NE Mitchell Slated For Canyon Venture

Drilling is to be started at once at a 7,550-foot wildcat in the extreme northeast corner of Mitchell County. The venture is just south

of the Scurry County line.

The prospector will be James H.
Snowden of Fort Worth, and associates, No. 1 W. H. Narrell. It is located 660 feet from south and west lines of section 24, block Y, TP

That makes it two and one-haif miles southwest of Inadale, which is in the southeast corner of Scurry

The projected destination of 7,550 feet is calculated to take the project into the Canyon reef lime of the Pennsylvanian—and possibly into a lower zone of the Pennsylvanian.

SE Upton Wildcat Tests in Ellenburger

Samedan Oil Corporation No. Neal, Southeast Upton County wildcat, two miles northeast of Rankin and 330 feet from south and east section 26, block B, HE&WT survey, is bottomed at 11,627 feet in the Ellenburger, and is running a drill-

Top of the Ellenburger was called at 11.590 feet. Elevation is 2,602 on a bill boosting the omnibus tax feet. On that marker it is 630 feet rates 10 per cent. The Administralow to the top of the Ellenburger tion's program to pull hospitals and in the discovery well for Ellenbur- special schools out of the financial ger production in the Benedum field, about 11 miles to the north-

The Samedan prospector logged had some gas in the Pusselman section of the Silurian.

Interested operators consider that the No. 1 Neal is on a separate structure from any Ellenburger oil fields in the area surrounding it.

Pegasus Flanker Has Oil From Deep Zone

Republic Natural Gas Company and associates No. 1 American Republics Corporation fee, Central-North Upton County wildcat, one March 1, the end of the special sesand three-eighths of a mile southwest of the nearest completed oil well in the Pegasus field, and 660 a handful of amendments to the feet from north and west lines of section 6. block 40, TP survey, down a number of attempts to ex-T-5-S, produced 158 barrels of new empt products from the additional oil, in 22 hours, swabbing and flow- levy

oped from the open hole in the Ei- carbon black are among the items the total depth at 13,118 feet. That been on the books since 1941. interval had been treated with a

which the 158 barrels of new oil was produced, the well also made 89 parrels of acid water. No signs of formation water were developed.

Cleaning Out Operators were continuing to swab and flow to try to clean the project out and complete it as a producer from the Ellenburger.

During a three and one-half hour interval in the 22 hours of testing No. 1 American Republics flowed steadily and produced 88 barrels of fluid. No information was available as to the shakeout of acid water from that fluid.

This prospector has shown for some sort of preduction from the Fusselman zone of the Silurian. That section has been tested through casing perforations at 12,370-490 After that zone had been treated with a total of 8,000 gallons of acid, it swabbed and flowed 72.9 barrels of oil in 16 hours, with a

small shakeout of acid water. It is understood that operators probably will test the Fusselman further after the full oil yielding ability of the Ellenburger pay has been determined.

C-S Upton Venture Tests In Devonian

Republic Natural and Seaboard Oil Company of Delaware No. 1-A University, slated 12,000-foot prospector in Central-South Upton County, four and one-half miles southwest of Rankin and six miles east of the McCamey field, was bottomed at 9.680 feet in the Devonian and was taking a drillstem

Top of the Devonian is at 9,482 feet. Elevation is 2,545 feet. That makes this venture 882 feet high on the top of the Devonian to the same marker in the Samedan Oil Corporation No. 1 Neal, wildcat six miles to the northeast.

The Samedan project had some slight shows of oil and gas in the Devonian-but drillstem tests on those shows failed to develop any commercial production.

It is located two miles northeast of Rankin, and 330 feet from south and east lines of the northwest quarter of section 26, block B. HE&WT survey. At last report it had reached 11,585 feet in Simpson lime and was drilling deeper.

SE Borden Project Bottoms In Burger

Standard Oil Company of Texas No. 1-6 Griffin, a wildcat in Southeast Borden County, is bottomed in the Ellenburger and preparing to take a drillstem test at 8,817-

8,836 feet. Top of the Ellenburger has been picked at 8.816 feet, at a datum of minus 6.410 feet. The venture has had no possibil

ities of production from any section thus far drilled. Location is 660 feet from north and west lines of section 35, block

25, H&TC survey. It is six miles (Continued On Page 11) Your Midland Community Theater membership is needed send check to 301 W. Missouri,—(Adv).

Louisiana **Braces For** Major Flood

BATON ROUGE, LA. -(AP)—River-wise Louisianians helped 1,400 families to higher ground and braced Wednesday for what may be the worst flood menace since 7:30 a.m. Wednesday.

The floods which already have engulfed more than 650,000 acres in East Central Louisiana are only backwater rises so far and affect mostly lands expected to go under at high river stages.

The levee system is intact. But Col. Charles Holle, New Orleans District Army engineer, declared the Mississippi is brimful from Cairo, Ill., to the gulf and that more rains may produce a flood like the one of 1927. Widespread Evacuation

That was the year the flood waters of the Mississippi and its branches inundated 20,000 square miles in several states, made 600,000 homeless, drowned several hundred persons and caused \$270,000,000 property damage.

Wednesday, the floods already caused by seepage and backing up, mostly of the secondary rivers, covered lowlands scattered over a rough triangle from Natchez, Miss., to Alexandria, La., to a point a little upriver from Baton Rouge. John Russell of the Red Cross at Atlanta, Ga., sent to organize re-

lief, estimated that 1,355 families had been driven from their homes in the 12 worst hit parishes. Nearer Baton Rouge there was an unorganized but widespread evacua-

Initial Session Of Coal Contract Talks Brings No Progress

Going up! Throughout the first half of the twentienth century. scientists probed ever further into the mists beyond the earth's atmosphere. At left above is the weird, multi-balloon contraption in which Dr. Jean Piccard, noted stratospherist, hoped in vain to soar 20 miles above the earth. This test flight, in July, 1937, began at Rochester, Minn., and ended safely near Lansing, Iowa. At right is the spectacular takeoff at White Sands, N. M., of a two-stage rocket, a German V-2 and a smaller, American-built "WAC Corporal." Carrying delicate instruments for sending back cosmic data by radio, the "Corporal" zoomed at the rate of 5,000 miles an hour up 450 miles above the earth, higher than any other man-made object ever

F-CENTURY Abundant Living

YOU ARE MADE FOR LOYALTY TO GOD

The lack of a faith in and loyalty to Something beyond oneself—a Something that gives ultimate meaning, coherence, and goal to life. We, of course, believe that Something is a Someone—God. But whether you believe that 'Something beyond oneself" is God, or not, the basic necessity is the same. In order to be well, in order to be the kind of person you ought to be, you must believe in something beyond yourself and be loyal to it. Why? The answer is that you are made that way-structurally made that way. That way is stamped into your being. Is that the statement of a minister and therefore supposed to be prejudiced? All right, then take the statement of Dr. Jung, who certainly was not prejudiced in a religious direction. Dr. Jung (to a patient): "You are suffering from loss of faith in God and in a future life." Patient: "But, Dr. Jung, do you believe these doctrines are true?" Dr. Jung: "That is no business of mine. I am a doctor, not a priest. I can only tell you that you recover your faith you will

get well. If you don't, you won't." Why did this famous psychiatrist say that? For the simple reason that he had found by experience

its love and loyalty to, or it will break down. I deal with hundreds of cases myself. The last one was We now take up these 15 enemies an intelligent woman with a lovely and face them one by one. The family of four and a faithful husfirst is one that we have been dealband, who because her husband ing with in our preliminary study: would not go to church with her, gave up going herself, gradually lost her faith in God, then lost interest in her family, then nervously broke, and has been in the hands of doctors for months. There is nothing wrong with her, except that, when God faded out, the meaning dropped out of life, and the whole of life sagged with it, with resultant nerve collapse. She has now found God again and with him the basis of health. After she found God, she slept that very night without a sleeping draught—the first time for months. O God, can my lungs do with-

out air, my eyes do without light, my heart do without love, my aesthetic nature do without beauty, my conscience do without truth? No more can I do without Thee. Thou Life of my life. Thou Soul of my soul. I belong to Thee as glove to hand. (From the book "Abundant Living." published by Abingdon-Cokesbury Press of New York and Nashville.

Lucille Wemple Is Program Leader For Dad's Day Function

Lucille Wemple, daughter of Mr. and Mrs. Fred A. Wemple of Midland, will be hostess to her father at the annual Dad's Day and Dinner at Hockaday Junior College in Dal-

Miss Wemple is president of the Dramatics Club and a member of the Drama Club and Glee Club. She is serving as student chairman of the evening program which will be given at the banquet.

Features of the program, which has been planned by the students, are a coffee and open house for the fathers Friday afternoon. The formal banquet will have as its theme, "Dad, Our Sweetheart and King." Following the serving of the dinner, Miss Wemple will make the coronation address, at the conclusion of which each daughter will crown her dad with a red and silver crown trimmed with hearts to show that he

is King of the Evening. Fred Wemple is a veteran of many Dad's Days and was chief speaker at the banquet last year. He will be attending his last Dad's Day since Miss Wemple will be the last of three daughters to graduate from the Hockaday Junior College.

ooperation Is Needed

President Truman has been asked by 150 distinished Americans to help strengthen the United Nations it can bring the world arms race to a halt. In a letter to President, these citizens pointed out that 22 U.S. senars and 104 representatives favor a congressional resolun to give the UN more power.

This idea of meeting the problems of peace and war increasing international authority has captured the agination of many earnest people in and out of Washgton. Proposals range all the way from moderate anges in the UN to sweeping world government.

We certainly must applaud the aims of these people. ainly they are deeply concerned that peace be preserved, d they are willing to expend their own effort to that end.

But almost without exception their proposals suffer e major weakness: A stronger UN or a world governent is not possible without the cooperation and support the Soviet Union. For surely no sensible proponent of ese plans believes the cause of peace would be well rved by leaving Russia out of the key world organization.

Yet any realistic appraisal immediately throws grave ubt on the chances of drawing Russia into an arrangeent which would mean less national power and more orld authority. Experts on the UN often put it this way: we could get the kind of agreement with Russia we need r such a plan, we could find the necessary accord to make e existing UN workable.

In other words, there's nothing so drastically wrong a lot less than original estimates, boss said it was an "infamous lie" ith the present setup that couldn't be largely cured by iderstanding between Russia and the other great powers. o world council, no agency for peace can be successful aless there is basic cooperation among all the powerful H-bombs.

No one sitting in on the UN's founding at San Fransco would have pretended for a moment that the UN they ere creating would work with the great powers at swords' bints. It may well be that the UN could be more strongly ganized. But obviously that change is a secondary step, ot a primary one.

The first order of business is to find a ground for bet- cial facilities and new laboratory r understanding among all the big nations. Only when equipment. nat is achieved will Russia—and the others, too, for that the way to congressional approval, atter—be willing to yield national sovereignty to a higher

They can't be compelled to do this; they must want though only a few House members do it.

Too many people think that a lot of noise is all it ed Congress recently, Senate Makes for a sound argument.

What any man thinks of himself doesn't really count to do the applauding for the Rentil he can prove it.

Quite a few people seem to be finding employment mean it or not."

irveying the unemployment situation.

We're still waiting for the day when a "straight" cket will be a guarantee.

provements" to achieve complete in any partisan document. abor-management equality. The GOP 1948 platform put its foreign policy planks eral grants in aid to the states as last. The new document puts them the solution for all social welfare

The Republicans now define and say they are for what might be inclined to tighten up on waste in called a non-partisan or bi-partisan foreign policy, without using those Republican platform makes an open adjectives. The GOP platform calls bid for vet support by backing up it a "united American foreign pol- all their claims. icy." The Republicans also say they are for the United Nations, the inter-American system and the North Atlantic pacts. In these respects a sensitive spot. But it is doubtful they're just like the Democrats.

But on foreign aid, the Republicans seem to be writing a new ticket. Their new platform says they will be for aid to nations fighting communism only on five conditions: (1) If it is essential to U. S. security. (2) If the American economy can afford it. (3) If it will be effective. (4) If the aided nation can't supply itself. (5) If there is a program for progressive reduction. 'Ifs' To Nationalist China

How any Republican member of Congress will be able to justify further aid to Nationalist China on the basis of those five "ifs" will be something to see. And the Truman administration's refusal to aid Nationalist China is the one foreign policy issue which the Republicans have been beating the Democrats a bay or mouth of a river. over the head with hardest. The Republicans also seem to be

backing away from their 1948 platform planks on foreign trade policy. Two years ago the GOP came out in support of reciprocal trade agreevice February 26 at the Crane the nine-spot. Declarer played the ments. The new platform digs up the old "Republican principle that convene until the next regular sesforeign products of underpaid foreign labor shall not be admitted to dent. his diamonds. Duke Jimerson, accompanied by Mrs. Miller, sang a solo. Business Session

A short business session was held and the group voted to change the date of the "Music for the Connoisseur" program from April 24 to April 18. Members also voted to assist the American Association of University Women in sponsoring another group of musical film sometime this month.

the Texas State Federation of Music Clubs, centered her talk around the motto of the national federation president-"Music Is the Handmaiden of Religion and Religion Is the Handmaiden of Peace." She said the federation has become an important force in both

this country and foreign nations and that its activities are many and varied. "Since music knows no creed. she added, "it readily adapts itself

tr the federation motto." Discussing music in industry, Mrs. Moss pointed out that there is not much emphasis on it in West Texas but that factories and other industrial organizations in larger cities are in favor of it and that it is being used more and more.

Music In Hospitals "It is amazing what music is doing to rehabilitate shattered bodies and minds," Mrs. Moss said when discussing the emphasis that the federation is placing on music in hospitals. This program was begun during the war and is being continued now, she said.

Mrs. Moss told of the work of the legislative department and said it is urging passage of bills along many lines. Many states do not Day, which is February 17. Mrs. have music supervisors, she said, adding that music in Texas schools is exceptionally good. Much of the credit for this goes,

Mrs. Moss said, to Mrs. Joseph M.

Perkins of Eastland, past national federation president, who is readequate music textbooks. Music for young people was stressed in her talk and she discussed the scholarships that the national federation gives each year in voice, piano, organ and violin.

"As" long as we concentrate on our duty to young people," she concluded, "we will be building up something musically.' Dry Eczema

50,000 Miles-No Wear!

• Driven "Twice Around the World!" For 50,000 killing miles, six brand-new cars raced over the hot desert along the Mexican border . . . testing the wear-fighting qualities of amazing Conoco Super Motor Oil. At the end of 50,000 miles of continuous driving, engines showed no wear of any consequence . . . in fact, an average of less than one one-thousandth of an inch on cylinders and crankshafts. Startling prooffactory finishing marks were still visible on piston rings!

2. New-Car Mileage for 5 Years! This punishing road test—equal to 5 years' normal mileage—proved, as nothing else could, that Conoco Super Motor Oil, with proper crankcase drains and regular care, can keep your new car new! Gasoline mileage for the last 5,000 miles of the test was as good as for the first 5,000 miles . . . actually there was an average difference for the fleet of only 4/100 of a mile per gallon!

3. New-Car Power! Quicker Starts! Yes-

the extra protection of Conoco Super Motor Oil keeps that factory flash . . . that showroom smoothness . . . year after year after year! Tommy Hart, the Big Spring scribe, has taken issue with Blondy Cross on who is the greatest high school football player ever to emerge

from West Texas. Blondy recently expounded at length on J. R. Callahan's qualifications for the honor.

Hart cites the record of Midland's Jay Francis as the greatest. We saw both of them in several games and once saw them playing against each other.

Callahan was a great runner with plenty of power. Francis, on the other hand, was a fine break-away man but didn't have pile-driving power.

Taking into consideration the material on the Wink eleven and that on the Midland team, we would have to pick Francis.

Jay didn't need much protection after he got into the opposing team's secondary. He could go on his own. Callahan had Don and Dee Ezell and other fine lineman to help him

and he needed them. Both Callahan and Francis were great backs and it's plenty hard to choose the better one. J. C. Hardwicke, Midland Coun-

Howard Dodgen Says Blount's Bill Would **Rob Texas Sportsmen**

AUSTIN —(P)— Howard Dodgen, executive secretary of the State Game, Fish and Oyster Commission, said a proposed bill in the legisla-ture would take away millions of dollars from Texas sportsmen: He referred to a measure intro-

duced in the House by Rep. Peppy Blount and others to reallocate special funds of various state departments to a state hospital building

If approved, this bill not only would take \$1,500,000 from the commission, Dodgen said, but would stop federal aid the commission receives now at the rate of a halfmillion dollars a year. He explained that federal aid is given a state which earmarks hunting license fees to game conservation and propagation work only.

Dodgen registered his protest at a meeting of the commission here

ORC Members May Earn Points With Extension Courses

A clarification of requirements for earning of points by members of the Organized Reserve Corps has School in a letter to the Unit Instructor at Midland

Under the provisions of the letter, members of the Organized Reserve Corps may take Army Extension Courses in any branch of service and receive credit for both active-duty status and for retirement points

Courses are divided into groups according to the grade of the ORC member. Courses taken must correspond to the reservist's grade, unless special justification exists.

The letter states: "... Credit hours awarded for extension course work will, as long as the current provisions of SR 140-5-1 remain in effect, be the credit hours actually earned in any subcourse of any series of any school; the supposition being that the enrollment eligibility provisions of AR 350-300 are adequate to provide the necessary control and preclude the enrollmert of students in subcourses outside the series appropriate to their grade without sufficient justification.'

Under existing regulations, 27 points per year must be earned to retain active membership in the ORC. Of these, 15 points are automatically earned by remaining in the Reserve, with 12 points to be earned by attending meetings, by outside work, or by extension courses.

To earn retirement credit, mem-

Camping Instructions For Boy Scouts

Six members of Midland's Boy Scout Troop 154 are shown getting some expert advice from Explorer Scouts Earl Chapman, left, and Bob Peters, right, on care of camping equipment. The Scouts were encamped on the courthouse lawn in observance of National Boy Scout Week. Looking on, left to right, are: Scouts Don Greer, John Farris, Larry Williams, James Johnson, Billy Summers and Sammy Coleman. Peters and Chapman are members of the Senior Scout unit, sponsored by the Midland Lions Club. Various Scout units of Midland alternated in camping on the courthouse lawn during the special week.

Anderson Defends Depletion Allowance **Before House Panel**

WASHINGTON-A spokesman for the Texas State School Board told the House Ways and Means Committee Tuesday that the Treasury Department is tinkering with the economic well-being of the petroleum industry and the country as well in recommending a reduction

R. B. Anderson, of Vernon, board chairman and president of the Texas Mid-Continent Oil & Gas Association, described the depletion allowance as the "lifeblood" of the independent operators, and stated that if Congress takes it from them or reduces it, "you cut the ground from under this group of daring men who have meant so much to the economic and social welfare of our

nation." Anderson noted that independent operators have accounted for 78 per cent of the exploratory wells which are essential to the continued discovery and development of oil reserves upon which this country deends for its progress. Security Involved

Even more important, he continued, is the fact that the security of the United States-in peace and

war-is involved. He said: "I cannot avoid the consciousness that we are making a decision here that is vital to the fate of the whole world. We have authorized the construction of a hydrogen bomb. It has been described as an instrument of annihilation-but without adequate fuel, it cannot leave the plains of New Mexico.

"It can never be directed against an enemy unless we have the fucl to protect and deliver it. That fuel must come from a hazardous and daring industry, and from a group of men who are willing to risk everything they have in the search for

Anderson aso declared: "I can only say to you that, if we are to have made available the oil which is required for our defense, and if we are to discover the reserves that are required to insure it, we cannot destroy the incentive that has made possible the discovery and

development of oil in the past." Oil Carries Tax Load Anderson continued: "In our state, 61 per cent of the business and property taxes are paid filing of an application with the by the oil industry. This is in ad-Aeronautics Administration dition to the support given in all for certain improvements at Mid- cities, towns and counties by the oil industry to local governments

and local schools. Texas in severance taxes \$37,000,000. In 1949, it contributed \$87,000,000. "We have just imaugurated a prosaid the plan as advanced would gram of school reform that will cost about \$181,000,000 and the largest

part of this burden will be borne by the oil industry. "Even today our Legislature is in session because it has become necessary to raise additional money for the support of our eleemosynary institutions and of this new burden. the oil and gas industry in Texas will have to accept its share.

Serious Economic Plight "In our state, we are already faced with a serious economic situation because of the imports of oil which during the last quarter of 1949 amounted to 700,000 barrels a day and caused decreases in the daily allowable of 680,000 barrels

per day in Texas. "If we stop the search for oil, if we hamper the activities of exploration and development, the economy of my state and others like it must suffer in direct ratio. This cannot be a wise policy in Congress. It cannot be that the Congress would knowingly establish a policy that would require the states whose public revenues are dependent upon oil to be forced into the field of taxes already utilized by the national government for its source of rev-

The Texan challenged the conention of the Treasury Department that a reduction in the depletion allowance will result in additional revenue for the government. He said: "I am firmly of the opinion that it will take out of the oil business a great many small operators, a great many of the independent wildcatters who have nurtured the industry well. If it takes them out of business, it takes them also from
