# The Santa Fe Railway Company Gives Great Support to National Newspaper Scrap Iron and Sieel Campaign

The Santa Fe Railway deserves credit for its efforts to support the national newspaper scrap iron and steel campaign with its current and timely advertisement urging all to get this needed scrap into proper hands "before the snow flies."

The Railway has been keenly alive to the nation's need for this metal since Pearl Harbor. In fact, since the Harbor horror the Santa Fe has collected two hundred ten million, seven hundred and sixteen thousand pounds of the now precious metal for conversion into essential war materials. That is a huge heap for any scrap but it is the kind that will beat the Jap and our other foes. It was collected from right-of-way, roundhouses, shops, offices and all company properties.

With its own job well in hand the Santa Fe now turns to aiding the nationwide newspaper campaign to dig up every bit of scrap possible to help our Nation and our fighting men.

As a member of the newspaper fraternity of the United States, sponsoring this patriotic campaign, we welcome the Sasta Fe's help in spurring collection of vital metals, and with the Santa Fe, urge all-to get in the scrap "before the snow flies."

\* From six to sixteen (and over and under) America's youngsters are helping to fight the war.

They're buying War Bonds and Stamps with the money they get for collected junk.

They're making it easy for others to buy War Stamps when they deliver newspapers.

They're studying to take their places in the ranks of America's fighting men when their call comes.

They're All-Out for America-and we're all-out for them and their Schools at War Program.

IT QUICK!

#### Here's Why

This war is swallowing steel like a quicksand.

We need scrap metal to make steel . . . steel for more tanks . : ! more planes . . . more ships . . . more guns . . . and more shells.

It's our job to supply our boys and allies with all these things they must have to smash the Axis on land, at sea, and in the air.

#### Scrap Is Precious

Steel for tanks, planes, ships, etc., is made by melting old scrap metal with pig iron-about half and half.

The pig iron is made from iron ore that comes from mines. But that precious scrap-THAT'S got to come from us folks here on the Home Front.

#### What Is Scrap?

Scrap is ANY old thing, made out of iron or steel, that we don't absolutely need.

It is anything from a hairpin to a busted steam boiler . . . from a paper weight to a cracked rail.

It is old machinery, pipe, tools, flat-irons, auto parts, screws, nuts, bolts, bathtubs, lawnmowers, stoves, tanks, metal barrels, iron fences-and what have you.

#### Where Is It?

This old scrap is everywhere. It is in cellars, attics, closets, alleys, auto graveyards, fields, garages, barns, and factories.

We've all got SOME, be it little or much.

A typical town family is said to have about 70 pounds lying about; a farm family, nearly 750 pounds.

In ten months after Pearl Harbor the Santa Fe scraped together 210,716,000 pounds of scrap. A pound here, a ton there. That's how it mounts up.

#### Scrap Means Steel...Steel Means Victory Sell It or Give It ... But Get It In

Steel is the only language those bandits in Tokyo and Berlin understand. Let's give them plenty of talk . . . in their language.

Every county, city, and town is having a scrap drive. Watch your

local newspapers on how to get in it. Sell what you have, or give it away - but get it in! And now's the time, before snow flies!

Your scrap can save American lives and help shorten this war. Every pound you turn in helps.

Allies to Feed. Arm U.S. Forces

#### Will Partially Repay Lend-Lease Aid Given to the United Nations.

WASHINGTON .- American armed forces on various fighting fronts of the world will be supplied locally with military equipment, munitions, food supplies and other facilities under the terms of a series of agreements signed here.

sleeps on damp floors The agreements, concluded with s given only enough food the United Kingdom, Australia, New Zealand and Fighting France, provide the opportunity for at least okesman said, adding partial repayment of the lend-lease leaders in the Czech assistance the United States has had received demands furnished for those fighting the Axis. Nazis to prepare 15,000 They specify that the war produc-

tion and war resources of the Allies shall be pooled in the most effective ed a campaign to exway and that assistance shall be given American forces by their allies in the various theaters of operation to conserve shipping and increase the efficiency of the Allied war effort.

Signs for United States.

Secretary of State Hull signed the agreements for the United States. Lord Halifax, the British ambassador, signed for the United Kingdom and Northern Ireland, while Sir Owen Dixon and Walter Nash, the ministers of Australia and New Zealand, signed for their govern-

ments. a little torture thrown The agreement with Fighting ity the higher nature of France, the former Free French organization of which Gen. Charles de Gaulle is the head, was arranged through an exchange of notes in lews in the past three London between Brig. Gen. John E. Dahlquist, acting U. S. military representative, and Maurice de Jean, representing the French national committee.

The agreements broaden and formalize the lend-lease agreements, making them into more effective mutual-assistance pacts. They specify that the war production and war resources of the four signatory governments and the Fighting French organization shall be used in ways that most effectively utilize available materials, manpower, production facilities and shipping space. They provide that each party to the agreements shall provide the maximum in reciprocal aid so that the need of foreign currency shall be reduced to a minimum.

#### Covers Wide Range.

The types of assistance which is to be given American armed forces locally were listed as follows:

s the state its greatest (A) Military equipment, munindians since the days tions and military and naval stores. (B) Other supplies, materials, facilities and services for the U.S. forces, except for the pay and allowances of such forces, adminisave Taste for Fish trative expenses and such local purchases as its official establishments CITY .- The city's may make other than through the official establishments of the government of the United Kingdom (or the other parties). (C) Supplies, materials and services, needed in the construction of military projects, tasks and similar capital works required for the common war effort in the United Kingdom or in the British colonial empire (or in territories of the others), except for the wages and salaries of U. S. citizens. THE FLOYD COUNTY PLAINSMAN, THURSDAY, OCTOBER 29, 1942

### Future Farmers of the Extension Service, and his du-ties in Texas will be similar. America Ad Much "We feel fortunate in obtaining an entomologist with such excello Future Security

Helping to assure themselves and their country of lasting security, 245,000 Future Farmers of America in 7,500 chapters through out the country have in the past year invested more than \$1,500,000 in war bonds and stamps. This was announced by W. A. Ross, executive secretary of FFA, U. S. Office of Education, Washington, D. C., on the eve of the annual FFA Naitonal Convention scheduled is Kansas City, Missouri, Oc tober 25 to 28.

An FFA member is a farm boy who is studying vocational agriculture in his local high school and who is developing his own complete far mprogram for the future. This entitles him to membership in this national organization of farm boys. Sometimes getting a start in his farm plan with his father's help, or often largely on his ows initiative, he eventually becomes self-sufficient and keeps his own farm business records to prove it.

Hundreds of FFA chapters are buying bonds regularly, as are hundreds of individual members, from the profits in their livestock or crop projects. In some čases, FFA members are conevrting their entire profits into war savings. for

### Dr. H. G. Johnston, of Arizona, Takes Extension Work

College Station November 4. Dr. H. G. Johnston, Arizona extension entomologist for the past three years, has accepted an appointment as entomologist for the Extension Service of the Texas A. and M. College, Geo. E. Adams, vice director and state agent, has announced. Dr. Johnston succeeds Cameron Siddall who was commissioned in the U.S. Army early in September.

lent background and qualifications," Mr. Adams said in annousc ing the appointment.

Mrs. L. G. Mathews left Sunday after having spent the past week here visiting Mrs. J. C. Covington and Mr. Covington and other friends. Mrs. Mathews will visit at Brownwood and Trickham with relatives before returning to Bakersfield, California.

#### 5,000,000 Chinese Forced

To Aid Japanese Troops CHUNGKING. - Invading Japanese forces have impressed approximately 5,000,000 Chinese laborers in North China during the last five years and sent them to Manchuria and Japan to relieve an acute labor

shortage, Chinese quarters reported. Now, these quarters declared, the Japanese are planning to conscript 2,000,000 more-of whom 1,500,000 are to be sent to Manchuria, 150,000 to Inner Mongolia and 100,000 to Japan, while the remaining 250,000 will be put to work in North China.

#### Sat as National Anthem

Was Played; Gets 20 Days TACOMA, WASH .- Edward Juntti, 35, was sentenced to 20 days in jail-so he could spend the time sit-

ting down. He remained sitting when "The Star Spangled Banner" was played in a tavern. Other customers stood; Juntti remained sitting. The others protested and called police.

Police Judge W. A. Richmond sen tenced Juntti to jail specifically for failure to stand when the National Anthem was played.

#### **Bees Imprison Firemen**

In Own Engine House DENVER .- Firemen at the Englewood station were prisoners in their engine house 214 hours.

Bees, thousands of them, took charge of the doors and stopped all comers until A. B. Honeywell, an amateur aplarist, coaxed them into a portable hive where they were in more peaceful mood. Fortunately, there were no alarms out Englewood way during the mergency.

The new entomologist, whose full name is Horace Greely Johnston, is a native of Mississippi. He received his B. S. degree from Mississippi State and was awarded his M. S. and Ph. D. degrees from Iowa State College at Ames, Iowa. His doctorate was obtained in 1936. \_

Dr. Johnston was associated for 12 years with the A. and M. College in the entomology department, serving first as assistant and later as an associate professor. As extenio etomological program for

### Fine Arts Festival To be Held at Austin Nov. 7-15

Two national music executives will be guest speakers during the week-lond Fine Arts Festival, No- ents, Mr. and Mrs. Silas E. Dunvember 7-15, to be held at the University of Texas in observance of the dedication of its new \$500,000 Music Building, Thomas Gorton, chairman of the program committee, has announced.

The speakers will be Earl V. Moore, director of the University of Michigan School of Music and former director of the WPA national music program, and Dr. James Francis Cooke, editor The Etude, national music publication.

Another feature of the dedication ceremonies will be a separate dedicatory program for the fourmanuel Aeolian-Skinner organ designed especially for the new building. The program will consist of a recital on the instrumest, played by Palmer Christian, one of America's outstanding organists, on Tuesday evening, November 10.

### Lights of New York by L. L. STEVENSON

Byron H. Uhl, alert and erect district director of the immigration and naturalization service, probably has come into close contact with man in the world. Recently he celebrated the completion of 50 years on Ellis island, the great gateway to the United States. True, Ellis island is not a gateway now because the war has stopped immimerely a place of detention for enemy aliens just as it was in the First World war. Nevertheless, in stationed at Ellis island, a mighty flood of newcomers to this land has passed before his eyes.

Those great "immigration races" of the early twenties are well remembered by Mr. Uhl. They should be, because there were many times when the lights of Ellis island burned all night that the great human tide might be disposed of as soon as possible. The law which took effect in 1921 was the cause. Under the provisions of that act, not more than 20 per cent of the quota of any one nation could be admitted in a month. So ships would anchor in Gravesend bay the last day of the month and at the stroke of midnight, would dash for quarantine, frequently in such numbers that the Narrows were all but clogged. The eagerness of skippers to be first in line was easily explained. If their passengers were not admitted they had to be returned to their native lands at the steamship company's expense. In 1924, the law was so amended that no visas were issued abroad without a quota number.

Mr. Uhl, when a lad of 18, came to Ellis island in 1892 as a stenographer. That was soon after Ellis island succeeded Castle Garden as an immigration station. Castle Garden later became the well - known Aquarium. Ellis island then consisted of only 31/2 acres with one big wooden building which burned in 1897. Now the island is 271/2 acres in extent and there are 37 red brick and limestone buildings. In 1903, Mr. Uhl was promoted to inspector. He went down to guarantine in cutters only three months, however, because then he was promoted to chief clerk. In 1909, he became assistant commissioner and in 1933, was named director which made him second in rank to the commissioner. The office of commissioner was abolished in 1940 and Mr. Uhl then became the immigration head of the country's largest and most important port.

Thirty-five years ago Mr. Uhl established a home in Rutherford, N. J. To reach Manhattan, he trav-

els under the river in the Hudson tubes. Then, down at the Battery, he takes a dingy government ferry to reach Ellis island. His day's work over, he reverses the journey. So taking it all in all, water figures no little in his life. Now at the age of 68, after half a century on an island, he is looking forward to a little home in the country. But that won't come until he retires.

Speaking of Ellis island, here is something that can be told now. In the rush days, Ellis island was much in the news. There were also magazine and other articles concerning conditions there due to overcrowding and the manner in which newcomers to these shores were handled by island officials and guards. Many of the articles were unfavorable and naturally the immigration department was not pleased. Hence, reporters who came to the island to get a story, instead of being permitted to prowl around, were routed to Mr. Uhl's office, with guards seeing that they traveled in a direct line. Mr. Uhl was always courteous and as helpful as possible. But being . government official, he was ruled by Washington orders.

One day a newspaper man, in search of first-hand information, dressed in old clothes (not a difficult thing for a reporter) and having exhibited his police card to Mr. Casey, guardian of the ferry portals, traveled to Ellis island with a flock of relatives of immigrants. He started for Mr. Uhl's office all right, but at the opportune time, ducked into a corridor. He hadn't gone far before he encountered a guard. But by pretending not to understand English, he was shooed right to a place he wanted to see. By keeping that up and always looking extremely dumb, he eventually learned all he wished to know. The result was a page article that brought a lot of compliments from a Sunday editor and others. While digging up facts about Mr. Uhl for this column I happened to find that page, bence the reminiscence. Bell Syndicate-WNU Features.

#### Uses Tin Cans to

Make License Tabs MONTPELIER, VT.-Resourceful Vermont won't need any steel this year for its 1943 automobile registration plates. The state registry of motor vehicles has developed an in-genious method of rolling and cutting old tin cans to obtain tabs to cover the 1942 markings, thus usng their present plates.
