Reddy Kilowatt, your electric servant is a wonderful worker.

But please don't make his work more difficult than it already is. You do that when you operate several appli-

ances or lights out of one socket.

Have additional outlets installed now. And check your wiring to make sure that it is adequate to handle the load when you install an additional appliance.

It costs so little to install adequate wiring, for better living electrically.

WINTROATH VERTICAL TURBINE PUMPS

Why the difference? Fred and Howard started out with the same number of acres and the same amount of money.

Fred often admires Howard's prosperous farm, but seems to have forgotten that he "waited another year" even though Howard bought his Wintroath pump right off. He hasn't forgotten how much money he lost, though, as a result of that bad first year with the long dry spell. Every year he fell farther behind.

Don't take a chance like Fred did and "walt another year!" Be sure of enough water THIS YEAR! Check into the many

economical features of Wintroath pumps! Now on display.
