an inherent sense of rhythm which is particularly good for tap dancing," Snyder said. "In fact, it's the best in the world."

depending upon where the tour crosses the Rio Grande.

Present plans route the boys and girls through New Braunfels to Austin, where the Capitol, the University of Texas and other institutions will be visited. A stop will be made at the Lost Pine Park at Bastrop, and the tour will continue to Le Grange, the old Baylor University ruins, and Washington on the Brazos where the Texas Declaration of Independence was signed.

A visit to Houston, including San Jacinto Battlefield and museum, and Galveston will be followed by a swing through the Piney Woods of East Texas probably via historic Huntsville and Nacogdoches, Lufkin where the new paper mill is situated, and the great East Texas Oil Field with stops at Henderson, Kilgore and Longview. The last leg of the journey will be through the rose garden country including Tyler, and Grand Saline where one of the nation's

## Camera Fan Shoots Night Circus

Brings 'em Back Alive!

IF BOB could only have his way, anything he would go—to darkest Africa in pursuit of the game. But Bob is no millionaire. So he satisfies his hunting instincts by shooting pictures—photos of everything. Bob, you see, is one of America's countless camera fans.

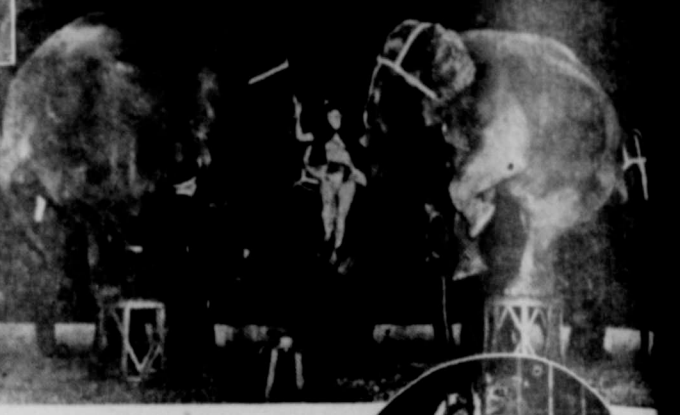

The circus played his town the other night. Bob always wanted to snare some prize photoflash shots of circus acts. But how to do this, what with his seat in the crowd so far away from his quarry? That was the question. Here is his answer:

He captured circus scenes here shown with the aid of, believe it or not—with midgets. No... not with the help of the familiar circus midget. Truth is, Bob bagged each picture with a single tiny flash bulb bigger than a walnut. So small yet so powerful is the peewee lamp that photographers are calling it the "mighty midget."

The rest of the story accounting for Bob's success

in getting clear action shots from far away is this. He used high-speed film. He took advantage of the fact that the midget bulb's flash is a point-source of light. This permitted use of a spot-type reflector with the result that Bob was able to riddle a powerful "bullet" of light at his distant targets.

Thus, not only Bob saw the circus, but so did his relatively inexpensive camera. No wonder he "brought 'em back alive."

### RUPTURE

SHIELD EXPERT HERE

H. M. SHEVNAN, widely known expert of Chicago, will personally be at the Hilton Hotel, Lubbock, Thursday, only, May 2, from 9 A. M. to 6 P. M.

Mr. Shevnan says: The Zoetic Shield is a tremendous improvement over all former methods, effecting immediate results. It will not only hold the rupture perfectly but increase the circulation, strengthens the weakened parts, thereby closes the opening in ten days on the average case, regardless of heavy lifting, straining or any position the body may assume no matter the size or location. A nationally known scientific method. No under straps or cumbersome arrangements and absolutely no medicines or medical treatments.

Mr. Shevnan will be glad to demonstrate without charge.

Add 6441 N. RICHMOND ST., Chicago.

Large Incisional Hernia or rupture following surgical operation especially solicited.

Mrs. R. T. Miller, Jr., of Austin, spent the week end visiting her sister, Mrs. C. M. Thacker and mother, Mrs. A. C. Sullivan. Mrs. Sullivan returned home with her daughter for several weeks visit.

Mr. and Mrs. John A. Hollins returned home Tuesday night from a week's trip to South and East Texas, returning home by Shreveport, La., and Hot Springs and Little Rock, Arkansas. They reported a very pleasant trip.
