TO FIRMS WHICH HAVE NOT RAISED PRICES

Pentagon Orders Steel Purchases Shifted

WASHINGTON (AP) — The Pentagon today ordered defense contractors and their suppliers to shift steel purchases to those companies which have not raised prices.

McNamara also said that if the steel price increase "fans out" across the country's economy, national defense costs could rise a billion dollars or more a year.

McNamara said that iron and steel prices have increased 90 per cent since 1947, while nonferrous metals prices have increased only 40 per cent.

McNamara's news conference was a hasty, 10-minute affair which he called immediately after returning to the Pentagon from a meeting with President Kennedy.

McNamara said that on the basis of both his experience here and in industry.

McNamara was president of the Ford Motor Co. when he was appointed defense secretary.

The U.S. military operations overseas today cost us some \$3 billion a year in foreign exchange.

We have to earn that \$3 billion each year in the export market. We cannot expect to maintain our forces overseas if our trade balance does not improve.

'ME A JINX BABY? NUTS!'

Larry Newton, born on a Friday the 13th, scoffs at superstition

Who's Superstitious? This Is A Lucky Day

By SAM BLACKBORN
"Superstitious? Who me? Don't be ridiculous, old boy."

"Friday is a lucky day and when it happens to fall on the 13th of the month, it's double lucky."

"If you don't believe me, ask my mother and father. They'll tell you that about the best darned thing that ever happened to them was on a Friday the 13th."

These are the views of Larry Allen Newton, who lives at 307 NW 11th, and there is every reason to believe that Mr. Newton is an authority on the subject.

He is observing today as the sixth month since his birth and he recalls with pleasure that he made his advent into this world on another Friday the 13th — Oct. 13, 1961, to be precise.

His opinion of the day is echoed by Mrs. Albert Lindell Newton, his mother.

"Larry has been a lucky baby," she said. "The only times he has been to the doctor since he was born were for his routine check-ups. And each time, he came through with flying colors."

Larry was one of four Howard County babies who were born on Friday, Oct. 13, the most recent "hoo-doo" day. He is the only one, apparently who is still in town.

He is a happy youngster, according to his parents, who looks on the world about him with placid gray eyes and a friendly smile.

Insofar as he is concerned, every day could be Friday the 13th and he'd like it just fine.

Larry's dad, Albert Lindell Newton works for the Co-Op Gin. He has a brother Steve, who is 5½ and a sister, Peggy, 3. Steve whose birthday is Sept. 19 and Peggy who was born on May 25, thinks Larry is just about the best

brother anywhere and that they are lucky to have him around.

There were two Friday the 13ths in 1961. The first was on Jan. 13 and only one baby arrived in Big Spring on that date according to the records.

She was Lana Jo Blakeneey, daughter of Mr. and Mrs. Alvin J. Blakeneey, who lived at that time at 218 Utah Road.

On Oct. 13, in addition to Larry, the records show that Kelvin Charles Hattenbach, son of Mr. and Mrs. Douglas Edgar Hattenbach, then living at 1806 E. 15th; Harvey Joe Mansfield, son of Mr. and Mrs. Barney Harvey Mansfield, who live 10 miles south of Vincent; and Jennifer Lynn Wright, daughter of Mr. and Mrs. James Hollis Wright, then residing at 801 Rannels, were also born on the second Friday the 13th of 1961.

An effort on Thursday to contact these youngsters failed.

So the one thriving member of the Friday 13th family in town is happy Larry Newton.

And it's his lucky day — take it from him.

Evangelical Group Urges Unity Without A Merger

DENVER, Colo. (AP)—The National Association of Evangelicals (NAE) has coupled a call for united action by other church groups with a disclaimer of any need for merger of church groups.

One resolution adopted by the NAE's 20th annual convention Thursday appealed for broader cooperative action by church

groups for strengthening evangelical witness and influence.

Another resolution said NAE believes "that Christian unity is basically a spiritual relationship among people. We believe that this unity is manifested by love-inspired fellowship that stimulates cooperative effort toward a more effective Christian witness without the necessity of formal ecclesiastical union or uniformity of practice and policy."

The NAE is composed of 38 Protestant denominations representing about two million members.

An association spokesman said the invitation to other Christian religious groups was intended primarily for those not currently involved in major church consolidation movements.

"Rome is always the same," Dr. McKel said. "Despite overtures of peace, they believe true communism means eventual return to Rome."

Another speaker, Dr. Billy Graham, said the people of the world have become too pessimistic "and there is no need to be."

Are They Raven Mad About It?

NEW YORK (AP) — Officials of the Central Park Zoo are eating crow today because of a mislabeled raven.

The raven — immortalized in classic verse by Edgar Allan Poe — has for the past several months been identified by a sign on his cage as a common, unsung crow.

Ornithologists caught the error. Zoo officials, quick to admit their mistake, explained that the raven's cage once also contained a crow. The crow had died, and somebody took down the wrong sign.

PHONE SERVICE IS INTERRUPTED

A power failure in the main Coahoma repeater station interrupted long distance telephone service east and west through Big Spring for approximately two hours this morning.

Southwestern Bell Telephone Co., said that the power failure occurred at the repeater station eight miles east of Coahoma at 7:15 a.m. Service was restored at 9:10 a.m.

The officials at the phone company said that such an occurrence is extremely rare and that the actual reason for the power failure has not been ascertained.

WTCC Approves Resolutions On Water, Oil And Gas Issues

By JOE BEYER
Two resolutions were passed this morning at a meeting of directors of the West Texas Chamber of Commerce at the Cosden Country Club.

One resolution proposed by Eugene V. Spence, general manager of the Colorado River Municipal Water District, pertained to preservation of water resources and the other, submitted by Frank Kelley, Colorado City, supported equitable dealing in the recovery of oil and gas.

About 50 members of the chamber were present at the business meeting which opened this morning. Among the guests was Sen. George Parkhouse, Dallas, who was speaker at the noon luncheon.

"Public sentiment must be aroused to save what little fresh water we have in West Texas," Spence said, reporting on water resources. He pointed out that the West Texas area comprises almost three-fourths of the state, but that it receives only one-fourth of the rainfall of the state.

A copy of the resolution will be sent to agencies dealing with water pollution and water conservation.

Kelley, Colorado City, said that about 30 years ago recovery methods changed from "law of capture" to man-made controls for equitable recovery. He stressed that these controls have not always been as equitable as they were intended.

"The 'Hawkins doctrine' under which the Railroad Commission operated in the past in some instances amounted to legal theft of oil and gas," he said. "It could allow small tract owners to withdraw many times the amount of oil or gas which was in place."

He pointed out specifically the "Normanna" case, where owners of a 3 acre tract, which had an estimated \$7,500 worth of gas in place, would have been allowed to recover \$2.5 million worth of gas under the "Hawkins Doctrine."

"We need to repair our man-made rules covering recovery of these natural resources so that neither the small-tract owner nor those owning larger tracts will lose," he said. The courts are moving in this direction, he added.

The resolution adopted pledges cooperation of the WTCC in any endeavors to bring about equitable recovery.

Dean Stangel, Sam Thomas and Loyal Walker reported on an agricultural and livestock tour made through Arizona and California

CHAMBER MEETING
Senator George Parkhouse, left, and Frank Kelley

million more bags of sugar than it produces and this deficit will continue to grow, based on projected population figures.

Now is the time to get legislation which would put Texas farmers in a better position to enter the sugar beet industry, he said.

Other reports were from the industrial development committee and community services committee.

Some 80 persons registered for the meeting. A reception and dinner for visitors was held at the Cosden Club Thursday night.

"Good, good; very good," said President Kennedy when informed of the Inland decision. Roundup story on the steel crisis may be found on page 6-A.

while their chairman, Joseph L. Block, was vacationing in Kyoto, Japan. He was interviewed there by Keyes Beech of the Chicago Daily News foreign service who quoted him as saying:

"Even though steel profits are not adequate, we do not feel that an advance in steel prices at this time would be in the national interest."

THEY'RE AGREED

He said that was his feeling and that of Inland executives at home.

Inland is one of the most profitable operators among the industry's 11 largest companies on a tonnage basis. With a net income of \$54.7 million, Inland made 7.48 cents for each dollar of sales last year.

Philip D. Block, vice chairman of the Inland board, read the company statement to newsmen.

Asked if he had been in touch with the White House before the statement was issued, Block replied:

"We have not been in touch with the White House."

Roger M. Blough, chairman of U.S. Steel, was asked Thursday at a New York news conference whether the price increase could stick if Inland and Armco Steel Corp. decline to boost prices.

"It would definitely affect us," Blough said, "and I don't know how long we can maintain our position. . . ."

Ed Kennedy Lashes Steel

BOSTON (AP)—Edward M. Kennedy, the President's youngest brother, says April 13—the date U.S. Steel Corp. raised prices —"may be long remembered as a day of infamy."

The 30-year-old Kennedy, a candidate for the Democratic nomination for the U.S. Senate, urged the steel industry in a statement Thursday night to "perform an act of industrial statesmanship—rescind a price increase which it cannot justify and from which, in the end, it cannot profit."

ing is for defense purposes.

However, he said, the amount of steel bought directly by the military is relatively small, that most of it is procured by companies which have contacts for weapons and other defense goods.

To another question, McNamara said that he considered the steel price increase "an unjustified de-

velopment and I state that on the basis of both my experience here and in industry."

McNamara was president of the Ford Motor Co. when he was appointed defense secretary.

In his statement, McNamara said:

"It is not only the effect of this price increase on our military budget that concerns me, how-

er. A matter of even greater concern is its effect on our forces and bases overseas. National security demands that our military forces and the forces of our allies be deployed around the world, wherever freedom is challenged.

"The U.S. military operations overseas today cost us some \$3 billion a year in foreign exchange.

We have to earn that \$3 billion each year in the export market. We cannot expect to maintain our forces overseas if our trade balance does not improve. It will not improve if a new round of price increases is set off by the action of U.S. Steel. These price increases will make it harder to sell our exports abroad and will stimulate imports from abroad."

ing is for defense purposes.

Caught - After Three Decades

Joe Valdez, 50, was shuffling along skid row in Los Angeles when through habit he glanced over his shoulder at a passing police car. The officers became suspicious and took him to headquarters for questioning. There his fingerprints betrayed him. A dusty "wanted" sheet showed Valdez was a man sought since 1932. He recalls for officers his daring daylight escape thirty years ago while being transported to San Quentin Prison where he was to serve twenty years for robbery.

Vatican Paper Raps Liz, Warns Of An Errant Life

ROME (AP)—Elizabeth Taylor went nightclubbing with Richard Burton until early today as a Vatican weekly newspaper warned that she may end up an "erotic wanderer, forever without a safe haven."

There was no indication that the actress, reared a Christian Scientist but converted to Judaism after the death of her third husband, producer Mike Todd, had seen the editorial lashing in L'Osservatore della Domenica (The Sunday Observer). The edition was distributed Thursday.

The actress, 30, accompanied by two dogs, and Burton, her constant companion since the breakup of her marriage to singer Eddie Fisher, drove in separate cars to a hotel cocktail lounge Thursday night. Later they moved on to a popular night club. From there Miss Taylor went home with the dogs. Burton went to another bar.

The Catholic newspaper, considered a weekly supplement of the Vatican City daily L'Osservatore Romano, did not mention Miss Taylor or Fisher, her fourth husband, by name. But it left no doubt of its target in a scornful open letter to "Dear Lady and Your Fourth Husband."

The Church Is Undenominational

By A Christian Writer

Were Paul, Peter, James, and John members of the Church? Yes, I think all of us can conceive of these first century Christians being members of the church. But were they members of a denomination? Why is it that today, when we think of church membership, we almost invariably think in denominational terms? If it were possible for Peter, James, John and Paul to be Christians and members of the church, without being members of some denomination, it ought to be so today. If such were possible then, surely it is possible today. If people in the first century could be Christians and simply members of the church the body of Christ (Col. 1:18), when there were no denominations in existence, then why can't we today be such in spite of denominationalism? The church Jesus built is not a certain denomination, nor a combination of denominations.

Hear Clay Mimms from Midland, Texas, guest speaker Sunday, 10:30 a.m. and 7 p.m.

You are always welcome at the church of Christ, 200 West Highway No. 2, H. Farber, preacher (on Australian preaching mission 'til May 15). Box 1385.—adv.

Dr. Kraemer Opens Series At First Presbyterian

Dr. Charles E. S. Kraemer, president of the Presbyterian School of Christian Education, Richmond, Va., will open a series of sermons at the First Presbyterian Church Sunday morning. Services will be held at 7 a.m. and 7:30 p.m. each day through next week.

He will preach on "God Is in Control," at the 11 a.m. service Sunday and on "Surely the Lord Is in This Place," Sunday evening. The men of the church will have breakfast services for the 7 a.m. sermons.

DR. CHARLES E. S. KRAEMER

Dr. Kraemer is a native of Bonham. He received his A.B. degree at Davidson College; B. D. degree from Louisville Presbyterian Theological Seminary; studied one year on a fellowship from the Earhart Foundation for clinical pastoral training, and received his S.T.M. degree from Andover-Newton Theological School. His D. D. degree was conferred by Davidson College, June, 1947. He has also done special clinical work at Louisville Mental Hygiene Clinic; Illinois State Hospital at Elgin; Massachusetts General Hospital, and Boston Psychopathic Hospital.

He has held pastorates in Hawesville, Lewisport and Morrison, Ky.; North Kansas City, Mo.; Le-

land, Miss., and First Presbyterian Church of Charlotte, N. C. He has been president of the Presbyterian School at Richmond since Feb. 1, 1954. The Presbyterian Church U.S.A. maintains this school for the preparation of lay workers and others seeking special preparation in Christian education.

French Empire Breathing Last

PARIS (AP)—When France gives independence to Algeria, the once proud and farflung French overseas empire will be reduced to a collection of islands, a patch of South American jungle and a bit of rock and sand on the tip of East Africa.

The rest, which stretched the French tricolor around the globe, has emerged into a group of independent countries.

Four segments of empire—French Guiana, Martinique, Guadeloupe, and Reunion—were raised in 1947 to the status of overseas departments (counties) of metropolitan France, and their present position is roughly comparable to that of Hawaii and Alaska in the United States.

Reunion is an island in the Indian Ocean. Included too are several nearby smaller islands and, technically at least, a slice of Antarctica known as Adelle Land. Guadeloupe includes several smaller isles in the West Indies.

In addition there are: French Somaliland, an area of 9,000 square miles around the East African port of Djibouti, terminus of the French-built railroad to Addis Ababa, Ethiopia.

New Caledonia, an island of some 7,200 square miles off northeast Australia, and several nearby smaller islands.

French Polynesia, a collection of many islands in the South Pacific totaling about 2,500 square miles. The best known is Tahiti, the site of Papeete, the capital.

In between Polynesia and New Caledonia are two islands, Wallis and Futuna, which formerly were administered from New Caledonia but are now considered a separate territory.

The Comoro Islands, a group off East Africa between the mainland and Madagascar, totaling about 800 square miles.

St. Pierre and Miquelon, two groups of small islands totaling only 33 square miles—off Newfoundland.

Clipperton, a tiny, uninhabited island off of Mexico.

Since the beginning of World War II the following have left French rule:

Syria and Lebanon, in the Middle East, formerly French mandates from the old League of Nations. Their independence was recognized by the Free French during the war and confirmed at the end of the war.

French Indochina, in Southeast

Asia, which became fully independent in 1954. This area is now Communist-ruled North Viet Nam, the Western-oriented South Viet Nam, and the kingdoms of Laos and Cambodia.

Tunisia and Morocco, former protectorates in North Africa, became fully independent in 1956.

Since 1958, Madagascar and all of French Africa roughly south of the Sahara, have become independent states, including Guinea, Mauritania, Mali, the Ivory Coast, the Republic of Niger, Upper Volta and Dahomey. Togo, a former League of Nations mandate which is wedged between Dahomey and Ghana, also became independent.

Others now independent are the Chad Republic, Gabon, the Central African Republic and the Republic of the Congo (Brazzaville), all formerly part of French Equatorial Africa. Cameroon, former League of Nations mandate also became independent.

Five small French enclaves in India were turned over to Indian de facto administration after India's own independence. The treaty which makes the de jure transfer is still pending in the French Parliament.

Company Has New 'Hi-Fi' Page In Today's Herald

A full-page advertisement for El Paso Red Flame dealers in the spectacular newly-developed Hi-Fi full color preprint process appears in today's Herald.

The new process makes top-quality full four-color reproductions in newspapers possible for the first time, and today's advertisement marks one of the first broad applications of the medium in the Southwest.

This Hi-Fi color advertisement was prepared by Mithoff Advertising, Inc., of El Paso for El Paso Natural Gas Products Co. in behalf of Red Flame dealers in its five-state Southwestern and Intermountain trade territory.

El Paso jobber for Red Flame products in Big Spring is the George Oldham Oil Co.

Short Stay

Miss Joy E. Steck of Pittsburgh, Pa., arrives at New York's Idlewild Airport after a 15-hour trip to London—where she spent 15 minutes—and back. A transatlantic telephone call was waiting for her in London and this led to her sudden decision to return. Her only comment: "I'm going home to get married."

No 'Dry' Run For Firemen

CHEBOYGAN, Mich. (AP)—State Police say four teen-aged girls told them they set fire to

an old one-room school because it was slated to become a tavern. Officers quoted the girls as saying they feared if the schoolhouse becomes a tavern their fathers might drink to excess there.

A juvenile court judge is considering prosecution of the four,

aged 15 and 16. Their names were withheld. The girls were released to the custody of their parents.

Robert Buchanan has obtained township approval to operate a tavern in the old school. Since the fire Wednesday night, however, he said he is reconsidering.

Angry President

President Kennedy makes a point as he speaks at a news conference in Washington at which he charged the steel industry with "ruthless disregard" of the public by raising prices. He denounced U.S. Steel Corp. and fellow steel price hikers with the strongest language he has leveled at anyone or anything since becoming President.

ON THE SHELF

THE IMAGE. By Daniel J. Boorstin. Atheneum, N.Y. The author has made the not too startling discovery that present day America is filled with lots of artificialities. It is a theme that has been treated a good many times, and Boorstin has made a strong effort to round up all the evidence he can find on its various aspects. With trimmings.

He asserts that readers are interested increasingly in pseudo-events rather than the real thing—that is, the staged or arranged occurrences that pass for actual happenings.

He concludes that travel, which once was a laborious process of absorbing culture from the actual individuals of a foreign land, has been replaced by tourism, in which the "packaged tour" insulates the tourist as much as possible from personal contact with foreigners.

He argues that in the process of debunking our heroes we have allowed fewer heroes to arise in contemporary times, and have substituted in their stead mere celebrities—people who are "well known" because they are "personality" rather than for anything they have accomplished.

In examining what has happened in literature, he holds up the spectacle of a novel turned into a movie, and then turned back into a book on the basis of the major changes made by the movie.

Most of these phenomena he connects with what he calls the Graphic Revolution, and while he seems to blame it for many of our troubles, it does not seem to be the sole source.

Furthermore, he concludes that America, having surrendered its ideals for illusions, now is faced with "the menace of unreality" and "the threat of nothingness."

The author is a history professor, and has boned up on all the references he can lay his hands on. There are 30 pages at the back of the book devoted to suggested readings. Interesting as they are, they demonstrate that Boorstin has taken good learning with the deadly seriousness typical of the professional mind. Some day it will dawn on him that our satirical cartoonists have accomplished the same social criticism with a few slashing lines that deplore our present lack of taste.

—Miles A. Smith

Comparison

This chart compares hourly wage increases and fringe benefits received by steel workers as against increases in prices by industry since 1946. Asterisk in fringe benefit column in 1949 refers to a pension increase which ranged from 0 to 20 cents per hour, depending on a particular company, for industry average of 10 cents per hour. Figures on fringe benefits provided by United Steelworkers Union source.

More Suits Filed Against Faltering Estes Empire

LUBBOCK (AP) — More suits seeking payments allegedly owed on mortgages connected with the faltering Billie Sol Estes agricultural empire have been filed in Lubbock County.

Eight suits, asking a total of \$350,476.92, were filed Thursday in 140th and 72nd district courts.

The suits brought the total number filed since Monday on mortgages secured by anhydrous ammonia tanks and equipment and endorsed by either Lubbock Machine and Supply Co. or Superior Manufacturing Co. of Amarillo to 45.

Total amount asked in suits filed this week is \$1,926,300.92.

The following defendants named in the suits and the amounts allegedly owed were filed by Kuykendall Investment Co. of Lubbock; Thomas H. Bell, Reeves County, two notes (\$37,440 and \$9,750.80) for total of \$47,190.80 and endorsed by Lubbock Machine; Willis R. Winters, Reeves County, \$43,479.48, endorsed by Superior; and Eddie J. Carpenter, Reeves County, \$8,365.76 endorsed by Lubbock Machine and two notes (\$35,403.62 and \$31,944.24) for total of \$67,347.86.

Also Troy Burson, Briscoe County, \$36,400.14, endorsed by Lubbock Machine; H. E. Wilson, Wichita County, \$31,850.28, endorsed by Lubbock Machine; and Jim McCormack, El Paso, \$58,050.50, endorsed by Superior.

The other two suits were filed by Humphries Investment Co. of Lubbock and the three mortgages involved were endorsed by Lubbock Machine and Supply Co.

Splash Day Coming Up

GALVESTON (AP) — Galveston's 1962 All-America Splash Days' events will provide a diverse program.

This is the opinion of Frank Widmann, executive director of the Galveston Convention and Tourist Bureau sponsoring the annual celebration.

The festivities start April 27 and continue through Sunday with a program of beauty contests, parades, street dances, the blessing of the shrimp fleet, the Lipton Cup boat races, rock and roll marathons, water shows, juvenile and teen queen contests and coronation ceremonies and the Splash Days ball at the Galveston Pleasure Pier.

Splash Days are paying tribute to the selection of Galveston as an All-America city by Look Magazine and is giving its celebration to the All-America Award.

S. African Steel Official Is Happy

PRETORIA, South Africa (AP) — A senior official of the Iron and Steel Corp. said Thursday night price hikes by American steel companies will help South Africa's steel exports.

He said the nation's steel prices will not be increased and expanding production will provide increased export stocks.

South Africa is seeking to increase its foreign outlets for steel.

17th Anniversary Of FDR's Death

HYDE PARK, N.Y. (AP) — A brief graveside ceremony Thursday marked the 17th anniversary of the wartime death of President Franklin Delano Roosevelt. His widow and a son, John, were among the 75 persons attending. Dr. Isadore Lubin of Rutgers University, secretary of the Roosevelt Foundation, placed a wreath on the grave.

Roosevelt died in Warm Springs, Ga., on April 12, 1945.

Cancer-Cold Link Found

By FRANK CAREY
Associated Press Science Writer
ATLANTIC CITY, N.J. (AP)— Production of cancer in laboratory animals with a virus that commonly causes a severe type of respiratory cold in humans was reported today.

The achievement was announced by a group of Texas researchers who said tumors were produced in hamsters with one type of adenovirus — a microbe first isolated from diseased human adenoids nine years ago and now known to have various strains. Effective vaccines against some strains have been developed.

And the American Cancer Society, which helped support the Texas research, said the work provides a new stimulus to the theory that some human cancers could be caused by viruses—and thus are possibly open to treatment or prevention by vaccines. But the ACS, in a report released simultaneously with the formal announcement by the Texas group, stressed that production of the hamster cancers with a virus responsible for another type of human ailment by no means constitutes proof that human cancers are virus-caused.

Dr. John J. Trentin of Baylor University College of Medicine told about the hamster tumor research in a report prepared for the annual meeting of the American Association for Cancer Research, one of the world's leading organizations of cancer investigators.

Co-authors of the report were Dr. Yoshio Yabe, also of Baylor, and Dr. Grant Taylor of the M.D. Anderson Hospital, University of Texas.

Trentin said cancers were produced in the hamsters by injecting viruses known as type-12 adenovirus.

That's one of a number of the various types of adenovirus that constitute a common source of respiratory infection among both children and adults.

The type of respiratory ailment caused by the adenovirus differs from the garden-variety of common cold in several respects: 1. The onset is usually more gradual.

2. The symptoms—including fever, chills, runny nose, watering eyes, sore throat, hoarseness, wheezing, cough and a general down-in-the-dumps feeling — are more severe.

3. The malady, disabling but seldom going on to further complications, lasts longer than an ordinary cold.

Trentin said that in a separate study it was found that more than 25 per cent of patients treated for a variety of diseases at one hospital had been exposed and were immune to the same kind of virus used in the hamster studies.

"It is not yet known," said the American Cancer Society's report, "how many healthy people have the virus, which can lie dormant for many years following infection in childhood, to break loose again and again later in life."

The ACS report said scientists would next try to determine

Claims Shelters Are Un-American

MEMPHIS, Tenn. (AP)— Building bomb fallout shelters is un-American and ridiculous, says the president of the National Association of Real Estate Boards.

"I cannot believe that America can or will ever go underground and burrow like a mole," Arthur P. Wilcox of Boston told the Memphis Real Estate Board Thursday.

whether adenoviruses could cause cancer in newborn monkeys or other primates—the better to appraise whether the Texas work could have any possible significance as regards human cancer.

'By The Sea' Fashions Shown For Webb Squadron Wives

A beach combers' paradise set the scene for styles shown Thursday afternoon to wives of the 3561st Pilot Training Squadron. Presented at Webb Officers Club, "By the Sea" fashions from Fisher's Casual Shoppe included morning, noon and night apparel plus play clothes for swimming, sunning, golfing, and loafing.

Hostesses for the afternoon tea and style show were wives of Green Flight with Mrs. Al Boughton, chairman. Mrs. Charles Semler and Mrs. S. P. Howerter were in charge of decorating. Mrs. Kurt Roeloffs served as commentator.

Tables featured seashells with the main centerpiece, a banquet of spring flowers. Mrs. Ken Nellermoe was winner of the bouquet and other prizes went to Mrs. R. L. Rabin and Mrs. Frederick.

A rollicking summer was pictured in bold splashes of color as carefree as the season itself. Mrs. Rabin boasted new sunburst colors in a sleeveless cotton pique top and sunset orange deck pants. Mrs. Nellermoe's blondeness in blue cotton knit capri capriciousness, left nothing to be desired. Mrs. Howerter lent much to the orange Jamaica's clean cut style having a pullover shirt, roll-up sleeves, tailored collar and side slits of hot pink and sunburst stripes.

Afternoon tea dresses, cool wisps of cocktail frocks and the more formal evening sheaths were also in the "By the Sea" parade. Hair styles were coordinated by Phil's Beauty Salon.

Announcement was made of the winner in a three-months attendance contest conducted for squadron meetings. Wives of Blue Flight will be guests of honor at the June meeting with the other three flights, hostesses.

Concluding the affair, the hostesses group served during a tea hour.

All For A Summer's Day

Mrs. Franklyn Snyder, Mrs. Gene Westback, Mrs. L. M. Rabin and Mrs. W. R. Brown as they appeared from left to right, top photo, Thursday afternoon at Webb Officers Club. "By The Sea" fashions were presented by Fisher's Casual Shoppe for members of the 3561st Pilot Training Squadron Wives. The Green Flight wives served as hostesses. Below, from left, sunup to sundown apparel for summer, worn by Mrs. S. D. Howerter, Mrs. Ken Nellermoe, Mrs. George Brakke and Mrs. William Chandler.

Altrusa Has Session Of Business

In the absence of Mrs. M. J. Stratton, Altrusa president, the luncheon meeting was conducted Thursday by the vice president Mrs. G. C. Broughton. Twenty-six members were served at Coker's Restaurant.

Candidates for membership were approved by the club and a workshop announced to be held at San Angelo April 28-29. Members were reminded that the club will serve birthday refreshments at the state hospital on May 4. The party is to begin at 1:30 p.m.

Mrs. W. H. Kay, International Relations chairman, will be in charge of the program when the club meets next on April 26.

Junior Woman's Forum Plans For Installation

The Junior Woman's Forum convened Thursday with Mrs. Ernest Welch and Mrs. Don Everett serving as hostesses in the Welch home.

Plans were completed for an installation luncheon on May 10 at the home of Mrs. J. R. Redden, 2704 Lynn Drive. Members, numbering 15, decided to serve a covered dish luncheon. Mrs. Paul Jacobs, Western District past president, will be the installing officer.

The Forum will have a Federation workshop on April 25 at 8:30 a.m. in the Texas Electric Building. All local Forums are invited to attend. Mrs. B. F. Seay

Sew, Chatter Club Celebrates Birthdays

Birthdays of three members of Sew and Chatter Club were celebrated Wednesday when the group gathered in the home of Mrs. T. M. Weaver.

Fifteen members honored Mrs. Marvin Sewell, Mrs. S. R. Nobles and Mrs. H. V. Crocker on their birthdays.

The next meeting will be on April 25 in the home of Mrs. Marvin Sewell, 407 Washington.

Philathea Class Has Anniversary Dinner

Recognizing the 38th anniversary of the Philathea Class of First Methodist Church, members gathered in Fellowship Hall Thursday evening for the annual birthday dinner.

Tables laid with white linen formed a U-shape. Centering the broad streamer extending across the speakers' table were tall pink tapers in crystal candelabra, based in pansies and garden flowers. Other tables featured miniature vases of garden flowers and small Easter baskets.

The invocation was offered by the Rev. Joe Leatherwood. Mrs. C. R. Moad, president acted as mistress of ceremonies and Mrs. E. C. Howard, vice president, in-

Mrs. Carter Has 3-6 Bunco Club

The 3-6 Bunco Club played games in the home of Mrs. Charles Carter on Wednesday.

Winning first prize was Mrs. Charles Campbell; second, Mrs. Clifford Kobi; third and floating, Mrs. William Johnson; consolation, Mrs. William McHugh; low prize, Mrs. John Homberg.

Mrs. Homberg will host the next meeting on May 9 at her home at 137-A Dow Drive.

Multi-Sonics Make Final Appearance

Patients numbering over 300 danced to the music of the Multi-Sonic Dance Combo Wednesday night in the recreation room at Big Spring State Hospital.

The band under the direction of Capt. Al Short of Webb Air Force Base, was making its farewell appearance at the hospital where Capt. and Mrs. Short, also a musician, have been active in volunteer service. They have consistently provided dance music for special occasions.

Bob Gailbraith, local staff member at KEDY-TV is drummer for the group and Bob Tawater plays the string bass.

Easter Parade Theme Used In Hat Modeling

Spring hats were shown carrying out an Easter Parade theme when wives of the 3560th Pilot Training Squadron were entertained Tuesday. Decorations in the Officers Club at Webb AFB were also in keeping with Easter, featuring a large rabbit given to Mrs. Jerry Welch, winner of the door prize.

A colorful array of hats was presented with commentary, all from Margie's Dress Shop. Hostesses of Jaguar Flight were Mrs. James Brazel, Mrs. James Day and Mrs. Richard Small who served as models. Background music was provided by Mrs. Robert Allen.

Mrs. Bud Wasseroott and Mrs. Terry Ueyama were also among the prize winners, receiving a century plant and an Easter basket.

GC Girls Present Annual Style Show

GARDEN CITY (SC) — The FHA and 4-H Club girls of Garden City High School will present an annual style show Friday at 8 p.m. in the school auditorium.

Mrs. Lillian Kountz, homemaking teacher, will sponsor the FHA girls who will model. Mrs. Mildred Eiland, home demonstration agent, is in charge of 4-H Club models. Some pre-school children will also display Easter fashions.

Alternate narrators will be Diana Phelps and Deanna Overton, accompanied at the piano by Sue Parker.

There will be no admission charge.

Elegance Achieved In New Sleeper

Traditional elegance is achieved in a living room through the use of a new sleeper-lounge which conceals extra sleeping facilities without compromising either comfort or style.

Webb Duplicate Bridge Winners Are Announced

Fourteen tables were in play when Webb Duplicate Bridge Club was in session at John Lees Service Club for Thursday's Master Point games.

In the North - South division winners were Ed Harstein and Harvey Williamson, first; Mrs. Winston Harper and Mrs. Joe Herbert, second; Mrs. Ben McCullough and Mrs. John Stone, third; Mrs. Tom South and Mrs. Charles Thompkins, fourth; Mrs. Riley Foster and Mrs. Rogers Hefley, fifth.

East-West winners were Mrs. Jack Wickard and Mrs. Paul Lee, first; Dr. and Mrs. J. H. Fish, second; Mr. and Mrs. E. G. Patton, third; Mrs. Don Jonker and Mrs. Dan Greenwood, fourth;

Traditional elegance is achieved in a living room through the use of a new sleeper-lounge which conceals extra sleeping facilities without compromising either comfort or style.

Two Women Will Attend TGC Event

Mrs. J. Gordon Bristow, fourth vice president of the Texas Garden Clubs Inc., and Mrs. Dale Smith, state chairman of water conservation, are two of the women from this area making preparations to attend the 34th annual meeting of TGC. The meeting is slated on April 24-26 at the Shamrock Hilton Hotel in Houston.

The Houston Council hostess group will be headed by its president, Mrs. H. L. Cockrum. Mrs. E. H. Blankenship is general chairman for the three-day conference.

"Consider the Lilies" is the theme taken from the Book of Matthew. Each breakfast, luncheon and banquet meeting will also have a theme from verses of the Bible.

Outstanding speakers will include Mrs. Robert Phillips of Malvern, Ark., national instructors chairman; Mrs. N. P. Martone of Iowa, La., national chairman of junior gardening; Mrs. A. C. Pickard of Houston, authority on amaryllis; and Hugh Russell of Spring, well-known grower of day lilies.

General assemblies will be conducted by the state president, Mrs. C. B. Kilpatrick of San Antonio.

A pre-convention highlight will be a luncheon at the Houston Garden Center where everyone will go Hawaiian.

Bruce Frazier Talks On Mexico

Past Matrons Club of the Order of Eastern Star held its regular session Tuesday evening at the Flame Room of the Pioneer Gas Building.

Bruce Frazier spoke to the group on his recent tour of Mexico. He pointed out customs of native Mexicans in Central Mexico.

Hostesses were Mrs. E. C. Boatler, Mrs. George Hall and Mrs. Dalton Mitchell.

Thirty-four members attended. The next meeting will be on May 8 at Coker's Restaurant with Mrs. Tom Helton, Mrs. Willard Read and Mrs. Wyatt Eason serving as hostesses.

TEL Class Has Party Supper

The TEL Sunday School Class of First Baptist Church gathered at the church Thursday evening for a salad supper.

The table, laid with a white cloth, was centered with iris and other spring flowers. Place favors were Easter baskets filled with candy eggs.

Mrs. Ida Phillips gave the devotion on "A Nation's Security." Mrs. J. E. Hardesty played a violin solo, accompanied at the piano by Mrs. B. D. Urey.

Seven members and two guests, Mrs. Beatrice Mittel and Mrs. Pearl Bettie, were present.

Alpha Chi Elects New Slate Of Officers

Member of the Alpha Chi Chapter of Epsilon Sigma Alpha elected a new slate of officers Thursday in the home of Mrs. Glyn Mitchell. Mrs. Bill Estes served as cohostess.

Officers elected were Mrs. Mitchell, president; Mrs. Wendall Faris, vice president; Mrs. Kenneth McGowan, recording secretary; Mrs. Roy McMullen, corresponding secretary; Mrs. Fred Stitzel, treasurer.

The group made final plans for

Central WMS Has Mission Study

Central WMS of Elbow presented a mission program entitled "Why Missionaries Are Needed," Thursday at the church.

Taking part in the question and answer period were Mrs. R. W. Dolan, Mrs. W. C. Reed, Mrs. James Cagle, Mrs. Pete Sherman, Mrs. L. L. Phemister, Mrs. J. T. Gross and Mrs. Ray Shortes. Program chairman was Mrs. Mack Alexander.

The group will meet on April 26 for mission study led by Mrs. Reed.

Easons To Visit With Daughter

Mr. and Mrs. Wyatt Eason plan to spend the weekend with their daughter and family. Mr. and Mrs. Harold Kerst, of Lamarque.

Eason plans to go on to Freeport where he will join a party of 14 Big Spring men for a deep sea fishing trip. Dr. P. W. Malone and Coy Nalley are in charge of plans for the group.

A Farmer And Her Flock

Farmer Beth Scheib poses on her Soap Lake, Wash., farm with her 12 children. Widowed since last August when her husband, Laurence, was killed in a plane crash, Mrs. Scheib and her children operate and live off the Scheib farm without the help of hired hands. From left are Linda, 14; Jeff, 1; Kathy, 13; Steve, 11; Wally, 2; Jerry, 10; Clifford, 9; Jim, 8; Peggy, 7; Barbara, 5; Don, 4; and Mrs. Scheib holding Larry, two months.

13 Reasons To Succeed: 12 Kids And A Widow's Rare Courage

SOAP LAKE, Wash. (AP) — These are the 13 reasons you can bet on Beth Scheib to succeed as a farmer: A widow's courage and one dozen little Scheibs aged 2 months to 14 years. Every Scheib helps—even baby Larry, whose yells for dinner punctuate the need for making the Scheib acres provide a living. Pretty Beth (her age you can't have, but she was married at 17) was widowed last August when a plane crash killed Lawrence Scheib and two neighbors. "The bankers, Farm Home Administration advisers and everyone else told me to sell out and move to town," Beth says. "What could I do in town with

12 children? For the price of a year's payment on the farm I couldn't even rent a house. "I'm trying it my own way." Her own way is driving the tractor, plowing the fields, harvesting the alfalfa. When the older children are in school she pays a baby sitter 50 cents an hour to watch the smaller tykes. "I couldn't hire a man for 50 cents an hour and I couldn't pay more," says realistic Mrs. Scheib. Steve is 11 and the man of the family. "You kids," he says sternly, "keep away from the tractor!" Linda, 14, and Kathy, 13, are the big girls who help with the housework. Jerry is 10, Clifford 9 and Jim is 8; strong farmhands

all. They feed the livestock and help with the irrigation. Doing what they can to help are Peggy, 7; Barbara, 5; Don, 4; Wally, 2. The Scheib farm is 10 acres but 65 more are cultivated for Mrs. Leonard McNamara, a neighbor widowed by the same crash that left 12 Scheibs fatherless. "We raise our own beef for the locker," Mrs. Scheib says. "We plan to build up our herd of cattle. We used to have a truck garden but I think we'll skip the garden patch and stick to real farming. This is our trial year." It takes about \$200 a month in hard cash to feed the tribe of Scheibs.

New Berlin Talks To Aim At Access

WASHINGTON (AP) — The new round of U.S.-Soviet talks on the possibility of a Berlin settlement is expected to concentrate at the outset on the problem of guaranteed access for Western powers between West Germany and Berlin. The first session will be held here Monday by Secretary of State Dean Rusk and Soviet Ambassador Anatoly F. Dobrynin. The United States set forth its ideas on the requirements of an access agreement in an informal working paper submitted to Allied governments earlier this week in preparation for the talks. The U.S. proposal, circulated

for Allied reaction and comment, is understood to have stressed the need for guarantees by the Soviet Union of unhindered access to West Berlin by surface and air routes. The possibility was raised that this could be arranged under an international authority that has operational control of the supply line. Informants said this position on the critical access issue was substantially the same as that taken by Rusk in talks at Geneva last month with Soviet Foreign Minister Andrei A. Gromyko. So far as could be learned from official sources, the United States still considers totally unacceptable a Soviet counterproposal for East German control of the supply lines under limited supervision of an international authority. Presumably, what Rusk wants to explore further is whether the Soviet Union acceptance of the concept of an international authority provides an opening to bring the conflicting U.S. and Soviet positions closer together.

Rusk Thursday that he thinks a Berlin settlement may be possible. The chances have been improved by the lessening of tensions since the Rusk-Gromyko talks in Geneva, he said. Administration officials continue to warn, however, that the Soviets, or the East Germans with Soviet support, can precipitate a new crisis at any moment by renewing harassment of traffic, particularly in the air corridor. Reports circulated in West Germany that Kennedy had sent a personal message to Chancellor Konrad Adenauer on the problem of Berlin access and that Adenauer was planning to come to Washington to consult with the President. Officials here denied there was any presidential message to Adenauer and said they had no knowledge of any plans by the chancellor to come to Washington.

High Settlement In Divorce Suit

GALVESTON (AP) — A district court judge signed a final judgment Thursday in a \$1 million divorce suit filed by the wife of a League City rancher. Gussie Walker Bute filed the suit Sept. 7, 1960, against James Bute III, owner of the 2,500-acre Bute ranch near League City. Mrs. Bute alleged in her original petition that she and James Bute were married on Nov. 7, 1943, and separated Sept. 1, 1960. She alleged that during the marriage, community property valued in excess of \$1 million was accumulated, including the Bute ranch. Judge Donald M. Markle of the 10th Dist. Court granted her a divorce on grounds of cruel treatment March 26, and signed the final decree prepared by attorneys of both parties Thursday.

Bus Named Desire Rings Down Curtain

NEW ORLEANS (AP) — Thirty persons were hurt, none seriously, on the bus named Desire, which now travels the route of the bygone streetcar named Desire. The Desire street bus was in a collision with a taxicab Thursday and struck a utility pole. Tennessee Williams made the trolley of that name famous when he named a play after it. The play won the Pulitzer Prize in 1948.

IF WAR SHOULD COME Special Command Planes Stand By For President

WASHINGTON (AP) — At an airfield a few minutes by helicopter from the White House, a big silver plane stands ready for flight at any hour. Its crew is never far. It is guarded by Air Force policemen and dogs. This is no ordinary Air Force plane, although it looks about the same as tankers used to refuel bombers of the Strategic Air Command. It is a new airborne command post specially fitted as a refuge for President Kennedy and the top command in event of a surprise nuclear attack. There are three such planes, one always standing by. If war should come, the na-

tion's defense and counterattack of these four jet, swept wing giants cruising more than 40,000 feet above the earth. Aerial command posts intended specifically for the President have been in operation for about two months. Their existence has been kept under wraps. Together with an underground sanctuary in Maryland and the Navy command ship Northampton in the Atlantic, the planes provide alternate emergency headquarters from which the President and defense chiefs could prosecute a war in safety, even though key government and military centers are destroyed. Packed with elaborate communications equipment, they can instantly contact U.S. forces around the world. With air refueling and enough supplies they can stay aloft for days. These command planes, converted KC135 turboprop tankers, form another element in a growing system designed to assure uninterrupted control of U.S. ground, air and sea forces under all circumstances. The presidential planes are much like the command aircraft which the Strategic Air Command has been flying for 14 months, only less spartan. Sources said the presidential command post planes evolved from SAC's system and incorporated many of its features. Since February 1961, SAC has maintained a command plane aloft at all times. Three aircraft have been assigned to this mission. SAC announced Thursday it will increase its airborne command and control capability this year by adding more specially modified KC135s and, for the first time B47 jet bombers adapted to this task. The number was not announced, but it was learned 20 more KC135s

and four B47s will be made into airborne command posts for SAC. Gen. Thomas S. Power, SAC's chief, said in a New York speech earlier this week that the command post planes always carry a staff and a general "qualified to assume command of our forces in case the main command post at SAC headquarters (Omaha, Neb.) as well as the various alternate headquarters throughout the country should be put out of commission." SAC command planes also keep constant contact with the joint war room and Air Force command post in the Pentagon. The KC135s are rated at better than 600 miles an hour. The tanker version costs about \$3.5 million each, but the command types probably are considerably more expensive.

Senate OK's Nomination

WASHINGTON (AP) — Byron R. White will be sworn in Monday as a justice of the Supreme Court, the Justice Department said today. The nomination of White to move up from deputy attorney general to the highest bench whizzed through the Senate Wednesday on a voice vote a few hours after unanimous approval by the Senate Judiciary Committee. White, 44, succeeds Charles Evans Whittaker who retired April 1 on the advice of his physician. The usual practice is to administer the oath privately in the court's chambers, then hold a public swearing-in ceremony in open session. The next such session is set for 10 a.m. Monday.

Kennedy Sees Fleet In Action

WASHINGTON (AP)—President Kennedy sees the Atlantic Fleet in action today and Saturday. From sea and shore he watches the Navy and Marine Corps—ships, planes, missiles and men—in combat exercises.

Kennedy flies to Norfolk, Va., this afternoon for a secret briefing on the fleet's attack and defensive capabilities, then boards ship for an on-the-spot view of fleet operations.

The President was scheduled to take off from Andrews Air Force Base in Maryland and land 40 minutes later at the Oceana Naval Air Station near Norfolk.

Vice President Lyndon B. Johnson precedes him to Oceana, and a host of government officials, members of Congress and diplomats join them later at Norfolk.

The President will board the submarine Thomas A. Edison at Hampton Roads. He'll spend about an hour on the nuclear-powered craft, but probably won't have time for a cruise.

Tonight he'll be aboard the command ship Northampton.

If weather permits and the President wants it, the Navy is ready to stage night maneuvers

with the cruisers Newport News, Boston and Long Beach, a destroyer squadron and planes from the carriers Enterprise and Forrestal. The Enterprise and Long Beach operate on nuclear power.

After reviewing a fleet of 49 ships Saturday morning, Kennedy will watch an anti-air warfare demonstration and firings of the Terrier, Bullpup and Sidewinder missiles. The A3J Vigilante supersonic bomber and F4H Phantom II interceptor-bomber will display their firepower off the Enterprise and Forrestal.

The chief executive will pay his respects to the fleet in a broadcast from the Enterprise, then go ashore at Onslow Beach in Camp Lejeune to watch the Marines hurl troops by helicopter and landing boat into a beach assault.

Later, at Sogues Field, N.C., he will see Marine aircraft support troops and artillery in mock action on the ground.

The Shah of Iran, who with Empress Farah completes a state visit to Washington today, will join Kennedy at Onslow Beach to watch the Marine exercises.

Kennedy is due back in Washington late Saturday.

Other Firms May Halt Steel Hikes

By ROGER LANE
AP Business News Writer
An AP News Analyst

NEW YORK (AP)—A possibility has been raised that the steel price rise might have to be canceled if two Midwestern producers held out against it.

It developed even as the government moved for a grand jury investigation of the \$6-a-ton increase put into effect Wednesday and Thursday by U.S. Steel Corp. and several other large companies.

Neither Arco Steel Corp., the sixth-ranking producer, nor Inland Steel Co., the No. 8 firm, has indicated whether it would follow suit.

Roger M. Blough, chairman of U.S. Steel, was asked Thursday at a news conference whether the price markup could stick if Arco and Inland decided against a similar increase.

"It would definitely affect us," Blough said, "and I don't know how long we can maintain our position."

He interrupted a followup question.

Justice Department—Atty. Gen. Robert F. Kennedy orders grand jury probe into increase of roughly 3.5 per cent, effective this week.

President Kennedy — blasted price boost as "wholly unjustifiable and irresponsible defiance of public interest."

Roger M. Blough — U.S. Steel board chairman stands firm on price hike despite Kennedy's denunciation.

Labor—Price boosts attacked by AFL-CIO President George Meany and New York state director of United Steelworkers.

Consumers—They'll pay more for products containing steel.

Employers — Most say they'll have to charge more for products; a few say they'll absorb price increase due to competitive situations.

Catholic Count
NEW YORK (AP)—Roman Catholics make up about 10 per cent of the population of England, says the Catholic Digest. It says conversions to the church total about 15,000 per year in that country.

tion, saying "It would make it very difficult for us."

Between them, Inland and Arco in 1961 produced about 11 1/2 million tons out of industrywide production of 98 million ingot tons.

They were the most profitable operators among the industry's 11 largest companies on a tonnage basis. Inland, with net income of \$54.7 million, made 7.48 cents per one dollar of sales. Arco, with net income of \$57.5 million, cleared 6.48 cents per one dollar of sales.

At Middletown, Ohio, Arco declined comment Thursday night on its price plans. In Chicago, Inland said it was still studying the action of other concerns.

Blough firmly defended the action of U.S. Steel, by far the biggest producer and the first one to move.

Replying to sharp criticism by President Kennedy, the industrialist said there was nothing irresponsible in the boost and that he was as concerned as others about the nation's welfare, strength and vitality.

He said he was surprised by the bitterness of White House reaction and was not in any sense defying anyone.

Just 24 hours earlier, the President had accused Blough and a handful of other steel executives of irresponsible defiance and ruthless disregard of the national interest.

In a lengthy explanation, Blough said raising prices, and hopefully profits, was a step to accumulate plant improvement and modernization funds needed to keep in the competitive race with the modern steel mills abroad built in the postwar period.

This was made necessary by rising costs, he said.

Blough expressed surprise at an estimate that the steel hike would add \$1 billion to defense expenditures. Direct sales to the Defense Department, including sales through subcontractors and everybody else, would account for only about \$20 million extra, he said.

The increase, he said, adds almost negligibly to materials costs in every-day products. As typical, he mentioned 65 cents for a small refrigerator, \$10.64 on a standard-size car, three cents for an electric toaster, 70 cents for a domestic 4-burner range, five one-hundredths of a cent on a commo-sized food can.

Blough spoke throughout in calm, deliberate tones, sometimes hesitating, and with apparent reluctance to generate any new friction by use of strong terms.

He said foreign imports of steel were a very serious problem, and stressed the role of up-to-date machinery and equipment in meeting their challenge.

Without such improvements, he added, "no sales will be made, no work provided, no taxes available and our international competitive positions, our balance of payments, our gold reserves and our national growth will seriously suffer."

humanity, said they were "as pleased as we can be—it's been a thrill, all of it, the neighbors in our town, the President, people everywhere have been wonderful."

"We've been sort of calm the last week or two," says Mrs. Glenn, "but now we've started orbiting again."

Mrs. Glenn disclosed that part of the award will be donated to the Westminster Presbyterian Church in New Concord, Ohio, their hometown.

NORFOLK, Va. (AP)—Ronald Hackney, 12, has hit upon a space-age way of pulling baby teeth.

He tied one end of a string to a toy plastic rocket, the other end to the useless tooth, pumped the water-filled booster engine about 20 times to build compression, pulled the trigger, and the tooth was in orbit.

A Devotional For Today

Therefore, since Jesus was delivered to you as Christ and Lord, live your lives in union with him. (Colossians 2:6, NEB.)
PRAYER: Dear Father, we confess the world is too much with us and often we neglect waiting upon Thee. Help us to seek quiet times and places for meditating on Jesus and His love, and so deepen our spiritual lives. In His name. Amen.
(From The "Upper Room")

Less Than Cost

One of the interesting aspects of the investigations into the myriad affairs of Billie Sol Estes has indicated that heavy losses were incurred in selling fertilizer below cost.
The implication was that this was done to chase out competition in the hopes of retaining a relatively non-competitive field under more favorable circumstances. Testimony by one of the witnesses pegged these losses at a million and three-quarters dollars for a three year period. If true, it is no small wonder that the business was moving far out on thin financial ice.
This sort of thing is economic folly which is engaged in out of a sense of competitive necessity. Gasoline dealers

get caught in a similar struggle, and after all is said and done it does no one any particular good — not even the motorist who gets to fill up occasionally at a lower gross price.
Dealers are hurt, although they are given competitive rebates in most instances to help take up the shock. Wholesale and jobbers are kept in a state of uncertainty, and refiners and major marketers never know quite where they are — there seems to be no compelling sense of loyalty among the independent buyers who feel obliged to take that lowest quotation.
The refiners take a licking, sometime having to sell gasoline at a cost per gallon less than the crude oil cost per gallon. It doesn't make sense.

Get The Mills Turning

In answer to an inquiry from Howard County, the attorney general has ruled that the county attorney is responsible for prosecution of cases appealed from lower (i.e. justice and city) courts to the county court.
This ought to clear the air on a situation which has contributed to a log jam of several hundred cases on appeal in county court. The question, from a legal aspect at least, was where the responsibility for action lay. The opinion which states that it is the duty and the responsibility of the county attorney now clears this point.
At the same time, the city has indicated

that its attorney will be available to assist or advise as requested. It has a stake in the several hundred cases appealed from city court, for these represent cases which were left in a state of suspended animation.
In addition, it is estimated that there are upwards of 300 cases on appeal from the two justice courts in Howard County.
Now that the lines of responsibility have been pegged, it is time that the mills of justice be set to grinding. We are not naive enough to anticipate that these can be clipped off like corn from a cob, but we do believe that militant, tenacious action can help prevent addition to the backlog.

Marquis Childs California's Growth Problems

SAN FRANCISCO — By the end of the year, or early in 1963, California will have a population of 17,000,000 and become the largest state in the Union. This will dramatize a westward movement — a shift in economic and political power from the East Coast to the West Coast — that has been one of the remarkable phenomena of the past decade.
AS COMPARED to California's 50 per cent increase between 1950 and 1960, with 750,000 people a year moving into the state, Oregon and Washington have had scarcely more than the normal population increase. But it is quite possible that in the present decade these two states, with their great natural advantages, may see something like this same fantastic growth.
The World's Fair opening in Seattle on April 21 will be a stimulus. Visitors by the millions are expected to come from all over the country. They will get a look at the splendid scenery and form some idea of the outdoor life — boating, skiing, fishing, hunting — and its accessibility in contrast to the crowded East. The majority of visitors coming in their own cars will take in California on their way to or from the fair and this will give a new spurt to that state.

water is seeping into coastal areas and the irrigation pumps must work harder and harder to keep it back. This is the ominous signal that has meant the beginning of the end for past civilizations balanced precariously on the need to bring fresh water over great distances.
AS LONG AGO as 1905, the city of Los Angeles began to vote bond issues to carry water across mountains and deserts. A 240-mile aqueduct was completed in 1913 to Owens Valley and this was extended 90 miles in 1930 to Mono Basin. But the demand for water grew in geometric ratio and the Metropolitan Water District, made up today of Los Angeles and 50 other cities, was formed to carry water 242 miles from the Colorado River. This extraordinary system, completed in 1941, is comprised of 92 miles of tunnels, 63 miles of concrete-lined canals, 54 miles of concrete conduits, five pumping plants and a number of inverted siphons to carry the water across washes and canyons.
THE RIGHT to water from the Colorado River, in dispute between Arizona and California, is now before the Supreme Court and it is a hot political issue in the West. This is one reason that the state in 1960 approved a \$1.75-billion bond issue to transfer water from the northern half of the state, where it is in excess, to the southern half where demand constantly outstrips supply. It is a project of fantastic dimensions — lifting water 243 feet and carrying it in a man-made river to a southern terminus 450 miles away and then with another large pumping plant lifting the residue of the water and carrying it another 70 miles. If this challenge to man's technical ingenuity and his organizing capacity is met, it will mark perhaps the first time that a complex desert civilization has had a promise of long life.
NEEDLESS TO SAY, the Federal government is deeply involved in spending to help solve California's water problems, the United States Bureau of Reclamation being responsible for the Central Valley project that will cost close to a billion dollars. Gov. Edmund G. Brown in his campaign will not hide this partnership between Sacramento and Washington nor will he fail to take credit for putting over the state's own water program. It is part of the planning that he says is essential to this booming society.
(Copyright, 1962, United Feature Syndicate, Inc.)

TO PROVIDE the newcomers with homes, schools, recreation areas is already an overwhelming task. A new housing development springs up on what had been six weeks before an orange grove. Freeways cut through mountains and settled communities with the pressure of ever-increasing traffic that is like a natural force. The population of Los Angeles is going over the seven-million mark. The statistics of what the state is doing and still must do are dizzying. Three new state universities are coming into being — one in San Diego, one in Orange County and one in Santa Cruz County. This is aside from six new state colleges. There are 60 junior colleges providing the first two years either in being or under way. The state is spending \$100,000,000 on beaches and parks in an effort to provide a minimum of play space for the exploding population.
AND WITH THIS growth goes a crime rate that has become a source of political attack and counterattack — juvenile delinquency, drug addiction, a prison population of 25,000 costing \$1,800 a year per prisoner. This suggests some of the problems that pile up on the doorstep of the Governor of this state.
But dwarfing all other problems is one paramount to growth and even to continuing existence — water. Unchecked civilizations in the past have gone down and the sands of time have buried their temples and their monuments when water ran out. A vast urban sprawl has come into being in southern California in a semi-arid region and thousands upon thousands of acres of dry land have with irrigation produced a large share of California's wealth. Today, as the water table drops, salt

Next Question, Please
ROCHESTER, N. Y. (AP) — An attorney questioning prospective jurors for a negligence trial involving a motorcycle was seeking to insure against a prejudiced jury. He drew from an elderly, white-haired gentleman the concession that yes, he had once owned a motorcycle.
"When was that?" asked the attorney.
"About 50 years ago," said the elderly gentleman.
"Now, then," said the attorney. "Did you ever have the feeling, when you were driving your motorcycle, that all the automobiles were ganging up on you?"
"What automobiles?"
"What automobiles?"
"What automobiles?"

Weak In History
CHATTANOOGA (AP) — A North Carolina history professor says today's high school graduates are "weak in the broad perspectives of history and in the use of the English language."
Dr. Frank S. Ryan, association professor of history at the University of North Carolina, told a newsman that students fresh from American high schools "do not have much background in history."
Gaslight Era Begins
NASHVILLE, Tenn. (AP) — Although built in the gaslight era, staid old Ryman Auditorium, home of the Grand Ole Opry, is just now getting its gaslights. Installation of four sidewalk gaslights plus one in a niche in the wall built in 1891 has just been completed.

A PAGE FROM THAT HORRIBLE BOOK

Hugh A. Mulligan

Album Reflects Earl Long Personality

AP Newfeatures
Even in Louisiana, where for decades the population has been divided into two mutually irreconcilable groups, the Longs and the anti-Longs, there is general agreement that Earl Long was one of the most remarkable politicians of all times.
To his enemies, he was a baggy-pants vulgarian with uncouth habits and an undeniable capacity for invective that made him a matchless performer on the stump where he was at his galling-snapping, friend-snapping best.
To his friends, he was a lovable, laughable backwoods wizard with shrewd political insights and a stubborn resistance to all kinds of pressure groups, particularly where the "little man" was concerned.
To the country at large, he is at best dimly remembered as Huey Long's younger brother, a tragicomic figure of a governor who created something of a national sensation when he profane berated his state legislature and wound up in a mental hospital in Galveston, Tex.
That Earl Long was a much

more complex person than any of these superficial estimates is dramatically demonstrated in "Earl Long, the Last of the Red Hot Papas," a recorded profile of the late governor as pieced together from his actual speeches, press conferences and telephone interviews.
The album, put out by New Records Inc., is perhaps the most intimate profile of a politician ever assembled. TV newsmen Brooks Read and Bud Hebert have spared nothing, even the listener's sensibilities, in presenting Earl as he really was. His candor, and theirs in daring to relay it, are refreshing in this day and age when politicians only come before the public in a freshly laundered, carefully coiffured Madison Avenue image.
The liner notes by Margaret Dixon, managing editor of the Baton Rouge Morning Advocate and Louisiana's outstanding political reporter, provide valuable background material on the late governor, particularly his stand on the Negro problem, which is little known in the North where

the tendency is to lump all Southern politicians into one camp.
Other important additions to a growing field of spoken word records include:
"THE CIVIL WAR, VOLUME ONE (Mercury)"—Using authentic sheet music and museum piece instruments, including "over the shoulder" brass horns, the Eastman Wind Ensemble under the baton of Frederick Fennell tells the story of the War Between the States from Fort Sumter to Gettysburg. The four-disc album also includes a 20-minute narration by actor Martin Gabel, interspersed with cannon and mortar fire by a reactivated Civil War outfit, Battery B of the 2nd New Jersey Light Infantry. All in all, the effort is an excellent musical picture of the great conflict and a must for armchair tacticians and Civil War buffs.
"THE WIND IN THE WILLOWS (LONDON)"—"I love these little people, be kind to them," author Kenneth Grahame advised artist Ernest Shepard, when the latter inquired how he should go about illustrating this great children's classic about the mole, the toad, the water rat and all the other delightful river creatures who lived at the bottom of Mr. Graham's garden. Shepard was more than kind to these wonderful little people, but the same cannot be said of the actors who have turned in this recorded version of the immortal tale. If anything, the album suffers from over indulgence. It is over acted, over sound-effected, overly music-backed. Nothing is left to the imagination, in an area — children's literature — where the imagination is everything.
ALICE IN WONDERLAND, Vol 5 and 6. (Wonderland) — Where "The Wind in the Willows" fails on records, "Alice" succeeds, mainly because master story teller Cyril Ritchard knows how to suggest a character, with just a stroke of an accent and a wisp of dialogue, so that it lives in the mind of a child. Where London constantly changed the original Grahame book to fit the acted version, Wonderland changes not a word of Lewis Carroll's classic and still manages to come up with a dramatic whole.

Medical Report Air Force Has Crash Diet

By DORMAN CORDELL
ATLANTIC CITY, N.J. (AP)—The Air Force has come up with a crash reducing diet in the war against weight.
The chief weapon is a little pep pill that brings big appetites down.
A doctor claims it's a sure fire way of losing 30 pounds in 60 days.
And, for dietary diehards, he had these happy words: "you don't feel hungry while doing it."
You consume the pill and 350 calories a day, explains Maj. Paul W. Musgrave.
The food prescribed gives enough proteins, vitamins, minerals and bulk to maintain health. The pill—actually a 15 milligram capsule of dextroamphetamine—suppresses hunger.
Dr. Musgrave of the Air Force's School of Aero Space Medicine

outlined the program Wednesday at the annual meeting of the Aerospace Medical Association. He said it was tried on volunteers at the school.
Here's what you eat:
For breakfast—One egg and six ounces of skim milk.
For lunch—A tossed salad (100 grams) with vinegar, salt and pepper if you need some kind of dressing.
For dinner—Three ounces of lean meat and another tossed salad.
If you want it, you get one high ball with water or soda before dinner, but no beer. And you can drink all the tea or coffee you want—without cream or sugar, of course.
Persons with a history of psychiatric disorders shouldn't try it, the doctor said, but it's safe for anybody else—if it's done under a physician's direction.

David Lawrence
Forget The Constitution
WASHINGTON—"Disregard the Constitution if it gets you more votes—and hold on tightly to the Constitution if you want to block the passage of a law that could lose you votes."
This apparently is the Kennedy administration's code of political strategy as manifested now with respect to some proposed laws before Congress.
FOR ALTHOUGH the Constitution explicitly and plainly says that qualifications for voting by American citizens shall be determined by the states alone, Attorney General Kennedy now says in effect, in a public statement to a Senate subcommittee, that it is all right for Congress to ignore this constitutional provision. He takes the position that Congress can pass a law defining "literacy" as completion of a sixth-grade education.
The Constitution does forbid discrimination in voting on the grounds of race or color or sex, and laws have been enacted to enforce those provisions. Voters now can be disqualified on the basis of illiteracy irrespective of race or color or sex. So no new law really is needed to prevent any discrimination, and only a constitutional amendment can take away from the states the power to fix their own standards of literacy as a qualification for voting.
COINCIDENTALLY, the Rev. Martin Luther King, Negro leader, is quoted as having said after a conference with the Attorney General that Mr. Kennedy wants a bill passed by Congress because "he does not believe a constitutional amendment can be ratified by enough states."
What becomes then of the mandate that the Constitution should be obeyed even if it contains what some folks think is a cumbersome way of adopting a new amendment? Why should any administration—and for that matter, some Republican senators from Eastern states, too—advocate the passage of a bill as a means of circumventing the Constitution?

To Your Good Health Displaced Disc Affects Alignment Of Spine

By JOSEPH G. MOLNER, M.D.
Dear Dr. Molner: In two years I've had a displaced disc in my spine three times. When I left the hospital the doctor warned me to be careful — no lifting, no bending, no dancing, and to get as much rest as possible.
I have five children, all boys, and it's not so easy to rest.
I have one leg with no reflex in the knee or heel. I'm in my early 40's and weigh 140. Would you explain some reasons why this should happen so often? — E.S.
Disc trouble, whether "displaced," "slipped," "crushed," or whatever, means that a cushion of cartilage and fibrous tissue between two of the vertebrae has been damaged.
The damage may be from an injury or from arthritic changes in the spine. The result is that the alignment of the spine is thrown off to some degree, and nerve roots at that point can be "pinched" or irritated, resulting in pain and loss of reflexes as in knee, ankle, or perhaps elsewhere.
This condition usually develops only after repeated injury. True, some violent fall, or injury caused while jumping or straining in some unusual position may be the original cause, but as a rule a succession of lesser strains after that aggravate the original damage.
Generally speaking, present

practice is to treat such cases conservatively — take what measures are available to prevent injury from being repeated, and hope for at least some degree of healing.
Hence the advice you had is sound — except that it's a problem for a mother of five boys to get a lot of rest.
No lifting, no dancing! That's important. And so is rest.
You'll simply have to make your brain save your back. The boys must learn to pick up after themselves and to share a good many chores around the house.
It can be done. I have in mind a woman who was paralyzed in an accident. She has three children in elementary school. Confined to a wheel chair, she gives instructions on what must be done, and the youngsters perform remarkably well. (It's easier for them to understand, however, just from seeing their mother in the wheel chair.)
You will have to do a little more explaining, and you doubtless will have to be rather firm. Otherwise the youngsters might shirk their responsibilities.
Often a brace or firm garment is used to keep the spine more rigid and this protects the damaged place. Traction sometimes helps. Loss of weight may help, too.
In severe cases, and after con-

servative measures haven't been sufficient, surgery may be necessary. "fusion" of the spine at the damaged point. Small pieces of bone are "fused" at that place, acting as a permanent "splint." That particular joint won't bend afterwards, of course, but it takes the pressure off the nerve roots, prevents further damage, and brings the spine back into good alignment.
Dear Dr. Molner: I'm on a diet but I love honey. How many calories does it have? — F.H.
About 62 calories to a tablespoonful.
"You Can Stop Sinus Trouble!" is the title of my booklet explaining what sinus trouble really is, and encouraging sinus sufferers to do something about it. For a copy write to Dr. Molner in care of the Big Spring Herald, enclosing a long, self-addressed, stamped envelope and 20 cents in coin to cover handling.
Dr. Molner is happy to receive readers' questions, and whenever possible uses them in his column. However, due to the great volume of mail received daily, Dr. Molner regrets he cannot answer letters individually.

Around The Rim The Genghis Khan Gambit

The Cuban situation reminds me of one of Genghis Khan's old tricks.
One of the Asian conqueror's armies had been laying siege to a Cathayan city without success. Then, the Mongols withdrew quickly and in apparent disorder, leaving behind all their own baggage, as if their scouts had reported the approach of a large relief column. The desert warriors waited out of sight, slipped back, and rushed suddenly upon a surprised city whose soldiery and citizenry mixed and mingled outside the city's wide-open gates busily plundering the Mongols' stores.
THE CITY WAS massacred, the Mongols recovered their own baggage and all the city's possessions, too.
A similar situation exists in Cuba. After the failure of the first invasion, Castro offered to trade the prisoners for tractors, but the deal fell through. It did not have government backing. Now, the government (publicly at least) is staying out of the latest offer for ransoming of the prisoners, while Fidel has upped the ante. And it is no secret, although everyone concerned keeps quiet about it, that another invasion is being prepared—this time, probably with U.S. air, naval and even land support.
PREPARATIONS for a second invasion

take time. Had the prisoners been ransomed earlier, Castro would have had time to make good use of the tractors, to our loss.
In the meantime, the prison in which the invaders are kept is mined so that, if another invasion should come, the patriots will be blown to pieces at the press of a button.
Obviously, we must rescue these prisoners. But with the prison mined and heavily guarded, a commando style rescue would be out of the question. The only way out is by ransom.
THUS, IF THE RANSOM is paid and the prisoners are safely landed on friendly soil, the situation becomes more or less parallel to that of the besieged Cathayan city. If the invasion comes quickly, as soon as possible after the prisoners are safe, Castro will have no time or opportunity to make use of tractors or money or whatever other ransom is paid.
We will massacre the Reds, regain our own "baggage," and conquer Cuba besides.
It wouldn't surprise me a bit if that's exactly what should happen within the next few weeks. —BOB SMITH

Inez Robb It's An Old, Old Trick!

There are days when I can't turn a nickel or forge ahead an inch. One of those days glided by three weeks ago when I wrote that "what this nation needs, in addition to a good five-cent nickel, is instant eggshells, a new industry crying aloud to be born for both the benefit of egg-and-chicken producers and coffee aficionados."
This earnest attempt to start a new industry and spread employment among both poultry and people was based on a published report that approximately 50 per cent of Americans still mix eggshells with the java, no matter how ultra-modern the coffee maker they use.
SINCE THAT particular column saw print I have been fighting my way out of an avalanche of mail asking me (1) where have I been all my life?, (2) why New Yorkers never know what's going on west of the Hudson? and (3) how thick is my ivory tower and-or-head?
Apparently I am the only person in the U. S. A. who, until three weeks ago, didn't know that a sensational marriage de convenance had been arranged between instant coffee and instant eggshells. Well, at least between instant coffee and instant egg white, in a proportion that "clarifies" the brew and produces coffee of a crystalline pellucidity.
FOR THOSE who truly "live modern" and don't hole up in an old hollow tree as I do, science has already perfected and free-enterprise-marketed the very item on which I was about to apply for a patent. Apparently, every supermarket west of the unhappy Hudson carries this instant mixture on its shelves.
The most humiliating communication came from a stranger, however, but from my Aunt Kittie Lee Hedden in Nampa, Idaho, who will celebrate her 88th birthday anniversary in another week.
"I HAVE JUST read your column about instant eggshells for coffee," she wrote me. "I am surprised that you didn't know

that your Grandmother Callaway was preparing 'instant egg' with coffee as long as I can remember, which is more than 80 years.
"Mind you, it was no invention of hers. I suppose she learned the trick from her aunts and her grandmothers."
"As I have told you, coffee was a great, almost a rare, treat in Idaho in the early days. Your grandmother bought it from two peddlers with packs on their backs who used to walk through the Boise Valley semi-annually. Those packs were a traveling 'notions counter.' Mother used to buy needles, pins, thread, buttons and such things from them.
"THOSE PEDDLERS also carried two other commodities that were rare treats: rice and coffee. I know Mother and Dad must have looked forward to real coffee as we children did to rice pudding.
"The coffee these men carried was in the bean and always green. I'm certain you've never had to bother with either, but your grandmother had to roast the coffee and grind it.
"Mother would make up a fire in the old wood stove, get the oven just the right temperature (she had an instinct for right temperatures) and then put in the precious coffee. We children were stationed in the kitchen to watch the coffee and see that it didn't get too brown.
"WHEN THE BEANS were just about right, your grandmother always beat up one or two egg whites. Then, with a little brush, she whisked the eggwhite over the coffee. In the final minutes in the oven, the eggwhite glazed the beans.
"Your grandmother ground the beans, with eggwhite, each time she made coffee. It smelled like ambrosia, and I can remember I could hardly wait to be old enough to have a cup.
"So, dear, there is nothing really new about instant eggshells. Your grandmother and probably her great-grandmother before her knew the trick. Maybe you can revive it, but you can't 'invent' it."
(Copyright, 1962, United Feature Syndicate, Inc.)

Dr. Molner is happy to receive readers' questions, and whenever possible uses them in his column. However, due to the great volume of mail received daily, Dr. Molner regrets he cannot answer letters individually.

POLITICAL EXPEDIENCY rules the day, and the only consistency is in the new strategy which says, in effect, "forget the Constitution and win votes by whatever device will appeal to the largest number of voters."

SAVE UP TO 3¢ A GALLON

Precision-Blending splits the difference between regular and premium. By tailoring additional octane grades to meet your needs, Precision-Blending can save you up to 3¢ a gallon!

HERE'S HOW PRECISION-BLENDING WORKS...

The Precision-Blending Pump draws from two underground tanks. There's powerful premium in one tank, economical regular in the other. The Precision-Blending Pump accurately proportions these fuels to deliver the right combination of power and economy for your car.

YOUR SAVINGS

Once your car gets all the octane it can use, additional octane is wasted. Octane costs money. Waste octane... and you waste money. That's where Precision-Blending saves you money. It lets you avoid waste.

ODDS IN YOUR FAVOR

Over half of today's motorists can save money with Precision-Blending, so the odds are in your favor. And remember... savings up to three cents a gallon can give you about a month's free fuel for your car each year!

Newest Nuclear Reactor Working

SAXTON, Pa. (AP) — The nation's newest nuclear power reactor began operations Thursday, starting a five-year experimental program aimed at increasing the efficiency in nuclear fuel.

The reactor, about 25 miles south of Altoona, is owned by a non-profit corporation known as

the Saxton Nuclear Experimental Corp.

Four operating subsidiaries of the General Public Utilities System formed the corporation. They are Pennsylvania Electric Co., Metropolitan Edison Co., New Jersey Power and Light Co., and Jersey Central Power and Light Co.

Pennsylvania State University and Rutgers University are associate members.

Democrat Helps GOP Candidate

ATLANTA, Ga. (AP) — Former Gov. Marvin Griffin, a staunch Democrat, has signed a petition to help Republican gubernatorial candidate A. Edward Smith get his name on Georgia's election ballot.

Griffin is seeking the Democratic nomination for governor. "This is a free country," he said. "I think every fellow should be able to run for office."

Republicans must get a petition signed by 65,000 eligible voters because they haven't drawn 5 percent of the vote in previous gubernatorial elections.

Early Training, Discipline Evident In Fine HCJC Play

"All My Sons," as staged by the College Players Thursday evening, is an example of what can be accomplished when students have the advantage of a few years of early training behind them — and a firm hand to guide them.

The play was presented by the speech department of Howard County Junior College, under the direction of the new speech and drama instructor, Martin W. Landers. The final performance will be given tonight at the HCJC auditorium, curtain time 8:15 p.m.

"All My Sons," a psychological-ly intricate drama by Arthur Miller, is just the sort of play that would trip most amateurs and lesser professionals. The theme is developed not so much on plot as on the workings of the human psyche and the interrelationships of several minds at cross purposes.

To catch all the nuances Miller had in mind would require a mature understanding of life and human nature indeed rare.

UNUSUALLY GOOD

The collegians Thursday evening did not catch all these subtleties, but they showed a sense of timing, a knowledge of the characters they were portraying, unusual for the junior college age group.

Not that Big Spring is harboring another Sarah Bernhart or a Charles Laughton, but the fineness of the performances in "All My Sons" is a credit to the natural talents of the players. More than that, it is a credit to their dramatic training in high school.

Cast members who began their stage training locally included Gary Pickle, Tommy Wilkinson, Ilameta Carr, James Farris, and Gary Dunham. Additionally, Frances Roberts carried down theatrical experience from Springfield, Mass., and Lynda Kendrick, of Tuscola, has had dramatic training from the fourth grade up.

OTHER PLAYERS

Rounding out the cast were Zantine Williams of Lamesa; Coral Sullivan; and juvenile actor Robert Polk.

Nearly all the actors were above average, there were few lapses or stumblings in more intense scenes and it was certainly among the best plays ever presented at the college.

Against the backdrop of an excellently designed set, the players, through a degree of mutual empathy, sparked each other into a sense of reality that often caught and held the audience.

It was obvious that Landers had his charges well under control.

LANGUAGE PROBLEM

It was equally obvious to those familiar with the play that a few so-called "bad" words had been eliminated. In certain scenes in which one might expect a normal human being to snort out a good old-fashioned cuss word, the omis-

sion of same broke the spell of reality — and playwright Miller, unlike Tennessee Williams, employs only those strong words which would come natural to a specified situation, and not just for the sake of shock or sensation.

In all fairness, it must be noted that some people are shocked by strong language, and that use of same breaks the spell of reality for these folks.

You can't win either way, but apparently scripts for further college productions will be softened a bit.

Politicos Keep Eye On Date

By The Associated Press

Friday the 13th has special significance for the superstitious, but for Texas' political hopefuls, there is more meaning to May 5—the date of the Texas primary elections.

And it was that date that was in mind as candidates roamed the state Friday for the votes that may make the difference that significant day, May 5.

Democrat Don Yarborough, a gubernatorial hopeful, said in Corpus Christi that the 88.5-mile national seashore on Padre Island is a "dream on the verge of becoming true."

Edwin A. Walker told a highly partisan and applauding Dallas crowd of 500 that he is a candidate "because Texas can no longer afford weak and inept leadership."

Another candidate for the Democratic nomination for governor, Marshall Formby, charged in Raymondville, "the Washington politicians want to completely run Texas." Formby made the remarks at a coffee reception at which he also took verbal pokes at Vice President Lyndon B. Johnson and John Connally, one of his Democratic opponents.

Gov. Price Daniel said in Houston that Texas "has one of the finest prison systems in the country," and an adult parole system helping to rehabilitate "thousands of inmates while saving Texas taxpayers a million dollars a year."

TENSE STORY

The story of "All My Sons" is engaging, tense, and meaningful. A shop owner (Gary Pickle) who made his fortune during World War II had allowed imperfect parts to be shipped to the Army Air Corps, and 21 men had died before the crime was discovered. Pickle cleared himself, put the blame upon his partner, and returned home to a degree of wealth.

He had lost a son in a bomber crash, not one of those for which he had been responsible. He lived for the sake of his remaining son (Tommy Wilkinson) who refused to believe his father guilty.

But the mother (Frances Roberts) refused to believe her missing-in-action son was dead, and lived insanely for the day of his return.

HOUSE OF CARDS

Houses made of cards will come tumbling down. The dead son's fiancée (Ilameta Carr) comes to town to wed the younger brother. She happens also to be the daughter of the innocent partner who is growing old and sick in prison for Pickle's crime.

Following Miss Carr is her brother (James Farris) who, at last, is convinced of his father's innocence, and has come to take away his sister from the clutches of what he believes to be an evil family.

Stir in the mother's determination that her older son will return to marry his sweetheart, and you have the makings of a first-class drama.

There are no pat solutions to this all-too-human situation, which resolves itself according to the personalities involved, with an assist from the hand of fate. Punishment comes to the guilty father in its own peculiar way. —BOB SMITH

Typist Helps Nab Robber

NEW YORK (AP) — "I saw those men fighting," said Joan Coleman, a shapely young typist. "My first thought was to get out of the way. But I found myself in the middle of it."

That's how Miss Coleman, 20, described her role in the capture of a bank robber Thursday.

Police said the holdup man stuck a note demanding \$5,000 into a teller John Loughlin's cage in a Chase Manhattan Bank branch. The note said, "Don't make a false move. I have a gun."

Two bank guards jumped the man in the lobby of the building. Just then, Miss Coleman hap-

pened by and added her flailing fists to the battle.

The bank robber, a husky 6-footer, fled from the girl and the guards, but bookkeeper John McGregor, 48, felled him with a flying tackle.

Police identified the man as Henry James, 43, of Brooklyn. He was booked on charges of assault and robbery.

BIG SPRING DAILY HERALD

SEC. B BIG SPRING, TEXAS, FRIDAY, APRIL 13, 1962 SEC. B

9,490 Car Tags Issued Just Before Deadline

Howard County Tax Assessor and Collector's office processed 9,490 automobile registration applications in the final two weeks of the registration period which ended on March 31, Mrs. Zirah LeFevre, collector, announced.

She said that the total registrations for the current year now stands at 18,422. Approximately half of the total number of motor vehicles registered were handled in the final two weeks of the period which began on Feb. 1.

"It has been a most successful car registration period for this office," said Mrs. LeFevre. "The public has been most cooperative and this office expresses its deep appreciation to everyone for the help and consideration."

"I want to especially thank the three Lewis Variety stores and the two Newsom Food Stores where

tag substations were established. Jim Lewis and Don Newsom, the owners of these establishments, were most helpful.

"They paid the salaries of their clerks who served as deputies and used their own advertising facilities to publicize the substations. We also are grateful to Hester's Office Supply for furnishing equipment and supplies for these substations."

During February and March, Mrs. LeFevre said her office handled 2,672 title applications for motor vehicles. This number is 562 more than for the same two months last year and is in addition to the regular registrations. The 18,422 vehicles registered in February and March, 1962 is 1,362 more than the registrations for the comparable period in 1961.

"We have collected \$520,601.37 for automobile business in the past

two months," Mrs. LeFevre reported. "Of that amount \$469,117.53 was for 1962 car registrations. This is \$39,347.35 more than last year for the same two months."

She pointed out that Howard County has already received its full share of the 1962 automobile revenue. State law restricts the county's share of this money to \$175,000 and that amount has already been deposited to the county's credit.

The only income the county will receive from automobile registration until next Feb. 1 will be a small commission of from 30 to 50 cents on each receipt written.

Mrs. LeFevre said that it will take some weeks to complete the filing, reporting and recording involved in the automobile registration.

Residents Make Use Of Libraries

Howard County residents are avid book readers and they make generous use of the library facilities which are afforded them here.

James K. Roach, librarian at the Howard County Junior College, is speaking before the Big Spring Kiwanis Club, Thursday pointed out that the Howard County Library has 15,000 volumes on its shelves and that in 1961, the library loaned out 65,000 volumes.

"Actually," he said, "this would indicate that each book in the library was borrowed four times during the year."

Roach was speaking on National Library Week which is being observed April 8-14. He said that the public is invited to make full use of the books in the Howard County Junior College library as they are welcome to make use of the books in the Howard County Free library.

He said his library has 11,000 volumes. The Howard County Library has 15,000 volumes. The libraries in the Big Spring High School, and the two junior high schools have 10,000 additional volumes.

Roach warned that both his library and the county library will soon face an acute problem of additional space.

"We must have more space for books and to serve the readers," he said.

He was presented by Soc Walk-

er, program chairman.

Announcement was made that the Kiwanis Club will honor the members of the Howard County Junior College volleyball, basketball and tennis teams, who are under the guidance of Anna Smith, next Thursday. The members of the teams will be in attendance at the club luncheon. The teams have already won eight trophies and 26 individual awards for their skill in their respective sports.

The Kiwanis Clubs of the nation are setting aside next week to pay honor to American youth.

LBJ Airport Gets Safety Equipment

DALLAS (AP) — The Federal Aviation Agency says the agency on its own initiative has installed safety equipment at the Lyndon Johnson ranch airstrip, the Dallas News reported in a dispatch from Washington.

Najeeb Halaby, head of the agency, said the airport is leased to the City of Johnson City as a public airport available to all. The safety equipment was installed because of the use made of the airport by Vice President Johnson and other national and international figures, he said.

The installations include a surplus radio beacon put in place at a cost of \$22,115 and identification lights costing \$7,150.

Halaby said safety facilities were installed at former President Dwight Eisenhower's Gettysburg, Pa., landing field and were removed when "the official requirement ended." He said the same policy would be followed at Johnson City.

Benny Goodman To Tour Russia

NEW YORK (AP) — Benny Goodman will appear in Moscow for the first jazz concert of his Soviet tour on May 30, his 33rd birthday.

A spokesman for the clarinet virtuoso said Thursday Goodman and his group are scheduled to leave Seattle May 28 for the 5 to 10 week tour of Soviet cities. Goodman will also appear as a

solist with Soviet symphony orchestras and chamber music groups.

The tour is being conducted under the terms of cultural agreement signed by the United States and the Soviet Union last March 8.

Whittenburg Here For Campaigning

Roy Whittenburg, who is running for governor of Texas on the Republican ticket and who believes that all judges of all courts, including federal judges and especially justices of the Supreme Court, should be elected to office, was in Big Spring Thursday.

The Borger published and rancher, who is on an aerial drive which he is making in search of support, visited in the city but made no speeches. He has had a hectic week so far and has made speeches in El Paso, San Angelo, Odessa and other cities.

He was in Abilene last night for a speaking engagement.

"I am highly encouraged by the response I am getting," the 49-year-old Panhandle pioneer, said. "I made my first statewide campaign in 1958 running for U. S. Senator. I polled 188,000 votes that year."

In 1958, Whittenburg said that he attempted to cover the state by automobile.

"Texas is too big for that," he said. "Now I go by private airplane and I am hopeful I will

ROY WHITTENBURG

Citrus Industry Seeks New Dye

LAKELAND, Fla. (AP) — The Florida citrus industry is looking for a new dye to color green and pale oranges.

"We're getting reports from markets that color-added oranges look tired and weak, and don't have the fresh appearance that naturally colored fruit have," William G. Strickland, general manager of the Florida Fresh Citrus Shippers Association, said Thursday.

About half of the 11 million boxes of oranges shipped from Florida last season were artificial-colored.

Steel Substitute Usage Is Urged

ROCHESTER, N.Y. (AP) — Mayor Henry Gillette of Rochester says he will introduce a resolution at Monday's meeting of the City Council calling for use of substitutes for steel whenever possible.

The resolution will be in the nature of a protest against the hike in steel prices, Gillette said Thursday. He said he hoped other communities and private enterprise would take similar action.

Transmitter Fits In Mouth

DALLAS (AP) — A firm in suburban Garland has developed a device that it says could advance spying and plain old neighborhood nosiness 100 years.

It's a tiny transmitter that can be inserted in the mouth as a false tooth — and sends coded messages by clamping the uppers on the lowers.

Varo Co. of Garland is the developer of the device. The firm says basically, the false-tooth radio is the size of a molar, and is placed in the mouth like any false tooth. The corresponding upper tooth is laid with a metal "filling" that charges the radio when the teeth are clamped together.

Development came through a demand for rigidly accurate yet small and lightweight electronic devices for military computers, missile control and satellite control systems.

The hidden mouth piece actually was designed for use in medical research at Brooke Air Force Base in San Antonio.

Doctors put the tiny code transmitter in the patients' mouths to study how often they open and shut their mouths during sleep and whether and how often they grind their teeth.

get to all parts of the state before the primary on May 5."

Whittenburg feels that if all justices and judges were elective that the American form of government would be preserved. He does not think that it is safe in the hands of the appointive officials now on the benches.

He also strongly opposes the importation of foreign sugar and oil.

"We can produce enough sugar for our needs at home," he said, "and surely every one knows we have oil and more oil than we could possibly use."

These actions by the national government limit Texas production of both oil and sugar, he says, and if he was governor he would work to put an end to the importation practices, he promises.

New Scofflaw King Is Crowned

NEW YORK (AP) — A man arrested Thursday for ignoring at least 235 traffic tickets was named the new scofflaw king by traffic court officials.

The defendant, Harry Katz, 45, was arraigned before Chief Magistrate Abraham M. Bloch and held in \$7,500 bail for a hearing April 26.

Police said that former scofflaw king Eugene Doriot Heil, had 196 unanswered tickets and was fined \$6,175 and 60 days in jail last June 19.

Cheery Weather Returns To State

By The Associated Press

Cheery sunshine and warm spring temperatures have returned to all of Texas.

The U.S. Weather Bureau has forecast clear weather for all of the state with warmer temperatures in most sections.

High readings for the day were expected to range from 70 in the Panhandle to 95 in the Big Bend area.

Turbulent weather ended Thursday and dry weather moved over the state, except for a few showers in the eastern Panhandle, the upper Red River Valley and in deep South Texas.

Early morning temperatures ranged from a low of 39 at Daltart to a mild 64 at Galveston on the coast.

Methodist Choir To Sing Special Easter Program

"The Seven Last Words of Christ," by Theodore Dubois, will be sung by the Chancel Choir of the First Methodist Church at 5 p.m. Sunday. The choir is directed by Don Ford.

Guest soloists will be Ira Schantz, tenor, and Ellsworth Winden, baritone. Other soloists will be Mrs. Carl Bradley, Mrs. Don Ford, and Mrs. Don Newsum. All are sopranos. The organist will be Mrs. Champ Rainwater, and the pianist will be Patricia Fowler.

Schantz, a graduate of the school of music at North Texas State University, Denton, is head of the vocal music department at Howard County Junior College. He has toured with the Robert Shaw Choral and is a well-known soloist in the Southwest.

Winden, choral director at Big Spring High School, has studied music for many years. He received his degree in music from Augustana College, Sioux Falls, S. D., and his M. A. degree in music literature from the Eastman School of Music, Rochester, N. Y. He was a soloist with the Augustana College choir, and later a member of the Eastman Chorus.

Pick up calendar.

Rev. R. B. Murray, 11 a.m., "Tolerance and Conviction"; 7 p.m., "Baptism."

PHILLIPS MEMORIAL BAPTIST—The Rev. Bill Bosse in revival at 10:30 a.m. and 7:45 p.m.

COLLEGE BAPTIST—The Rev. M. B. Smith, 11 a.m., "Christian Stewardship"; 7:15 p.m., "Sowing and Reaping."

SALEM BAPTIST—The Rev. Leslie Kelley, 11 a.m., "The Church — An Army With Banners?"; 8 p.m., "The Judgment."

Pentecostal—UNITED PENTECOSTAL—Divine and 10th, J. S. Coakhouse, 10 a.m., Sunday school, 11 a.m., morning service; midweek services, 7:30 p.m. Wednesday.

Living in the Light of the Cross

THE GREAT CHANGE BROUGHT IN MEN BY REDEMPTION THROUGH CHRIST

Scripture—Luke 19:38-39; Titus.

By N. SPEER JONES

IN PAUL'S LETTER TO Titus we find an ideal basis for a discussion of the meaning of Palm Sunday, for a lesson appropriately entitled "Living in the Light of the Cross."

In all three of the other versions of Christ's triumphant entry into Jerusalem, when He fulfilled the prophecy of Zechariah 9:9, we find a key word used by the multitude following Him—*hosanna*. (See Matthew 21:9; Mark 11:9, and John 12:13). The literal translation of this word is "save now."

Although His followers were deeply disillusioned when the cross was substituted for the throne—for despite what He said, they expected Him at last to reveal Himself in full power as temporal and spiritual ruler—they realized after His res-

urrection that Christ had indeed "saved (them) now."

Christ on the cross "gave Himself for us, that He might redeem us from all iniquity, and purify unto Himself a people for His own possession, zealous of good works" (Titus 2:14). The word "redeem," derived from "ransom," indicates liberation purchased with a price—our liberation from sin, purchased with the price of Christ's own blood.

In this act, "bringing salvation to all men," appeared "the grace of God" (Titus 2:11). From this grace comes the ability to "live soberly and righteously and godly in this present world" (Titus 2:12).

"Soberly" indicates a life of self-control and self-government—living rightly within oneself. "Righteously" indicates the out-

ward manifestation of this, or living rightly with regard to other men. "Godly" is its relationship to God — man living rightly with regard to his Maker.

These are the basic doctrinal truths of which Paul reminds Titus in his letter, written from his Roman prison shortly before his death. Titus, you may remember, was the young follower, probably of the gentle parentage and a native of Antioch, who carried Paul's first letter to Corinth.

When this letter was written he was in charge of the church in Crete, that large island southeast of Greece which once boasted the greatest civilization of the Mediterranean world. In Homer's time it held a hundred cities. This was the home of the Minotaur and the labyrinth of

"I have been crucified with Christ; it is no longer I who live, but Christ who lives in me; and the life I now live in the flesh I live by faith in the Son of God, Who loved me and gave Himself for me."—Galatians 2:20.

Greek mythology, and the site of the first famed space launching—*Daedalus* and *Icarus* attempted flight on waxen wings.

Perhaps it is true that when such luminous civilizations fall, they fall to corresponding depths. Paul reminds Timothy that even one of their own number calls them "always lazy, evil beasts, lazy gluttons" (Titus 1:12-13). The writer quoted by Paul was Epimenides, contemporary of Solon, born 659 B.C. The Cretan trait of lying apparently was so pronounced that it became a verb in Greek—*kreto*, to speak like a Cretan or to lie.

To work among such people, Titus certainly needed the instructions and reassurances—including the light of the cross—that Paul could remind him of in his letter.

GOLDEN TEXT
"I have been crucified with Christ; it is no longer I who live, but Christ who lives in me; and the life I now live in the flesh I live by faith in the Son of God, Who loved me and gave Himself for me."—Galatians 2:20.

"A CHRISTIAN EDUCATION"

The Scripture provides a full measure for the good of man; it is not only plentiful but it is inexhaustible. Man cannot underline a greater duty for himself than to secure a knowledge of the Bible. I submit the following which is attributed to Roger Babson, "The need of the hour is not more factories or material, not more railroads and steamships, not more armies or more navies but rather more education based on the plain teachings of Jesus." Webster wisely stated that "Knowledge does not comprise all which is contained in the large term of education. The feelings are to be disciplined; the passions are to be restrained; true and worthy motives are to be inspired; a profound religious feeling is to be instilled; and pure morality inculcated under all circumstances. All this is comprised in education." Wisdom must enter our hearts. Knowledge must indeed become pleasant to our souls; but in order to find favor and good understanding mercy and truth must be always with us. We must find wisdom and get understanding for the "Merchandise of it is better than the merchandise of silver and the gain thereof than fine gold." In Christ are hidden all the treasures of wisdom and of knowledge — Col. 3:3; hence the true education causes men to be "Rooted and built up in him and established in the faith, as you have been taught, abounding therein with thanksgiving" — Col. 2:7. Hence also the true education will warn men to "Beware lest any man spoil you through philosophy and vain deceit, after the tradition of men, after the rudiments of the world" — Epictetus once declared "The first business of a philosopher is to part with self-conceit." I wish kind reader, that you might contrast this from some of the modern philosophy which overstocks us in some of our schools, pulpits and books. The Spirit of man is suffocated not with the science which considers truth, and which learns to be decent and pure; but the philosophy of being subtle. I think Nietzsche rightly said, "The modern skeptical philosophy consists in believing everything but the truth; and exactly in proportion to the want of evidence; in making windows that shut out light, and passages that lead to nothing." What do you learn at church? The Bible, or a supine philosophy of man. At school? To come to wisdom, to discipline your feelings—restrain your passions—inspire motives that are worthwhile? Or is our modern philosophy seeking to destroy respect for the Bible, for the church of the New Testament; for the simple command of Christ for sinners to repent of their sins and be baptized for the remission of those sins, as is stated throughout the New Testament? Is our modern philosophy seeking to build morality or destroy it?

Elbert R. Garretson, Minister

SPECIAL HERALD SUPPLEMENT WILL TELL STORY OF CHURCHES

A special supplement of The Herald, dealing exclusively with the churches of Big Spring and neighboring communities, will appear with Sunday's issue.

A history of practically all the church organizations will be presented, along with pertinent and interesting facts about size and growth of the churches, their budgets, their mission programs, their physical plants, their plans for growth, etc.

It will be the most complete such directory on church organization ever presented locally.

It will be in tabloid size, for handy safekeeping. The Herald feels that a great number of its readers will want to keep this section as a permanent volume, for it will be of lasting interest for all church followers.

Revival

Westbrook Plans Holy Week Revival

WESTBROOK (SC)—A Holy Week Revival will begin at the First Methodist Church Sunday evening and continue through April 20.

The Rev. Tommy Beck, Trent, will bring the messages each day at 7:30 a.m. and 7:30 p.m. Herman Minor will be in charge of the song service and Mrs. George Sweatt will be pianist.

During Youth Fellowship last Sunday officers were elected. They include Doris Nell Sweatt, president; Glenda Rees, vice president; Carroll Stone, secretary; and Patty Rees, publicity chairman.

Community Easter Music Program Set

COAHOMA — Three Coahoma churches are cooperating in the presentation of a community-wide Easter music program.

The choirs of the First Baptist, First Methodist and First Presbyterian Churches are to be combined in the program. It will be staged in the auditorium of the First Methodist Church on April 15 at 8 p.m.

The theme of the Easter program will be "From Darkness to Dawn," and H. L. Fraser, music director of the First Baptist Church, will be in charge.

About 200 singers will take part in the program.

The general public is invited to attend.

This is the first time the churches in Coahoma have attempted a cooperative Easter music program of this character.

Revival

The evangelist for the pre-Easter revival at Trinity Baptist Church, April 15-22, will be Rev. Bill Slayton, co-pastor of Rolling Hills Baptist Church, Fort Worth. Rev. Slayton is a graduate of the Bible Baptist Seminary. Services will be held each evening at 7:30 o'clock. Singing will be under the direction of our newly elected director, Ben Hall.

CHURCH BRIEFS

VATICAN CITY (AP) — Sick persons unable to leave home may now receive communion in the afternoon or evening, according to a recent ruling of the Roman Catholic Sacred Congregation of the Holy Office. A person does not need to be bedridden or in danger of death to qualify for the new privilege, but his illness must have kept him at home at least a week.

ALBANY, N. Y. (AP) — A screen installed in the narthex of St. Andrew's Episcopal Church will afford brides privacy for a last-minute check before they begin their wedding march.

PATERSON, N. J. (AP) — The Rev. Ralph Altansio, 35, was so anxious to give boys in trouble a second chance he took to recording popular songs.

His discs netted enough money to convert an abandoned church into a club that now boasts 100 members.

Father Altansio acted after a rash of arrests among local youths. So far only one of the 25 former troublemakers enrolled has gone back to crime.

Special Holy Week Services

The Coahoma Methodist Church has announced special Holy Week services for Thursday and Friday, April 19-20 at 7:30 p.m.

Thursday night, the church will celebrate the Holy Communion in remembrance of the Last Supper of Jesus and his disciples. Friday service, "A Watch At the Cross." The Rev. Harold C. Perdue, pastor, will be preaching both evenings.

Give God A Chance—God Will Open Doors For You!

The story of the Palms

There were hundreds of trees along the Bethany Road. But no one noticed them. People were hastening over those last few miles, bound for Jerusalem to celebrate the feast.

Then the King passed by. A gentle Galilean with kind, sorrowful eyes — riding to His coronation.

People cheered and shouted *Hosanna*. Some laid cloaks on the dusty roadway. And then, someone discovered the trees... beautiful palms that had stood unnoticed. Their graceful branches became the carpet of the King!

And when men sought a name for that triumphal Sunday, they named it for the palms. It is a day for discovering the spiritual beauty God has planted along the road of life — a day to worship Our King.

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

DEAR ABBY

Everybody Be Quiet!

DEAR ABBY: I wish you would print something in your column about hairdressers. Why do they think they have to talk all the time? I go to the beauty parlor for a hair - do, not to listen to how hard they work, petty gossip about the other employes in the shop and all the dirt about the person they took care of before me. I travel quite a bit and find that it is the same no matter where I go. My husband says this is true of barbers, too.

quite a bit, and I get the other side of the story. Hairdressers tell me they wish their customers would just relax and be quiet instead of telling them their troubles and gossiping about everyone they know. My husband gets around a lot, too, and tells me this is what the barbers tell him.

DEAR ABBY: There is a girl in our dorm who is a knockout to look at. She has a face and figure every girl envies and she has a great personality to go with it. Our problem is that she must be afraid of men. She is asked for dates, but if a boy even tries to put his arm around her she hauls off and just about fractures his skull. They say that it is like pulling teeth to get her to go out a second time with a fellow who is even mildly affectionate. How can we help her?

DORM MATES
DEAR DORM MATES: Fix her up with a dental student!

DEAR ABBY: I have been married for nine years. I married young just to get out of the house. I was completely honest with my husband and told him before he married me that I didn't love him. He said he would take that chance and I would learn to love him later.

We have five beautiful children. I respect him and admire him and am proud to be his wife because he is a kind and generous man and a wonderful father, but I still have not learned to love him. I am a good and faithful wife, but I know now that I will never have the kind of love every woman dreams of. (Not within my marriage at least). Should I continue this loveless marriage? I am thinking of my children.

MISSING SOMETHING
DEAR MISSING: Keep thinking of those children. Many women have written to tell me that they married for "love" (the kind every woman dreams of) but it did not last long. The reasons they neither admired nor respected their husbands. If yours is kind, generous and a wonderful father, count your blessings. No one has everything!

Stop worrying. Let Abby help you with that problem. For a personal reply, enclose a stamped, self-addressed envelope.

For Abby's booklet, "How to Have A Lovely Wedding," send 50 cents to Abby, Box 3365, Beverly Hills, Calif.

BORED
DEAR BORED: I also travel

Racist Argues With Threat Of Excommunication

NEW ORLEANS (AP)—A segregation leader has replied to a threat of excommunication by saying forced integration lacks Biblical approval and the clergy "is hopelessly divided on the issue."

Jack Ricau, executive director of the South Louisiana Citizens Council, said Wednesday race mixing "is not a religious matter."

Ricau said he was one of a number of segregationists to receive a "paternal letter of admonition" from Archbishop Joseph Rummel, 85.

Ricau said he thought the prelate had exceeded his authority. He termed the archbishop's actions "hastily executed."

"It was precisely this sort of mischief that split holy mother church in the 14th Century," Ricau wrote.

The archbishop sent the letters to an undisclosed number of segregationists here March 31 after announcing Roman Catholic schools would be integrated this fall.

PHOENIX, Ariz.—The Administration Committee of the Arizona Senate issued the following directive:

"Senators who have no secretaries of their own may take advantage of the girls in the steno pool."
