## LeMay Sets Distance Record On Jet Flight

BUENOS AIRES (AP)—Gen. Curtis E. LeMay landed a giant U.S. Air Force KC135 jet tanker here early today, setting a world distance record for nonstop, no-refueling jet flight.

The cigar-smoking Air Force vice chief of staff and a crew of 18 brought the military version of the Boeing 707 jetliner down in the Argentine capital at 5:50 a.m. after a 6,350-mile flight from Westover Air Force Base in Massachusetts.

The flight took 13 hours and 2 minutes. The old record of 1,448 miles for a nonstop, no-refueling jet flight was set in 1955 by a French Mistral.

The Air Force in Washington said the flight marked a "new milestone in the history of jet aviation."

An Air Force announcement said the KC135, in addition to its role as a tanker for B52 heavy bombers and new jet fighters, "is readily adaptable to serving as a transport for troops and vital cargo at jet speeds and high altitudes."

"The record flight today featured the KC135 in this utility global transport role," the announcement said.

LeMay flew to the Argentine capital to participate in the observance of Argentina's National Aviation Week.

He is to present a letter of greeting from President Eisenhower and a silver model of the KC135 to Provisional President Pedro Aramburu.

New communications equipment was aboard the plane, which is expected to return to Washington tomorrow or Thursday on another nonstop flight.

LeMay was at the controls when the Stratotanker took off from Westover. Only those connected with the flight were aware that it might be a record breaker.

The general arrived at Westover yesterday and went over flight plans with the crew. LeMay will participate in Ar-

## Negro Called Ringleader In 'Headhunting'

OKINAWA (AP)—The prosecution in a general court-martial today called a U.S. Negro Marine the ringleader of a band of "headhunters" who participated in an "unmitigated savage tribal attack" that killed a white American sailor.

Pfc. Robert Allen Jr., 22, of Nashville, Tenn., pleaded innocent to charges of murder and conspiracy to murder in the death of Naval aviator Adrien R. Nolley of Wells County, N.D., at Sukiran Marine Base.

The charges said Allen and five Negro companions attacked Nolley and a companion Aug. 4 when the two whites got out of a taxi near the Top Hat, a Marine club for enlisted men.

The prosecution claimed Allen and the other five Negroes, who are to be tried later, swore to "get some heads" when they left the club during the early morning hours. "Headhunting," the prosecution said, was a Negro term for beating white men.

The victim was said to be unknown to Allen and his companions. He died at an Army hospital after being beaten and kicked about the head, face, and body.

Much of the opening session centered on choosing the trial judge. The defense counsel, Maj. J. E. Stauffer of Oceanside, Calif., doggedly questioned the court for indications of racial prejudice.

Stauffer succeeded in having one of the original nine members of the court, Capt. Dana B. Cashon of Cleburne, Tex., removed "for cause," and a second eliminated on a peremptory challenge. Stauffer polled the court for members from Southern states.

Stauffer said Cashon had remarked several months ago about the suitability of allowing Negro Marines to serve in the honor guard. Cashon said he bore no prejudice as a result of his Texas background, but recommended the removal of two men from the squad in the interest of uniformity.

# Legislature Slaps U. S. Troops Use

## No Sign Of Action On Water Bills

AUSTIN (AP)—The Texas Senate today approved a toned-down resolution critical of the U.S. Supreme Court and of President Eisenhower for sending federal troops to Arkansas.

This action came as the special session plodded toward its compulsory midnight adjournment with no convincing signs of final agreement on water legislation. There were reports that House and Senate conferees were about to get together on lobby registration.

The House recessed until 2 p.m. after a fruitless morning session. Water planning and lobby registration are the two top priority items requested by Gov. Price Daniel in his program for the fast-expiring special session.

Efforts to work out agreement on water continued throughout the morning, with the governor keeping a close touch with developments. An overnight deadlock developed in the conference between five House and five Senate members on several points.

The watered-down resolution critical of the U.S. Supreme Court and of President Eisenhower passed in the Senate was a substitute for a House-passed resolution (HCR 3) by Rep. Joe Chapman.

## REPORT GOOD HEALTH

# Ike Tackles Defense Issues Arising Out Of Space Age

WASHINGTON (AP)—President Eisenhower tackled space age defense spending problems anew today after being advised by his doctors he is in excellent health.

The President also discussed administration foreign aid plans with Vice President Nixon, Secretary of State Dulles, Secretary of the Treasury Anderson and Budget Director Percival Brundage.

He also scheduled a special meeting of the National Security Council to size up defense spending requirements.

The session took on added significance because of the administration's drive to spur development of missiles and other weapons of the future in the light of Russia's success in those fields.

Secretary of Defense McElroy and the deputy secretary of defense, Donald Quarles, conferred with Eisenhower for an hour late yesterday regarding defense spending plans. The White House announced only the general subject.

In advance of the meeting, the President's physicians made public a report on the outcome of his latest head-to-toe medical examination at Walter Reed Army Hospital. The doctors' verdict: "The President continues to maintain an excellent state of health following recovery from his two illnesses."

They were referring to his September 1955 heart attack and the intestinal seizure which necessitated major surgery in June 1956.

Eisenhower entered Walter Reed Hospital late Sunday and left the hospital at midday yesterday. The medical report was signed by the White House physician, Maj. Gen. Howard M. Snyder, and Maj. Gen. Leonard D. Heaton, commanding officer at Walter Reed.

The medical bulletin dealt almost exclusively with the state of the President's heart and his condition in the wake of intestinal surgery.

As for the heart, the doctors reported "no symptoms of coronary insufficiency" have developed since Eisenhower's last previous complete physical Oct. 27-28, 1956. They said his blood pressure and pulse are within normal range, and added: "The heart remains normal in size on physical examination and in X-ray studies."

"The electrocardiograms taken during the year (including the one taken yesterday) are unchanged from that of October 1956. They show residual changes of a well-healed scar."

As for the picture with respect to Eisenhower's history of leishmaniasis, the doctors said they found "no evidence of extension of old disease process." At the time of the President's surgery last year there was great controversy, even among doctors, as to whether the leishmaniasis would recur.

Heaton and Snyder said in their new report: "X-ray examination reveals no evidence of organic disease in the esophagus, stomach or duodenum."

James C. Hagerty, White House press secretary, reported Eisenhower's weight at 173 pounds — one pound more than it was a year ago but still just about what it was as a West Point cadet more than 40 years ago.

The doctors said Eisenhower remains on anticoagulants, a precaution to help keep his blood from clotting.

Wearing a happy smile, President Eisenhower strides across the portico of Walter Reed Army Hospital after a head-to-toe physical checkup. Maj. Gen. Howard M. Snyder, his personal physician, trails at right.

show residual changes of a well-healed scar."

## Junior High Remodeling To Be Considered By Trustees

Possibility of remodeling the old junior high school building will be discussed at the November meeting of trustees tonight.

Supt. Floyd Parsons said the remodeling proposal will be on the agenda along with a request that trustees check brick for the Goliad Junior High now under construction.

Other subjects to come up will include a report from trustees Omar Jones and Robert Stripling on progress of the City-County School Tax Revaluation program, report on the annual audit of school records, and a recommendation that \$225,000 of building funds be reinvested in short-term government securities.

Jones and Stripling are school board representatives on the joint committee which has been exploring possibilities of a general property revaluation program.

Parsons said \$300,000 of government bonds held by the school district will mature Nov. 21. He is to recommend that \$225,000 of the sum be reinvested until it is needed for construction projects.

Trustees will meet at 7:30 p.m. today in the administration building, 110 E. 10th.

## Science Firm Chief Scores Brainstorming

LOS ANGELES (AP)—"Brainstorming" may be fun, but as a device for generating useful ideas it's about as valuable as day-dreaming in slow motor—or so says Bernard Benson, an electronics executive.

"Brainstorming" is a game usually played by people seated around a table. They take a problem or invent one, then start blurting out their ideas on the subject in rapid-fire order, as fast as they can think. When they're exhausted, the game is over, and the problem presumably is high-tailing it down the road to resolution.

Benson, president of Benson, Lehner Electronic Corp., thinks very little of the idea. Almost less than that, in fact.

"If the alternative to working out a problem is nothing," he said yesterday, "then brainstorming is fine."

"But if we are going to spend time and effort to teach people let's by all means teach them the things that have the high probability of getting results."

Brainstorming ranks so low on the result probability meter, he said, that you have to go down stairs to check the needle.

Benson, who will deliver a lecture on the subject to a group of graphic designers tonight, said the idea of brainstorming was hatched by an ad agency as a gimmick. He said brainstorming procedure now is being taught in 1,000 colleges and universities in the nation, and in the Army and Air Force.

## 24 Local Bills Passed

AUSTIN (AP)—Twenty-four local or uncontested bills which had passed the Senate earlier sped through the House late yesterday and were sent on to Gov. Price Daniel for signing.

However, a 25th measure designed to do away with the Midland County school superintendent's job by a snag and was postponed until today.

Rep. Louis Anderson of Midland said the bill as it passed the House would apply to counties with populations of 27,500 to 28,000. Several representatives protested that it might affect their counties.

Rep. James Turman of Gober offered an amendment taking out the population bracket and making it apply only to counties without any common school districts.

After considerable argument the bill was withdrawn until today.

Other local and uncontested bills passed into law included:

A measure restoring an inadvertent \$1,000 a year salary cut given a Texas Employment Commission employee by the last Legislature; a bill allowing the domestic relations judge in Amarillo to draw the same \$12,000 salary as the two district judges; a corrective measure making telephoning of fish and hunting from an automobile illegal in Bexar County as it is in the rest of the state; a bill permitting Lubbock to vote a city tax to buy land for the Texas Tech museum; a bill allowing counties that have voted bonds to buy a park to maintain the park with general county funds.

## Hopes For Airliner Pinned On Carrier

HONOLULU (AP)—Hopes of finding some trace of the Pan American airliner which vanished Friday with 44 persons aboard were pinned today on the carrier Philippine Sea—and grand sweep by its aircraft.

"We have high hopes the Philippine Sea will turn us up one of the rafts," said Capt. Donald B. MacDiarmid, Coast Guard search coordinator.

MacDiarmid made his statement last night just before taking off for the mainland to address a national search and rescue conference at Palo Alto, Calif.

"We still feel there is a good chance survivors will be found in a raft," he said. "The water is warm and the weather is good. We feel we have done a very thorough search with the equipment we have available, but we expect much better coverage will be accomplished by the Philippine Sea."

The big Essex class carrier, due in the search area today, planned a methodical sweep of a 200-mile-wide lane from the western part of the area all the way to Honolulu.

As he explained the new search operation, MacDiarmid received another of several reports of an SOS message. He expressed skepticism.

"We check every one to the best of our ability but we're hearing things all the time," he said.

He said many of the sighting reports—"flares, blinking lights, dye markers and so on"—were turned in by pilots not used to searching. None turned out to have anything to do with the plane, he said.

The fact that not a single identifiable radio signal has been heard has been taken as indicating that something happened to it at 10,000 feet with devastating suddenness and violence.

In San Francisco, although they stressed there is "nothing to indicate there has been a crime," such as sabotage, Pan American officials said they had begun investigating for "any evidence of a crime" and checking into insurance carried by passengers.

## Ex-Wife Not A Widow, Says Court

PHILADELPHIA (AP)—Pennsylvania's Supreme Court has ruled that the second wife of a man married five times cannot qualify as his widow.

An ex-wife can't be a widow, the court held.

Thus wife No. 5 of H.S.A. Stewart Jr. of Pittsburgh is entitled to a share of his \$118,000 trust fund, the court said, not wife No. 2.

Wife No. 2—Cecilia Stewart—had appealed to the court saying she was Stewart's wife when his father set up the trust fund for him.

## Fog, Drizzle Hanging On

Dank weather with heavily overcast skies and a drizzle greeted Big Springers Tuesday morning—a continuation of the same weather which has prevailed almost unbroken since November began.

An additional .03 inch rain was added to the month's total in the last 24 hours, the U. S. Experiment Station reported. This brings the total rain gauged at the station for the month to 1.6 inches. It also marks the seventh day out of the last 12 in Big Spring in which measurable moisture has been reported. The year's total rain now stands at 22.48 inches.

Temperatures were higher the past 24 hours. The low for last night was 45; the high on Monday 51.

Farm work continued to be stalled and the persistent moisture kept workers out of the fields.

There was no relief in sight in the view of the weather bureau.

Its forecast said that Tuesday will be mostly cloudy and that night-time and early morning fog and drizzle can be anticipated through Wednesday. During Wednesday, however, there will be what the bureau called "slowly rising temperatures."

## Rackets Prober Sees 'Stranglehold'

WASHINGTON (AP)—Sen. McClellan (D-Ark) charged today that Vincent J. Squillante, reputed godson of slain gangster Albert Anastasia has seized "a stranglehold" on New York City's \$50-million annual garbage hauling business.

McClellan's remarks were in a statement launching public hearings on the murder-marked movement of gangsters into the industry, which the senator said also has resulted in big-scale extortion and fraud.

"Illustrative of the hoodlum control in this industry is the fact that the names of at least 40, and possibly more than 40, underworld figures will be mentioned during the course of committee hearings this week," McClellan said. He added that they would deal in particular with Squillante.

He termed Squillante "a person with an underworld background with no previous experience in the labor-management field," who posed as a labor expert to muscle into the industry, and establish a veritable garbage business empire.

McClellan contended that Squillante achieved this by conniving with underworld figures and some labor union officials—reputedly from the Teamsters Union.

In advance of the hearings, committee counsel Robert F. Kennedy told reporters that Anastasia and Frank Scalise, both slain this year, had been wanted as witnesses. Seven other men sought for testimony have not been found, he added.

Before delving into the New York situation, the committee called Los Angeles Police Capt. James Hamilton for a quick inquiry into the garbage situation there.

The New York testimony, Kennedy told reporters, will include "events that led up to the murder of John Acropolis."

Acropolis was president of the Westchester County (N.Y.) Federation of Labor and president of Teamsters Local 456 there.

Known to his associates as a tough but honest union leader and foe of racketeers, Acropolis was found shot to death in his apartment Aug. 27, 1952. The crime was never solved, and no one was even arrested, but police advanced a theory that hired killers did the job to remove a bitter opponent of their employers.

The committee says Acropolis was killed in "a dispute over garbage monopoly in Yonkers, N.Y."

McClellan has charged that a powerful combine of garbage haulers and gangsters teamed up with some Teamsters Union officials to grab a monopoly on the lucrative business of hauling garbage from hotels, restaurants and other establishments in the New York area. The companies allegedly formed associations through which they sought to enforce the members' will, and drive out competitors.

Where the name of Anastasia, alleged lord high executioner of the old kill-for-a-price gangs of Murder, Inc., fits into the picture was not disclosed. Nor would Kennedy say in advance what role he attributed to the slain Scalise. Both were cut down in underworld style, Anastasia last month, Scalise last June.

Kennedy said seven "very important" witnesses have disappeared. He said he fears this will "leave some big gaps in the testimony" but that it can't be helped.

## Andrews Man Killed In Car-Truck Crash

ANDREWS, Tex. (AP)—Glen Eldon Howard, 32, Andrews, was killed in a car-truck collision six miles south of here last night.

The car he was driving and an oil field truck collided, toppling the truck's load of oil field equipment onto the car.

## Downtown Paving Due More Study

Paving of the downtown area will come up for consideration at the bi-weekly meeting of the City Commission today.

The meeting will be held in the class room of the police building at 5:15 p.m.

The city has funds voted in 1955 to pay for repaving the downtown area, but it has been put off several times. Lately, the city has been waiting until W. D. Caldwell could install a hot-mix asphalt plant before letting contract.

The city engineer, Clifton Belamy, has talked with Caldwell, and the commission tonight will decide whether to ask for bids on the work or give it directly to Caldwell. The group had planned to call for bids, but about two months ago it decided to talk to Caldwell before advertising.

Also to be discussed will be the time to do the work — now or after the Christmas season. Whenever the work is done, the city plans to block off sections of about two blocks at a time, mend the base, and then let the contractor pour the hot-mix.

No more than two or three blocks will be tied up at a time. After the mixture is poured, it will be ready for traffic in a day.

In addition to paving, the commission will discuss the city's airport commitments. The contract with Cecil Hamilton for Hamilton Field expires next Friday, and the city has given Hamilton notice that the contract would be canceled.

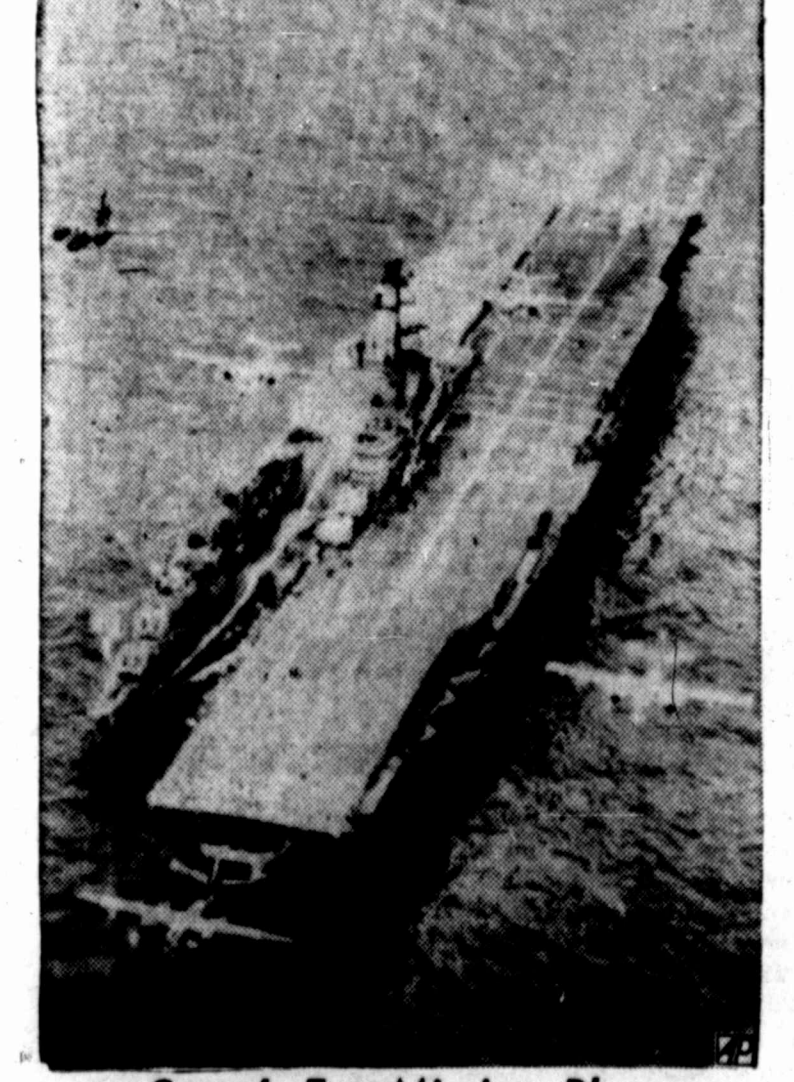

The city felt that work would be under way by this time on the county airport, but it is not.

Several alternatives including a monthly lease of the airport, will be discussed by the commission.

The downtown parking lot being considered between the Ritz Theatre and Empire Southern Gas Co. will probably be mentioned also. The assistant city attorney, Wayne Basden, was working today on a lease agreement with downtown merchants.

The merchants plan to lease the land and let the city install three-hour parking meters. The city would then receive all revenue from the meters.

Third and final reading of an ordinance changing the E zone of the city's zoning ordinance will be taken up tonight. The E zone pertains to community business.

Search For Missing Plane

Navy SEF planes take off from carrier Philippine Sea to search for a missing Pan American Airlines plane and 44 persons on board. Destroyer USS John B. Craig is alongside the carrier.

# Reporter Returns To Clinton, Finds Race Riot Scene Quiet

Editor's Note—AP correspondent Belman Morin is touring the South, reporting developments and attitudes in the wake of the Little Rock school integration crisis.

**By BELMAN MORIN**  
CLINTON, Tenn. (AP)—The great struggle over school desegregation is touching Clinton again this week.

Six men and a woman are scheduled to return tomorrow to the same federal courtroom in Knoxville where the history-making "Clinton trials" took place last summer.

The seven—including Northern segregationist John Kasper—were convicted of conspiracy to violate a federal injunction against interfering with the enrollment of Negro children in Clinton High School. An all-white jury handed down the verdict.

Defense lawyers appealed. U. S. Dist. Judge Robert L. Taylor, who presided over the original trial, will hear motions for a new trial.

**EFFECT ON CLINTON**  
What's the atmosphere in Clinton today?

How has the pretty little mountain town accepted desegregation?

Most important, how did the people and the students react to the news of violence around another high school—the one in Little Rock?

Sooner or later, everybody you talk with in Clinton today uses the word "quiet." There have been a few flurries. But over-all, they say, "quiet."

Six Negro children, four boys and two girls, are attending classes in the high school today. They enrolled Sept. 3. That was

the day when Gov. Orval Faubus ordered National Guardsmen to keep Negroes out of Central High School in Little Rock.

The Clinton Six go to school without escort. No police action has been necessary to protect them in and out of its halls.

The two boys have not attempted to sign up for football or any competitive sports. But all six children are in physical education classes with white students.

Most of them go home for lunch. One or two, however, eat in the school cafeteria.

None has attended any of the school's social functions.

"They're not forbidden," says W. D. Human, the high school principal. "They just didn't come. I suppose it's a matter of choice with them, just like the choices of people in other social matters."

This latter is an important point.

In the South, to a far greater extent than the North, the school is an active center of social activity for both children and their parents. Segregationists usually argue that desegregation will mean that Negroes will attend these functions in the schools, damaging their value.

Human came to Clinton last August after the "Clinton trials" and after the previous principal resigned.

He is 52, soft-spoken, with an air of quiet firmness. Except for the war years when he was in the Army, he has lived all his life in the Tennessee hills. Education has been his life's career.

"You consider the problem and

you wonder if you are equal to it," he says. "I certainly didn't go into it with my eyes closed." Classes opened. The Negroes came to school.

"There were some small incidents," Human says, "but the situation was so much better than I anticipated that same day, you wouldn't even call them incidents if they had involved only white children."

There was a fight between a white boy and a Negro. Human promptly suspended both. Then he got in touch with the parents of both. Now the two boys are back in school.

But then came Little Rock.

On the morning of Oct. 9, leaflets began to appear in the halls of the high school. They said: "We are in sympathy with Little Rock; we too have faced bayonets. Walk out—stay out. Please pass this on."

Human said he did not try to discover who was passing out the leaflets. "The kids themselves brought the leaflets to me," he says. "They were wonderful. Except for a few, they just ignored it."

**WALKOUT FIZZLED**

However, he says, someone tried to organize a mass walkout. "Evidently, they had a time all fixed. They came to classes and then, at the same moment, about 10 or 15 walked out. But about half of those who left had been told by their parents to come home if there was trouble. That half came back. One mother brought her two daughters back that same day."

And that, says Human, was the end of it.

Enrollment is actually higher today than last year or the year before—when a federal court ordered integration—and so is average daily attendance.

And what about the community? Clinton's population is around 5,000. It was wracked by neighborhood bitterness during the trial. Did Little Rock reopen the wounds?

"A year ago," says Horace Wells, publisher of the weekly Clinton Courier-News, "I wondered how we could ever get back to living with one another. Now you would think nothing had ever happened. People don't even talk about it any more."

Wells' daughter, Nancy, is a sophomore at the high school. "She tells me the kids don't talk about it either."

**Smugglers Jailed**

BERLIN (AP)—The West Berlin customs today announced the arrest of eight persons they said had smuggled at least \$500,000 worth of banned strategic metals into Communist East Germany.

Officials said the metals, mostly nickel and cobalt, were intended for use in East German arms factories.

# Price Relief May Come By New Year

WASHINGTON (AP)—Come happy New Year, there may be some relief from rising prices.

In January, government price experts said today, the cost of living may dip slightly and then level off into a period of comparative stability.

By that time a two-year inflation will have chewed about 8 1/2 cents out of the buying power of the consumer's dollar.

There will be no perceptible rollback, officials predicted in private interviews. Throughout 1958, they believe, living costs may fluctuate at or near today's record high, or a little higher.

Between now and the end of the year, it was suggested, some further rise in the consumer price index may occur, partly because of the big holiday buying season and the arrival of new car models at higher prices.

But there are signs that several of the underlying inflationary forces are easing, the Washington economists said.

These include the indications of a business slowdown and hotter competition for sales, a weakening of wholesale prices, excess inventories of many major household goods, reduced business investment, and a probable lessening of demand for credit.

On the other hand, wage levels will continue to be tugging upward.

Many of the major union contracts which run for two to four years provide automatic increases of 7 to 8 cents hourly in 1958. This tends to fix a floor for the demands of unions which will be negotiating new contracts in the steel, transportation, utilities and other industries.

Administration advisers therefore expect average factory earnings to keep rising at about the rate of recent years—roughly a penny an hour each month.

This will shove industry's wage costs up, but not necessarily as rapidly as in the recent past. If the widely heralded business decline actually occurs in the first half of 1958, reductions in working hours, layoffs, and the elimination

of overtime could partly offset the higher rates of pay.

The consumer price index reached 121.1 per cent of the 1947-9 average in September, after 13 consecutive months of increase. Two years earlier it was 114.9 per cent.

The Bureau of Labor Statistics noted that the 0.1 per cent rise in September was much smaller than normal for the season and the smallest for any month since last November.

# Wilson Defends Administration Missile Stand

DETROIT (AP)—Former Defense Secretary Wilson last night defended administration policies in the ballistic missile race with Soviet Russia and declared that this country was not lagging behind.

He denied the U.S.S.R. had outstripped America in technological progress and asserted Americans were unrealistic about the Soviet space satellites and their implications in the struggle between East and West.

In a speech at a testimonial dinner given in his honor he said that while Russia claims to have the know-how to produce intercontinental missiles, "our scientists and engineers are convinced that we can do the same."

Wilson, 67-year-old former president of General Motors Corp., said it was a tossup whether the United States or Russia was ahead in the missile race.

He said he believed the two countries were on a par, give or take a few months.

He said the American Strategic Air Command bomber force "is still the great deterrent to war and will be for some time."

He said peace and freedom will not be won by arms alone. This, he said, raised the difficult question of how much military strength is enough and the problem of how a stable economy is to be maintained that would capture the minds of men throughout the world by having them realize the advantages of a free society.

"While the military threat may be very real, and we must be prepared to meet it, as a nation we must also face the realities of the conflict in ideologies between the Communist East and the freedom-loving West," he said.

He said administration missile policies had "not only the approval of the people responsible but also the blessing of the scientific advisory committees who considered the importance of alternative methods to be worth the cost and effort."

While there is "some validity" to criticism of interservice rivalry, he said, the real competition is between the Defense Department as a whole and the other claimants in the federal budget.

**Free Hand In Science Urged**

GOETTINGEN, Germany (AP)—One of West Germany's top scientists believes the West should give its researchers a freer hand to catch up with Russia on rocket and satellite development.

"We should cut out bureaucratic restrictions on the distribution of financial support for research organizations," said Dr. Walter Deming, director of the Max Planck Institute for the Physics of the Stratosphere and Ionosphere. The institute is the foremost German research organization in its field.

Dr. Deming said in an interview he does not go along with the idea of forming a sort of "NATO for scientists" to pool Western research knowledge and efforts. He said he believes there should be no dividing line between East and West in science.

As an ionosphere researcher, Dr. Deming studies the realm of space just outside the earth's atmosphere.

**"THEY'RE CATCHING ON, BUT THEY CAN'T CATCH UP."** That's how lots of people feel about the "new 1958" cars that are trying to match the Dodge Swept-Wing look. These other cars have been lowered some, but still seem high and boxy by comparison. A few are "catching on" to fins, but they're years from "catching up." And the air suspension offered by some cars (at well over \$100 extra) can't compare with the sway-free, dip-free ride of Dodge Torsion-Aire (standard equipment on all models). So on your way home from someone else's new car showing, stop in and compare it with Swept-Wing 58 by Dodge. You'll see what we mean.

### Newsmen Called To Vice Probe

GALVESTON (AP)—Three newsmen were subpoenaed to appear today before a grand jury investigating reports of revived vice conditions here.

They are Radio KGBC News Director Cecil Tuck, Station KILE News Director Tom Lewis and

Houston Chronicle Correspondent Jim Kemp. All had written stories that many of the city's brothels and mixed drink clubs had reopened.

Last June, Atty. Gen. Will Wilson clamped down on all forms of vice in Galveston County.

### 2 Problems Of Journalism Told

HOUSTON (AP)—Access to information and recruiting of personnel are the two greatest problems facing the press in the United States, Sol Taishoff, editor and publisher of Broadcasting Magazine, said yesterday.

Taishoff, president of Sigma Delta Chi, national journalistic fraternity, arrived in Houston to take part in the national convention which starts tomorrow.

One of the problems Taishoff expects the fraternity to discuss is the recruiting of adequate journalistic personnel.

He said that "in the past few years there have not been enough qualified young men and women going into the profession."

Taishoff told newsmen he hoped the government would make a better effort to keep those in the news media informed.

Upstate's Great White Way

Plows come to the rescue of motorists stranded on the newly opened section of the four-lane Penn-Can highway south of Syracuse, N. Y. Four inches of snow, first of the season, halted cars as the road turned to glass.

## Not Even A Thief Can Win Against The Welfare State

By HAL COOPER  
LONDON (AP)—Henry (Stopper) Corke, who thives for a living and is proud of it, puts up a game fight to break loose from the fond embrace of the British welfare state. He loses easily.

A magistrate rules that even if Stopper does rob and steal for his cakes and ale—and nobody who has seen the form on Stopper will doubt this—he is legally subject to the ever-loving care of the national unemployment insurance scheme.

Such being the case, 43-year-old Stopper is fined 2 pounds (\$3.00) and ordered to pay up 16 pounds 5 shillings (\$45.50) arrears in his weekly contributions.

Stopper really blows a gasket at this.

"A man can't even make a dishonest bob without running into trouble with these bureaucrats," he complains bitterly to a reporter after his court hearing.

Stopper thinks he makes his position perfectly clear when they first send him the insurance application. "I do not need this," he writes. "I haven't worked for 14 months. I get my living thieving."

He then sends the application back to the Insurance Ministry.

But the ministry refuses to let it go at that, which is why Stopper winds up making his spiel in the North London Court.

Magistrate Frank Milton holds that Stopper is liable to a contribution of 1 shilling 10 pence—25 cents—a week as a nonemployed person. If Stopper decides he is unemployed, as well as nonem-

ployed, this entitles him to 2 pounds (\$3.00) a week in benefits.

"If a person is a thief—and certainly that is not an insurable employment—he would clearly be in the same category as all other nonemployed persons, namely people who may have private means or live by gambling," the judge explains.

"Until the contrary is shown, anyone who is not in employment is a nonemployed person."

Stopper hotly denies he is nonemployed, unemployed, disemployed or any other kind of negative employed. As he explains later, he is thieving right along, and has 23 convictions to prove it, and is making around 2,000 pounds (\$5,000) a year.

"I'm doing a bit of fencing as well," he tells a reporter. "Of course, if any copper is listening, I'm not daft enough to keep stolen goods around the house."

"I've done all sort of thieving. It was me that started the jump racket. This where I get into a moving lorry off a car driven by a mate, and throw the cargo out for my mate to pick up."

"At the moment my main job is driving away stolen lorries and flogging the goods."

Mrs. Stopper whose name is Violet, is asked what she thinks of all this.

"Henry is a gentleman," she says, "and he always gives me plenty of housekeeping money. I admit I don't see a lot of him in the evenings."

### Chess Tourney Set For Dallas

DALLAS (AP)—Preparations are fast taking shape for the Dallas International Chess Tournament which will draw master players from throughout the world.

The tournament will mark the centennial of international chess in the United States.

Emile Z. Gulutin, president of Dallas International Chess Tournaments, Inc., says it will put the Texas city forever in chess history, since past tournaments are studied by exacting chess players.

The tournament will be held from Nov. 30 to Dec. 18 in a large downtown hotel. Eight master players will compete, including David Yanofsky of Canada, Bent Larsen of Denmark, Laszlo Szabo of Hungary, Svetozar Gligoric of Yugoslavia, Gideon Stahlberg of Sweden, Miguel Najdorf of Argentina, Samuel Reshevsky of New York City and Fridrik Olafsson of Iceland.

First alternate will be Arturo Pomar of Spain and the 14-year-old boy wonder of chess, Bobby Fischer of New York City, will be second alternate.

Large wallboards will be erected for the tournament so spectators may watch each move. A commentator will explain the moves.

## Scattered Violence In Philippine Vote

MANILA (AP)—The Philippines voted for a President today, with only scattered violence. President Carlos P. Garcia's candidacy seemed to be aided by a typhoon which swept over Luzon.

The storm left floods and heavy property damage as it swirled across the northern Philippine island, where more than half the nation's 7,200,000 voters live.

Some polling places were swept away, and many voters could not reach polls. As the voting ended at 6 p.m., Typhoon Kit, with winds of 100 miles an hour, was slowly moving northwestward about 170 miles north of Manila. It was expected to head over the South China Sea at midnight.

Garcia's principal opponents, Jose Yulo of the Liberal party and Manuel P. Manahan of the Progressives, had counted heavily on strong support in central and northern Luzon. The typhoon ap-

peared to have damaged their chances.

Two other candidates, Sen. Carlo M. Recto and Antonio Quirino, were virtually counted out from the start.

Garcia, who succeeded Ramon Magsaysay who was killed last March in a plane crash, pledged to continue his predecessor's pro-American foreign policy.

Even before the polls closed Garcia was flooded with telegrams from supporters in the southern islands saying he had a strong lead. Some predicted a landslide victory.

The outcome probably will not be known until late tomorrow.

Although at least one death was attributed to election violence, Defense Secretary Jesus Vargas said balloting had been remarkably free of trouble. Fifteen persons were killed during the campaign.

A member of Garcia's Nationalista party was reported shot to death by a policeman in northern Luzon. Two men with him were seriously wounded. The policeman was held on a murder charge.

The Philippine News Service said the victim of the shooting had been chasing the mayor of Ilocos, who had charged him with buying votes.

The election commission predicted more than a million voters would stay home because of the weather.

Garcia, who moved into the presidency last March after Ramon Magsaysay was killed in a plane crash, remained an overwhelming favorite to win a four-year term.

"You mean, VEEDOL 10-30... the 4-Season Motor Oil. One grade for all-weather protection!"

World famous!

### Plane Stranded In Antarctic

McMURDO SOUND, Antarctica (AP)—A third Navy plane was stranded in the antarctic today as engine trouble continued to hamper flying. Seven persons aboard the plane were rescued from the Ross Ice Shelf and brought to McMurdo Sound.

The plane, a twin-engine DC3, was en route from Little America to the main American base here when one engine went out. Lt. Harvey G. Sved of Muskegon, Mich., landed it about 160 miles from McMurdo.

A second DC3 piloted by Lt. Cmdr. Ray E. Hall of Freeholdville, Ind., set out from Little America, picked up the seven and landed them at McMurdo.

Lt. Lloyd G. Peterson of Jacksonville, Fla., a maintenance officer, and aviation mechanic Fred A. Long Jr. of Ft. Lauderdale, Fla., who were with Hall, said the first DC3 would probably need an engine replacement. The plane was left anchored down against icy gales.

In addition to Sved, those rescued were Lt. Frank A. Dandrea, Paul, Miss. (Capt.); Lt. (j.g.) Earl R. Hillis, Chattanooga, Tenn.; navigator; Aviation Machinist's Mate Daniel R. McRea, Philadelphia; Aviation Electrician Robert W. Hackett, Glendale, Calif.; and two International Geophysical Year scientists, A. J. Morency of Bossier City, La., and E. A. Alf of Apple Valley, Calif.

**The 58 FORD is here now...**

there's nothing newer in the world

With all that's new for a world of difference

There's nothing newer in the world of style!

THE WHOLE WORLD SEEMS SMALLER WITH FORD'S NEW INTERCEPTOR V-8 ENGINE!

From London to Bangkok... the whole world loved it!

The 58 Ford stopped traffic in Trafalgar Square when it passed through on its round-the-world trip. And that was typical of the excitement this Ford caused in Paris... Rome... Athens... Istanbul... Calcutta... and Bangkok. For this Ford was proved around the world in the toughest "shakedown" cruise in history.

There's nothing newer than the true air ride of Ford-Aire Suspension. It's like riding on a cloud! But, you don't have to go to foreign soil to drive this newest Ford. We'll gladly save you the trip. Come in today!

You could search the world over and never find a car to match this 58 Ford's new beauty... new power... new ride... all at the low Ford price. We know! We tried it!

In Paris... the most style-conscious fashion critics in the world had a deep, low bow for Ford's latest style creation. In the mighty Himalayas, Ford's new Interceptor V-8 engine with Precision Fuel Induction won the day!

You'll hold, new styling—new Interceptor V-8 Power—new Cruise-O-Matic Drive—new Ford-Aire Suspension! The 58 Ford is the only car ever to meet a world-wide test and win world-wide approval before its public premiere!

You could search the world over and never find a car to match this 58 Ford's new beauty... new power... new ride... all at the low Ford price. We know! We tried it!

You'll ride in a new world of fashion with Ford's deep-shouldered styling. From new Power-Flow hood to Safety-Twin headlights, Ford's world-advanced styling is a standard! There's a new Stippled roof... a new Sculptured rear deck that's out of this world.

You'll be ahead with Ford's new Interceptor V-8 and Precision Fuel Induction. Gives you up to 300-hp. Smoother power... more power... from less gas! The secret is Precision Fuel Induction, a new combustion, fuel loading, and combustion system.

You'll get up to 15% more gas savings with new Cruise-O-Matic Drive teamed with the new Interceptor V-8. New Drive position, used for normal driving, lets you move smoothly—with a touch of your toe—from adding take-offs right up to highway cruising speeds.

You'll slide on a cloud instead of a spring with Ford-Aire Suspension. This is the way you've dreamed of driving—floating on air! Four air pillows! Heavily soot up any sign of a bump. Car reveals every time someone gets in or luggage is loaded.

You'll steer with a leather touch with Ford's new Magic-Circle Steering. Nothing rolls like a ball, and that's the secret of Ford's handling ease. Free-moving steel balls in the steering gear are virtually friction-free—give you the closest thing yet to power steering!

Your night driving is safer with Ford's Safety-Twin Headlights. You get safety you simply can't get with single lights... special light for high beams... special light for low. It's the biggest advance since the sealed-beam! It's high style, too.

Smooth as they come... smart as they go. The Fairlane 500 takes the 58 styling code, going away leaving tools!

COME IN... SEE THE CAR THAT WAS PROVED AND APPROVED AROUND THE WORLD!

SUPT. K. D. HESTES HONORS T&P 50-YEAR MEN  
Diamond pins go to Jake Bishop, left, Juan Ramirez, right, Ted Powers (below)

# T&P Honors Three 50-Year Veterans In Ceremonies Here

Three veteran Texas and Pacific railroaders were honored today at Big Spring division headquarters for their combined 150 years of unbroken service with the T&P.  
Jake S. Bishop, Jessie O. Lamar and Juan Ramirez were the honorees and each was the recipient of a diamond-studded T&P button, emblematic of a half-century of continuous service.  
Supt. K. D. Hestes made the presentations.  
Bishop, who is a Texas Eagle locomotive engineer and a Big Spring resident, is a native of England and started his T&P career as an engine wiper in the old railroad roundhouse here on Feb. 24, 1907. He was made fireman in 1909 and in 1925 was promoted to engineer. He has been at the throttle since then.  
His most unforgettable moment: "The head-on collision of old 310 and No. 227 back in 1910. I'll always remember it. I was just a rookie fireman and here comes old 310 heading right for us. Our freight conductor, up in the cab with us at the time, said 'Jump! I jump!'"  
Any casualties in that wreck? "Only one—a hobo plus a lot of cattle. But, all of the trainmen came out of it all right."  
Bishop and his wife, Lillis Mae, reside at 1407 Scurry St., and have one son who is in the Air Force at Honolulu. They have two grandchildren, both prides of the veteran engineer.  
"I still look forward every day to climbing into the cab and throwing the throttle," says the 67-year-old Jake Sherwood Bishop, who has no thought of retiring.  
"As long as I can pass the physical examinations, I'm not thinking about retiring." The veteran hoghead, as railroaders call engineers, thus is apt to be at the controls of the Eagle for a long time yet. On his last physical, his younger examiner commented, "I only hope when I am 67 that my hearing and eyesight will be near half as keen as yours are now."  
Jessie Otho Lamar, who is "Ted" to friends and co-workers, is a T&P brakeman. He began his T&P career on June 7, 1907, as, officially, a carpenter on the old Rio Grande Division. "Actually, I was just a waterboy and general roustabout on the job as the T&P then was building its bridge over the river at Brazos." He was made brakeman in 1912.  
This veteran brakeman was born at Santo, back in 1890, on the eve of the 4th of July. Lamar and his wife, Beulah Mae, live in Fort Worth and he works the Texas Eagle between Fort Worth and Big Spring. They have one child, a daughter, and two grandchildren, who, as Grandpappy Ted puts it, are "the best."  
"I've seen a lot of changes on the T&P in these 50 years," says Lamar, "but it is still the best road in the country and if I had it to do all over again, I'd still go with T&P. In fact," he told Supt. Hestes, "I'm ready for that second 50."  
And Ted Lamar, like Jake Bishop, looks ready, despite his 67 years.  
The third T&P railroader honored today, Juan Ramirez, retired just last month, but before retiring he was believed to be the oldest section laborer in the nation. The kindly little old Mexican marked his 84th birthday this last June 24. He was born in Cuernavaca, Old Mexico, when the T&P was only two years old, in 1873. Ramirez does not speak much English, but he didn't need to in his half-century of service with the railroad. All of his section foremen, though Anglo-Saxon, spoke Spanish. Juan has the distinction of putting in all of his 50 years not only with the pick and shovel brigade but also with the same section gang at Odessa. Too, despite the rigors and dangers of this work, he never had an injury or an accident during his T&P career.  
It was quite by accident, however, that Ramirez went to work for the T&P at Odessa. Coming from Juarez, he got off the train at Odessa, thinking he was in Fort Worth. He promptly got a job with the railroad and has lived at Odessa ever since then. His starting date was April 11, 1907.  
Ramirez and his wife, now deceased, had 10 children. He managed to put all of them through high school and send one of the two boys (the other eight were girls) through college. "T&P," he says in his broken English, "muy bueno to Juan. Muy bueno."

## Longtime Area Resident Dies

Funeral services will be held in Stanton Wednesday for Mrs. Rosie Edna Madison, 73, who died at 8:10 p.m. Monday in a hospital at Stanton.  
Mrs. Madison had lived in and around Big Spring and Stanton since moving to this area in 1914. She was born Oct. 19, 1884.  
Last rites will be said at 3 p.m. Wednesday in the First Baptist Church of Stanton with interment to be in Evergreen Cemetery, Stanton, beside the grave of her husband, N. W. Madison, who died in 1932. Nalley-Pickle Funeral Home is in charge.  
Grandsons will serve as pallbearers and all friends are to be honorary pallbearers.  
Mrs. Madison's survivors include six sons, Carl of Big Spring, Lois and Gilbert of Lenora, Paul of Kermit, Dick of Monahan, and Louis of Andrews; one daughter, Mrs. C. L. King of Snyder; two brothers, John Gilbert of Cisco and Harvey Gilbert of San Angelo; one sister, Mrs. T. H. McCann Sr. of Coahoma; 28 grandchildren, and 19 great-grandchildren.

## Toys Are Sought For Needy Children

Toys—the items make the difference between a good and bad Christmas for youngsters—are now being collected by the city firemen to repair and give to underprivileged children during the holiday season.  
Fire Chief H. V. Crocker announced today that the four fire stations and all Shell service stations would accept any toys—broken or otherwise—which will be given to needy children at Christmastime. The project is an annual affair for the firemen as well as the Shell stations, and Crocker hoped that citizens would contribute toys again this year as they have in the past.  
All toys are reworked, repainted, and prepared for children, Crocker said. The amount of toys given each year would run into thousands of dollars, but since the firemen do the work themselves and the toys are contributed, the amount of money actually spent is small.  
All that is spent goes for new parts (which must be purchased), paint, and other items necessary to repair them, Crocker said.  
Crocker said the fire department would welcome any amount or kind of toys. Anyone wishing to give toys to the drive can leave them at any of the fire stations or any Shell service station.  
After the toys have been repaired, a large building is used by the Salvation Army to distribute them—usually to parents so they can be given to the youngsters on Christmas day.

## Gay Hill Pupils Make Field Trip

GAY HILL (SC)—Pupils of the Gay Hill School went on a field trip to Lubbock where they visited the textile engineering building at Texas Tech and attended the Ringling Bros., Barnum & Bailey Circus in the Tech Coliseum today.  
At the textile center, the group saw the processing of raw cotton and all the steps the material goes through in being transformed into fabric.  
The trip was made by school bus and the pupils carried sack lunches. They are to return home about 9:30 p.m.

## Hub Caps, Mirrors Stolen From Auto

Two cars parked at the Cap Rock Restaurant on the Lamesa Highway were raided Monday night.  
Frank Pearson, 1608 Canary, told the police that two hub caps and two rear-view mirrors were taken from his car while it was there, and in a matter of minutes, C. B. Brummett, 209 Elm, reported that his car had been rifled. He said nothing was missing however.  
This morning, Jack Parrish Used Car Lot, 809 E. 4th, reported a radio had been stolen out of a 1952 Ford during the night.

## Mrs. Ed Lemmon's Services Are Set

LAMESA — The body of Mrs. Ed Lemmon, who died Sunday night at Jefferson, was being returned here today for final rites.  
Mrs. Lemmon, the former Mrs. Wilma Hamilton, had lived in Lamesa for 16 years, moving to Jefferson a month ago. Arrangements are pending return of members of her family.  
Surviving are her husband; one son, Bob Hamilton; her parents, Mr. and Mrs. Charles Plagg; Lamesa; a sister, Mrs. Maurine Hamilton, Lamesa; three brothers, Charles Plagg Jr., O'Donnell, June T. Plagg and Curtis Wayne Plagg, both of Lamesa. Higginbotham Funeral Home is in charge of arrangements.

## Farmers Union Slates Meeting

A meeting of the Howard County chapter of the Farmers Union has been called for 8 p.m. Friday at the Knott School.  
Frank Goodman, president of the county unit, said that officers would be elected and delegates chosen for the state convention. Other business also will be considered, he said.

## Furr Opening Is Postponed

Wet weather has caused postponement of the grand opening for Furr's new super market here.  
Opening of the store in the 900 block of Eleventh Place had been scheduled for Friday, but Conrad Davis, manager, said a new date for the ceremonies will be set after weather clears.  
Rain this week has made it impossible for the contractor to install paving on the parking area which surrounds the super market. Davis said it would be impractical to attempt to open the store prior to completion of paving.  
Inside, Davis and his force are pushing ahead with opening arrangements. Work on the building is virtually complete, and much of the stocking has been finished.  
Davis said all of the work will be pushed as rapidly as possible, so that the grand opening can be rescheduled as quickly as the paving work is completed.

## Pamplona Choir Due Wednesday

The Pamplona Choir, famous group of Spanish singers, will appear here Wednesday at 8:30 p.m., members of the Big Spring Concert Association were reminded again today.  
The reason for the special reminder was that originally the choir had been booked for a day earlier. After tickets and other literature had been printed, tour managers changed the date of the local appearance to make it Nov. 13.  
Accordingly, the starting time was moved back to 8:30 p.m. to avoid conflict with most of the mid-week prayer services of local churches.  
The 16-voice internationally known choir, which has won wide acclaim in Europe and South America, will be presented at the City Auditorium.

## HOSPITAL NOTES

**BIG SPRING HOSPITAL**  
Admissions—W. E. Morris, 1411 Wood; J. H. Dement, 1295 E. 3rd; Mrs. Delores Hatler, 1212 Loyd; Edeline Rodriguez, Knott Rd.; Robert Martin, 1602 W. 3rd; Janice Stone, 109 Birch; Gretchen Briden, 1007 Scurry; Danny Sherman, 810 N.W. 3rd; Bobby Armstrong, 212 N. Johnson; Jim Harper, Gall Rd.  
Discharges—Frank Edens, Rt. 1; Narcissa Arquillo, Coahoma; Annie Berry, Abilene; Clyde Trolander, Midland; Bill Digby, 902 E. 14th; R. C. Bennett, City; Roy White, 1902 Johnson; Clarence Horton, 802 Nolan; Josefina Ramos, Gen. Del.

## 2nd-Floor Work On City Hall Is Nearly Finished

If plans materialize, the city will move into the second story of the city hall this weekend.  
The contractor remodeling the building, Pioneer Builders, informed the city that work on the second floor would be completed by the end of the week. Work will then begin on the first floor the first part of next week.  
Should the second floor be ready by Friday, the city will probably move over the weekend, H. W. Whitney, city manager, indicated.  
This morning, the contractor's crews were working on cabinets in kitchen choir, which has won wide acclaim in Europe and South America, will be presented at the City Auditorium.  
Offices of the city manager, engineer, attorney, and the drafting department are established on the second floor, but while work is underway on the first floor, the purchasing department and the inspection departments will be moved upstairs.

## Neels Will Attend Movers' Convention

Mr. and Mrs. T. Willard Neel will leave today for Miami Beach, Fla., where they will attend a convention of North American Van Lines agents. Neel is owner of Neel's Transfer & Storage in Big Spring, local agency for the long distance moving company.  
More than 900 North American agents and their wives from all 48 states and foreign countries are expected to attend the annual convention, which concludes Saturday. Principal topics will be new moving services and techniques to handle the more than 35 million Americans expected to move during 1958.

## Slippery Streets Blamed For Wrecks

Three accidents occurred this morning on the city's slippery streets.  
In the 1400 block of W. 3rd, Alvin James of Ackerly and Thomas Halliman, 210 Carey, were in collision. Ricardo Rodriguez, Knott and Norman Kraft, New Braunfels, collided at 208 Gregg.  
Also today, Alma Drachenberg, Abilene, and Bob Garrett, Coahoma, were involved in an accident at 3rd and State.

## Felony Charges Are Filed Against Two

Two felony charges were filed in the court of Walter Grice, justice of the peace, by the district attorney's office.  
N. T. Winn is charged with removing mortgaged property; Manuel Montanez with attempted rape.

## Hearings Slated

Judge Charlie Sullivan, 118th District Court, dismissed nine cases from the docket and scheduled three for contested hearings during today at the opening session of a nonjury civil docket. Several other non-contested civil suits are also scheduled to be disposed of at this week's session.

## Has Surgery

Ollie McDaniel underwent major surgery Tuesday morning at the Cooper Hospital. He was reported resting well Tuesday afternoon.

## Gas Victim's Rites Slated, 3 Injured Leave Hospital

Funeral services for Robert Lewis Robertson, 30, employe of the Cosden Refinery, will be conducted at 3 p.m. Thursday at the River Funeral Home Chapel.  
The Rev. Ed Welch formerly of Big Spring but now of Odessa, will officiate. Burial will be in Trinity Memorial Park.  
Mr. Robertson was asphyxiated at 9 a.m. Monday when he was working atop a 60-foot stack at the refinery.  
Three companions on the job, Joe Morton, Billy Digby and Roy M. White, were hospitalized in the same accident but were reported dismissed from the Big Spring Hospital last night. They suffered no serious results from the gas fumes.  
Mr. Robertson and his co-workers were gassed when they set about placing a precautionary blind in a flow line which is used to flow excess process gas into the 60-foot stack for disposal. There was an accumulation of gas at the point and Robertson and his companions were overcome within a few minutes after they began the job.  
Efforts to revive him extended for nearly two hours but were futile.  
He was born in Edith, Texas, on Sept. 11, 1927 and had been a resident of Big Spring for 11 years. His home was at 2108 Main St. For the past four years he has worked for Cosden.  
Survivors include his wife, Ruth, three sons, Robert Jr., 9; Richard Lynn, 5; and Timothy J., 10 months; his mother, Mrs. Hallie Robertson, Globe, Ariz.; one brother, Royce Robertson of Tucson, Ariz.; three sisters, Mrs. Bob Thompson, Globe, Ariz., Mrs. Dannie Sparks, Big Spring, and Mrs. B. F. Wallace, San Angelo.

## Breedlove Well Completed On Potential Of 500 Bbls. Daily

The Husky - Panoteth No. 1 Breedlove in Martin County has been completed for a daily potential of over 500 barrels, and location was announced for a new Ellenburger wildcat in Mitchell today.  
The Martin County producer is 10 miles southwest of Patricia and a mile from production in the North Breedlove (Devonian) field. It will probably be listed in the field however. On 24-hour potential it flowed 536.36 barrels of oil through a 10-64-inch choke.  
The new Mitchell wildcat is about 16 miles southeast of Colorado City. It is R. S. Brennan Jr. No. 1 Wallace. It will drill to 11,030-65 feet. Tool was open two hours, and recovery was 30 feet of drilling mud and 670 feet of salt water. Location C NE SW, 17-36-56, T&P Survey.  
Newman Brothers No. 140-E Carrie Dean is a new location in the East Lamesa (Spraberry) field about 15 miles northeast of Lamesa. It is 550 feet from north and 660 feet from east lines of the south half, 40-1, J. P. Tevent Survey. It will drill to 8,500 feet.  
**Howard**  
Nortex No. 1-1 Winters made hole at 3,902 feet today. It is 610 feet from north and east lines, 9-25, H&C Survey, in the West Vincent field.  
Guthrie No. 3 Anna Bowen is located in the Howard-Glasscock field 10 miles southeast of Coahoma. It is 2,310 feet from south and 330 feet from east lines, 64-29, W&NW Survey. Operator will drill to 1,350 feet.  
Guthrie No. 2-C Sarah Hyman is in the same field 330 feet from north and west lines, 89-29, W&NW Survey. It will also drill to 1,350 feet.  
Guthrie No. 3-C Hyman is staked 320 feet from south and west lines of the northwest quarter, 89-29, W&NW Survey, in the Howard-Glasscock pool. Drilling depth is 1,350 feet.

## SEVENTEEN

"I asked where they thought they were going, eight in a car, and they said to pick up their girl friends!"

Happy Family

Nine-year-old Aurora Way, who was smuggled out of Red China last winter, is all smiles with her parents and brother, Douglas, 11, at a "welcome home" party in her honor in Boston, Mass. The Ways came to Boston on a visit in 1950, but had to leave their daughter in Shanghai because of illness. She was left in the care of her grandmother, but only 25 days after the Ways departed, Shanghai was captured by the Communists who refused to allow the child to leave the nation. Last winter the girl was smuggled out of the country and she flew to Boston when immigration laws were cleared.

### Keeps Individuality

Shirley MacLaine feels that all the glamour in Hollywood is not worth her complete individuality. She will soon be seen in Paramount's "Hot Spell," co-starring with Shirley Booth. She is pictured (left) with Lydia Lane.

### HOLLYWOOD BEAUTY

## Stage Player Resists Changes In Make-Up

By LYDIA LANE  
HOLLYWOOD—Red-haired Shirley MacLaine, with a sprinkling of freckles on her upturned nose, wouldn't exchange her individuality for all the glamour in Hollywood. And why should she, since this was the very reason she was starred in her first picture, "The Trouble With Harry," and later Booth in "Hot Spell"?

will help you classify your type of beauty. And then it will tell you how to capitalize on your best features. Vital information on every phase of beauty is included. Shirley, for example, talks about clothes, make-up, grooming and diet. Get your copy of "Discover Your Type"—including photographs and autographs of many of your favorite stars—by sending only fifteen cents (15) cents AND a self-addressed stamped envelope to Lydia Lane, Hollywood Beauty, in care of The Big Spring Herald.

## Women Of Presbyterian Church Meet As Groups For Discussion

The First Presbyterian Women of the Church met Monday afternoon and evening for study in groups.

**ELLA BARRICK**  
The members of the Ella Barrick Circle assembled at the church for a study taken from "The Presbyterian Woman." Mrs. Cecil Wasson brought the lesson on "By What Means?" Mrs. Grady McCrary led a discussion on an article from "Let's Talk About," dealing with stewardship.

Ten members were served refreshments by the hostesses, Mrs. Elvis McCrary and Mrs. Raymond Dunagan.

**RUTH CIRCLE**  
Mrs. W. G. Wilson Jr. was hostess for the members of the Ruth

Circle, when they met Monday afternoon. Mrs. Robert Piner opened the meeting with a prayer.

Mrs. Dalton Mitchell brought the Bible study from the book on Christian Citizenship. It was based on the books of Matthew, Mark and Luke. She also discussed the matter of stewardship.

Appointed as a committee for the selection of gifts to be presented to the members of the Home Circle were Mrs. Sam Baker, Mrs. Piner and Mrs. Wilson.

Seven members attended, with one guest, Mrs. H. M. Compton. Refreshments were served by the hostess.

**DORCAS CIRCLE**  
Mrs. J. Y. Robb opened the

meeting of the Dorcas Circle with prayer Monday afternoon, when the group met in the home of Mrs. Jack Wilcox.

Mrs. Roland Schwarzenbach gave the discussion on the lesson, and Mrs. Wilcox explained the "Let's Talk About" article.

Refreshments were served to five.

**KINGS DAUGHTERS**  
Repeating the Lord's Prayer in unison, the members of the Kings Daughters Circle opened the meeting in the home of Mrs. Charles Harwell.

Mrs. Arthur Pickle brought the lesson on "By What Means?" and Mrs. J. D. Leonard spoke on stewardship.

Refreshments were served to six after the closing prayer offered by Mrs. Arthur Pickle.

It was announced that the next meeting will be a general session at the church, following the luncheon of the Elizabeth McDowell Sunday School Class.

**BUSINESS WOMEN**  
A covered dish supper was served for the Business Women's Circle Monday evening at the church. Mrs. Lee Porter offered the invocation and presided for the meeting.

The lesson and discussion were brought by Mrs. Ray Ebling. Plans for the Christmas party were discussed, and a committee was appointed to make arrangements for it. Serving in that work will be Agnes Currie, Mrs. Travis and Mrs. Thurston Orenbaum.

## Coahoma Auxiliary Makes Good 'Poppy Day' Sales

Collections totaled \$50.50 from the Poppy Day sales in Coahoma Saturday, according to an announcement by the chairman, Mrs. J. H. Shelburn, Monday night at the American Legion Auxiliary meeting.

Mrs. Hezzie Read, president, expressed appreciation to Mrs. Burl Cramer, who donated profits from her coffee sales to the poppy fund.

Mrs. Read also announced a Hospital Worker's School will be conducted at the Veterans Hospital on Nov. 13 at 7 p.m. Mrs. Virginia Bailey, state president, and Mrs. R. D. Cramer, work chairman, will assist Mrs. Otis Aaron of Dallas in the school. Mrs. Aaron is director of Volunteer Hospital Service for the Department of Tex-

as. A dinner honoring the visiting women will be held at 5:30 p.m. at Coker's Restaurant preceding the school. All units of the area are invited to attend.

Mrs. Jack Cauble reported an increase in memberships and invited those who are eligible and would like to join to contact her, Mrs. Shelburn or Mrs. Read.

Clothing collected for the Save the Children drive will be distributed to needy children in Coahoma instead of sending it overseas, according to the auxiliary president.

Members were urged to visit the public schools during National Education Week.

Those who have gifts for the Gift Box for the VA Hospital may leave them in a box which is at Cramer's store. Gifts may be left until Dec. 1.

Next meeting will be held on Nov. 22.

### Movie For Gay Hill

"A Desk for Billie" is the title of the movie which will be shown at the meeting of the P-T-A at Gay Hill Thursday evening. The meeting time is set for 7:30 p.m. at the school. The film deals with the story of a pupil who grew up as a transient and finally finished in a California school as the valedictorian of her class.

### SHARON LINER TO WED NOV. 27

Mrs. Paul Liner, 1408 Scurry, is announcing the engagement of her daughter, Sharon Lee, to Mike Skalicky, formerly of Czechoslovakia. The couple will be married in St. Thomas Catholic Church on the morning of Nov. 27.

### 'ROUND TOWN With Lucille Pickle

When so many women all over the world are doing such creditable things, it seems a shame to see the only women's news on a national television show deals with Rita Hayworth, who is about to take her fifth husband and Ingrid Bergman who is leaving her second. If they can't get better news than that I had just as soon read the food pages. At least what comes from them makes good eating.

There will be many a social function going this month. Two announced so far will be dinners for Sunday School class members and their husbands, or wives, as the case may be.

On Thursday evening at 7 p.m., members of the Barbara Reagan Class of the First Baptist Church will have a dinner at Coker's Restaurant. Members, associate members and their husbands will see Mrs. Myrtle Lee give a chalk talk. Hostesses are Mrs. Ben Johnson and Mrs. C. L. Brooks.

Next Tuesday evening the Emily Andrews Class members will have a dinner for their husbands. It will be at the Baptist Church at 7:30 p.m.

A. C. and MRS. FRANKLIN KIRBY are here on a 30-day leave with their parents, Mr. and Mrs. B. M. Kirby, Park View Addition, and Mr. and Mrs. Marvin Hayworth, 907 Abram Kirby has been stationed in Phoenix for the past year and will report to Alameda, Calif. on Dec. 1.

FRANCES REAGAN and WALTER WHEAT, Baylor University students, spent the weekend with their parents, Mr. and Mrs. Horace Reagan and Mr. and Mrs. James Wheat. They returned to Waco Sunday afternoon.

MRS. FLOYD PARSONS and Paul were in Lubbock Monday to attend the Ringling Brothers Circus performance.

MR. and MRS. FRED STITZELL, and Charles and Mr. and Mrs. A. W. Moody were in Odessa Sunday afternoon to see the Ice-Capades. They also visited Mr. and Mrs. Paul Rix.

Mrs. H. F. Hodges was hostess for the Wesleyan Service Guild of Wesley Methodist Church Monday evening in the meeting at the church.

The session was opened with prayer by Mrs. John Appleton, and Mrs. W. C. Farnham brought a discussion of the Negro in the North.

Mrs. Bill Estes presented the Bible study on the book, "Christ, the Church and the Race." Mrs. Choc Smith gave the devotion.

It was announced that the group will meet on Nov. 25 in the home of Mrs. Joe Kitching, 902 Gregg.

### Movies Of Bear Hunt Are Shown For Ackerly Group

ACKERLY — Movies of a bear hunt on Kodiak Island taken by Vandy Coleman were shown by him for the members of the Ackerly Parent-Teacher Association meeting recently. Approximately 50 members attended.

Roy Phemister of the Ellis Homes Church of Christ in Big Spring preached at the Ackerly Church Sunday morning for Frank Chism who has been ill. Johnny Clark Jr., of Ackerly filled the pulpit in Big Spring.

Mrs. Jimmy Kelly of Big Spring visited her grandparents, Mr. and Mrs. J. E. Willoughby Friday.

Mr. and Mrs. Dolph Rasberry spent Sunday in Big Spring with their son and his family, Mr. and Mrs. Harold Rasberry.

James Willesworth and Mr. and Mrs. George Shaaf of Big Spring were guests of the Bruce Crains Sunday.

Garry Rhea of Midland spent Sunday with his parents, Mr. and Mrs. George Rhea.

Mr. and Mrs. Rob Mabry of Morton have returned to the home af-

ter visiting Mr. and Mrs. Nick West.

Mrs. Jess Billingsly is a patient in Price-Black Hospital in Lamesa.

Weekend guests of Mr. and Mrs. M. L. Knowlton were his brother, J. C. Knowlton, and his wife of Fulliston. Other guests were Mr. and Mrs. Doyle Sellars and children of Midland.

Jud Keese has returned to his home after undergoing major surgery in a Lubbock hospital.

Mrs. Lester Brown is in Wichita Falls with her mother, Mrs. Nell Kirby, who is ill.

Mr. and Mrs. Dee Phillips of Midland spent the weekend with her parents, Mr. and Mrs. Travis Russell.

Weekend visitors with R. P. Adams were his children, Mr. and Mrs. Alvis Hulcu of O'Donnell, and Mr. and Mrs. Doyle Adams and Cathy of Abilene.

Mr. and Mrs. Tommy Horton and Dana Ruth were in Lorraine Sunday to attend the 65th anniversary of the Lorraine Baptist Church.

Jane Cook is a patient in a Big Spring hospital.

SMALL MEDIUM LARGE

290 Toasty-Warm

Your feet will be cozy when clad in a pair of these bed-socks worked in simple crochet stitches. (Nice for gift-giving!) No. 290 has crochet directions—sizes small, medium and large inclusive. Send 25c in coins for this pattern to MARTHA MADISON, Big Spring Herald, Box 438, Midtown Station, New York 18, N. Y.

## Mexican Luncheon Is Served Guild Monday

Mrs. B. B. Badger served a Mexican luncheon to about 20 Monday at St. Mary's Episcopal Church preceding the meeting of the guild. This is her chosen activity in the talent project carried on by the members of that group.

followed, plans were announced for the Talent Tea to be given at the church Monday evening at 7:30. At that time all members will bring in the proceeds from the work which they have been doing for the fund raising.

## Tall Talkers Club Meets For Dinner

Mrs. Donald Barr was toastmistress when the Tall Talkers Toastmistress Club met for dinner at the Officers' Club Monday evening.

She presented three members in prepared speeches; they were Mrs. H. E. Thornber, Mrs. Jim Zack and Mrs. Vincent Brophy.

Mistress for table topics was Mrs. Dean Holmes; those given topics to discuss were Mrs. Hollis Smith, Mrs. Malcolm Nurnberg, Mrs. Leroy Tidwell and Mrs. Joe Eubank.

Sixteen members attended with four guests, Mrs. Phillip Cary, Mrs. Larson Lloyd, Mrs. Harold Mabry and Mrs. George Pike.

The next meeting is slated for Nov. 26 at the Officers' Club.

## Shower Given For Patti M. Myers

A very young party honored three-week-old Patti Michele Myers, who was given a baby shower Saturday evening. She is the daughter of Mr. and Mrs. Robert Myers and the granddaughter of Mr. and Mrs. Tom Rossen.

Hostesses were Mrs. Noel Hill, in whose home the party was given, Mrs. Lee Porter and Mrs. Boone Horne. They presented Mrs. Myers with a corsage of tiny pink roses and used the same kind of roses in an arrangement of a small pink well on the table.

Mrs. Andy Arcand of Fort Worth, sister of Mrs. Myers, was among the 15 guests attending.

Other workshops are planned for the next few months. Included are a recreation workshop on Nov. 25; one on civil defense, Dec. 2 and one on 4-H Club work, Dec. 9.

A workshop on education and citizenship will be held in January, with the date to be announced. Six clubs were represented at the meeting.

## Washington Pl. P-TA Attendance at the Washington Place P-TA Meeting Monday

Attendance at the Washington Place P-TA meeting Monday afternoon topped 75. Featured speaker for the meeting was Mrs. Anthony Hunt. Her topic was Social Development. Next meeting of the group is Dec. 9.

Ten members were present for the meeting.

## New Baptist Circle Presents WMS Program

The newly-formed Ann Dwyer Circle of the First Baptist WMS was in charge of the program given Monday morning at the church. Mrs. Charles Tyler was the leader.

Given before the background of a large world map, the program was on a theme, "Three Knocks in the Night."

Those who participated wore uniforms of nurses and impersonated the missionaries whose lives and works were described.

Mrs. Zack Gray, in the role of Eva Sanders, told of her work in Nigeria. Frances Roberts of Colombia, and Pargunay was portrayed by Mrs. Raymond Moore; Mrs. Wayne Bartlett was cast as Dr. Kathleen Jones, Kyoto, Japan.

A letter from Miss Saunders was read by Mrs. W. R. Douglass, a personal friend of the missionary.

Mrs. W. B. Younger announced the district meeting to be held at Baptist Temple on Nov. 21. It was decided that the group will furnish pies for the luncheon to be served at the church.

## Holiday Plans Are Made By Kappa Xi

Holiday activities were the principal topics for discussion when the Kappa Xi Tri Hi Y met Monday evening in the Y building.

Mary Ella Bair brought the opening devotion. During the business meeting Youth-In-Government delegates to the Austin meeting on Dec. 12-15 were announced to be Jerilyn McPherson and Jane Cowper.

The chapter will have a dance on Nov. 22. Refreshment committee is headed by Marilyn Bigham and others on it are Carol Ann Phillips, Jan Webb and Nancy Smith.

Dee Ann Sweeney was named head of the project committee and others are Mary Ella Bain, Judi Simpson and Celia Grant. The group to be in charge of arranging the food basket for a needy family at Christmas will be composed of Lona Angela, Linda Greene, Judi Simpson and Carol Ann Phillips. They will also plan the Christmas dance.

## Social Is Planned For Beta Omicron

A panorama of food was planned by members of the Beta Omicron Chapter of Beta Sigma Phi Sorority Monday evening in the home of Mrs. James Cape. Designed as a social for the group, the affair will be held in the home of Mrs. John Gary on Nov. 25.

A film on self-examination for cancer was shown by Mrs. Garner McAdams, and it was followed by a question and answer period with Dr. Arch Carson.

Cohostesses for the meeting were Mrs. Walter Eubanks and Mrs. Pat Fuqua.

## Kate Morrison Circle

The study of the "Primer of Prayer" was continued by members of the Kate Morrison Circle of East Fourth Baptist Church Monday afternoon. The circle met in the home of Mrs. R. C. Stocks. Mrs. H. Reaves gave the opening prayer, and Mrs. Stocks taught the lesson for the seven attending.

# Ike Awaits Adlai Decision On Post

WASHINGTON (AP) — President Eisenhower is waiting for Adlai Stevenson to make up his mind about an offer to become Democratic adviser on foreign policy—especially on revitalizing the Atlantic Alliance.

Sources who reported this said the offer was made through Secretary of State Dulles about Oct. 25. They said Stevenson has been considering it.

Both Stevenson and the White House declined comment on the report. But those who disclosed the offer said today they are hopeful Stevenson will accept. They said they are going ahead with plans for him to accompany Eisenhower and Dulles to the Dec. 16-17 meeting at Paris of the North Atlantic Treaty heads of state.

Stevenson, Democratic presidential nominee in 1952 and 1956, would be given a role similar to that filled by Dulles during the Truman administration. He would be foreign policy adviser from the opposition party.

In addition, just as Dulles was given prime responsibility for negotiating a Japanese peace treaty, Stevenson reportedly has been offered a top spot in America's efforts to breathe new life into NATO. Stevenson would be the U. S. No. 3 man, outranked only by Eisenhower and Dulles at the conference.

Stevenson's primary task would be to help launch a U. S.-British program for greater NATO cooperation and sharing of responsibility to cope with Russia's new scientific-technical - propaganda advances.

The Eisenhower request to Stevenson was reported to have gone out immediately after the Oct. 23-25 Washington visit of British Prime Minister Harold MacMillan.

Dulles was reported to have sent two letters to Stevenson on behalf of "the President and myself."

Stevenson's response to the first letter was understood to have been cautious. He was said to have expressed doubt about undertaking an all-out advisory job. In the meantime, it was thought he consulted top Democratic leaders to get their view on whether his acceptance might be helpful or harmful to the Democratic party.

## Russians Indicate Revived Arms Talk

UNITED NATIONS, N. Y. (AP)—A Russian delegate indicated today his government would give serious thought to an Indian compromise plan to get East-West disarmament talks going again.

A Soviet delegate dropped this hint when asked by a reporter if he favored the Indian move to almost double the size of the Disarmament Commission. The plan aims at getting the Soviets to

abandon their threat to boycott the 12-nation body and its five-nation subcommittee.

## Oldest Cow Dead

WILINGTON, England (AP)—Bluebell, claimed by owner George Page to be the world's oldest cow, is dead at the age of 32. The daughter of a Shorthorn bull and a Friesian cow, Bluebell had 30 calves. Another was on the way when she went grazing in a patch of deadly nightshade.

## Old Films On TV To Depict American Life

NEW YORK (AP)—Can you think of a more difficult television assignment than re-creating the story of American life between 1900 and 1917 from old films?

It's been done, however—and a fascinating hour of TV entertainment it is to one who has seen it in advance. The public will have the same opportunity Nov. 21 when Project 20 presents "The Innocent Years" on NBC-TV.

"At first, to find the film sound- ed like that proverbial blank wall detectives run into on murder cases," says Daniel Jones, chief film researcher for the Project 20 staff under Henry Salomon.

But then things began to happen. They turned up extraordinary films of President McKinley's funeral, of Mark Twain at home, of immigrants arriving at Ellis Island. Thanks to their discoveries you will see Coney Island and horse-drawn fire engines racing to a fire, Teddy Roosevelt and President Taft.

How was this absorbing history on film recovered?

"In museums and the Library of Congress," says Jones. "In old laboratories and attics, by reading old trade magazines, and talking to old men in the business with phenomenal memories. . . . Above all, I guess, by following your nose in old vaults and learning that the stuff that stank worst was the best for our project."

By that he meant that the film made at the time was the so-called "nitrate" film which smells like phosgene gas as it ages. Unlike the present safety film, it spoiled easily — decomposed and then exploded.

# BIG SPRING DAILY HERALD

SEC. B BIG SPRING, TEXAS, TUESDAY, NOVEMBER 12, 1957 SEC. B

**A Battery Of Washers**

Here is some of the automatic equipment that will swing into operation Wednesday morning with opening of the Washorama at 1703 Gregg. The coin-operated washers and dryers provide the latest in laundry services to Big Spring housewives. The Washorama is owned and operated by Mr. and Mrs. O. L. Nabors.

## New 'Washorama' Opens Wednesday

Gone are the days in Big Spring when those who take their clothes to automatic laundries had to watch the clock to make sure they had time to finish their laundry before closing time.

The reason for this is the home owned and operated Maytag Washorama which will open for business at 1703 Gregg Street Wednesday at 8 a.m.

Completely coin operated are 20 Maytag automatic washers, four clothes dryers, soap dispensers, refreshment machines, and even coin operated starching and dyeing machines.

Owners of the new Washorama are Mr. and Mrs. O. L. Nabors—well known Big Spring business people. Both moved to Big Spring over 30 years ago, were married here and prior to opening the Nabors Paint Store, he was with the Texas and Pacific. Nabors also opened the Nabors TV Service while Mrs. Nabors has operated the Nabors Beauty Shop for 31 years.

The Nabors' newest business venture—the Washorama, will be open 24 hours every day. A well lighted parking area has been made part of the Maytag Washorama giving patrons entrance from both the front and back of the building. Entrances to the parking area will be on both Gregg and 17th Street.

The automatic washers (Maytag) are the latest models with dial controls on each machine for the desired water temperature.

The owners point out that no matter how large the patron's laundry may be, it can still be finished in 30 minutes. Two wash loads may be dried during one operation of the dryers.

While the coin operated machines are doing the work, patrons may relax in the lounge where a free

television machine will be in operation at all times. There will also be a play pen for the little ones.

Several coin changers have been installed and there are laundry carts for transport of laundry from automobiles to the Washorama and back again to the cars.

On the opening day, a number of persons will be on hand to offer advice and give instructions on the use of the coin operated machines.

Also on opening day, hot cookies and coffee will be served and a cooking demonstration on a new gas range will be in progress all day. As another opening feature a 24-inch console television and an RCA Hi-Fi record player which will be given away later.

### Atomic Energy To Light Town

MOORPARK, Calif. (AP) — This town of 1,500 will be lighted for five minutes tonight by energy from an atomic reactor.

Southern California Edison Co., over whose lines the electric power will flow, says this will be the first time a community has been lighted entirely by power from a commercial reactor.

The reactor is operated by Atomics International at Santa Susana. Heat from nuclear fission in the reactor turns water to steam and the steam powers Edison generators at the site.

Electric energy from the reactor has been fed into the Edison system intermittently since July 12.

### Daily Average Oil Production Rises

TULSA (AP)—Daily average production of crude increased 86,150 barrels, most of it in Texas, to 6,806,350 barrels the week ended Nov. 9, the Oil and Gas Journal said today.

Texas' gain was 71,300 barrels to 2,721,400. Louisiana advanced 14,125 to 817,200.

Oklahoma had the week's largest loss, off 10,000 barrels to 541,000.

The Journal estimated 1957 production at 2,255,082,600 barrels compared to 2,238,077,900 a year ago.

New Mexico rose 1,000 to 254,300 barrels.

Colorado fell 2,700 barrels to 143,700, and Arkansas, 50 to 79,950.

## NEED DECLARED

# C-City Proposes Public Housing

COLORADO CITY—The Methodist Brotherhood, represented by John Russell and Weldon Husky, Monday night asked the City Council to set a price on the Farm Labor Camp at the corner of 17th and Cherry Streets in Colorado City.

According to Husky, the building would be improved and used for a Mexican Mission. Russell said that his organization would be willing to buy the property or would sign a long-term lease on it.

The council voted to hold a public hearing on the project to determine the city's best interest in the matter.

The council also passed a resolution that the city was in need of a Public Housing Commission and voted to advertise the intention of the city to enter into a contract with Public Housing authorities to secure housing for Colorado City. Sixty days from the time of publication will be allowed for expression of opinion from the public.

City Manager Rollin K. Sneath told councilmen that it was advisable to provide some kind of insurance for city vehicles. The council voted to require city employees who drive vehicles to provide themselves with minimum liability insurance. The city will pay the difference in cost between the employee's minimum insurance and the higher rate required to cover driving city vehicles.

Sneath reported that he had been assured that Colorado City would be placed on the CAA air activity map in December — the first step toward getting federal aid for a Colorado City airfield. He said that a request for funds would be made up and submitted in December.

## Fair Weather Prevails In U.S.

By The Associated Press  
There were wet spots in some Western and Southern areas but generally fair weather prevailed today across most parts of the country.

Cool weather continued in the Northeast, with some of the cool air again dipping into Southeast areas. Some warming was in prospect during the day in most of the Atlantic Coast region.

Rain fell in the north Pacific Coast region and southward into California. Scattered showers or snow flurries were reported in the northern Plateau region and in parts of the northern and central Rockies. Heaviest rain fell on the Oregon coast, with more than 1 1/4 inches at Astoria.

Another major wet belt was in Texas and southwestern Louisiana, with heaviest rain in southern Texas. Corpus Christi was drenched with nearly 3 inches of rain in 24 hours.

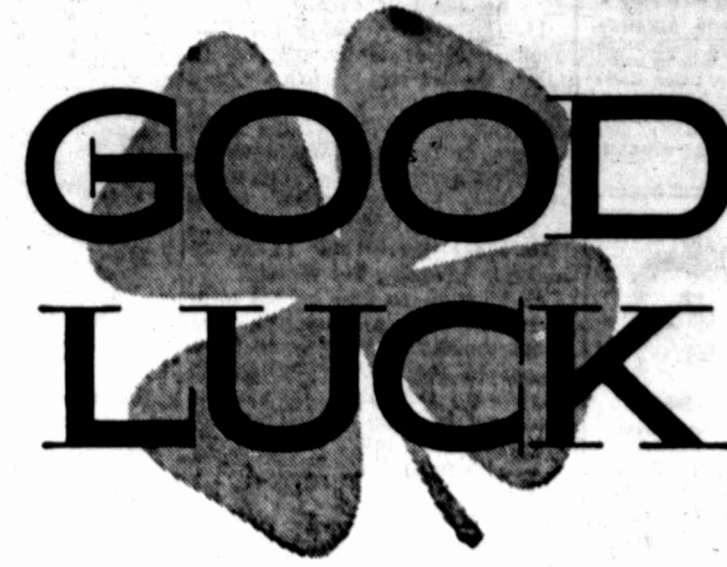

## U.S. Proposes Aid Program Expansion

UNITED NATIONS, N.Y. (AP) — The United States is proposing an expansion of the U.N. technical assistance program from about 30 million dollars to 100 million dollars. Rep. Walter Judd (R-Minn.), a

U.S. delegate to the current U.N. Assembly, said yesterday a U.S. proposal will be made next week to the 82-nation Economic Committee for a special U.N. project fund to aid underdeveloped nations.

About 50 million from the expanded program would be used for surveys to determine what work is possible in underdeveloped

nations, to set up training institutes and to conduct research on expanding economies, Judd said. About 14 million, or 45 per cent, of the present technical budget is contributed by the United States. Congress has ordered this cut to 33.1-3 per cent by 1960, but Judd said he is prepared to argue in Congress for a U.S. contribution of at least 40 per cent.

Uncle Ray:

How Would A Rocket Have Helped Columbus?

By RAMON COFFMAN

If Christopher Columbus had photographs of the earth's surface taken by a rocket or satellite equipped with TV or telephoto cameras, the course of his great voyage to the New World would have been changed — or more probably, his celebrated trip might never have taken place!

Outlines of continents as shown on Mercator's first flat world map. He gave South America very much the wrong shape!

Q. What error did Columbus make in planning his voyage? A. Through no fault of his own, Columbus had a mistaken idea about the distance he would have to go to reach Asia by sailing westward. Columbus thought he could get to India by sailing only a few thousand miles via his westward route from Europe. If he had at the time photos of the earth's surface taken from high in outer space, he would never have tried to reach India by going the long way, via the Americas.

Q. How will space vehicles aid modern map makers? A. Not long ago a U. S. rocket fired from the White Sands Proving Ground in New Mexico revealed for the first time by a high altitude photo that an error of about three miles existed in the mapped coastlines of Southern California. Observations of the earth, reported by either sight or sound from a satellite, will do much to make maps of ocean areas more accurate.

Q. Was the earth known to be round—even without the help of satellites and before Columbus? A. Claudius Ptolemy (pronounced TAIL-uh-me!) was a brilliant scholar who surmised that the earth was round nearly 1,800 years ago. He made maps of the earth showing degrees of latitude and longitude, and some of them, particularly those covering Southern Europe, were excellent.

Unfortunately, after the Romans lost their power in Egypt, Europe fell into the "Dark Ages," and few people read or believed the statements of early thinkers about the earth being round. But Toscanelli, a learned Italian, did give it thought, and it was from him that Columbus gained the idea.

For SCIENCE section of your scrapbook. To obtain a free copy of the illustrated leaflet on "Stamps and Stamp Collecting" send a self-addressed stamped envelope to Uncle Ray in care of the Big Spring Herald.

'Living Thing' May Go Up In American Satellite

WASHINGTON (AP)—There is a possibility that an American satellite may carry a living thing into space next year, but it's not likely to be a dog.

A spokesman for the U.S. National Committee for the International Geophysical Year said, "Consideration is being given to conducting some basic experiments dealing with the reaction of living matter to conditions of space."

However, "we are not at this stage considering sending up mammals," he said. He did not indicate what was under consideration.

WIDENING PROGRAM The committee official, who asked not to be quoted by name, spoke in reply to a newsman's questions about possible widening of the goals of the U.S. earth satellite program, Vanguard.

Dr. John P. Hagen, head of the Vanguard project, has left the door open for possible further experiments to be conducted by the American earth moon beyond those already selected. Vanguard's planned tasks center on picking up nonbiological information such as density of atmosphere, power of the sun's rays, flow of electrical currents and measurements of the earth.

Hagen said that whether there will be room for further test devices in the U.S. satellites depends on the success of the half-dozen launchings planned before the IGY closes at the end of 1958.

If early launchings do not pan out, then experiments planned for those firings will be carried over into succeeding launchings. But successful launchings along the way may leave some space and weight open for other tests, Hagen said. He indicated it was up to the scientific committee to decide.

The committee spokesman declined to say what experiment with a living organism was being considered, except that it would involve "simple but fundamental life processes." He would not say whether insects might be used.

Even if living things are not included in America's IGY satellite program, they may be shot up in further tests expected later on.

Dr. Hagen told reporters he himself would not want to send up a dog as the Russians did in Sputnik II. He said a rat is more like a human for test purposes, and a monkey even more so.

Beih mice and monkeys have been involved in past U.S. space tests. An Air Force major, David Simons, recently went up 102,000 feet in a balloon experiment, but

satellite a force for world brotherhood. "Once again, science has forced humanity to a crossroad from which there is no turning back, no escape—and just one road that leads upward," Stevenson said. "The choice is either extinction—or the human brotherhood that has been the vision of visionaries since the beginning of time."

Gen. Lauris Norstad, supreme Allied commander in Europe, told a Cincinnati audience that the nation should not discount its own assets just because Russian science "has scored in one area."

"Our air and atomic advantages remain, and these, combined with the West's chain of air, sea and land bases, encircling the world, will determine the military balance of power for some years to come," he said.

Bulgarian also told newsmen two American girls have volunteered to fly aboard the first Soviet rocket to the moon, but he said he did not remember the girls' names nor where they were from.

Former Secretary of Defense Charles E. Wilson last night urged that Americans not get too jumpy over Russian satellites.

"Whether the Russians or we are ahead in missile development, I don't believe anyone can say with certainty," he said.

He added that he thinks only a few months separate the United States and Russia in missile development.

But a former assistant defense secretary, Dr. Clifford C. Furnas, said the United States has suffered a "research Pearl Harbor," and suggested a four-point plan to meet the U.S.S.R. challenge — a strong educational program, thorough research, increased production and better international relations.

Furnas is chancellor of the University of Buffalo.

CAN CATCH UP Former President Truman said at Welch, W.Va., that he thinks the United States can catch up with Russia, but that it won't be an easy matter.

"The trouble with us," he said, "is that we are fat and lazy and want too many cars and too many fancy gadgets."

Chairman Russell (D-Ga) of the Senate Armed Services Committee said at Valdosta, Ga., that "the Russians are far ahead of us, and we must act at once."

Another Democrat, Adlai E. Stevenson, told a New York audience that he sees in the Russian

New Technique In Oil Recovery Told

CHICAGO (AP)—Ernest Thompson of the Texas Railroad Commission told the nation's oilmen today researchers have developed a new technique that has, in the laboratory, demonstrated nearly 100 per cent recovery of oil in the ground.

In earlier years, the primary recovery of oil resulted in from 50 to 85 per cent of the oil being left in the ground, Thompson told a group session at the annual meeting of the American Petroleum Institute.

"But modern techniques have increased the recoveries far in excess of 50 per cent and researchers have developed a nearly 100 per cent recovery technique," he said.

"We stand on the threshold of knowledge that will advance petroleum engineering more in the next 25 years than all the progress we have made since the first petroleum

engineer went to work at this branch of engineering," Thompson said.

He forecast secondary recovery methods will amount to approximately 300 million barrels during 1956-57.

Thompson, who as a member of the Texas Railroad Commission sits on the oil well supervisory board, expressed satisfaction over oil importers' attitude toward the government's voluntary plan to restrict imports.

"If this works out," he said in a prepared talk, "it should tend to encourage drilling here at home and help to keep the United States from becoming increasingly dependent upon foreign crude oil for our national security and our ever-expanding economy. We must be as careful as possible to assure adequate gas and oil reserves for our defense. These reserves can be kept on a safe basis only by insuring the maintenance of a viable, prosperous domestic oil-producing industry."

By 1965, he said, some 645,000 additional oil wells will have to be drilled "if we are to keep our reserves in the same proportion to demand as they are today."

Crash Program

HUGO, Okla. (AP)—House Majority Whip Carl Albert (D-Okla.) says he intends to introduce a bill in the next Congress calling for a crash program to educate youth in the scientific fields.

Hussein Reassures On Palestine Issue

AMMAN, Jordan (AP)—Trying to counter a mounting propaganda attack from Syria, Egypt and Russia, King Hussein has renewed assurances that Jordan will never give in on the Palestine issue.

"We shall continue to defend Arab countries until your usurped homeland is restored," he told the first Arab refugee conference here yesterday.

The young king said he was proud of the refugee representatives' loyalty to him in the face of "evil forces which are attempting to shatter the unity of the Jordanian people."

The conference adopted a resolution condemning "the unjust campaign of lies and intrigue launched against Hussein by the traitor pets of Egyptian propaganda."

Egypt, Syria and other Arab countries were urged to send representatives to Jordan's refugee camps to see "the extent of this misleading and poisonous propaganda of Egyptian radio stations."

Hussein's pledge to continue to demand the return of Israeli territory struck at the heart of the latest accusations against him. The refugees, who comprise a large portion of Jordan's popula-

tion, militantly oppose any suggestion of a compromise with Israel.

Cairo radio a few days ago intensified its attacks on Hussein, charging that he is plotting secretly with Israel against the Arabs.

Moscow radio said in an Arabic broadcast last night that Hussein is "an ally and friend of the bitterest enemies of the Arab world—the United States, Britain and Turkey."

Moscow said the United States has offered Hussein 30 million dollars "as a price for splitting the Arab world."

Student Killed In Indonesian Riot

JAKARTA, Indonesia (AP)—Security police opened fire on students demonstrating against increased school fees today, killing a 15-year-old boy and injuring another youth.

The demonstration reflected mounting tension caused by Indonesia's current economic crisis.

LEGAL NOTICE

INVITATION TO BIDDERS Sealed Proposals addressed to the Colorado River Municipal Water District, P. O. Box 809, Big Spring, Texas, will be received at the office of the General Manager, Mr. E. V. Spencer, Room 206 Permian Building, Big Spring, Texas, for the following contracts: CONTRACT A — Furnishing Vertical Transfer Pumping Units; CONTRACT B — Furnishing of Odessa Terminal Storage Reservoir, Unit 3; CONTRACT C — Odessa Lift Station. Until 10:00 a.m., Nov. 26, 1957, at which time the Proposals will be publicly opened and read aloud. Any bid received after closing time will be returned unopened. Copies of the plans, specifications, and other contract documents are on file in the office of the General Manager, Room 206 Permian Building, Big Spring, Texas, and in the office of Press and Nichols, Fort Worth, Texas, and may be examined at either office without charge. Plans, specifications, and other contract documents may be procured in the office of Press and Nichols, 407 Danziger Building, Fort Worth, Texas. No deposit will be required for Contract A or Contract B. A deposit of Twenty Five Dollars (\$25.00) as a guarantee of the safe return of the plans and specifications in good condition will be required for Contract C. Contract D. The full amount of this deposit will be returned to each bidder immediately upon the return of the plans and specifications in good condition. No refund on contract documents and plans returned later than ten (10) days after the award of the contract will be obligatory. Bid Security in the form of an acceptable Bidder's Bond, or Certified Check in the amount of Five (5) per cent of the maximum total bid shall accompany each bid. Successful bidder will be required to furnish a Performance Bond in the amount of one hundred (100) per cent of the contract price. There must be paid on this project not less than the rates of wages which have been adopted by the Owner and as set forth in the documents. The Owner reserves the right to reject any and all bids and to waive formalities. No bids may be withdrawn within sixty (60) days after date of which bids are opened. COLORADO RIVER MUNICIPAL WATER DISTRICT Joe Finkle, Secretary

## A Bible Thought For Today

But these things, which God before had showed by the mouth of all His prophets that Christ should suffer, He hath so fulfilled. (Acts 3:18)

## How About A Vote Of Confidence?

Perhaps this is a little early in the week to mention it, but we hope that Big Spring folks will turn out in great numbers to witness our last game of the football season.

From the point of wins and losses, our season has not been one to keep fans in a constant state of rejoicing. Against formidable opposition, we almost always played good ball, but we were outmaneuvered. Our let downs, if you can call them that, came unhappily on weekends when perhaps we should have won.

But you can't say that the boys haven't been putting out to the top of their ability all during the season. They have been playing what has come to be known as "hard nose" football, a rugged brand of blocking and tackling.

All any lad can do is his best, and we believe that our boys have done that.

Consequently, we think they are due a vote of confidence at the gate when San Angelo comes to town Friday evening. This game won't settle anything but the conference cellar, but we hope you will speak to your friends and encourage a large crowd to express appreciation for effort, tenacity and courage.

These young men deserve it.

## Many-Sided Demands On Education

This special week to focus attention upon American education and which will be highlighted locally by teachers visiting in more than 50 business establishments on Friday once more reminds us of the take we all have in education.

Education cannot survive, much less meet the demands for more and better prepared staff members plus an endless amount of new buildings and equipment, unless it has the support of business. Equally elemental is the fact that business cannot survive unless it is fed the life blood of young, enlightened minds. These elemental axioms stress the increasing interdependence of the two.

Dramatic advances of science have par-

icularly directed our attention to the schools and colleges and to the necessity of training more minds capable of penetrating beyond the perimeters of our present knowledge. Survival and certainly progress will depend in a large measure upon our success in training creative minds and marshaling them effectively.

Yet, we need not think that this is the sole challenge of education. Indeed, it is one facet, for our skills in the field of human understanding and relation are lagging badly everywhere. While we are training engineers and scientists, we must bring up statesmen, businessmen, philosophers, doctors, lawyers, teachers and a host of others who will sustain our vigorous free society.

## Marquis Childs

### No Negotiation On Atomic Controls

WASHINGTON — By conservative estimate, within two to three years the atomic monopoly of the United States, Russia and Great Britain will be broken, with a fourth power and soon afterward a fifth power able to produce atomic weapons. And this is the time span, in the view of most observers, for bringing the atomic arms race under international control and inspection.

Yet there is no visible evidence in this government of any effort to take advantage of the brief time that is left to try to negotiate an agreement. The evidence all points in the other direction—to a firm determination to avoid any realistic negotiation.

The Administration, in the hole in which it finds itself, is setting out to enlist bipartisan support for foreign and military policies. But senators whose support will be vital have come to feel that the Eisenhower-Dulles foreign policy is self-defeating. And while they will not publicly reject the olive branch held out by the White House, they will not follow the present Administration lead.

One reason is that, as details are pieced together of what happened to the disarmament talks last summer, senators are convinced that Secretary of State John Foster Dulles flew to London in August to make sure that no agreement would be reached with the Soviets. They are convinced also that Marshal Georgi Zhukov's proposed visit to talk with President Eisenhower, as first suggested by the President, was rebuffed as undiplomatically as possible to make sure nothing like that would happen.

A preliminary inquiry shows that career service officer Edward L. Freers, director of the Office of Eastern European Affairs, was instructed to receive Soviet Ambassador Georgi N. Zaroubin and inform him that the President's remark about a visit had been purely hypothetical and that such a visit would not be welcome. As one senator put it, this was just as though you told your house maid to inform a guest coming to dinner that he was unwelcome.

Information obtained by one Senate committee indicates to the satisfaction of those who have examined it that the reason given for Dulles' sudden trip to London while the disarmament talks were in a critical stage was a pretext.

As a result of Dulles' week in London, the American position was that no first-stage agreement could be reached, since every step was interdependent. There was no guarantee, of course, that a first-stage agreement on testing of atomic weapons under a system of inspection and control was possible. But some negotiators believed the Russians were prepared for such a step.

The tendency among high officials in the Administration is to say that, even if this is all true, it is water over the dam and what is important now is to close ranks in the face of new dangers. But the

Democrats, and with them doubting Republicans, are certain to ask: Close ranks for what goal?

France has a five-year plan for atomic production on which \$1.4 billion is to be spent. By 1961 a total of 1,500 tons of uranium will be produced, according to the plan. This is all avowedly for peaceful purposes. But it will give the French a theoretical capacity to turn out atomic weapons.

In Sweden a debate has been raging over whether the Swedes should go ahead with their own program to produce the raw material for weapons which also would be available for peacetime atomic uses. Under forced draft, if the government was willing to put sufficient funds into such a project, Sweden could produce enriched uranium by the early 1960s.

Senators called on to cooperate with the Administration believe these portents cannot be ignored. They are saying already that the Dulles view that negotiation must wait for the West to attain a position of incontestable strength, while the Soviet empire faces internal strains so severe as to indicate collapse, will not do. Recent events seem to have outdated that position, which the Secretary has maintained at all costs for five years.

(Copyright 1957, United Features Syndicate)

## What Others Say

It is a truism in politics that the American voter tends to vote his pocketbook—that is, that he reacts to parties and issues in terms of how he thinks he will be affected financially and economically. The conclusion of Congressional Quarterly, after a nationwide sampling of opinion, is that the pocketbook issues will be particularly acute next year. Foremost among these issues will be inflation and tax reduction.

Both political parties are showing sharp realization of the potency of the economic issue and its various facets. An evidence of this realization is the strategy being laid by Senate Majority Leader Johnson during his between-sessions "rest" period at his ranch in Texas. Mr. Johnson is reported by Star-Telegram writer Charles K. Boatner as making plans for an assault on the high cost of living when the January session of Congress rolls around. It is clear that he will seek to establish in the minds of the voters in advance of next fall's congressional elections the impression that it is the Democrats who are most concerned with the high cost of living.

Republicans also are keenly aware that inflation and its effects will be a foremost political issue in the 1958 struggle for control of Congress.

Since the party in power is the one most vulnerable to adverse public reaction to the continued rise in living costs, the Republicans would like to soft-pedal the issue.

Certainly effective effort to cope with the problem of inflation would be welcome, but there is a considerable danger in making it a paramount political issue. The control of inflation is a complicated question, affected by the interplay of many economic factors. As far as government is concerned, it can have its greatest influence against inflation by adhering to principles of prudent finance and creating a climate in which inflation has the least chance to flourish. It is encouraging to see that both parties are attaching importance to the issue. There is less hope that the matter of inflation control can be resolved safely and effectively in the political arena.

### Missiles Job Sounds Vague

WASHINGTON — James R. Killian has his hands full. But that doesn't mean he has his work cut out for him.

The 53-year-old Killian, president of Massachusetts Institute of

Technology, now becomes another special assistant to President Eisenhower.

His job will be to help develop missiles and satellites. From the way Eisenhower in his Thursday

night broadcast described Killian's assignment it sounds big and impressive.

But it also sounds pretty vague. And the important point for the nation is: Does the particular title given Killian — assistant to the President—carry enough weight to get the job done? How much authority will he have?

## Hal Boyle

### The Changing Pictures

NEW YORK — One of the recurrent ordeals of civilization is having one's picture taken. The tribal savage often dreads a camera for fear this magic box by imprisoning his image will also capture his soul.

The civilized man has an even more melancholy fear — that the camera neither will catch his likeness nor reflect his soul. He feels the camera always lies when it's pointed at him.

One of the major differences between men and women in the 20th century is their attitude toward having their picture taken.

Protest as much as she may that "I know this will turn out awful," the woman secretly is sure that actually, by some miracle of modern chemistry, the photographer will manage to make her look all right. She actually enjoys the experience.

The man, on the other hand, goes to the photographer as he goes to the guillotine.

It is hard to say when man's fear of the photographer starts. Probably it is in the childhood when, during the taking of a snapshot, some family onlooker calls facetiously:

"Be careful. Your face may break the camera."

The small boy, aware that every remark by a grownup holds a vague possibility of truth, stares in self-conscious fascination at the camera. Will it actually explode or fall apart? For the rest of his life he will never again look head-on into a camera without the same uneasy feeling.

A man's deep disillusionment with the camera, however, comes after he sees his first portrait — in the yearbook when he graduates from high school. He never quite recovers from this.

"Not bad," the family murmurs sympathetically.

"Not bad?" Are they crazy? Is this the way you really look to others? Are your ears really that big? Is your face really that insipid?

For the rest of his life the boy will regard a photographer as a conspirator in league with the devil to make him look ridiculous to the rest of the world.

He won't mind his wedding

pictures so much, no matter how they turn out, because a man honestly expects to look somewhat ridiculous on his wedding day. Nor will he complain overmuch against his passport pictures, as women do, for he recognizes that even customs officers are too kindly to gaze critically at them. Passport pictures, he knows, are universal — recognized as horrible and unfair. Some people even send copies to their friends at Christmas with the notation, "guess who?"

After 40, a man will go to the photographer only under family duress or group pressure. When the official picture is taken at the annual office banquet, he tries to bury his face in the fried chicken or hide behind the man in front of him.

When he is, at times, forced to make the galling trip to a photographic studio he is prepared for the worst. All his life he has jeered at John Barrymore because the actor preferred to have his picture from an angle that showed his favored profile.

Now he envies Barrymore. After all, Barrymore was lucky to have one side that looked better than the other.

When the portrait is finally delivered and unwrapped, he knows what the family will say: "not bad."

After they have gone to bed, he sits and looks at the picture all by himself. Not bad? Are they really that fat? What did the camera do to rob him of so much hair?

He tiptoes to the bookshelf, gets out his old school annual, blows off the dust, opens it to his youthful picture.

"Hmmm, not bad," he murmurs. "By golly, I had a good strong face as a kid."

"But they had decent photographers then. What's happened to photographers today? They make a fellow look so nabby-pamby. They can't even bring out the character a man's got."

As he goes to bed, however, he will realize, if he's honest, that 25 years from now the new picture he just had made will look pretty good to him, too. Everything is better 25 years later.

## MR. BREGER

"All right, let's go—at 5,000 pennies an hour for your thoughts..."

## Around The Rim

### Heads Down Alley, Finds Career

I was cutting through an alley en route to my home. I travelled the alley because it saved several blocks.

The alley passed the rear doors of numerous business places. Among others was the office in which was printed the Leader—the town and the county newspaper. A weekly newspaper which, perhaps, should have spelled the adjective with an "a" instead of two "e's."

The double doors were swung wide and out of the dim and dusty interior came the so readily identifiable odor of printer's ink, blended with a touch of the smell of gasoline and the musty flavor of paper.

I stopped and gazed into the dusky back shop. A vague figure saw me. The figure emerged into the bright sunshine of the New Mexico summer afternoon. It was that of a gaunt little man, nearly bald, his sleeves rolled high above his elbows and wearing a shiny rubber apron.

There was ink on his face, ink on his hands and ink on his clothing.

He pushed his glasses high on his forehead and looked at me.

"Howdy, kid," he said.

"Howdy," I replied.

"Wanna earn a quarter?" asked the apparition.

Certainly I wanted to earn a quarter. (This was in the days when a quarter had considerable value—particularly to a boy.)

"O.K.," said the man, "go down to the post office and tell 'em to give you those packages for the Leader. Bring them back and you'll get your quarter."

I was off like a shot. The post office also had a rear door on the same alley—in fact nearly the entire business district of the town had rear doors on this alley. I asked for the packages and a be-whiskered man gestured to a sizable stack of wooden cartons in a corner.

I marched over, stuck my fingers under the two top boxes and heaved. I was amazed to find that the boxes didn't budge. I could lift one but not two. (Later I discovered why. The contents were "boiler plate"—readymade and plated type to fill the insides of the paper. Boiler plate, made of type metal, is as heavy as lead.)

I lugged the boxes back to the Leader

office, one at a time. There were many of them.

The printer ripped open one of the boxes. Inside was a clutter of proof sheets. In bold black type I read "The Hohenzollern Dynasty." There were pictures on the sheets, too—of odd looking bearded characters some of whom wore spiked helmets.

(If you are a student of history you can establish the date of this episode fairly close. American newspapers, even papers like the Leader, didn't run life histories of the Hohenzollerns after the first decade and a half of this century.)

I got my quarter and prepared to depart. The printer stood looking at me pursuing his lips.

"You like to work in a newspaper office?" he asked.

I had not thought about it before, but I told him, yes, I thought I would.

The upshot was that I was hired at 15 cents an hour as I recall it. I swept out the shop; I inked the G. Washington press on Thursday or whenever we managed to go to press. I set type for the simpler items in the paper from the tall type cases. I cleaned ink rollers on the job presses. Ultimately I was even allowed to run one of job presses on a job which didn't matter too much.

The summer passed quickly.

I left the town at the end of summer but the damage had been done.

Prior to the day I walked down that alley, I had every firm intention of becoming an engineer. Probably a civil engineer. I had always been fascinated by sight of sunburned gentry peeping through transits and waving mysterious signals at other sunburned men holding slender staffs painted red and white.

After that walk down that alley, my whole life pattern changed. Gone was the mental image of me in picturesque garb gawgawing at other men as I peeped through a telescope.

I had been infected with the most persistent of all diseases—the hankering to pursue the career of journalism.

I guess it was a permanent infection. I'm still pursuing it.

—SAM BLACKBURN

## The Gallup Poll

### Demos Widen Lead As Favored Party

PRINCETON, N. J.—Despite nearly five years of a Republican administration, during which the country has come to enjoy a record prosperity, the typical voter today links the symbol of prosperity more with the Democrats than he does with the GOP.

The latest Institute survey finds proportionately more people today than at any time since November, 1951, who say that the Democrats will do the best job of keeping the country prosperous in the next few years.

At only one point since Mr. Eisenhower first took office in 1953 has the Institute found the GOP ahead of the Democrats on this score. That occurred early in 1956 when the weight of sentiment was that the Republicans would do the best job of keeping the country prosperous.

With the current activities of the stock market giving rise to talk of the state of our national economy, the Institute assigned its staff of opinion reporters to interview voters in all walks of life and living in every section of the country. Each voter was asked:

"Looking ahead for the next few years, which political party—the Republican or Democratic—do you think will do the best job of keeping the country prosperous?"

The trend of the vote on this question since 1951:

sharply according to the political party preference of the individual.

The important political fact, however, is that for the first time since the Eisenhower administration took office, the weight of opinion among the all-important Independent voters holds that the Democrats will do the best job of keeping the country prosperous over the next few years.

Here is the trend of the vote among Independent voters since 1951:

	No. No.	Rep. Dem. Diff. Op.	Per cent
Nov. 1951	22	28	20
Nov. 1955	36	25	14
Jan. 1956	35	22	13
June 1956	30	23	24
Oct. 1956	28	27	19
Today	25	30	19

Political strategists in both parties will be interested in the vote today in various regions of the country.

A regional analysis shows, for example, that the Democrats do almost as well today in the traditionally Republican Midwest as they do in the 13 states of the solidly Democratic South.

On the other hand, the Republicans have the edge on the prosperity issue in the heavily industrial states of the East.

An analysis by occupation groups reveals that only among business and professional people does the weight of sentiment hold that the GOP will do the best job of keeping the country prosperous.

In other occupation groups—including white-collar workers, farmers and manual workers—people are inclined to look more to the Democrats than the Republicans as the party to keep the country prosperous.

## Large Numbers In Nation Are 'Dental Cripples'

By FRANK CAREY  
Cleveland Staff Science Reporter

CLEVELAND — A large proportion of the nation's people are "dental cripples" despite enormous expenditures for dental care, a New York state dental official said today.

"This is the extent of the dental caries (decay) problem," Dr. David B. Ast, director of the Bureau of Dental Health, New York State Department of Health, told the opening session of the American Public Health Assn.'s 85th annual meeting.

He said the American public spent \$1,600,000,000 in 1955 for dental care.

Tooth decay, he said, "affects practically the entire population, starting early in life, and the annual increments of defects occur at a faster rate than the corrections which can be made by dentists."

He said tooth decay could be reduced materially by cutting down on sweets and by brushing the teeth immediately after eating or drinking any food at any time, but he declared both those procedures are impractical.

"Regular and periodic care by the family dentist will not necessarily prevent the incidence of dental caries," he said, "but it could very well prevent the gross destruction of tooth structure and loss of teeth with their concomitant dental problems."

"However, with size of the problem as it exists today, the limited number of dentists available and the high rate of incremental defects, only a small portion of the problem is being met by corrective service."

Advocating fluoridation of public drinking water supplies, he said studies of this technique in the United States and Canada, have demonstrated its capabilities of reducing tooth decay by 60 per cent.

## Thomas L. Stokes

### Stassen Ready To Play The Heavy Odds

Mr. Stokes' column is being used while Inez Robb is on vacation.

WASHINGTON — Harold Stassen, the man with nine political lives, is ready for another big gamble.

He has finally made the decision, recently rumored, to seek the Republican nomination for Governor of Pennsylvania in next May's primaries. If he can win it, and get elected next November, he would become a candidate for the 1960 Republican Presidential nomination for which Vice President Richard M. Nixon now is the leading candidate, Nixon's California colleague, Senator William F. Knowland, is a possible entrant, too, if he can get elected Governor of California next November.

A miracle for Harold Stassen? Right. It would take practically a series of them at every stage of the new Stassen plan in which President Eisenhower's disarmament adviser has evolved. Yet it does not seem insuperable to him—as it does to everybody else practically—that he should try to become Governor of another state.

It was 19 years ago, in 1938, that he was elected to the first of three terms of Governor of his native state, Minnesota—so long ago that it seems that he has been in politics forever. Yet he is only 50 and looks hearty.

He failed last year at an impossible job, which he started too late, to block Vice President Nixon's renomination at the San Francisco convention. He has doubts now, as he did then, of Nixon's drawing power with the American people and does not want to see the party's nomination sewed up and foreclosed far in advance. And that is just what the Vice President is

trying in every way to have done for himself.

Stassen wants to broaden the choice, make the convention a more democratic procedure, with the doors opened for others than the two Californians. One of the others, he hopes will be himself.

Nor is it by any means certain that Bill Knowland will be in the lists. He can't if he should get beat for Governor, and that is not so unlikely as it seemed a few weeks ago due to two circumstances. One is the slump in the Republican party's fortunes, confirmed by recent elections, and the other is the probable Democratic candidate, Attorney General Pat Brown, who has proved himself a powerful vote-getter in California.

Stassen would seek support, should he become a candidate for the 1960 nomination, in the same wing of the party in which Nixon is proselyting—the Eisenhower wing. Stassen has been identified with the Administration, as is Nixon, in his jobs as head of the Foreign Operations Administration and now as disarmament adviser to the President.

How Stassen ever could get over all the hurdles into a position where he could become a candidate for the nomination is hard for anyone to figure—except Stassen. Party leaders in Pennsylvania, almost to a man, are cold to his nomination. Even if he won the nomination, he would run smack into a Democratic trend in the state which now has a Democratic Governor, George Leader, who cannot run again, as well as a Democratic Senator who won in the Eisenhower landslide, Senator Joseph S. Clark.

Fleetwood 60 Special In New Cadillac Line

This is Cadillac's 1958 Fleetwood 60 Special sedan. It is one of 12 new models which Cadillac puts on display Wednesday, all of them distinguished by silhouette changes, more luxurious interiors, and numerous engineering advances. The sedan pictured here is mounted on a 133-inch wheelbase and measures 225.3 inches in length. Cadillac models are to be seen locally at McEwen Motor Co., 403 Rannels.

PUBLIC UNVEILING WEDNESDAY

New Luxury Features Noted In Cadillac Cars For 1958

A new look of luxury, inside and out, is proclaimed for the 1958 line of Cadillac automobiles, which go on display here Wednesday, at McEwen Motor Co., 403 Scurry.

Cadillac this year carries a different over-all profile, with a "going away" tail fin, four headlamp system, and longer, lower lines. Included in the 12 new models is a new extended deck sedan in the popular 62 series.

The big engineering news for Cadillac in 1958 involves suspension advances. These advances result in better and softer ride and improved control and handling.

The basic factor in the improved suspension is the use of four-link rear suspension on all models. By using this new linkage, the Cadillac is adaptable to either coil spring suspension, which is standard, or optional air suspension.

Styling-wise, Cadillac presents a long, low sleek appearance. Responsible for this broad-shouldered, longer look are the unique new grille which is inset with jewel-like protrusions, a longer hood, wider and longer fenders, the addition of rear ventplane windows in four-door models and the new "going away" tail fin.

The extended deck sedan is a companion car to the 62 sedan with more trunk room and an additional 8.5 inches in over-all length. Like all other closed models, with the exception of the eight-passenger limousines, this new model is a hardtop.

Several distinctive refinements are made to the Fleetwood 60 Special Sedan for 1958. Among the exterior features which distinguish this model is an extruded aluminum shield across the lower rear quarter panel. The grooved effect of this molding is carried around to the rear deck also where it runs between the two back-up lights inset in the deck.

Other distinguishing 60 Special features are a wide stainless steel rocker sill molding which covers the lower edge of the doors and vertical chromed blades which are added to the rear bumper on either side of the license plate opening. The 60 Special, too, attains new heights of interior luxuriousness. A visual walk around the 1958 Cadillac shows these changes:

A hood which is 5.3 inches longer than in 1957.

Front fenders are both wider and longer and include a crown molding as well as a side mold-

ing. The fenders are wider to house the true four headlamp system, standard on all models.

The massive grille is typically Cadillac but includes a liberal sprinkling of jewel-like protrusions which command attention and underline the broad-shouldered look.

The most significant change in the middle body portion of the 1958 Cadillac is the addition of manually operated rear ventplane windows in all four-door models other than the Series 75.

The final touch to the 1958 silhouette is the distinctive tail fin. As on the Brougham this fin sets off the sweeping low lines and adds to the feeling of length.

Twenty-four exterior colors are available on all models other than the Eldorado Brougham.

Paris (U.S. Sen. Henry Jackson (D-Wash.) today called for the immediate establishment of a NATO guided missile training center.

The senator told the formal opening session of the North Atlantic Treaty Organization Parliamentary Assembly such a center would train soldiers, engineers and technicians from all 15 member countries in the use of missiles.

As the Parliament members from the 15 allies met, France's top soldier, Marshal Alphonse Juin, called in an interview for a "real NATO pool" of atomic arms. He said each of the principal NATO members—and France in particular—should have a stock of nuclear arms.

Free Hearing Aids For Needy Children As Christmas Gift

Needy children who have a hearing handicap that can be overcome with a hearing aid have a Christmas season opportunity to receive such aids free of charge.

John J. Finley of Sonotone in Odessa has announced that his company is granting free hearing aids to needy children. "No child need miss the bells of Christmas, and no teen-ager need start the New Year with a hearing handicap, for financial reasons," Finley said.

He asked that anyone knowing a needy child with a hearing loss to contact him at P. O. Box 1322, Odessa, He said:

"Bring the child to my office for a hearing test, with a note from a responsible individual or group, such as physician, teacher, clergyman, nurse or P-TA official. As soon as I have investigated this request and am satisfied that the child can be helped with one

Fog Blankets Most Of State

Rain, drizzle, fog and low-hanging clouds blanketed all but extreme West Texas Tuesday.

High winds battered fishing boats on the lower coast Monday and heavy rains soaked parts of South Texas for the third straight day.

The "Agnes H." broke up on a desolate stretch of beach between Port Isabel and Port Mansfield. Another shrimper, the "Daisy Mae," ran aground in heavy fog

of our hearing aids, I will recommend to my home office that aid be given to the child free."

The Sonotone Christmas program is on a nationwide basis, and Finley said that application should be made early to be in time for Christmas and to avoid geographical quota limitations.

between Port Isabel and Corpus Christi.

The area south of Kenedy in Karnes County got 3.75 inches of rain Monday. Fishing, in the same area, got 3.20 inches. Three Rivers 2.60 and Overby 2.75. Victoria also had a heavy shower.

Pettus in Bee County had 2.50 inches of rain, Zunkerville 2.40, the Cadillac Community 1.90 and Kenedy 1.10.

The rains were caused, the

Weather Bureau said, by warm, moist Gulf air circulating up over cool ground air over Texas.

TODAY we're proudly displaying the 1958 GMC Money-Maker. And we think you'll find it the handsomest hustler you ever handled. An eager 200 horsepower swings a top load like a cargo of feathers. Turning ease is like power steering's. A fast-ratio cruising axle gives you an overdrive's road pace and gas savings. Foam-rubber seats cradle you in a roomy cab. Boulevard styling carries out the feeling of luxury. But this beauty is built like a pocket battleship. You'll see that

in its massive spring hangers. In rear springs with the highest deflection rate of all light-duties. You can sit solidly on an unhooked end of its tail gate—and you can't crinkle the roof or door panels with a smack of your hand. You'll get the same quality instrument panel as on the big, \$10,000 GMC heavy-duties. A radiator mounted on a bulkhead integral with the frame. A steering column braced like a mast. These and more tell the inside story of GMC stamina. Come in and see for yourself. Why not do it today?

# Texas Aggies Retain Lead In Grid Poll

By HUGH FULLERTON JR. The Associated Press

The first six teams held their places in the Associated Press college football poll today as the nation's sports writers and broadcasters again gave Texas A&M top billing by a decisive margin.

But some real scraps developed among the leaders. Oklahoma and Auburn finished only eight points apart in the race for second place. Michigan State led Iowa by 112 points for fourth and Ohio State edged out Tennessee by 34 for the sixth spot.

With 184 experts casting ballots, the powerful Texas Aggies drew 60 first-place votes and a total of 1,577 points on the usual basis of 10 for each vote for first, 9 for second, etc. Oklahoma clung to second by the margin of 46 firsts and 1,411 points to Auburn's 42 and 1,403.

The figures for all three unbeaten teams were comparable to those of a week ago, when 197 votes were cast. The Aggies won their eighth straight game by an impressive 19-6 margin over Southern Methodist; Oklahoma's Sooners, troubled by a lagging offense most of the season, rolled to a 39-14 victory over upset-hopeful Missouri; and defense-minded Auburn checked Mississippi State 15-7.

Michigan State's 34-6 walloping of now-deflated Notre Dame barely increased the Spartans' fourth-place margin over Iowa, which rolled over Minnesota 44-20. Tennessee was the only team in the first 10 a week ago which improved its position. The Volunteers 21-6 winners over Georgia Tech, moved up from ninth to seventh. Navy and Army dropped from seventh and eighth to ninth and tenth as Mississippi jumped into the eighth spot. Ole Miss, a 14-12 winner over Louisiana State, is unbeaten in the Southeastern Conference.

North Carolina State, a 7-6 upset victim of William and Mary, lost its hold on 10th place and almost dropped out of sight in the ratings. The top 10 teams with first-place votes in parentheses:

1. Texas A&M (60)	1,577
2. Oklahoma (46)	1,411
3. Auburn (42)	1,403
4. Michigan State (9)	1,224
5. Iowa (19)	1,112
6. Ohio State (6)	859
7. Tennessee (1)	833
8. Mississippi (1)	347
9. Navy	340
10. Army	321

The second 10:

11. Duke	323
12. Mississippi State	88
13. VMI	76
14. Clemson	70
15. Illinois	51
16. Oregon	48
17. Texas Christian	44
18. Michigan	44
19. N.C. State	35
20. Rice	26

**They're Still Biting**  
Cold weather admittedly has put a crimp on fishing, but catfish at Lake J. B. Thomas still get hungry now and then, as this evidence presented by Mr. and Mrs. Hiram Reid will attest. She hooked the big fellow — a 26½-pound yellow cat — on a small trotline. Reid, to save face, caught the 21-pounder, plus several others, including a five-pound cat. In the same area B. Warren caught a 16-pounder.

## LOOKING 'EM OVER

With Tommy Hart

Sports dialogue:  
**LOU MAXSELL**, Austin writer:  
"Ray Masters' performance against Texas is just another proof that healthy young athletes aren't bothered as much by illness as moaning coaches want you to believe."  
**JERRY NASON**, Boston Globe scribe:  
"Ball players, generally speaking, insist that ex-ball players would make better official scorers than baseball writers... However, 30 years ago they said the same thing about umpiring. I note that the judgment of Ed Rommel, Lou Warneke, Charlie Berry, Babe Pinell, etc., former players, has been challenged as often asumps who are not."  
**ROBERT ZUPPKE**, one-time Illinois coach:  
"Moral and physical courage are closely associated; if your nerves fall you, your body fails you. It is a mistake to discriminate too much between the brains and the muscles. The football player must have greater mental efficiency than the debater."  
**FRED RUSSELL**, Nashville writer:  
"For size and speed and action, Auburn's football team is one of the most impressive college squads I've seen in a long time."  
**BUD WILKINSON**, Oklahoma football coach, shortly after his team beat Colorado's Buffaloes by a single point:  
"I'm very happy that the Buffalo is almost extinct, particularly the Colorado variety. That game is further proof that we couldn't have won 45 straight had we played an average team every week."  
**DUFFY DAUGHERTY**, Michigan State mentor:  
"Walt Kowalczyk, the 'Sprinting Blacksmith,' is as valuable to me as the 'Village Blacksmith' was to Coach Longfellow."  
**BOBBY DODD**, Georgia Tech coach:  
"Coaching is one of the toughest jobs I know of, and I seldom advise a youngster to enter it. There are hundreds of candidates and not too many good head coaching jobs. When you get a break and get a job as a college head coach, you're usually under pressure. You have to win, or else you'll be hunting another job. Take any capable business man, and compare him to a coach. Once you're established in business a number of years, you expect to be operating the same firm. But, in college football, you're seldom any better than last year's record. Fortunately, I can say what I like because I'm at a college which has had only three head coaches. Unfortunately, there aren't more like it."  
**SAM BOYD**, Baylor coach, following his team's loss to Texas A&M:  
"We're not looking for next year yet. We expect to win some ball games this year. I thought the Bears played their best game against the Aggies. After studying the film, I'm sure of it."  
**BILL MURRAY**, Duke mentor, after his team had been upset by Georgia Tech:  
"General Sherman expressed my sentiments about Atlanta."  
**FRANK HOWARD**, Clemson coach, on the day he found his athletes just standing around:  
"Come on, boys, if you're going to kill time, let's work it to death."  
**PAUL DIETZEL**, LSU coach, following a recent loss inflicted upon his team:  
"You've heard of team victories. Well, this was a team defeat."

## Ronnie Bull Is Standout Performer For Bishop 11

BISHOP, Tex. (AP)—Sports headline writers have been looking for this one a long time: A fullback who could be national star a couple of years from now with the authentic name of Bull.  
He's Ronnie Bull, fullback on the Bishop High School team — a Class A division team. Will he be a national star?  
Look at his record so far this year: 26 touchdowns and 1,983 yards rushing. Last year for a full season: 28 touchdowns and 2,400 yards rushing.  
College coaches line up to the right. He's a senior.  
This yardage was made against suitable opponents, not set-ups, in Texas' well tutored and well balanced schoolboy football program which goes to Class AAAA, depending on student enrollment.  
Is young Bull the cocky type? Not so you'd notice.

## Bryant's Team In A Position To Clinch Bid

By The Associated Press

This could be the weekend Texas A&M clinches its second straight South-west Conference championship and its first trip to the Cotton Bowl since 1942.

If the Aggies win, they could do no worse than lose to Texas and finish with a 5-1 conference record. Texas, if it wins its last two games, would be 4-1-1.

An Aggie loss to Rice would tie the two clubs and if both finished with 5-1 marks Rice would get the Dallas bowl spot. An A&M loss also would give Texas an outside shot at the crown.

A&M won the conference last year, but was ineligible for bowl games because of recruiting violations. SMU plays Arkansas this week. Texas meets TCU and Baylor is off.

The Aggies watched films and worked indoors in sweat clothes because of rain to Wednesday. Rice also had to work inside as a cold rain fell. The team is injury free.

Texas' outside activity was cut by rain and the Longhorns watched movies of the tie with Baylor. TCU took its longest Monday workout of the season. Coach Abe Martin whipped the Frogs through an offensive session lasting an hour and 45 minutes. Most of the workout stressed the running attack.

SMU's reserves scrimmaged against the freshmen while the veterans of the A&M game took it easy. Arkansas had end Bob Childress out with a partial shoulder dislocation and halfback Jim Mooty limped with a badly sprained ankle.

Coach Jack Mitchell stressed defense in the workout. Coach Sam Boyd, whose Baylor Bears have an open date this weekend, gave the squad the day off.

## Amarillo Retains Lead On Ballot

DALLAS (AP)—The results of a poll released by the Dallas News showed the Amarillo Sandies retained first place in Texas High School Class AAAA.

The Sandies piled up 134 points to 130 for second place Abilene. Corpus Christi Ray got 102. Others in order: Austin, Dallas Crozier Tech, Dallas Highland Park, Wichita Falls, Texarkana, Temple and San Antonio Jefferson.

## 2-4A CHART

Abilene	W.L.T.	W.L.T.
Abilene	5-3	2-10
Midland	4-3	1-11
San Angelo	2-1	0-11
Big Spring	2-7	0-10

## Jorgensen Wins

CARACAS, Venezuela (AP)—Port Arthur's Paul Jorgensen outpointed Victor Leon of Caracas last night in a 10-round bout. Jorgensen weighed 128½, Leon 126.

## Sundown Among Standouts In Class A Grid Circles

By The Associated Press  
Sundown, Henrietta, White Oak, Mart and Bishop stand out in Class A schoolboy football as the campaign rolls through its final week before the start of the state playoff.

# Steer Friday Foe Better Than Record Indicates

The Big Spring Steers, who worked out without benefit of pads on a cool, dreary Monday afternoon, face a team here Friday night that has no more wins to show for each effort than have the locals.

The San Angelo Bobcats, traditional foes of the Bovines, now own a 2-5-1 won-lost-tied record and must beat Big Spring to escape the District 2-AAAA cellar. Bob Harrell's team still has Abilene to play following the Big Spring game but no one concedes the Tabbies any chance of winning that one.

The Cats, like the Steers, have had their great moments. They rose to the heights to beat a good Waco High team, 27-21. Their other victory came at the expense of Harlandale of San Antonio and that by a score of 21-7.

## HERE FRIDAY EVENING

# Ward All-Stars Named For Game

Coaches of the eight teams in the Elementary School football have chosen their team representatives for the all-star game, which will be played preceding the Big Spring-Amarillo game at Memorial Stadium Friday night.

T. H. Stromberg, Airport; Earl Penner, West Ward; C. W. Tanner, East Ward; and Bill Cook, North Ward, will mastermind the Brahmans.

Assigned to tutor the Longhorns were Dan Bustamante, Kate Morrison; Carlos Humphries, Washington Place, Oakley Hagood, Park Hill; and Bernard Rains, College Heights.

## Notre Dame To Go All-Out Against OU On Saturday

By SAUL FELDMAN  
NORMAN, Okla. (AP)—The 1953 football season got off to a mediocre start for Oklahoma.

The opening game was at Norman, and a sellout crowd watched the Sooners get beaten for the second straight year by Notre Dame, this time 28-21.

In the next game, Pittsburgh and the Sooners tied 7-7. Then Oklahoma, under Coach Bud Wilkinson, started a winning streak that blossomed into 9-2-1 that year, including a 7-0 victory over Maryland in the Orange Bowl.

In the four seasons since, Oklahoma has remained undefeated and now has 47 consecutive victories. It's Notre Dame at Norman Saturday. This is the game the Fighting Irish probably want more than any other this season.

Last year, Oklahoma drubbed Notre Dame 40-0, but an upset over the Sooners could take a lot of stigma out of that loss and two defeats at the hands of Navy and Michigan State. At stake for Oklahoma besides the winning streak is a crack at its third straight national championship. The Sooners now are ranked No. 2.

Wilkinson today reflected on Notre Dame's chance of upsetting his Sooners, rated a three-touchdown favorite.

"Notre Dame is always capable of upsetting anyone," he pointed out. "They play the same kind of defense we do and have a good all-round offense."

"Fumbles hurt them in those last two losses but I think maybe they were looking forward to playing us. Maybe not consciously but everything we hear back from South Bend indicates all they've been talking about is beating Oklahoma."

Wilkinson hasn't made any predictions that his team will win or lose the game, although he normally is on the pessimistic side.

## Lane May Take Cleveland Job Sometime Today

CLEVELAND (AP)—Cleveland Indians directors meet today to pick a new general manager, and the word is out that Frank Lane will quit as general manager of the St. Louis Cardinals to take the job.

Lane, who has a year left on his three-year contract with the Cards, wouldn't confirm or deny he will replace Hank Greenberg. If he gets an offer, Lane said, he "would have to talk with Mr. Busch," meaning August Busch, Cardinals' owner.

Under a headline "Lane to Get Job as Tribe Office Boss," the Cleveland Plain Dealer said that Vice Presidents Nate Dolin and George Medinger talked with Lane in Chicago Sunday and Busch had given a green light for the negotiations.

The St. Louis Globe-Democrat, which headlined "Frank Lane Going to Cleveland," said Lane is dissatisfied in St. Louis. Sports editor Robert Burnes said Lane feels he has suffered from too much interference from his superiors and a year ago was stripped of some authority, particularly in making trades.

No one seemed to anticipate any difficulty for Lane in getting free of his St. Louis contract. Under Lane the Cards moved up from seventh to fourth and then last year to second, but he brought down wrath of a number of Red-bird fans by dealing away the popular Red Schoendienst, a sparkplug in Milwaukee's drive to a world championship.

A decline in attendance and the Tribe's descent to sixth place were behind the ouster of Greenberg, who had been Tribe GM since 1950.

No stranger to Ohioans, Lane was assistant to Larry McPhail when McPhail managed the Cincinnati Reds and later was president of the American Assn. with headquarters in Columbus. He also was well known as a Big Ten football official.

**JAMES LITTLE**

**Nuclear Ship**

MOSCOW (U.S. Tass)—A 40,000-horsepower nuclear power plant has been completed and successfully tested for the icebreaker Lenin, which the Russians are rushing to completion as the world's first atom-powered surface ship.

**A&M Head Hits Education Bias**

DENVER (U.S. Tass)—America must erase prejudice against mass higher education if it is to meet Russia's scientific challenge, the president of the Association of Land Grant Colleges and State Universities said today.

The speaker, Dr. M. T. Harrington, heads a mass education school—Texas A&M—which enrolls about 10,000 yearly in regular and summer sessions. Many of the men he addressed represented large schools.

In a speech prepared for delivery at the association's 71st annual meeting, he said Russia gains its superiority in several fields by educating its youth in mass. He said it's time the United States does the same.

He said colleges need not "even contemplate the lowering of the quality of our offerings as we increase the number of our students. Both industry and agriculture have proven that quality can be improved and unit costs lowered as volume is increased by the application of existing technology and imagination."

"We have heard 'mass education' used as a synonym for 'mass mediocrity' so frequently for so long that we have almost accepted their equation as inevitable," said Dr. Harrington.

"I believe the time has come for us to throw aside this ancient prejudice and prove that higher education in this country can revolutionize its approach to meet the demands of the time," he said.

**Reading For A Witch's Role**

These are some of the amateur thespians who read for roles in "Bell, Book and Candle," comedy about modern witchcraft to be staged soon by the Big Spring Civic Theatre. The group met in the offices of the Chamber of Commerce. Shown with his hands in front of his face in concentration is Roy Rosene, producer; behind the tape recorder is Mary McGee, secretary; before the mike is Mrs. Roy Rosene, reading for one of the parts; behind her is John Austin, director; at right are Jim Hennigar and Miss Betty Smith, both reading for parts. Miss Smith won the role of an elder witch, and Hennigar the part of a "warlock," or male witch.

**Armchair Adventurers Take Note: Top Series On Tonight**

By CHARLES MERCER  
NEW YORK (U.S. Tass)—Tonight arm chair adventurers can travel to a wild and remote region of New Guinea with Lowell Thomas in the first of an interesting series of new television programs, High Adventure.

But supposing you were to travel in person to distant, dangerous and uncomfortable places. What do you need to make your adventures trip as happy as such trips always sound in books?

In one word, "character," says Gil Ralston, an inveterate itinerant who produces the adventure

series. Among other duties, Ralston makes all the arrangements for the traveling camera crews.

He makes one trip in advance of the company and a second while it's working. Thus, by the time the series of seven shows is completed, he will have made at least two trips to New Guinea, the arctic, Venezuela, Central Africa, Morocco, Nepal and the Australian Outback country.

"There are only three big problems—mosquitoes, humidity and heat," Ralston said. "You don't mind anything except those three things. At least you don't if you're what I'd call a traveler with character."

Lowell Thomas exemplifies that quality of character, Ralston said. "By character I mean a certain kind of mentality to whom hardship is literally something to joke about. It has nothing to do with a person's muscles. I've known big muscle men who were worse

than useless under rough conditions. I know a little guy nearly 60 years old who spent his life in the city and became the driving force of an expedition in rugged country."

"You can spot the quality in a person the minute you meet him. He's a person who doesn't dramatize events, but accepts them and jokes about them."

Thomas, for example, never complains about anything, Ralston said. On the New Guinea trip Thomas and Ralston floated down a dangerous river in a dug-out for 24 hours. Thomas sunbathed and read during the day and slept at night with his head barely out of water.

At the end of the trip they split their only food—a can of tomatoes and a can of salmon. "This," Thomas told Ralston, "is the best breakfast I ever ate."

**Civil War Vet Rides In Parade**

HOUSTON (U.S. Tass)—Walter Williams, the Civil War veteran who will be 115 years old Thursday, rode in the Veterans Day parade yesterday and said he enjoyed the bands and the noise of the crowds.

Williams rode in a black ambulance and was warm and dry despite the snappy and wet weather. The Confederate veteran is three years older than John Salling of Slant, Va., the only other living Civil War veteran.

Veterans of the Spanish-American War, World War I and World War II and Korea also took part in the hour-long parade.

**Postmen Meet**

WASHINGTON (U.S. Tass)—Top postal officials of the United States, Britain and Canada open talks today on methods of improving the mechanical handling of mail.
