

"By Helping Business You Help Yourself"

The Floyd County Plainsman

Floydada, Floyd County, Texas, Thursday, November 7, 1940

Number 48

Men in Selective Service Age of Floyd County Will Receive Questionnaires This Week

The following list of men have been sent questionnaires by the local Selective Service System according to information handed the press early this week: These questionnaires are to be filled out and returned to the office within the date specified.

No.	Name	Permanent Address
Gerald Brown Phipps	Floydada, Texas	Floydada, Texas
Will Massie Martin	Floydada, Texas	Floydada, Texas
Cleburne Wilson Payne	Floydada, Texas	Floydada, Texas
Taylor Edward Leach	Floydada, Texas	Floydada, Texas
William Austin Dowdy	Floydada, Texas	Floydada, Texas
Esell Williams	Floydada, Texas	Floydada, Texas
Marvin David Rape	Floydada, Texas	Floydada, Texas
William Harold Hams	Floydada, Texas	Floydada, Texas
Chester William Rogers	Lockney, Texas	Floydada, Texas
Robert Edwin Hammonds	Floydada, Texas	Floydada, Texas
King Clyde Jackson	Lockney, Texas	Floydada, Texas
Lonnie Hal Scott	Floydada, Texas	Floydada, Texas
Roy Lawrence Hale	Lockney, Texas	Floydada, Texas
Malvin Eural Duncan	Petersburg, Texas	Floydada, Texas
Oscar Lewis Gross	Lockney, Texas	Floydada, Texas
Miles Adrin Renick	Lockney, Texas	Floydada, Texas
Joe Henry Jordan	Floydada, Texas	Floydada, Texas
Loyce Dean Stimpson	Floydada, Texas	Floydada, Texas
Samuel David Steed	Floydada, Texas	Floydada, Texas
Clifford Freeman Goughly	Floydada, Texas	Floydada, Texas
William Frank Carthel	Lockney, Texas	Floydada, Texas
Elden J. Burgett	Floydada, Texas	Floydada, Texas
James Britton Treadwell	Floydada, Texas	Floydada, Texas
Max Darrow Arterburn	Lockney, Texas	Floydada, Texas
Flavious Eugene Hines	Floydada, Texas	Floydada, Texas
Duraud Bishop	Floydada, Texas	Floydada, Texas
James Ray Lloyd	Floydada, Texas	Floydada, Texas
Joseph Riley Holmes	Floydada, Texas	Floydada, Texas
Miguel Hernandez Luna	Sterley, Texas	Floydada, Texas
George Raymond Eagle	Lockney, Texas	Floydada, Texas
William Benton Cates	Floydada, Texas	Floydada, Texas
Thomas Leston King	Petersburg, Texas	Floydada, Texas

DEMOCRATIC CANDIDATES For President and Vice President

FRANKLIN D. ROOSEVELT

HENRY AGARD WALLACE

Franklin D. Roosevelt, first elected to the White House in 1932, became the first president in the history of the United States to win three terms when reports of the vote in the general election Tuesday gave him a commanding lead over Wendell L. Wilkie.

Late reports gave Roosevelt 55% lead with Wilkie 45% of the popular vote in the recent election. Roosevelt was given 83% of votes in Texas.

110 692 J. B. Teaff	Lockney, Texas
111 341 Johnnie Woodrow Wilson	South Plains, Texas
112 1000 Everett Wayne Furrow	Floydada, Texas
113 1187 Lomie Franklin Carter	Floydada, Texas
114 412 E. J. Golden	Lockney, Texas
115 436 James Calvin Greene	Petersburg, Texas
116 175 Edgar Louis Willis	Floydada, Texas
117 1053 James Gerald Martin, Jr.	Floydada, Texas
118 904 Robin Arthur Byars	Lockney, Texas
119 226 George Melvin Brown	Petersburg, Texas
120 1064 Leo Comer	Lockney, Texas
121 1241 Clarence Melvin Leatherman	Floydada, Texas
122 809 Claud Woody	Dougherty, Texas
123 282 Herman Jacob Kreis	Floydada, Texas
124 1116 Charles Orvel Spence	Floydada, Texas
125 859 Hershel Edwin McNutt	Floydada, Texas
126 1074 Albert Lee Harrison	Lockney, Texas
127 584 John Key West	Lockney, Texas
128 1163 Ray Evans Ramsey	Floydada, Texas
129 309 Johnnie Patton Bradford	Floydada, Texas
130 1152 Ellis Jackson Barbee	Floydada, Texas
131 536 Ernest Martinez	Aiken, Texas
132 1252 Ernest Simpson Worsham	Floydada, Texas
133 771 Henry Clay Patton	Floydada, Texas

205 1239 Lester D. Fowler	Floydada, Texas

REPUBLICAN CANDIDATES For President and Vice President

WENDELL L. WILKIE

CHARLES McNARY

Leads of Democratic candidates for state offices were mounted high in the election, except in the race for agricultural commissioner. A write-in vote in that race cut incumbent J. E. McDonald's majority to 57 per cent. Several counties gave W. N. (Bill) Corry of Fort Worth a majority of votes in the write-in for McDonald's post.

Funeral Services Held Wednesday For Mrs. Swinson

Mrs. J. E. Swinson, age 59, passed away Tuesday at 2:15 o'clock at the Floydada Hospital and Clinic, where she had been for more than a week. Mrs. Swinson had been in ill health for a period of years, and for the past several weeks her condition had been critical. She had been a resident of Floydada for 24 years.

Mrs. Swinson was born at White-rock, Hunt County, Texas, September 20, 1881. She was married to J. E. Swinson November 19, 1907 and moved to Bellevue, Texas, at that time.

Survivors include the husband; four daughters, Mrs. Merle Reed of Sweeney, Texas, Mrs. Earl Crow, Dorothy Nell and Billie Jean Swinson, of Floydada, and two sisters, Mrs. D. R. Gaston of Kingston, Texas, and Mrs. Gabe Bumpas of Wolf City, Texas.

Funeral services were held Wednesday afternoon at 4 o'clock at the First Baptist Church conducted by Rev. Vernon Shaw, assisted by Rev. S. E. McClung, of Perryton.

Interment was made in Floydada cemetery with F. C. Harmon Funeral Home in charge of arrangements.

College Boys Open New Industry to Pay Expense

College Station, November 6.—It might have been that necessity was the mother of the invention and again it may have been that three Texas A. and M. College students were just a jump ahead of the rest for they not only found a way to make their college expense money but also put a new industry in Texas in doing it.

Tom Hill and Ike Jacobs, of Dallas, and Wally Henderson, Richland, are the three boys and the new industry they introduced to Texas is the manufacture of wooden shower slippers.

Last year a local store obtained a few pair of such slippers which had been made in Japan but when the idea hit Hill and Jacobs that they could sell such shoes, they found no production available. They took in Henderson as production manager and finally found a Sherman planing mill which would turn out their shoes for them.

They placed a contract for 1000 pairs and at last report have sold almost the entire stock and at 75 cents a pair. They have not only made a nice profit for themselves, but all of their agents in the other halls are students and their commissions of 15 per cent help toward meeting their expenses.

The students wear the slippers to and from the showers and latest reports show that athlete's foot at the college has fallen off to practically no cases as compared to the records of past years.

Scientists say that a Vitamin D deficiency in wild fur-bearing animals is rare, but in captivity a deficiency of that vitamin is fairly common.

There are still nearly 39,000,000 rural people in the United States who do not have easy access to permanent public library services.

Lubbock Named Draft Center for Panhandle

Austin, November 5.—Within two days local draft boards will be notified of the actual number of class A-1 selectees each will be required to send to induction centers, state selective service headquarters announced today.

Men first called will report between November 19 and 25, on a staggered schedule in order not to overtax the state's five induction centers at Lubbock, Dallas, San Antonio and El Paso.

The date of delivery on the call is the actual date on which men must arrive at induction camps at a later date expenses paid.

The induction centers and counties served by each are:

Lubbock: Dallam, Sherman, Hansford, Ochiltree, Lipscomb, Hartley, Moore, Hutchinson, Roberts, Hemphill, Oldham, Potter, Carson, Gray, Wheeler, Deaf Smith, Randall, Armstrong, Donley, Collingsworth, Parmer, Castro, Swisher, Briscoe, Hall, Childress, Bailey, Lamb, Hale, Floyd, Motley, Cottle, Cochran, Hockley, Lubbock, Crosby, Dickens, King, Yoakum, Terry, Lynn, Garza, Kent, Stonewall, Gaines, Dawson, Borden, Scurry, Fisher, Andrews, Martin, Howard, Mitchell, Nolan, Sterling, and Cook.

Stephenville, November 6.—Carl Arnold of Floydada has been elected a charter member of the Eagle Scout Alumni at John Tarleton College in Stephenville. To be eligible for membership in this new college organization a boy must be an Eagle Scout and a student in good standing at Tarleton. Some fifteen boys organized the club recently.

Roy E. Mefferd, Agriculture teacher at Tarleton, was elected advisor. Dean J. Thomas Davis, head of Tarleton College, was selected as first honorary member.

The purpose of the organization is as follows:

- (1) To be of service to the student body and faculty.
- (2) To be of service to the youth and Scout Organizations of the communities represented.
- (3) To be of service to the members of the Alumni.
- (4) To be of service to the Nation as participating citizens and prospective leaders.

Singing Sunday at South Side Baptist Church

The regular Second Sunday Singing will be held at the South Side Baptist Church Sunday at 2 o'clock. All interested in good singing are urged to attend.

A light switch at the doorway of every room makes it possible to avoid encounters in the dark with large, heavy furniture.

LET CAVANAUGH DO YOUR JOB PRINTING.

Local Board Gives Information On Quotas

The following information based on estimated quotas and calls for selectees is published to all local boards for your information and guidance.

The estimated net quota for Texas for the balance of this fiscal year, which ends June 30, 1941, is approximately 33,213 trainees. The estimated quota of trainees for Texas that may be required up to and including February 13th, 1941, is approximately:

The maximum requirements for men, to include February 28, 1941, have been estimated for Texas by period. The approximate number of calls on local boards during any one month, to include the month of February, are as follows: 1 call in November, not later than November 19; 1 in December, probably between the 1st and 10th; 3 in January. The estimated State quotas to fill these calls are as follows: November, 1573; December 575; January, first call, 2077; second call, 5,535; third call, 2,499; February 4,700.

Because of authority given to the National Guard to order members of the inactive National Guard into active service in order to bring the present units to peace strength; and because of authority given to the regular army to recruit to war strength, the number of trainees required to fill units by Selective Service, may be less than the estimated maximum as shown above.

The above information was furnished through the local selective service board early this week.

REV. RUDOLF A. RENFER
New Presbyterian Church Pastor.

Morning and Evening Services For Presbyterians

The Rev. Rudolf A. Renfer, who recently accepted the call to the local Cumberland Presbyterian church occupied the pulpit at both morning and evening services last Sunday. At both services there were a number of visitors.

During the morning services the infant daughter of Mr. and Mrs. George Clay, Betty Gale was baptized. In the baptismal service the pastor was assisted by Mr. Pierce King, an elder in the local church.

The time of the services at the Presbyterian church on Sundays are: Sunday School, 10:45 a. m. followed by the morning service at 11:00 o'clock. The Young People's meeting is held at 6:30 in the evening, and the evening service at 7:30. The new pastor is interested in the effectiveness of congregational singing and conducts an inspirational song service as a part of each Sunday evening's service.

On Wednesday the mid-week prayer and praise service was in charge of Mr. Pierce King, during the necessitated absence of the pastor at that time.

A bulletin entitled "More Facts School Lunches," available from the U. S. Department of Agriculture, explains briefly the provisions under which state welfare agencies may make surplus foods available to schools for lunches for needy and undernourished children.

Topography and geography of Texas make rural line construction much less expensive than had been expected in early surveys at the time the REA was created.

Rural Families May Obtain new Mattresses

400,000 new cotton mattresses for rural families in Texas! That's the estimate state Extension Service and Triple-A make on the number of new mattresses to be made in Texas as the result of the 1941 cotton mattress demonstration program just announced by the Department of Agriculture. Forty thousand bales of cotton plus the necessary ticking will be furnished Texas for the program by the Surplus Marketing Administration.

In general, the 1941 program will operate in the same manner as the 1940 program under which 191,900 mattresses are being made in Texas according to Mildred Horton, vice director and state home demonstration agent for the Extension Service. The scope of the program is limited to groups financially unable to purchase mattresses from commercial channels and will interfere in no way with the sale of mattresses through commercial channels, she explained.

Families are eligible if they live in the country and had a total income of not more than \$600 for the previous calendar year. For each

year from agricultural occupations, providing, of course, the total income was not more than \$500.

Each eligible family may receive one mattress for each two persons in the family, not to exceed a total of three mattresses.

In interpreting the regulations for the program, R. T. Price, state administrative assistant of the Agricultural Adjustment Administration and AAA supervisor for the project, explains that "total income" means the cash income received from all sources earned and collectible, plus the local market value of unsold farm products raised for sale or received as payment for services or rent and held for sale, minus farm rent paid or to be paid in cash. As in the 1940 program, eligibility of rural families will be determined by county agricultural conservation committees.

Applications for mattresses under the 1941 program will be filed in the offices of county home demonstration agents. In counties where there are no home demonstration agents, county agricultural agents will receive them.

Already, nearly 12,000 bales of cotton have been ordered from the Surplus Marketing Administration for November and December delivery, so in some counties operation under the new program will likely begin prior to the first of the year, Miss Horton said.

13th Annual FFA Convention to be Outstanding

Six thousand farm boys from every section of the Nation, including Puerto Rico and Hawaii, and representing 231,000 members of the Future Farmers of America organization, will attend the 13th annual F. F. A. Convention in Kansas City, Missouri, November 9-16.

Conducting their own convention, these F. F. A. boys will demonstrate in national meeting how "Future Farmers" in nearly 7,000 agricultural communities are receiving practical training in leadership, cooperation and citizenship.

During the past 10 years the F. F. A. membership has increased from 30,000 to 231,000. Membership is open to male students of vocational agriculture, nearly a half million of whom are enrolled in rural schools to improve their abilities in farming and rural citizenship.

LIGHTER SMOOTHING IRONS ARE BECOMING POPULAR WITH USE OF ELECTRICITY

College Station, November 6.—A housewife in ironing an average washing with a six pound iron, lifts 1,200 pounds and pushes this weight for three miles, scientists estimate.

These amazing statistics come from Mrs. Bernice Claytor, specialist in home improvement for the A. and M. College Extension Service, who says that extremely heavy irons are becoming old-fashioned. The trend these days is toward the use of lighter irons, for old-fashioned flat irons were made heavier not for pressure but because they held the heat better.

In modern electric irons, usually a 1000-watt iron is best, Mrs. Claytor says, for it heats more quickly, holds heat better, and cuts operating expenses. Irons vary in weight from three to eight pounds, and it takes less energy to operate one of the lighter ones.

Modern irons are usually streamlined, have beveled edges and grooves for ironing around buttons, resistant handles, thumb rests, and pointed ends for ironing into gathers. Thermostatic heat regulators are desirable, too, since they prevent the iron from overheating, save electricity, and eliminate danger of fire.

Governor O'Daniel Recommends Appointments

Announcement was made this week by Governor W. Lee O'Daniel of his recommendations to the President for the appointment of members of the twelve Selective Service Boards of Appeal of Texas.

The State is divided into twelve Board of Appeal areas, each having approximately 70,000 registrants. Each Board is composed of five members representative of the activities of its district, including one member from labor, one member from industry, one physician, one lawyer, and one member from agriculture.

It will be the duty of each Board to review any decision concerning the classification of a registrant by any Local Board within the area of the Board, and to affirm, modify or reverse the decision, provided that an appeal has been filed with the Local Board. The decision of a Board of Appeal will be final, unless modified or reversed by the President.

"These patriotic Texans are contributing a distinguished service to their State and country," Governor O'Daniel said, "and will receive no compensation for performing this important phase of the Selective Service program."

NINTH DISTRICT: Headquarters at Amarillo, will serve Floyd County and the following men have been chosen to serve: R. E. Underwood, Amarillo; Dr. Roy L. Vineyard, Amarillo; H. G. Hemrick, Amarillo; and Dan Pavillard, of Amarillo. Other District Headquarters will be located at Austin, San Antonio, Corpus Christi, Houston, Beaumont, Tyler, Dallas, Fort Worth, El Paso, San Angelo, and Waco.

Tired of Cheap Guitars, Youth Creates His Own

The ancient art of the violin maker has been revived in a modern sense by Charles W. Bakovich of Preston, Wash.

Bakovich, 25, who has been playing string instruments for 13 years, makes guitars.

Wait a minute. Before you picture the cigar box variety you see in the hands of stage comedians, take another look at Bakovich's masterpiece.

You couldn't duplicate it in any music shop and if you tried you would spend about \$425 getting something like it. As for this particular one, you couldn't buy it from him for \$1,000.

Like the author who said when he wanted to read a good book he wrote one, it all started when Bakovich decided he wanted a good guitar.

He was tired of playing cheap instruments and didn't have the price of a good one.

"I think I'll make myself a good one," he kept telling his friends, and finally he talked himself into it.

It took him 11 months, but when he got through, he had an inlaid instrument with spruce top, birch lining, curly maple neck, back and sides, pine blocks, ebony keyboard, rosewood bridge and walnut, mahogany, walnut and ebonized maple inlay. He even gold-plated the metal work himself, and cut out the pearlloid rest.

But looks is only the first verse. You should hear the tone. And hear him play it, too. He isn't bragging when he says he can listen to Eddie Peabody on the air, then immediately after play the same piece. If you weren't looking you wouldn't know which was which.

But to get back to instrument-making, Bakovich wasn't satisfied with merely making the guitar. He also made a case for it, though he had to try it twice before he got one to suit him.

Now it's become a habit—or hobby, rather. He has started two more guitars. Says it's lots of fun, and when he wears of his exacting task he gets his relaxation by picking up his finished product and turning out whatever kind of music happens to suit his mood—classical, folk songs or swing.

Strange Wallpaper Seen In New York Museum

Chinese, French, English and American wallpapers of unusual pattern, including hand-painted canvases from the bathroom walls of the Fifth Avenue home of Cornelius Vanderbilt, French paper from a Newport, R. I., estate, are displayed in a representative exhibition of recent accessions to the Cooper Union Museum for the Arts of Decoration in New York.

American papers from block prints of the early Nineteenth century to the latest rotogravure types are shown in addition to the extensive collection of American wallpaper on view at the museum.

The wall decorations for the Vanderbilt bathroom were designed and painted on canvas in 1881 by Pierre Victor Galland, foremost French decorator of the Nineteenth century and director of Gobelins, state subsidized tapestry works in Paris.

Lavishly decorated with satyrs, cherubs, nudes, ducks and scrolls, it is painted in heavy browns and reds. Vanderbilt, upon receiving the imported masterpiece, had American painters dab flecks of gold paint over the surface because he felt that the walls were too dark for the room.

U. S. Territories

The United States has paid \$102,300,000 to six foreign governments for territory purchased, in the following order: (1) Louisiana Purchase (1803) from France, including all or part of 13 present states running from the Gulf to Canada, \$15,000,000. (2) Mexican Cession (1848), including California, Nevada, Utah, Arizona and parts of Colorado and New Mexico, \$15,000,000; the Gadsden Purchase from Mexico (1853), of part of Arizona, \$10,000,000. (3) Russian cession of Alaska (1867), \$7,200,000. (4) Spanish cession of Puerto Rico, Guam and Philippines (1899), \$20,000,000. (5) Canal Zone purchase (1903) from Panama, \$10,000,000 and \$250,000 per year rent after 1912. (6) Virgin islands purchased from Denmark (1916) for \$25,000,000. In addition to these purchases from France, Mexico, Russia, Spain, Panama and Denmark, the federal government paid the state of Texas \$10,000,000 in 1850 for ceding territory which is now part of Colorado and New Mexico.

Appendicitis Old Ailment

Contrary to the prevailing opinion, even people in ancient times suffered from appendicitis. This was recently revealed by an expert in the British Medical Journal.

The British expert found a mummy of an Egyptian princess and proved that she had died from appendicitis as he found in her mummy a well-preserved appendix which was acutely inflamed and perforated. Numerous other mummies examined by scientists showed positive signs of the disease in a chronic form.

The basis for the popular opinion that appendicitis is a modern disease is to be found in the fact that appendicitis was discovered in a modern Europe only in 1859. It was then called perityphlitis.

New Drug Gives Rest In Malaria Therapy Case

A new drug to give a one-or-two-day rest period for patients suffering from malaria induced artificially as a treatment for syphilis of the central nervous system was described recently at a meeting of the convention section of dermatology and syphilology of the American Medical Association in New York. Previously an unfavorable malarial condition required the administration of quinine, ending the opportunity to continue the malaria therapy, but the new drug merely arrests the fever temporarily and permits the patient, after the rest period, to continue the fever treatment.

Experiments with the drug, thio-bismol, or bismuth sodium thioglycolate, have been carried on in Cleveland hospitals for several years by Dr. Harold N. Cole, Dr. Gerard A. DeOreo, Dr. James R. Driver and Dr. Herbert H. Johnson Jr. of Cleveland, and Dr. Walter F. Schwartz, now of Pasadena, Calif. According to the paper, a 2-gram injection of the drug, given intravenously just before a malaria chill, will nearly always bring within 6 to 12 hours a rest period from the fever, lasting from 24 to 48 hours.

"After the interruption the chills and rise of fever return at the same intervals in which they were occurring before the injections," according to the report of the experiments. "Usually the interval is sufficient to allow the patient to resume the cycle and continue until he has had the number of chills considered necessary for treatment of syphilis."

Thio-bismol can be used in ordinary malaria cases, Dr. DeOreo said, but as an adjunct rather than a substitute for quinine.

"Many times a patient will have one or even two additional chills after quinine therapy has been instituted to end the course of malaria," he said. "Most of the time this is not undesirable, but occasionally this added chill may be more than the patient can tolerate. To prevent this, thio-bismol is given and quinine started at the same time. The thio-bismol will eliminate the next chill and by that time the quinine has become effective."

Rainbow Bridge in Utah Is the World's Largest

Ages ago, the legend runs, an Indian brave was trapped in a narrow canyon by onrushing flood waters and when death appeared certain sent up a desperate prayer to the gods. Their answer was a rainbow, up which the supplicant climbed to safety. To perpetuate the miracle the gods transformed the rainbow into stone.

That's the way the Indians explain the Rainbow Natural bridge, which arches its pink sandstone perfection across Bridge canyon in southern Utah, a mile or two north of the Arizona border. Scientists, more prosaically, attribute it to erosion.

In any case, it is the largest natural bridge in the world, 309 feet high and 278 feet from pier to pier.

The great white father has it in charge as a national monument, to preserve its natural beauty for all time. To date, that hasn't been much of a task, as only about 3,000 persons have been there since the span was discovered 30 years ago. The records show that an Indian led Dr. Byron Cummings, University of Arizona scientist, to the spot on August 14, 1909.

So remote is this natural wonder that until recently it was a major feat of exploration to reach it.

Woman Teaches Navigation

Shades of Bowditch and the immortal Mercator, mates! Future shipmasters and bucko mates are being taught navigation by a woman.

And that isn't all. One of them is a girl, and she can handle the sextant and shoot the sun as handily as the next one. Wouldn't that shiver your timbers—or would it?

The "skipper" of the class is Miss Florence Miles, and she didn't learn all of her seamanship out of books, either. She became interested four years ago when she and Miss Virginia Roe, an art teacher at Roosevelt high school in Seattle, left Seattle on the Dutch freighter Maple on a world tour.

The captain and other officers initiated them into the mysteries of dead reckoning, compass deviations and determining latitude and longitude from the sun and stars.

Miss Miles reached home with a rule-of-thumb knowledge of navigation and with a desire to learn all of its fine points. She took a course taught by Prof. Raymond F. Farwell at the University of Washington.

Monks Buy Here

Monks of Mount Athos, Greece, are now using American flour exclusively in their celebrated monastery, exercising one of the privileges which have made them a law unto themselves for centuries. Being exempt from import duties, they find it cheaper to buy from the United States the 300 tons of flour they consume annually rather than purchase their supply in the home market. The flour is imported by means of special permits, while the necessary foreign exchange is provided by the Bank of Greece in Athens.

Home Rendered Lard Is Not a Lost Art in Texas

College Station, November 6.—The making of good home rendered lard is not, as is sometimes thought, a lost art.

Hundreds of Texas farm families still make superlative lard, Roy W. Snyder, supervisor of specialists' work with the Texas A. and M. Extension Service, reports.

Good lard has these qualities, he says: it stays hard in cool weather and does not get soft and oily when the temperature goes above 75 degrees; it is snow white; it is almost odorless; it is a neutral fat that does not get rancid even after being stored six months or more; it is smooth, not grainy.

To get this quality calls for quality fat from grain fed hogs. The fat should be cooked as soon as possible after the meat has been cut—at least on the same day. Caul fat, the membranous fat attached to the stomach, and ruffie fat, the fatty tissue around the small intestines, must not be added.

The fat should be cut in one inch cubes, and started cooking in a cold kettle to prevent sticking that results in a "burned" taste. The fat is added a little at a time.

Slow rendering results in quality lard. Fat should be cooked until the cracklings float and are golden brown, and until water bubbles cease to show on the surface.

The lard should be strained through several thicknesses of cloth. The sooner the lard cools, the finer will be the grain, so Snyder recommends stirring to hasten the cooling.

IN HER HANDS

tin and Brown were strolling the front when they were by a very pretty young girl.

er, just raised his hat and went on his way.

you know her?" said Brown, showing interest.

girl," replied Martin, "she's been responsible for a lot of my ups and downs recently."

I think she deserved more than a casual nod," put in Brown, who was an old sweetheart.

ing from afar, or some- where," smiled Martin, "she's an elevator girl at my hotel."

Perpetual Rest - I understand that your mind is interested in perpetual rest.

A Sailor's Jest - Captain - Walter, what do you say? - Bouillon, Sir.

Opposite Results - And did your boy-friend hold feet just before the wedding?

Kindness - Darling, you're as dumb as animals than you are.

QUITE THE BRUTE - He's a brute—he'd do any- thing for a dollar today.

Everything Included - Has this book a love story? - Dealer—Yes, sir.

The Social Climber - Did anyone call while I was out? - Yes, ma'am, Lord Twiddle-

Ask Uncle Benny - Is water good for a man? - No, dear; water will rust and spoil it.

Not Worried - Ah, suttinly is glad dat Ah no income. - How so, Rastus? - Cause Ah don't hab ter worry about no such.

Another One - A man, leaving on a bus, ran back to the house and forgot to take little glasses off when he isn't at anything!

LABOR OF LOVE - An astronomer is making a study of Venus. - Labor of love, he says.

Marked Chemical Change Occurred in Our Dietary

Within a few generations, a more radical chemical change has occurred in our dietary than would be involved in the adapting of marine life to terrestrial habitation, according to an article in Hygeia, the Health Magazine for December.

"When man took to milling his cereals, principally wheat and rice, when he adopted the practice of crystallizing almost chemically pure sugar from the sap of cane and beets, discarding numerous other constituents, when he replaced animal fats, particularly butter, with refined vegetable oils, he raised havoc with the chemical balance of his diet.

"The world produces 35,000,000 tons of sugar, 7,000,000 of which are destined for the United States. The average per capita per annum consumption of sugar in the United States is slightly over 100 pounds, while of flour it is only slightly less than a barrel.

"Sugar, refined cereals and vegetable oils have convincingly demonstrated their advantage from the standpoint of palatability, culinary adaptability, economy, convenience and esthetic appeal. Problems that they entailed had to be solved. From a chemical standpoint, succulent vegetables play an important nutritional role in correcting the conditions resulting from the refining of our foods.

"Sugar, refined cereals and vegetable oils have convincingly demonstrated their advantage from the standpoint of palatability, culinary adaptability, economy, convenience and esthetic appeal. Problems that they entailed had to be solved. From a chemical standpoint, succulent vegetables play an important nutritional role in correcting the conditions resulting from the refining of our foods.

Three Atlanta physicians have announced an invention for making color pictures of the inside of the human body, according to an article appearing in the Southern Surgeon Journal.

The doctors, Dr. Edgar Ballenger, Dr. Harold P. McDonald and Dr. Reese C. Coleman, report that they have devised a miniature color camera, which when adapted to a cystoscope (a type of telescope to explore the inside of the body) makes photographs of the bladder's interior.

The camera might also be adapted to instruments for the examination of the interior of the head, lungs and stomach. They say that it is possible to peer into the body cavities, with these instruments, through a series of lenses arranged in a flexible tube, which has a tiny electric light bulb on the head.

It is also possible, the physicians report, to perform delicate operations with long instruments, which are thrust through the tube and manipulated with the aid of light.

Now it is possible for others, besides the surgeon, to watch the operation, the Atlanta surgeons say. The device is unlimited in its usefulness, they claim, as it can photograph, in natural color, various kinds of cancerous and other growths, injuries and stones, and perhaps curing them.

Tiny Railway Money-maker - A reminder of bitter early-day intercommunity rivalry in the Big Bend wheat country, the nation's shortest independently-owned railroad, still makes money.

The Waterville Railroad company in Washington state, operating a 4 1/2 mile line between Waterville and Douglas, has never borrowed from the government, either.

The four employees run trains twice a week, except in harvest season, when the schedule is twice daily. The line owns its own engine, tender, depot, but uses cars loaned by the Great Northern.

It all started in 1909, when the Great Northern ran a spur up the Coulee to tap bulging Big Bend granaries, but stopped at Douglas. Public-spirited Waterville citizens raised \$80,000 in 10 days and "saved the town."

Passenger service was discontinued after only two passengers were carried in all of 1934. One of the 190 stockholders lives in South Africa.

Most scientists conclude that the dowser or "diviner" locates underground streams chiefly because of his unusual observational powers regarding geological conditions rather than because of any attributes of the rod. The United States bureau of mines officials explain that much interest is evinced now in types of electrical prospecting devices—the seismograph and the torsion balance—in finding mineral deposits.

These are intricate, however, and require services of persons trained in their use and would be valuable to one not versed in principles of geology, physics, electricity and related sciences. Claims attached to divining and mineral rods often have been found to be extravagant and unsubstantiated in practice.

IT SHOULD HELP

The home-team's center-forward was off form. Time and time again he was given a pass right in front of the goal, but on each occasion he either miskicked or sent the ball flying over the crossbar.

When he eventually failed to score a goal from a penalty kick the patience of the crowd reached breaking point.

"Hi!" cried an infuriated home-team spectator. "Here's a half-penny stamp that you want."

"What do I want that for?" asked the puzzled center-forward.

"I stuck on the ball so's it'll go through the post quicker," came the reply.

Orthography Gone Mad - David, who just recently started going to school, feels that any combination of letters should spell a word.

INDISPENSABLE - David, who just recently started going to school, feels that any combination of letters should spell a word.

"I don't think I could live without George." - "Really?" - "Not unless I could have Teddy."

Not Eligible - Little Johnny came home crying. "What be the matter, lad?" asked his grandfather.

"Billy won't play Red Indians with me!" wailed the boy. "Never mind," said his grandfather, hoping to please the child. "I'll play Red Indians with you instead."

Johnny stayed his tears and looked thoughtfully at his grandfather's bald head. "No, you won't do," he said; "you've been scalped already."

Stock Reply - Whenever parts are built wrong, a production boss in a local factory orders them sent back to the repairmen.

What, Again? - Wife—Oh, dear. Hubby—What's wrong now? Wife—I was just thinking how fast time flies.

They're Both Right - "I hear the young couples next door don't agree—that they take an opposite view about their first kiss. What's the idea?"

"Oh, he says he let a kiss fool him, while she says she let a fool kiss her."

EVIDENCE TOO STRONG - "So they convicted your friend of selling bad butter? Was there no way for him to get out of it?"

"No; the evidence was too strong."

U R? - "Johnnie," said the teacher reprovingly, "you misspelled most of the words in your composition."

"Yes'm," explained Johnnie; "I'm going to be a dialect writer."

In Between - We stand between two fairs, With fast trains to and fro; One says, "East," one says, "West," But pocketbook says, "No."

And Pocketbooks - Elmer—I wish I was a Scotchman. Henry—Why? Elmer—They have such close friends.

State Health Officer Advises Car Check Up

To minimize the danger of carbon monoxide poisoning during winter weather, motorists are urged by Dr. Geo. W. Cox, State Health Officer, to check up now on the exhaust systems of their automobiles for defective connections and leaks.

"Colder weather will soon be here, and it will be necessary to drive in closed cars. Carbon monoxide may seep inside from leaky connections and overwhelm occupants of the car," Dr. Cox warned.

He said that "warming up" a car in a closed garage is the greatest cause of carbon monoxide deaths. Leaks from loose muffler connections, and leaks from hot air heaters or connections are potential sources for release of carbon monoxide and should be checked, Dr. Cox pointed out.

Works Projects Administration Make Statement

Lubbock, November 6.—Construction and improvement of 1,495 miles of roads in the 24 counties contained in the Lubbock WPA district was listed as a major accomplishment of the Federal agency in a report released today by J. O. Jones, district manager.

"During the past five years local and state agencies have cooperated admirably in West Texas to provide work for thousands of jobless persons on projects of permanent public value," Jones declared.

"We are proud of the character of work which has been performed in this section by WPA workers since this program was started in July, 1935."

Jones pointed out that 1,393 miles of the roads which have been built and improved by WPA workers in this area were over farm-to-market trade routes. Included in the road program was the construction of 31 new bridges and 885 new culverts and the improvement of 214 existing structures.

Throughout the West Texas area WPA workers have built and reconstructed 42 public buildings, including 13 schools, 17 gymnasiums and recreational buildings, and two office and administrative buildings.

On school campuses in this district eight new stadiums and seven athletic fields have been constructed and one existing stadium and two athletic fields have been improved. Other recreational facilities created include six swimming pools, 19 tennis courts and two golf courses.

Airway markers were installed in 23 localities to facilitate air transportation. Under the heading of public utilities Jones listed the construction and improvement of three storage dams, three water storage tanks, and one new treatment plant. Water mains were extended and improved over a total of 20 miles and 393 water consumer connections were installed. More than ten miles of storm and sanitary sewer lines were installed and 382 sewer service connections were made.

In the public health improvement program 6,232 sanitary privies were built and 3,840 acres of lowlands were drained to aid in mosquito control.

Major physical accomplishments were listed by counties as follows: Bailey County: Highways, roads and streets 72 miles, culverts installed or improved 31 miles.

Floyd County: Highways, roads and streets 102 miles, new bridges built 3, culverts installed or improved 226, public buildings improved 3.

Conservation Payments Near 4 Million Mark

College Station, November 6.—Nearly \$4,000,000 already have been received by Texas farmers and ranch men cooperating with the 1940 AAA program an estimated \$50,000,000 to be paid.

Cotton and wheat parity payments, meanwhile, nearing completion, George Slaughter, chairman of the state AAA committee, announced at a committee meeting in College Station this week.

An estimated 405,000 agricultural conservation payments will be made under the 1940 program, the chairman said. To date, 25,453 payments totaling \$3,711,429 have been made. Last year at the same time only 8,000 payments had been made.

Cotton parity payments amounting to \$21,827,802 had been made to 297,737 producers out of an estimated 350,000 totaling \$25,000,000. Wheat parity payments are 99 per cent complete, \$3,475,864 having been paid to 47,858 producers.

The majority of 1940 agricultural conservation payments will be issued after December 1 because of the requirement that the total soil-building allowance must be earned if payments are to be made prior to the closing date for compliance in the program.

MAKE-OVER LIGHTING BEAUTIFIES BOUDOIR

Besides Lending Charm to Bedroom, Light Conditioning Makes for Reading Comfort. Thanks to Tallish Vanity Lamps, Make-Up Is Simplified.

By Jean Prentice - ONE of the new ways to beautify a bedroom, or any room in the house, in fact, is with new lighting.

There is a great difference between this new lighting and the old. Persons who visited the World's Fairs caught a glimpse of some of the amazing new things being done with lighting, and this goes for home lighting, too.

The illumination specialists have worked out new and better ways to light our homes just as the home economic specialists have worked out more accurate recipes for cooking.

The recipe for new lighting, or light conditioning, includes three ingredients: 1, enough light; 2, the right quality of lighting; 3, good distribution. These combine to make room lighting beautiful as well as comfortable to the eyes.

How such a recipe can be carried out in the bedroom of even a modest home is illustrated by the photo shown here.

Joan, a young schoolgirl, had a hankering for a prettier bedroom . . . and very little money to spend upon it. She decided to make her room more comfortable and attractive with improved lighting. In the ceiling socket, which had formerly held a bulb in a glass shade, she screwed a new indirect adaptor fixture. The fixture went in as easy as a bulb. It was a 150-watt silvered-bowl bulb for an expanse of silky lighting all through the room.

Over the bed she tacked a wall lamp with inner bowl to sit out downward glare, and a 100-watt bulb to give enough light.

A wall bracket was modernized quickly with a little paint, a new candle husk, small inner bowl and shade, together with a 40-watt bulb.

The husk, bowl and shade come in sets. They give a new look to an old bracket.

At the dressing table new boudoir lamps tall enough to send light smoothly over her face were substituted for an older squat lamp.

Under the new lighting the tiny pink carnation patterns in the blue wall paper took on new distinction. The luster of the blue silk dressing table was more noticeable. The new lighting did full justice, also, to the heirloom "pineapple" quilt on the bed.

No wonder that interior decorators today are giving more and more attention to the type of lighting placed in a room. The old day of shadows and pools of light in a room have gone. Light conditioning with its smoothness and staveness has taken its place as a recognized standard for beauty.

State Quote For Fiscal Year Is Announced

State Director of Selective Service, General J. Watt Page, announced today that the estimated net quota for Texas for the remainder of the fiscal year (which ends June 30, 1941) is approximately 33,213 trainees. The estimated quota up to and including February 28, 1941, is approximately 16,959.

General Page pointed out that for the present the estimated net quota for each Local Board will be prorated on a percentage basis according to the number of registrants in each county.

The maximum requirements for men to include February 28, 1941, have been estimated for Texas by period: One call in November, 1940, earlier than November 19, 1,573 men; one in December, probably between the first and tenth, 575; three calls in January—the first 2,077, the second 5,535, and the third 2,499; one call in February, 4,700.
