Reflective Thinking Needed By Military, Webb Grads Told

The challenge today is for military leaders who can do some reflective thinking, and who can take necessary steps in peacetime to avoid the necessity of fighting World War III. This was the essence of a talk presented Tuesday evening in graduation ceremonies for Class 57-Q, at Webb Air Force Base...

United States must recognize its long term interest in Europe, Asia and Africa. "We must form a national consensus right down to the grass-roots that the struggle of Arab nationalism is just as important to us as Middle East oil, that the success of India's five-year plan is crucial and works to our self-interest."

ers me. I see little evidence that we are doing sufficient reflective thinking at all levels to recognize the long-term trend of the conflict. It is of the utmost importance that the officers we train today understand these things. They are needed not only as pilots, but are needed in the field of ideas, leaders who can help convince the general public that our national objectives substantially overlap the national objectives of these undeveloped countries outside the Iron Curtain.

Scooter Accident Hospitalizes Boy

Aaron Wilemon, 14-year-old son of H. F. Wilemon, 116 Frazier, is in Big Spring Hospital with painful cuts, abrasions and bruises as result of a motor scooter accident at 6 p.m. Tuesday.

The mishap occurred near the Terrace Drive-in Theatre on the old San Angelo highway. Highway patrol officers investigated the accident. River ambulance brought the youth to the hospital where it was said his condition Wednesday morning was satisfactory.

Artists Fight With Brushes

LIVERMORE, Calif. (AP)—The Livermore Art Assn. doesn't just argue over opposing theories of painting. It fights with brushes. Six women members recently tackled the drab wall of the association's rented building. In just time the wall was abloom with gaudy yucca plants, cacti and prickly pears.

Fallout Reaches A Record Level

SALT LAKE CITY (AP)—Radioactive fallout from Monday's atomic explosion in Nevada soared to a new high of 7,090 micro-microcuries of beta radiation yesterday. The generally considered safety level over a 24-hour period is 1,000 micro-microcuries.

No Troops-Enforced School Integration, President Says

WASHINGTON (AP)—President Eisenhower said today he cannot imagine circumstances which would induce him to send federal troops to enforce civil rights—including school integration. Simultaneously, he opened the way to a compromise that might bar the attorney general from acting on his own to enforce desegregation of schools.

ment of "other" civil rights. In today's meeting with news-men, Eisenhower was pressed on the question of whether he favors allowing the attorney general on his own motion to go into court for enforcement of integration in schools. Eisenhower replied: Not when it stated that way, without some request from local authorities for action.

President said that if you try to go too far too fast in legislation in this delicate field, you are likely to cause trouble. He said it is a field in which education should be employed. Eisenhower said his own purpose is reflected in his statement yesterday. In regard to the possible use of troops, Eisenhower said authorities differ on the extent of authority given a president in this field by post-Civil War reconstruction statutes.

Ike Thinks Wilson-Zhukov Meeting Might Prove Useful

WASHINGTON (AP)—President Eisenhower said today a meeting of Russia's Marshal Zhukov and Secretary of Defense Wilson might prove useful. Eisenhower made the comment at a news conference which ranged into foreign affairs, but also dealt heavily with a prime domestic subject—the administration's pending civil rights bill.

ed at the end of World War II. They were both in Berlin at the time. The President went on to say that he and Zhukov at that time cooperated very closely, and that a Zhukov-Wilson meeting at this time might prove profitable by bringing together defense ministers from the two countries. The President also discussed these topics: ATOMIC STOCKPILE—As Secretary of State Dulles did yesterday, Eisenhower said this country is considering the possibility of putting a stockpile of atomic weapons at the disposal of the North Atlantic Treaty Organization.

countries, particularly Egypt and Syria. Eisenhower said such shipments by Russia cannot possibly contribute to peace. The effect, he went on, will be just the opposite. TREATIES — Discussing demands in Congress for ending status-of-forces treaties, requiring foreign trials for American servicemen in some instances, Eisenhower made it emphatically clear he is against any such move. The status-of-forces treaties are absolutely essential, he said, adding that without such alliances we would be compelled to bring home American troops stationed abroad. Eisenhower also said that he believes the case of Army Specialist J.C. Williams S. Girard has been whipped up all out of proportion to its importance.

RED-FACED AIR FORCE ASSN. BARS RUSSIAN FROM MEETING

WASHINGTON (AP)—The Air Force Assn. has barred a Soviet representative from the convention it will hold here July 30 to Aug. 4. The air power group rejected an application from Lt. Col. Valentin N. Elistratov, assistant air attaché of the Soviet Embassy. James H. Straubel, AFA executive director, also returned to the office a \$25 check sent in as a registration fee. Straubel told Elistratov that representation by foreign governments at the convention would be by invitation only. Edmund F. Hogan, AFA information director, said invitations were sent to the air attaches of 47 countries. He added that no invitations went to Communist or Red satellite governments. In February 1956 reporters inquired about the presence of a Russian air official at an AFA jet age conference here. It turned out the Soviet officer had joined the organization a short time earlier merely by registering under his military title of major without indicating his association with the Soviet Embassy. The AFA hastily refunded the Russian's membership fee. The AFA is a privately supported organization of about 60,000 Air Force veterans and current members of the Air Force.

Tech Prexy Sees New Board Meet As Result Of Ouster

LUBBOCK, Tex. (AP)—The political-educational furor caused by the discharge of two Texas Tech faculty members and elimination of the job of another may cause a special board meeting. The school president said yesterday. The prediction came as the college faculty called for the board to reconsider—in open meeting—its actions of last Saturday. Dr. E. N. Jones, Tech president, said he had every reason to believe the directors would call a special meeting as quickly as possible. He said, however, he didn't expect the meeting before July 25 when W. D. Watkins, chairman of the board, is scheduled back from vacation. In a secret session Saturday board members refused to renew the contracts of Dr. Byron Abernethy and Dr. Herbert Greenberg. Both have expressed liberal political and social views. The job of Dr. Fer Stensland was abolished, which will have the effect of discharging him unless he is given another assignment. "I feel that Dr. Abernethy and Dr. Greenberg should be accorded a hearing by the Texas Tech Board of Directors," Dr. Jones told the faculty. "The granting of such a hearing would, as I see it, be in keeping with their professional and constitutional rights."

Gov. Daniel said he thought it was a mistake for the board to have taken its action in a secret session. The Sam Houston State unit of the Texas Assn. of College Teachers wired, "We urge that action be taken to rectify the abominable situation." One Tech board member, Tom Lineberry of Kermit, defended the action, however. He said the college administration and some of the faculty lacked what he called "respect for constituted authority." Some 300 Tech faculty members attended the meeting. Observers said that was about the total membership for the summer session. Dr. Sterling Fuller, chairman of the Faculty Advisory Committee, said, "I am convinced that reasonable men of good will, when fully apprised of the situation, will make the right decision. We are going to work this afternoon with that conviction in mind." Dr. Earle Hamilton of the foreign language department introduced a resolution which called the action "manifestly unjust." It said "dismissal without charges and without hearing tends to discourage freedom of thought and to create in the minds of every staff member a feeling of insecurity which will destroy faculty morale."

The resolution also predicted that such action will cause dissatisfaction in the student body, loss of respect among educational institutions throughout the United States, make it more difficult to recruit and retain competent faculty members and possibly affect the college's accreditation. The resolution added "it is the belief of the faculty that when these facts are called to the attention of the Tech Board of Directors it will wish to reconsider its action at the earliest moment in an open meeting." J. Everett Haley of Canyon, conservative, segregationist and unsuccessful candidate for the gubernatorial nomination last year, said the men's contracts were not renewed because they did not measure up to standards. The board member said the adult education department, headed by Dr. Stensland, was abolished because the money could be better used in other ways. Dr. Jones and Greenberg and Abernethy denied their work did not measure up. Dr. Jones said he would have defended the adult education program if he had been given the opportunity.

Dulles Goes To Bat For Foreign Aid

WASHINGTON (AP)—Secretary of State Dulles told Congress today sharp cuts in foreign aid would bring "greater draft calls" and threaten the prospects for a disarmament agreement. "If we start disarming our Allies, we shall get no disarmament agreement," Dulles said in a prepared statement made public by the Senate appropriations committee. "We shall find ourselves again in the position which has too often characterized the past where we were so lacking in power that hostile forces felt they could discount our role in the world."

Found Hanged

ABILENE, Tex. (AP)—J. L. Chapman, 32, was found hanged last night from a tree in the yard of a home where he roomed.

Drought Stunts Tobacco

While the Midwest is ravaged by torrential rains and floods, Maryland and Virginia farmers are suffering from drought conditions. John A. Miller sifts a handful of dust-dry soil through his hand as he squats in his stunted tobacco field at Clinton, Md. The crop is only half as high as it should be. Aridity is nearing a 27 year record.

Scouts Will Long Remember Scenes Of Intimate Episodes

By RUSSELL LANDSTROM VALLEY FOGRE, Pa. — What a maker of memories is this fourth National Boy Scout Jamboree! Long after the speeches and the panoramic scenes have blurred, the boys will remember with poignant clarity the warm, intimate episodes, the glints and gleams of comedy, the sudden and grateful expansion of casual acquaintance into friendship that endures beyond the encampment. On a broad canvas, Jamboree City will be memorable as perhaps the only community of some 51,000 persons in which no one feels the need for happiness pills. The happiness is built right in. Getting down to vignettes: Can't you imagine Jack Davis, 17-year-old Scout from South Web-

ster, Ohio, telling his grandchildren, in the far future, of how he almost kept a puppy in camp. Jack got a pup named Venus in a trade. Then the health and sanitation supervisors found out, and because certain kinds of pets are not allowed, Jack was told he'd better do an outside swap for something socially acceptable here. But Jack already was too fond of his pup for that. He telephoned his parents, asking if he might ship home a favorite bit of barter. They said yes. They'll probably be surprised, as Jack didn't say what he was sending. Texans seldom get their come-uppance but there's an instance of it on record here now. Some of the boys from the Lone Star State smuggled fireworks in-

Reunited

Mrs. Monica Bozyk hugs her daughter, Olga, 12, as they arrived at Idlewild Airport, N. Y., from Europe en route to their home in Rochester. They were recently reunited by court action initiated by Mrs. Bozyk in Poland. The girl had been left with a widowed woman in Poland in 1944 when Mrs. Bozyk and her husband, Walter, were sent to a labor camp by German occupation forces. The Polish widow, Mrs. Irene Ostrowski, contested the custody action but lost.

Plan Closer Look At Military Cut

WASHINGTON (AP)—Three members of the Senate Armed Services Committee said today they want to take a closer look at a Pentagon order for a 100,000-man reduction in the armed forces authorized strength of 2,800,000. But two members of the House Appropriations Committee—Chairman Cannon (D-Mo) and Rep. Mahon (D-Tex)—generally approved the reduction. Secretary of Defense Wilson, acting with President Eisenhower's approval, announced the cut yesterday to be effective by the end of 1957. He said it would save about 200 million dollars "without materially affecting deployments of major combat units abroad, including those in Western Europe."

Sen. Jackson (D-Wash) said he agreed with Russell that the Armed Services Committee "should find out from the Department of Defense just what their long-range plan is." Russell said he believed "some limited reduction in our armed forces might be warranted." Cannon said: "There is no need for so much manpower and more reductions can be made. We fight nowadays with chemicals and machinery rather than in hand-to-hand combat." Mahon, chairman of the House Appropriations subcommittee which handles defense funds, called it "a good move that won't hurt defense."

Chairman Russell (D-Ga) of the Senate committee said he had not been informed in advance of the reduction plans. He said in an interview: "Our committee certainly will want to find out what these reductions will mean in the Air Force and its striking power." Sen. Francis Case (R-SD), another committee member, said he wants to know "how much of a reduction this means in our combat power." The Army was ordered to absorb half the cut, or 50,000, the Air Force 25,000, the Navy 15,000 and the Marine Corps 10,000. Congress previously had authorized a combined strength of 2,800,000 men and women in uniform during the 12 months that began July 1, but the latest defense tabulation showed 2,789,642 on May 31. That would hold the actual reduction to just under 90,000.

Ex-Boxer Sought In Costello Case

NEW YORK (AP)—Police are searching for Vincent Gigante, a former professional boxer, for questioning in the investigation of the attempted assassination of racketeer Frank Costello. Deputy Police Commissioner Walter Arm confirmed today that Gigante is sought, but he declined to tell why. Arm said the search for Gigante who has an arrest record is a matter of "routine investigation" of the case. Arm confirmed the search for Gigante when asked about a copyrighted story in today's New York Herald Tribune that detectives had been looking for the ex-boxer since shortly after the attempt on Costello's life May 2.

Not Even A Court Can Stop The Stork

ROCHESTER, N. Y. (AP)—Sean O'Connell, just two days old today, has proved to his father that the stork awaits neither man nor court calendar. Sean's father, Thomas W. O'Connell, had obtained a show-cause order from the State Supreme Court, in his fight to witness the birth of the child. A hearing on the order had been scheduled for today, but Sean's birth automatically canceled the suit. The court order required the hospital to show cause why O'Connell should not be allowed in the delivery room for the birth.

Held

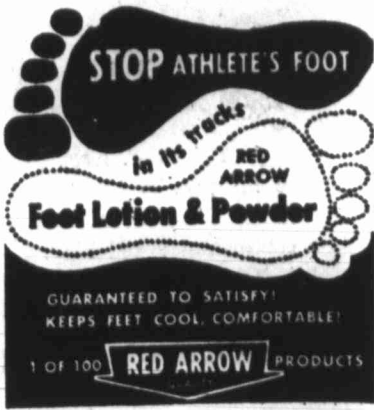

Edward J. Polakowski, 23, an elevator operator with theatrical ambitions, was arrested in connection with the slaying of James F. Malloy, 33, in New York City. Police said Polakowski admitted killing Malloy and jamming his body into a small trunk. The body was discovered in the trunk at an express office where it had been sent for shipment to California.

Boy's Body Found Atop High Peak

BRIDGEPORT, Calif. (AP)—The body of 2-year-old David Allen Scott was brought to this mountain community late yesterday after the youngster—dead of exposure and exhaustion—was found at the 8,500-foot level of Eagles Peak. The boy strayed Saturday from the Sierra campsite of his parents, Mr. and Mrs. Robert Scott of San Diego. The body, clad only in a T-shirt, red, white and blue socks and one shoe, was found among boulders on the steep slope. He had climbed an incredible 3,000 feet higher than the camp, losing his other little red canvas shoe and his brown play trousers along the way. Undersheriff Jack Gardner said the child apparently died Saturday night.

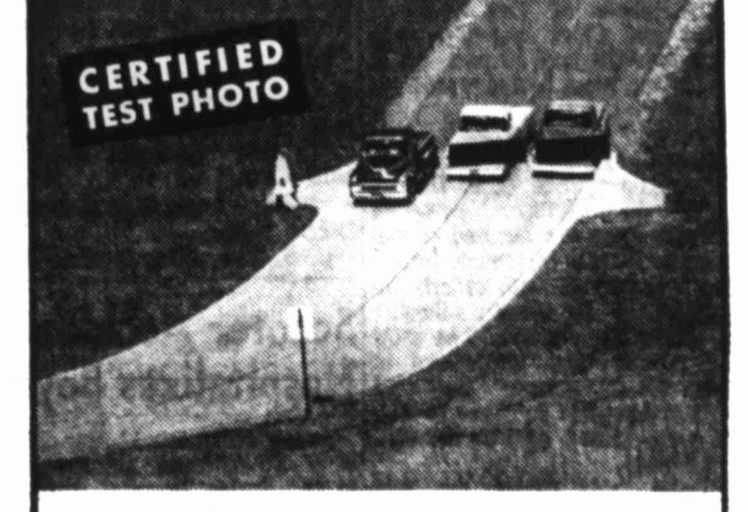

Negro Student Held In Riot Stabbing

DALLAS (AP)—A 19-year-old summer student at a Negro high school was arrested yesterday for the stabbing of three white men after a rock 'n' roll show at an auditorium Monday night. The youth, who was not charged immediately, was arrested while sleeping at his home. Officers said they found a pocket knife under his pillow. Det. W. C. Grinnell asserted he had four witnesses who said they saw the youth stab the trio. The youth, a golf caddy, admitted being at the show but denied the stabbing. Meanwhile, police were studying disturbances at the industrial area auditorium. In addition to the three knifing victims, two other teenagers, a boy and a girl, were hurt after the show given by Negro entertainers and attended by a mixed audience. Police Chief Carl Hanson said he was making a full study of the situation. March 25, some 25 persons fainted in the crush brought on by a departing first show audience and arriving overflow second show audience. The entertainers in March were Negroes, led by Fats Domino. The audience was mixed. One man was punched in a brief scuffle and a Negro was arrested. Maurice Beck, manager of special shows at the auditorium, said there was no trouble inside. "The fights apparently occurred across the street and after the show was over," he said. Police held two other Negro youths involved in a stabbing inci-

See actual road-test proof!
DODGE outperforms "other two" low-priced trucks!

They're off! All three low-priced trucks are lined up at the bottom of a test grade equal to the steepest hill in San Francisco. The flag drops, and this grueling test of climbing power is officially underway. Dodge takes an early lead.

Halfway up. The extra V-8 power under the hood of the Dodge sends it quickly ahead. It's already two lengths out front. And there's a 1000-lb. test load on each one of these comparably equipped trucks. What's more, Dodge is still gaining!

Dodge flashes past the finish five lengths ahead of competition. Truck "G" and truck "F" just couldn't match that 204-hp. Power Giant. And this is just one of a rugged series of tests that prove Dodge is best of the low-priced three.

Your Dodge truck dealer has proof that Dodge leads in many ways. Come in... see other certified test-photo sequences... and take a demonstration ride!

Private Eye Takes Blame For Botch

LOS ANGELES (AP)—Former private detective Barney Ruditsky says he is the one who crashed the wrong door in the botched raid aimed at Marilyn Monroe. "I'll take the fall for the whole thing. My only trouble was that I acted on bum information," he said. Ruditsky, 58, told newsmen he had admitted his participation in the raid before a country grand jury yesterday. The jury is currently investigating the November 1954 raid to determine if any laws had been broken. Singer Frank Sinatra and ex-baseball star Joe DiMaggio, Marilyn's former husband, did not join the actual raid, Ruditsky said. "DiMaggio was not even inside the apartment house and Sinatra was at least a block away," the detective told newsmen.

Brazos River Talk

Top leaders of the Brazos River Authority meet in a huddle in Austin as the public hearing on the six-dam project between Whitney and Possum Kingdom reservoirs got under way. Left to right are: Edward Adolphe of Houston, an Authority research consultant; H. S. Hilburn, president of the Brazos River Authority; J. V. Hammett of Lamaspass, secretary; and J. H. Fox of Hearne, vice president. The river authority says there are 21 major dams within the Brazos master plan that will cost 450 million dollars.

Brazos River Authority Lacks Support Of Private Utilities

AUSTIN — Brazos River Authority directors today still lacked vital support of private utilities for their proposed 181 million dollar six-dam project.

Representatives of the state's biggest utilities minced no words yesterday in throwing into the open their determined opposition to the plan to build dams between Possum Kingdom and Whitney dams.

BRA directors, at the suggestion of Gov. Daniel, called a public hearing to get on record the opposition of industry and agriculture alike, especially from the southern reaches of the river. Backers of the plan praised the program.

The director tossed out two compromise agreements which got little attention. Both were adopted by the board earlier in a closed session.

One would recognize all present water rights and would fix a percentage of the added conservation water especially assigned to users on the lower reaches. This percentage and price would be determined later and if so agreed would require the South Texas users to drop their opposition.

The other compromise would urge present legislation be amended so that before Possum Kingdom Dam was raised, development of South Bend Dam near South Bend would be started for flood control.

Graham City officials said the proposed raising of the dam by 15 feet would flood thousands of acres near the city.

"You will never see the day you can go your separate ways as you are today and accomplish anything in the Brazos River," declared J. V. Hammett of Lamaspass, secretary of BRA.

Hammett urged all interests get together as soon as possible and iron out a program so water conservation and flood control could be expanded.

Proponents labeled it "economically feasible" and "self liquidating" while opponents said it "would never pay its self out."

Sale of hydroelectric power and water would pay for building the dams, backers of the plan said.

Here were the points in opposition taken by almost three dozen representatives of industry, rice growers, private power and cities who opposed the project:

1. Hydroelectric pumpback dams are contrary to flood control as such dams must be kept full, thereby causing flood hazards.
2. The BRA has no sale or commitment for selling the power produced because in order to pay operating costs and a small margin on the loans the price would have to be about double what the same power could be produced for by private companies.
3. The proposal would make only slightly more water available while a different program of dams below Whitney would produce more available water.
4. Evaporation would take 200,000 acre feet of water a year and would increase the salt content.
5. The project would flood more than 60,000 acres of land between Whitney and Possum Kingdom.
6. The cost of water to downstream irrigators would be raised.

MIDLAND — Robert Mayfield, 15, who told officers "It doesn't bother me that I killed a man," was re-committed to a reformatory until he is 17.

Then his case will be put before a Midland grand jury. The boy was arrested in the death of Joe Hamilton, 58, unemployed Midland house painter.

The youth shot Hamilton, who had only four cents in his pocket, while trying to rob him at a warehouse where the victim was sleeping.

"I told him to give me his money and he kept saying he didn't have any. I finally got mad and shot him," the boy said.

Midland Youth To Reformatory

Deal Reported To Give Arms To Syrians

CAIRO — A three-country deal is reported under way to provide Syria with more arms from Communist Czechoslovakia.

Syrian desire for new and improved weapons has been spurred by the recent flareup of shooting along its border with Israel.

Arab diplomatic informants said the arms plan calls for Syria to export wheat to Egypt for some of Egypt's cotton credits in Czechoslovakia. Syria would use the cotton credits to buy more Czech arms.

Syrian Defense Minister Khaled el Azem, who has been in Italy for medical treatment, was reported en route to Prague and Moscow to close the deal.

The informants said Egypt has bought more Soviet-bloc arms in the past 18 months than it can assimilate but still has large Czech credits from a cotton agreement made in 1955. Cairo newspapers reported recently that Egypt had opened an initial credit for Syria of nearly three million dollars in Czechoslovakia.

At U.N. headquarters in New York, officials announced that U.N. lookout posts have been established on the Israeli side of the Israeli-Syrian border.

The officials said the action was taken at Israel's request after the series of border clashes, chief of them 10-hour exchange of fire a week ago.

Israeli sources said the request stipulated that the posts be maintained for one month, but U.N. spokesmen said the four or five posts set up would be used as long as necessary.

Reports from Jerusalem said the U.N. truce organization on the border region had been reinforced and is maintaining a 24-hour watch.

Audit Of County Records Starts

A team of seven auditors from the offices of Jones, Hays and Freeze, certified public accountants of San Angelo, is in the Howard County courthouse making an audit of all records and books of the county offices.

This is in accord with an established practice of the county. The San Angelo firm of Jones, Hays and Freeze has made the annual audit of this county for three years.

There was no estimate on how long it would take the team to complete its work. The group was divided into several smaller groups and work was under way on the records of a number of offices simultaneously.

Released On Bond

Ruby Williams Froman, charged with DWI on Monday night, has been released from the county jail. She posted \$500 bond for her appearance in county court.

Graham Once More Fills Up 'Garden'

NEW YORK — Billy Graham told a capacity audience of 19,200 at Madison Square Garden last night that he — like anyone else — cannot bring about his own salvation.

"Jesus Christ is the savior," the evangelist said. "God by His mercy and death on the cross has saved us — if you'll let him."

The filled arena, bringing total attendance of Graham's New York crusade to 1,055,200, forced Garden attendants to deny admission to another 2,500 persons waiting outside. Graham spoke a few words to the assembly prior to his sermon.

At Graham's call, 530 persons came forward to make "decisions for Christ," bringing the over-all total of such decisions to 33,122. One elderly man fainted as he walked to make a "decision," and was revived by a doctor and crusade attendants.

Graham announced that the crusade executive committee would meet Friday to decide whether to extend the revival past its scheduled closing date on Saturday. No decision was made at yesterday's committee meeting, the evangelist reported. He said the committee would "pray for divine guidance" before reaching a final decision.

Since the crusade started May 15, Graham said, "the spirit of

God is moving like a river in this city. It's not me, Billy Graham. It's Jesus Christ."

Graham chose Mark 10:46 as his text. It related to a blind beggar, Bartimaeus, who had his sight restored after declaring absolute faith in Jesus Christ.

Man has two sets of eyes, spiritual and visual, the evangelist said. People who do not declare themselves for God are "as blind as that man in the Bible," he said.

He said mankind is often blinded to worldly pursuits such as fame and fortune. Hollywood was cited as an example. He described it as "a rat race of the most miserable people on earth."

Graham said the Devil had blinded mankind's eyes to God. "Christ can open your eyes—if you'll let him come to you," he said.

'Klan' Notes Sent To British Officials

LONDON — Threatening letters signed "Ku Klux Klan"—apparently from Texas—have been sent to a labor leader member of Parliament and several trade union leaders.

Scotland Yard said yesterday it was looking into the letters.

Maurice Orbach of the House of Commons said all the letters bore Waco, Tex., postmarks. He said one was countersigned "Horace Sherman Miller, Texas Branch."

The British lawmaker said "The letter was sent to my home and warned me to 'lay off' denunciations of alleged racial discrimination in industry." "I am not the least worried about the letter. It does not frighten me," he said.

"He said his letter threatened violence in vague terms.

Bids Accepted On Scurry Airport Job

SNYDER—Low bids for construction of a new runway and lighting at the Scurry County airport have been accepted by the commissioners court, subject to CAA approval.

Brown & Root Construction Company of Houston was low with a bid of \$115,979 for the east-west runway paving. Boss Electric Company of Snyder was low bidder for the cable and runway lights with a proposal of \$9,383.

The CAA had set aside \$92,000 in matching funds for the work and therefore must give final approval to the contracts. The federal funds will be forthcoming if construction is begun prior to Aug. 3.

Take any grade...any road...
in stride...with safety...

A Bible Thought For Today

And Moses made a serpent of brass, and put it upon a pole; and it came to pass, that if a serpent had bitten any man, when he beheld the serpent of brass, he lived. (Numbers 21:9)

Scouts Stage A Wholesome Show

There is an annual phenomenon under the American skies, and it is called the Boy Scout Jamboree at Valley Forge, Pa. which has been producing a lot of wholesome news recently. Between 50,000 and 55,000 boys from all parts of the country, representing all segments of our heterogeneous population, have been having the time of their lives at the Jamboree. One paper remarked that this shows how many juveniles aren't delinquent. An Army veteran said he never saw the military do a better job of running a camp. Everything was spotlessly clean. There was no waste paper blowing around, no unkempt premises, no disorder. The boys did their own cooking and dishwashing, though "dishwashing" should be in quotes, since the camp was expected to use up around 10 million paper dishes.

Another fool for figures estimated it would require the combined output of 7,448 cows to supply all the milk these hearty young Americans made away with, and it would take a gourmet 1,532 steers to eat his way through the varied menus served around the cookshacks. If stretched end to end, the frankfurters consumed would reach 20 miles. On the final menu at Jamboree's end, July 18, will be sirlon steaks. In producing enough steaks to go around, 1,330 steers were butchered. The planning of this phase of the encampment began last April. Some of the reporters covering the Jamboree were inclined to think of scoutmasters as a bunch of old fust-buckets with nothing better to do, but a few hours taking in the sights at Valley Forge changed their minds quickly enough. Following this event at Valley Forge, world scouting will hold its international blow-out in England, to observe the 100th anniversary of their founder's birthday, Sir Robert Baden-Powell. Opening date is August 1, and practically every civilized country in the world will be represented. Scouting itself is only 49 years old — founded 1908.

The 'Dragon' Of DeKalb

The country folks of Marshall County, in north Alabama, are a right smart exercised by rumors of a monster in the form of a snake that several people claim to have seen. Farmer Dan Langston of Kilpatrick blames the disappearance of three cows and the death of a fourth on the reptile. He said the dead cow had evidently been encircled and squeezed to death. "Folks in adjoining DeKalb County got wind that the 'monster' had abandoned Marshall County and invaded DeKalb, so they organized a posse armed with guns, ropes and 'to-o-n-g' sticks to search for the critter. But Brother Langston stopped them at his property line; said he didn't want anybody to get hurt. "Law officers scoff at the whole thing. They say no snake of the constrictor type has escaped from any circus or zoo anywhere near Marshall County. Those who claim to have seen the thing claim it is 20 to 30 feet long and as large around as a telephone pole.

Well, as one dispatch points out, it may just be the heat, but you'd have a hard time convincing those who have "seen" the snake that the weather had anything to do with it. The Fort Worth - Dallas area twittered for several days not too long ago over a snake story, but that one was real enough. The snake had escaped from a zoo and was eventually rounded up. Earlier Oklahoma City had its leopard scare, and sooner or later nearly every community it titillated by the strange and the bizarre. We remember that these scare yarns were much more common fifty and sixty years ago than now. People didn't have much to entertain themselves with in those days, and anything of a hair-raising nature was welcome. Nowadays they have TV, radio and riots on the baseball diamond.

Marquis Childs

Civil Rights In The National Capital

By THOMAS L. STOKES (Writing for Marquis Childs, who is on vacation) WASHINGTON—Once again, this time as a sort of sideshow to the big civil rights battle in the Senate, we are watching the annual skirmish to give full civil rights to several hundred thousand permanent residents, taxpayers and home-owners in their own national capital. The capital of the United States is the only place in the great democracy we hold up to the rest of the world where people don't enjoy democracy. It is the only place where citizens are denied the right to vote, except for such denial to Negroes in some Southern states which the Eisenhower Administration civil rights bill is supposed to correct. We can't vote for local officials, for representatives in Congress, or for President of the United States. We just can't vote, period. It was not always so. When the national capital was moved here in 1800 from Philadelphia, local self-government was instituted, first with a mayor appointed by the President and an elected city council, and from 1830 on with an elected mayor and an elected city council until 1871, when Congress abolished local self-government. The futile efforts in the 86 years since to restore democracy to the national capital provoked one sage here to raise the question whether, if our people had it to do over again, they would choose democracy as the form of government for our nation—so unresponsive have Congress and our people been to attempts to re-establish democratic government in the capital. Now, if you can believe it, the Eisenhower Administration offers as its civil rights formula for the national capital a territorial government with a governor and a lieutenant governor appointed by the President, an elective legislative assembly over whose acts the President would have a veto, and a non-voting delegate in the House of Representatives!

That instead of an elective mayor and council, as we had up to 86 years ago and as is proposed in pending bills. The Eisenhower proposal harks back to the crown colonies of the pre-Revolutionary era, with a governor appointed by the king and the royal right of veto over the local assembly. It harks back, too, to a later era when we had a territorial government here, 1871-1874, almost exactly as proposed now, a governor and council appointed by the President, an elected assembly, and a delegate to Congress. That three-year experiment gave way to the government we now have, with three commissioners appointed by the President and with Congress, in which we have no voice, acting as city council and levying taxes. Any way you look at it, we've been thrown for a loss. We haven't had any territories in the continental United States since New Mexico and Arizona were admitted as states in 1912. Beyond the continental limits we now have Hawaii and Alaska, which are still trying to become states after half a century and a century, respectively, of being territories. Maybe if we became a territory again, as 86 years ago, we could become a state in 50 or 75 years. That's an idea. Amusing was President Eisenhower's injunction to a delegation that called on him in the interest of home rule here. He suggested that they needed "more good arguments" for self-government and franchise. Most of us are under the impression that all that is required in the United States is our Constitution and American citizens, in which there are several hundred thousands living in the District of Columbia. The President also suggested stirring up "grass roots" support to prod members of Congress. That's been tried. Aside from finding that most people can't believe it when you tell them we can't vote here—don't care particularly anyhow—it was discovered that the trouble is right here and no amount of grass-roots pressure would help. The trouble is in the District of Columbia Committee in the House of Representatives which for years was quietly pigeonholed home-rule bills passed by the Senate. How is that managed? Well, chairman John L. McMillan of Florence, S. C., has a "packed" committee of its 14 Democratic members, 10 are from the South. All McMillan has to do is to make a deal with three Republicans, which is easy enough, and the bill is interred. The Southern members do not want Negroes to vote here. It is as simple as that. So you—see how civil rights in the national capital is a sideshow of the big show in the main tent of the Senate. (Copyright, 1957, by United Feature Syndicate, Inc.)

On The Job Training

DETROIT—Robert Ford, 34, of Detroit, wants to go back to prison to continue his education. Police found him sitting on the curb in front of a smashed window of a photography shop holding a camera he admitted taking from the window display. "I want to go to prison and learn a trade so I can get a job," police quoted him as saying. "I did this before in Chicago but I didn't learn enough. I need to go back to prison."

Civil Rights Bill On Crutches

WASHINGTON—President Eisenhower's civil rights bill starts out on crutches. Southern Democrats already have done it damage and thus have won part of their fight against it. The bill is supported by a wide variety of civil rights groups and by many non-Southern senators. For more than a week they argued against even letting the bill come up for consideration. They were outvoted on that yesterday. Now the real fight begins, for today the bill itself is before the Senate where it can be amended. Eisenhower backed the bill again after the vote, asking that it be passed without major changes. A small number of the bill's supporters — like Senators Douglas (D-Ill), Javits (R-NY), Potter (R-Mich), McNamara (D-Mich) — oppose compromise. But Sen. Gore, Tennessee Democrat who broke with his fellow Southerners at least temporarily by voting last night to bring up the bill for debate, has said: "I don't think there are 10 senators left who want the bill as it stands." He's been talking with some of his colleagues about drafting a complete substitute. And last night immediately after the vote to bring up the bill, Sen. Anderson (D-NM) offered an amendment to knock out the bill's No. 3 section. Of the four sections in the bill it's No. 3 which has annoyed the Southernmost. Under No. 3 the attorney general could move in against a wide variety of civil rights violations, not just cases involving voting rights. And Anderson's fellow Democrat from New Mexico, Sen. Chavez, is against part of Section No. 4 of the bill. Under this an individual who disobeyed a judge's order to stop interfering with a Negro's voting efforts could be tried by the judge himself, and jailed for contempt, without jury trial. There is no jury trial requirement, either, for violations under Section 3. Southerners make big thunder over this too. They argue there must be a jury trial. Chavez supports that. He has taken no part in the squabble so far but says he will not vote for any bill that lacks a jury trial provision.

Fountain Of Youth

NEW YORK—One of the great goals of science today is to make man live longer. Some people even entertain the fond hope a way will be found to permit them to clutter up the world forever. Rare indeed does a scientist such as Enrico Greppi of Italy arise to sound a note of caution to these would-be seekers after eternal life. Addressing an international convention in Rome on the problems of gerontology, Greppi said: "Old age is a fate we must accept. We gerontologists must be asked to bring along a theory on how to achieve new youth. It would be undignified and morally wrong." There is a great common sense in this observation. And to tell the truth, science, for all its victories in enabling man to live out his normal span, has done little really to extend that span. There may come a time when some magic pep pills will enable us to run a four-minute mile at the age of 100, suffer the pangs of a new-found puppy love at 150, and retain some kind of wheezy breath in us until we are 499. But inevitably, be it at 70 or at 570, the pep pills will wear out, and so will we. Then we shall die, as all before us have done, foolishly hoping for an impossible fountain of youth. Actually, when in our right senses, most of us calmly accept death as a fact of life and realize that after a fullness of years it comes as a releasing boon, not a punishment. But, for those who egotistically aspire to live forever, is there no answer? Why, of course there is. The trick is for them to live so that life seems like it is going to go on forever. After all, as we know, age and time are really only relative. We are as young as we feel. A moment or a day or a year can seem long or short, depending on how we feel.

... then what happened after you imagined you were robbing banks ... ?

Around The Rim

Water Saved Is Water Earned

"One of the greatest drains on our water supply is evaporation." Thus E. V. Spence, who is president of the Southwest Water Evaporation Research Council, sounds a note of preparation for "the next drought — which is sure to come." For two years the council has been conducting intensive studies of how to control evaporation. Some of the findings are quite encouraging — in the field as well as in the laboratory. "Texas loses through evaporation nearly as much water as they use," he observed, and added a line which would be more nearly applicable to this area that "in some sections the loss is as much as 10 vertical feet (of water) a year." Spence wasn't just talking through his hat to further the council's appeal for funds to continue the study. Records at the U.S. Experiment Farm in Big Spring show that during the period of 1915-1947, the average annual evaporation for the six summer or growing months was 54.8 inches, or better than 4 1/2 feet. Average rainfall for the same period is 10.79 inches. If runoff from the rain yielded 300 acre feet per section during the period and it were concentrated in a reservoir of 30 acres in area and 10 feet deep, 135 acre feet would be lost to evaporation during the hot season. If the runoff spread over 60 acres at a depth of five feet almost all of it would evaporate by the end of six months. Now what if that evaporative loss could be cut? Tests at the research laboratory in San Antonio showed a reduction of loss up to 45 per cent. Out in the field, even with waves and other problems, the loss was cut by 18 per cent. When water is heated, the molecules begin to move and ultimately so fast that they leave in the form of vapor. The problem is to put a sack or cover over them so the rate of departure will be slowed. This is where hexadecanol comes into the picture. This waxy substance, used as a base for cosmetics, spreads on the surface of a pond or lake to a thickness of one ten-millionth of an inch. This so thin that a teaspoon of the substance will blanket an area the size of a football field, yet it is thick enough to retard evaporation. This same amount theoretically could save 200 gallons of water a year. Fish and plants are not affected by it, and when waves or other forces break the film it tends to reform. So far the biggest bugaboo has been micro-organisms which have found the hexadecanol to be a tasty treat, hence a lot of research is being done on ways to give hungry bacteria a bellyache if they nibble the film. It looks like old blue stone (copper sulfate) may do the trick. Scores of forward-seeing businessmen, associations and cities have contributed to the funds for research, and in time they could reap handsome rewards. Right now they can reap the benefits of a film that tends to reform. Take It Easy

Actress Viveca Lindfors feels that when a person is relaxed her whole nervous system and state of health is different. Viveca, who has appeared on numerous television plays in the United States, meets Lydia Lane in Paris. She keeps in good physical condition, she says, by attending a "de-flabby" class.

HOLLYWOOD BEAUTY

Relaxation Important To Health And Beauty

By LYDIA LANE

PARIS, France — When Viveca Lindfors was in Hollywood rehearsing a "Playhouse 90" at CBS, I went over to the studio to see her. But her schedule was so tight we didn't have time to visit. So I was delighted to find that we are staying at the same Paris hotel. Miss Lindfors is making a movie near here.

"Hedy Lamarr thinks you have one of the most beautiful faces on the screen," I told her when we met.

"She said that about me?" Viveca exclaimed. I am no beauty! And I have never spent much time on my appearance.

"I don't really place much value on first impressions," she continued in her charming manner. "I feel that I am more important than how I look. It takes time to get to know me."

Like all the world's capitals, there is an acceleration in Paris, but I found Viveca remarkably relaxed.

"I am a relaxed person," she admitted when I mentioned this to her. "I feel haste makes waste, and I hate waste in any form."

"Waste is what keeps people used up. It is the cause of frustrations and divorces. When you are relaxed, your whole nervous system and state of health is different."

tem and state of health is different.

"As a rule people don't take care of their bodies. The United States is a prosperous country, and people spend enormous amounts of money on sweets and snacks. I can see with my own children how they take for granted things like ice cream which were a special treat for me when I was their age."

"Discipline seems out of fashion today, but I am in favor of more of it."

Viveca told me that one of the things which keeps her in good condition is a "de-flabby" class she attends. "It is more interesting than a gym class but gives the same results," she explained.

"We have a workout not unlike modern dancing that stimulates the circulation. Once you get your blood warmed up, it does the good work," she said.

"I really believe exercise is important, and when I can't get to my class I do the work at home."

Viveca mentioned that most people take much better care of their cars than they do of their bodies. "I drink a lot of vegetable juices. This is a wonderful way to get vitamins and minerals we might otherwise miss."

"If you want to be peppy, to look and feel well," she said as we finished lunch, "you have to supervise the fuel you are putting into your body."

FEEL BETTER RELAXED You can feel better through relaxation. Simple little exercises can make so much difference in your every day happiness and health. Here are two leaflets which will help you enjoy life better. Order them by number.

M-19 Favorite Relaxing Exercises of the Stars
M-38 Routine for Releasing Nervous Tension
Send 5 cents for EACH leaflet ordered and a SELF-ADDRESSED, STAMPED envelope to Lydia Lane, Hollywood Beauty, in care of The Big Spring Herald.

Gage Lloyds Again Are Grandparents

Dr and Mrs. R. Gage Lloyd are grandparents again. They received word of the birth of a second daughter to Mr. and Mrs. W. W. Harrell Jr., Morristown, Tenn., Tuesday at 9:15 p.m. The baby, weighing 7 pounds and 6 ounces, has been named Gage Harrell. Mrs. Harrell is the former Rebekah Lloyd, and Walter Harrell once was stationed at the base here. Their other daughter is named Laura. Dr. Lloyd, First Presbyterian pastor, and Mrs. Lloyd are making a trip to Morristown around Aug. 1.

Presbyterian Circle Has Luncheon Meet

A covered dish luncheon entertained members of the Ida Mae Moffett Circle of the St. Paul Presbyterian Church Tuesday. Hostess for the church was Mrs. Rubie McNew. The Bible study was presented by Mrs. C. F. Brown. Her subject was "Sickness and Health." "Christian Citizenship" was discussed by the group. Mrs. D. T. Evans dismissed the seven members with prayer. The next meeting will be a picnic supper at the home of Mrs. Evans on Aug. 13.

Side-Buttoner

A joy to wear and care for is this neat sundress that buttons down the left side. Two necklines and an optional pocket are provided for this charmer. No. 1482 is in sizes 12, 14, 16, 18, 20, 40, 42. Size 14, 34 bust, 3 1/2 yards of 35 or 39-inch. Send 35 in coins for this pattern to IRIS LANE, Big Spring Herald, Box 438, Midtown Station, New York 18, N. Y. Home Sewing for '57—a completely new and different pattern book for every home sewer. Send 25 cents now for this all-season sewing manual.

Baptist Temple WMU Has Program On Peninsula Of Malaya Tuesday

In typical Malayan fashion, the program "The Peninsula of Malaya" was presented Tuesday for the Baptist Temple WMU. The Horace Buddin Circle of the church was in charge of the program. When guests arrived they were registered and then shown around the room where articles and facts of Malaya were displayed.

The stage was set as a village in Malaya with Mrs. Tom Buckner, chairman of the circle, portraying a visitor from the U. S. Acting as Malayan women were Mrs. Neal Bryant, Mrs. Jesse Smith, Mrs. Victor Crowell, Mrs. Loraine Sims, Mrs. Bob Leeper, Mrs. Richard Grimes, and Mrs. N. W. Derryberry.

The women were dressed in typical Malayan costume and the scene was staged against a backdrop of bamboo.

Mrs. Buckner asked the various questions of the women who answered with the following parts: "The Land and the People," "Malaya's Religion," "Baptists Entering," "We Preach to the Chinese," "National Workers," "We Heal and Teach," and "We Progress and Hope."

Mrs. Buckner gave the closing part of the program titled "The Future Is A Bright Hope." She then read a list of Baptist missionaries in Malaya. The devotion from Isa. 51:5 was presented by Mrs. Frank Strickland.

Prayers were offered by Mrs. Derryberry, Mrs. Buckner and Mrs. Peto Sheppard.

During the business meeting the WMU decided to have a workday July 30 at 9:30 a.m. at the church. At that time they will complete the quilts to be sent to the Indians in New Mexico.

The Evan Holmes Circle served refreshments.

Prayers were offered by Mrs. Derryberry, Mrs. Buckner and Mrs. Peto Sheppard.

Pre-Nuptial Shower Is Honor For Miss Shirley

Donna Shirley, bride-elect of Bob Newsum, was complimented Tuesday evening with a miscellaneous bridal shower given in the home of Mrs. Ira Myles.

The bride's table was covered with a white lace cloth over blue. The floral arrangement was of blue shasta daisies backed by white satin wedding rings and tied with wedding bells.

Serving was done by Nancy and Pennie Newsum, sisters of the future bridegroom, and Marjorie Henson.

Miss Shirley was dressed in a white eyelet sheath dress over blue. Her accessories were white and she wore a corsage of white carnations tied with blue satin streamers.

Other hostesses included Mrs. Gene Turner, Mrs. George Holden, Mrs. Jess Blair, Mrs. Lyman Greer, Mrs. O. O. Brown, Mrs. E. L. Redwine, Mrs. O. R. Smith, Mrs. Alton Allen, Mrs. H. J. Rogers, Mrs. Sherman Henson, Mrs. Rufus Davidson, Mrs. D. P. Day, Mrs. C. M. Harrell, Mrs. E. E. Ellison, Mrs. A. M. Wiggins, Mrs. Jewel Fields and Mrs. Lois Young.

Thirty-five guests called during the evening.

Miss Shirley and Newsum will repeat wedding vows July 26. She is the daughter of Mr. and Mrs. Foster L. Sherman and Newsum's parents are Mr. and Mrs. R. L. Newsum.

Twelve members and one new member, Mrs. Zack Gray, were present. Mrs. Wayne Bartlett dismissed the group with prayer.

Ackerly Group Has Educational Trip

ACKERLY — Five Ackerly boys and their sponsor, A. H. Smith, were among the 26 boys from Dawson County 4-H and FFA Clubs who spent last week on a trip of fun and education. They visited towns in North Texas and Eastern New Mexico. Those making the trip were Bryan Adams, Donald Gibson, Bobby Campbell, Jerry Batson and Royal Lewis.

Visiting with Mr. and Mrs. Jack Archer and Kaye have been her sister and family, Mr. and Mrs. Aubrey Ball of Aspermont.

Mrs. Donald Young and children of Midland visited her mother, Mrs. Frank McDonald, recently.

Garry Hall, a student at Hardin-Simmons University, spent the weekend with his mother, Mrs. Vestal Hall.

Horton Family Have Guests From Austin

ACKERLY — Mrs. Bob Fellows and three sons of Austin visited recently with Mr. and Mrs. Tommy Horton and Dana Ruth.

Guests with Mr. and Mrs. Clifton Grigg are Mr. and Mrs. Charlie Singleton of Sundown. The two couples have been fishing at Lake J. B. Thomas.

Mrs. Elmer Mashburn and daughter of Stanton were recent guests in Ackerly. Her mother, Mrs. Myrtle Sikes has returned from a visit in Dallas with her son, L. C. Sikes.

Mr. and Mrs. Tom Gregg, Dorothy Nell and Gloria Dawn Springfield were in Stanton Saturday to attend the wedding of Nida Baum. They also visited in Lenora with Mrs. Gregg's mother, Mrs. George Cathy.

Mrs. Ira Myles Is Visiting In Lubbock

ACKERLY — Mrs. Ira Myles left over the weekend to spend several days in Lubbock with her son and daughter-in-law, Mr. and Mrs. Jack Myles.

Recent visitors with Mr. and Mrs. J. C. Niblett have been her sister and husband, Mr. and Mrs. E. C. Mahoney, Lamesa, and Bobby and Townley and Lane Duncan, both of Lubbock.

Mrs. A. H. Smith underwent major surgery at Malone-Hogan Clinic Monday. Her daughter and family, Mr. and Mrs. Leon Williams and Linda of Lorenzo are here to be with Mrs. Smith.

Mr. and Mrs. J. L. Kidd Sr., attended funeral services for his brother, Frank Kidd, in Sweetwater.

Ackerly Folks Take Trips, Have Guests

ACKERLY — Mrs. Nora Oaks and Joyce returned to Hobbs, N.M., with Mr. and Mrs. Jimmie Oaks and family for a few days visit.

Mrs. Ed Crass, Midland, spent the weekend with her mother Mrs. Bob Mahon.

Mr. and Mrs. Don Floyd of Snyder were recent guests with her parents, Mr. and Mrs. Jim Womack.

Visiting with Mr. and Mrs. J. Archer are her nieces, Mrs. Paul Johnson and son of McGregor and Mr. and Mrs. Buster Walton of Abilene.

Mr. and Mrs. E. B. Baker of Seminole visited recently with their parents, Mr. and Mrs. Buck Baker.

Prayers were offered by Mrs. Derryberry, Mrs. Buckner and Mrs. Peto Sheppard.

During the business meeting the WMU decided to have a workday July 30 at 9:30 a.m. at the church. At that time they will complete the quilts to be sent to the Indians in New Mexico.

The Evan Holmes Circle served refreshments.

Prayers were offered by Mrs. Derryberry, Mrs. Buckner and Mrs. Peto Sheppard.

Walkers Back From Trip, Have Guests

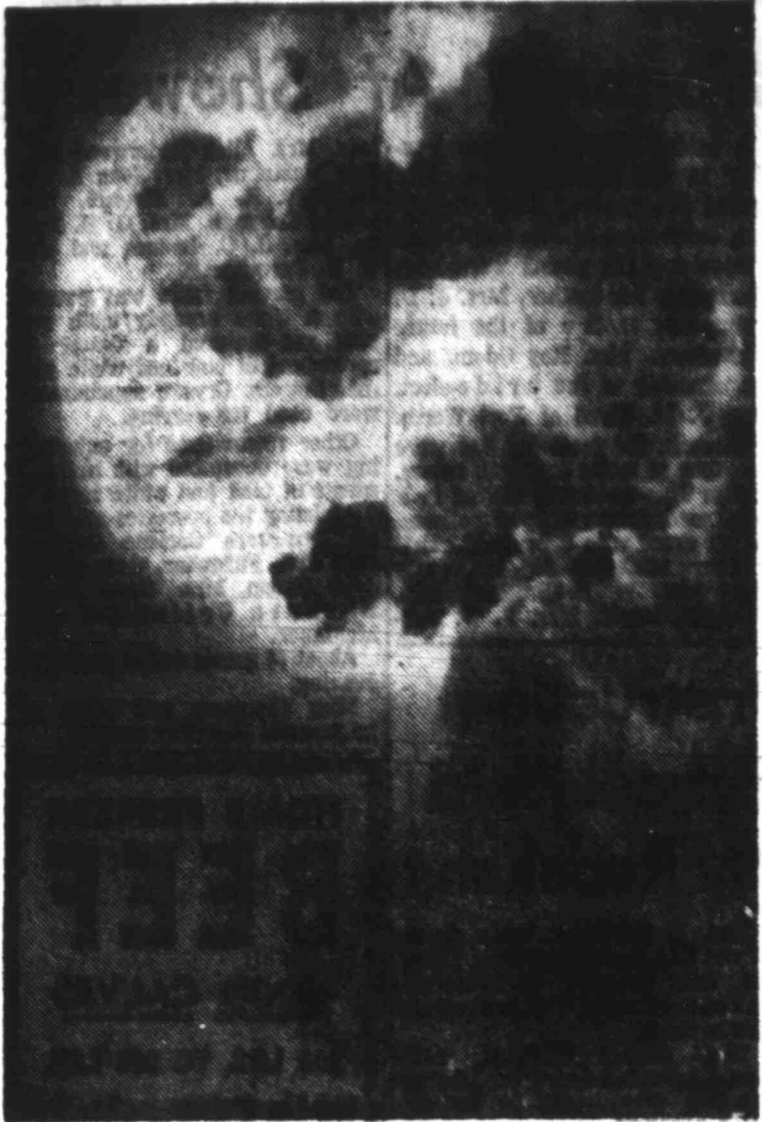

Mr. and Mrs. C. D. Walker of Forsan have returned home from a vacation trip to San Antonio, Goliad, Langtry and Fort Davis. They were accompanied on the trip by her parents, Mr. and Mrs. V. M. Fannin of Lees.

Recent guests with the S. B. Walkers and C. D. Walkers were the men's mother and step-father, Mr. and Mrs. R. A. Smith of Fresno, Calif.

Son Is Born

Mr. and Mrs. Don Dunbar, former residents of Big Spring, now of Hobbs, N.M., are the parents of a son, Donald Raymond Jr., born July 15 and weighing 7 pounds one ounce. Mrs. Dunbar is the former Rosetta Flowers. Her parents are Mr. and Mrs. O. L. Flowers, 1705 Aylford. Paternal grandparents are Mr. and Mrs. A. S. Smith of Midland.

'Brainstorm

'Diablo' Fireball

This is the fireball in a late stage following the detonation of the seventh nuclear device in the AEC's current series near Las Vegas. This was the device named 'Diablo' by the AEC which misfired on June 28 and was postponed several times for either technical reasons or because of weather conditions.

NUCLEAR AGE BEGAN

Blinding Flash 12 Years Ago Changed Future Irrevocably

By ALTON L. BIAKESLEE
AP Science Reporter

Soft dawn light stole over Alamogordo, tinting mountains sleeping unchanged for hundreds of years.

Then in sudden shocking fire and fury the mountains trembled, blazed under the brightest light seen on earth.

In that instant, man's future changed irrevocably.

For this was the dawn of the atomic age, 12 years ago Tuesday on the New Mexico desert. Man had set off his first atomic explosion. In that instant was born the new age of atomic power for war or peace.

Three weeks later more than 78,000 men, women and children died under the atom at Hiroshima. Three more days, and 39,000 perished at Nagasaki. Quickly, the bloodiest war in human history ended.

Today, this brief dozen years later, West and East stand armed with atomic weapons which could obliterate the world's cities and peoples.

Statesmen seek a path to disarmament. Ordinary folk hope these awesome weapons can mean an end to war. Awesome they are, A-bombs and H-bombs as vastly superior to that first Alamogordo explosion as a sleek modern car is to a horse and buggy. Atomic shells for cannon... warheads of atomic terror for rockets... missiles that span whole oceans.

FALLOUT WORRY
Radioactive fallout, the poisonous dust from bomb tests, worries and puzzles millions... housewives and scientists, butchers and diplomats. Is fallout dooming unborn generations, is it shortening or damaging our own lives? Nations seek an end to tests, all started with that secret explosion 12 years ago.

These are worrisome fruits from the power of the atom. But the atom also is being controlled to supply electricity and

power to build civilization and make life easier. Several dozen peacetime atomic power stations are being built or already operating around the world. The atom is coming to the rescue of nations—like Britain—already hungry for lack of cheap or enough coal and oil.

BETTER PRODUCTS
The atom is driving submarines, faster and farther than ever before possible. It soon will power airplanes and surface ships, some day trains too.

The atom is giving us new and better products. It has saved industry millions of dollars through tell-tale radioactive atoms made in atomic furnaces. Radioactive atoms are measuring engine wear, detecting leaks in oil pipe lines, inspecting welds and castings, doing dozens of new jobs.

Rays from radioactive atoms are combating cancer and other diseases, solving secrets of the

human body. Radioactive atoms are helping farmers, devising more efficient fertilizers, promising more disease-resistant plants.

For four years from Alamogordo, America enjoyed an atomic bomb monopoly.

Russia rudely shocked us awake with her first A-bomb test in 1949, raced us closely to achieve a super-weapon, the H-bomb.

In 12 years, the United States has detonated 72 A-bombs and H-bombs or devices. Russia at least 24 and likely more, Britain 10.

Russia scored with the first real power-producing atomic plant. Britain is counting heavily on power from the atom within a few years. We have more than a dozen civilian A-plants rising or planned. Other nations are tapping the atom for peaceful growth.

With natural fuels facing depletion, the atom is a main hope for the world's future.

Union Chief Freed Of Bribery Charge

PORTLAND, Ore. (AP)—The head of the Teamsters Union in Oregon was acquitted last night of a charge of conspiracy to accept a bribe while serving on a Portland city commission.

Clyde C. Crosby dropped his head on his chest when the verdict was announced, closed his eyes momentarily and then flashed a broad grin at the jury.

The State Circuit Court jury of seven women and five men deliberated 2 hours and 45 minutes before returning the unanimous verdict of not guilty. The jury took only one vote.

Thus ended the latest major trial stemming from Portland's lengthy vice investigation.

Crosby, the Teamsters' international representative in Oregon, had been charged with conspiring to place the site of an eight-million-dollar sports center here. The prosecution said Crosby and others conspired to obtain property options at the site.

The 42-year-old Crosby said he favored the Broadway-steel bridge site here. That was where, the state said, the options were obtained.

But the commission charged with selecting a site chose another location, only to have the Broadway area picked at a general election.

The prosecution told the jury in its closing argument that its entire case rested on the testimony of racketeer Big Jim Elkins.

Elkins had testified that Crosby was in on a plot to obtain options at the sports center site. Crosby denied the charge from the witness stand.

Found Dead

Miss Lucienne Colbrant, 27, an airline hostess, was found dead in a house trailer in Kansas City Police are holding Billy M. Sarlin, 32-year-old osteopathic student, for investigation.

Egypt Sends Jets To Saudi Arabia

CAIRO (AP)—Egypt has advanced her campaign to patch up differences with her Arab neighbors with word she is shipping jet planes to Saudi Arabia.

This was the first reference in weeks to the joint command the two countries set up more than a year ago. Under that pact Egypt was to ship Vampire jets and train Saudi pilots.

In the past few months Egypt's relations with Saudi Arabia, Lebanon and Jordan have been strained—partly as a result of the Eisenhower Doctrine.

Wins FFA Title

FORT WORTH (AP)—John Fuch, 16, of Wharton won the tractor operator title at the Future Farmers of America convention and will receive a new tractor today. The Texas FFA Convention opens today.

Hoffa Says Aide Not Hired As Spy

WASHINGTON (AP)—James R. Hoffa returns to the witness stand today to back up his story that he hired and paid John Cye Cheasty as a lawyer, not as a spy.

Hoffa, a Teamsters Union vice president is being tried on charges that he bribed Cheasty to get a job with the Senate Rackets Committee and feed its secrets to him.

Cheasty, the government's star witness in the case, already has testified he furnished Hoffa with information from committee files, but only after disclosing his identity and purpose to the committee and the FBI. He said he cooperated with both in events leading up to Hoffa's arrest.

Hoffa, taking the stand in his own defense yesterday, said he had never had any discussion either with Cheasty or with Hyman I. Fischbach about Cheasty's getting a job with the committee.

"Mr. Cheasty was to be co-counsel with Mr. Fischbach," Hoffa said.

Fischbach, a Miami attorney, was indicted jointly with Hoffa on the charge, but the government successfully moved for a mistrial in Fischbach's case last week when his attorney became ill.

Called as a defense witness, Fischbach refused to testify yesterday because he still is subject to a later trial.

Hoffa said he decided to hire Fischbach as a lawyer for the Teamsters because of Fischbach's past experience as an attorney for various congressional committees.

He said Fischbach brought Cheasty to see him in Detroit and suggested that Cheasty be hired as co-counsel. He quoted Fischbach as saying they had worked together in the past on lawsuits and would make a fine working team.

Hoffa said Cheasty suggested that he be paid a \$2,000 retainer, plus \$2,000 a month. He said he balked at this because he did not

Strange Female In The Bedroom

CARTHAGE, Tex., (AP)—Dr. and Mrs. Carl Gerardy awoke early yesterday and found a girl, 2, dressed only in panties in their bedroom.

The girl told them only that her parents were named "mommy and daddy."

She was put to bed and neighbors were called in vain.

The parents, who lived about two blocks away, Mr. and Mrs. Amby Simpson, missed the child at about 1:30 a.m. and notified police. They'd already been called by Dr. Gerardy and knew where to look.

Police thought the girl wandered off in her sleep.

Inventor Gets 3 Years For Keeping Woman Prisoner

LONDON (AP)—A 27-year-old inventor was sentenced to three years in jail today for keeping a girl imprisoned in a hole in the ground 3 1/2 months.

John Raymond Bridal was accused of forcing Marjorie Jordan from her bedroom, binding her mouth and hands and then carrying her on his motorcycle to the hole in the ground in back of his home.

Miss Jordan, 28, told police Bridal never tried to make love to her. All he did during those 3 1/2 months, she said, was either beat her or make her undress as punishment if she refused to follow his orders.

These orders, the court was told, were mainly to help him enlarge the hole in the ground so he could carry out some experiments on a new invention and to do his laundry.

Detective Inspector Leonard Herbert testified that the experiments involved a long piece of wire connecting circular metal discs buried in the earth.

Miss Jordan, who said she had never seen Bridal before he broke into her bedroom and took her away, was rescued by police after a neighbor found a note she had tossed over the fence.

76 Missing
MANILA (AP)—The government said today 76 persons were known dead and 300 missing in the flood that swept part of Pangasinan province in the wake of typhoon Wendy.

California styled shoes that will give you miles and miles of walking comfort... smooth leathers in whites and multi-colors. They flatter your feet... they fit so nicely, you'll feel perfect comfort the minute you slip them on.

Hold Tideland Conference

Attorneys general of five tideland states pause as they leave a session of a closed meeting at New Orleans at which they discussed other states joining Louisiana in a tideland dispute with the federal government.

Deputy Works Hard To Being A Heel, And Now He's A Hero

BUFFALO, N.Y. — Deputy Sheriff William A. Buyers had to work hard to become a "heel," but he became a hero almost overnight.

The alleged gang leader, Frank R. Coppola, 24, Niagara Falls, was convicted last week in the \$52,529 holdup of a branch bank here and was sentenced to 20 years.

At the request of the FBI, Buyers continued his part-time law studies at Canisius College, retained his full-time job as deputy sheriff, and worked his way into the gang and Coppola's confidence.

Hot, Dry Weather Aids Cotton Men, But Not Corn Growers

AUSTIN — The Department of Agriculture says cotton farmers are happy, but corn and grain sorghum growers are dissatisfied with the hot, dry weather.

High Plains growers started irrigating sorghums during the week. Early fields of rice were heading. Peanuts looked promising but needed rain.

Ample dry grass and browsing was available for livestock in most areas except the Trans-Pecos and scattered western localities.

Electronics Expert Blames TV Set For Electrocuting

CHICAGO — A portable television set involved in the electrocution of a 6-year-old boy has been termed deadly by an authority on electricity.

Gross and other experts prior to the convening of a jury in two weeks to probe the circumstances of the electrocution of Howard Erenstein Jr.

Weatherman Is Dry-Eyed

The weatherman in Texas appeared to have forgotten Wednesday that this was the year the drought broke.

General Electric called the electrocution an "unfortunate incident and promised a thorough investigation. GE also said: "The factory stated all sets are listed by Underwriter Laboratories as complying with standards of safety.

Bulgaria Launches Satellite Shakeup

VIENNA — Satellite Bulgaria's press and radio today launched a campaign of denunciation against three top Communists expelled from party posts in the latest Soviet bloc purge.

Sofia charged the three with "systematic opposition against the policy of the party and its political unity." The Kremlin used much the same words to denounce V. M. Molotov, Georgi Malenkov, L. M. Kaganovich and their associates who lost out for opposing Nikita Khrushchev's policies.

Fewer T-Men Make Reports

A drop in the number of T-Men who reported traffic violations naturally brought a drop in the amount of traffic violations observed during June, according to the Citizens' Traffic Commission.

It was expected that Tsankov, who is also chairman of the State Planning Commission, would be made the scapegoat for the economic distress.

Thumper Showing Youngsters How To Hit

By The Associated Press
 You have to figure Thumper Ted Williams as the biggest boner to the aged since Bernarr MacFadden celebrated his 84th birthday with a parachute jump.
 The Boston Red Sox slugger will be 39 next month, an old man in baseball, but he's giving the kids a fit in the American League, wrestling the home run lead from Mickey Mantle and closing within one point of the Mick in the batting bible.
 Williams has hit 26 home runs and is batting .360. Mantle, the 25-year-old New York Yankee cen-

ter fielder who last year became the first triple crown winner since Williams did it in 1947, has hit 24 home runs and is batting .361.
 The Thumper was at it again last night, belting his 26th homer in 90-degree heat at Kansas City to trigger a three-run ninth that beat the A's 4-3.
 Mantle complaining of feeling tired, was 0-for-3, but walked and scored the winning run in a 10-1, 10-inning victory at Detroit that padded the Yankees' lead to four games over Chicago. The White Sox were beaten 3-1 by Baltimore. Cleveland made it five in a row with a 9-3 job on Washington.
 In the National, Philadelphia held first place despite a 6-2 defeat by Milwaukee as Brooklyn beat second-place St. Louis 7-5. Cincinnati lost 6-1 at New York.

TEDE WILLIAMS

with Redleg slugger Frank Robinson suffering a concussion when beaned by Ruben Gomez.
 Pittsburgh's Pirates took two from Chicago, winning 5-4 on Frank Thomas' home run in the completion of a June 15 suspended game, and then taking a regulation game 5-3 as Thomas rapped a two-run double in a three-run seventh after Bob Rush had one-hit 'em 'til then.
 Williams was 1-for-3 last night and put Virgil Trucks, who had an eight-inning four hitler, on the ropes. A walk and Jackie Jensen's 12th homer followed to nail it. Ike Delock won it in relief, although tagged for Woody Leeds' second home run of the game in the ninth.
 The Yankees blew a 4-1 lead in the ninth before Tommy Byrne came on to end the Tiger rally

PLAYOFF WIN TOP THRILL

KANSAS CITY (AP)—"Beyond any doubt my greatest baseball thrill came in the 1948 American League playoff game when Cleveland beat Boston and earned the right to meet the Boston Braves in the World Series," says Lou Boudreau, Kansas City Manager.
 Boudreau played shortstop and managed the Cleveland Indians in 1948. In the playoff, the only one in American League history, he belted two home runs, two singles and drew a walk for a perfect day.

by striking out Charlie Maxwell. Byrne hit a three-run homer to cap the six-run 10th off loser Paul Foytack and Al Aber.
 Early Wynn, another 37-year-old took the major league strikeout lead at 117 with seven while winning his 12th by limiting Washington to eight hits. Vic Wertz drove in three Tribe runs with a home run and single.
 The Orioles won it on Billy Goodman's two-run homer in the eighth inning.
 Duke Snider's 20th home run, with a man on, triggered a four-run fifth that bagged it for the Braves, who scored twice in the fourth on Wally Moon's throwing error. Carl Erskine won it in relief of rookie Danny McDevitt.
 Daryl Spencer and Ed Bressoud drove in all the Giant runs, with Spencer hammering in four on a single and two homers. Willie Mays was 4-for-4 in the Giant at-

tack against loser Hal Jeffcoat and reliever Herch Freeman.
 The Braves pulled within a half game of the Phils, one point back of the Cardinals, as Warren Spahn won his 10th with a six-hitler. The Phils had the bases loaded in the ninth when Andy Patko made a diving snare of Richie Ashburn's sinking liner to end it.
 Hank Aaron's 29th homer came in the first with a man on against loser Harvey Maddix and the Braves' slugger reclaimed the NL bat lead at .348 with a 3-for-3 night while Cardinal Stan Musial fell to .343 with 1-for-4.

BIG LEAGUE LEADERS

By The Associated Press
NATIONAL LEAGUE
 BATTING (300 at bats)—Aaron, Milwaukee, .348; Musial, St. Louis, .343; Foytack, Pittsburgh, .339; Great, Pittsburgh, .337; Mays, New York, .317.

 HOME RUNS—Williams, Boston, 26; Mantle, New York, 25; Slivers, Washington, 20; Maxwell, Detroit, 18; Colavito, Cleveland, 17.

WALLY MOON

Two Texas League Teams Move Up

Two Texas League teams, Reed Oil and Local 826, advanced into the second round of play in the City Little League playoffs here Tuesday night.
 Reed Oil slammed the Owls, 10-2, while Local 826 accepted a forfeit from VFW. The Veterans failed to field a complete team. They picked up Howard Bain, an Owl regular, and proceeded to lose to the locals, 11-3, in a practice tilt.
 First round competition will be completed tonight. The Yanks try Cosden at 6 o'clock while Cabot Carbon opposes the Gold Sox at 8 p.m.
 Reed Oil and Local 826 will play each other Thursday evening at 8 o'clock.

LOOKING 'EM OVER

With Tommy Hart

Curtis Kelley, the former Alpine mentor who has been added to the local coaching staff, finally moved here last week.
 Six of the 1957 Big Spring High School gridlers have gone to work on the construction project at Furr's new super market here.
 Most of the athletes are staying busy this summer in vigorous out-of-doors work.
 That major league all-star baseball troupe, the one which tried to book a game here, is committed to appear in Lamesa Oct. 17.
 The agent for the team insists that Jim Bunning, mound standout of the recent all-star game at St. Louis; Al Kaline, Roy Slivers, Jim Lemon, Willard Nixon, Sherm Lollar and Clint Courtney will be with the team.
 Tom Eastland of the Odessa American reports that Hardin-Simmons and Oklahoma State University (formerly A&M) will definitely play football in Odessa the night of November 23.
 H-SU originally talked in terms of a \$10,000 guarantee but the Odessa Chamber of Commerce, sponsor of the game, didn't want the game in the first place and finally got the request reduced to \$7,500. H-SU officials insisted they had to have that much because that was the amount assured Oklahoma State to make the trip.
 The Athlete school gets 80 per cent of the net \$2,500 taken in. Odessa didn't want the game because (1) It's booked late in the year and the promoters are taking a chance, staging it at night, (2), it's felt such a game wouldn't draw under ordinary circumstances, (3), it comes on the night of the day high school teams of Odessa and Midland meet in Midland and evening after Jeter High has closed out its home schedule against Pecos.
 E. T. Wilkerson is due to assume the presidency of the National Little League here at the conclusion of the current season, succeeding W. S. Goodlet Jr., resigned.

Jodie Marek, who will be remembered here as a great relief hurler for the Big Spring pre-World War II WT-NM league teams, once scored ten points in the last 17 seconds of play as a footballer for Texas Tech back in 1938.
 In a game against New Mexico University, the Raiders apparently were doomed to a 7-7 tie but Jodie then booted a field goal from the New Mexico.
 Marek proceeded to kick out of bounds to the Lobos, who completed two passes before he intercepted and ran the ball back 80 yards to a touchdown. He then kicked the point to give the Raiders a 17-7 win and an invitation to the Cotton Bowl.
 After joining the Big Spring baseball club, Marek quickly identified himself as a tremendous clutch pitcher. He was summoned to duty in the eighth inning on successive days, facing bases-loaded situations on each occasion.
 He retired six men in a row in each game without allowing a run and saved both games for the locals.
 Later, the one-time Temple High School grid star went to the Cubs. Just a week ago he enjoyed a couple of successful seasons before quitting the game for good. The last I heard, Jodie was railroaded out of Temple.
 Jay Hill, a talented infielder for the Webb AFB baseball team, is due to ship out to Japan next month.
 Hill is one of the leading home run sluggers on the local club.

Skidding Cardinals Have Hutchinson Bewildered

By JOE REICHLER
BROOKLYN (AP)—What's happened to the St. Louis Cardinals? If anyone knows, kindly explain it to Fred Hutchinson, the team's bewildered manager.
 Just a week ago the Redbirds were flying high with five straight victories, which included a sweep of four games from Cincinnati, and appeared safely in first place in the National League with a fat three-game lead.
 Today the Redbirds were barely holding on to second, only half a game ahead of the fourth-place Brooklyn Dodgers and in grave danger of falling into the second division. They have lost five of their last six games.
 "How can you figure this game?" gloomily asked Hutchinson last night after the Cards had succumbed to the Dodgers 7-5.
 "The longer you're in it the more puzzling this game gets. It just a week ago we looked like world beaters. Everything was going great. The boys were hitting and fielding and running the bases like real champions. And the pitchers were keeping pace with the rest of the club.
 "But something happened to us in the East. We don't look like the same ball club. I don't know whether to blame the All-Star lay-off but right after that our hitting bogged down and our pitching turned completely sour. I suppose a manager must expect such things but this has been so sudden and so unexpectedly.
 Yesterday's game was the only one of the last four in which the Cards were actually in the game. They had a chance until the very end when Alvin Dark, represent-

Vets Trounce Cleaner Nine

The Disabled American Veterans club surged through for six runs in the top half of the last inning to defeat Clay's Cleaners 6-4, in an exciting National Minor League game here Tuesday afternoon.
 Held to three hits until the sixth, the vets benefited from six hits and a base on balls in their big round.
 The Cleaners came back to get three runs in their half of the inning but it wasn't enough.
 Saunders, the winning hurler, issued 11 passes but was tough in the clutch. He fanned two.
 Alexander connected with two doubles for the winner, starting the sixth inning fireworks with a two-baser.

SWL All-Stars Clash Tonight

MIDLAND, Tex. (AP)—The West, featuring home run sluggers Dick Hogan of Hobbs and Ray Patterson of Carlsbad, meets the East, which relies on apparent superior pitching, in the Southwestern League All-Star game tonight.
 Hogan who has clouted 24 homers and Patterson, who has 21, head the crew recruited from Hobbs, Carlsbad and El Paso and managed by Jodie Phipps of Carlsbad.
 The East is skippered by Tony York, manager of league-leading Ballinger, and is made up of players from Midland, San Angelo and Ballinger.
 The East squad may be weakened by loss of catcher Al DePhillips and outfielder Felix Gureman of San Angelo, who were injured last night at El Paso DePhillips lost several teeth when hit in the mouth while warming up San Angelo pitcher Richard Jack Guzman injured his leg in a collision with El Paso catcher Dick Hutzler.
 York has nominated Gene Lippold of Ballinger to start for the East while Phipps will use Jim Waldrip, who has won 11 and lost 3 for Hobbs. Lippold is 10-5.
 There will be a meeting of the league directors this afternoon for a discussion of conditions of the circuit.

Glick And Porter Square Off Today

OMAHA (AP)—Veteran Mrs. Maurice Glick of Baltimore tossed a challenge today at medalist Barbara Romack Porter in the second round of the Women's Western Amateur Golf Tournament.
 Mrs. Glick, six times the Maryland champion and a former holder of the Cuban title, was rated a dangerous foe for the little Sacramento, Calif., blonde who never has gone beyond the second round in the Western.
 Barbara, a 1956 member of the Curtis Cup team, has defeated the eastern contender three times in tournament play. "But it was close each time," she said. "Mrs. Glick is a real good player."
 Barbara, a veteran at 24, slackened off from her three under par 70 qualifying round in 4 and 3 victory over Betty Kerby of Akron, Ohio. She was one under for the 15 holes.
 Andrea Cohn, the 17-year-old junior star from Waterloo, Iowa, and Marjorie Lindsay of Decatur, Ill., who won the title in 1951, were paired at the top of the lower bracket.

Armed With New Driver, Snead Ready For PGA

DAYTON, Ohio (AP)—Sam Snead has a brand new driver for the PGA championship starting today. The result would make the other 127 players in the field shudder—if they really believed Sam would play.
 For some 20 years Sam has been wedded to a battered, old-fashioned driver he obtained from Henry Picard. Joe Wolfe, who does the repair work, claims the old resemblance to the original club is in Sam's mind.
 But Snead has won three PGA championships with it. The players feel sure that he'll go right back to it when they start playing for keeps.

CAPTAINS OF HALL-BENNETT CUP MATCHES NAMED BY CHAIRMAN

Dick Johnson will captain the local team in the Hall and Bennett trophy matches, which annually precede the Big Spring Invitational golf tournament.
 Captain of the local team will be Lloyd French of Odessa, father of Bob French, the well-known amateur linkster.
 The announcements were made Tuesday by Bill Frank, chairman of this year's tournament committee.
 The tournament is scheduled Aug. 30-31 and Sept. 1-2. The matches take place Aug. 30.

Cosden Enters State Meet, Will Get To Fly To Games

Thanks to an aerial lift offered by local pilots, the Cosden Oilers will be able to take part in the State Softball tournament at Wink, which starts next Tuesday and extends through the following Saturday (July 22 through July 27).
 Four planes have been available to the Oilers. Cosden Petroleum Corporation, sponsor of the team, will furnish the gasoline for the trips.
 The Oilers will be met at the airport in Wink by cars furnished by the tournament committee.
 The lineup for the tournament has not yet been completed but indications are Ralls, Lubbock, Midland, Big Spring, El Paso, Wink and possibly Odessa will be represented.
 Midland will have two teams on hand—the National Bank club and Utility Air Coolers.
 Pairings for the meet will be drawn up Saturday, according to information released by Frank Barton, tournament director.
 There'll be three games nightly from Monday through Wednesday. It will be a double elimination tournament.
 Cosden and Snider Gulf will play a practice tilt at the city park this evening, starting at 7:30 o'clock.
 On Saturday night, the Oilers take on Les Cobb's Midland Utility Air Coolers in a double header.

Old Net Pros Proving Edge

FOREST HILLS, N. Y. (AP)—"I've always said the pros could beat the best amateurs in the world," said professional tennis champion Pancho Gonzales today, "but a lot of people laughed and said, 'I think we are proving it this week.'"
 Big Pancho, who has temporarily put aside his money feud with promoter Jack Kramer, was referring to the going over he gave Ken Rosewall and Pancho Segura's victory over Tony Trabert in yesterday's matches in Kramer's Tournament of Champions.
 A couple of years ago, Trabert was regarded as perhaps the top amateur in the world. Then he joined the pros and Gonzales laughed him in their world tour.
 Last winter, it was Rosewall who turned pro right after the Davis Cup matches and he became Gonzales' sacrificial lamb.
 And yesterday, just to make it emphatic, Gonzales whipped Rosewall, 6-0, 8-6, 6-4, while Segura outlasted Trabert 6-4, 7-5, 9-11, 4-6, 7-5.
 "The pros go onto the court with more confidence," said Gonzales, who joined the pay-off troupe in 1949. "If you have one big fault in your game, you'll lose on the pro circuit."
 "Look at Rosewall and Trabert. It remains to be seen if they ever will become real top pros. But I'll tell you this. Rosewall doesn't have the power and Trabert is not fast enough.
 "That's all they need — one flaw."

Mighty Dallas Finally Falls

The batters got in an evening in the Texas League Tuesday and mighty Dallas fell.
 Second place Houston opened a series with the Eagles by taking a 6-2 decision and outgunning them. It pulled Houston within eight games.
 Austin strengthened its hold on fourth by trimming Oklahoma City 13-3 and Fort Worth moved into fifth by beating Shreveport 6-5 in 12 innings. Tulsa fell to sixth when it split a double-header with third place San Antonio.
 Don Anderson yielded only three hits in bringing Tulsa a 4-1 victory in the first game with San Antonio. But in the nightcap the two clubs knocked the ball all over the lot and San Antonio knocked it the hardest to win 8-4.
 The Missions slammed five runs across in the ninth with Chuck Oertel, who had four hits in five attempts, driving in the decisive tallies.
 Houston hopped on Murray Wall, the league's leading pitcher for 11 hits and all its runs in seven innings, finally driving the 15-game winner from the hill. Billy Muffett gave up nine hits but finished strong to post his 13th triumph. A three-run homer by Keith Little was Houston's big smasher.
 Austin hammered 15 hits to swamp Oklahoma City. Terry Fox was rocked for 11 by the Indians but Dick Sinovic drove in five runs with two doubles and a triple for Austin.
 Don Russell walked and Eddie Haas and Tom Nerad singled to bring Fort Worth its victory over Shreveport. Both clubs scored in the tenth. Fort Worth on Frank Ernaga's homer.

Patterson Says It's Vital Only That He Wins July 29

GREENWOOD LAKE, N.Y. (AP)—Floyd Patterson looked up quickly when a man asked if he thought he needed to knock out Hurricane Jackson July 29 to prove himself to the public.
 "It's not important now. It's just important that I win and keep on winning," he said slowly with the poise of a man who knows no doubts.
 The 22-year-old heavyweight champion of the world has just completed a rugged five-round sparring session in which he seemed to be punching harder than ever.
 Just outside, Gus D'Amato, his manager, was wagging his grey crew cut and telling the world that Floyd was training for a 15-

Houston Is Due To Join Majors

By EDMOND LE BRETON
 WASHINGTON (AP)—Rep. Price (D-Ill.) predicted today that major league baseball will be played in Los Angeles, San Francisco, Miami and Houston within 5 to 10 years.
 Price, in testimony prepared for the House Antitrust subcommittee resuming sports hearings today, said his "own personal idea" is that the two major leagues eventually will expand from 8 to 10 clubs each and the four cities he named will benefit.
 The Illinois congressman, a former sports editor, offered some comfort also to New York, now fearing possible loss of the Dodgers to Los Angeles and the Giants to San Francisco.
 "It cannot be thought seriously that the great city of New York would long remain with a single major league baseball team (the Yankees)," he said, "any more than it can be thought that Los Angeles and San Francisco, to say nothing of Minneapolis and other cities, will much longer remain without any major league clubs."
 The subcommittee is considering legislation to fix the status of professional sports under the antitrust laws.
 Price said it would be "a serious mistake . . . to adopt any law, or to encourage the federal courts to reach decisions, that would treat organized baseball merely as a business."
 Price told the subcommittee that on the whole there isn't too much wrong with the game.

WILLIAM GIBSON

Student Flier Is Commended

A student officer at Webb AFB, 2nd Lt. William G. Gibson, Class 58-C, has been presented the American Red Cross Certificate of Merit for rendering first aid to an injured classmate.

Maj. Sherrod H. Osborn Jr. made the presentation to Gibson, who also was awarded the Commendation Ribbon.

The act for which Gibson was given the awards took place on Oct. 23, 1956, while he was awaiting his flying training at Tifton Auxiliary Field, Tifton, Ga. He saw a classmate, later found to have been suffering from a severe internal injury, collapse into unconsciousness. Gibson recognized the man was in a serious condition and promptly rendered first aid. His actions contributed to saving the man's life, the Red Cross said.

The citation stated that Gibson's "accurate appraisal of the injured man's condition, the personal courage demonstrated by his readiness to assume responsibility, and his prompt action in applying remedial measures reflect great credit upon himself and upon the United States Air Force."

Lt. Gibson, who was born at Upper Sandusky, Ohio, in 1934, attended Bowling Green State University, Ohio, where he majored in biology. He is also a Red Cross first aid instructor. He will graduate here Nov. 18.

New Chemical Film Slows Evaporation

By FRANK PITMAN
DENVER, July 17 (AP)—A chemical commonly used in cosmetics, hexadecanol, holds promise as an invisible lid on water reservoirs.

The chemical film slows evaporation. If tests being conducted in Colorado by the U.S. Bureau of Reclamation prove successful, hexadecanol would save billions of gallons annually for city water systems.

Experiments involve smearing a super-thin layer of hexadecanol on a lake's surface. Many cosmetics include hexadecanol, which is supposed to keep milady's skin smooth.

Charles Fisk, chief Denver water engineer working with Bureau of Reclamation experts, said there are "good possibilities" for reducing air water loss from 25 to 30 per cent. He said the experiment so far "has left me very much encouraged."

Fisk said if evaporation from Denver's main reservoirs could be reduced 30 per cent it would save enough water to supply 40,900 persons a year.

Hexadecanol is a greasy white compound selling currently for about 60 cents a pound. Reclamation engineers are striving to perfect a system for spreading a pound of the chemical per acre.

Several methods of application are being tried. The chemical is sometimes sprayed in powder form over the water surface. Another way is to distribute flakes by hand. Or flakes can be spread through a doughnut shaped container floating on the water.

One of the chief problems — hexadecanol's invisibility on the water's surface — has been licked. Researchers have developed a series of indicator oils of different weights. A drop of the oil on the hexadecanol-coated water will show the film's presence and its condition.

Field tests of hexadecanol have also been conducted at Oklahoma City. Large quantities of the chemical were dumped in Kid's Lake there to determine if there was any toxic effect. None was found.

Large-scale tests are now in progress at Rattlesnake Reservoir, part of the Bureau of Reclamation's Colorado-Big Thompson project near Fort Collins in northern Colorado.

Uncle Ray:
Dust Provided China With Fertile Soil

By RAMON COFFMAN
Dust exists even above the surface of the ocean! This has been proved by men who have employed "dust counters" during long ocean voyages.

The Aitken counter was used, for the first time, 77 years ago. It counted such fine grains of dust that a thousand of them could rest on the head of a pin.

At least 42 thousand particles of dust were counted in every cubic inch of air analyzed during the Atlantic tests. Above parts of the Pacific, cubic inches of air contained only six or seven thousand bits of dust.

The Aitken counter makes a record of some particles which are too small to be called "dust" in the ordinary sense of the word. The air above a ocean is far more pure than above the land. Over London, for example, the Aitken counter showed 50 times as many dust particles per cubic inch as above some parts of the Atlantic ocean.

Some dust above the ocean is produced by meteors which burn

Mass of loess in China. A road has been cut through it.

to ashes. In addition the air over the oceans has dust which has blown there by strong winds.

Now and then dust does good. Northern China has yellowish dust which has gathered through the ages. Scientists call it loess, a name of German origin which usually is pronounced "LOW-ess."

The loess in China is packed down solidly. In some places it is a mass of rich soil more than 100 feet thick! The yellow color explains the name of the Yellow River. Yellowish water around the mouth of that river suggested a name for the Yellow Sea.

Soil of much the same kind exists in parts of North America, especially in the Mississippi Valley. Europe also has a certain amount of soil called loess.

For SCIENCE section of your scrapbook.

THE STORY OF CHINESE PEOPLE is a leaflet offered free to all Uncle Ray readers who send a stamped, self-addressed envelope to Uncle Ray in care of this newspaper.

Casey Jones' Fireman Dies

MEMPHIS (AP)—Cancer has killed the man who was fireman when Casey Jones, the greatest railroader in American folklore, made his fabled final run in the "Cannonball Express."

Simeon T. (Sim) Webb, 83, of Jackson, Tenn., died in a hospital Saturday night, 57 years after the Cannonball burst through a stalled freight train on the Illinois Central line near Vaughn, Miss.

Obeying Casey's shouted order "jump for your life," Webb leaped from the cab of the steam engine. Casey, with brakes locked and whistle screaming, rode with the locomotive and was killed.

The wreck of that "big eight-wheeler of mighty fame" grew to legendary proportions in the next few years. A song about Casey sold millions of copies.

Webb enjoyed his sideswipe with fame, telling his story thousands of times. But he quit railroading in 1919 after another narrow escape when an engine he was firing overturned.

The elderly Negro was stricken with cancer some months ago. He moved from Jackson to Memphis, staying with a daughter until he became critically ill July 3 and was admitted to the hospital.

Lost Ticket Snags Judge's First Day

HOUSTON Tex. (AP)—Judge Samuel Wiesenhal, appointed last week to hear traffic violation cases, was almost late for his first day on the bench yesterday.

He was trying to settle a speeding ticket given him last October. Notations showed the case was reset four times.

Wiesenhal asserted the delays were not his fault. He said he tried twice to pay the fine, but clerks couldn't find the complaint. He said he didn't get it paid yesterday either.
