Henry Morgenthau Jr., Secretary of the Treasury, today made public the official War Bond Quotas by States for the month of July, which places the nation on a Billion-dollar-a-month basis to aid in meeting the War cost. The above table also gives May War Bond sales in the various states in comparison to the May Quotas. (June sales by states will be available for publication shortly.) The percentage of Quotas range from 71.3 percent above quota in Utah, to 22.6 percent below the quota in Montana, but puts the nation as a whole above the \$600,000,000 total May quota. Vulnerable Alaska and Hawaii led all states in sale of War Bonds on quota basis.

"Everybody, every pay day ten percent" is the Treasury slogan which is expected to place one of the attractive new window stickers in every American home. "We're Buying at Least 10%" reads the sticker, printed in the national colors. The new window stickers and the new "10%" lapel button, which indicates that the wearer is investing at least ten percent of his income in War Bonds every pay day, are yardsticks of patriotism in the War Bonds Private Pr

three times as much soil-building work this year as in 1941 is one wartime aim of Texas farmers.

Of Farmers

Total soil-building assistance, established under this year's farm program, is approximately three times as large as the 1941 allowance. The ncrease results from shifting a portion of AA Apayments, which formerly were made for planting within pecial allotment acreage, to the soil building allowance. Total assistance under the 1942 program, which may be used for carrying out approved practices, is approximately \$20,000,-000 compared to \$9,000,000 under last year's program.

Faced with shortages of labor, ma terials and equipment, farmers must begin conservation work immediately if maximum payments are to be earned this year, Fred Renenls, assistant administrative officer of the AAA in Texas, has announced.

The conservation materials and services program, which now is operating in 150 counties, is a definite method by which farmers can offset shortages, he said. Under this plan, winter legume seed, superphosphate and terraces are paid for by AAA, with costs deducted later from individual AAA payments. Approximately 25,000 miles of terraces, 3,000,000 pounds of Austrian winter pea and vetch seed, and 17,000 tons of superphosphate have been requested under this program.

Other positive conservation practices which may be carried out during the year include planting sum some sections of the state, contour when the war has been won and our lesting, furrowing and chiseling nonwork is done we shall take justi- crop pasture, eliminating destructive fiable pride and satisfaction in hav- plants, building earthen tanks and ing a part in an enterprise which so reservoirs, drilling wells and mow-

NUMBER ONE, FLOYD

There are many voters in Precinct No. One I have not seen personally and solicited for their votes for Commissioner. In view of the tire shortage and the near approach of the First Primary I am sure I will not be able to get around to all the voters.

To these I want to say that from business experience and familiarity with the problems of the precinct and the county, I am qualified for the place. And with the co-operation of the people I am sure I can make you a Good Commissioner and give you a business administration of the office.

I appreciate the good vote you gave me two years ago and hope this time you will see fit to give me top place and elect me to the office. Anything you can say or do for me will be appreciated.
