Funeral Services Held for Mrs. John Lewis Tuesday

day morning at 10 o'clock at Plain view, at the St. Alice Catholic Church, for Mrs. John Lewis, age 38 years, who passed awa yMonday afternoon at the Floydada Hospital

Mrs. Lewis who was was injured Friday afternoon when a weight fell from a windmill tower and struck her on the head died from the inia. ries. The accident occurred at the Lewis ranch 21 miles northeast of Floydada. Mrs. Lewis was discovered lying in the yard beneath a windmill A 25 pound weight had fallen 3 feet and had struck her on the head. She was brought to a hospital here where physicians said she had suffered a fractured skull and other head injuries.

Deceased had resided in Floyd County since 1925, moving here from Plainview. She was born Dora Elnora Seipp August 13, 1902, in Wisconsin, and moved with her parents to Plainview when nine years old. She was married to John Lewis on February 12, 1925.

Pallbearers were: Calvin Steen, Floydada; Bob Echols, W. E. Burle son, Matador: W. E. Schoot, Marvin

Survivors other than the husband Amarillo; Mrs. Jess Lockhart, Plain. view; five brothers, Sully Seipp, Plainview; Gus Seipp, Iowa; John Seipp, Oregon; Oscar and Jerry Seipp, of Wisconsin; one aunt, Mrs. Mary Ott, of Hereford.

Burial was made in the Floydada Cemetery following funeral services in Plainview with Harmon Funeral Home in charge of arrangements.

R. B. Gary is Foreman of Grand Jury Project to End Dist. Court Term

District Court convened Monday morning and the grand jury was se lected and empanneled for the term. R. B. Gary was made foreman of the jury; Bailiffs, Walter Hollums, H. B. Alexander, N. E. Tyler, W. H. Foster. Other grand jurors are: Lee Rushing, J. G. Martin, S. F. Barber, A. S. Green, C. L. Minor, W. E. Ed. wards, Gilbert Bean, J. G. Wood, R. I. Bennett, J. N. Dunn, and C. L.

The grand jury adjourned Wednesday morning for the term after having worked two days.

Mr. and Mrs. Homer Hopkins To El Paso, Texas

Mr. and Mrs. Homer Hopkins, of Las Cruces, New Mexico, and for mer residents of Floydada, moved this week to El Paso, Texas, where Mr. Hopkins will be employed with Sears, Roebuck & Company, of that city. Mr. Hopkins will be in charge of the piece goods department. He was formerly employed with J. C. Penney Company here and at Las

to Ralls Friday where he will be em of this year. ployed in a barber shop. Mr. Coop. er had been employed with Hilton's shop in Floydada for several months.

Mr. and Mrs. C. L. McMurray moved to Amarillo Sunday where they will make their home, and Mr. McMurray will be associated with a life inurance company a salesman.

Endless monotony in small-home subdivisions should be guarded against, declare Federal Housing Administration officials and progressive builders. How it may be done is shown in the illus-

tration above. These four houses have substantially the same general floor plan. Yet through wise choice and use of materials and proper spacing and grouping of doors and windows pleasing variations have been achieved and each house can claim an individual

The FHA has long been pointing to the possibilities of obtaining variety in small houses by reversing and revolving the plan and by varying the materials and combinations of materials.

This drawing shows what can be done in this manne

The house at the left might have a high base of wood siding with stucco above, or the base could be of masonry, or concrete units with stucco applied to masonry, or concrete units above. The second house indicates the use of vertical boards and battens for the walls and horizontal siding in the gables. In the third house horizontal siding for the walls and flush boards in the gable ends might be used. And the fourth house suggests the possible use of brick for the walls and some type of siding or shingles in

The result: Each home has pleasing variations from its neighbors but the result as a whole is harmonious

Draft Board Meet- Floydada Lose to A. and M. College O. P. Rutledge, Jr. ings Are Set For October 11, 12

Austin. October 8 .- State head quarters for selective service Tuesday announced conferences will be held at various cities October 11 and 12 for instructing local draft boards in the area surrounding each meet.

County clerks whose offices are setting up the machinery for regis- teams. tration also were invited to attend

October 11, conferences will be held at Amarillo, Fort Worth, San Antonio, Austin, Lufkin and Waco. October 12, meetings are at San Angelo, Dallas, Corpus Christi, El Paso, Longview and Houston.

FLOYD COUNTY DRAFT BOARD Floyd County's Draft Board will be composed of the following men: J. M. Willson, Floydada; T. P. Collins, Floydada; and W. H. Counts,

W. P. A. Sewing

Year's Work

The W. P. A. Sewing Project, su pervised by Mrs. Frances M. Jenkins, will complete a year of operation under its present work project number on October 27, 1940. The City Council recently voted to discontinue its sponsorship of the project when the present W. P. A. funds are exhausted on November 1, 1940.

Mrs. Jenkins states that during the past year W. P. A. has expended \$6,466.54 for alaries and taxtiles. The City of Floydada has spent \$595.70 for rent, Utilities, textiles, and findings. The project has completed 7,660 garments which have been issued to needy families through the Surplus Commodity Distribution Project.

At present the project employs thirteen women.

Santa Fe Loadings Off For Week Ending Oct 5

The Santa Fe Railway System car. loadings for the week ending October 5, 1940, were 22,230 compared with 23,689 for the same week in 1939. Received from connections were 7, 272 compared with 6,930 for the same week in 1939. The total cars moved were 29,502 compared with 30,619 for the same week in 1939. The Santa Fe handled a total of 27. Mr. and Mrs. Elmer Cooper moved 841 cars during the preceding week

> Mr. and Mrs. Marvin Watson, of Jonesboro, visited over the week end with Mr. and Mrs. W. O. Jones and Mr. and Mrs. Wilmer Jones, Jr.

Vitamins Are In Vogue; Let's **Get the Facts**

In recent years, the term "vitahas become a household word. To nearly everyone it means vim, vigor, vitality, and all that goes with good health. What are these vitamins anyhow? What is the story back of them? back of them?

The existence of certain unidentified substances having superior nutritive properties was suspected long, long ago. As early as 1500 Egyptians and Chinese hit on the discovery that eating livers would improve one's vision in dim light. Today we know that the liver supplied vitamin A, recognized as a protective food factor for night vision. About 1720, Kramer, an Austrian physician, found that when certain fresh foods, such as vegetables and fruits, were added to the diet of persons suffering from scurvy, this disease was cured. To day we know that these foods supplied vitamin C. These and other instances of earlier times afford an interesting background to our pres-ent knowledge of vitamins.

Word Coined 28 Years Ago

It was only 28 years ago that the word "vitamin" was coined. And since that time, the nation has become "vitamin-conscious." Scores of scientists are engaged in vitamin research. New discoveries are being made, and the subject has aroused such interest, that the public last year spent about \$75,000,000 for vitamin products in drug stores.

For a long while, vitamins were looked upon as something quite mysterious. Today, although there is still considerable mystery, a great deal is known about them.

Several Kinds of Vitamins

We know there are several kinds

Outstanding among recent discoveries are those of Dr. C. A. Elvenhiem of the University of Wisconsin. He found, in studying the B vitamins, that meat is the richest source of these important factors. The three on which the most informal bealth. In addition, vitamin A sues. Vitamin D, sometimes known as the "sunshine" vitamin, is exceptionally and bealth. In addition, vitamin A such as the "sunshine" vitamin, is exceptionally and bealth.

University of Texas Students

ed to arms in national defense won't lose either class rank or tuition, University Board of Regents have decided

The University's governing board, following a recent meeting, issued a statement to the effect that, during the college year, any member of the military or naval service entering active duty would receive rebate on all but optional fees.

At the close of active duty, it was explained, such students may resume class work in the 1941-42 long session at the point they left off and with no loss of academic status.

Offiicals pointed out there is at present no way to check the number of University students falling under this ruling by virtue of reserve commissions, membership in the national guard or future voluntee or conscripted service.

Regents have approved award of \$200 Will Rogers Memorial Scholarships to five young Texans. The \$60,000 fund was presented the University, along with California and Oklahoma, last year by Jesse Jones. Houston, U. S. Secretary of Commerce, and Amon G. Carter, Fort Worth publisher. The two men were members of the commission which raised the memorial fund to the American cowboy-humorist.

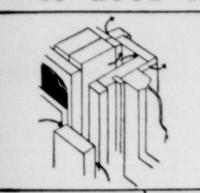

Awards went to J. Curtiss Brown, Mankins; Sidney Brown, Rosenberg; James Stiff, Jr., Big Spring; Kenneth Wiley, Port Arthur; and N. B. Sikes, Austin.

South Side Singing Convention at Cedarhill Sunday

The South Side Singing Convention will meet Sunday at Cedarhill in an all day gathering with dinner on the ground. The regular second Sunday Singing which is held each second Sunday at the South Side Baptist Church will give over to the all day convention. All singers and the public are invited to attend.

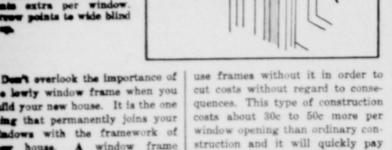

Mrs. L. G. Mathews returned home Friday afternoon from Los Angeles and San Diego, California, where she visited for several weeks with her daughter, Mrs. William Graff and brother, Pat Featherston.

Traditional American Food Traces of Ice Age Life Becoming More Popular

The great American cook is to be honored in her own country. One of the hotel chains is to comb the land for housewives' recipes, famed in their own circles or localities, but worthy of wider fame. The canvass restaurants. It shows a steady decline in the standing of Continental specialties, a corresponding rise in that of traditional American fare.

Corned beef and cabbage outdrew sole marguery 3 to 1; apple pan dowdy has long since passed French pastry; lamb stew is outdrawing Parisian meat courses drenched in sauce. The chain would go farther. It would draw on our resources of cookery still untapped. Codfish cakes on the morning menu of a local hostelry is a sign of a reciprocity worth cultivating. Kentucky does noble things with old ham. It should not be necessary to go to Kentucky to know that,

The two seaboards enjoy many simple fish dishes that deserve a wider public; the Pennsylvania Dutch have a whole cuisine on which to borrow; the indigenous hamburger and its affiliate, the meat-ball, are susceptible to infinite variation; corn lends itself to a myriad delectable forms; there are 448 ways to cook an egg, it has lately been estimated. About many of these, more should be known.

And to these, and the other dishes, which the canvassers may elect, the names of their localities should be conspicuously attached. A baked bean is the better for being Boston baked, and "scrapple" without 'Philadelphia' would be unthinka-

Toll Gate Crasher 'Dies' To Cross Seattle Bridge

Recorded in history are the names of the first motorist, the first bicyclist and the first roller-skater to cross the Lake Washington Floating bridge near Seattle. Now comes the first toll-gate crasher.

Joe's Bottom-Up club, a group of young men who meet regularly for social purposes, defied Lake Washington Floating bridge enthusiasts to top this one:

You can get a free ride across the bridge," says John Nacey, club vice president.

And Nacey ought to know. He "played dead," reclining on a stretcher in an automobile which drove across the bridge. Merrill Scott, a department-store employee, was the driver.

"We don't have to pay for the corpse, do we?" Scott asked, as the toll-gate attendant began counting noses. "He's on his way to a funeral

The startled attendant hurriedly collected fares from Scott, Jack Rooney, Dwight Powell, Joe McDaniels and Jim Wiles, all club mem bers, and waved the "funeral party" through the gate.

A safe distance from the gate, the erstwhile corpse roused himself: "Well, that's a new way of getting across the bridge!" he laughed. Wonder what they'll do next?"

Doctor Eyes Business Man

Analyzing the modern business man, Dr. Edward V. Allen of the Mayo clinic has found a number of | and ultimately arrives, like her things wrong. He says the modern business man doesn't have enough fun, eats too much, has a short temper, high blood pressure and carries his troubles home to his wife. Dr. Allen pictures many executives heading toward apoplexy or a protracted heart ailment. He suggests that the business men of the nation work less, learn how to play sanely outside the office, become interested in hobbies, take more vacations, lie in bed at least one morn-

ing a week and curb ambition. Most business men know what is the matter with them without going to a doctor, but few of them are in a position to do anything about it. They have, in the modern vernacular, a bear by the tail. They can't let go. They must go on.

Baby Knows History

They are but two and four years old, respectively, but Gerald William and Eugene Bernard Sloane of Seattle, will have a head start on their classmates when they begin their study of civics.

They can already relate the preamble to the Constitution, most of Lincoln's Gettysburg address, name the Presidents of the United States and furnish a list of other historical and governmental information.

They came by their store of knowledge through helping their father learn the things he felt he should know before becoming a citizen. The father is a native of Athlone, Ireland.

Talking Pictures Expensive

When Warner Brothers introduced the Vitaphone, little did they realize that the event of talking pictures would make every bit of equipment in every studio obsolete and that subsequently the perfecting of talking pictures would cost the industry more than \$300,000,000.

And even today the film industry sits on a financial volcano, never knowing when some new invention may convert present cinema equipment into so much junk. And it threw many a silent picture star out of-work, due to their voices not being adapted to talking pictures. Only Charlie Chaplin held out against

Discovered in California LOS ANGELES.-Several thousand fragments of Ice age animals already have been found in a geological project recently begun in California by a group of scientists jointly sponsored by the city of Inglewood and the University of Southern California.

The fauna from the Pleistocene, "Ice," age-estimated at from 20,000 to 50,000 years ago-is substantially the same in the Centinela park area as that found at Rancho La Brea, according to Dr. Clements, in charge of the work.

While the latter are better preserved as specimens because of the tar pits which trapped the animals, the new discoveries will prove highvaluable in a scientific way, Dr. Clements stated.

"This deposit gives a truer representation of the distribution of the various types of animals than do the tar pits where a higher preportion of carniverous animals such as the saber-toothed tiger were attracted by the trapped mammoths and other animals," the geologist explained.

Among the fragments already found at depths of approximately 50 feet below the present ground level are portions of the imperial elephant, mastadons, a horse about the size of a present-day draft horse, camels, bison, saber-toothed tigers, great ground sloths, tiny deer and many water birds indicating that the area under examination was a river during the Ice age.

Also evident from specimens found by the geologists is the fact that the Ice age had a heavy rainfall and abundant vegetation.

Urge Government to Aid Housing Plans for Cities

Expressing its belief that the rebuilding of the extensive and growing blighted areas in our cities is an urgent necessity, the National Association of Real Estate Boards suggests that U. S. H. A. be remodeled to turn its activities to the assistance of private redevelopment companies, chartered by it, to rebuild large areas in the blighted

"Blight and decay in the close-in areas is in itself a major cause of bad housing," the statement, signed by Newton C. Farr, Chicago, president of the association, and Herbert U. Nelson, Chicago, executive vice president, points out.

"Decline of these areas has many causes, but chief among them, no doubt, is the increased use of the automobile. This has caused too sudden and unplanned decentralization. sembled, replanned, and rebuilt by helps to allay the itching private effort unless government zema. Price 50c per bottle. helps. If government and private business can develop an appropriate plan for this vast undertaking, it will help local government and stimon the details of a practical plan of this kind which would, we believe, put many dollars of private funds to work for every dollar invested by government."

San Antonio 'American Venice' San Antonio, Texas, city of light and imagination, of beauty and ugliness, old and new-saunters, smiles clear little river, winding under 42 bridges to give her the name of "the American Venice." The river is being "beautified" these days, with Venetian bridges, curving stairways, flagstone paths, tropical plants and a small open-air theater with the seats on one side of the

stream and the stage on the other. A hint of Athens in the masses of garden flowers and oranges for sale along the sidewalks; a reminder of Italy in the rose red tower of the courthouse and the cypresses that lift long fingers into an almost Italian sky-though Italy would never hang Christmas lights and tinsel on a cypress tree!

Slip Brings Career

Accidentally spilling a glass of water on his hostess brought Angelo Bisenz fame and fortune as an industrial designer in New York city. He noticed that the glass and many other articles which we handle in our daily lives were not designed to fit our hands.

Bisenz changed all this by what he calls "formagenic design." He has designed door-knobs which can be opened with soapy hands, glasses with a non-slippable groove, a safety razor that is easily gripped with the fingers and many other household utensils.

He says that his idea of "formagenic design" is just the adaption of utensils to the human body and its requirements. He could go right through a house, he says, and really modernize it formagenically.

Live Longer in Australia

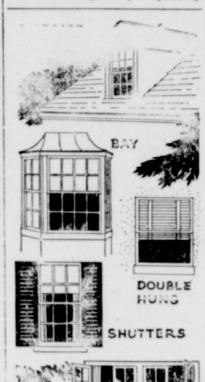

Man's normal life span ranges from 50 to 80 years, but his longevity chances vary from country to country. According to the Statistical Year Book of the League of Nations, a man may expect to live longer in Australia and New Zealand than in any other country on earth. In those two countries, a boy may look forward to 65 years of life, a girl to 68 years. Next best place seems to be the United States, where life expectancy is 63.8 years for the girls and 60.72 for boys. Worst country of all in this respect is India, where the life expectancy of male infants is only 27 years.

Chicken Houses Should be Cleaned Of Lice

Lice are prevalent in exceptional numbers in many poultry houses at the present time and in many cases have caused egg production to drop

Geo. P. McCarty, poultry specialist of the Texas A. and M. Extension Service, recommends one of these three treatments: Dust the birds with sodium flouride; dip the birds in sodium flouride mixture prepared according to the directions on the package; or paint the roosts with nicotine sulphate.

To dip the bird in sodium flouride hold the fowl by the head with the fingers over the beak, and by the legs, and draw through the mixture backword. This will force the mix. ture into the feathers. Such dipping is recommended only during warm

Large poultry producers prefer the nicotine sulphate method, especially if they have houses in which they can control the air circulation. It is most effective on still nights.

The roosts are painted lightly with nicotine sulphate about 30 minutes befire the hens come in at night. When they perch on the roosts, the fumes from the chemical penetrate the feathers and kill the lice. The treatment should be repeated in 10 days to take care of any lice that have hatched out in the intrval. If the ventilators are closed during the treatment, they should be opened about nine o'clock the same night to alliw the fums to escape.

Richard Tubbs, of Lubbock Tech. spent the week end with his parents Judge and Mrs. G. C. Tubbs.

Most popular comics, most instructive features.

A new way of "spotting" bad poatoes by looking at their tubers (part of the stem) through an ultra riolet lamp was described recently by Drs. V. E. Iverson and H. C. Kelly of Montana State college. They reported that bacteria-free potato tubers may be discovered by utting off a portion of the stem end of a tuber and examining it with the naked eye under an ultra-violet amp. They also found that bacteria therwise not visible were revealed by the lamp. The new method will more rapid and cheaper, they

Eagle Crashes Bus Flying at high speed, an eagle crashed against a crowded bus travling between Saloniki and Cozani, in Greece, smashed the windshield and flew inside. Concentrating an attack against a honeymoon couple, the bird knocked down the husband with its wings and scratched and pecked the bride, seriously injuring her. The conductor hurried to her rescue but was knocked insensible and the eagle returned to the bride. A combined charge by the other passengers subdued the bird.

Whisky Was 'Ain't'

A year before the outbreak of war in September, 1939, mountaineers hid a bottle of whisky costing \$3 on the peak of Ben Dorain, 3,253 feet high, near Argyy, Scotland. When whisky prices rose, after the start of the war, to \$3.80 the mountaineers smiled and thought of their eache. When they went to recover it the bottle was empty save for a The latter told them that the ottle had been found and emptied m the day they had left it.

lovely. This may be a poor pun but it is a good rule. Lemon juice removes stains, whitens and softens the skin and bleaches the nails. Keep a half lemon in a saucer, cut the skin and bleaches the nails. side down, on the kitchen sink. Apply to the hands immediately after using kitchen soap or cleansing powder. When nails are grimy, thrust the fingers into the lemon and rub well. The lemon juice removes stains and destroys odors of foods. such as onion or fish. In manicuring, use lemon juice to clean nails. The nails will take a better polish.

Car Sales Gain

Residents of Brule county, Chamberlain, S. D., expended in the first two months of 1940 a total of \$31.-000 or an average of \$5 for every person in the county on new automobiles. According to license records in the county treasurer's office, 31 new model cars were purchased at an average cost of \$1,000 each, after January 1. Ten years ago this county had less than 1,000 cars, while today there are more

Howe Licks Washington

On June 10, 1776, General Howe, driven out of Boston by Washingon the previous year, left his base at Halifax and sailed for New York Washington, anticipating the move, had fortified New York, but was unable to hold it, with the British dominating the waters around Manhattan island. By September Howe had occupied the city.

Color Affects Emotion An interesting example of the effect of color on emotions is shown the painting of Blackfriar's bridge in London. When this bridge was painted black it was a favorite spot for people to commit suicide by jumping from its span. Since the color has been changed to a restfull shade of green the suicide toll has decreased 40 per cent.

Earliest Election Date

The earliest elections held in America probably were those of the delegates to the Virginia assembly in 1619, but the earliest date mentioned in records was that of the election of John Winthrop as governor of Massachusetts in 1631.
