

"By Helping Business You Help Yourself" The Floyd County Plainsman

COUNTY RE-UNION PROGRAM OUTLINED BY COMMITTEE FOR 51st ANNIVERSARY

Registration of pioneers beginning at 9 o'clock
A. B. Clark, chairman of the registering
committee.

10 a. m., Parade of pioneers, cowgirls,
musicians, floats, bands, Texas Defense unit, rodeo
assistants, Roy L. Snodgrass parade marshal,
starting at the south end of Main street.

11:15 a. m., Address, Major Luke G. Mathews,
11th Quartermaster regiment, Camp Bowie. A.
T. Swepston, president of Floyd County Pioneers
Association presiding.

12:15 Dinner honoring pioneer founders; Invo-
cated by Rev. R. E. L. Muncy, followed by:

Address of welcome, Glad Snodgrass.

Presentation of corsage to the First Floyd Coun-
ty mother and to the first Floydada mother, Mrs.
Glad Snodgrass.

Square dance by children, called by Johnny
Hammonds.

Reading, "The Old Covered Wagon," by Venita
Hammonds, followed by Ladies, Octette.

Songs, Garlan Glover quartette.

Reading, "Great Granddad," by Johnny Ham-
monds.

Songs by Rainer quartette.

Talks by past presidents, followed by other
entertainers.

Memorial service for deceased pioneers, Mrs.
Glad Snodgrass, chairman of Memorial committee.

Election of officers for 1941-42.

Old-Fashioned Square Dance.

A. Moore and grand-
son, Harold Brown, have
moved from Midland and
were here visited with
his daughter and Mrs.
Glad Snodgrass. Mrs. Denver Keast
and Mrs. Kester will leave
for San Antonio where Mr.
Moore will have charge of the
United States Service of the United
States and has been stationed
at Municipal Airport for
three years.

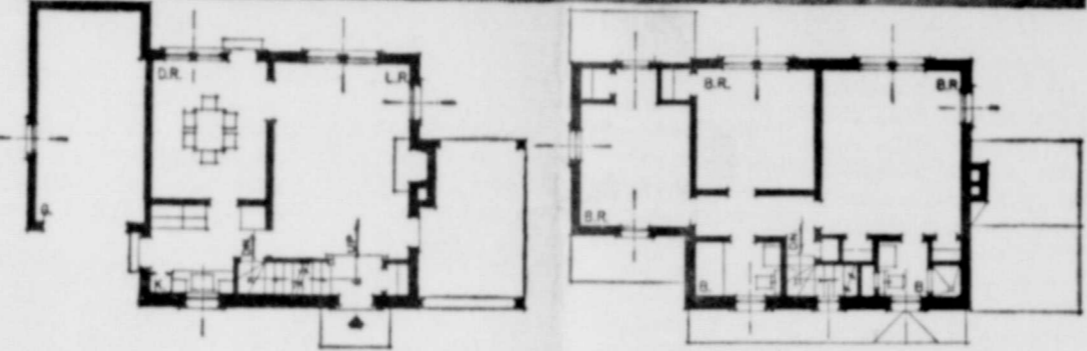

Mrs. Dona Covington, bookkeeper
for the REA office, and J. W. Chap-
man, manager, attended a district
meeting of the Rural Electrification
Administration in Lubbock last Fri-
day and Saturday.

The dairy cow can supply at least
one-fifth of the farm family's food
supply. The health of the family
can be improved by the liberal use
of dairy products and cost of living
thereby lowered.

Democracy in Action— Farmers to Decide Quota Question

of the foundations of democracy is the right of people to share in
all decisions affecting their everyday lives. Although many other
of the world are under the heel of dictatorship, here in America
we are strengthening democracy by putting it into practice in their
marketing quota referendums. The Secretary of Agriculture has
announced a wheat marketing quota for 1941, subject to approval by
the farmers in a national referendum on May 31. When farmers vote in the
referendum on that date, they will be exercising a fundamental privilege
of a democracy.

There is an atmosphere of dignity and permanence to this two-story stone and brick home. Well planned and well located, it represents the type of house most American families some day hope to own. One unusual feature of the plan is that the kitchen, entrance hall, and stairwell are located in front, leaving the dining room and living room opening onto the rear where they may overlook a garden and at the same time are located away from street noises.

A few years ago a home of this kind could be bought by only families of considerable means, but today, through the Federal Housing Administration plan, the range of potential owners has been considerably broadened by means of lower interest rates and a sound single-term mortgage system.

Located in the East, this property was valued at \$8,250 and was financed with an FHA-insured mortgage of \$7,000. Average monthly payments on a 20-year mortgage of this amount, exclusive of taxes and hazard insurance, total approximately \$44. Price of the property may vary in other localities.

Farmers Will Cast Ballots Saturday, May 31

Wheat farmers in Floyd County and throughout the nation will vote Saturday, May 31, to determine if Wheat Marketing Quotas will be effective for the crop which will be harvested in 1941. It will be necessary that the marketing quotas be approved by at least two-thirds of the farmers voting in the referendum before marketing quotas will be put in effect.

Any wheat farmer who has a wheat allotment and wheat planted in 1941 and the normal yield multiplied by the acreage of seeded wheat on the farm of 200 bushels or more will be entitled to cast a vote in the referendum May 31.

There will be no voting by mail, proxy, or agent; however, an authorized member of a partnership, corporation, or association may cast a vote.

If any wheat farmer who lives in this county and has farms in other counties and the seeded acres of wheat times the normal yield is 200 bushels or more, he may call at the county office and secure a ballot which he may mark, sign and mail to the county office of the county in which his farm is located. The ballots which are mailed to other county offices will have to reach the county offices before 8:30 a. m. on the first week day morning following the election.

No individual, partnership, corporation, association or other legal entity shall be entitled to more than one vote in the referendum, even though he may be engaged in the production of wheat on two or more farms in two or more communities, counties or states.

The polls will open at 8:00 a. m. and close at 7:00 p. m., and farmers in the county will vote at the places indicated below:

Box No. 1 will be located in the County Court Room at Floydada, with Cland Fawver, as chairman, W. H. Nelson, as vice chairman, and H. L. Hartsell, as member, of the referendum committee. Farmers residing in the following communities will vote in the county court room: Dougherty, Antelope, Baker, Pleasant Hill, Lakeview, Starkey, McCoy, Allmon, Harmony, Sandhill, Floydada, Blanco, and Campbell.

Husky's Here For Pioneer Celebration

Mr. and Mrs. M. F. Husky, of Kennedy, Texas, arrived Tuesday about noon, to be on hand for the Pioneer Celebration Wednesday. Mr. and Mrs. Husky are former residents of Floydada and have many friends here. Mr. Husky had the misfortune of being injured about six weeks ago when a horse kicked him on the leg and has been laid up with it since that time. His leg is in a cast and is improving slowly.

R. V. Husky, son of Mr. and Mrs. Husky and also well known to many old timers here, is serving in the army and is stationed at Fort Monmouth, N. Y. He was employed for several years at the postoffice in Kennedy, Texas.

Mr. and Mrs. Husky will be here a few days after the celebration is over visiting with friends and relatives.

ANNOUNCES NEW ARRIVAL
Mr. and Mrs. David Flowers, of Amarillo, are the parents of a son, born Friday, May 23. The child has been named Everett Ross Flowers. Mrs. Flowers is the former Miss Mary Ann Ross, daughter of Mr. and Mrs. S. W. Ross, Floydada.

C. B. Chandler of Harmon Funeral Home attended the Undertakers Convention in San Antonio, Texas last Thursday and Friday.

Henry W. Schacht will be chairman of the referendum committee for the Lockney community, with Guy D. Allen, vice chairman, Buck Sams, member, and voting will be done in the Beacon Office. The following communities will vote at the Beacon Office: Erick, Pleasant Valley, Muncy, Aiken, Lockney, Ramsey, Roseland, Sterley, Lone Star, Providence, Prairie Chapel.

Voting box No. 3 for wheat marketing quota referendum will be located at the Cedar School. T. S. Brown will be chairman of the committee. A. A. Tabbs, vice chairman, and Bryant Higginbotham, member. The following communities will vote at Cedar: Cedar, South Plains, Center, Fairview, Hillcrest, Liberty, Edgin and Fairmount.

ALCYE H. HOOTS,
Secretary, Floyd County ACA.

Texas Cowboy Reunion at Stamford

Stamford, May 28.—Cowgirl sponsors, representing the various towns and cities, will have a place on the official program of rodeo events at the Texas Cowboy Reunion July 3, 4 and 5. All judging in the sponsors' contest this year will take place in the arena at regular performances, thus giving greater prominence to the towns which they represent.

Four prizes will be awarded, first prize being a handsome saddle, second, a pair of hand made boots, third, riding bits, and fourth, a pair of spurs. Judging will be based 60 per cent on the girl, her personality counting 15 per cent, riding togs and equipment 15 per cent and riding ability 30 per cent. The remaining 40 per cent is on her horse, which is scored 10 per cent on conformation and appearance, 10 per cent on equipment and 20 per cent on performance.

Besides their part in the rodeo program, the girls will ride in the big parade on July 3 and in the grand entry for each rodeo performance. The sponsors will be entertained with the annual sponsors' ball on the night of July 3, two open dances on July 4 and 5 and chuck wagon dinner on July 5.

Appointments of sponsors are made by the chambers of commerce of the towns which they represent, or by the mayor, or the postmaster of such town. Appointments will not be accepted after July 1. Sponsors must be over 16 years of age. Former first prize winners are not allowed to compete for prizes.

Mrs. Lee Walker, wife of the Stamford football coach, has been appointed by the directors of the Texas Cowboy Reunion as hostess to the sponsors for 1941. Miss Betty Jane Blackwell, daughter of Dr. and Mrs. A. Blackwell, has been appointed by the local chamber of commerce as Stamford sponsor. She will not compete for prizes but will assist Mrs. Walker in entertaining the visiting sponsors.

Fresh cabbage ranks high in the fruits and vegetables containing Vitamin C. This vitamin helps prevent tooth decay, bone softening, and muscle weakening.

Registration of Pioneers Started At 9 O'Clock

Registration of pioneers started at 9 o'clock, in charge of committee-
men.

The parade started promptly at 10 o'clock.

A. T. Swepston, president of the association presided at the opening following the parade. Major Luke G. Mathews of the 11th Q. M. Regiment stationed at Camp Bowie made the main address.

Dinner for the old-timers was prepared and spread on the court house square and served by home demonstration club women of the county, and wild flowers gathered from the pastures were used as decorations for the tables.

The program also included speeches by former presidents and other pioneer residents and former residents of the county. The usual memorial services were held preceding the election of officers.

The day's activities was closed with an old-fashioned square dance.

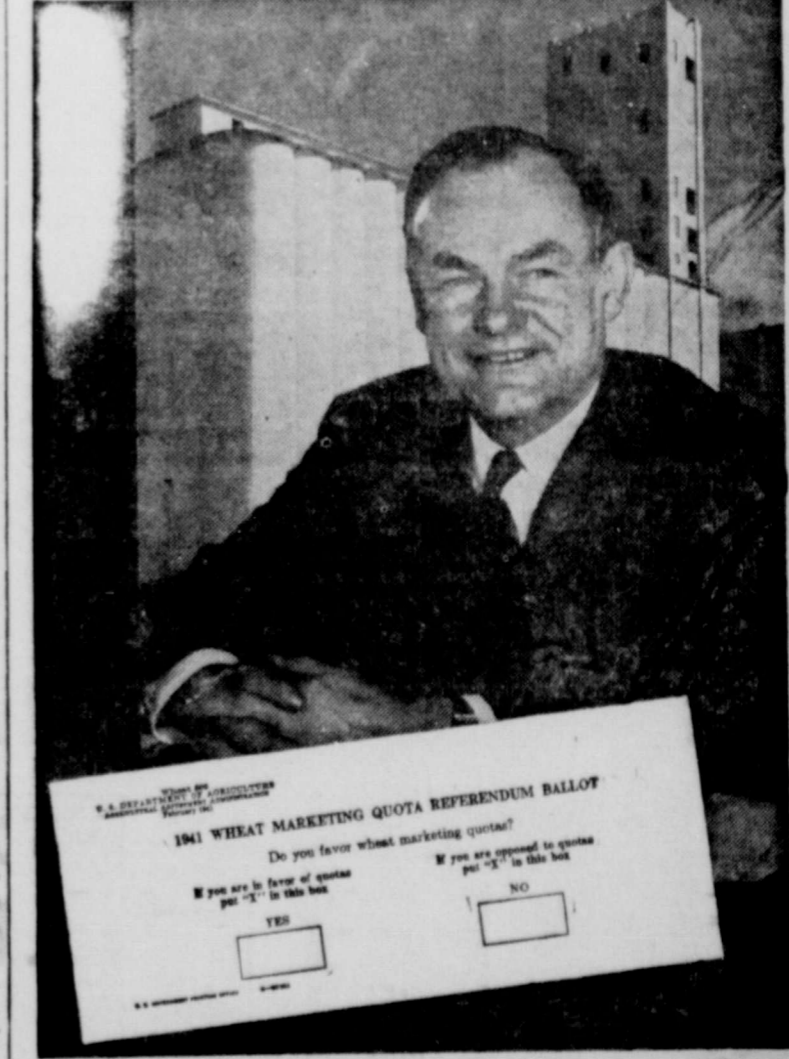

Texas Farm Real Estate Values are Stationary

Farm real estate values on the average in Texas have not advanced in the past 12 months, in spite of a contrary belief in some places.

According to Tyrus R. Timm, extension economist in farm management, the index, which is based upon the period, 1912-14, has lost a point as compared with this time one year ago. The index now is 98, or two points below this base period. In selected areas, however, there has been some bidding up of land values. For the past 10 years the index has averaged 94, ranging from a low of 83 in 1933 to 99 in 1938 and 1940. Farm real estate values in Texas generally have remained almost the same during the past four years, making the biggest advance from 1933 to 1939.

For the nation as a whole a slight rise is reported. The index of the average value per acre of farm real estate as present is 86, as compared with 85 a year earlier. The largest gains in values since the low point in 1933 have been made in the east south Central, south Atlantic and north Central states.

Wickard Calls Farm Vote May 31

Declaring safe management of the country's large wheat supplies an important defense measure, Secretary of Agriculture Claude R. Wickard (above) has proclaimed a marketing quota for wheat and has announced May 31 as the date of a referendum at which wheat farmers will mark ballots such as the one shown to determine whether quotas shall continue in effect on the big 1941 crop. Marketing quotas are provided by the AAA farm program, and enable farmers to safely store their surplus for use as needed, Wickard said. According to current estimates, U. S. farmers will have enough wheat on hand after harvest this year to supply the nation's expected needs for nearly two years.

SPECIAL PROGRAM TO FARM- ERS WILL BE GIVEN FRIDAY NIGHT

On Friday, May 30, from 9:15 to 9:30 p. m. radio station KGKO, Fort Worth, will carry a program by E. M. Evans, National AAA Administrator, and his talk will be supplemented by a talk by B. E. Ingle, State AAA Committeeman, from Grandview.

We believe that this program will be of benefit and interest to all wheat farmers of the county.

ALCYE A. HOOTS,
Secretary, Floyd County ACA.

Pressure Cookers Are New Defense Tools

Whether farm women realize it or not, their pressure cookers are important tools for national defense.

Texas farm women this spring can put their pressure cookers to work in an "all-out" drive for better health. In addition, other pressure cookers are owned by schools, counties, community canning plants, and welfare agencies, says Grace I. Neely, specialist in food preservation for the A. and M. College Extension Service.

Usually pressure cookers cost from \$9 to \$15, but many farm women say they pay for themselves several times because they save fuel, spoilage, and time.

Families with large food budgets need not only efficient canning equipment but steadily producing gardens if they are to keep their pressure cookers at work full time. In some Texas counties, the specialist says, home demonstration club women are raising a surplus of foods which will be canned for school lunch projects.

Poultry, beef, pork, and fish, as well as fruits and vegetables, can be canned safely in a pressure cooker. If homemakers follow directions, they can have a safe food supply with a minimum amount of spoilage, for the temperature under steam pressure canning is higher than in open kettle baths, and it kills bacteria.

What most families like best about pressure cookers is that they add jars of peas, beans, carrots, corn and other things to their storage shelves—the kind of non-acid vegetables they couldn't safely can before, and the kind that changes tiresome and deficient diets to balanced diets.

Texas 1941 Tomato Crop Is Reported As Being Late

Texans will eat their home grown tomatoes later than usual this year. J. F. Rosborough extension horticulturist, reports that rain in the Rio Grande Valley has delayed harvesting and disease has caused some

damage to plants. Rio Grande tomatoes usually are on the market the first week in May, but it was mid-May before shipping began this year.

Tomatoes in the Yoakum area will also be delayed because of excess moisture this year, Rosborough says, and it is expected the crop will be ready for market after the latter part of May.

Plantings in southeast Texas are rather light, but excessive rainfall has held back growth and shipments

are not expected to begin until June. The Jacksonville area also had heavy rains and the peak of the tomato movement is not likely to be reached before mid-June. In the northeast section near Avery and Bogata a large acreage was planted and if favorable weather continues the quality should be excellent.

Jacksonville and northeast Texas growers have found a ready market in canneries in recent years, producers selling their ripe and pink tomatoes for canning and shipping the remainder to ripen en route to market. The total acreage of tomatoes in Texas has increased regularly during the past three years and, although this year's planting equals that of last year, the crop is likely to be smaller on account of unfavorable growing conditions.

The 10-year average acreage for the state is 37,000 but in 1939, 52,000 acres were planted. Rosborough suggests that growers put in additional late acreage to sell to regional canners where available. However, those undertaking late plantings should not stake the tomato plants as is commonly done in the east Texas section. Where plants are tied upright the fruit is likely to suffer sun blistering, the suckers should be allowed to grow on the plants to provide shade for the tomatoes which will be harvested during July.

Pasture Mowing Is Recommended As Practical

College Station.—There is no point in letting old grasses and weeds continue to take fertility and moisture out of the soil, says R. R. Lancaster, extension pasture specialist for Texas A. and M. College. Therefore, mow pastures discriminately. Mowing, he adds, has another practical benefit. When there is too much grass for a few months, part of it may be mowed for hay and fed profitably when pastures are short.

Tall, coarse grass in humid regions is a bad kind of weed, but a good turf of thrifty, well grazed pasture supporting a few broom weeds and dove weeds may not need too much mowing. When tall and coarse grass dies it won't let even its own kind grow. Suppose it is not cut or grazed, what kind of turf would there be under tons of rotted hay, the specialist asks.

"Mowing land that produces only needle grass and 'Poor Joe' is not worth the expense." If Bermuda, carpet and kindred grasses get too far ahead of stock cut them so new growth can start. Otherwise these grasses get tough and do stock no good when grazed.

Lancaster says that many pastures which need mowing cannot be cut because of worthless brush and trees. He cautions that these should not be confused with occasional groups of trees that form beauty spots or maturing timber, or protected patches of brush which provide feed and protection to song birds and game. The specialist explains that such growth may have greater value than grasslands, and suggests that few such places in pastures are worth saving and even fencing. He does not favor cutting grass along fences and in ditches because it, too, furnishes protection and feed for wildlife.

There is no set rule for the number of cuttings in pastures, but where three are planned the first should be made in late May or early June, and for two mowings June would be the most suitable for the first.

Dairy Cows Should be Kept Contented

College Station, May 28.—In order for a dairy cow to produce most efficiently, she should have the capacity to yield a large quantity of milk and at the same time have the raw materials from which to create it. Another requirement which is almost as important, says G. G. Gibson, assistant extension dairyman for A. and M. College, is that the conditions for doing the work must be favorable, namely, she should be kept a contented cow. Anything contributing to the comfort and well-being of a cow usually is classed as management.

"Each oversight in management takes its share of profit and amissions in management seldom result in decrease in costs of production," Gibson says. "A shade over a water trough, for example, costs little and not having one in hot weather results in less milk. Keeping breeding dates costs nothing, yet the lack of a proper rest period could decrease the total production for the succeeding lactation by 25 to 50 percent."

A safety bulpen might cost a dairymen \$100, but it will prolong the useful life of the bull and might save the dairymen's life. Other details of dairy herd management are location of pastures near the milking barn, convenient water supply, and shade or shelter for the herd according to conditions of the weather.

"Above all, handle the herd so that the cows will not become wild or nervous. Gentle treatment makes a gentle herd and helps make a profitable herd," the specialist counsels.

About 50 percent of all United States farm people live in 13 Southern States, but they receive only 30 percent of the national farm income.

Since 1932, the 10 principal cotton states east of New Mexico have reduced cotton acreage from more than 40,000,000 to less than 24,000,000.

During the last half of the U. S. Department of Agriculture bought about \$10,000,000 worth surplus food products, including fresh oranges and grapefruit, grapefruit and grapefruit juice.

No-Smoking for Women

Undertaken by the rising tide of opinion among the part of high school girls, the University today announced a no-smoking rule for the women students.

Beginning next fall, no girls graduates who are admitted to the university will be permitted to smoke. Any young lady who is caught smoking will be sent home.

The rule, he said, will strengthen the university's no-smoking tradition. It was started by student vote in 1935. The tradition was founded by the students at old Independent University in 1845. Forty-one students in Baylor since 1845 have observed the rule of no smoking on the campus.

Mr. Neff, a former Texas State legislator, said the students in their service of the year that the university does not consider smoking young women and young men who are admitted to the university.

Being interviewed by Mrs. Sadie T. Crawley, a member of the faculty, she asked to point no smoking pledge. She outlined the policy of the university and said that she is being sent to parents for their signatures. Drinking rules have been part of the discipline regulated by Baylor throughout the school's history.

Since coming to Baylor five years ago, Neff has told the students that each school year, the university will come on the Baylor campus and alcohol on or in his

Notice to Bidders

Sealed bids will be received by the Commissioners Court of Floyd County, Texas, on the 9th day of June, 1941, at 10 o'clock a. m., at the Court House in Floydada, Texas, for the following machinery:

Three Tandem Drive Grad Graders with Diesel Engine, with approximately 12 foot blade; pneumatic tires, regular tubes front and low pressure (single) pneumatic tires, puncture-proof tubes, rear muffler, jack, leaning front axle, and dual brakes, and accessories.

Said County offers in trade as a part of the consideration to be paid for the above described machinery the following:

One Austin Western 99 Diesel Motor Grader, Serial Number Ds1120.
One Austin Western 99 Diesel Motor Grader, Serial Number Ds1120.
One Caterpillar Model No. 11, Diesel Motor Grader Serial Number 6K4618P.

The Commissioners Court reserves the right to reject any and all bids. If purchase is made pursuant to said bids, Floyd County will issue time warrants for the payment of all or a part of such purchase price, such time warrants to be issued in the maximum amount of \$15,000.00, bearing interest at the rate of six (6%) per cent per annum and maturing serially, the maximum maturity of final maturity being not later than ten (10) years from the date of said warrants.

Executed this 12th day of May, 1941.
G. C. TUBBS,
County Judge, Floyd County, Texas.

U. S. Army Recruiting Station Lubbock, Texas

Since the lowering of the requirements for enlistment in the Regular Army Air Corps, states Major Jesse, U. S. Army Recruiting Officer for this district, there have been many young men with only an 8th grade education who have succeeded in passing the war department test and thus were acceptable for this branch of the service.

Most of these young men chose for their assignment the 14th Pursuit Group, March Field, California, although there are also vacancies at the Air Base Detachment, Fort Sill, Oklahoma and for the Photo Group Lowry Field, Colorado. Applicants for the Photo Group must desire Photographic training.

The majority of the young men who enlisted this month have decided to take the Airplane Mechanics Course offered by the Air Corps Technical Schools and open to any enlisted man in the Air Corps. These young men are wise for they quickly realized the value that such training will be to them in later years in Air Transportation.

Applications for enlistment in the Regular Army Air Corps can be made at the nearest Army Recruiting Station where young men without a high school diploma will be given an opportunity to take the War Department Test.

Ventilate Poultry Houses In Summer

Owners of poultry should plan now for the comfort of their laying hens during the hot months just ahead.

George P. McCarthy, Extension Service poultry husbandman, says the main source of comfort is ventilation of hen houses, especially near the floor which will allow a steady flow of air at a level where it will do the most good. Hens, like humans, get hot in summer. They do their best to show it by perching near the front of the poultry house with wings extended, or congregate in the shade if trees away from their feed, water and nests. Absence of proper ventilation often is responsible for summer colds that are hard to control. As a result, hens drop off in feed consumption and egg production.

Another element of the ventilation problem is nests. McCarthy says it has been found that where nests are built at least four inches from the walls of the poultry house and the back part is of wire or slats, it is considerably more comfortable for laying hens. Some poultrymen are removing partitions in nests and leaving long, trough-like nests. The reason is that several hens cannot crowd into a small section but will distribute themselves. In that way they will be more comfortable and there will be less egg breakage.

Watch for Stamped Eggs During Summer

Activities this spring indicate increased interest in egg marketing associations through which home demonstration club women and 4-H Club girls may sell high quality guaranteed infertile eggs. Already these groups are difficult to obtain good eggs.

Myrtle Murray, specialist in home industries for the A. and M. College Extension Service, points out that egg marketing associations are beginning to identify their products with the use of 4-H Cartons. This method of packaging assures the consumer that he is getting fresh, home-produced eggs.

Consumers will know their eggs came from marketing associations either by the cartons in which they are packed or by the stamp on the eggs which bear the name of the association as well as the name of the producer.

A New York engineer, speaking of air raid shelters, says a seven foot thickness of cotton would resist the penetration of a 6,000-pound bomb falling from 30,000 feet. A 2,000-pound bomb falling 15,000 feet would penetrate six feet of reinforced concrete.

SINCE 1883

Ballard's Snow Liniment has been an inexpensive aid in relieving the discomforts of Muscular Congestion that accompanies Sprains, Strains, Bruises, and Muscular Soreness from over-exertion or undue exposure. In 30c and 60c bottles.

WHITE DRUG COMPANY

Toting a 600-pound Bomb

SELFLEDGE FIELD, Mich.—A familiar piece of motorized equipment around U. S. Army Air Corps bases these days is this service truck, shown being operated near a big dummy bomb at Selfledge Field. Manufactured by the Ford Motor Company, the truck is rigged with special derrick and windlass to handle bombs weighing 600 to 1,200 pounds. The bomb in the photo is a dummy 600-pounder used for training purposes.

Increased Production of Tomatoes Is Suggested

College Station, May 28.—Farmers in Texas, along with those in the rest of the nation, are expected to cooperate fully in the United States Department of Agriculture's appeal for increased production of tomatoes for canning for shipment abroad under the Lend-Lease Act.

Producers participating in the program will not incur any deductions from their AAA payments because of increases in acreages of tomatoes for canning, according to B. F. Vance, state administrative officer in charge of the AAA in Texas.

The 50 percent increase in production of tomatoes for canning should bring growers an increase of from \$2.75 to \$3 per ton over 1940 contract prices, USDA figures predict.

This is the most favorable occasion in a number of years for new tomato growers to enter the field and for old growers to increase their production, Vance pointed out, adding that county agents and county AAA committeemen will assist growers in locating and contracting canners, as well as in making adjustments and payments.

The increased production will be used for export to warring democracies under the Lend-Lease Act and also for distribution by the American Red Cross and for distribution under the school lunch, relief and other programs.

Pioneer Round-up At Plainview Draws 15,000

Plainview pioneers were honored in Plainview last Saturday when an estimated 15,000 persons gathered for the annual Pioneer Roundup celebration. A week's rain that left country roads impassable in many places, cut down the attendance. The fete yearly is a red letter day for scores who helped carve an empire out of the plains frontier.

A golden wedding circle, composed of couples married fifty years or longer, was honored with a special place in the mile-long parade. Their aggregate of married life, most of it lived on the plains, was 588 years.

Tulia, Floydada, Hale Center, Olton, Petersburg and Lockney were among towns sending parade entries, many of them horseback riders dressed as cowboys and cowgirls. Some riders came here from ranches on horseback, the surest means of transportation with roads in bad condition.

Mr. and Mrs. Richard Tubbs of Lubbock, spent the week end with their parents, Mr. and Mrs. E. W. Turner and Judge and Mrs. G. C. Tubbs. Mr. and Mrs. Wilmer Jones, Jr., carried them to Lubbock Sunday night.

Mrs. Maude Merrick and Miss Daltis Rhea visited in Petersburg Sunday with Miss Hattie Thorp.

See Us At New Location!

Now located on East Side of Square. Several good used cars and Pick-ups.

INTERNATIONAL TRUCKS AND PARTS AGENCY

SPEARS & DANIELS
