IS SELLING LAND IF YOU WANT TO SELL

DIMMITT

Folks, you'd be mad as a March hare if your telephone com pany were to deliver a telephone instrument to your home and let it go at that. You'd soon realize that it takes more than just that instrument to provide telephone service. In fact, a telephone instrument is only about five per cent of the equipment needed to give you service. Your telephone company must have adequate cable and central office equipment to handle your needs before installation can be made. Securing and installing this equipment takes time. A major reason is because necessary raw materials for production are still scarce. In the face of these difficulties, your telephone company is doing everything in its power to hasten the day when you, too, may enjoy the convenience of tele phone service.
