## FHA At The World's Fair

ELEVATION

FLOOR PLAN

The reality of modern low-cost housing under the Federal Housing Administration program is exemplified by this four-room colonial dwelling being constructed at the New York World's Fair under FHA supervision. It is one of two FHA homes which will be lived in at the World's Fair this summer by successful entrants in the "typical American family" contest conducted by 48 newspapers throughout the United States. The house shown above is the duplicate of a small house selling for \$2,500 which would be eligible for easy financing through an FHA-insured loan.

### Agriculture Is In Time With Defense

College Station, July 3.—Agriculture's part in the national defense plan will be carried out without the establishment of new federal agencies.

This was pointed out in a letter received by H. H. Williams, director of the Texas A. and M. Extension Service, from Secretary of Agriculture Henry A. Wallace.

Agriculture is represented on the Council of National Defense by Secretary Wallace and Chester Davis of the Federal Reserve Board.

The Council, reestablished by the President, is composed of six cabinet officers and seven advisory commission members. Its function is to correlate efforts of industry and the government.

The letter stated that the Secretary and Mr. Davis, after thoroughly exploring the relationship of agriculture to national defense, wanted to report immediately that:

"It will not be necessary to set up new government services, or new organizations of farmers, to carry on agriculture's part in the national defense program. Farm people themselves, through county extension organizations, AAA committees, land use planning committees, and so on, and government agricultural services, both in the Department of Agriculture and in the Land Grant Colleges, are set up and staffed to do what ever needs to be done."

The Secretary commented that the present farm program could be adjusted to increase the acreage of any crop that is needed in the national defense scheme. When and if need comes, he added, the people and organizations now operating farm programs will be called on to do the work.

A Californian has worked out a method of producing oil from grape-seeds, and a paint formula using grape-seed oil is already available. Each year some 80,000 tons of oil-bearing seed are thrown away.

### Gardeners Should Use Care In Summer Gardening

College Station, July 3.—July and August, months when most of Texas receives scant rainfall, confront thousands of gardeners with the problem of supplying sufficient moisture for plants. Annuals and perennials, in order to produce flowers, must have an ample supply of water during this period, and shrubs and trees set out during the year which have not yet established good root systems often need assistance in order to survive the driest part of the year.

To gardeners beset with these problems, Sadie Hatfield, specialist in landscape gardening for the A. and M. College Extension Service, offers these suggestions:

Moisture for summer growth of plants should be retained by frequent cultivation or by supplying a mulch of rotten straw or leaves.

If irrigation is used it should be supplied liberally and slowly about once in 10 days. Then it should be conserved by cultivation.

Removal of competing plants will leave moisture for desirable plants. Supplying semi-shade for protection of cuttings or other young plants will prove valuable.

A practice common among many flower growers of sprinkling the top of the ground every morning is particularly discouraged by the specialist. Light sprinkling causes roots to seek moisture near the surface where they are easily killed and are likely to be injured by winter cold.

Mr. and Mrs. Lewis Hollingsworth, of Seminole, and Mr. and Mrs. Clifford Beggs, of Lubbock, spent Saturday night with Mr. Hollingsworth's parents, Mr. and Mrs. A. S. Hollingsworth. They left Sunday morning for a ten days vacation trip to Oklahoma and Denver, Colorado.

Mr. and Mrs. J. B. Claiborne and Mr. and Mrs. J. G. Wood visited in Post Sunday with Mr. and Mrs. Ashley Lawson. Mrs. Lawson and baby returned home with Mrs. Claiborne for a few days visit.

### LARGE CROWD ATTENDS FAIRMONT SINGING

The Fifth Sunday Singing Convention which met at Fairmont Sunday drew a good crowd for the day. Fine singing was reported and the Fairmont community proved themselves good hosts to the convention.

In a business meeting of the convention all of the old officers were retained and it was decided the convention would meet next at Patton Springs, in Dickens County.

### It's A Trick Say Specialists, to Control Pasture Weed

There's a trick in controlling weeds in pasture by mowing.

The trick, according to R. R. Lancaster, pasture specialist of the Texas A. and M. Extension Service, is to mow the weeds when they reach their maximum growth at about the time flowers form.

Mowing earlier than that does not weaken the weeds to any great extent, and later mowing allows seeds to ripen. If the mowing happens to fall in a dry period of the year, so much the better.

Mowing of pastures to control weeds and to keep grasses in a growing, vegetative state is proving the easiest and most profitable form of pasture improvement.

Reports from county agricultural agents in East Texas, the Gulf Coast, and the central part of the state indicate that regular mowing often doubles the carrying of pastures. Results from tests at the Angelton substation of the Texas Agricultural Experiment Station were even more profitable.

Little Miss Beverly Jo Boetier, of Phillips, is visiting this week with her grandparents, Mr. and Mrs. C. M. Lyles.

Mr. and Mrs. A. D. Cummings and children, of Olney, spent the week end visiting Mr. Cummings' parents, Mr. and Mrs. A. S. Cummings.

Mrs. Ohmer W. Kirk and daughter, Misses Marjorie and Patricia, visited from Friday until Tuesday in Fort Worth with relatives.

### Compliance Checking Started June 15th

On June 15 the checking for general compliance was started in Floyd County and to date we have the following men in the field as performance reporters: Guy D. Allen, Lockney; James B. Bobbitt, Lockney; Olin Bryant, Floydada; Eldon Burgett, Floydada; Flake F. Dillard, Lockney; Charles E. (Ed) Holmes, Floydada; John K. Holmes, Floydada; Loyd H. Nance, Lockney; Gerald E. Phipps, Floydada; Cecil Farcell, Quitaque; Floyd E. Trowbridge, Floydada; Arthur A. Tubbs, Floydada; Milton J. Weems, Floydada; and Floyd T. Willis, Floydada, and two other reporters, Orvis G. Shearer, Floydada, and Chalmers E. Terry, Floydada, will be started June 27.

There are 1747 farms to be checked during general compliance this summer, and it will require some two months of work for the above sixteen crews which includes the reporter and one chairman each. It will also be necessary that the operator of the farm or his authorized representative be present when the reporter calls to check compliance on the farm, as the farm will not be measured until the operator or his representative can be with the reporter. All reporters will mail cards to the operators, notifying them of the approximate date on which their farm will be measured; and we are asking that the producer please be present at that time and if the reporter does not call on the date shown on the notice that the operator give him an extra day or two as there are conditions which may arise in the field which the reporter can not prevent.

After the reporter turns in the SR-412's and SR-412A's, which are the measuring papers, to the county office, we will calculate the acreage and notices will be mailed to each producer on the date his farm is calculated in the County office. These notices will show all of his allotments, the measured acres for each crop, the total amount of soil building assistance earned and the soil building assistance that could be earned. They will also give the price for rechecking farms where the producers are overseeded on their cotton and they do not destroy enough when the reporter makes his first check, and there will also be a charge on farms where producers are not satisfied with the total measured acreage in same.

As soon as all allotments for the county are officially approved, and for producers who are within their cotton allotments cotton parity pay-

### Why America Has A Farm Problem Is Outlined

Another reason why the nation has a farm problem is the change from horse to mechanical power that has come since the World War.

Gasoline has reduced the market for corn, oats and hay. This change has destroyed the market for feed products from about 36 million acres which were formerly used for workstock and has released this acreage for the production of other crops.

Efforts to increase protection to consumers under the Meat Inspection Act by establishing standards of uniformity and wholesomeness for products sold under the name of "lard" in interstate or foreign commerce were made at a hearing called in Washington by the U. S. Department of Agriculture for June 18.

ments should start at an early date, but all producers who are overplanted on cotton and have to plow up the cotton parity payment will be cleared before the applications can be submitted to the State office.

With the number of crews working, we are expecting conservation payments to be received in the county at an early date this year.

ALLOYE A. HOOTS, Secretary, Floyd County ACA.

### It's Doughnut Sandwiches And Iced Coffee Now!

IN the winter it's hot coffee and doughnuts; now it's iced coffee and doughnut sandwiches! Just split your rotund winter-time favorites and fill them with sandwich fillers of your own making or those that come ready for spreading. Take care with your hot coffee—brew it fresh and special, using two heaping tablespoons of coffee to each measuring cup of water; pour it hot over lots of ice and you're ready for the doughnut ideas that follow:

Doughnut Sandwiches

Cut doughnuts crosswise sand-

with fashion. Spread with any of the following fillings. Put two halves together. Doughnuts may also be left whole and the tops covered with the filling:

Strawberry Filling: Mash one 3-oz. package of cream cheese with 2 tablespoons of strawberry preserves.

Orange Filling: Mash one 3-oz. package of cream cheese with 1 tablespoon grated orange rind and two tablespoons of orange juice.

Pineapple Filling: Mash one 3-oz. package of cream cheese with 4 tablespoons of drained crushed pineapple.

### Popular With People

Station, July 2.—Fireplaces, state, or national parks easy to prepare dinner or at the picnic grounds and outdoors. That these are being constantly revealed by the Texas Highway which is charged with the roadside parks along the ways.

are one of those persons to prepare food out-of-doors. Don't forget the importance of balanced meals," warns Nora, specialist in food preparation for the A. and M. College Service. She suggests the picnic meal around the picnic grounds or at home and taken along in a jug which will keep food cool.

campers may prepare meat at home and then take them over the picnic fire. Foods can be heated quickly, the brick oven at most parks best for broiling steaks or hamburgers.

vegetables as a relish or salad included in every picnic specialist says. If greens are thoroughly in a refrigerator, wrapped in waxed paper, stay crisp and fresh. Car-cumber sticks, celery, or green onions may be covered glass jars. For Miss Elliott suggests fruit, grapes, plums, fresh pineapples, or other fruit in sea-sandy cookies, tarts, turn- cup cakes also make good for outdoor meals.

## June Sales Show Increase for Chevrolet

Detroit, July 3.—The greatest June second-10-day sales period since 1936 was reported by Chevrolet dealers today, it was announced here by William E. Holler, general sales manager, who reported the sale of 34,328 new passenger cars and trucks in the past 10 days, a gain of 11,880 units over the same period last year. This represents an increase of 52.9 per cent, he said.

At the same time, new car sales continued the steady advance that has characterized the Chevrolet sales graph in 1940, the second 10 days of June topping the first 10 days by 23.3 per cent. The June 20 total of 34,328 new cars and trucks compares with 22,448 in the same period last year and 27,843 in the first 10 days of June this year.

Concurrently, used car sales showed a distinct upward trend, a total of 65,192 units being retailed. This represents a 39 per cent increase over the comparable period last year and an 18.5 per cent gain over the first 10 days of this month.

For the month to date, Mr. Holler said, new car sales are 34.9 per cent in advance of the first 20 days of June, 1939, while used car deliveries are 27.7 per cent ahead over the same period.

## Jerry Sadler Is Avowed Foe of Sales Tax

Austin, July 3.—As an avowed foe of a sales tax in an effort, Jerry Sadler, youthful candidate making the race for governor of Texas on a platform to pay old age pensions and other social security obligations of the state with additional taxes on oil, gas and sulphur.

Sadler would meet the Teachers Retirement fund with reforms in the present franchise Tax laws, and has called attention to the fact that there are billion dollar corporations now doing business in Texas and only paying \$10 annually in franchise taxes. Teachers of Texas have already paid more than \$6,000,000 into this fund to the state, which is supposed to match dollar for dollar and has paid nothing.

Sadler has called attention of the people to the fact that Governor O'Daniel's Transaction tax bill, which he advocates in seeking reelection is a sales tax which would tax poverty in Texas from 6 to 14 percent for each loaf of bread bought, each gingham dress, overalls, work shoes, or would tax any kind of a transaction made in the entire state.

Sadler's proposal of taxing oil, gas and sulphur to pay the tax obligations would put the tax burden "on those most able to pay." His slogan is "Tax the mouths of the wells and not the mouths of the people." He has shown that by taxing oil, gas and sulphur that the people of Texas would only be paying 20 percent of these taxes, as more than 80 percent of all oil, gas and sulphur produced in Texas is exported to other states.

"Any sales tax passed," Sadler said, "would be paid in its entirety by Texans. It would tax the poor, because the rich could buy their necessities outside of the state and would therefore not come under a sales tax. I am opposed to putting any further tax burdens on the little man of Texas, but believe it is high time Big Business started paying its share of our taxes."

If attack ever comes to America, it will probably hit Texas because of its long border, its long coast line and the great richness of its natural resources, so necessary to war.

Our FLOWERS are FRESH and are BEAUTIFULLY ARRANGED. BOLLUMS, FLOYDADA-FLORISTS

LANDS FOR LEASE

IN HER HANDS

Martin and Brown were strolling along the front when they were passed by a very pretty young girl. She smiled sweetly at Martin, who, however, just raised his hat and nodded distantly.

"So you know her?" said Brown, with a show of interest. "Who is she?"

"That girl," replied Martin impressively, "has been responsible for many of my ups and downs recently."

"Then I think she deserved more than a casual nod," put in Brown. "I suppose she's an old sweetheart worshipping from afar, or something?"

"Not at all," smiled Martin; "she is the elevator girl at my hotel."

**Perpetual Rest**  
Visitor—I understand that your boy John is interested in perpetual motion. That's fine.

Farmer—Yes, and I'm kinder encouraged about it. For a time I thought that the only thing John was interested in was perpetual rest.

**A Sailor's Jest**  
Sea Captain—Waiter, what do you call this?  
Waiter—Bouillon, Sir.  
Sea Captain—Well, well, I must have sailed on bouillon all my life and didn't know it.

**Opposite Results**  
Lawyer—And did your boy-friend get cold feet just before the wedding?  
Plaintiff—Just the opposite. He hot-footed it out of town.

**Kindness**  
Mrs. Wimpus—Darling, you're kinder to dumb animals than you are to me.  
Wimpus—Try bein' dumb a while and I'll be kinder to you.

**QUITE THE BRUTE**  
She—He's a brute—he'd do anything to get money.  
He—As, for instance?  
She—He hit me for a dollar today.

**Everything Included**  
Customer—Has this book a love interest?  
Book Dealer—Yes, sir.  
Customer—Humor?  
Book Dealer—Yes, sir.  
Customer—Murder? Action? Mystery? Adventure?  
Book Dealer—Sorry, sir! Try this dictionary.

**The Social Climber**  
Mistress—Did anyone call while I was out?  
Maid—Yes, ma'am, Lord Twiddlewit called.  
Mistress—Well, well, at last we're being recognized. What did he say?  
Maid—Nothing, ma'am. It was the wrong number.

**Ask Uncle Benny**  
"Mamma, is water good for a watch?"  
"Why, no, dear; water will rust the works and spoil it."  
"Then why did papa say he had his watch in soak to help pay the bills?"

**Not Worried**  
Rastus—Ah suttinly is glad dat Ah ain't got no income.  
Sambo—How so, Rastus?  
Rastus—"Cause Ah don't hab ter fool wiv any ob dem income papers dey all worries erbout so much."

**Another One**  
A Scotchman, leaving on a business trip, ran back to the house and called to his wife:  
"Dinna forget to take little Donald's glasses off when he isn't looking at anything!"

**LABOR OF LOVE**  
"That astronomer is making a special study of Venus."  
"Yes—a labor of love, he says."

## New Ventilator Solves Fresh Air-Draft Problem

For the family that divides itself in winter into the advocates of fresh air and the enemies of drafts, peace is now possible with the perfection of a new ventilator, which has recently appeared on the market.

Every winter, particularly in sleeping chambers, a great many people feel that they are forced to choose between suffocating or resisting a freezing gale. The need of fresh air is recognized, and the danger of drafts is equally well established; the problem has been in selecting a lesser evil.

This new ventilator provides a solution by allowing air to enter the room quietly and effectively without creating enough movement of air to disturb the most sensitive person.

Simple in construction, the ventilator consists of two vented plates which overlap, but do not touch and which have between them a copper screen. The edges of each plate are turned in such a way that they are opposite the opposing plate, so that the air is made to turn two corners by the baffle plates of the ventilator.

In this way, the force of the wind on the outside is checked so that the movement of air on the inside does not extend any more than four or five inches from the ventilator. While the baffle plates do not hinder fresh air from entering freely through the ventilator, they do prevent rain, snow and a large percentage of dust from passing through. Also, the installation of this ventilator will not interfere with the easy opening and closing of the window, because it goes on the outside, with a rubber composition flap which seals the space between the window frame and the ventilator.

They are easily installed. Adjustable brackets at each end of the unit allow for variations in the width of windows and require but two screws each. The ventilator slips down between the brackets and is inserted or removed effortlessly.

They are easily installed. Adjustable brackets at each end of the unit allow for variations in the width of windows and require but two screws each. The ventilator slips down between the brackets and is inserted or removed effortlessly.

## Changes in Industry Speeded Up by Science

Many years ago Lord Kelvin said that in order to understand anything one must measure it. Industry on the whole was rather slow to learn the lesson, but today there is a new standard of certainty, based on scientific measurement, which has invaded every branch of the industrial and engineering field.

To take a few examples from the railways: The comfortable riding of rail coaches, the absence of noise, the movement of a wheel along the rail, the vertical movements of the rails when under load, and the resistance of materials to wear—these are no longer left to personal impressions, which are so liable to error and leave no record for subsequent comparison. Measurement provides a new basis for progress.

"The sovereignty of man lieth hid in knowledge." There is every reason to be proud of the achievements of this country in the application of science to the needs of the world today, writes Sir Harold Hartley in "Technology Review." Americans were the first to realize for their own vast homogeneous internal market the immense potentialities of mechanized production—production which was made possible by scientific control and which has done so much in so many ways to diversify the pattern of life for this generation. But in our technical enthusiasm we must not forget that the human problems of management present much more difficulty than the choosing and working of inanimate material.

**Women Run Hospitals**  
For many a year, women have claimed as their own the high executive positions in the profession of hospital administration.

Dr. Malcolm T. MacEachern, director of the American College of Surgeons, pointed this out recently. "The reason for this," said Dr. MacEachern, "is the close relationship between nursing and hospital administration. Nursing executives are concerned with the problems of hospital administration and thus are prepared for the duties of hospital management."

The high percentage of women in the profession, believes Miss Nellie G. Brown, superintendent of Ball Memorial hospital, Muncie, Ind., the famed "Middletown," is due to women who started as head nurses in the small hospitals, which total 75 per cent of the nation's general hospitals. A "small" hospital is one which has fewer than 100 beds.

"Often, a superintendent of one of the smaller hospitals is simply a head nurse with some idea of menu making, X-ray and the workings of the laboratory," said Miss Brown. "In time, the small place becomes larger. Her own abilities increase and she finds herself an important administrator of a thriving hospital."

**Coyotes on Outskirts of Spokane**  
Coyotes on the outskirts of Spokane are increasing, according to Floyd Priest, trapper and cattleman. Last winter Priest bagged 214 of the animals, 28 of which he got within six miles of the city limits. Priest has been trapping for years and said his catches close to the city were not so good as a decade ago.

## Notice to Creditors

OF THE ESTATE OF S. A. GREER, DECEASED  
NOTICE IS HEREBY GIVEN that Original Letters Testamentary upon the Estate of S. A. Greer, Deceased, were granted to me, the undersigned, on the 12th Day of June, 1940, by the County Court of Floyd County, Texas. All persons having claims against said Estate are hereby required to present the same to me within the time prescribed by law. My residence and Post Office Address are Floydada, County of Floyd, State of Texas.

## "NO MORE HOME LAUNDERING FOR ME!"

It's Cheaper to Send it to the Floydada Laundry

This housewife, just as many other enlightened Floydada housewives, has found that "amateur" home laundering cannot compete with "professional" laundering. We can do your laundry better because we are organized solely for that purpose. Give us a trial.

HERE'S WHY THE LAUNDRY CAN DO IT BETTER!

1. We have all the latest scientific laundering equipment!
2. Our personnel is thoroughly trained, capable and experienced!
3. We do a volume business, and use large-scale methods!

Sulu Princess Gives Up Title to Many Islets

Colorful Philippine Moroland, where under the American flag live sultans, rajahs, princesses and imams, was brought closer to Manila when Dayang Dayang (princess) Hadji Piandao of Sulu signed documents renouncing long-standing land claims of the Sulu sultanate against the Philippine government.

Heirless to the late Sultan Jamalul Kiram II, the Dayang Dayang inherited the claims of the sultanate to various lands, including 700 islets in the Celebes sea as well as the people on them and the waters about them.

In renouncing the claims, the princess accepted an offer of the government, embodied in a law, to adjudicate to certain members of the Sulu royal house tracts of land of the public domain in the Sulu archipelago. Titles to these pieces of land accordingly will be issued by the commonwealth.

In the renunciations, however, the Dayang Dayang reserved her claims to exclusive ownership of 14 islets between Sulu archipelago and Borneo. Inhabited by Moros (Filipino Mohammedans), these 14 islets actually are under the jurisdiction of British North Borneo, to which the Dayang Dayang has presented claims of ownership.

According to the princess, she inherited the islets from her royal ancestors and she is the only person who could rightfully govern them. She says the inhabitants of the islets recognize her as their own sovereign.

U. S. to Prepare a Haven in Nevada for Wild Life

A 40,000-acre swamp and meadow in eastern Nevada will be prepared for occupancy by migrating birds and waterfowl. Capt. Keith K. Tatom of the Fort Douglas CCC district headquarters here has announced.

The area, located in Ruby valley, Nevada, will be the third largest migratory bird sanctuary in the United States.

A section of land about 16 miles long and two miles wide has been acquired by the federal government. The area is fed by many natural springs that will provide natural waterways and islands. It will make "ideal swampland" for birds, Tatom said.

The job of engineers is to convert a vast waste land into an even more worthless wasteland. Much of the area will be flooded, and bushes and other herbage planted to create the best possible conditions for migrating birds.

The valley is already a natural resting place and nesting ground for ducks, geese, pelicans and almost every other variety of migratory bird found in this section of the country. By scientific methods they hope to change it into a place more natural than even nature could devise.

Two hundred CCC boys have been put to work clearing the land of worthless vegetation, cutting canals and building islands for the birds to alight on.

The refuge will be surpassed in size only by the Bear River refuge in Utah and the Malheur refuge in central Oregon.

Own a "Cremona"? Maybe If your hope of sudden wealth rests in a violin case labeled Stradivarius 1716, you may as well abandon it.

Kenneth Warren, violin appraiser for a national musical instrument firm, counsels:

"It is significant that of all the hundreds of so-called Cremonese violins that have been brought in for appraisal not a single genuine instrument has ever been found.

"Hundreds of persons a year, who have violins bearing the labels of the Cremonese makers, Stradivarius, Guarnerius and Amati, come to us to sell them.

"These instruments were not made to deceive anyone. They were originally made as models from those of the Cremonese and a ticket was put inside to indicate that they were copies of the maker. In the course of time, people came to believe that they were original instruments. There are only about 40 Stradivarius instruments left and we know where all of them are. The chances of another turning up are exceedingly slim."

Important Kitchen Sink

The sink has been called the most important single piece of equipment in the kitchen. As both food preparation and the cleaning away processes involve the use of the sink, more than half of the housewife's cooking time in the kitchen is spent at the sink. Among the many types which may be chosen is an acid-resisting, cast-iron, enameled sink, with chromium plated swinging spout and a disappearing spray hose, obtainable in single or double compartment styles, with one or two drainboards. A 60-inch cabinet sink has two drainboards and one basin; the 42 and 52-inch models have one basin and one drainboard. All models are 36 inches high, which is the correct height for the average woman, and all are 25 1/2 inches wide, which is the standard width of the steel base cabinets. The sink, since it is the most used fixture, should be half way between the refrigerator and the range.

Father Stickleback Fish Protects Eggs in Nest

Man does not know at just what stage in the evolution of life parent-animals begin to develop a desire to help their children through the tender and dangerous stage of their lives. We have, however, observed a few instances where the protective instinct is found in animal life as low as the fishes.

One of the most interesting and familiar illustrations is that of the sticklebacks, writes Frances E. Potts in Nature magazine. The males of this group build nests of waterweeds, binding them together with mucous webs or threads secreted from the kidneys. When satisfied with the nest, the male looks around for a mate to occupy it. If he does not succeed in attracting a mate, he resorts to force and drives a female—or several of them—into the nest until he has a satisfactory number of eggs.

After the female deposits the eggs in the nest her responsibility for her children is over. In fact, she would enjoy eating the little fish and probably would do so except for their vigilant father. Never during the period of incubation does he forsake his vigil, often fighting off enemies, and even the female, with the use of the stickles on his back. Not only does he guard his precious treasure, but, with the use of his tail and fins, he circulates water through the nest to provide plenty of oxygen and maintain purity. In case the current spills an egg, or a young fish strays out, he rescues it and returns it to the nest.

There is a marine catfish, the gafftopsail, inhabiting the Atlantic and Gulf coasts, the male of which assumes a remarkable family responsibility. Unbelievable as it may seem, he protects the eggs during incubation by holding them in his mouth. The incubation period may be a full month, and the eggs nearly an inch in diameter; the male may carry at times as many as 50 in this manner, although 25 might be nearer the average. Some scientists maintain that these fish may reach a length of four inches before being thrown out from under the parental roof.

Hare Runs Circles, Then Gives Hounds the Slip

The story of a European hare which played "rings around the rosy" with pursuing beagles is told by William H. Bennett in a recent issue of the Canadian Field Naturalist.

"An interesting experience which happened one winter in the Caledon Hills of Ontario was the loss of a hare in a cedar swamp," says Bennett. "After about an hour's run over hilly country, the hare had entered the swamp and immediately had proceeded to make a large oval of about a mile in circumference.

"The hounds carried the line about six times around and finally came to a loss. Tracks in the snow told the story. What had happened was quite simple. The hare had completed the oval three times and was part way around for the fourth lap when, with a bound, it had left the oval and waved farewell for parts unknown. The hounds had continued to run the oval until all scent had been lost.

"Time and again when a hare had been run for three hours or so and was beginning to tire, another hare would come in from the side and follow it. Invariably, after a short time, it would become aware of its plight and leave the trail of its weary neighbor. What would the hounds do? They almost always followed the newcomer, and the tired hare escaped.

"Some days we would travel 15 or 20 miles in nearly a straight line, because a hare running in a big circle would pass on its trail to another hare at the extreme of its territory; and the same thing would happen repeatedly, one hare after another," says Bennett.

'Swiss Navy' a Kitchenette

Wearied of answering questions about a barrel-like structure they are building in one of the American Airline hangars at LaGuardia field, New York, several airplane mechanics posted a sign over it reading:

"Mock-up for submarine of Swiss Navy."

The authors of the sign enjoyed the joke thoroughly although they found that they had more questions to answer than before because of the term "mock-up," which is aviation slang for a form or pattern.

What the men are doing is building an experimental model of a new Douglas transport in which it is hoped meals can be cooked. At present meals served in the air are prepared on the ground.

"We're just trying to make all our mistakes beforehand," N. K. Wilson, supervisor of passenger services for the airline company, explained, when asked about the model.

'Egg' State

Pennsylvania ranks first in the United States in the dollar value of its egg crop and second in the number of eggs produced, the Pennsylvania Chain Store council reported in opening a producer-consumer campaign to move a heavy surplus of eggs into consumption in behalf of the state's \$65,000,000 poultry industry.

WHY BLAME THEM?

Uncle Jack was comfortably lighting his pipe in the living room one evening when Aunt Maria glanced up from her knitting. "Jack," softly remarked the good woman, "do you know that next Sunday will be the twenty-fifth anniversary of our wedding?" "Ye don't say so, Maria!" responded the boss, pulling vigorously on his pipe. "What about it?" "Nothing," answered Aunt Maria, "only I thought maybe we ought to kill them two Rhode Island Red chickens."

Test Case

He went boldly up to the box-office at the big theater. "Have you three seats in the front row of the stalls for the performance tonight?" he blandly asked. "Yes," replied the girl behind the grille, with unconcealed eagerness. He smiled pleasantly at her. "In that case I don't want them," he replied; "the show can't be much good."

Good Test

Boss—Have you the firmness of character that enables a man to go on and do his duty in the face of ingratitude, criticism and ridicule? Applicant—Well, I cooked for our camping party last summer.

Move On

Policeman—What are you standing 'ere for? Loafer—Nuffink. Policeman—Well, just move on. If everybody was to stand in one place, how would the rest get past.

Anatomy

Son—Father, I've got my heart set on a Rolls-Royce. Father—Well, that's probably the only part of your anatomy that will ever set on one.

ON THE BEAN

"Did Mrs. Sqwaks return that flatiron she borrowed from you last month?" "Did she? Why when I told her that I was tired waiting for it and I wanted her to let me have it right away, she did, and I got it right on my head."

Rebuke

"Late again, Simpkins; how's that?" asked a schoolmaster of a tardy scholar. "Please, sir, I got up late, and only left myself 10 minutes to dress," said the boy. "But I can dress comfortably in that time." "Yes, sir; but I wash!"

First Aid

"Come over right away, doctor," screamed Mrs. Suburb over the phone. "Willie is awful sick. He can't stand; he can't sit; he can't lie down; he—" "I'll be right over and tell Willie to roost until I get there," replied the doctor.

Begging Business

Housewife—How did you come to fall so low as to go around the country begging? Tramp—It's a long story, mum, and it's now in the hand of my publishers. I'm on my way to New York to correct the proofs.

It's All Over

"Me father and a man named Dooley have been fighting for 20 years, but now they've stopped." "Why? Did they bury the hatchet?" "No; they buried Dooley."

HOW HE DID IT

"I can say with truth I have never broken a traffic rule or injured anybody." "Great record—how do you do it?" "By never owning a car."

QUICK WORK

The pale, nervous-looking man was applying for a job. "I think I shall be able to suit all your requirements, sir," he said. The manager shook his head. "I'm afraid I cannot take you," he replied. "You see, I'm wanting a single man." A look of horror appeared on the other's face.

"B-but, good gracious," he stammered, "when I came here yesterday I was told you were looking for a married man!" "I'm sorry," said the manager. "It must have been a mistake." The applicant stepped forward and clutched him by the arm.

"Look here," he gasped, "it's all very well for you to talk like that—but what am I to do? You see, I went straight out and got married!" "It's really too silly, this publicity seeking!" announced the solid citizen. "What's the trouble?" asked a friend. "Trouble? Look at this newspaper. It says Judge Hankins announced yesterday that he would not sit for a month."

NO BENCH

"It's really too silly, this publicity seeking!" announced the solid citizen. "What's the trouble?" asked a friend. "Trouble? Look at this newspaper. It says Judge Hankins announced yesterday that he would not sit for a month."

DOGS AND CATS

Pike—You say you have moved into a quieter place? Sunfish—Yes, where there are no dogfish or catfish!

Why?

A four-year-old boy, asked by a woman what his name was, replied: "Bunny." "Have you no other name?" he was asked. "No," came the answer. "What is your father's name?" "Daddy," answered the child. "Has he no other name?" "No," said the boy. "Then what does your mother call him?" "Fathead," piped the youngster, triumphantly.

Character Observation

He had just been worried in a business deal and he was very angry. "I look upon you, sir, as a rascal!" he said. "You are privileged," said his rival, "to look upon me in any character you care to assume."

Following Advice

"See here, you're seven payments behind on your banjo." "Well, the company advertised, 'Pay As You Play' and I can't play much."

Up Goes the Ante

Mr. Simms—A penny for your thoughts, darling. Mrs. Simms—Make it ten dollars, dear. I was thinking of a new hat.

Standards of Living

She—Are you sure that we are living beyond our means? He—Worse than that. We are living beyond our credit.

New Arrival

Professor—What is it? Nurse—A boy, sir! Professor—What does he want?

SPOKE BUT THE TRUTH

Smart Kid—I can jump much higher than that tree, mother. Mother—But, Willie, you mustn't say what is not true. Smart Kid—Well, that tree can't jump at all.

Correct Answer

"Good morning, parson. Haven't seen you lately." "No, captain, I've been busy. Only this morning I married three couples in 15 minutes." "Smart going, parson! That's 12 knots an hour!"

Share-Cropper

City Visitor—So you raise all these chickens yourself? Farmer—Well—or, I furnish the food, but the hens take charge of the education.

Stumbling

"Why, Mary, what are you crying for?" a little girl was asked by her mother. "My teeth slipped and stepped on my tongue," sobbed the child.

Great Background

Fond Mother—What do you think baby will be when he grows up? Exasperated Father (fed up)—I don't know. Toward a crier, most likely.

WAITING THEIR TURN

Giles and his wife were in a large town for the first time in their lives. After a lot of trouble they had boarded a tram which went to the address their son, who lived in the town, had given them.

Five minutes passed. Then the tram came to a stop. "James street!" called the conductor. One man got out. A few minutes later the tram stopped again.

"Catherine terrace," announced the conductor. This time a woman stepped out. Mrs. Giles leaned towards her husband. "Isn't it time for us to leave?" she asked.

Giles shook his head. "Don't show your ignorance, woman," he whispered. "We've got to wait here until that man calls our names."

Critics

Sammy—Pa, what is a dramatic critic? Pa—A man who is 99 44-100 per cent pooh.

RIISING TO GREAT HEIGHTS

Kite—How are things with you? Balloon—Fine. I'm getting up in the world now!

In the Dark

Mr. Stinky of the Kickup ranch was scoring the hired man for his extravagance in wanting to carry a lantern when going to call on his best girl. "The idea," he scoffed. "When I was sparkin' I never carried no lantern; I went in the dark." The hired man proceeded to fill the lantern. "Yes," he said sadly, "and look what you got."

Running in Circles

"Why don't you walk down the street instead of galloping around in the revolving door?" the hotel porter asked a guest who had explained that he was just taking a walk before breakfast.

"I mustn't go too far," said the guest. "I'm expecting a telephone call any minute."

How About the Steak?

Diner—I've been waiting half an hour for that steak. Waiter—Yes, sir, I know you have. If everyone was as patient as you, this would be a better world.

Return Engagement

Mrs. Hammer—So Phoebe has gone back to live with her husband? Mrs. Slammer—Yes, she couldn't bear to hear of him having such a good time.

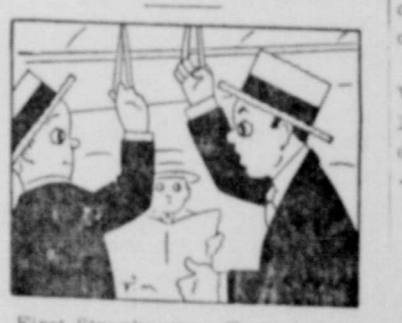

Optical Illusion

Optician—Weak eyes have you? Well, how many lines can you read on that chart? Patient—What chart?

Nature Lesson

Teacher—And what lesson do we learn from the busy bee? Smart Boy—Not to get stung.

WASN'T IT FULL?

First Straphanger—Gosh, but this car's staggering like a drunk. Second Ditto—Well, ain't it full?

Don't Worry

"Go easy. This hill's not so safe." "Can't slow down—the brakes are not working." "You don't mean to say—" "Oh, don't worry—the horn's all right."

Silver Lining

Famous Boxer—Win, lose or draw, I get \$50,000. Reporter—I see. Every clout has a silver lining.

Tough Chewing

"Your diet should include plenty of iron." "But doctor, I haven't a tooth in my head."

Heading the List

"If it wasn't for me you'd be the biggest fool in the show business." "How does it feel to head the list?"

Second Helping

Diner—This salmon isn't nearly so nice as that I had a week ago. Waiter—It should be, sir; it's the same fish.

Ford Launches "National Youth Movement"

Detroit, Michigan, June 22.—Henry Ford today launched a "National Youth Movement" of his own.

To 25,000 other industrialists and manufacturers in all parts of the United States he mailed a booklet pointing out the opportunity open to every employer of labor to help in solving "our gravest national problem—youth unemployment."

"Of all the opportunities confronting our country today," Mr. Ford said, "one of the most important is the creation of openings for unemployed youth.

"To an extent impossible to exaggerate, the future character of our American government, institutions and ideals—depends on what is done about this opportunity today.

"As I see it, American business and industrial management—have ready at hand the means to approach this opportunity constructively.

"Municipal, State and other governmental agencies cannot attack it effectively. They doubtless have done their best but at most their measures are temporary; they can do nothing of substantial and lasting good. Any project that tends to decrease youth's initiative and stultify self-reliance is unwholesome both for youth and the nation.

"Widespread action by private business and industrial management, each industrial concern starting five boys or twenty or a hundred, according to its ability, in a trade school or on the land, on a basis that permits youth to retain its self-respect, will abolish youth unemployment at once.

"I have a deep faith that, if each business and industry will make it part of its business program to do what it can to create opportunity for youth to get started—the problem will vanish."

The booklet explains Mr. Ford's ideas on how to meet the situation constructively—and the results he has attained at Camp Legion and Camp Willow Run, respectively at Dearborn and Ypsilanti, Michigan.

To these youth camps, one in its third, the other in its second year, Mr. Ford gives his personal, daily attention.

"I'd rather do this than anything else I know of," Mr. Ford told newspapermen. "These boys need a chance to get started. If we have faith in the American way of life, we will help them get a start, and when they start they will carry on the faith in America.

"If it is impossible for industry to employ all of them at once in regular jobs, there remains something else—it is one of the most constructive things that could possibly be done.

"They can be given a chance in trade schools within the industries themselves, or a chance to work for a while close to the soil. They can gain in health, self-reliance and self-respect, earn something and learn something at the same time. On the land they can learn what city boys and town boys, especially, need to know: that the ultimate resource of this nation, or any nation, is its land.

"It would be a fine thing if business were to accept this as a social responsibility. Whether it is done by individual business men, by a co-operative business group in town or city or by a community itself, it can be done and it needs to be done."

At both Camp Legion and Camp Willow Run is a group of 65 boys. Before coming to camp, all were unemployed. Most of them are sons of

dead or disabled veterans group has a 320-acre tract by Mr. Ford to work on.

taught the fundamentals of agriculture and plant, cultivate and many different kinds of crops. The products are sold side stands. From the very camp operating expenses.

The boys sleep in tents, but meals in a special mess-hall receives \$2 a day. At the the season the cash balance ing after payment of expenses is divided among the equally. Last season each received \$128 in addition to the

The boys govern themselves maintain camp discipline the their own number. After the ends, those who wish may join Ford Trade School, jobs in Ford factories.

VISITORS IN ANDREWS

Dr. and Mrs. V. Andrews their guests this week Miss Susan, Miss Vera, Miss Charlotte Jordan, of Ohio. Mrs. Ruth is Mrs. daughter-in-law, and Miss is looking after her work.

Floyd County while Mrs. a friend of the family.

Miss Eula Hill, and a niece of Mrs. Andrews, in the home.

Mr. and Mrs. De Hoge Brackettville, Texas, who ranch near Brackettville, of Mrs. Andrews and Mr. Cantwell.

THE VOICE TEXAS

By FIERCE BROWNE

America listened last one of the orderly process government of a free people have made every American less of political affluence proud that 1,900 Americans sending members of their each of the States and he could meet under the pro law and name a candidate choice for the highest office gift of the people.

In Europe, and in most world, save the Western he the people have little to say as to whom their heads nations shall be. Some say by royal descent, and some sword of a dictator.

Judge Jeff D. Ayres home Wednesday from Paris he visited with his wife Ayres, and sister, Mrs. A. I. for two weeks.
