Braves Win 5th Game In Series, 1-0

NEW YORK 000 000 000-0 6 0 MILWAUKEE 000 001 000-1 7 0 MILWAUKEE, Oct. 7 (AP)—Milwaukee's Lew Burdette, backed by spectacular fielding, beat the New York Yankees' Whitey Ford 1-0 to send the Braves ahead in the World Series, three games to two.

NEITHER team, etc. 167 add running at start. Neither team scored in the first. Bauer opened with a single to left field, marking the 12th straight World Series game in which he had hit safely.

For the Braves, Mathews walked after two were out but failed to advance when Aaron flied to left. Slaughter got the second hit off Burdette, a single, in the second inning but went out trying to steal second after Simpson's strikeout. Schoendienst pulled a muscle in his right groin trying to field Slaughter's hit and had to leave the game, replaced by Felix Mantilla.

Pafko got the Braves' first hit, a single in the second, but Covington popped up and Crandall bounced out. Bauer lashed out his second straight single to deep short with two out in the third but he was forced at second by Kubek. Burdette, Mantilla and Logan went out in order for the Braves.

The Yankees got two men on base in the fourth when Adcock fumbled Berra's grounder and Slaughter singled to left for his second hit. Burdette stepped on a doubleplay to kill the threat. Aaron singled for the second hit off Ford but also was cut down in a double.

After Lumpe, Coleman and Ford had gone down in order for the Yankees in the fifth, Pafko opened with a single for the Braves and reached second on Covington's bunt. But Crandall and Burdette both flied out.

After Burdette again had set down the Yankees in order, the Braves produced the first run of the game in the sixth on consecutive singles by Mathews, Aaron and Adcock after two out.

Mathews beat out a high bounder to second, went to third on Aaron's Texas Leagueer in short right field and scored on Adcock's line single to right. Berra led off the Yankees' seventh with a single but he was erased on a third Milwaukee double play. Covington, Crandall and Burdette were set down in order in the Braves' half.

FIRST INNING NEW YORK: Bauer stroked a long single to left. Kubek dropped a sacrifice in front of the plate and was out. Burdette to Adcock. McDougald lined to Pafko who made a nice shoestring catch. Berra went to a full count, then grounded out Logan to Adcock. No runs, one hit, no errors, one left.

MILWAUKEE: McDougald ran in for Schoendienst's hopper and threw him out. Logan lofted to Coleman in short right. Mathews walked. Aaron lined to Slaughter. No runs, no hits, no errors, one left.

SECOND INNING NEW YORK: Slaughter singled through the middle of the diamond past the lunging Schoendienst. The second baseman pulled a leg muscle but returned to his position. Simpson struck out and Slaughter was doubled trying to steal second. Crandall to Logan. Mantilla replaced Schoendienst. Lumpe tapped in front of the plate and was thrown out, Crandall to Adcock. No runs, one hit, no errors, none left.

MILWAUKEE: Lumpe scooped up Adcock's slow grounder and threw him out. Pafko lined a single to center. Covington fouled to McDougald outside third. Lumpe made a fine pickup and underhand throw of Crandall's tricky grounder left of the mound and got his man. No runs, one hit, no errors, one left.

THIRD INNING NEW YORK: Mantilla tossed out Coleman. Ford went out the same way. Bauer beat out a hit to deep short. Kubek bounced sharply to Logan who stepped on

Ike Calls Faubus Dressing Room Charge 'Vulgar'

WASHINGTON, Oct. 7 (AP)—The White House said today it is "completely untrue and also completely vulgar" for Gov. Orval Faubus to say that federal troops followed girls into dressing rooms in Little Rock's Central High School.

Presidential press secretary James C. Hagerty also said that Maj. Gen. Edwin Walker had returned unopened the letter in which Faubus made the charge. The reason this was done, Hagerty said, was that it was addressed to "the commander of the occupation forces."

Walker commands the Army detail enforcing integration at the Little Rock school. Secretary of the Army Brucker, Hagerty said, will have something further to say on the whole matter. Faubus had made his letter public before it was delivered to Walker, Hagerty said, quoting news dispatches. He said it was on Walker's own volition that the letter was sent back unopened.

Hagerty also said he noted news stories that the superintendent of schools also had denied the governor's charge.

Rains Spatter Western Texas

By The Associated Press Showers spattered western Texas again Monday. Wichita Falls had a shower early Monday with more forecast over the state. Patches of ground fog cut visibility at Abilene, College Station, Houston, Lufkin and Beaumont.

Predawn temperatures ranged from 74 degrees at Brownsville to 54 at Lufkin. Rainfall Sunday included 1.24 inches at El Paso, Van Horn 69, Salt Flat 39, Amarillo and Dalhart 19, Wink .16, Lubbock .07 and San Angelo .08.

Wet and cloudy weather extended across the northern part of the country Monday from the north Pacific Coast eastward through New England, but skies were clear in most other areas.

Strange Murder Trial Begins

LOS ANGELES (AP)—The strangest Los Angeles murder trial in years begins today. It is the state's attempt to prove that L. Ewing Scott killed his long-missing wife Evelyn.

The prosecutor, Dep. Dist. Atty. J. Miller Leavy, has the task of establishing murder without the corpus delicti—the actual death of the person alleged to have been murdered.

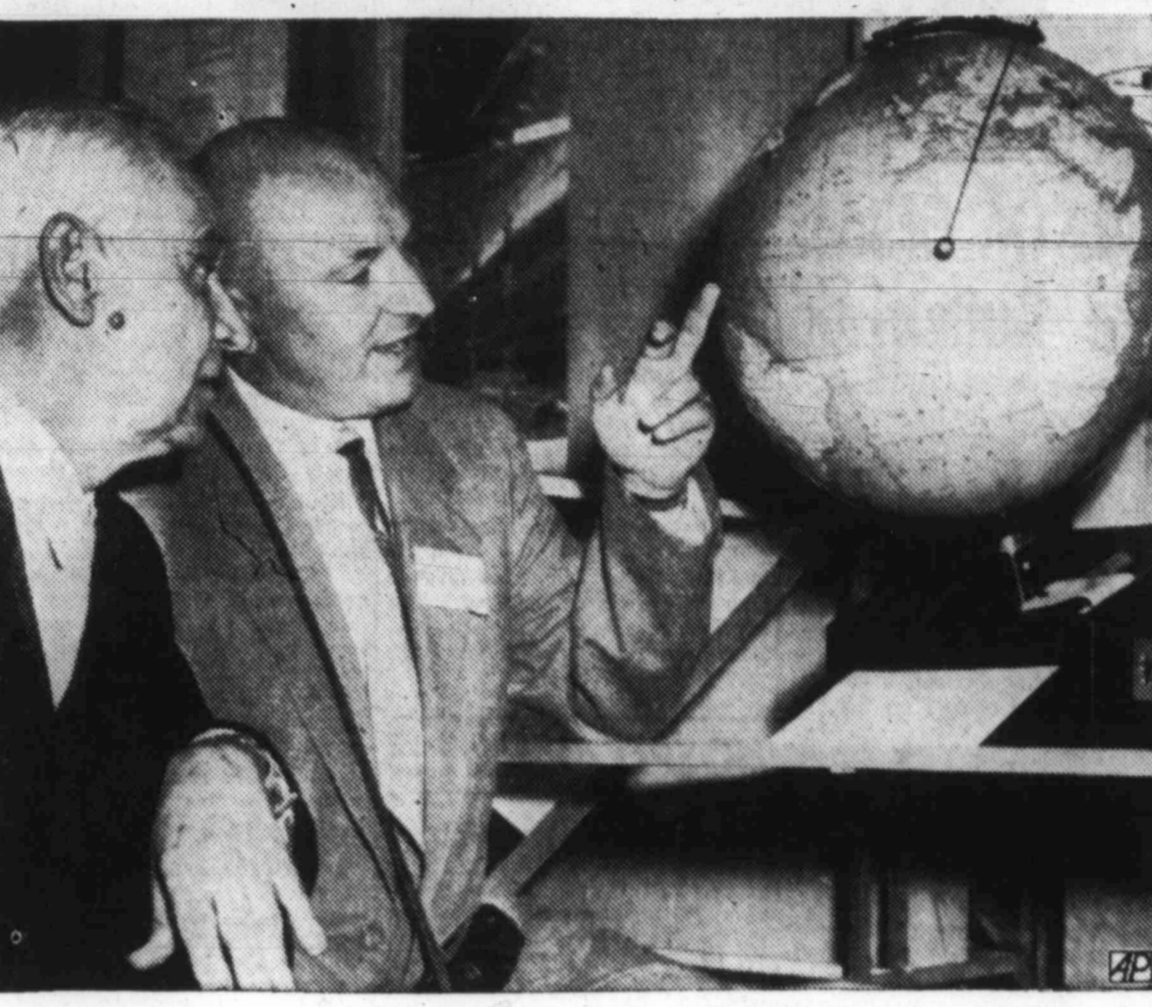

The body of Mrs. Scott has not been found nor has an official death been advanced as to how the wealthy matron may have met death.

Supreme Court In Historic New Term

WASHINGTON (AP)—A 19-minute session today started the Supreme Court on a new term that is expected to bring far-reaching decisions affecting race relations, Communist activities and a wide variety of other national problems.

The court already has agreed to hear arguments in 113 cases. In the previous term that ended July 11, the court heard arguments in 123 cases. Thus, from the standpoint of oral arguments, the justices already have a work load almost equal to that of the entire 1956-57 term.

Expert Hits 'Stupidity' In U. S. Satellite Failure

Model Satellite And Globe Dr. A. A. Blagonravov, left, Soviet delegate to the International Geophysical Year Conference, and A. M. Kasatkin of the Moscow Academy of Science, look over a terrestrial globe and a model of the IGY satellite, a small ball on the end of a thin arm which swings around the sphere along a path which an earth satellite is expected to traverse.

U. S. Naval Scientists Get Good Fix On Sputnik

WASHINGTON (AP)—U.S. naval scientists said today they have a good "fix" on the Russian space satellite, and can plot its path ahead anywhere from 24 hours to a week.

A spokesman at the Naval Research Laboratory also said Navy scientists now know when they get the beeping signal from the satellite that their readings are precise to 1,110,000th of a second.

The latest information here is that the satellite is following what the spokesman called a "fairly circular orbit." The exact height has not been determined, he said, but it is a minimum of 400 miles high.

U.S. scientists, who hope the Russians will share any scientific knowledge gained through the satellite, gave a group of foreign scientists a tour of the Naval Laboratory.

The visitors, here for an international conference on rocket and satellite programs, included three Russians — A. A. Blagonravov, Sergei M. Poloskov and A. M. Kasatkin. U.S. reporters were not permitted to accompany the scientists on the tour.

U.S. scientists are tracking the Russian satellite with signals recorded at nine points in Norway and South America. The information received at these points is fed into Washington where it is fed into an electronic brain.

The receiving points, known as "minitrack stations" are located Lima, Peru; Antofagasta, Chile; Santiago, Chile; Antigua, Brit. West Indies and San Diego, Calif. With establishment of a fix on the Russian baby moon, Navy trackers said it should become visible in the continental United States "in about a week or 10 days."

A spokesman for Project Vanguard, the U.S. satellite program, said it is estimated that the Soviet satellite will begin at that time to make passages over the United States during predawn or evening twilight periods—the only times it would be visible.

He said the "extreme north-west portion of the country" would be the first to see it and that it would be in the evening. LONGER NIGHT Asked about reports the satellite already had been seen with the naked eye in Alaska, the spokesman said that might well be true due to a difference in the length of the night there. But he added it would be at least a week before a twilight passage would occur in the United States proper.

U.S. Program Called Year Late

PHILADELPHIA (AP)—A noted authority on outer space said today the Army could have launched its huge Jupiter C guided missile into outer space as a satellite last year, had it so chosen, but an "astounding piece of stupidity" prevented it.

But, said Dr. I. M. Levitt, "the Pentagon chose to ignore the fact that we had a device capable of launching a satellite and decided to develop another."

He said the Defense Department was deep in the development of the Vanguard Rocket for launching a satellite in the International Geophysical Year and decided to concentrate on this rocket when the Jupiter C was already capable of accomplishing the task.

He said the Pentagon explained this "astounding piece of stupidity" by asserting the "Jupiter was designed as a missile, not as a satellite launcher, and that work on the missile — as a weapon — should continue."

Levitt, director of Fels Planetarium here, said "this course retarded the satellite program. It may have speeded the missile program; I don't know."

But it certainly let the Russians score an astounding propaganda victory over the United States. Levitt said the United States could have "achieved a satellite moon just like Russia's by doing little more than changing the angle of fire" in a test conducted at Patrick Air Force Base, Fla.

The Jupiter C reached a speed of 15,000 m.p.h. in the test conducted in an article in Missiles and Rockets magazine last December. The Army declined comment on the article but other sources said the information was accurate.

Levitt said the Army did not fire the last stage of the three-stage rocket. This last stage, he said, would have boosted the Jupiter's speed to 18,000 m.p.h. needed for placing a satellite in orbit about the earth.

The Jupiter was fired as a surface-to-surface missile but even then, Levitt said, it reached an altitude of 650 miles. "It would have been a satellite then and there" had it had sufficient speed to counteract the pull of gravity and put it in an orbit, Levitt said.

The rocket landed off South America, some 1,400 miles west of Ascension Island. The last stage of the rocket, if launched, said Levitt, could have been used as an artificial moon. The last stage engine and fuel tank would have orbited around the earth.

Reds Say Success To Force Change In U.S. Policies

MOSCOW (AP)—As Russia's earth satellite whirled toward its 40th circuit of the globe today, Pravda predicted the Soviet scientific success will force the United States to revamp some of its foreign policies.

Already, the Soviet Communist party newspaper said, some U.S. senators "are showing signs of hysteria." In a dispatch from New York, Pravda said the success of the satellite puts before U.S. leaders "the inexorable necessity of peaceful coexistence, cessation of the arms race and renunciation of their cold war policy."

It said U.S. newspapers are showing reluctant but substantial recognition that "in numerous spheres of scientific research the Soviet Union is often equal and sometimes superior to the United States."

Pravda's Monday morning edition carried column after column of reports and comments from abroad on the flight of the first earth satellite. There were dispatches from China, Poland, Bulgaria, West Germany, Czechoslovakia, Romania, Yugoslavia, Britain, France and the United States.

French Expert Sees Military Usage

PARIS (AP)—One of France's top aviation experts asserted today the Soviet baby moon certainly has military significance. He said the United States is already building a reconnaissance satellite called "Big Brother."

Gen. Pierre Gallois told a reporter for Paris-Press the new American "sky-spy-eye" had been under development by the Lockheed Corp. for more than a year.

"The Lockheed firm," he said, "has been working for a year on the development of a reconnaissance satellite, 'Big Brother,' equipped to take and retransmit pictures of the countries it flies over."

United Fund Drive Opens Crucial Week

With contributions running well ahead of last year's rate, the Big Spring and Howard County United Fund campaign moved into its crucial week this morning. Preparations were being completed at noon for the start of the Employee Division solicitation Tuesday morning and for the big rally of United Fund workers and other civic leaders at noon Tuesday.

Judge Denies Cox Indictment Ouster

AUSTIN (AP)—Judge Mace Thurman rejected today a defense motion to throw out an indictment charging former state Rep. James Cox with agreeing to accept a \$5,000 bribe.

Both sides apparently were ready to proceed with the trial of the former Conroe lawmaker accused of accepting a bribe in connection with his legislative work.

Thurman and attorneys conferred on the indictment. Actually it was a substitute for the original. It was returned secretly last week by the Travis County grand jury. Dist. Atty. Les

Photos Of Satellite Due In 8-10 Days

CAMBRIDGE, Mass. (AP)—Moon-watch officials said today American astronomical observatories may get photographs of the Russian earth satellite within eight or nine days.

Dr. J. Allen Hynek, who is in charge of the optical tracking program of the Astrophysical Observatory of the Smithsonian Institution, said that radio tracking computations have by now "pretty well determined the orbit of the Russian satellite."

West To Seek Missile Control

UNITED NATIONS, N.Y. (AP)—The West readied a U.N. disarmament resolution calling for international control of outer-space missiles today while a Soviet satellite circled the earth.

Model Satellite And Globe

Dr. A. A. Blagonravov, left, Soviet delegate to the International Geophysical Year Conference, and A. M. Kasatkin of the Moscow Academy of Science, look over a terrestrial globe and a model of the IGY satellite, a small ball on the end of a thin arm which swings around the sphere along a path which an earth satellite is expected to traverse.

United Fund Drive Opens Crucial Week

With contributions running well ahead of last year's rate, the Big Spring and Howard County United Fund campaign moved into its crucial week this morning. Preparations were being completed at noon for the start of the Employee Division solicitation Tuesday morning and for the big rally of United Fund workers and other civic leaders at noon Tuesday.

### Claude B. Cole Dies Sunday At 67, Rites Today

Claude B. Cole, 67, member of a family which figured prominently in the early day development of Big Spring, died here Sunday at 5 a.m. after a long illness.

Funeral was to be held at 2 p.m. Monday at the River Funeral Chapel with the Rev. Ernest Stewart, pastor of the East Fourth Baptist Church, officiating. Burial was to be in the Trinity Memorial Park.

Mr. Cole, a Glasscock County rancher for most of his life, was born the son of the late Mr. and Mrs. W. R. Cole in Big Spring on Dec. 12, 1889. His father had operated the Cole wagon yard and later erected the historic Cole Hotel on the same spot where today stands the Howard House, and also had part in the Cole & Strayhorn addition development in southeast Big Spring.

Except for about a decade spent in Fort Worth, Mr. Cole devoted his attention to ranching. He served as a county commissioner in Glasscock County from 1947-51. His health began to fail in 1952 and since becoming seriously ill he had been staying at the home of a daughter, Mrs. L. O. Greer, Big Spring.

Surviving are his wife; one daughter, Mrs. Greer; two sons, Eldred Cole, Garden City, and Edward Cole, Dallas; two sisters, Miss Pearl Cole and Miss Jo Cole, Big Spring; and one brother, W. G. (Bus) Cole, Big Spring. Among other relatives are Mrs. Don Armstrong, Big Spring, and Mrs. Hattie Girwood, Fort Worth, sisters-in-law, and George Nicholson, Fort Worth, brother-in-law.

Funeral services will be held at 2 p.m. Monday at the River Funeral Chapel with the Rev. Ernest Stewart, pastor of the East Fourth Baptist Church, officiating. Burial was to be in the Trinity Memorial Park.

### C-City To Vote On Police Bond Issue

COLORADO CITY — Colorado City voters will decide Tuesday on the construction of a \$35,000 police station. The election is to be held at city hall, starting at 8 a.m.

The bond issue, if passed, will pay for the construction of a new building at the east end of the present city hall and will include jail cells, dispatcher's office, city

### County Taxes Paid Rapidly

Howard County taxpayers are eager to get their checks off their minds, according to Viola Robinson, tax assessor and collector.

Notices were put in the mail to taxpayers on Oct. 2. Thursday afternoon the first of the property owners marched in to pay off their tax bills.

In the first four days of October, Mrs. Robinson reported her office had collected \$17,619.90 of which \$13,346.98 was for ad valorem taxes.

The \$13,346.98 is money paid over the counter and does not include a sizeable stack of mail which has accumulated and which also contains tax payments.

A throng of taxpayers was on hand this morning. All of the deputies in the office were kept busy accommodating the applicants.

Mrs. Robinson said that the current taxes will become delinquent on Jan. 31, 1958.

She said the payments made the first few days after the office began operation are well ahead of ordinary years.

### Two Cub Packs To Organize Tonight

Two Cub pack organization sessions are scheduled for 7:30 p.m. today.

Pack No. 14, sponsored by the East Ward P-TA, is to meet in the main building at East Ward school with Gary A. Tate, cubmaster, in charge of the signing of the organization of dens.

At the second annual of the First Baptist Church, pack No. 10 will complete the organization started a week ago. Dr. Marshall Caulfield, cubmaster, will be in charge of the session to which boys of Cub age (9-10) and their parents are invited.

### Dozen Hub Caps Reported Stolen

An even dozen hub caps were stolen over the weekend from five cars. Eight were taken from a car lot.

The eight were missing Sunday morning from cars at Lone Star Motor, 600 E. 3rd. The firm reported that four hub caps were stolen from a 1955 Plymouth and two each were taken from 1954 and 1957 Plymouths.

This morning, John Kaminski, OK Trailer Corps, informed the police that four hub caps were taken from his 1955 Oldsmobile sometime Sunday night.

Hungry burglars carried off five pounds of barbecue and accessories from Odell's Bar-B-Q, 802 W. 3rd, during the weekend. It is the second burglary there within a month.

### USDA Lauded By Mahon For Milo Loan Plan

Rep. George Mahon has commended officials of the Department of Agriculture for announcing a special distress loan on milo.

The loan had been urged by farmers and farm groups, and Mahon had presented the request to the grain branch of the Department of Agriculture early in September.

The distress loan will provide milo producers with a special loan equal to 80 per cent of the regular loan. It is designed to aid producers who are unable to take advantage of the regular loan because of the lack of storage facilities.

Some opposition to the bond issue has developed among citizens who think that present facilities are adequate. Both friends and foes of the issue have presented their side of the case in paid ads in the Colorado City newspaper.

Bids will be opened on Oct. 18, it was decided.

The commissioners also approved a request to maintain certain roads in the Silver Heels Addition. The county will maintain these roads hereafter. Vote on the motion to accept the roads was unanimous.

However, the action led to the adoption of a new county city policy on such roads in subdivisions or prospective subdivisions of the city.

The Silver Heels roads were 60 feet right-of-way.

Rep. Gilliam moved that hereafter the county accept only such roads in such additions or prospective subdivisions where the right-of-way is 80 feet. The difficulty in maintaining narrower roads was pointed out and the commissioners adopted the proposal.

The meeting Monday was a "first of the month" session and Ed Porter, county auditor, had a stack of bills which he was to present to the commissioners. He also submitted the monthly financial statements.

### City Hall Move Is Slated Soon

On the present schedule, the city should occupy the second floor of the city hall about Nov. 1.

City officials reported today that Nov. 1 has been mentioned as a tentative moving time. Pioneer Builders is remodeling the building a floor at a time, and the second floor is to be completed first.

Workers will probably finish plaster work by the end of this week. The south end of the floor has already received a first coat of paint, and the painters will follow plasterers into the north end of the building.

Officers of the city manager, engineer, attorney, the city manager's secretary and the drafting department will be moved to the second floor when work is finished. Some of the other city officials will probably move there temporarily while the first floor is undergoing changes.

### HCJC Students Tour Big Bend

Entomology and geology students at Howard County Junior College, who had raided the cave of 35, swung through the Davis Mountains and the Big Bend during the weekend.

They brought back numerous specimens of bugs and rock, said James Bruce Frazier, instructor and in charge of the party.

### Wildcat Adds Ellenburger Oil To Pay Found In Borden Test

After finding oil in two sections of the Pennsylvania, operator at a Borden County wildcat located oil in the Ellenburger at the end of the week.

The well, Shell No. 1 J. B. Slaughter, set oil string in the Ellenburger after running a drillstem test from 8,630-45 feet. It flowed 50 barrels of oil-cut three per cent basic sediment—in an hour. Gravity was 39 degrees.

Operator then reversed out 56 barrels of oil and recovered 30 barrels of oil below the tool. No water was reported. Flowing pressure gauged 1,235-698 pounds, and shut-in pressure was 3,925 pounds. Earlier operator found large amounts of oil in the Pennsylvania.

Previously, operator found oil shows at 8,000 and also at 8,900 feet with a water table between in the Pennsylvania.

Operator decided not to potential the Nortex No. 1. Shafer in the northeastern corner of Howard County but plugged back to try the Clear Fork. A potential in the Canyon was slated for the weekend but was canceled until about Thursday.

### Borden

Huber-Wagoner No. 1 Clayton-Johnson set casing to test—the Strawn from 8,045-61 feet after finding the Ellenburger barren.

On a test in the Ellenburger, operator found only sulphur gas, with a slight show of gas. The Strawn produced free oil on a test last month. Location of the wildcat is five miles south of Gall, C SW SW, 13-31-4n, T&P Survey.

El Paso No. 1 Lamb deepened to 3,818 feet in lime. It is a Pennsylvania wildcat C NW SW, 25-32, EL&RR Survey, 16 miles northwest of Gall.

Shell No. 1 Slaughter, C NE NE, 15-30-6n, T&P Survey, waited on cement to set 5 1/2-inch casing at 8,645 feet in the Ellenburger. Operator tested the section from 8,630-45 for 115 minutes, with gas coming in 17 minutes, mud in 34.

### HOSPITAL NOTES

BIG SPRING HOSPITAL Admissions—Michael Ray Mustang, 1409 Tucson; Thomas L. Zinn, 706 Birdwell; Delbert Shirey, 706 Birdwell; Mrs. Jewell Madry, 211 Harding; Lloyd Allen Gray, 1910 W. 3rd; Willie Mae Dabney, 905 Rummels; H. M. Macomber, 903 E. 14th; Vesta Marie Cantrell, 1206 E. 3rd; Mary Catherine Hammond, 103 Dixie; Eldorado; Arch Koutz, 1303 Wood; Ruby Lee Alexander, 606 NW 11th; Daryl Richardson, 1311 Johnson; Dorothy Allred, Star Rt., Stanton; Jean D. Dese, 112 Main; Lois Bond, Coahoma; Mrs. Billy Simmons, Garden City; Juan Ramirez, Odessa; Linda Clements, Garden City.

Dismissals—M. C. Stulting, 705 E. 17th; John Schaffer, Rt. 2; Kay Powell, 1108 E. 8th; Minnie Talley, 1505 Owens; Bernice Neill, Coahoma; Stephen Scott Bell, 2052 S. Monticello; Wanda Bailey, 1703 Young; Louis Brown, Box 1292; Sally Graves, Rt. 1.

### Boy, 17, Held In 3 Arson Deaths

TIJUANA, Mexico (AP) — A 17-year-old boy was held on suspicion of arson today after three persons perished in a fire which destroyed nine frame houses.

Police accused Jesus Mireles Mejia of starting the fire by throwing a match on the floor while playing cards in one of the houses.

The dead were Epifanio Villalobos, 35, Trinidad Chevez, 55, and Daniel Uribe Barragan, 3. Twenty other occupants escaped unharmed.

The slightly mixed-up Missouri Valley Conference football race sports only one championship game this week which counts in the league standings.

### Swimming Pool Bond Election Set In Dawson

LAMESA—The Dawson County Commissioners Court has called a bond election for \$125,000 for the county's participation in the construction of two swimming pools in Lamesa, it was announced today.

The bonds are to be voted on by the Dawson County residents on Nov. 5 in conjunction with the regular election scheduled for that date.

It was explained that the bond issue is contingent on action of the Lamesa City Council in calling for a municipal bond election to augment the funds. The council is to meet this week to act on the matter.

A petition signed by 552 names was placed before the county commissioners asking that the bond election be called. The petition was circulated by the Evening Lions Club which has made a year's study of the need for swimming pools here.

One of the proposed new pools would be placed in a park in the southeast section of the town. Site for the other pool is yet to be determined.

Lamesa has no public pool. One, privately owned, has operated in the past but was not opened this past summer.

### Timetable For Sputnik

WASHINGTON (AP)—Navy scientists today released a timetable for Sputnik, the Russian earth satellite, which showed its next passage over the United States would be about 12:11 a.m. EST tomorrow.

A spokesman at the U.S. Naval Research Laboratory added this word of discouragement for Sputnik fans: There isn't a chance of seeing it for at least a week or so, because it can only be seen when it passes over at dawn or dusk.

"It's like dust particles caught in a beam of sunlight," he said. "You can see the dust particles. Similarly when you're sitting in the dark on the earth and the satellite goes overhead in the light of dawn or dusk it should be visible with the naked eye. But when it passes over in full darkness of full daylight there is no chance at all of seeing it."

### 3 Valley Teams Suffer Defeats

Tulsa, which has dropped its first three games, will open its conference schedule at Stillwater Saturday against Oklahoma State.

Oklahoma State has won its first two games with Missouri Valley Conference members, beating Wichita 26-0 last Saturday after taking North Texas 25-19.

North Texas plays at Abilene Christian and Houston at Texas A&M, while Cincinnati will be at Detroit to Xavier and Wichita to Home Saturday.

### Junior High Gives To United School Fund

Junior High School students raised over \$150 for the United School Fund last week.

The students contributed \$155.42 to the fund with C. W. Tanner's home room giving the most. Second high home room was that of Agnes Currie, followed by Mrs. Inez Turner, Dan Lewis, and Jess Blair.

### City Court Fines Total \$321 Today

Fines in corporation court totaled \$321 this morning, and half of them were fines for drunkenness.

Five speeding tickets were handled, and one was for \$20. Another was for \$15, and the other three were for \$10 each. Two persons ran stop signs and drew \$10 and \$5 fines. Five for \$5 each were assessed two persons guilty of failure to grant right-of-way.

Driving without a license cost two persons \$25 and \$15 respectively, while one case of driving without lights cost \$5. Bringing a red light also cost \$5.

One vagrancy complaint brought a \$6 fine.

### County Arms For Federal 'Invasion'

UNION, S.C. (AP) — Legislators from Union County, which has a proud record for furnishing warriors for the nation's battles, says it is arming against any possible integration enforcement intervention.

The county's legislative delegation said yesterday it ordered nine sub-machine guns and 1,000 rounds of ammunition.

State Sen. John Long said the weapons, for Sheriff Harold Lamb and his eight deputies, are to be used to "repel any invasion by federal troops or anyone else violating our laws."

Union County has never used draft calls to provide its share of soldiers. Volunteers were far in excess of demands during World War I and II.

### SATELLITE

The Soviet satellite since it was launched. Pickering, chairman of America's IGY working group on tracking and computation, said the Caltech scientists have learned a great deal about the satellite's orbit which he said "probably is not circular, but spherically elliptical."

He said the sphere's closest approach to the earth may be about 300 miles, "although its average height above the earth is 300 miles."

Bragnovon estimated that the Russian satellite would stay aloft about a month. But Pickering said the sphere probably will have an extremely long life.

He also said the signals coming from the Russian satellite "contain startling information which appears to include data of several different types." He added that complete analysis of that data "will have to await information from the U.S.S.R."

Dr. Fred L. Whipple, director of the Smithsonian Astrophysical Observatory at Cambridge, Mass., said scientists have determined information about the temperature in the upper atmosphere. He said what other information may be involved could not be established immediately.

During the past two days, there have been a number of claimed sightings of the satellite in this country, but these have been discounted.

However, three young University of Alaska scientists were reported yesterday to have been the first Americans to see the satellite with the naked eye.

Dr. Gordon B. Little, assistant director of the university's geophysical station, said Robert S. Leonard, Joseph Pope and Dr. Giancarlo Rumi watched it for five minutes starting at 9:53 a.m. EST, yesterday.

Little told the Seattle Post-Intelligencer the observers saw it as a "bright star-like object, moving in a slow graceful curve across the sky like a very slow shooting star."

A SURE OF SIGHTING A Harvard scientist speculated the three may instead have seen the still orbiting third stage of the launching rocket which put the moon in its orbit, but Little said the three observers were sure of their sighting because they recorded radio signals from the satellite at the same time.

He said Leonard, the first to see it, predicted correctly the exact spot of its appearance.

Moscow radio periodically has been giving timetables for passage of the Russian satellite over various points of the globe. Its latest schedule listed these passes today over Western Hemisphere cities. All are in Eastern Standard Time:

Roson, 6:56 a.m.; Minneapolis, 8:33 a.m.; St. Louis, 8:34 a.m.; Jacksonville, Fla., 8:37 a.m.; Honolulu, 3:18 a.m.

In addition to official monitoring stations, private and government radio operators have been picking up signals from the satellite.

Some American specialists said the advent of the space satellite pointed to the coming of rocket travel to the moon and possibly other planets.

Whipple spoke of the possibility of this happening within the next few decades.

### Driver Forfeits City Court Bond

A driver was given tickets for speeding, failure to grant right-of-way, and disregard of a warning signal after an accident Saturday.

The man, Horace Murdock, 606 E. 17th, was driver of a car in collision with Laura Evans, Gail Rt., at 17th and Aylford. Murdock Sunday posted \$50 bond on the traffic charges and forfeited the bond today, policemen said.

Also Saturday, Miguel Zabiate, 204 NW 2nd, and Aleandro Escotea, 510 N. Nolan, were involved in an accident at NE. 6th and Aylford.

Sunday, Naomi Frith, Odessa, and Jimmie Wade, a policeman, were drivers of cars in collision at 4th and Owens. Wade was in a police car, a 1957 Ford. Only damage to the patrol car was a broken headlight. The Odessa woman was issued a ticket for an illegal turn.

This morning, Margaret Marquez, 410 Pine, and Will Johnson, 707 Wyoming, were in collision in the 1000 block of NW 7th. Aurelia Salinas, 211 NE 7th, and Joe Jacobs, 110 E. 3rd, collided at 2nd and Washington.

Nalley returned to his home here during the weekend after a two-month tour of Europe. Mrs. Nalley will remain in England until sometime in November.

The Nalleys left here on the tour July 23. Their first objective was a visit with their son-in-law and daughter, Lt. and Mrs. Russell Scott, and granddaughter, Janice Rene, in Weathersfield, near London.

Nalley said they also made a 25,280-kilometer tour of continental Europe, visiting points of interest in Belgium, Holland, Germany, Switzerland, Liechtenstein, Italy, Austria, and France. He also visited extensively in Scotland and Ireland, but Mrs. Nalley spent that part of their vacation with the Scotts.

The Big Springer stopped by Boston, Mass., en route home to attend a business convention.

### Farm Bureau Opens Drive For New Members Today

Farm Bureau leaders, pointing toward the annual meeting Tuesday evening, kicked off a concerted membership drive Monday.

The annual membership rally, featuring a big barbecue for members, their families and guests, is set for 7:30 p.m. Tuesday at the Howard County Fair Barn. President Ralph White urged all members to come and to bring guests. All food and drinks are being furnished by the bureau.

At a business session following the barbecue, officers will be elected for the next two years. Resolutions will be submitted for consideration of the local bureau and the instruction of bureau delegates to the state conclave.

Currently the bureau has around 600 members.

Community leaders for the membership enrollment will be: Knott, Larry Shaw; Coahoma, Ralph White; Shamrock, Ellis Iden; Elbow, Ross Hill; Hartwells, Loy Auffer; Luther, Jack Buchanan; Vincent, Joe Hill and Joe Duenn; Center Point, L. J. Davidson; Loma, Neill Fryar; Fairview, R. V. Fryar.

### Kidnaping Search Widens Into Texas

ROSWELL, N.M. (AP) — The search for a missing Roswell girl widened into Texas today. A warrant charging kidnaping was issued against a Dexter, N.M., farmhand.

The missing girl is Sandra Lucero, 5 daughter of Mr. and Mrs. Clement Lucero.

### MARKETS

WALL STREET — The stock market opened mixed in active trading today. Aircrafts and missile issues were up as much as 3 1/2.

United Aircraft was up 1/4 at 63 1/2. Lockheed was up 1/2 at 45 1/2. Curtiss-Wright rose 3/4 at 34 on 4.30.

Losses were taken by Consolidated Edison, Standard Oil (New Jersey) and B&O. Gains were made by Goodyear and Westinghouse.

LIVESTOCK — FORT WORTH (AP)—Hogs 600; week 23; choice 15.50-7; sheep 3.00 steady; good to choice lambs 20.00-21.00; feeder lambs 19.00.

Cattle 3.80-5.00 steady; good steers 18.00-21.00; common and medium 12.00-16.00; fat cows 12.00-15.00; good to choice calves 18.00-20.00; common and medium 12.00-17.00; good to choice stock calves 15.00-22.00; good to choice stock calves 15.00-22.00; good to choice yearlings 20.00.

NEW YORK (AP)—Cotton was 45 cents a bale higher to 75 1/2 cents Monday. October 34.68, December 34.07, March 34.12.

# Gas 'Jail' Holds Single Molecule

By ALTON L. BLAKESLEE  
AP Science Reporter

PITTSBURGH, Oct. 7 (AP)—Science has perfected an astonishing new jail.

It puts a single molecule of gas into solitary confinement.

That's quite a feat considering that you draw in some 10 sextillion molecules of gas with every breath.

Even the most perfect man-made vacuum still contains about half a million molecules for every cubic inch of gas. Outer space may be about as nearly crowded with molecules of gas that go whizzing about, continuously bumping into one another at high-speed travel.

With the new scientific jail, you can in effect hold a gas in your hand.

The individual gas molecules are trapped inside tiny, invisible "cages" of crystal material. It's done through a process known as clathration — from the Greek meaning lattice—being developed by Dr. Gerhard Sprengling and Dr. Lyon Mandelcorn, chemists of the Westinghouse Research Laboratories here.

Clathration permits scientists to study the individual behavior of

a single molecule of a gas, inert and isolated from all its companions. The study can produce fundamental knowledge, and even unusual practical applications on some tomorrow.

Isolated gas molecules can behave quite differently than when they are in a big mob.

Oxygen molecules ordinarily are very active, eager to combine chemically with many other materials. In mob action, oxygen molecules produce burning and rusting, Dr. Sprengling said.

But jailed in clathrate cells, they can't get together to do this. Each stays chemically inactive.

One future possibility is that oxygen might be trapped this way inside the fuel for rockets. The rocket wouldn't have to carry separate tanks for the fuel and the oxygen with which it must combine to produce power.

The trapped molecules inside each cell can be set free by burning the crystalline material, or by dissolving it.

# From Clerk To Star Is Story Of Jap Actress

HOLLYWOOD, Oct. 7 (AP)—From \$60 a week travel agency clerk to Hollywood star in two months—that's the amazing success story of Miiko Taka, a girl who says she "never had a desire to be an actress."

"Imagine," Miiko says, "six months ago I would have walked across Los Angeles (50 miles in some places) just to see Marlon Brando. And now I'm on the screen making passionate love to him."

The vehicle for this love-making is the film "Sayonara" in which Miiko plays Brando's sweetheart in the James Michener love story. She had never acted before, but Brando picked her for the part.

A frightened Miiko told her parents of her good fortune. Her father said:

"Maybe this is the way meant for you. Do the best you can. Don't act. Live the part."

And Miiko, a lovely young Nisei

# Japanese Ancestry But American Birth—Rode to Stardom For Her Portrayal

No sooner had it been previewed than Hollywood began talking about her performance, Brando's and the picture as candidates for Academy awards.

Brando calls her one of the most sensitive performers he ever worked with.

As the 24-year-old beauty tells her own story:

"It is all such a beautiful dream. I hope others have the same dreams. A girl friend told me a search was on for the female lead in the film and that Director Joshua Logan said it must be a Japanese girl. My friend suggested that I write Mr. Logan.

"I had been spotted by a talent scout at a festival in Los Angeles where I live. He gave me his card, but I never had a desire to be an actress. However, my friends insisted . . . I decided that if my friends had faith in me, I must have faith in myself."

# Lehman Resting

NEW YORK (AP)—Former Sen. Herbert H. Lehman (D-NY) was reported today to be resting comfortably in Doctors Hospital where he is being treated for a slight heart irregularity. He is 79.

# Selfishness Blamed For U.S. Failure

DALLAS (AP)—A Dallas electronics scientist charged yesterday attempts to obtain contracts and fame slowed U.S. efforts to launch the first earth satellite.

Austin Stanton, president of Varo Manufacturing Co., said "Evidence of this lies in the original determination that America had the capability of launching the first satellite at the beginning of the program. What happened to those capabilities? Where did the program go astray?"

The Varo concern is an electronics firm which does defense work and was one of the first to get a contract involving satellites.

# Storm Tracked

GUAM (AP)—Winds of Typhoon Hester still were increasing after passing the 100-mile-an-hour mark as the storm moved northwest from Guam, the Navy's fleet weather station said today. A weather plane reported the storm moving at about 10 miles an hour 340 miles northwest of Guam.

# 4th Quint Loses Its Fight For Life

TOULON, France (AP)—Roland, last but one of the Christoffe quintuplets, died about 4 a.m. today after a five-day fight for his life.

Doctors would make no prediction about the chances of survival for the remaining baby, Michele.

The five babies were born Wednesday, three months prematurely, to Mrs. Camille Christoffe, wife of a social security official. A boy and two girls died within 12 hours.

# Ends Sour Acid Stomach Distress

—or Your Money Back

There's nothing quite like NEUTRACID — Dr. Bridgman's famous formula for Gas, Heartburn, Indigestion or any Sour Acid Stomach upset. Take good advice — start taking NEUTRACID today. You can get it at any good drug store — not delighted with your first bottle get your money back.

# Pontiac Displays Entirely New Line

DETROIT (AP)—Pontiac, with an entirely new line of cars for 1958, expects to increase its share of the market next year.

Pontiac displayed its new cars at a preview today. Details are being withheld. Pontiac has made major engineering and styling changes for 1958, however. Industry gossip has it Pontiac will present an entirely new series in its 1958 line with a new engine. It also has been fairly well under-

stood that Pontiac will have a refined version of fuel injection. Pontiac reportedly has no heavy inventory of unsold 1957 models in its dealers hands.

# Negroes Beaten, Shot In Brawl

BEAUMONT (AP)—A police captain said a Negro musician was shot and another beaten last night in a fight between several Negroes and whites.

Mabry Landor Jr., 17, of Beaumont suffered shotgun wounds in the thigh, arm and stomach from a shotgun blast. His condition was not believed critical. Leroy Gillroy, 44, also of Beaumont, received cuts and bruises around his head.

Patrol Capt. Clyde Russ said it was not determined who fired the shotgun. He said the fight broke up before officers arrived. No weapons were found.

Russ said an earlier incident at a tavern where Landor and a group of Negro musicians were playing in which a Negro's car and a car occupied by two white youths bumped fenders might have caused the fight.

He said the fender bumping caused a mid argument between the two white youths and the Negroes but no violence. He said the gang fight took place sometime later away from the tavern.

Russ said the two white youths who were involved in the earlier argument were arrested but denied being involved in the fight.

# Victims Laugh Selves To Death

SYDNEY, Australia (AP)—Twenty New Guinea natives afflicted with the kuru—laughing disease—are laughing themselves to death in Okana Hospital, in the eastern highlands of New Guinea.

Sir Macfarlane Burnet, director of the Walter and Keliza Hall Institute for Medical Research in Melbourne, says the grim disease, probably inherited, is one of the world's rarest and almost always is fatal.

So far 70 natives are afflicted with kuru.

An Okana Hospital official said the walls there shake from time to time with hysterical outbursts of laughter.

"Some of the 70 victims already are laid down to die, after exhausting themselves with laughter. Soon they'll be paralyzed and die."

The official said he had been told there is one village in the highlands "packed with laughing men and women."

The disease was discovered by an American, Dr. Carleton Gajdusek, who recently spent 15 months in the Hall Institute.

# Anti-Merger Charge

WASHINGTON (AP)—The government charged today that Procter & Gamble Co. violated the anti-merger law in acquiring the Clorox Chemical Co. of Oakland, Calif.

Thou wilt keep him in perfect peace whose mind is stayed on thee. Isa. 26:3 — If our wills are committed to do God's will we are free from the responsibility for results. God will take

## Three-Ring California Circus

To Calvin Coolidge's laconic "I do not choose to run in 1952" can now be added another political statement equally brief, but of opposite intent.

Senator William F. Knowland, Republican minority leader in the Senate, put it this way:

"I shall be a candidate for governor of California in 1958."

This wasn't exactly news, since it had been booted around for a twelve-month, but it was definite and to the point.

He is running for the four-year term, Knowland said, "with no purpose other than, if nominated and elected, to devote myself faithfully... for the term or terms to which I might be elected."

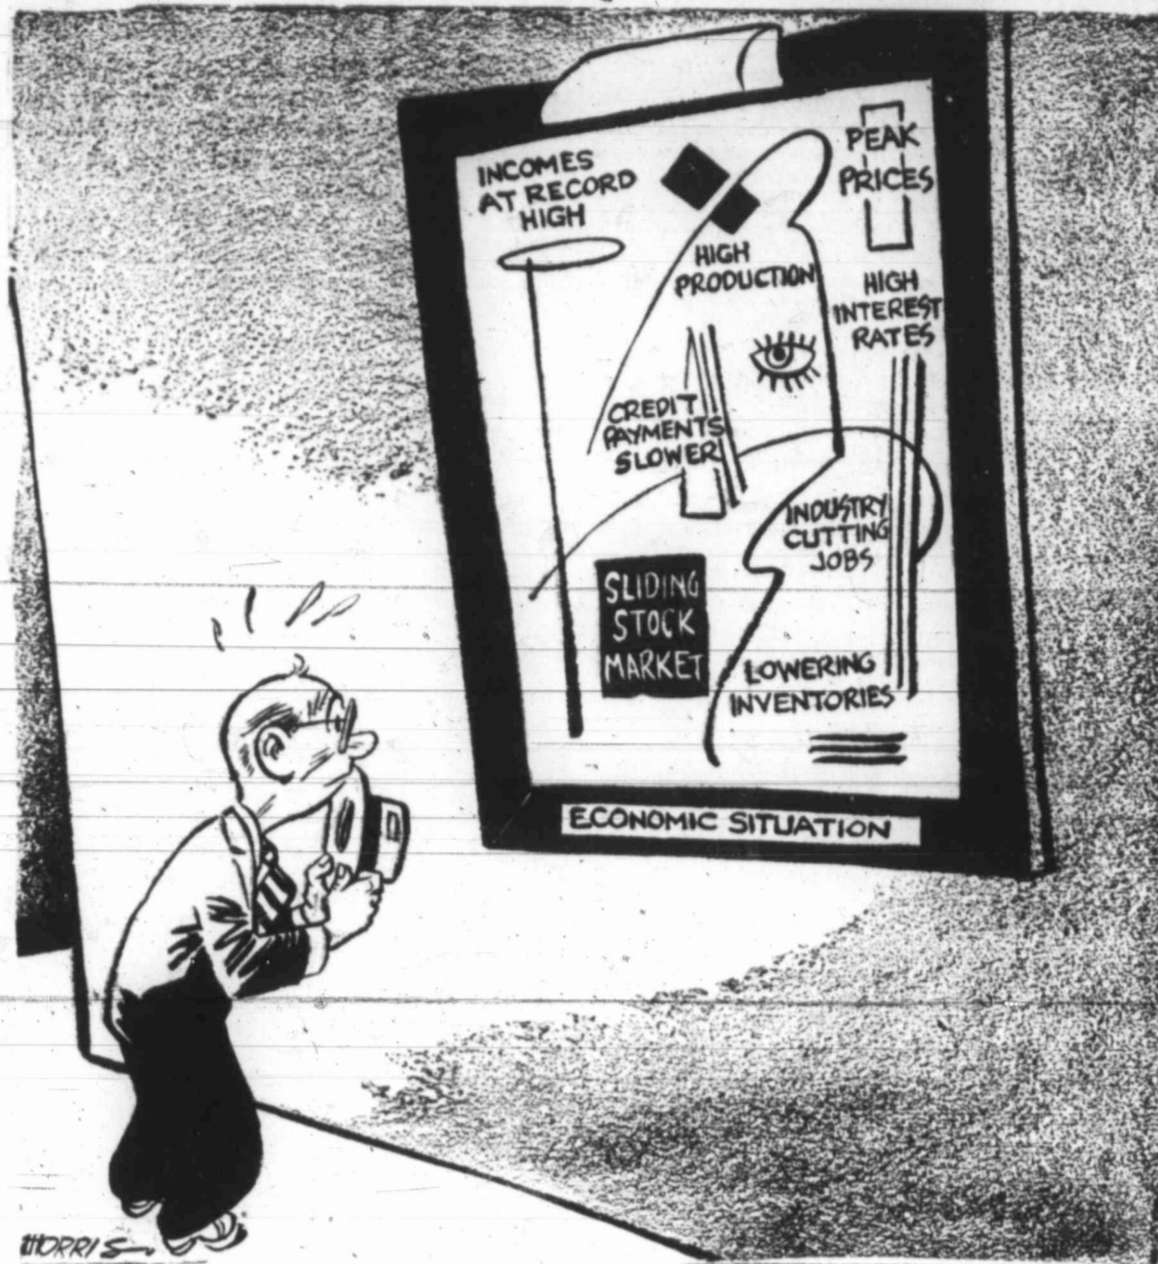

This seems to say Bill Knowland has no presidential aspirations for 1960, but Governor Goodwin Knight, his opponent for the post he now seeks, wasn't fooled for a minute. Four hours after the Knowland announcement Knight called the move to unseat him a "hydra-headed bid" for the presidency. It was, he added, "a thinly disguised invitation to his (Knowland's) later 'draft' for presidential nomination in 1960."

Thus the long-brewing three-way fight among Knight, Knowland and Nixon comes out in the open, with no holds barred. All three men are more than suspected of

harboring GOP presidential bees in their bonnets. As vice president, Richard Nixon has the post position, but the California governorship is held to be as good a jumping-off place as any, and Knowland and Knight will be fighting for this intermediate plum on the road to the presidency.

Will the California battle royal simmer down to a fight between Knowland on one side and a Knight-Nixon-combo on the other? No love is wasted among these three ambitious men, but misery loves company and any port in a storm. Nixon is everything but an avowed presidential candidate, but it will be almost impossible for him to take a neutral stand between Knowland and Knight. In the end, being a shrewd politician himself, Nixon may decide his attitude on the basis of this question: "Which man, Knowland or Knight, will be the most immediate threat to my own presidential ambition in the governor's office at Sacramento?" Having made his decision on that point, Nixon may take either an open or a covert stand. In any case, the man really on the spot in California is neither Knight nor Knowland, but Richard Nixon.

California is likely to be the most exciting spot on the political map for 1958.

## Pioneering On The Edge Of Space

The launching of the first earth satellite by Russia is exciting scientific news. The fact that an object has apparently been hurled into the fringe area of the earth, almost staggers the imagination. It is the sort of thing towards which our clear away the cobwebs—from popular thinking which tends to picture Russians as bushy-haired robots or dumb peasants.

Of course Russia has its peasantry and a mass fitting into the great average, but she also has a galaxy of brilliant scientific minds. For this and for giant scientific strides made within the past generation, one can well have admiration for Russia.

Now that she has won the distinction of having been first, let us hope that some of the cloak of secrecy will be lifted to let all the world in on the exploration of the perimeters of space.

It is, however, one to be concerned with the competitive aspects of the so-called race to launch the first earth satellite, then we apparently have been bested at our own game. Perhaps this will serve to clear away the cobwebs—from popular thinking which tends to picture Russians as bushy-haired robots or dumb peasants.

## David Lawrence

### \* Violating 'Supreme Law Of The Land'

WASHINGTON—Many lawyers are writing to this correspondent from all parts of the country asking when President Eisenhower and the commanding general of the U. S. Army at Little Rock are going to uphold "the supreme law of the land" and cease violating a specific statute passed by Congress which forbids the use of federal troops to enforce court orders.

The law in question—known as the "Posse Comitatus Act"—was originally passed in 1878 but was restated and re-enacted by Congress on August 10, 1956, and now reads as follows:

"Whoever, except in cases and circumstances expressly authorized by the Constitution or act of Congress, willfully uses any part of the Army or the Air Force as a posse comitatus or otherwise to execute the laws shall be fined not more than \$10,000 or imprisoned not more than two years, or both. This section does not apply to Alaska."

Originally this law, as passed in 1878, contained a reference only to the Army. But in 1956, when all federal laws were re-codified to eliminate surplus language and to bring the phraseology up to date, the words "Air Force" were included.

As one lawyer, now retired from a legal branch of the armed services, writes: "Obviously the only reason for this statute and its predecessor is to insure the people against the use of troops to enforce a court order; otherwise, the law has no meaning whatsoever."

There is, of course, no act of Congress which has "expressly authorized" the use of federal troops to enforce a court order. The three sections of federal law which were cited by President Eisenhower in his proclamation ordering federal troops into Arkansas have been restricted by the above-quoted "Posse Comitatus Act."

There is, moreover, no provision in the Constitution by which the use of troops to enforce court orders is "expressly authorized." The Constitution says the President "shall take care that the laws be faithfully executed," but it does not say he can use any means he pleases. The

statutes specify the means whereby marshals and the thousands of citizens who may be deputized to act as assistant marshals can enforce the laws of the United States. This is what is known as a "posse comitatus" engaged in "civil process."

There are those who argue that, since the Constitution itself mentions "the supreme law of the land," the President may take any means he wishes to enforce any law. Here, however, is exactly what the Constitution says:

"This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land."

Nothing is said to the effect that decisions of the Supreme Court or orders or mandates of the courts interpreting the Constitution are "the supreme law of the land." As one eminent lawyer writes: "No federal or state court of record in America has ever held that a decision of the Supreme Court of the United States or that of any other federal court is 'the law of the land.'"

"Each decision is never anything more than the law of the case actually decided by the court and binding only upon the parties to that case and no others."

Since the Supreme Court has been reversing itself on several constitutional issues for more than 100 years now, the use of troops to enforce an order on which the court could later be proved wrong might do irreparable damage.

This is why the late Charles Warren, himself an assistant attorney general and regarded as the nation's most noted historian in the field of the judiciary, says in his monumental "History of the Supreme Court of the United States," page 748, Volume II:

"However the court may interpret the provisions of the Constitution, it is still the Constitution which is the law and not the decision of the court."

Only Congress, therefore, can pass any law that becomes truly "the law of the land." Only Congress can authorize the use of federal troops to enforce a law. Only the people themselves can amend the Constitution.

## Nip Elopement

ALAMOGORDO, N. M., (AP)—An "elopement" by James Shaw, 10, and Janet Herman, 9, both of El Paso, Tex., was nipped in the bud here recently. When picked up by police, young James was clutching two bus tickets from El Paso to Oklahoma City.

The children's parents arrived by car and took them home.

Janet's mother said the money for the tickets was "borrowed" from her purse.

## Do It Yourself

RICHMOND, Va., (AP)—A do-it-yourself project here saved \$200,000. Prisoners at the penitentiary built it—a new dining hall. The new structure provides space for 1,166 prisoners to eat at the same time. It replaces one with space for 700 and eliminates a two-shift basis.

## Not An Easy Picture To Figure Out

### Ed Creagh

#### Voice Of Future Has Russian Accent

WASHINGTON (AP)—"Beep... beep... beep... beep..." This is the sound of the future. And, at the moment, it has a Russian accent.

Around the world in about an hour and half goes the Soviet moonlet. Constantly its radio transmitter sends back that haunting, telltale beep. You can hear the beep on any short-wave radio. You may be able to see the satellite itself soon. Some say they already have seen it.

The Russians are busy kissing their own reflections in mirrors over their triumph in being first with the satellite. No wonder. The United States would have done more than a little crowing too if this country had taken the first big plunge into space.

How come we didn't, after all the talking U.S. officials did about big plans for a satellite?

Already there is the usual demand for an investigation. Sen. Symington (D-Mo) wants the Senate Armed Services Committee to call in defense officials and scientists for questioning. "This is a

very serious matter that cannot be laughed off," Symington says. There is official pooch-pooching, however. White House press secretary James C. Hagerty shows no dismay that the Russians successfully launched the first artificial moon. "We never thought of our program as one which was in a race with the Soviets," Hagerty says.

Scientifically, it may not matter that the Russians were first with a missile powerful enough to plant a beach-ball-sized sphere more than 500 miles in the air. This country's satellite project is known to be well along and presumably can catch up. But disturbing questions arise in other fields:

1. What does the rest of the world think? The Soviet satellites (of the earthbound variety, that is) are happily trumpeting that Russia has taken over world leadership in research and development. What effect will this have on American allies, to say nothing of the "neutral" bloc?

2. Is this country devoting

enough attention to science and engineering? Many educators and others have long contended that we are not—that the Soviets are forging ahead of us. Will the dramatic launching of the man-made moon force us to answer the question to our complete satisfaction, and will we get moving if we find we have been losing ground?

## Paper Takes Dim View Of Sponsor Of Queen On TV

LONDON (AP)—The Laborite Daily Herald has taken a sardonic view of the announcement that a cosmetic firm will sponsor a telecast of Queen Elizabeth II and Prince Philip at a ball on their visit to the United States.

"Ambassadors, senators, congressmen bow deeply. America's top socialites curtsy. The Queen turns to them and smiles," the Herald said.

"Cut! Darken your eyebrows and deepen your mystery. X's eyebrow pencils make you an eye-ful."

"The Duke of Edinburgh raises a glass to return a toast. He opens his mouth to speak."

"Cut! Girls, get your man by fluttering your eyelashes. He lingers longer when you use X's mascara."

"That's the kind of thing that will happen during the coast-to-coast TV screening of the royal tour of America next month," the Herald declared. "Every few minutes the Queen will be blotted out by advertisement jingles persuading women to buy X's make-up."

The newspaper noted there have been no complaints from Buckingham Palace and quoted an unnamed court official as saying: "In foreign countries people can do what they like in matters like this."

An announcement in New York last night said the Maybelline Co. will sponsor the telecast at the hall in New York Oct. 21. The firm, which sponsored television coverage of the wedding of Prince Rainier II and Grace Kelly, had arranged with CBS-TV for a 45-minute program.

## Poles Call A Halt To Free Trade Licenses

WARSAW (AP)—Polish authorities have stopped issuing new licenses for private trade, hoping to prevent competition with a network of state-owned stores.

The state shops are admittedly inadequate.

The move is a pullback from last year, when restrictions on private business were eased to improve living standards and find jobs for officials let out in a streamlining of the government administration.

But the Communist press recently has been blasting what it calls speculators and has demanded a review of trader licenses.

Bogdan Mieluszny, chairman of the Private Trade and Services Assn., took issue with the Communist criticism. Charges against private business are exaggerated, he said in an interview.

Official figures show there were 25,328 private stores last June 30 compared with 11,905 in September 1956. To most people they appear to play a useful role in a system where—as the latest Warsaw joke puts it—you are free to talk treason on a streetcar but can't buy a collar button.

## Around The Rim

### They Carved Initials 250 Years Ago

One thing and another:

There must be better ways to leave one's mark for perusal by future generations than by carving, burning or painting initials on monuments, priceless pieces of art, flagpoles, buildings, bridges, sidewalks, and, yes, gravestones.

Such a practice has been going on for centuries, however.

Initials dating as far back as 1727 have been found carved on the coronation chair in Westminster Abbey.

Commenting on the hasty use of tranquilizers used in this country and the British Isles recently, a French observer had this to say:

"Half the people who now consult doctors have psychological, not physical, maladies. They suffer from the modern curse called anguish. In the 17th century it was 'vapors.' In 1830, at the peak of the romantic period, it was languor or melancholia. In 1950 it was spleen. Most people don't know what they want. They are afraid of spending 24 hours alone. Silence frightens them. Many young folks nowadays eat, study or read to a musical accompaniment. Industrialization is the chief cause of nervous disorders."

I think the time is not too far re-

moved when atomic power will make it possible to change our scenery as we see fit.

For instance, if the majority reason that West Texas would look better with a range of mountains from San Angelo to Amarillo, it will be possible to provide them.

Did you know that America's favorite summer dish, watermelon, originated in Africa? Egyptians grew the giant member of the cucumber family in the Nile valley thousands of years ago.

The value of the annual watermelon crop in this country has risen to \$43,500,000 annually.

When Shakespeare wrote his indelible literature, his vocabulary was limited to 15,000 words.

It is classified as a fruit, but botanically, it is a member of the vegetable family.

Now, the English language embraces 600,000 words and is growing daily. Shakespeare didn't need them to express himself but most of us still have to use our hands to talk.

—TOMMY HART

## Marquis Childs

### Gaudy Campaign Ahead In California

SACRAMENTO, Calif. — In this most spectacular of all the 48 states a struggle has begun that promises to provide the nation with a gaudy political spectacle.

Sen. William F. Knowland, determined, tireless, ambitious, is challenging Gov. Goodwin J. Knight, equally determined, tireless and ambitious, for the governorship. What makes the contest so important for the Republican party, not only in the state but in the nation, is that it draws the line between Eisenhower Republicans and Taft Republicans.

The Democrats, who have captured the top office in California only once in the past 30 years although they lead in registration roughly three to two, are sitting back hoping that the two factions will kill each other off. This will give them an opportunity to move in with great expectations for 1960 and after.

In Knight, who is seeking re-election to a second full term—he succeeded to the governorship when Earl Warren became Chief Justice of the United States—Knowland has taken on a formidable foe. While it is much too early to make any predictions, since the primary does not come until next June, the old hands here believe the senator has an uphill fight ahead of him.

The governor is busy putting his brand on the formula that has succeeded so well for him and for Warren before him. It is a generally progressive line, shrewdly tailored to the expanding needs of this extraordinary state that is growing at the rate of half a million persons a year, two-thirds of them coming in from every part of the country.

Stopping just short of the "modern Republican" label, Knight wants to leave no one in doubt that he is the Eisenhower man in this race. He is telling audiences around the state that he has never opposed the President, and at the same time he puts the tag of "reactionary" on Knowland.

In the latter endeavor, Knowland has

given a big assist by coming out for the "moderate" right-to-work law. Presumably that would be popular in the wake of disclosures before the McClellan committee of racketeering and corruption by ruthless union bosses.

But Knight, who had the support of a large part of organized labor in his campaign in '54, is meeting the challenge head-on. This reporter heard him tell an audience composed largely of businessmen in neighboring Stockton that the Republican party in California could not possibly go into the campaign with the "stigma of being against organized labor."

The 1,700,000 trade union members and their families in California add up to something like 3,500,000 votes, he points out, and how can any candidate expect to win with that opposition?

His performance is brisk, breezy and with little of the conventional political bombast. At the same time, one understands why, with his booming vigor, he has such a large reputation as a hand-shaker and a convention greeter. He has retained most of the able people whom Warren gathered around him in his unprecedented three terms as governor. But he has also made some 2,000 appointments to state jobs, and in terms of organization support, that is not to be sneered at.

Vice President Richard M. Nixon, who forms the third side of California's political struggle, has been rumored as favoring Knowland. While Knight may be proved entirely wrong, he is confident that the Vice President, whom he opposed for renomination last year, will maintain a benevolent neutrality. He bases this belief on the reported refusal of Nixon adherents to serve Knowland's campaign organization.

The struggle is, of course, in the preliminary stage. How much damage the two men will do to each other—and to their party—when it warms up is what Republicans are beginning to ask themselves.

## Inez Robb

### Little Rock Ruined Our Moral Credit

MADRID, Spain—The American citizen who is planning an immediate trip to Europe had better be prepared to answer the question, "But why did the United States bother to fight Hitler?" Because, phrased one way or another, that is the question he is going to be asked time and again.

America's moral credit in Western Europe has been bankrupt by the situation in Little Rock. It is as simple and as tragic as that. Never before in my generation has respect for the United States been at such a low ebb on this side of the Atlantic. Events in Arkansas are an unearned field day for our enemies and a bitter blow to our friends.

Europe has listened with admirable patience and restraint since World War II to the high moral preachments of the United States. Now, Europe is putting them side by side with our moral practices, as seen in Little Rock, and the result is revulsion.

The Governor of Arkansas has kicked away the nation's dignity and decency in the opinion even of America's friends. It is incredible that a pipsqueak official, for mean political advantage, should have done such incalculable damage to the United States. He has largely destroyed the reservoir of good will that Uncle Sam has slowly and carefully built since World War II trust the leadership of the free world in his hands.

"Free? Free for what?" Europeans are asking. Free for a mob of white savages to jump, yell and kick in the chest of a defenseless man because his skin is black? Free for a middle-aged white bully to hang menacingly over an 11-year-old schoolboy, his black face taut with fear and determination? Free for female mormons, who look like howling devils, to spit in the face of an adolescent girl because the accident of birth gave her skin darker than theirs?

Pictures of these and other equally revolting incidents are spread across European papers day after day, with appropriate banner headlines. Overseas editions of Newsweek, Time, Life and American papers carry even more graphic pictures and stories.

God help us, but these are the kind of pictures that came out of Germany after Hitler's rise to power and horrified and

enraged the United States when another minority was under attack. It doesn't require a long memory to associate the adult bully boys and girls of Little Rock with the twisted, fanatic, hate-filled faces of Hitler's handy men and women.

A Europe—all but destroyed by Hitler is quick to see the likeness and to find it horrifying. And when you try to explain that even in Little Rock, the Fausbus-followers are only a minuscular band of bigots, a European today looks at you with polite incredulity.

And when the European goes on to ask for some kind of explanation of the savage emasculation of an Alabama Negro, picked at random by K. K. K. sadists, and how justice will be administered in the case, an American has the helpless knowledge that, for the moment, he and his nation are being equated with Attila, the Hun.

When Americans now resident in Europe either on official or private business ask me, in despair, if I can not write a column that will tell the home folks what irreparable damage is being done to the United States by the Arkansas incident, my answer is, "No. You ask the impossible."

Moderate, decent Americans from one end of the land to the other are only too well aware of the damage to American prestige inherent in Little Rock's man-made tragedy. They do not need to be told, and it is impossible to try to reach the mob. A mob is insane, beyond reason and too stupid to realize that its own destruction is contained in the holocaust it builds for others.

## Aid Missile Study

COLUMBUS, Ohio (AP)—Technologists are taking a lesson from nature to perfect long-range missiles. They're studying "falling stars."

Scientists at Battelle Institute here, who are conducting research for the Air Research and Development Command, are studying the chunks of metal which have soared for ages through space.

They believe the meteorites will help them find ways to bolster space missiles resistance to severe heat as they re-enter the earth's atmosphere.

## MR. BREGER

"You the party who won the consolation prize on the TV quiz show?"

### Wrong Diet Harmful

Foolish dieting almost ruined Myrna Hansen's health, when she tried to shed 15 pounds quickly. Her meals weren't nutritionally planned. The pretty actress is back to health and will soon appear in MGM's "Raintree County."

### HOLLYWOOD BEAUTY

## Match Your Eating To Schedule Of Activity

By LYDIA LANE

HOLLYWOOD — "Suit your eating to your activities," pretty Myrna Hansen advises, "or you are heading for trouble!" Before Myrna entered the Miss Universe contest and became Miss USA in 1954, she never thought of being an actress—or of dieting to keep her figure. "At the time I wanted to be an athletic director," she says. "I enjoy sports of all kinds and always have. I was used to eating everything I wanted without worrying about putting on pounds. "Then I went on a personal appearance tour after I won the title. I was a guest of honor at luncheons, dinners, teas and parties. I continued to eat as I had before, without taking into consideration that I was now getting an exercise. When I came back to Hollywood I had gained 15 pounds. "I was so embarrassed about being so fat that I wanted to lose in a hurry. Someone told me of an egg diet, but I foolishly decided to make my own rules. "At the end of the month I looked fatter than when I began, because my stomach had swollen from malnutrition. "What happened after that?" I asked. "Let's not go into that," Myrna sighed. "But I was terribly sick and nearly ruined my health for

life. Fortunately I didn't, and I'll never abuse my body again. When I look back on it, I don't see how I could have been so stupid as to diet without advice. "I wanted to know if Myrna had had a weight problem since. "Only an intentional one," Myrna smiled. "When I tested for 'Raintree County,' I was told I could have the part of the buxom girl if I put on 10 pounds. "Did it take you very long to gain?" I asked, knowing that she had won the part. "Not at all," Myrna laughed. "I indulged myself with my two favorites—peanut cream pie with ice cream and buttered waffles with maple syrup. But," Myrna added, "when the picture was finished I went on a planned diet and lost the 10 pounds in two weeks. "This time I had plenty of meat, cottage cheese and eggs, so I was well-nourished and never really hungry. There are so many wonderful diets today! And the nice part about them is that when a diet is nutritionally right, you don't crave anything—even sweets. "TWO-WEEK DIET That two-week diet which Myrna used to lose her extra 10 pounds has long been a favorite with dieters. It's designed to help you lose about a pound a day. Results are guaranteed! For your copy of this "Two-Week High Protein Diet," ask for Leaflet M-1. Send your request with 5 cents and a self-addressed, stamped envelope to Lydia Lane, Hollywood Beauty, in care of The Big Spring Herald.

### Methodist Circle To Fill Duffel Bag

Members of the Fannie Strippling Circle of First Methodist Church are being asked to bring good used clothing to the meeting to be held Tuesday morning in the home of Mrs. John Davis. This was announced today by Mrs. Royce Satterwhite. The clothing for men, women and children, will be packed in duffel bags for shipment overseas. Articles brought after Tuesday's meeting, should be left at the home of Mrs. Satterwhite, 1907 Johnson.

### Elbow P-TA Slated

The Elbow P-TA will meet Tuesday evening at 8 o'clock in the cafeteria at the school. All officers are asked to be present at 7:15 p.m. for an executive meeting.

## Local Women Attend B&PW District Meet

Several members of the local Business and Professional Women's Club attended the meeting of District Eight in Lamesa this weekend. Going to Lamesa Saturday were Marie McDonald, Mrs. Neil Frazier, Mrs. Elzie Johnston and Ima Deason. The group attended an open house given Saturday afternoon in the home of Mrs. Irene McDaniel, and a reception Saturday evening in the home of Mrs. Reid Bethel. Sunday morning, Mrs. Johnston was a guest at the president's breakfast, which was given in the Caprock Room of Turners Cafe. Mrs. Nancy Johnson, director of the district, presided for the business sessions. Mary Ethel Dunn

## Fight Flu With Paper

"The informed homemaker can help protect her family against Asian influenza by keeping house with paper products," according to Dan Mahony, an executive of a paper cup corporation. "The home will be the first line of defense against the expected virus attack," say Mr. Mahony. "Health experts predict that most cases of Asian flu will be treated at home rather than in hospitals. The home must be safeguarded, first, against infection and second, against spread of the disease if it strikes any member of the family." Here are a few suggestions from Mahony as to how to "throw away" germs and protect your home:

1. Use a home dispenser with convenient paper cups in the kitchen and bathroom to replace common drinking glasses. Children will enjoy using them.
2. Use paper plates and cups for all meals to avoid germs which usually cling to not quite antiseptically washed dishes. Children will love the "party atmosphere" colorful paperware will lend to mealtimes.
3. Use paper containers for desserts, eggs and between-meal snacks. This will not only lessen housework, but avoid washing especially sticky hard-to-clean glasses and cups.
4. Use paper napkins, paper tablecloths and paper towels. Twice-used linens can convey germs.
5. Use cleansing tissues instead of germ-carrying handkerchiefs. If someone does become ill, use paperware for sickroom use. Scoop up the trayful of paper cups and "dishes" and throw them away.

In addition to following these germ-avoiding housekeeping rules, Mahony recommends that the homemaker follow the suggestions of health officials in keeping a strict eye on proper diet during the pre-epidemic period so that resistance to disease will be high. Meals should be well-balanced with plenty of proteins and vitamins.

337-N

## Sleepytime Gal

Here's a dolly that will be the bedtime favorite of the little lady. No. 337-N has pattern pieces; hot-iron transfer for face; sewing and embroidery directions. Send 25c in coins for this pattern to MARTHA MADISON, Big Spring Herald, Box 438, Midtown Station, New York 18, N. Y.

## P-TA Meet Postponed

The meeting of the North Ward P-TA, originally slated for Tuesday afternoon at the school, has been postponed until Wednesday afternoon. The regular meeting will take place at 3:30 p.m. at the school, with a meeting of the executive board at 3 p.m. All members are urged to attend this session, which is the first for the season.

## Harvest, Halloween Motif Used At Mu Zeta Party

A harvest and Halloween theme was featured at the buffet dinner given Saturday evening by the Mu Zeta Chapter, Beta Sigma Phi, for sorority rushees and husbands. The affair was held at the base pavilion, with the buffet table decorated in fall shades and harvest flowers. Whistles and Halloween articles centered individual tables where guests were seated. Diversion for the evening was a style show, in which husbands modeled crazy hats. Card games were played and there was dancing. Hostesses for the party were Mrs. Ray Pipes, Mrs. Elmer Giles, Mrs. Bill Crooker and Mrs. John Blystone. Guests, other than husbands of members, were Mr. and Mrs. Billy Mac Sheppard, Mr. and Mrs. Mel-

vin Witter, Mr. and Mrs. Gordon Links, Mr. and Mrs. Clyde Thompson Jr. and Mrs. Doyle Bynum. A regular meeting of the sorority will be held this evening at the home of Mrs. Harry Gunn, 1809 Main.

## New Time-Saver In Food Line Has Been Introduced

Knowing that convenience is today's "buy" word among modern shoppers, a meat-packing company has introduced new canned Ham Quicks. These are tasty sticks of chopped ham, pre-formed and packed ten to the can. The "quicks" are already cooked and require only five minutes heating time from can to table. The piping hot, delicately browned ham sticks are real appetite tempters. Besides being quick and easy to serve, they are handy to store too. The compact cans take little space on the kitchen shelf where they're ready and waiting to be used in hurry-up meals. The versatile ham quicks fit into a variety of round the clock meals. For example, at breakfast, the fine ham flavor is ideal with eggs, poached, hardcooked, or sunnyside up whichever your family prefers. At lunch or dinner, many delightful main-dish combinations are possible. Snacks and appetizers are a cinch too. The ham quicks may be cut into bite-sized pieces for a dainty hors d'oeuvres tray. When hearty sandwiches suit the occasion better, ham quicks again come to the rescue.

## Basic Training For Scout Leaders Set

Another basic training course for Boy Scout leaders has been announced by Ben F. Johnson Jr., chairman of the Scout training team. New course material will enable leaders to complete course in three sessions instead of the six sessions previously required. The first session is on Oct. 17 when the topic will be "What Boy Scouting Is." The Oct. 24 topic is "Troop Operations" and the Oct. 31 is "Meetings and Activities." All sessions will be held in room No. 3 of the Science Building of Howard County Junior College. Additional information may be had from Johnson at the College.

## Scotts Are Parents

Mr. and Mrs. Vancil Scott of Odessa are parents of a son, Kenneth Craig, born Friday in the Medical Center, Odessa. Mrs. Scott is the former Frances Henderson, daughter of Mr. and Mrs. Marvin Hanson, 312 Mesquite, is the baby's aunt. Mrs. Ernest Scott, 314 NE 12th, is the baby's paternal grandmother.

## Quick Chowder

Add cooked shrimp to frozen condensed cream of potato soup for a main-dish chowder. Nice to serve at lunchtime with a salad and a hot bread.

## Returns From Visit

Mrs. B. J. Petty, Garden City Road, has returned from Huntsville, where she spent a week visiting her daughter and son-in-law, Mr. and Mrs. Bob Ethridge. Mrs. Ethridge is the former Marie Petty.

## Son Is Born

Mr. and Mrs. Jerry Gibson, 1101 Mulberry, are announcing the birth of a son, Christopher Lee, at Malone-Hogan Hospital on Sept. 30. The Gibsons' name was given erroneously as Gilmore in the Sunday edition of Stork Club.

## 1930 Hyperion Club Begins Year With Fall Luncheon, Book Review

The first meeting of the 1930 Hyperion Club was held Saturday in the home of Mrs. Morris Patterson. Hostesses for the affair, which was a review luncheon, were Mrs. Patterson, Mrs. L. E. Powell, Mrs. Malcolm Patterson and Mrs. Elmo Wasson. Guests were served at a buffet and found places marked with small cards. Tables were in yellow linen with arrangements of straw baskets holding fall grains in yellow, green and purple. Mrs. Wasson presided for the meeting, which was opened by Mrs. Malcolm Patterson, chairman of the yearbook committee. She presented a thought for reflection and introduced the program. A book review, "Tall Houses in Winter," by Doris Betts, was given by Mrs. B. L. LeFevre; she gave the story of Ryan Godwin, with his reactions to the various phases of his life.

In the business session, a report was given on the recent meeting of the Mental Health Association. Mrs. Leroy Tidwell, representative from the club, told of the ways in which the group might help with the work of the association. Assistance is needed with the reading and library work, with the fashion shop and cosmetic supplies, and with preparation and serving of refreshments at the dances held at the State Hospital. Help is also needed for assistants for folk dancing and square dancing lessons. Mrs. Tidwell said.

## Mrs. Terry Leaves For Canada Visit

Mrs. J. L. Terry left Sunday by train for Calgary, Alberta, Canada, where she will visit Mr. and Mrs. Carl Nance and family. Mrs. Nance is Mrs. Terry's daughter. Rick Terry, a student in Texas Christian University, Fort Worth, was at home for the weekend for a visit with his mother before she left. Mrs. Terry plans to be in Canada until Thanksgiving.

on the meeting of that group. Nineteen attended.

## Give Yourself New Hairdo To Match That Sack Attire

Looking for a new hairdo to wear with the new Paris sack? You couldn't find a better answer, according to Fred Fredericks, hair stylist, than the hairdo of the 1920-famed blues singer, Helen Morgan, whose coiffure was as famous as her beaded chemise. Inspired by the forthcoming film, "The Helen Morgan Story," the style that is becoming so popular, says the man who "remembers it when," is faithful to that of the famous piano-perching blues singer. To try this coiffure out in front of your own mirror, Fredericks says to trim your hair to medium length (about chin level) and to part it low on one side. In the fullest section, set jumbo-size pin curls in two rows across your head to the other side of the parting. When these are brushed out, you'll have one deep wave. Brushing and pushing it up with your hand will coax an even deeper furrow to curve around your head.

CASCADE KENTUCKY STRAIGHT BOURBON WHISKY

66 PROOF - 50% A BOTTLE DIST. CO. LOUISVILLE, KY

### Run Over By Own Automobile

Mrs. Vega Ritchie, surgical superintendent of St. Luke's Hospital in Denver, Colo., examines the marks left by an automobile tire on the face of Charles House. The 80-year-old Richfield, Idaho, man was knocked down by his own car in the mountains west of Denver and a front wheel passed over his face. Doctors, however, said that his only apparent injury was abrasions.

## Pleven Will Form French Government

PARIS (AP)—Rene Pleven agreed today to try to form France's 24th postwar government. Few members of the National Assembly thought he would succeed.

President Rene Coty sent the presidential plane to Brittany for Pleven, who was vacationing at his home there.

Pleven was Coty's second choice to succeed Premier Maurice Bourges-Maunoury.

Guy Mollet, Socialist party leader who was premier for 18 months until last May 22, went to the Elysee Palace last night and told Coty he could not form a government.

The Socialists refuse to take part in any government which is not given special powers to fight inflation by price freezes and strict economic controls. Mollet apparently decided that there was no hope of his rallying enough support for this kind of a program.

Such measures are opposed by the center group of independents, who helped defeat Premier Maurice Bourges-Maunoury last Monday when it joined opponents of the government's Algeria home rule bill.

Pleven also was believed unlikely to muster the necessary majority in the National Assembly although he is a skillful conciliator who twice served as premier, in 1950 and 1952.

He has the advantage of having kept carefully on the sidelines during the recent battles over Algeria and French economic policies. But in order to be chosen premier he would have to put together a coalition broad enough to withstand the strong opposition of Communists on the extreme left and Poujadists on the extreme right. If any large center

groups opposed him his task would be hopeless. Pleven is a member of the small Democratic and Socialist Union of Resistance, slightly left of center in the 15-party National Assembly. The UDSR has held an influence far out of proportion to its size because it often has held the balance of power in center coalitions.

A tall, 56-year-old former businessman, Pleven is best known abroad as author of the European army plan which the French Assembly refused to ratify.

### Japs Report Russ Nuclear Explosion

TOKYO (AP)—Japan's Central Meteorological Observatory reported today that the Soviet Union exploded a nuclear bomb yesterday north of the Arctic Circle in eastern Siberia.

An observatory spokesman said the bomb was "larger than 10 megatons," a force equivalent to that of 10 million tons of TNT. U.S. experts assume that any blast in the megaton range means a hydrogen bomb.

The U.S. Atomic Energy Commission announced Aug. 22 that the Russians had begun a new series of nuclear tests. The AEC reported another explosion Sept. 8 and a third Sept. 24, the latter at a site north of the Arctic Circle.

### Claims Naked Eye Satellite Sighting

LONGVIEW (AP)—Police radio engineer C. W. McLendon asserts he has seen the Russian satellite with the naked eye. So does Mrs. L. A. Lloyd of Gilmer, 25 miles north of here.

McLendon said yesterday he had recorded signals from the satellite throughout the day. When they reached their strongest pitch, he said, he checked the sky and saw the satellite between the moon and the horizon. He said it was traveling toward the southwest at 6:40 p.m.

Mrs. Lloyd, describing the satellite as looking "like a tiny second moon," said she saw it at 4:30 a.m. "near the moon."

## Sputnik's Orbiting Leaves A Trail Of Confusing Questions

By ALTON L. BLAKESLEE  
NEW YORK (AP)—In its third day of life, the Russian moon is creating a trail of some confusion concerning three intriguing questions: Is Sputnik — Russian for earth satellite — making some space studies, such as temperatures or space's shooting stars? Is it telling about them in a radio code? Will the U.S.S.R. inform other nations of what Sputnik learns in this maiden voyage into space? Russia's rocket scientist, Dr. A. A. Blagonravov, now in this country, says Sputnik is only broadcasting radio signals so it can be tracked, and is not studying temperatures, or other events in space. And it's not broadcasting anything in code, he adds. But in Moscow, a prominent

scientist says Sputnik is counting hits by meteorites out in space. The moon would have to report this by some code. One possibility is that, due to language translation difficulties, this scientist was referring to future moons, not to Sputnik the first. A Moscow broadcast says Sputnik has provided knowledge of "great scientific value," but gives no details. This could refer just to observations of its orbit, giving clues about air density in space, or to knowledge useful in launching and directing future moons into desired orbits. Some U.S. scientists listening to Sputnik's beeping signals detect changes which they say sound like a code. But they quickly add that this could well be a practice test of a presently meaningless code.

Codes will be essential in any future moons to radio back reports of what is learned in space, since the moons can't land back home. Dr. Blagonravov yesterday called Sputnik an experimental or test shot, and said it was outside the International Geophysical Year (IGY). Both nations have agreed to share fully everything their IGY moons learn. Asked on a TV program NBC-Youth wants to know whether the Russians would share information about Sputnik, he replied: "U.S. scientists observing it can learn very useful information for launching their own satellite. Experiences of Sputnik could help the Russians in subsequent launchings, and the United States with its first one. Dr. John P. Hagen, director of the American moon project Vanguard, said in a telephone interview that the Soviet radio signal appears to contain a code. "It could well have no meaning other than to practice a code transmission," he said. "This would be expected. It's hard to tell if it represents real information."

## Prison Rodeo Off To A Rough Start

HUNTSVILLE, Tex. (AP)—The annual Texas Prison Rodeo, a contest between rugged convicts and wild stock, started yesterday with the doings so rough the attorney general observed that if profits go to buy false teeth for the inmate performers, they'll be needed. An estimated 17,000 watched bucking broncs and Brahman bulls spill convict riders in the various bruising events. Atty. Gen. Will Wilson commented, "If the profits from rodeo

ticket sales go to buy false teeth for inmates, from the looks of things here, a lot of them will need them after the rodeo." The rodeo is held at the prison stadium every Sunday in October. Proceeds are used in a rehabilitation program. S. S. Dublin of Lufkin left a hospital bed to attend as a birthday gift from his daughter, Mrs. Emerson Edwards, publisher of the weekly Trap Banner. Dublin said the rodeo "has been my birthday present for 20 years and I'll keep coming each year if possible."

O'Neal Browning, serving 99 years for murder from Harris County, and Cruz Davila, serving a similar term from Cotulla, appeared likely contenders for the championship. Speedy Creador, doing nine years from Houston, won the mad scramble event. The team of Dwight Hoskins, Jim Dorsett and Herman Siger was first in the famous wild horse race which featured 30 contestants and 10 broncs.

### AF Scientist Goes To Record Altitude

BALTIMORE (AP)—With the world looking to space and speculating when it will be able to send men to the moon, the Air Force announced today it has sent a man to a record simulated altitude of 65 miles.

Niels Jensen, a scientist from Litton Industries, Inc. of Beverly Hills, Calif., made the trip without leaving the ground by wearing a special pressure suit in a chamber capable of producing rarified atmosphere.

Litton designed and constructed the new high vacuum chamber, 15 feet long and 8 feet in diameter for the Air Research and Development Command's Office of Scientific Research.

The pressure suit enables Jensen to provide accurate information about his own physical behavior and to observe the reaction of materials, equipment and instruments under extremely low pressure and density.

### Enrolls At UCC

Frank Buddy Mote son of Mrs. J. C. Mote of 1010 Sycamore has enrolled for the fall semester at the University of Corpus Christi.

### Found Dead

The bodies of Ronald Barrett White, 9, and a 53-year-old woman identified as his grandmother, were found in an abandoned house in Canoga Park, a suburb of Los Angeles. Police listed the deaths as murder and suicide.

### Lamesa Building Totals \$152,000

LAMESA—Recording one of the highest months of the year, the office of Lamesa city secretary Jack Goodloe during September issued building permits totaling \$152,750.

The month's total sent the year's figure to \$946,196 and almost assures the city of a \$2 million year if bids are let on the new hospital before the end of 1957. Construction of the new Lamesa National Bank building is expected to be begun before the end of the year.

Residential construction set the pace for the past month with all but \$21,000 of the total going into permits for new homes, additions and remodeling. The \$21,000 was issued as the cost figure for the new fire station under construction at N. 17th and Bryan.

Observing Pharmacy 'Week'

Gound Pharmacy, above, operated by Wayne Gound at 419 Main, is observing National Pharmacy Week this week by redefining itself to the principles which have made the firm one of Big Spring's outstanding pharmacies.

'No-Roach' Is Scientific Method Of Killing Insects

A new, scientific method for controlling household insects has been developed by the Gaston Johnston Corp. It is "No-Roach," now produced in a "super" concentration for coating with insects which have developed resistance or immunity to conventional insecticides.

No-Roach dries quickly to form a colorless, odorless contact insecticide that stays effective for months. It can be used safely on rubber and asphalt tile, which often are damaged by other compounds.

Easy Way To Kill Roaches And Ants

Scientists recommend that you control roaches and ants the modern way - with Johnston's No-Roach. Brushed just where you want it (table legs, cabinets, sills, asphalt tile, etc.) The colorless coating kills these pests. It's effective for months, sanitary, and easy to use.

Hagoods Operating Permian Snack Bar

For the past two years, Mr. and Mrs. J. O. Hagood have served Big Springers at the Snac-A-Ritz with expert service and good food. Now that same service and food is available at the Permian Snack Bar.

The Snac Bar came under the direction of the Hagoods on Sept. 1, and they said they would endeavor to give the same high-quality service there as they have given at the Snac-A-Ritz. Before it was closed, and prior to opening the Snac-A-Ritz, the Hagoods operated the Ritz Drug at the corner of 4th and Main.

The Hagoods opened the Snac-A-Ritz two years ago Monday. Since then, it has become a favorite stopping place for Big Springers while downtown. Conveniently located - south of the courthouse at 111 W. 4th, the Snac-A-Ritz is handy for a downtown meal or just a quick "cup."

At this anniversary time, Mr. and Mrs. Hagood expressed their thanks to their many customers for patronage during the first two years at the new address. "We consider it a privilege to have served you, and we want to continue to be worthy of your business," they said.

The same type of courteous service which they have given at the Snac-A-Ritz - and also the Ritz Drug before it was closed - can now be associated with the Permian Snack Bar, in the Permian Building.

Citizens can obtain a variety of lunches or a la carte orders at either place. The Snac-A-Ritz opens at 6 a.m. and closes at 10 p.m. Hours at the Snac Bar: 7:30 a.m. to 5:30 p.m. through the week and 7:30 to 2 on Saturdays.

Peasants Riot

HONG KONG (AP) - A pro-Nationalist newspaper reported today that 150,000 peasants rioted in Chekiang Province on mainland China last month.

Big Spring Hardware's Furniture Department Offers High Trade-In Allowances On Bedroom Suites This Week

A large collection of bedroom suites is now on display at the Furniture Department of Big Spring Hardware at 110 Main Street.

NEW LIQUID CLEANS AND POLISHES CARS

Polish your car as you clean it - with POLISHAMPOO. Just apply rich harmless suds, then simply flush off dirt and "road film" that resist ordinary washings. Car dries quickly with no rubbing or wiping, leaving a polished surface. Use POLISHAMPOO regularly to keep car clean and polished.

Available at Piggly Wiggly, J. O. Newsom, Bud Green, Dale Douglass Food Mkt., Jack's Drive-In, Toby's Drive-In, Hull & Phillips, and your local grocery store.

Office, School, Home Supplies Sold By Thomas

The merchandise Thomas Typewriter and Office Supply sells - typewriters, school supplies, office furniture and office equipment - is never out of season.

It is just as much in demand during the spring time as, say, Thanksgiving. Without such offices, business houses and, yes, schools would find their work progressing under a severe handicap, if it progressed at all.

Though Thomas Typewriter and Office Supply aims its service at the business world, it also caters to the student, the salesman and the housewife.

The famous Royal make of typewriter - manufactured in portable, standard and electric models - is stocked by the Thomas concern. Whether you want to purchase a new or used typewriter, or simply rent one for a short time, the place to shop is the Thomas Typewriter and Office Supply.

Posture chairs, steel desk sets, desk lamps, globes, strong boxes, swivel chairs, squares and rulers - these are a few of the many, many items which can be purchased at the local concern.

If you are head of a grocery or a department store and feel your business would be better streamlined with a new adding machine, make it a point to drop by the Thomas Typewriter and Office Supply for a demonstration of their equipment before you buy. The cash registers sold by the establishment are recognized in the business world as the finest in the world, too.

Thomas Typewriter and Office Supply also has a service department, where typewriters, adding machines and cash registers are overhauled and made to run like new.

Nehru Says Present Politics Outdated

TOKYO (AP) - Prime Minister Nehru of India today said the Soviet launching of an earth satellite "forces people to realize that our present-day politics are outdated." "Science and technological advance have gone far ahead of the capacity of human beings to adapt themselves to it," Nehru told a news conference. It is a quite fantastic advance. "Military alliances, armament races and our politics are out of date. The gap between science and technology and normal human thinking is very big. We have to adapt ourselves to our age."

# LOOKING 'EM OVER

With Tommy Hart

The Big Spring schools in general and the coaching staff in particular have been vilified by Buck Francis, a writer who has been bowling over windmills ever since he arrived on the scene at Snyder a couple of years ago.

Francis obviously reasons it is bad theatre to say anything good about the opposition. Even if the truth suffers on occasions, he does not vary from that credo.

Buck's favorite targets are Big Spring, Sweetwater and Lamesa. Occasionally, he gets such places as Abilene and Lubbock in his sights but that is obviously just for practice.

In a recent article, he put the lash on Big Spring for failing to have its 7th and 8th Grade football teams on hand Thursday for a doubleheader with Snyder clubs.

Perhaps someone should have run a test on him for rabies. He was that mad.

Wrote he: "A raw deal to end all raw deals was pulled by the Big Spring school system last night."

"From this corner the stunt they pulled appeared deliberate."

Buck went on to say that 1,000 fans showed up for the two games in Snyder that never took place. He added the local coaches claimed they wrote a letter saying they couldn't make it. No one in Snyder, he added, received such an epistle.

The mixup in dates was unfortunate, sure. But the doubleheader had always been scheduled here as a Saturday date, not for Thursday. And the letter sent from here merely verified the date. If the Snyder coaches didn't receive it, they should fault Uncle Sam's postal system, not anyone here.

The letter was written by Hugh Hamm, one of the 7th Grade coaches, and it not only confirmed the promise made here that the two teams would make the trip Saturday but included the lineup, complete with weights and numbers, as well.

Does that sound like deliberate misrepresentation on anyone's part?

The booking mixup was unfortunate, to say the least, and I'm certain local officials regret that 1,000 people were lured to the Snyder stadium to see the two games.

Francis, in the midst of his vitriolic attack on the school system here, said that all the confusion could have been avoided had someone here confirmed the date via telephone.

Local coaches, in my opinion, were no more obligated to make the call than the Snyder people. The games were scheduled there, not here.

His artless efforts to make local coaches the scapegoats of the incident hit a new low in journalistic abuse.

If relations between the two schools have deteriorated in the past two years, he has done much to fan the flames and sow the seeds of dissension. It's a role in which he seems to delight.

Charley Preas, starting left halfback of the Lake View (San Angelo) Chiefs, was a local resident until a couple of years ago. He was considered a very promising end while playing junior high school ball here.

Dickie Milam, the Big Spring lad who was being counted on heavily to help the Texas Aggie football cause this season, isn't eligible because some of his credits while at Allen Academy weren't transferable.

He'll be qualified to play two seasons starting in 1958, however.

Lamesa, next football foe of the Big Spring Steers, had three regulars out with injuries during its 21-0 win over Brownfield last Friday night.

Soph Kirk Wiggins did the quarterbacking for the Tornados.

**'We Let Down Too Often,' Says Steer Coach Milch**

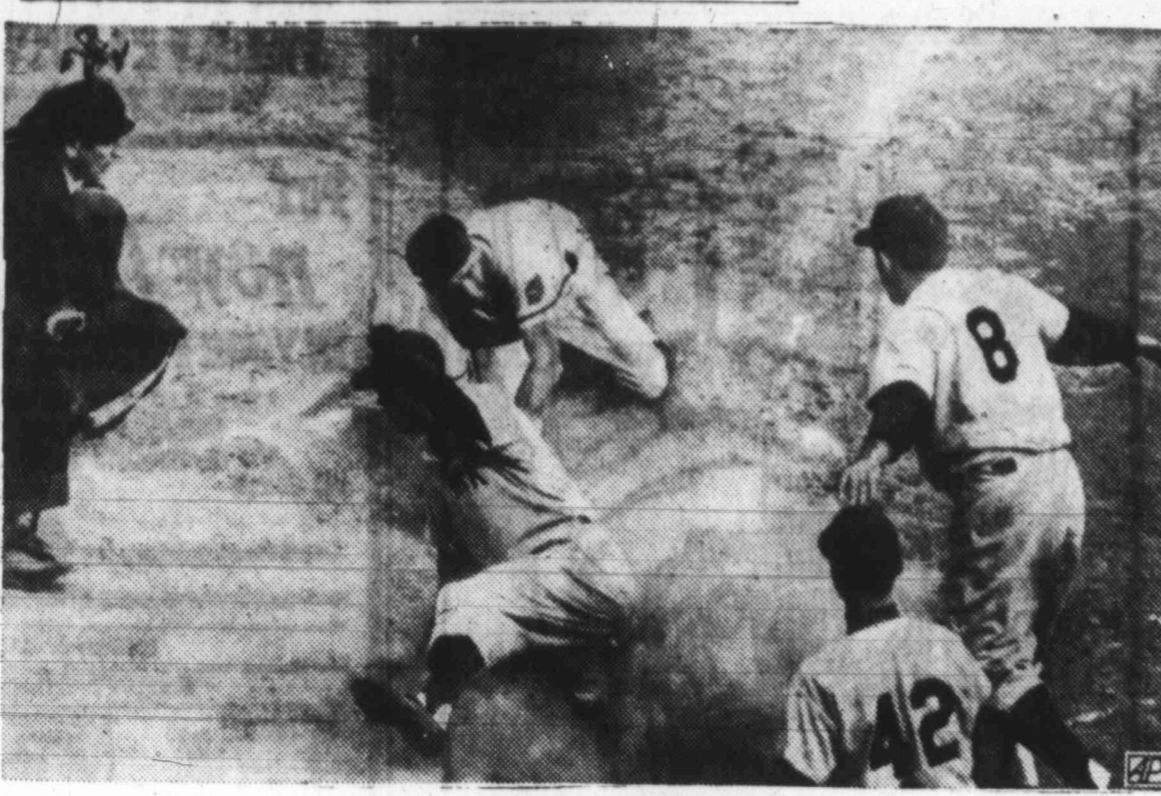

Al Milch, Big Spring coach, said his boys 'let down too often' in the Sweetwater game last week-end after viewing films of the Steer-Mustang game. Sweetwater won, 26-6.

"We looked real good in spurts," Milch stated, "but then we'd go to sleep. A team can't do that and expect to win."

In charges heard in some quarters that Big Spring played rough football, Milch pointed to the difference in penalties in the game and commented that the Mustangs were the only team to have a player ejected from the game.

Sweetwater drew ten penalties for 80 yards. Big Spring three for only 25.

Milch suggested that too many people must be trying to referee the game from the stands.

Yogi Helps The Ump

As Yanks' Gil McDougald slides by catcher Del Rice of the Milwaukee Braves in the third inning, Yogi Berra (8), who scored ahead of McDougald, makes the same sign as ump Bill McKinley—safe—in World Series play at Milwaukee. Gerry Coleman (42) is next batter. Berra and McDougald scored for the Yanks on Gerry Lumpe's single.

# Series Must Return To Yankee Stadium

By JOE REICHLER

MILWAUKEE (AP)—Practically a new World Series starts today. Milwaukee's Lew Burdette and New York's Whitey Ford go after their second victory in the fifth game of the October classic.

With the Series all square at two victories apiece, after Milwaukee's dramatic 10-inning, 7-5 triumph over the Yankees yesterday, the see-saw battle must return to New York no matter what happens today.

Barring a sudden collapse by either team, the Series seems almost certain to go the full, agonizing, seven-game distance.

Since tomorrow has been set aside for travel, the issue cannot be decided until Wednesday, at the earliest.

"Those National Leaguers have proven to me what I've thought from the very beginning," Stengel said. "I warned my fellows at the start not to take them too lightly. Make no mistake about it, this Milwaukee team is tough."

In Ford, the Braves will be facing a pitcher who not only has muffed them with five hits in a 3-1 success in the opener, but a seasoned performer who has won five World Series games.

In Burdette, the Yankees will be facing a pitcher who has shakked them with only seven hits, only one longer than a single, in his 4-2 triumph over them in the second game.

Warren Spahn, ably supported by the bludgeoning bats of Henry Aaron, Frank Torre, Johnny Logan and Eddie Mathews, gained the all-important Milwaukee victory yesterday. He went the 10-inning distance despite only a three-day rest and 11 Yankee base hits that included a last - ditch three - run homer by Elston Howard and a near-fatal triple by Hank Bauer.

Until the ninth, Spahn was superb. He had limited the Yankee powerhouse to only six hits and had not permitted a run after the first inning. From the second through the seventh, he had faced the minimum of three batters an inning. Two double plays wiped out the only two hits he allowed in that interim.

A double by Andy Carey and a pinch single by Jerry Lumpe put Yankee runners on first and third in the eighth, but a third twin killing, started by shortstop Logan, snuffed out that threat. Logan, incidentally, established a series record with 10 assists.

The ninth was a nightmare for Spahn. After retiring the first two batters, the brilliant outpunch seemed certain of an easy 4-1 triumph but a tremendous Yankee rally tied the score at 4-4.

Yogi Berra and Gil McDougald singled and Howard, connecting with a 3-2 pitch, slammed the ball into the left field bleachers for a three-run homer.

Spahn managed to wiggle out of that inning without further damage but in the 10th, again after he retired the first two batters, Tony Kubek beat out an infield hit and scored on a triple by Bauer. All seemed lost when the Braves came to bat in their half.

But Tommy Byrne, who had taken over in the eighth, hit pinch hitter Nippy Jones with the first pitch. Bob Grim was summoned from the bullpen.

Red Schoendienst sacrificed pinch runner Felix Mantilla to second, Logan, after taking two balls, scored on a triple by Stengel preferred to pitch to the left-handed Mathews even though first base was open. A healthy respect for Aaron's bat plus the knowledge that Mathews had been held hitless through the first three games prompted Casey's decision. It proved to be the wrong one.

Mathews, after working the count to 2-2, smashed a fast ball over the right field fence, breaking up the game and sending the delirious crowd into hysterics. It also hung the loss on Grim.

Six of the seven Braves' runs were manufactured by home runs. Besides Mathews' payoff wallop, there were those of Aaron and Torre. Aaron's blast came in the fourth inning, off starter Tom Sturdivant, who had pitched one-hit ball through the first three innings. It put the Braves in front 3-1.

Torre followed one out later with another home run.

**Houston Wraps Up Series With Win**

HOUSTON (AP)—The Dixie Series followed last year's script to a T last night when Houston beat Atlanta 3-1 to win it the second season in a row and by the same margin.

Four-hit pitching by Tom Hughes and a 2-run homer by Ruben Amaro, the Buff shortstop, stowed away the title. It gave Houston the Series four games to two.

**El Paso Loses**

EL PASO (AP)—Tucson whipped El Paso 3-0 last night in the Western Professional Football League. Hank Ford kept the El Paso Ramblers off balance with passes and draw plays. Jim Ellis scored twice, as did Bill Robinson.

# 'Get Even' HR By Ed Mathews Biggest Thrill

By JOE MOOSHIL

MILWAUKEE (AP)—The overshadows everything else," gloated Eddie Mathews after pounding out his "get even" homer in Milwaukee's 7-5 World Series victory over the New York Yankees yesterday.

The dramatic drive off reliever Bob Grim evened the series at two games apiece, got Eddie even with Grim who had struck him out at New York and ended the third baseman's slump worries.

Mathews had gone hitless in the first three games before doubling yesterday in the fourth inning of the fourth game.

"Slumps are unpredictable," said Mathews, who had 32 homers and a .292 season average. "You never know when you're going to get in one or when you'll get out. But I'm out now, thanks to these lucky pennies and Joe Adcock's bat."

Before the game started, a writer slipped three pennies in Mathews' back pocket "for luck."

Whether it was the three pennies, Adcock's bat or just the law of averages, Mathews doesn't care. "The pennies are going to stay right in that pocket throughout the series," said Mathews, "and I'm going to have to stick with Adcock's bat. In fact, I think I'll buy Joe a dozen."

Mathews switched to an Adcock bat after developing a blister in the palm of his hand. "My bat has a knob on the end," Eddie explained, "and that irritated the blister. Joe's bat doesn't have a knob."

The size and the weights of the two players' bats are the same except "mine is a little heavier at the end and the weight in Joe's bat is more evenly distributed."

After Mathews' drive cleared the right field barrier, the 45-year-old Santa Barbara, Calif., bomber was mobbed at the plate by his teammates. In the dressing room he was surrounded by a host of writers and he loved every minute of it.

"This overshadows anything else I've ever done," said the man whose major league homer total of 222 is more for his age than any player in history. "Man, I just had to come through. I had about 10 relatives out there from Iowa and California and about 10 of my in-laws came down from upper Wisconsin."

**Abilene Seeks 42nd In Row In Feature Game This Week**

By The Associated Press

Some top intersectional games remain but generally schoolboy football starts looking toward the championship races this week.

Abilene, driving toward its fourth straight state championship in Class AAAA, ran its skelton to 41 with a 41-20 victory over Breckenridge last week. Amarillo, Abilene, Corpus Christi Ray and Austin are top favorites in AAAA. Plainview led Lubbock 13-6 to get the Dist. 3-AAAA race on the road. Two other districts have conference struggles this week.

Pittsburgh has a 1-1 record. The Bears, Western champions last year, and the Eagles each took their second defeats.

The Lions shocked the Packers at Green Bay with a wild gamble that paid off in a touchdown.

The Lions' Yale Lary stepped into punt formation in the first period. Detroit was on its 35, four down, 22 yards to go for a first down. Lary ran instead of kicking. Astonished Green Bay defenders

Class A blooms with conference games in 12 of the 32 districts. The sensation of the state is Graham, next to, of course, Abilene's mighty winning streak. Graham has rolled over three opponents at an average of almost 80 points per game, featuring the runs of Jim Littlefield and the passing of Sonny Gibbs.

Graham and Nederland, championship favorite because of an unbeaten record against strong competition, are choices to meet in the finals. Graham, however, must first wade through what looks like the toughest district in the state. It includes undefeated teams—Graham, Mineral Wells and Weatherford, and Breckenridge also is in this district. Breckenridge is well regarded despite its loss to Abilene.

Class AA has had conference action in six districts and those same districts have more championship strife this week. The top conference test is in Dist. 2 where

# Cadets First Major Test For Irish 11

By ED CORRIGAN

Back in 1913, Army played a little-known team from the Midwest for the first time and the game was scheduled quite by accident when the Cadets discovered an open date on their schedule.

Notre Dame accepted a \$1,000 guarantee, sent its team to West Point and whipped the Army 35-13. It was in this game that Knute Rockne and Gus Dorais popularized the forward pass.

After that game, Notre Dame was a little-known no longer. An intense rivalry was born and it lasted for 34 games. The last was played in 1947 in South Bend. Notre-Dame won the game 27-7 with Terry Brennan, now Irish head coach, whipping 96 yards for a touchdown on the opening kickoff.

Right after that game, the rivalry was broken off. It takes up again this Saturday in Philadelphia.

The game won't decide a national title, but it will be an interesting one for rumor has it that Brennan is on the spot this year. The Irish had a miserable 1956 season and they had to come through this time.

So far, they have won two games against weak opponents and are unscored upon. Their victims have been Purdue (12-0) and Indiana (26-0). Army, hungry for the mythical Eastern title, will present the first major test for the Irish.

The Cadets, too, are in a peculiar position. With the demise of all the other pretenders to the Eastern throne, they find themselves undefeated and the top team in the section, having polished off Penn State 27-13 last Saturday.

Whether the Cadets will hold up, however, remains to be seen. They still must play Pitt the week after Notre Dame, then go up against Navy Nov. 30. The Panthers reacted well from their defeat by Oklahoma and beat Oregon and Southern California.

Navy had full intentions of ram-paging through its entire schedule. Academy officials thought this was the strongest team of Midshipmen in many a year. But North Carolina beat them 13-7.

Mighty Oklahoma, flu bug and all, goes after its 43rd straight victory, meeting Texas this week. Fifteen Sooners were stricken with the flu over the past two weeks, but they still clubbed Iowa State 40-14.

Five teams in the Big Ten remain unbeaten with two triumphs to their credit. They are Michigan State, the favorite; Michigan; Wisconsin; Minnesota; and Iowa.

**Scorpions Shade Midland, 5-3**

MIDLAND (SC)—The Big Spring Scorpions bowled over Midland, 5-3, in West Texas Roller Hockey league competition here Sunday afternoon.

Big Spring led, 3-3, at half time and a penalty shot plus a goal by Tex Wamble enabled the Scorpions to hold on.

Wamble started the Scorpion surge with a nifty of a shot early in the game.

Fine play by Eugene Walker, Don Chapman, Runt Evans and Harold Caldwell enabled the Big Spring club to finish in front.

Big Spring goes to Lubbock two weeks from yesterday to compete in a league tournament.

**Smith By Seven**

SAN FRANCISCO (AP)—Wiffi Smith, a new pro from St. Claire, Mich., led all three rounds and tied a Presidio Course record by win by seven strokes the United Voluntary Services women's golf open and a \$831 purse yesterday, 73-74-74—221.

Bobby will be the happiest boy this side of heaven the day he gets that M.D. after his name. But right now things don't look too promising.

Bobby lives in a community where there's a serious shortage of classrooms, teachers and good schoolbooks. That means less schooling for Bobby than he needs.

Let's see that this doesn't happen in our schools. You can help by supporting our School Board, by attending PTA meetings and school conferences.

**Owls Oppose Rugged Duke**

HOUSTON (AP)—Rice, which has averaged 499 yards per game, meets Duke, which has held three opponents to a total of two touchdowns, Saturday.

The Owls, who created a sensation last week whipping Stanford 34-7 and rolling up 583 yards, go against a Duke team ranked fourth in the nation.

The unbeaten Blue Devils have defeated Maryland, Virginia and South Carolina, scoring 80 points while holding the opposition to a mere 14.

Coach Jess Neely of Rice used two entirely different backfields against LSU and Stanford. Both showed the one-time conservative brand of football at Rice has given way to a running, passing pattern designed to eat up yards and thrill fans.

**Sweetwater Wing Out For Season**

Don Bishop, the 165-pound left end for Sweetwater Mustangs, was lost to the club for the season when he suffered a dislocated hip Friday night in the Big Spring game.

Bishop was hurt while trying to tackle Jan Loudermilk, huge Big Spring wingback.

It was first believed Bishop suffered a broken leg. He was put in traction in a Sweetwater hospital where he will have to remain possibly ten days.

Bishop also kicked points after touchdowns for the Mustangs.

**Coahomans Appear To Be Class Of 6-A Football**

It begins to appear more and more that Coahoma is the class of District 6-A football.

Graduation practically wiped out Merkel's great 1956 club and the Badgers are just another club this year.

Coach Dub Behrens has brought his Coahoma club along slowly this fall. He hasn't taken many chances with his backfield ace, Don White, and even kept him out of one game (against Lorraine).

The Bulldogs opened with a convincing 39-6 victory over Hermleigh, always a jinx for Coahoma in the past. Powerful Ozona huddled the Coahomans as expected, but only by a 20-14 score.

The Bulldogs huddled Lorraine without any difficulty, 29-0, and last weekend kayped Sonora, 13-0. In four games, only 26 points have been scored against the Bulldog line and the Coahoma primary seems to be getting better.

Coahoma catches a good O'Donnell team this weekend. The game will afford observers a good comparison between the Bulldogs and Stanton, which lost to the Eagles last weekend 20-7.

District play will get under way Oct. 18, at which time Coahoma hosts Roscoe. Merkel goes to Rotan and Stanton visits Roby.

Coahoma visits Merkel Nov. 1 and the conference championship could hinge on that game.

**Will it always be too big for Bobby?**

Bobby lives in a community where there's a serious shortage of classrooms, teachers and good schoolbooks. That means less schooling for Bobby than he needs.

Let's see that this doesn't happen in our schools. You can help by supporting our School Board, by attending PTA meetings and school conferences.

# 6 People Die When Plane Hits Fog-Shrouded Mount

UNIONTOWN, Pa. (AP)—Six persons, including an official of Standard Oil Co. of Ohio, were killed last night when their twin-engine airplane crashed near the top of fog-shrouded Summit Mountain.

Flying in a heavy rain, the craft came down in a heavily wooded area near the Junonville Methodist summer camp about seven miles east of this southwestern Pennsylvania community. Ironically, the crash occurred a short time before the camp's huge, electrically lighted cross was turned on.

Fire enveloped the stricken plane. Wreckage was strewn over a wide area. At least three bodies were thrown clear.

Stephen R. Haky, deputy coroner of Fayette County, identified four of the victims from papers found on their bodies. They were: T. M. McLaughlin, about 45, Shaker Heights, Ohio, senior partner of T. M. McLaughlin Co., Cleveland food brokers.

His wife Helengrace. Warren F. Noonan, 40, pilot, Middletown, Ohio.

Theodore O. Krauss, 30, copilot, Cleveland.

Haky tentatively identified the other two victims from clothing marks as Mr. and Mrs. R. S. Stewart, Cleveland.

A spokesman for Standard Oil of Ohio, owner of the plane, said Stewart was vice-president in charge of the company's production.

He said the Stewarts and the McLaughlins, neighbors in Shaker Heights, boarded the plane after checking out of a hotel in White Sulphur Springs, W. Va. The couples were en route home after a vacation.

Stewart, 47, was born in Warren, Pa., and graduated from Cornell University. He joined Sohio in 1938 and was elected vice president in 1954.

Stewart and his 45-year-old wife a former El Paso, Tex., beauty queen, have a son, 17, and a daughter, 15. The McLaughlins leave a son, Noonan was the father of five.

... Pardon me, Sheldon. I thought you were a long-playing record!

# Russian People Not Surprised By Victory

MOSCOW (AP)—The Russian people are tickled pink that their scientists have grabbed the lead from the Americans in the satellite field. But they're not surprised.

The Russian people believe Soviet science leads the world. They do not see Western newspapers and magazines, and know little or nothing about scientific development outside the Communist world.

Amid the jubilant newspaper and radio accounts of the first man-made moon circling the earth, the Soviet government newspaper Izvestia and several leading scientists announced the next targets in the satellite program.

Soon, they said, will come bigger satellites than the 184-pound sphere now aloft.

In time—the Russians didn't say when—a satellite will be sent up which can be brought back to earth intact and will not burn up when it re-enters denser atmosphere as the Sputnik did.

And then, the statements added, the Russians will dispatch a satellite that will go around the moon before returning to the earth.

The Soviet people generally expect that program will be carried out. Presumably Soviet scientists already are hard at work on these

targets, quietly and in almost complete secrecy, as they worked on the 184-pounder.

Only scant advance information was given out on the first baby moon. The launching came as a surprise.

Every Moscow newspaper now is printing columns of comment from all over the world on the satellite and timetables of the little ball's flight over the cities of the world.

Moscow radio has quoted some details of the mechanism from rocket and jet experts, but performance figures are still a deep secret. There has not been one picture of the orb or of its launching.

Many foreigners in Moscow cannot understand why the Communist bosses did not delay the launching until closer to the 40th anniversary of the Red Revolution, on Nov. 7. These observers wonder if something even more spectacular than the satellite or the ICBM is waiting in the wings for unveiling then.

The Russian "man in the street" has taken up the speculation. Taxi drivers, hotel doormen and others, after reading the extravagant praises of the Soviet system and scientists in the Sunday papers, agreed something extra special could be expected a month from now.

# U.S. Moon Chief Has Serene Attitude

WASHINGTON (AP)—Dr. John P. Hagen is an unexcitable man with one of the most exciting jobs in the world—that of launching the first U.S. satellite into space.

Hagen, 49, whose serene attitude about the whole thing astrophysicists associate, needs all the even temper he can muster for the difficult project.

He is head of Project Vanguard, the U.S. effort to learn the secrets of space by rocketing tiny, instrument-crammed baby moons out of the earth's atmosphere and into orbits around the earth.

The fact that the Russians already have done this very thing doesn't disturb Hagen. He told the nation in a weekend television interview that the United States isn't and hasn't been trying to beat Russia to the punch.

That reaction is borne out by earlier statements along identical lines. As long ago as last December, Hagen said, "We are not in any way racing with Russia. We are only racing with our own schedule."

That schedule calls for speeding a series of baby moons out of the earth's atmosphere, where it is hoped they will assume orbits and begin sending vital information to the watching and listening observers on the ground. The first fully equipped U.S. satellite is expected to be launched early next year.

Only the United States and Russia are launching satellites, although scientists all over the world are supposed to share in the collection and analysis of the information gained.

The whole thing is a part of the 18-month observance of the International Geophysical Year, a concerted, worldwide drive under way since July 1 to learn more about the earth and the universe.

Hagen's responsibilities in the tremendously intricate project haven't altered his usual calm and collected demeanor.

"He's sedate at all times," an associate says. "From what I've seen, his coworkers reverse the guy. He's a loyal, wonderful person."

Hagen was born in Amherst, Nova Scotia, and had a long academic career before winding up as head of Project Vanguard.

San Marino (AP)—"It looks like it's going to be a long war."

That's the way San Marinense today assessed the trouble which has divided their tiny republic into two armed camps.

So far not a shot has been fired between supporters of the rival Communist and anti-Communist governments, which have been on guard against each other for a week.

And neither seems to have the means—or desire—to force a showdown.

With no solution in sight, San Marinense are buckling down with the prospect of some food shortage, no postal service and disruption of the tourist trade.

Since most of the hilltop republic's 14,000 people are farmers, the food shortage is not likely to be too serious. But the Italian blockade of all approaches to San Marino has cut off the supply of vegetables and other foods which usually flow in.

The post office is in the hands of the Communists. Italy, which completely surrounds the republic and has recognized the anti-Red regime, is allowing none of San Marino's mail out.

The anti-Communist government controls only one remote corner of the 38-square-mile country. But it plans to set up a post office. Italy probably would permit the flow of its mail.

Planning for a long dispute, the anti-Communist are setting up prefabricated huts—complete with bathtubs—at the abandoned steel factory they use as headquarters.

The anti-Communist used a plane yesterday to drop leaflets for the second time on San Marino. The leaflets warned shopkeep-

Uncle Ray: Distant Love Was Felt By Poet Dante

Twice in the course of my travels I have visited Florence. This city in northern Italy, is quiet and delightful. It has a special charm, and I have heard visitors from abroad exclaim that they would like to stay there "on and on."

The most important thing about Florence, however, is the fact that it is the place where Dante (pronounced DAN-tee) was born. The event took place on a spring day, 692 years ago.

Dante belonged to a well-regarded family, but little is known about his boyhood. At the time of his ninth birthday, while walking on the streets of Florence, the lad caught sight of a pretty girl, a few months younger than himself. He gazed on her with wonder, and there are some who say that his heart was "lost."

The girl's name was Beatrice. She was a child of wealthy parents—higher in wealth than the father and mother of Dante. We are told that the paths of the two crossed from time to time in the years which followed, but we are without knowledge of the words which they may have exchanged. We do know, however, that Dante became the victim of a silent, distant love.

Young manhood arrived and one day he learned of the marriage of Beatrice to Simone de Bardi, a resident of Florence. Heavy was the heart of Dante, who seems to have been all too shy in regard to romance.

Despite the marriage, Dante kept his devotion to Beatrice. He wrote poems about her, and these later were gathered in a volume called "New Life." In the poems he was careful to leave out the family name of Beatrice, to save her from feeling embarrassed.

For BIOGRAPHY section of your scrapbook. FREE: A leaflet entitled PUZZLES, TRICKS and FUN gives ideas for parties and indoor games. For your copy send a stamped, self-addressed envelope to Uncle Ray in care of this paper.

Alaska Scientists Reported First To Spot The Satellite

FAIRBANKS, Alaska (AP)—Three young scientists at the Geophysical Institute of the University of Alaska yesterday were reported as being the first Americans to see the Soviet earth satellite.

Robert S. Leonard, Joseph Pope and Dr. Giancarlo Rumi observed the satellite with the naked eye for five minutes yesterday starting at 4:53 a.m., Alaska Standard Time (9:53 a.m., EST). Dr. C. Gordon Little, deputy director of the institute, said today.

A Harvard scientist said last night the object sighted over Alaska may have been the third stage of the rocket used to fire the satellite and not the satellite itself.

Dr. Richard E. McCrosky, a lecturer in astronomy and research fellow at Harvard College Observatory, said reports of its brightness indicated it was of the fourth magnitude, whereas the Russians indicated a seventh or eighth magnitude of brightness.

Dr. Little, however, said the three men who stated they saw the object, were sure it was the satellite because radio signals from the satellite were recorded at the same time they saw it.

Dr. Little said he did not see it himself as he was asleep at the time. He reported the sighting to the Smithsonian Astrophysical Observatory at Cambridge, Mass.

Leonard and Pope are graduate students at the University of Alaska. Dr. Rumi is a member of the institute's staff.

When the three heard the satellite's radio signals they rushed from the building. They had no difficulty spotting the satellite against the dark sky as the sun's rays from the east reflected on its mirrored surface.

RELIEVES coughs and allergic symptoms that accompany a cold!

Science Shrinks Piles New Way Without Surgery

Finds Healing Substance That Does Both—Relieves Pain—Shrinks Hemorrhoids

New York, N. Y. (Special)—For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery.

In case after case, while gently relieving pain, actual reduction (shrinkage) took place.

Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

The secret is a new healing substance (Bio-Dyne\*)—discovery of a world-famous research institute. This substance is now available in suppository or ointment form under the name Preparation H.\* At your drugstore. Money back guarantee.

# AEC Fires Last In Test Series

ATOMIC TEST SITE, Nov. (AP)—The Atomic Energy Commission fired the 24th, and last, explosion of the 1957 test series at 5 a.m. PST today.

Code-named Morgan, the final shot in the Plumbbob series was detonated from a balloon tethered 500 feet above the Yucca Flat desert test area.

The fiery flash was visible for a few seconds in Las Vegas, 75 miles away. Observers on Angels Peak, 45 miles from the detonation point, said the fireball lasted 12 to 15 seconds.

The mushroom cloud rose rapidly to 20,000 feet. It was tinged with pink after the brilliant yellow of the flash faded.

The AEC said the Morgan shot energy yield was below nominal or less than the equivalent of 20,000 tons of TNT.

Fifteen aircraft flew data-carrying missions. The AEC said there were no troops participating in the experiment.
