PAGE No. 12

Agricultural Conservation Is Stressed at Meet

Agriculture's part in the national defense program was the dominant thought at the national AAA conference held in Washington recently. Texas delegates to the meeting pointed out on their return according to Paul Snodgrass, chairman of the Floyd County AAA Committee.

In developing recommendations for the 1942 National Farm Program the delegates considered carefully the important part of the farm program must play in the defense program by encouraging conservation of the soil, giving greater assistance to the small farmer, and encouraging production of ample supplies of the foods needed both in this country and in other countries, the state AAA officer has reported to the local committee.

The committee chairman declared that the conference gave a practical demonstration of the unity of agriculture in its determination to do its full share in the defense of the nation.

The conference, which was attended by farmer state committeemen and AAA officials from every state in the nation, adopted a number of resolutions relating to defense, including a recommendation that farmers avoid speculative expansion and reduce debts, and build up reserves of cash and farm commodities during the present period of industrial activity. As measures to prevent inflation, the conference urged higher taxes on excess profits, incomes, and luxury items and more intense efforts to sell defense bonds and stamps. It also urged that, due to shortage of farm labor in some areas, priority be given to production of farm machinery and parts, and that a balance be maintained between farm and industrial prices.

The national conference proposed a change in the method of computing farm payments, which would eliminate the payment made on general crops such as oats, barley, and rye, and would make funds formerly used for this purpose available for carrying out additional soil conservation work. Farmers would still receive acreage allotments on such surplus crops as wheat, cotton, and tobacco and earn payments for planting within their allotments of these crops, the AAA committeeman was informed.

Strengthening of the Ever-Normal Granary and marketing quota provisions of the national farm program also were recommended, and new soil-building practices were proposed, including a special practice by which low-income families may receive seeds, plants, and fertilizers for use in increasing home food production. The cost of the materials would be deducted from the payments earned by such families. Under the practice low-income families also could earn additional payments for live-at-home practices.

The recommendations of the national conference were taken from suggestions made by farmers from all over the country through their community and county committees. All recommendations are subject to the approval of the Secretary of Agriculture.

A. A. HOOTS,
Secretary Floyd County ACA.

Son of Harry Adams Married In Lubbock

Dr. Milton C. Adams of Big Spring, a son of Mr. and Mrs. Harry Adams of Lubbock, formerly of Lockney, was married Sunday morning June 15 to Miss Virginia Lee Barr, daughter of Dr. and Mrs. I. E. Barr, of Lubbock.

The wedding was held at the home of the bride's parents with only family members and a few friends and relatives present.

Dr. Adams is engaged in optometry at Big Spring where the couple will make their home.—The Lockney Beacon.

Rattlesnakes were painted on the drums of continental Marines when they paraded through the streets of Philadelphia in 1775 to "drum up" recruits for the Revolution, according to Benjamin Franklin.

This house is traditional in its conception. On a larger scale it would resemble a New England farmhouse, but here it is well adapted to a suburban setting. Although serving as a one-story house here, this dwelling has an unfinished second floor which may be developed as the needs and means of the family grow. A two-car attached garage gives the house added storage space and the appearance of added size. Located in the Midwest, this property is valued at \$7,500 and was financed with a Federal Housing Administration insured mortgage of \$6,200. Average monthly payments on a 20-year mortgage of this amount, exclusive of taxes and hazard insurance, total about \$39. The cost of a similar property will vary in other localities.

Fruit In Daily Meals Is Suggested As Easy Matter

It is easier to have variety and interest in fruits for breakfast than in breads, or in bacon and eggs, according to Jennie Camp, extension specialist in home production planning.

Speaking on the fruit day program at the Nacogdoches Experiment Station recently she showed that it is as easy for a housewife to use fruits at each meal as it is to use bacon and eggs, meat and bread, or milk and mush, provided she makes them as much a part of meal planning as she does those staple items.

"Let's build a breakfast around hot biscuits, scrambled eggs, or bacon and eggs, proposes Miss Camp. "With them we might serve dried figs or peaches in yellow corn mush with cream and sugar." As alternates she suggests raisins with oatmeal, or tomato juice, or fresh tomatoes, or cantaloupe, or red plums with dew still clinging, or fresh peaches, or cherries, or berries stepped in sugar.

However, Miss Camp does not let fruit on the menu stop at breakfast. Starting with beef roast for dinner, she suggests hot spiced figs side by side with buttered onions, potatoes baked in the roast gravy, glazed carrots, yellow cornmeal muffins and milk, with an appetizing desert of peaches and cream. With pork she recommends pickled peaches as an accompaniment and cantaloupe for dessert. A tart mixture of fruit juices is a good appetizer for leg o' lamb, and canned pears with plain cookies makes a good dessert. Grape juice is a good starter for a fish dinner and baked berry presents is a good stopper. Baked or baked beans as their main dish calls for hot apple dumplings with cinnamon sauce.

Hot applesauce with cinnamon and sugar makes a tasty end to a substantial supper, and mixed fruit salad to a light one.

Miss Camp defines the fruit at every meal program "Fruits for defense." Besides minerals, vitamins and other food substances, fruits give color, variety, zest, flavor and attractiveness, Miss Camp declares. "They are good before, after and at every meal 365 days in the year in any or elaborate state, alone or in combination, cold, hot or medium.

U. S. arines have landed in China at least twenty times for the purpose of preserving order or to protect American lives and property. Their first landing in that country was in 1844.

Hale County Well Is Tested After Plugging Back

Humble Oil and Refining Company, Stanolind Oil and Gas Company and Standard Oil Company of Texas No. 1 A. F. Byrd, section 17, in Southwestern Hale County which had been contracted to 9,000 feet but encountered granite at 6,769 feet, Thursday had been plugged back to 5,250 feet, where operators were testing for water shut-off. Formation tops in the wildcat were called as follows: anhydrite, 1,115 feet; salt, 1,180 feet; base of salt, 1,370 feet; Yates sand, 1,400 feet; San Anders lime, 2,230 to 2,250 feet, and San Angelo, 3,470 feet.

Geo. M. Finkner Buys Business Building

Announcement was made this by Geo. M. Finkner that he had purchased the garage building on West California street, formerly owned by the R. A. Childers Estate, and occupied the past few years by Bill Sharp's Garage.

Mr. Finkner states that he will repair the building and move his automobile business to the new location as soon as it is vacated. The deal was made through John H. Reagan, local real estate dealer.

Recent Rains total 3.65 REA Measure Indicates

Saturday afternoon Floydada received 1.78 inches of rain and scattered hail fell with the rain. No hail damage was reported in Floydada, but some farmers reported considerable damage.

Monday afternoon Floydada received 1.85 and reports indicate that the rain was heavier in parts of the county. A strong wind accompanied the rains and much damage was reported to have been done to both wheat and row crops.

Mrs. C. M. Thacker and Miss Louise Hyatt attended the funeral of an infant child born to Mr. and Mrs. Pat Sullivan, at Big Spring, Tuesday. Mr. Sullivan is a brother of Mrs. Thacker.

Former Floydada Man Dies of Heart Ailment

Funeral services for James Byers Golightly, age 33 years, were conducted Friday at Plainview by Rev. G. W. Tubbs, of Floydada, assisted by Rev. J. D. Farrell. Services were held at the Roy Wood Funeral Chapel at 2:30 o'clock.

Mr. Golightly died June 26, 1941. He had been employed with a bakery in Plainview for about ten years, when he became suddenly ill and died Thursday morning following a few hours illness. Death was due to heart disease.

Mr. Golightly is the son of Mr. and Mrs. O. R. Golightly of the Center community. He is survived by his parents, his wife, and a step daughter, Helen Montague; four brothers, Lee C., W. E., and Edwin Golightly, all of Lubbock, and L. D. Golightly, Floydada; one sister, Miss Viola Golightly, of Plainview.

Mr. Golightly was a member of the First Baptist Church. He was converted at the age of 13 and had lived a consistent Christian life.

Interment was made in Plainview cemetery.

Summer Care of Plants Necessary For Development

What some people call "good luck" in growing trees, shrubs, and flowers is instead good management, in the opinion of Sadie Hatfield, specialist in landscape gardening for the A. and M. College Extension Service.

During the dry, warm summer months, a period when plants especially need intelligent care, they often suffer from more mismanagement of moisture than from any other one thing, she says. Shrubs and trees set out this year or last need an ample supply of moisture until they can establish a good root system. Even the native and hardy introduced plants require about two years in getting well enough established to withstand dry weather unaided.

Miss Hatfield quotes R. E. Dickson, superintendent of the Spur Experiment Station, as saying: "An intelligent use of God-given rain will mean more to the beautification of Texas than all other factors combined." In places where there is scant rainfall, Miss Hatfield recommends depressions, contours, and small dams for diverting water to trees, shrubs, and flowers. These same devices will help hold the water for a few days after each rain.

Once moisture has soaked into the soil, mulches may be used to keep it there. Well-rotted leaves, rotted straw and hay, and rotted barnyard fertilizer may be put on in layers of one or two inches. All of these materials when worked into the beds next year will help hold water in the soil as well as when used on top as a mulch.

The specialist warns against deep cultivation as it may destroy roots. However, shallow cultivation is good for keeping a loose top on the soil prevents evaporation from below.

Farmers May Get Market Reports Daily by Radio

Texans who are interested in general market news and broadcasts of market reports devoted to specific commodities can tune in on 27 Texas stations, according to a 1941 directory of market news broadcasts compiled by the Agricultural Marketing Service.

The object of these market news services is to bring about a better distribution of farm products and to place farmers and dealers on equal bargaining basis. Radio takes market news to the farmers quickly, so they can use it in their day-to-day marketing operations, explains T. R. Timm, economist in farm management of the A. and M. College Extension Service.

To protect American lives and property the U. S. Marines have landed on foreign soil at least 200 times, according to official records.

Tire Prices to Freeze at June 16th Level

Washington, June 26.—Leon Henderson, price administrator, announced Thursday that both wholesale and retail prices of automobile tires and tubes would be frozen at the levels prevailing June 16.

Henderson said conferences with the tire industry would be held within the next few days to smooth out certain details of the proposed schedule, which is expected to be ordered next week.

An advance announcement of the pending move was decided upon, Henderson said, to advise the trade as to what to expect and to avert any price changes before the schedule is issued.

Sweeping Government action to fix mandatory price levels, meanwhile, appeared imminent as a result of two refusals in industry to curb price increases.

The two refusals, as announced by Henderson, were from Chrysler Corporation and a segment of the furniture manufacturing industry.

New authority to fix prices by mandate would have to come from Congress.

Aides of Henderson said that thus far no legislation had been prepared, but that considerable material had been collected for a report to President Roosevelt and Congress. This, they asserted, might be used in drafting a measure.

Present methods available to enforce price ceilings, these aids asserted, were regarded as "cumbersome and harsh." A simpler and more direct method was deemed advisable, they added, in view of failure of certain important industries to cooperate.

Daniel Leads in Race for U. S. Senator

State newspaper reported Wednesday morning W. Lee Daniel was leading Lyndon Johnson, nearest opponent, in the race for U. S. Senator. Attorney Gerald Mann was listed as the race and United States Representative Martin Dies, fourth, gave the following unrounded figures: Daniel, 175,368; Johnson, 174,273; Mann, 130,787; Dies, 120,601.

General Gerald Mann, Rep. Martin Dies, 80,601.

Wheat Parity Checks Received

1941 wheat parity checks received in the county office by June 27, 405 work sheets and 563 checks received in parity payments.

Parity payments will be received by the county office regularly as wheat parity applications are cleared, stated A. A. Secretary Floyd County ACA.

Living Room Is Moved to New Location

Living Room moved Tuesday to new location in the Arthur Abstract building on the corner of the square. The building in the rear of the lot and has recently been repaired by Mrs. Maud [Name obscured].

Living Room will give more room work and will be large addition of more make the project should enroll ladies in this work.

Glenn L. Martin
Killed Instantly
By Truck

Run over by a truck driven by his
father, 10 year old Glenn L. Martin,
was killed almost instantly Monday
afternoon. He was the son of Mr.
and Mrs. C. A. Martin who live 18
miles north of Matador.

The father, widely known Motley
county rancher, said he told
the child to move some oil cans near
where he was servicing a combine on
the Martin ranch.

Evidently the boy jumped onto
the truck, lost his hold and fell un-
der the rear wheel. His body was
badly crushed.

The accident was discovered when
Mr. Martin called to the son and
failed to receive an answer. The
truck was backed only a few yards,
Mr. Martin said.

When he discovered the accident
the father gathered the lifeless body
in his arms and rushed to the farm
house near the scene. The body later
was brought to F. C. Harmon Under-
taking establishment where C. E.
Chandler prepared it for burial.

Burial was made at Matador with
the undertaker at Matador in charge.
Besides the parents, survivors are
four brothers, Louise and J. C. Mar-
tin, of Lubbock; Norman and Quinn
Martin, of Flomont, and two sisters,
Mrs. Clem Woods of Quitaque and
Katherine Martin of Matador.

Dorothy Dell
Stovall Wed to
Hart C. Shoemaker

The marriage of Miss Dorothy Dell
Stovall, daughter of Mrs. E. F. Sto-
vall of Floydada, and Hart Creighton
Shoemaker of Abilene, took place at
9:30 o'clock Sunday morning at the
home of the bride's brother, Richard
F. Stovall. Rev. E. A. Benfer of the
Presbyterian church officiated.

Baskets of garden flowers framed
an altar before which the couple
exchanged vows. Tapers in pedes-
tal candelabra lighted the setting.

Mrs. J. V. Daniels, played the
wedding marches, accompanied by
Miss Bobbie Read of Lubbock as she

Senator Houston
Taken by Death at
Johns Hopkins
Hospital

Press dispatches from Washington
last Friday morning announced the
end of Texas newest senator. Daily
newspapers carried the following
story:

Washington, June 26. — Senator
Andrew Jackson Houston of Texas,
87-year-old son of the famous Sam
Houston, died today at Johns Hop-
kins Hospital in Baltimore after an
operation for a stomach ailment, his
secretary, D. R. Potter, announced
today.

Potter said physicians had called
him from Johns Hopkins Hospital
saying that Houston had died at ap-
proximately 8 p. m. With the sena-
tor at the time of his death were his
two daughters, Ariadne and Margu-
rieta.

Oldest man ever to enter the Unit-
ed States Senate, Houston was ap-
pointed recently by Gov. W. Lee
O'Daniel of Texas to succeed the
late Sen. Morris Sheppard, who died
April 9.

FATHER SERVED IN SENATE
Houston was to serve only until
the winner of a special election in
Texas Saturday could qualify and
take the office.

Houston was taken to Baltimore
last Friday by Potter for a physical
checkup. It was then learned that
the stomach operation was necessary.

The secretary said he talked with
the senator this morning shortly be-
fore the operation and that the oc-
togenarian appeared in good spirits.
Houston was born nine years be-
fore the death of his father then
70 years old, who was a member of
the Senate almost a century ago.

He arrived in the capital on May
30 and took his seat in the Senate
on June 2.

He was accompanied on his trip
to Washington by his daughters and
a physician.

Houston had been little known in
his native Texas in recent years, but
in the latter part of the last century
was prominent there.

Born in Independence, Texas, June
21, 1854, Houston was educated at
Baylor College and was a graduate
of West Point Military Academy.
He studied law and was admitted to
the bar in 1876 and was clerk of the
United States District Court at Dal-
las from 1879 to 1189. He was ap-
pointed United States marshal by
President Theodore Roosevelt and
served from 1902 to 1910. He was
candidate of the Prohibition party
for governor of Texas in 1910 and
1912.

OFFERED ONE BILL
One of the organizers of the Tra-
vis Rifles at Austin during the re-
construction period in 1874, he also
formed a troop of cavalry for Roose-
velt's Rough Riders during the
Spanish-American War.

The famous Texas pioneer and first
President of the Lone Star Republic,
Gen. Sam Houston, first came to
Congress as a representative from
Tennessee in 1823 and was later one
of the first senators to represent
Texas in the United States Senate.
Houston appeared on the Senate
floor only three or four times and
attended only one committee session,
a closed meeting of the post-office
and post roads committee.

He introduced one bill—authoriz-
ing an appropriation of \$250,000 to
complete a southwestern historical
museum at the base of San Jacinto
monument on the battle ground
where his father led the Texas forces
to victory over General Santa Ana
on April 21, 1836.

It was on the anniversary of that
battle that Houston was appointed to
the Senate.

O'DANIEL EXPRESSES REGRET
AND Sorrow AT HOUSTON'S
DEATH
From Temple, Texas, June 26 Gov.
W. Lee O'Daniel expressed "profound
regret and deep sorrow" at the death
of interim U. S. Senator Andrew
Jackson Houston, whom he appoint-
ed.

UNIVERSITY OF TEXAS IS PORT
OF ENTRY FOR LATIN
AMERICA
Austin, July 2.—The University of
Texas continues to be this nation's
educational "port of entry" for the
countries to the South.

Just concluded at the State school
has been a two-day job of hosting
one of the largest good-will delega-
tions ever sent north from Mexico.
A 30-member delegation of Mexican
Ministry of Education, were campus
guests of the University's School of
Education and Latin American In-
stitute.

The group is enroute to an inter-
national conference at the University
of Michigan early this month. Its
visit in Austin was the first educa-
tional stopping point on the month-
long, good-will tour.

A. J. Jackson
Returns to
Floydada

Mr. and Mrs. A. J. Jackson and
family, who have been making their
home the past month in San Angelo,
Texas, have returned to Floydada to
make their home. Mr. Jackson had
been transferred to San Angelo
where he had charge of a Locker
System.

W. A. Shaw, local trucker, moved
Mr. Jackson's household goods from
San Angelo Monday. While enroute
Mr. Shaw run into an electric storm
between Idalou and Lorenzo which
was rather exciting due to the fact
that lightning struck the power line
along the highway and cut it in
two near where Mr. Shaw was driv-
ing. Mr. Shaw said that when the
wires hit the water that it boiled the
water for several feet along the bar
ditch. Mr. Shaw reported a heavy
rain all the way from Lorenzo to
Floydada.

TEXAS IS ALLOTTED SIZEABLE
SUM OF NATIONAL DEFENSE
CONTRACTS

Austin, Texas, July 2.—National
defense contracts let in Texas up to
April 15 amounted to \$495,241,752.81
and Texas have been quick to make
themselves available for employment
in occupations essential to national
defense, James R. D. Eddy, State
Director of the National Defense
Training Program, said today.

Shipyard contracts in Texas total
\$181,142,452.00. These contracts
cover twelve destroyers to be built
at Orange, twelve cargo vessels and
four steel mine sweepers to be built
at Beaumont, four steel submarine
chasers and thirty-seven steel cargo
boats to be built at Houston, ten
wood mine sweepers to be built at
Orange, and an unspecified number
of wood submarine chasers at Rock-
port and Galveston.

With Texas forgoing to the front
as a center for ship construction, la-
bor estimates compiled by the eTexas
State Employment Service indicate
that the shipyards in Texas will ab-
sorb 12,000 workers within the next
twelve months.

"If the flow of national defense
materials is continued unhampered,
it is essential that trained men be
available for jobs when they are
needed," Eddy declared.

Texas Has Most
Co-Operatives
Survey Shows

College Station, July 3.—More co-
operatives have been established in
Texas since 1930 than in any other
state, a recent survey by the Houston
Bank for Co-Operatives and the
Farm Credit Administration shows.
In the opinion of C. E. Bowles, ex-
tension specialist in organization and
co-operative marketing, one third of
the Texas farm and ranch families
now are members of one or more of
the state's 840 co-operatives.

"Co-operatives give individual
farmers the benefit of volume in
their selling, buying and processing
operations," Bowles says. "The pros-
pects are that producers will find it
desirable to make a still wider use
of joint action to bolster their
shrunk incomes and to protect
themselves in a highly organized
business world."

Mrs. Sarah K. Duncan is visiting
this week in Amarillo with her da-
ughter, Mrs. Joe E. Pitts and Mr.
Pitts.

Kill The Bagworm
By Spraying
Early

College Station, July 3.—Cedar
bagworms which are now destroying
arbovitae, cedar and cypress, should
be sprayed when first hatched with
lead arsenate, using two or three
level teaspoons to one gallon of
water. Be sure the spray reaches
all parts of the plant.

But, says Sadie Hatfield, exten-
sion specialist in landscape garden-
ing, as it perhaps is a little late to
control the pest by poisoning, the
bags should be picked off and burn-
ed. Better still, place them in a box
covered with screen wire to keep
young worms from crawling out next
year. As the bagworm grows older
it seems to develop resistance to
poison.

There is a parasite which lives
with the pest and destroys it. By
putting the bags in a screened box
protected from rain, the newly
hatched larvae will be prevented
from escaping, but the parasite,
which is very small, will escape
through the meshes and attack bag-
worms outside.

The pest is easily recognized. It
makes a strong bag of soft water-
proof silk, which is covered on the
outside with bits of leaves and
twigs. The worm lives inside dur-
ing its life and at death leaves be-
hind in the bag a large number of
eggs which hatch out for next year.

WAGES ARE ON UPWARD
TREND FOR TEXAS LABOR

Austin, Texas, July 2.—Wages and
employment for the Texas industrial
worker last month continued their
steady upward spiral, the University
of Texas Bureau of Business Re-
search reports.

Industrial employment in May was
.8 per cent above April this year
and 8.7 per cent ahead of May a
year ago, while payrolls jumped 5.7
and 17.8 per cent ahead for the same
periods.

Bureau statisticians estimated
Texas employment in manufacturing
industries last month at 143,458 and
weekly pay rolls at \$3,054,574.

Miss Bonnier Stephens, of Fort
Worth, visited the last week with
her father, Will Stephens, and sister,
Bobbie Jean. She returned home
Wednesday.

Mr. and Mrs. Lee Cavin, of Petro-
lia, are visiting this week with re-
latives and friends here.

Time-Savers
For Family Is
Desirable

Family cooperation in small house-
hold duties saves not only time but
wear and tear of dispositions. Louise
Bryant, specialist for the A. and M.
College Extension Service, says when
families consider home management,

most frequently they think of fire
management and forget the time
factor.

Here are some suggestions she
fers for family cooperation which
will save time and result in sharing
the small, but sometimes harassing
household tasks:

Let one member of the family
be responsible each night for leave-
ing the living room in order. This
save work next morning.

Avoidance of Common Planning Mistakes Paves Way to Lasting Appeal and Economy

In home planning should when the plans are being made to which value can be obtained from a house, through use of architectural features and elements of design which are unnecessary, is being emphasized. Exaggerated "ski-jump" roof lines, such as that illustrated, are fads which mark an era in home building. Houses dated by marks of transitory popularity are apt to suffer in future marketability.

Entrance railing may be a refinement appropriate for more expensive homes, but it is too pretentious for a small home of low cost. The needless arch at the side of the entrance, together with its sweeping roof line, are costly and not essential. The simple dignified doorway of the lower house is less expensive and more appropriate than the pitched hood and iron rail of the other. The hood over the windows of the top house, although of possible use as protection against sun and rain, is too heavy a feature for so small a house. The small chimney is out of scale with the rest of the house. The larger chimney adds to the

scale and character of the building and affords ample manour for fire protection where it passes through the ridge of the roof.

STRAIGHT WALK MORE PRACTICAL

The straight walk is more practical and economical than the curved one, and at the same time it simplifies site planning. The straight walk leading to the lower house is said to provide a more restful appearance.

The small picket fence which protects the garden is in character with the simple home and is much less expensive than the archway entrance to the garden, which serves no useful purpose.

The window box may or may not be added, but it is felt that its use adds a degree of color and contrast to the house.

Notice of Intention To Issue Refunding Bonds

TO THE RESIDENT QUALIFIED PROPERTY TAXPAYING VOTERS OF THE COUNTY OF FLOYD, TEXAS:

TAKE NOTICE that on the 14th day of July, 1941, the Commissioners' Court of Floyd County, Texas, will pass an order authorizing the issuance of refunding bonds of said County, in the principal sum of \$15,000.00, for the purpose of refunding, cancelling and in lieu of an equal amount of indebtedness now outstanding against said County, represented by:

\$15,000.00 6% "Floyd County, Texas, Road Machinery Warrants, Series D, 1941," dated June 9, 1941.

FURTHER TAKE NOTICE that the proposed refunding bonds to be issued for the purpose of refunding, cancelling and in lieu of the aforesaid warrants, shall be numbered consecutively from 1 to 15, both inclusive, shall be in denomination of \$1,000.00 each, shall become due and payable serially, \$1,000.00 on April 15th in each of the years 1945 to 1955, both inclusive, and \$2,000.00 on April 15th in each of the years 1956 and 1957, and shall bear interest from date until paid at the rate of 4% per annum, payable semi-annually on April 15th and October 15th, in each year, the first interest payment date to be on October 15th, 1941.

AND FURTHER TAKE NOTICE that the warrants proposed to be refunded or cancelled by the issuance of said refunding bonds are described in that certain order of the Commissioners' Court of said County, passed on the 9th day of June, 1941, which order is recorded in the Minutes of said Court, and to which reference is hereby made for a more detailed description of said warrants, and such order is hereby adopted by reference in respect of the description of said warrants, and shall be considered as much a part of this notice as if incorporated herein.

WITNESS MY OFFICIAL SIGNATURE, this 9th day of June, 1941, pursuant to order of the Commissioners' Court of Floyd County, Texas.

G. C. TUBBS,
County Judge, Floyd County, Texas.

Bobbie Hinson Becomes Bride of Eldon Howard

The marriage of Miss Bobbie Hinson, daughter of Mr. and Mrs. J. E. Hinson of Lubbock, to Eldon Howard of Lubbock, son of Mr. and Mrs. Lee Howard of this city, took place in Amarillo Friday evening at the home of the officiating Baptist minister, Rev. Frank Hasty. A single ring ceremony was read.

The bride wore a white triple sheer ringote with white accessories and a corsage of Talisman roses.

Her attendants were Miss Howard Mae Grayson and Mrs. H. L. Limer. Wesley Mahen served as best man. Mr. Howard was reared in Floydada, attended Floydada schools. He has been employed at the First National Bank in Lubbock, for sometime. He is the son of Mr. and Mrs. Lee Howard and the grandson of Judge and Mrs. J. W. Howard.

After a trip to New Mexico, the couple will be at home in Lubbock.

Sergeant Didn't Know About \$43,000 Year Men

It was a hot day and the sergeant was getting impatient with a chubby conscript who couldn't seem to get his feet straightened out in close-order drill, so goes the story.

"I've seen some stupid people," the sergeant observed in ringing tones, "but you are by far the worst. It's a lucky thing you got in the army, because you would never be able to make a living anywhere else."

The private was William McChesney Martin, Jr., who drew a \$48,000 annual salary as president of the New York Stock Exchange until his recent induction into the army. He is telling the story on furlough.

PETROLEUM ENGINEERING BUILDING WILL SOON START

Austin, July 2.—An oil-soaked splinter from the derrick of the first well drilled on University of Texas lands will be among the documents preserved when the University lays the corner stone of its newest structure, the Petroleum Engineering Building here, soon.

The three-story, factory-style building is one of three new under construction on the campus. Equipment in the building will place the University's petroleum engineering department second to none in the nation, it is generally believed.

A piece of core from one of the deepest wells ever drilled—taken from the shaft two miles down—a sample of Texas crude petroleum and messages from various University and petroleum industry officials will also be included.

FIVE-DAY SHORT COURSE FOR HOTEL MEN WILL BE HELD AT AUSTIN

A five-day short course for Texas hotel men will be held at the University of Texas, July 21-25, it was announced this week.

Open to all employees of Texas hotels, the course will stress current hotel operating problems and is co-sponsored by the Texas Hotel Association and the Texas Hotel Sales Managers Association. University sponsors are the school of business administration and department of home economics.

TRAILERS HAUL MORE CATTLE

STUDIES made of the movement of cattle by Drovers Journal and other authorities indicate a rapidly growing percentage of direct shipments by truck-trailer units. Farmers and ranch men find that their cattle arrive in better condition with less loss of weight and greatly reduced cost of handling by shipping direct from farm to market. Of the shipments which arrive at sixty-five markets analyzed by the Corn Belt Farm Dailies, 63.7 per cent of the tonnage of all stock offered for sale arrive by truck. This known tonnage approximates nearly eight million tons and in

addition, according to the same authority, it is probable that three million tons more of direct shipment of cattle to market are truck-hauled. The Fruehauf Trailer Company reports a growing use of its trailers for the purpose of direct delivery of cattle. Because of the better condition of the cattle on delivery at the market, farmers are realizing more for their cattle by this method of handling. The accompanying illustration is typical of the type of equipment used for this form of distribution in farms all over the United States.

Driving in Sock Feet Help to Stay Awake

Austin, June 26.—Take off your shoes and drive in your stocking feet.

That, said State Police Director Homer Garrison, Jr., today, will relieve the monotony of night driving. Cool air the jar of pedal vibration on the feet will prevent dozing, which frequently results in serious crashes.

"It pays to have cold feet," Garrison said, "when you're bravely trying to stay awake. An open cowl will prevent one's getting too warm and comfortable."

Coffee will not help as much as a shockingly cold soft drink, he said, adding this final suggestion:

"If there's no one else along to suffer from it, you can break the monotonous purr of the motor and at the same time get in a little practice for operatic or oratorical ambitions by singing or talking loud."

VERMONT OXEN

Although Vermont is one of the most progressive states in New England, it boasts that 500 yoke of oxen still are in use there.

Texas Milk Production Is Increasing

Colege Station, June 26.—Texas dairymen are raising their milk production in response to the appeal of Secretary of Agriculture Claude R. Wickard to furnish the cheese and evaporated milk required by Great Britain and her allies.

According to G. G. Gibson, assistant dairyman of the A. and M. College Extension Service, a cross section of replies to a questionnaire indicated that the 1941 volume of milk in Texas will exceed that of last year by about 15 per cent.

Recently, Secretary Wickard announced the need for an increase in total milk production by six to eight percent in order to expand cheese production by about one-third and evaporated milk production one-fourth to meet expected requirements for those commodities. The total production of American Cheddar cheese in the last 12 months was about 805,000,000 pounds and of evaporated milk 58,000,000 cases.

"We have no way of knowing," Gibson said, "how much of the increase is seasonal—that is, the result of peak pastures and freshened cows. But pastures are rapidly reaching the point of decline and more grain will be required to keep up production. To maintain the fullest pos-

Paducah Names Neal Davis as Head Coach

Paducah, June 26th.—Assistant Coach Neal "Stormy" Davis, former Shamrock High School and Hardin-Simmons University athlete, will succeed Burns McKinney as head coach at Paducah High School, it was announced Tuesday. Davis will assume his new duties August 1. Meantime, an assistant will be assigned. Davis played football at Hardin-Simmons three years, before being graduated in 1939. He served as freshman coach after graduation and came to Paducah a year ago.

Jericho Ranch has Heavy Yield of Barley

Clarendon, Texas, June 26.—The first barley harvested in this county was cut this week at the Hermes-meyer ranch near Jericho. Seventy acres yielded an average of 72 bushels per acre and went into storage in the granaries at the ranch head-
