

"By Helping Business You Help Yourself" The Floyd County Plainsman

Floydada, Floyd County, Texas, Thursday, February 13, 1941

Number 10

Region Scores Wheeler in Review

Feb. 10.—Legionnaires of the 19th District closing a two-day session here Sunday afternoon. A resolution criticizing the Lindbergh and Senator Clegg on their stands against the lease-lend bill. A resolution favoring placing the veterans' hospitals. A resolution developed over word of the Lindbergh-Wheeler resolution and the original draft was sent to committee for revision. The resolution was adopted, the resolution passed the two persons for whom it was evidenced in committee hearings on the proposed bill. The resignation of Col. Clegg as a colonel in the U. S. Army. A tribute to the flag of the United States and a strong hint that there was no room in this country for people who did not uphold the flag. A flag closed an address by Ed Beidel of San Angelo. The Legion Department of the 19th District. A talk was made before the members, Auxiliary members and the town at a general session that closed the two-day session of the 19th District. The Stakes led the auditorium in singing "God Bless the Flag." The Chaplain Herbert Markley led the invocation. A high school French horn quartet composed of Louise Burt, Bobbie Davidson, Dorothy McDaniel and Imogene Sloan, contributed the entertainment. Mr. John DuBose praised the Legion and its high in an address of welcome. T. C. Clif singers, directed by Mrs. Day, sang two numbers "Land of Home" and "By the River." Langford, commander of the 19th District Post, was in charge of the program and just before the Beidel spoke turned the over to Chas. Whitacre, Lubbock, commander of the 19th District. He introduced visiting celebrities and presented the state com-

Captain Wakefield Leaves for Fort Sam Houston

Captain Clint Wakefield left Sunday for Fort Sam Houston where he will enter training for two weeks. After the training period he will return to Floydada. Mr. Wakefield is a member of the U. S. reserve. Mrs. Wakefield and son, Bobby, went to Midway where they will visit relatives for two weeks.

Texas Farmers Cooperatives Increased in 1940

Chartering of 75 new cooperatives in 1940, increased the number of farmers who are members of some type of cooperative to about one third of the total engaged in agriculture in Texas, says C. E. Bowles, extension cooperative marketing specialist.

Reviewing the year's developments Bowles says the total of farmers' cooperative business organizations now number about 840. Of those chartered within the year, 41 were set up to gin cotton, nine were associations to prepare and market fruits and vegetables; six were rural electric cooperatives, and the remainder were for processing and marketing various farm produce and for buying farm supplies. One half of the 22 cooperative refrigerator food lockers were put into service in 1940.

The specialist says the volume of business handled through the cooperative organizations totals several million dollars yearly. The savings to Texas cotton growers through ginning their own cotton in 1940 is estimated at \$2,000,000.

Farmers' cooperatives, despite some opinion to the contrary, are among the most successful businesses in the country. "Some do fail," Bowles concedes, "but their record in this respect is far better than that of business in general." "Farmers set up their cooperatives to help themselves to better returns for their crops and to bring within the reach of their families some of the comforts of life," he adds. "Cooperatives apply democratic principles to business and seek to narrow the spread between themselves and their customers who consume the products of the farm."

SALES SCHOOL TO OPEN MONDAY FOR FLOYDADA CLERKS

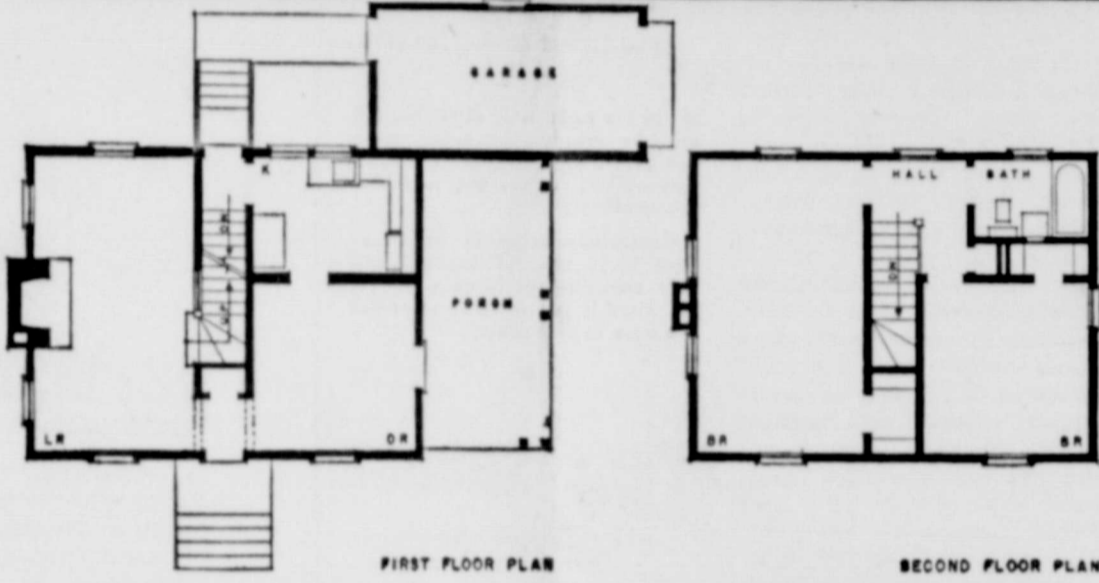

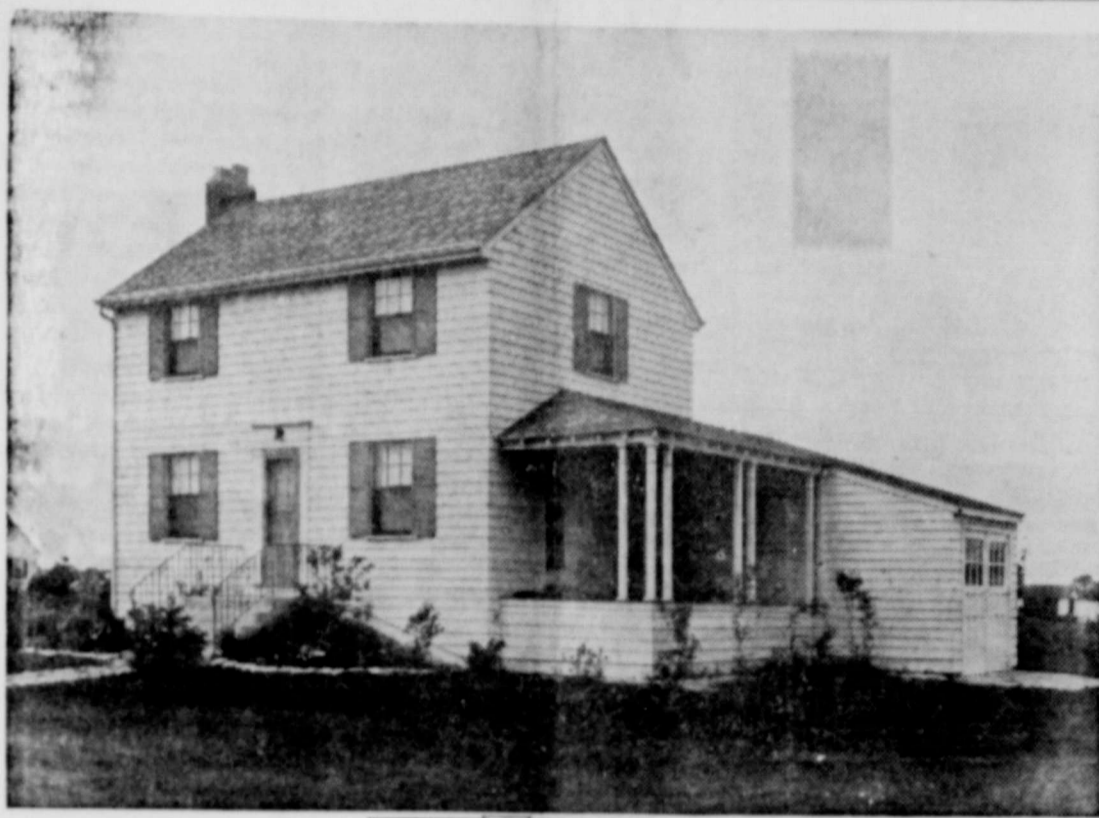

A free school in "Sales" and "Sales Psychology" will open Monday of next week for Floydada grocery, dry goods and ready-to-wear salespeople. The educational campaign is being conducted through exercise of the George Dean Act in cooperation with the University of Texas Extension Service.

Miss Laura J. Wilson, with the University of Texas Extension Service, will conduct classes for each group with special "in-the-store" explanations and demonstrations. Miss Wilson, graduate of Prince School For Store Service in Boston, Massachusetts, has conducted classes for salespeople in some of the largest stores in the United States including Marshall Field's in Chicago, Wanamakers and Macy's in New York.

A joint meeting of grocery, dry goods and ready-to-wear store managers and employees will be held Friday afternoon at 2 o'clock in the County Court room. Miss Wilson will be present and explain the school plan and arrange schedule and meeting places for the classes. Two or three classes per week will be held for three or four weeks, possibly with various stores acting as hosts for the meeting.

It was explained that Floydada is very fortunate in securing the services of Miss Wilson since it is the smallest city where the course has been offered to date. Miss Wilson will arrive in Floydada today from Plainview where she completed instruction the first of this week. Miss Wilson's services were secured through the efforts of Herwin E. Strickland, secretary of the Floydada Chamber of Commerce and Walter Travis, Superintendent of the Floydada Schools.

LET CAVANAUGH DO YOUR JOB PRINTING.

This roomy two-story house is out of the "low cost" home class but provides a satisfactory plan for those who can afford a larger home. The living room is rectangular and occupies almost half of the entire first floor. Entrance hall, stairway, dining room, and kitchen make up the rest of the ground floor, while upstairs are two bedrooms, hallway, and bath. This property is located in Chicago where the Federal Housing Administration assigned it a valuation of \$7,000. The price, however, may vary in other localities.

Farm-Produced Eggs Under a Guarantee

College Station, February 12th.—Selling a planned surplus of farm-produced eggs under a guarantee is an idea which spread rapidly among Texas rural families during 1940.

Myrtle Murray, specialist in home industries for A. and M. College Extension Service, points out that 40 members of the Hill, Navarro, and Floyd county egg marketing associations received a gross income averaging \$135 for the six-month period these were in operation. Eight members of the Uvalde County Egg Marketing Association, selling throughout the year, received a gross income of \$200.

All these sellers received a premium of two to four cents per dozen for fresh, clean, infertile eggs. Each egg is stamped with the name of the association and of the producer.

Explaining the interest of 4-H Club girls in selling high quality farm produce, the specialist said three club girls in Wilbarger County received a total income of \$532 for their poultry products during the year. As a result a 4-H marketing association has been organized in Vernon. One of the three 4-H members sold on contract 273 milk fed fryers to a local freezer locker plant and received premium prices for 1,224 dozen eggs under a similar contract arrangement.

Many of the sellers in the state are realizing the importance of definitely planning to produce a surplus of high quality produce. Miss Murray says. For example, Mr. and Mrs. Ben Bragg of the Hill County Egg Marketing Association have received an average net income of \$141.50 annually for 10 years from the sale of eggs and fryers. The Bragg poultry flock averaged 220 to 225 laying hens in 1940.

ON TRIP TO ALABAMA

Mr. and Mrs. A. L. Hollums and Mrs. Walter, left Sunday for Piedmont, Alabama, where they will attend the funeral of Mrs. Hollums' brother-in-law, Will Pay, who died Sunday at his home in Piedmont.

Sweet sorghum for syrup is raised from the Gulf of Mexico to Minnesota and Wisconsin.

Funeral Rites For Marcus Wilson Whitlow

Funeral services were held Sunday afternoon at 2:30 o'clock at the First Baptist Church for Randolph S. Moore, age 67 years, who passed away at his home Friday, February 7, at 10:30 o'clock. Rev. Victor Crabtree conducted the funeral services, assisted by Rev. Vernon Shaw and Earl Landrope. Interment was made in Floydada cemetery with Harmon Funeral Home in charge of arrangement.

Mr. Moore was born October 28, 1873 and came to Floyd County in 1912 from Tennessee. He was converted at the age of 25 and joined the Baptist Church, and had been an active member since that date.

Mr. Moore was married to Mrs. Alice White January 25, 1925, at Floydada, Texas. To this union one son was born, Suddeth Moore, age 13 years. Four step-daughters also survive: Mrs. Grover Smith, Floydada; Mrs. Johnnie Wisdom, Nogales, Arizona; Mrs. Cecil Smith, Mercedes, Arizona; Mrs. Harold Potterfield, Roy, New Mexico; one sister, Mrs. Maggie Brown, Selmer, Tennessee; three brothers, Alfred Moore, and George Moore, Selmer, Tennessee; Shelby Moore, San Diego, California.

Pallbearers were: Russel Crawford, W. S. Poole, C. W. Nickels, Jim Morrison, Bob Smith, Ham Smith.

Honorary pallbearers were: W. R. Lotzpeich, T. A. Jones, T. J. Campbell, C. M. Meredith, Elmer Cook, John Cage, J. N. Shirey, Ott Glassmoyer, D. I. Bolding, E. R. Borum, W. F. Weatherbee, and T. A. Woods.

Flower girls: Mesdames Bob Smith, D. C. Huckabee, C. W. Nickels, J. A. Dudley, Ham Smith, Jim Morrison, Carl Rogers, Elmer Cook, Annie Edwards, and Paul Newberry.

Meat scientists report that frozen lamb will keep successfully at temperature of 19 degrees Fahrenheit or lower, but that the ideal temperature is from zero to 10 degrees below.

Four Selectees for Friday, February 14th

Four selectees from Floyd County Local Board, replacements for rejections in former calls, will be sent for induction Friday, February 14th. If accepted at the induction station, this will make a total of seventeen men inducted from Floyd County, in addition to a number of volunteers who have gone into the service in various branches, and for which the Local Board will receive credit in due time.

It is very gratifying to the Local Board, that all selectees to date have signed applications for voluntary induction, indicating that they are anxious to get their years' training, which is vocational as well as military.

At present the Local Board has a call for five men, to be inducted on March 3rd, and they will be sent to the station at El Paso instead of Lubbock, according to present plans. Inasmuch as the Local Board has been asked for a report on all available selectees already classified after physical examination, it would seem that we may expect calls frequently, and for more men, until the quota for the county has been filled.

The clerk for the Local Board has been instructed to mail out fifty more questionnaires during the current month. This will include Order Numbers from 401 to 450.

COTTON COATS ARE SUGGESTED FOR SHEARED SHEEP

The office of information of the United States Department of Agriculture says that Dr. Robert H. Burns of the Wyoming Experiment Station, in cooperation with the New Orleans regional laboratory, is experimenting with the idea of clothing sheep in cotton "coats" after shearing. The purpose would be to protect the animals from exposure after shearing.

Last year, Dr. Burns tried out 72 of the "coats" and this year ordered 500 more. This new use for cotton might mean a potential consumption of 50,000 bales of the staple yearly.

Mrs. W. H. McClung, of Perryton, visited from Monday until Wednesday with her parents, Mr. and Mrs. Roy Patton.

Wheat Compliance To Begin in Co. February 13.

Wheat compliance for 1941 is to begin in the county Thursday morning, February 13. There will be eighteen crews in the field by the early part of next week and we are asking that the wheat farmers of the county give these reporters every assistance possible as we are late beginning the checking of wheat compliance but with the number of men we will have in the field and our new aerial maps which will be used there should be no delay in wheat parity payments to the county.

Farmers are again advised that after wheat is checked on their farm if the seeded acres exceed the allotment by more than three acres or three per cent of their allotment, whichever is the greater, it will not be possible to effect complete compliance on the farm. The penalty for being over the wheat allotment by more than three acres or three per cent will be (1) the loss of the wheat parity payment, (2) a deduction will be made from the conservation payment, and (3) the cotton allotment will have to be underplanted enough acres to take care of the extra acres of wheat seeded over the allotment or the cotton parity will be lost.

Farmers who are within the three acre or three per cent margin may dispose of the excess acreage of wheat within fifteen days after notices are mailed to them. The checking of the wheat which may be disposed of will cost every producer \$1.00 for the first plot which is properly disposed of and 50c for each additional plot. This charge will not be limited by a maximum rate. This deposit will have to be made with the treasurer of the County Association before this wheat which has been disposed of may be rechecked. May we urge you again to check your acreage of wheat and if you are over the margin rule and want to comply that you seed a sufficient amount of barley or rye in this excess acreage and dispose of this mixture by effective tillage methods before the farm is measured or keep the mixture grazed off and later dispose of same.

The community committeemen with the assistance of the county committee completed final work on the general allotments and general indices for all farms in the county for 1941 the latter part of last week. Final work in the county office is being completed this week at which time the allotments and indices will be submitted to the State Office for final approval and the farmers in the county should have their acreage allotments for feed crops within the very near future.

ALCYE A. HOOTS, Secretary Floyd County ACA. Quoting the magazine Pathfinder, the Department of Agriculture says farmers in Northern Maryland raise wormwood seed for profit—\$4 a pound for the distilled oil. The yellowish green weed when processed gives out ascaridole, a drug capable of ridding livestock of hookworm.

The vitamin A content of butter varies with the diet of the cow which produced the cream. Let Cavanaugh do your printing.

Home Business Management gives More Time

College Station, February 12th.—Farm families are having increased time for rest and leisure activities as a result of the home management program of the Texas A. and M. College Extension Service.

Louis Bryant, extension specialist who is directing this program, says home management means budgeting expenditures of money and time, keeping home and personal accounts, planning schedules and home living arrangements for greater efficiency. In short, it's the application of sound business principles to homemaking.

As a result of the program more than a thousand women in 25 counties during 1940 followed a definite schedule for home activities to check on their household efficiency. A few less than a thousand families—1980 to be exact — kept home accounts according to a recommended plan, and 690 budgeted their expenditures in relation to their income. Keeping of records was not limited to adults, Miss Bryant says, for 1,800 4-H Club members in 52 counties carried on practical demonstrations by keeping personal accounts.

The specialist points out that the Extension Service, through its county agricultural and home demonstration agents, helped more than 5,000 families in 36 counties during 1940 by providing timely information which was used as a basis for reading, justifying family living. Reports also showed that through better home management practices nearly 15,000 cooperating families were able to have a more satisfactory standard of living.

Savings due to home management plans made in 22 Texas counties were estimated at \$14,001.

Services Held For Randolph S. Moore

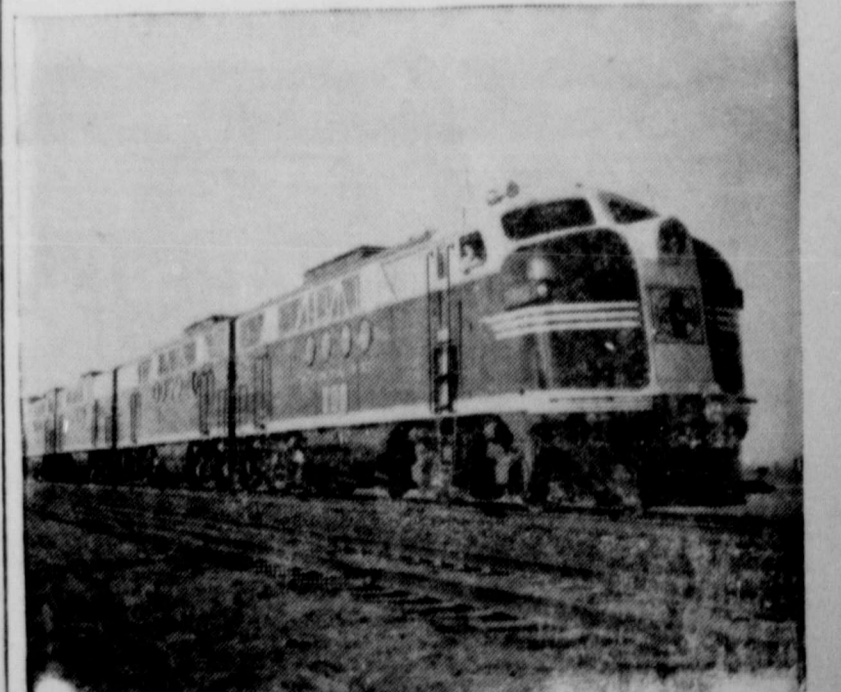

Funeral rites were held Saturday, February 8, for Marcus Wilson Whitlow, age 75 years, who passed away February 5, 1941 at Needles, California, where he had gone recently for his health. Mr. Whitlow had been in ill health for several years. Services were conducted at McCoy with Rev. Sidney Johnston officiating, assisted by Rev. Vernon Shaw. Interment was made in Floydada cemetery with Harmon Funeral Home in charge of arrangement.

Mr. Whitlow was born February 22, 1865, in Kentucky and came to Floydada in 1891 and had resided since that time on his farm in the McCoy community.

Survivors include one brother, Solomon P. Whitlow, of Randolph, Kentucky; one nephew, R. E. Whitlow, of Needles, California, and several other nephews and nieces that their names were unknown.

Pallbearers were: John Shipley, George Smith, Claud Payne, J. Carter, Wm. Culpepper, Leonard Smith. Flower girls were: Thelma Jones, Wynona Smith, Elaine Culpepper, Mrs. Willie Ewing, Mrs. John Gray, and Mrs. Eldon O'Neal.

Early hatched chicks not only pay best, but are the easiest to raise.

Entered as second class matter June 23, 1930, at the post office at Floydada, Texas, under the Act of March 3, 1879.

ADVERTISING RATES GIVEN ON APPLICATION

NOTICE!

Any erroneous reflections upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Floyd County Plainsman will be gladly corrected upon its being brought to the attention of the publisher.

Political Column!

Those whose names appear below have authorized the Floyd County Plainsman to announce their candidacy for nomination for the office under which their name appears, subject to the action of the City Election April 1, 1941.

FOR CITY MARSHALL:

Morgan Wright

FOR CITY SECRETARY:

Clyde W. Henderson
Silas E. Duncan

Corned beef is a beef pickled with salt, saltpeter, and sugar. The salt and saltpeter cure the meat, and saltpeter gives the redish or pink color to the meat. The sugar is for flavor. It cuts the harshness of the salt.

Notice to Bidders

Sealed bids will be received by the Commissioners' Court of Floyd County, Texas, on the 10th day of March, 1941, at 10 o'clock A. M., at the Courthouse in Floydada, Texas, for the following machinery:

One or more Tandem Drive Road Graders with Diesel Engine, with approximately 12 foot blade; pneumatic tires, regular tubes front and low pressure (single) pneumatic tires, puncture-proof tubes, rear, muffler, jack, leaning front axle, and dual brakes, and accessories.

Said County offers in trade as a part of the consideration to be paid for the above described machinery the following:

One Austin Western 99 Diesel Motor Grader, Serial Number D8791.

The Commissioners' Court reserves the right to reject any and all bids. If purchase is made pursuant to said bids, Floyd County will issue time warrants for the payment of all or a part of such purchase price, such time warrants to be issued in the maximum amount of \$4,800.00, bearing interest at the rate of four and one-half (4 1/2%) per cent per annum, and maturing serially, the maximum maturity or final maturity being not later than ten (10) years from the date of said warrants.

EXECUTED this 30th day of January, 1941.

G. C. TUBBS,
County Judge, Floyd County, Texas.

Local Audition Committee Named For Youth Orchestra

D. O. Wiley, Asst. Professor of Music and Band Director of Texas Technological College, C. S. Eskridge, band director, public schools, Lubbock, and Julien Blitz, head of music department of Texas Technological College, Lubbock, have been appointed by J. C. Kellam, state NYA administrator, as members of the local selection committee to hold a preliminary audition for all youth in the Lubbock NYA Area who wish to apply for a seat in the 100-piece All-American Youth Symphony Orchestra to be formed again this year by Leopold Stokowski.

This information was received by Jennings T. Lewis, of Lubbock, NYA Area Director, who will receive, for the committee, applications for auditions from all youth between the ages of 16 and 25, regardless of whether they work on NYA Projects. The NYA is assisting Mr. Stokowski in holding preliminary auditions for the orchestra scheduled to tour the United States, Canada, and Mexico in May and June.

Committee members have asked that applications be sent in as soon as possible, since February 19th is the final date for receiving them. It is expected the local committee will meet soon to set the date and location for the Area-Wide Audition for all youth in Bailey, Borden, Cochran, Cottle, Crosby, Dawson, Dickens, Fisher, Floyd, Gaines, Garza, Hale, Hockley, Jones, Kent, King, Lamb, Lubbock, Lynn, Motley, Scurry, Stonewall, Terry and Yoakum counties.

From the list of applicants, the local committee will select the most outstanding to appear in the Area Audition, the winners of which will go to Austin on February 24 and 25 to appear before a state selection committee. The State committee will choose five musicians from among the winners in the 23 NYA Area Auditions, and these five will appear before Mr. Stokowski in final auditions to be held in Dallas on March 8th.

State selection committee members are Miss Nell Parmley, state supervisor of public school music, state department of education; Hendrik Buytendorp, Austin Symphony Orchestra conductor; Homer Urrich, associate professor of chamber music and conductor of the symphony orchestra at The University of Texas School of Fine Arts; and Anthony Donato, associate professor of violin at The University of Texas.

Highways in Better Condition Than During World War

Highway transportation is much better prepared to serve the military needs of the nation than it was during America's participation in the last World War, but it is imperative that trade barriers be lifted in order that Texas may make its contribution to the transportation of supplies and equipment needed by armament industries Lynn B. Shaw, general manager of the Texas Motor Transportation Association, said this week.

"Highways can well be termed the nation's first line of defense," Shaw declared, "but the 7,000 pound load limit law has made it practically impossible to serve peace-time needs, much less emergency requirements brought about by the production of defense materials."

Where there were only 500,000 trucks available for use in 1918, America today has 4,500,000 trucks ready to speed materials to production points if trade barriers can be lifted to make such movement possible.

Trucking industries are pushing preparations to aid the nation despite the fact that the annual tax burden on medium trucks for hire in the United States is approximately \$282. The average heavy truck with trailer pays \$832, and the great net overpayment of proportionate highway costs is made by the largest types of buses and trucks for hire, according to the chairman of the Interstate Commerce Commission.

Quoting the magazine Pathfinder, the Department of Agriculture says farmers in Northern Maryland raise wormwood seed for profit—\$4 a pound for the distilled oil. The yellowish green weed when processed gives out ascaridole, a drug capable of ridding livestock of hookworm.

Mr. and Mrs. E. C. Patton, Mr. and Mrs. Roy Patton and daughter, Miss Bernice, and Miss Nora Speck, of Lubbock, visited Sunday in Tucumcari, New Mexico, with Mr. and Mrs. C. L. McMurray.

St. Augustine Grass Makes dense Lawn Turf

College Station, February 12th.—St. Augustine grass is establishing its suitability for lawn-making in south east Texas, but, cautions R. E. Lancaster, Extension Service pasture specialist for Texas A. and M. College, such a lawn can be had only by planting pieces of sod. Seed of St. Augustine grass is not available.

The usual practice of plowing manure into the soil preparatory to setting out cuttings of the grass, Lancaster explains, seems to be inadvisable in that it makes conditions favorable for the growth of a fungus disease known as brown patch. It would be better to apply appropriate commercial fertilizer and turn this under before planting. Pieces of the sod should be planted about two feet apart in rows spaced about three feet.

As the grass grows rapidly it is advisable to apply light applications of some nitrate fertilizer every three or four months and to water the lawn immediately afterward to prevent the fertilizer burning the leaves.

St. Augustine grass for many years has been established on lawns in the Rio Grande Valley and more recently is replacing Bermuda as a lawn grass at Houston. The specialist says its northern limits have not been definitely established, but it has survived zero temperature. Seemingly it has no equal in enduring shade. It also grows well in sunlight and seems adapted to any soil type from sand, sandy loam to clays to blackland, provided the soil is fertile. St. Augustine remains green after frosts that kill Bermuda above the ground and endures summer drought better.

St. Augustine is commonly mistaken for carpet grass, but the two are readily recognized when the seed stalks or flowering heads are present.

Wheat Compliance To Begin in Co. February 13.

Wheat compliance for 1941 is to begin in the county Thursday morning, February 13. There will be eighteen crews in the field by the early part of next week and we are asking that the wheat farmers of the county give these reporters every assistance possible as we are late beginning the checking of wheat compliance but with the number of men we will have in the field and our new aerial maps which will be used there should be no delay in wheat parity payments to the county.

Farmers are again advised that after wheat is checked on their farm if the seeded acres exceed the allotment by more than three acres or three per cent of their allotment, whichever is the greater, it will not be possible to effect complete compliance on the farm. The penalty for being over the wheat allotment by more than three acres or three per cent will be (1) the loss of the wheat parity payment, (2) a deduction will be made from the conservation payment, and (3) the cotton allotment will have to be underplanted enough acres to take care of the extra acres of wheat seeded over the allotment or the cotton parity will be lost. Farmers who are within the three acre or three per cent margin may dispose of the excess acreage of

wheat within fifteen days after notices are mailed to them. The checking of the wheat which may be disposed of will cost every producer \$1.00 for the first plot which is properly disposed of and 50c for each additional plot. This charge will not be limited by a maximum rate. This deposit will have to be made with the treasurer of the County Association before this wheat which has been disposed of may be rechecked. May we urge you again to check your acreage of wheat and if you are over the margin rule and want to comply that you seed a sufficient amount of barley or rye in this excess acreage and dispose of this mixture by effective tillage methods before the farm is measured or keep the mixture grazed off and later dispose of same.

The community committeemen with the assistance of the county committee completed final work on the general allotments and general indices for all farms in the county for 1941 the latter part of last week. Final work in the county office is being completed this week at which time the allotments and indices will be submitted to the State Office for final approval and the farmers in the county should have their acreage allotments for feed crops within the very near future.

ALCYE A. HOOTS,
Secretary Floyd County ACA.

The vitamin A content of butter varies with the diet of the cow which produced the cream.

The attractiveness of this new neighborhood is likely to be lasting, largely because of the desirable features which have been built into it, according to Federal Housing Administration Land Planning officials.

Neatly paved and curbed streets, generous set-back of buildings, preservation of existing trees, and planting of the grounds provide a fitting complement for well-designed houses.

Maintenance is less costly and results more satisfying where street improvements are installed in a permanent manner and their cost included in the sale price of the completed property.

Food For Children Increased by Lunch Program

College Station, February 12th.—A quarter of a million children in Texas were better fed in December because of the school lunch program. Free surplus foods furnished by the Surplus Marketing Administration helped feed 260,348 children in 3,627 schools, according to a report compiled by the EMA.

Schools in 212 Texas counties operated under the program during the month, leaving only 42 counties in the state which failed to participate. Aid of the Texas Extension Service and other interested groups and agencies in Texas has been enlisted in acquainting people of these 42 counties with the benefits of the program.

Participation in the program is much higher than the peak reached during the 1939-40 school year.

Welfare agencies, public officials, and teachers say the program is improving school attendance, causing increased weight and improved health of the children, higher scholastic attainment, better classroom and playground attitudes, better eating habits, and increased interest of local patrons in school activities.

Farmers, too benefitted from the program by the consumption of 2,948,367 pounds of surplus food, including: 160,391 pounds of eggs, 93,503 pounds of wheat cereal, 99,814 pounds of corn grits, 84,893 pounds of corn meal, 89,283 pounds of Graham flour, 230,228 pounds of wheat flour, 79,593 pounds of rice, 355,578 pounds of fresh apples, 20,696 pounds canned peaches, 29,026 pounds dried peaches, 253,442 pounds of fresh

Workers Get Half of Texas Oil Cost Dollar

Dallas, February 12.—Texas workers receive half of the money spent in the production of Texas oil, according to a booklet just issued by the Texas Mid-Continent Oil and Gas Association. The booklet, entitled "Important Fact About Texas Oil," is now being distributed by the association from its headquarters in the Continental Building here.

Wages and salaries to Texas oil production workers amount to 49.5 per cent of the net cost of producing the average barrel of oil in Texas, the booklet shows. One-eighth of the net cost dollar goes to Texas tax-collectors for State and local taxes. Supplies cost about 26.5 per cent, while depreciation, depletion, overhead and Federal taxes make up the remaining 11 per cent.

To this net cost must be added an extra one-eighth of the price of the oil which is paid as royalty to the Texas farmer or rancher who owns

the land on which the oil is produced.

Texas petroleum workers and Texas farmers together receive \$400,000,000 a year in wages and salaries and lease and royalty payments from the Texas petroleum industry, the book shows. Of this huge sum, the workers get \$272,000,000 annually and the farmers and other land-owners \$128,000,000. The \$400,000,000 paid these two groups of Texans is four-fifths of the total value of all crude oil produced in Texas. Texas tax-collectors get from the petroleum industry an additional \$75,000,000 a year.

These huge sums are spent and respend in Texas to benefit every Texan, the book points out.

"Fortunately for Texas and its people," it states, "the development of this great natural resource has not only revealed the existence of underground supplies of oil and gas to last for many years, but also has created a permanent home industry which directly provides living for one-sixth of the State's population. Directly or indirectly, practically everyone living in Texas today shares in the distribution and redistribution of money created by this one industry. Every Texan has a stake in the future of this business."

Puerto Rico Buys Much Wheat from Texas Crops

Washington, D. C., February 12th. Puerto Rico's appetite for wheat flour grown in Texas and other wheat states reached the highest peak in twenty years during 1940, according to a statement by the Puerto Rican Trade Council.

Sales of flour to the territory totaled 91,400,000 pounds, a gain of 17 per cent over the preceding year, the Council said. Puerto Rico grows no wheat because of unfavorable climatic conditions and obtains its entire supply from the United States mainland.

The increased buying power last year is attributed largely to heavy Federal spending for national defense bases and public housing, inasmuch as the income from Puerto Rican crops and industries declined somewhat owing to sugar quotas and other restrictions, the report stated.

Sales of all goods to the island from continental United States were valued at \$103,980,000, or 20 per cent more than in the year before.

Of 20,000,000 bushels of onions that bolster the breath of citizens of the United States yearly, Texas supplies more than 3,000,000 bushels.

Get Next To Neck Slices of Lamb

Do you neck? Hope you do when it comes to meat-marketing, for the little-known thrifty neck slices of lamb are well worth trying. Keep it a secret between you and your meat man if you must (not all the girls know about these cuts) but ask him to cut neck slices of lamb for you. Then take them home, braise them with directions that follow and serve with vegetables—like those whole carrots and potatoes—to cries for more!

Braised Neck of Lamb: Have neck-of-lamb slices cut $\frac{3}{4}$ to 1 inch thick. Wipe meat with cloth. Sear meat on both sides in hot frying pan. Place in casserole or baking pan, sprinkle with salt and pepper, cover with $\frac{1}{4}$ cup of water. Bake in moderate oven (375° F.) about 40 minutes, turning occasionally, until meat is thoroughly browned and cooked through. Allow 2 neck-of-lamb slices for 4 servings.

Health, Happiness... and HOT WATER

Has it ever occurred to you that these three are as inseparable as the Three Musketeers? Where you find the one you are sure to find the other two. There cannot be real happiness without health, and where there is health there is cleanliness; that is to say Hot Water.

An Automatic Storage Gas Water Heater will furnish the Hot Water to provide Health and Happiness.
