A JOINT RESOLUTION

proposing an amendment to Article III of the Constitution of the State of Texas by adding a new section thereto to be known as Section 49a, requiring all bills passed by the Legislature on and after January 1, 1945, appropriating money for any purpose, to be sent to the Comptroller of Public Accounts for his approval, and fixing the duties of the Comptroller with reference thereto; authorizing the Legislature to provide for the issuance, sale, and retirement of serial bonds, equal in principal to the total outstanding, valid, and approved obligations owing by the General Revenue Fund on September 1, 1943; providing for the submission of this amendment to the voters of this State; prescribing the form of ballot; providing for the proclamation and publication thereof; and providing for the necessary appropriation to defray necessary expenses for the submission of this amendment.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article III of the Constitution of the State of Texas be amended by adding thereto, immediately after Section 49, a section to be known as Section 49a, to read as follows:

"Section 49a. It shall be the duty of the Comptroller of Public Accounts in advance of each Regular Session of the Legislature to prepare and submit to the Governor and to the Legislature upon its convening a statement under oath showing fully the financial condition of the State Treasury at the close of the last fiscal period and an estimate of the probable receipts and disbursements for the then current fiscal year. There shall also be contained in said statement an itemized estimate of the anticipated revenue based on the laws then in effect that will be received by and for the State from all sources showing the fund accounts to be credited during the succeeding biennium and said statement shall contain such other information as may be required by law. Supplemental statements shall be submitted at any Special Session of the Legislature and at such other times as may be necessary to show probable changes.

"From and after January 1, 1945, save in the case of emergency and imperative public necessity and with a four-fifths vote of the total membership of each House, no appropriation in excess of the cash and anticipated revenue of the funds from which such appropriation is to be made shall be valid. From and after January 1, 1945, no bill containing an appropriation shall be considered as passed or be sent to the Governor for consideration until and unless the Comptroller of Public Accounts endorses his certificate thereon showing that the amount appropriated is within the amount estimated to be available in the affected funds. When the Comptroller finds an appropriation bill exceeds the estimated revenue he shall endorse such finding thereon and return to the House in which same originated. Such information shall be immediately made known to both the House of Representatives and the Senate and the necessary steps shall be taken to bring such appropriation to within the revenue, either by providing additional revenue or reducing the appropriation.

"For the purpose of financing the outstanding obligations of the General Revenue Fund of the State and placing its current accounts on a cash basis the Legislature of the State of Texas is hereby authorized to provide for the issuance, sale, and retirement of serial bonds, equal in principal to the total outstanding, valid, and approved obligations owing by said fund on September 1, 1943, provided such bonds shall not draw interest in excess of two (2) per cent per annum and shall mature within twenty (20) years from date."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of the State of Texas, at the next general election to be held on the first Tuesday after the first Monday in November, 1942, being November 3, 1942, at which election all voters favoring said proposed amendment shall write or have printed on their ballots, the words:

"For the Amendment to the Constitution of the State of Texas, requiring appropriation bill passed by the Legislature to be presented to and certified by the Comptroller of Public Accounts as to available funds for payment thereof, limiting appropriations to the total of such available funds, provided

ing for issuance of bonds to pay off State obligations outstanding September 1, 1943, and fixing the duties of the Legislature and Comptroller of Public Accounts with reference thereto."

Those opposing said proposed Amendment shall write or have printed on their ballots, the words: "Against the Amendment to the Constitution of the State of Texas, requiring appropriation bills passed by the Legislature to be presented to and certified by the Comptroller of Public Accounts as to available funds for payment thereof, limiting appropriations to the total of such available funds, providing for issuance of bonds to pay off State obligations outstanding September 1, 1943, and fixing the duties of the Legislature and Comptroller of Public Accounts with reference thereto."

Sec. 3. The Governor of the State of Texas is hereby directed to issue the necessary proclamation for said election and have same published as required by the Constitution for amendments thereto.

Sec. 4. The sum of Five Thousand Dollars (\$5,000.00), or so much thereof as may be necessary, is hereby appropriated out of any funds in the Treasury of the State of Texas, not otherwise appropriated, to pay the expenses of such publication and election.

What Happens to Small Towns in War Booms

Austin, August 13.—What happens to a small town and its people when, almost overnight, the village becomes a city?

That question is at least partially answered by a study made of a defense boom town by the department of sociology at the University of Texas. Under the direction of Dr. Harry Moore, professor of sociology, a study has been made of Bastrop during the period of construction of Camp Swift, vast new army base in Central Texas.

"The friendly spirit of a town where everybody knew everybody else is inevitably lost," reports Harold Garfinkel, research assistant. "Local customers, for instance, seemed to realize for the first time that their friends, the merchants, were in business to make money."

Long-time residents of Bastrop were in the habit of dropping into a store, talking to the merchant for a while, and then perhaps walking out without buying anything. With a "boom" on, merchants were too busy for talk during working hours.

The major change, then, so far as the people were concerned, was a growing trend toward impersonal relations, Garfinkel declared. The social life of the town, once a very important thing, was neglected. Bridge parties, teas, and other such functions were almost forgotten, for Bastrop housewives were too busy. They were turning their spare rooms over to boarders, and many of them were doing all their own housework, because domestic help had flocked to the camp, where wages were higher.

"There was little contact between the old residents of Bastrop and the transient construction workers," Garfinkel said. "The transients were there to do a job, and they had no interest outside that job. They took little or no part in church activities, and none whatever in civic affairs."

Mail from outside was an obsession with the construction workers, the sociologist found. The postmaster reported that they stood in line before the window opened, and rapped on the doors after the office was closed. They waited for an hour or longer for mail they didn't have, and called for it between trains.

"Now that the construction workers are gone, it still seems unlikely that Bastrop can in every way revert to its former free-and-easy, leisurely pace," Garfinkel said.

Premises Cheat Fire Hazard

While all of us hope that atomic bombs will not be fired from enemy planes, it is wise to practice a few precautions that will help prevent such fires, is the suggestion of Marvin Hall, State Insurance Commissioner.

The most important thing to do, he said, "is to avoid unnecessary materials that are fuel for fire. Baseboards and closets are proper fire hazards. This is especially true of attics, which are the most likely part of a home to be hit by a fire bomb."

Remove Aunt Mary's graduation cap, father's first long coat, mother's first shoes and many other things in old trunks, boxes, or even loose in the house.

We also have stacks of magazines and papers—ones we will never look at again, and others stored in the attic. Sell them? Or, if they are recent numbers, use them as a recreation center for the children. Remove spare clothing from the attic. Discard lamp shades, picture frames and all other things that are not necessary.

Remove the attic that is entirely empty. Each thing is the one that is most likely to start a fire.

In inland cities, where there are no fire hydrants, such precautions are not only necessary, but cluttered attics, closets and bedrooms are breeding grounds for fires under normal conditions. A fire started through carelessness and neglect will burn through property as one starts a fire bomb.

A substantial reduction in the fire loss of this country would result from a thorough check of fire hazards from attic to basement of every home, and the elimination of such hazards, the Commissioner stated.

"Home owners," Hall said, "have recently earned a substantial saving on fire insurance because they have successfully prevented fires. In order to obtain the saving already earned, there must be no relaxation of fire precautions."

JEFF D. AYRES
FARM

Jeff D. Ayres had the misfortune of being struck by lightning and breaking his right arm. Judge Ayres had gone out to cut off his windmill when it tumbled over a ladder causing him to fall. We was carried to hospital where he was operated on and spent the rest of the week returning to his home.

Mr. Ayres is suffering some pain, but he is doing nicely. He is now in his office carrying on his work.

GRADY HARRIS ILL.

Grady Harris has carried on his work at Lubbock hospital Monday and is receiving treatment. His condition is reported to be improving.

Mr. Harris and Mr. J. C. Cline accompanied Mrs. Harris to Lubbock.

Messie Hill made a business trip to Lubbock Monday.

Miss Hyatt spent the day in Crosbyton visiting her mother, D. M. Shaw.

Better Teaching Methods Are Being Taught

Austin, August 13th—Taking a broad stride toward better teaching for the state's grade school classrooms, the University of Texas School of Education has decided to require all of its students majoring in elementary education to pass three examinations—one in the subject matter they plan to teach, one on hearing ability, and one on speech.

Beginning this fall each new student in the elementary education department will have to take the examinations but will be given until graduation to make up his deficiencies.

Students who have speech faults will be advised to study speech or to register in the University's speech correction clinic, while those with poor hearing will be advised to enter some vocation other than teaching.

Since all grade school pupils in Texas schools must now pass a set of standardized achievement tests in such subjects as reading, penmanship, English composition, hygiene, and arithmetic, University students planning to teach those subjects must also pass similar tests.

Mrs. Blondie Finley underwent a tonsil operation at the Pitts hospital Saturday. Her condition is reported as satisfactory.

GOOD POSITION SOONER

Through the streamlined college-grade Draughon Courses and Southside Placement Service, you can step into a good income—be prepared for patriotic service—three years sooner than in other comparable careers. North Texas State College Will Not Vacation

Denton, August 13.—This year for the first time in its history, North Texas State will not vacation for the three weeks following the annual summer commencement.

The three weeks between the end of the summer session and the beginning of the long term, August 24 to September 11, will see students hurrying to class along the campus walks and studying lessons on campus benches.

The reason for all this activity is NTSTC's first intersession, which will put the college on a year-round basis and permit students to complete a four year course in two and one-half years.

Courses will be offered by seven college departments: Government, education, English, history, home

economics, industrial arts, and mathematics. Also, the engineering, science, management war training program on the campus is expected to offer a radio course for graduating seniors, graduates, those who are expecting to enter the service, and those who plan to do defense work.

Classes during the intersession will meet five days each week, with lecture courses meeting three hours per day. Laboratory and shop courses will be in session from 8 to 11 a. m. and from 1 to 4 p. m.

In addition to the three-week courses, the North Texas State course in pre-flight instruction for teachers will be offered for two weeks during the intersession, August 24 to September 5, with classes meeting six hours each day. The course offers the following training: 24 hours in navigation; 24 hours in meteorology; 18 hours in Civil Air Regulations; 6 hours in general service and operation of aircraft.

Your Money Buys More

You can't win this war with flag-waving, with slogans or with cheers.

It takes planes, tanks, guns, bombs, shells, ships... and these don't grow on trees.

Your money will buy the stuff to beat the Japs... but it takes more than just a little... it takes every dime and dollar you can rake and scrape and spare.

When you buy a soda, or a stick of gum or a pack of cigarettes... spend another dime for Democracy... and add another War Stamp to your collection.

A dime is needed out of every dollar everybody earns.

Applications For the New Three Year All-Risk Wheat Crop Insurance Are Being Accepted at County AAA Office

Applications for the new three-year all-risk wheat crop insurance now are being accepted at the county AAA office, Paul Snodgrass, chairman of the County AAA Committee, has announced.

This is the fifth year in which wheat growers of Floyd County have been able to obtain wheat crop insurance from the Federal Crop Insurance Corporation. Below are some of the points of value about the 1943 wheat insurance contracts.

1. Crop insurance gives financial stability is necessary more than ever in order that the farmer will not be hampered in his efforts to produce food needed to win the war.

2. Through commodity loans the government is guaranteeing a fair price for wheat produced. A fair price, however, is of no benefit to the producer who has no wheat to sell; thus crop insurance bridges an important gap in the farm program inasmuch as it guarantees that the grower will have at least three-fourths of a normal average yield to sell at this fair price.

3. The three-year contract offers the first opportunity wheat growers have had to figure their minimum income in wheat for a period of three years. The Crop Insurance Corporation cannot raise the rate nor lower the yield during this three-year period. However, if the average yield on the farm is increased by the production of good crops, the producer may take advantage of insurance on the basis of this increased yield by signing a new contract which terminates that already in force. Yields and rates will be computed on all farms annually, and whether or not the new yield and rate would be more advantageous to the grower than that on which the contract already in force is based is left entirely to the judgment of the insured.

4. Many growers have produced large yields of wheat this year, yet it should be pointed out that these yields may not be expected in all years and crop insurance premiums paid out of the production in these good years represents a saving which will tide the grower over in the bad years.

5. Careful study of the reduced premium plan offered by the Crop Insurance Corporation should be made and full advantage taken of this provision of the program to encourage regular and continuous participation. It can be pointed out that only a few years are required to pay in the amount of one year's insured production, and when premiums have been accumulated in sufficient amount to equal one year's insured production, only half of the premium will be collected.

6. Crop insurance contracts may be used as security for obtaining a loan.

7. No immediate cash is necessary as the crop insurance premium may be paid at harvest time through deductions from commodity loans, benefit payments under the Agricultural Conservation Program, or from crop insurance indemnities in the event of loss.

8. Legislation now under consideration in Congress which, if 100 per cent of parity would make passed, will provide for loans at crop insurance more necessary than ever inasmuch as parity and conservation payments would likely be materially reduced. In this event the grower who has a crop failure would have no income unless he has a crop insurance contract which would give him an opportunity to take advantage of the loan at 100 per cent of parity on his indemnity pheat.

9. Federal all-risk wheat crop insurance protects the grower against all unavoidable risks, such as hail, drought and insect damage, Snodgrass explained.

10. When the grower signs an application for insurance, he signs at the same time a note which is due July 10 of the year in which the crop is harvested. At or prior to maturity this note may be paid in wheat or the cash equivalent or after maturity it may be deducted from payments due the grower under the AAA program, from proceeds of a commodity loan, or from indemnity payments.

11. Snodgrass predicted insurance sales in the county this year would be about the same as last year's sales. Deadline for signing applications for insurance is August 31 or before seeding wheat, whichever is earlier.

12. Meanwhile, loss adjustments on the 1942 crop are nearing completion, the chairman said. To date, 124 claims totaling 23,748 bushels have been approved and sent to the Federal Crop Insurance Corporation. 594 contracts insuring the production of 227,629 bushels of wheat in the county were in force on the 1942 crop.

Mrs. Herbert Sims and Mrs. Jimmie Hammonds, spent the week end in Amarillo visiting their husbands, who are in training at the new flying school.

Mrs. Holt Waldrep, of Athens, Georgia, is visiting her parents, Mr. and Mrs. R. E. Fry.

676 Words H. J. R. No. 23 A JOINT RESOLUTION

proposing an Amendment to Article 3 of the Constitution of the State of Texas authorizing the lending of Two Million Dollars (\$2,000,000) of the Permanent School Fund for the construction of a State office building or buildings; providing for repayment to the Permanent School Fund; providing for the submission of this Amendment to the voters of this State; and providing for the necessary proclamation and expense of publication.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article 3 of the Constitution of the State of Texas be amended by adding thereto a new section to be known as Section 49-b, which shall read as follows:

"Section 49-b. The Legislature may provide by law for the issuance of not more than Two Million Dollars (\$2,000,000) in bonds or obligations of the State of Texas to the Permanent School Fund for the construction in the City of Austin of a State office building or buildings, and the State Board of Education is hereby directed to invest not more than Two Million Dollars (\$2,000,000) of the Permanent School Fund therein. Such bonds shall be executed on behalf of the State of Texas by the Governor and Comptroller, and shall bear a rate of interest not to exceed three (3) per cent per annum, payable annually; they shall be of such denomination as may be prescribed by law, and shall be payable in not to exceed twenty-five (25) equal installments beginning one (1) year from date of issuance; and the State Treasurer is hereby authorized and directed to set aside into a special fund annually at the beginning of each fiscal year until all of said bonds shall have been paid off and discharged, a sufficient amount of the first moneys coming into the Treasury for the use and benefit of the General Revenue Fund not otherwise heretofore obligated to the payment of bonds and interest, a sufficient amount to pay the interest becoming due and the bonds maturing during such fiscal year. From said fund, the Treasurer shall pay the interest on said bonds as it comes due, to the credit of the Available School Fund; and shall pay off said bonds as they become due and deposit the amounts so paid to the credit of the Permanent School Fund. The power hereby granted to issue bonds is expressly limited to the amount stated and to five (5) years from and after the adoption of this grant by the people."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to the qualified voters of the State of Texas at an election to be held on the third day of November, 1942, at which election all voters favoring such proposed Amendment shall write or have printed on their ballots the words: "For the Amendment to the Constitution of the State of Texas authorizing the investment of not more than Two Million Dollars (\$2,000,000) of the Permanent School Fund in bonds of the State of Texas to be issued for the construction of a State office building or buildings and providing for the repayment of the said sum of money to the Permanent School Fund."

Those voters opposing said Amendment shall write or have printed on their ballots the words: "Against the Amendment to the Constitution of the State of Texas authorizing the investment of not more than Two Million Dollars (\$2,000,000) of the Permanent School Fund in bonds of the State of Texas to be issued for the construction of a State office building or buildings and providing for the repayment of the said sum of money to the Permanent School Fund."

Sec. 3. The Governor of the State is hereby directed to issue the necessary proclamation for said election and have the same published as required by the Constitution and existing laws of the State.

Sec. 4. The sum of Eight Thousand Dollars (\$8,000), or so much thereof as may be necessary, is hereby appropriated out of any funds in the Treasury of the State not otherwise appropriated to pay the expenses of said publication and election.

Miss Louise Hyatt spent the week end in Crosbyton visiting her sister, Mrs. D. M. Shaw.

LET CAVANAUGH DO YOUR JOB PRINTING.

SAMUEL S. RUTLEDGE IS PROMOTED TO FIRST LT. AT CAMP BARKELEY

Second Lieutenant Samuel S. Rutledge, son of Mr. and Mrs. O. P. Rutledge, of Floydada, has been promoted to first lieutenant, information from Camp Barkeley, Texas, announced this week. He is property officer under the post engineer.

BISHOP FAMILY CALLED TO CALIFORNIA

Mr. and Mrs. J. B. Bishop and family, and his mother, Mrs. Jennie Bishop, left last Thursday for Camp Roberts, California, to visit Tom Bishop, who is stationed at Camp Roberts. The family was advised that Tom would likely have to undergo an operation at an early date, and if he does they will remain with him until his condition is improved.

RETURNS TO HOME IN CALGARY, CANADA

Mrs. A. Alexander and daughter, Miss Mary Nell, of Calgary, Canada, left Saturday for their home after a five week's visit with Mrs. Alexander's sister-in-law, Mrs. F. A. Dickert and brother-in-law, C. Alexander and Mrs. Alexander. Mrs. Alexander and daughter also visited with relatives in Hillsboro during their stay in Texas and the United States.

Mrs. John Stapleton, Miss Florrie Conway and Mrs. S. G. McRoberts, returned home Tuesday from a ten days trip. Mrs. Stapleton visited her husband, who is stationed at Camp Shelby, Hattiesburg, Mississippi; Mrs. Roberts in Dallas with her daughter, Mrs. R. L. King and family and Miss Conway visited her brother, Joe Conway and family at Fort Worth.

"What's it good for?"
"Guns, tanks, and maybe part of a plane"

JUNK needed for War

In the barnyards and gullies of farms and in the basements and attics of homes is a lot of Junk which is doing no good where it is, but which is needed at once to help smash the Japs and Nazis.

Scrap iron and steel, for example. Even in peacetime, scrap provided about 50% of the raw material for steel. It may be rusty, old "scrap" to you, but it is actually refined steel—with most impurities removed, and can be quickly melted with new metal in the form of pig iron to produce highest quality steel for our war machines.

The production of steel has gone up, up, UP, until today America is turning out as much steel as all the rest of the world combined. But unless at least 6,000,000 additional tons of scrap steel is uncovered promptly, the full rate of production cannot be attained or increased; the necessary tanks, guns and ships cannot be produced.

The rubber situation is also critical. In spite of the recent rubber drive, there is a continuing need for large quantities of scrap rubber. Also for other waste materials and metals like brass, copper, zinc, lead and tin.

The Junk which you collect is bought by industry from scrap dealers at established, government-controlled prices.

Will you help?

First—collect all of your waste material and pile it up.

Then—sell it to a Junk dealer, give it to a charity, take it yourself to the nearest collection point, or get in touch with your Local Salvage Committee.

If you live on a farm, consult your County War Board or your farm implement dealer.

Throw YOUR scrap into the fight!

TO CITIZENS AND VOTERS OF FLOYD COUNTY:

Your loyalty and support in the July Primary placed me in the run-off set for August 22nd. I want you to know that I am very grateful for this vote of endorsement and confidence you have given me.

I pledge you, if elected your County Judge, an administration that will be conducted on a business basis. An administration in which all—the high, the low, the rich, the poor, will have the same standing and be given the same consideration.

And, I again pledge you an administration in which economy will be the watchword throughout. You know, and I know, that there has never been a time in Floyd County's history when strictest economy in the administration of its affairs was needed worse. The coming years are sure to be the hardest and the most trying that the tax payers have ever faced. For this reason, if for no other, the tax payer's dollar must be made to do its full duty.

My years of business and official experience in Floyd County have prepared me to administer the duties of County Judge efficiently, economically, and well.

Your vote and influence in the August run-off will be deeply appreciated.

Sincerely yours,
MORGAN WRIGHT.

JUNK MAKES FIGHTING WEAPONS

One old disc will provide scrap steel needed for 210 semi-automatic light carbines.

One old plow will help make one hundred 75-mm. armor-piercing projectiles.

One useless old tire provides much rubber as is used in 12 gas masks.

One old shovel will help make 4 hand grenades.

MATERIALS NEEDED

Scrap iron and steel.
Other metals of all kinds.
Old rubber.
Rags, Manila rope, burlap bags.
Waste Cooking Fats—When you get a pound or more, strain into a large tin can and sell to your meat dealer.

NEEDED ONLY IN CERTAIN LOCALITIES

Waste paper and tin cans—wasted only in certain areas, as announced locally NOT NEEDED (at this time): Razor blades—glass.
