

TO THE CITIZENS OF BIG SPRING AND THE SURROUNDING AREA:

On behalf of the Officers, Noncommissioned Officers, Airmen and Civilians at Webb Air Force Base, I would like to extend a personal invitation to you and your families to spend a day with us. Our people are proud of their base and its flying training mission. On Saturday, May 15 (Armed Forces Day) we are having Open House from noon until 4 p.m. with the hope you will visit with us and see the military operation at Webb.

As wing commander, I speak on behalf of all Webbiters in saluting the fine citizens of this area. We believe the Open House will be of interest to the young and the old. We are proud of our part in the defense of our country and we are all hoping to see you on Saturday.

A. W. ATKINSON, Colonel, USAF
Commander

Solons Trim Taxes 'To Pacify' Smith

AUSTIN (AP) — Senators carved \$287 million out of the tax bill today "to pacify" Gov. Preston Smith, who had threatened to veto the measure. The action cleared the way for Smith to sign the bill. The Senate vote to repeal a proposed two-cent gasoline tax increase and 1/2-cent diesel fuel tax was 29-0. The House already has repealed the tax. Sen. A. R. Schwartz of Galveston said "the governor has won this round." But Schwartz said he already was preparing a corporate profits tax for a special legislative session this year or next, which appears inevitable.

PEOPLE LOST The Senate rejected such a tax earlier this session on a 16-15 vote. "What the governor really wants is to substitute for this (gasoline-diesel) tax a tax against students" (college tuition increase), Schwartz said. He said the business lobby had \$250,000 to fight "with their governor" the corporate profits tax.

The corporate lobby won again," Schwartz said, "and the people lost, but they've come out like heroes because they want to roll back the gas tax. The people are being had every day in every way by the people who are running this state."

GOOD TAX The governor said he would sign the tax bill if the gasoline-diesel tax was removed. Fort Worth Sen. Don Kennard said he asked "reluctantly" that the Senate jerked out the gas-diesel tax. "I still think it is a good tax, but this is to pacify the governor so we can go home without a special session."

Kennard, Senate sponsor of the tax package, sniped at the governor Thursday as the State Affairs Committee voted to let the full Senate debate the bill. Lt. Gov. Ben Barnes was nearby calling signals for committee approval. Kennard said technically Smith would have to sign the

original tax bill of \$904 million, then sign the new version—"if he can sign his name twice we're in business. But we might be in trouble there."

Asked if bill copies would be available, Kennard said, "Yes, with color pictures of the governor."

POPULAR PROGRAM "We're abandoning a popular program," said Barnes. "You'll find that out..."

He said the county commissioners in Grayson County had canceled a \$3.1 million bond construction program because of money they were to receive under the original tax bill and now would have to reschedule it. "They were really mad," Barnes said.

But Barnes rejected Sen. Charles Wilson's attempt to delay the bill for 48 hours, tossing aside a "lag" which Wilson hoped to apply to the bill.

The House voted, 143-3, Thursday to drop the gasoline-diesel tax, and the governor said that offered "a ray of hope that a special session of the legislature can be avoided."

Of the total loss of \$287 million in revenue, \$103 million would be from the general revenue fund, but Barnes said counting other sources such as new liquor taxes there would be enough to finance proposed state government spending.

In other legislative action Thursday, the Senate approved and sent to the governor bills which would: —Exempt totally disabled veterans from paying almost all parking fees, including at meters. They would pay only \$1 for special auto license tags showing they were a disabled

veteran. —Give veterans preference among persons seeking state jobs.

The Senate amended and sent back to the House bills which would:

—Exempt veterans who are 60 per cent or more disabled from paying drivers' license fees.

—Change the rate of unemployment compensation from a flat fee to a percentage system, which, opponents said, would raise the maximum payment from \$45 a week to \$59 a week.

Senate bills approved and sent to the House would:

—Exempt the top five per cent of junior college graduates paying tuition to senior state-financed colleges.

—Set a three per cent limitation on special hotel room taxes charged by cities.

—Allow automobile liability insurance to be sold under a \$500 and \$250 deductible plan, a move which the insurance commission said could cut liability rates by 50 per cent.

Senators tentatively approved a House-passed bill cutting taxes for Shiner Brewery at Shiner by 25 per cent. The brewery is the smallest in the United States and is the oldest in the state, being established in 1909.

Rogers Backs President's 'War' Power

WASHINGTON (AP) — Secretary of State William P. Rogers said today that legislation to limit the President's war-making power is of doubtful constitutionality. He said it could weaken presidential ability to act in emergency.

Rogers gave the Senate Foreign Relations Committee a 41-page statement. He did so after chairman J. W. Fulbright, D-Ark., declared that the failure of the executive branch of the government to respond to efforts to reassert congressional authority could cause a dangerous reaction from Congress.

The Senate committee is considering measures proposed by Sens. Jacob K. Javits, R-N.Y.; Thomas F. Eagleton, D-Mo.; and John C. Stennis, D-Miss., that would limit to 30 days and only under certain specific circumstances the presidential authority to commit troops without congressional approval.

Rogers said he agrees with the objective of delineating war powers but opposes three pending proposals because, he said, they would set down too precisely methods of dealing with complex problems and would "narrow the power given the President by the Constitution."

Fulbright noted "The pendulum has begun to swing away from the dangerous practice of presidentially initiated warfare. If the executive branch undertakes to thwart the current effort to restore constitutional balance by all the considerable means at its disposal," the Arkansas Democrat added, "it is entirely possible that Congress will be driven to employ some of the unused means at its disposal, and that, as a result, the pendulum will swing too far, carrying us toward the kind of overbearing congressional role which resulted in the rejection of the League of Nations in 1919."

'No-Fault' Plan Voted

DOVER, Del. (AP) — The Delaware House of Representatives has passed a "no-fault" auto insurance plan on a unanimous vote. The 38-0 roll call vote Thursday followed two hours of favorable testimony by an insurance industry representative and the state insurance commissioner.

Verne M. McGrew, representing an association of Delaware insurance agents, said the legislation could become a model bill for the nation.

It would require the company insuring a motorist to pay his out-of-pocket expenses in an accident. Then the companies involved can decide the matter of responsibility among themselves. Persons involved in an accident could bring separate action on claims, such as disability or pain and suffering.

Leaders Fuss Over Proposed Troop Slices

WASHINGTON (AP) — Sen. Robert P. Griffin of Michigan, the Republican whip, said today if the Senate votes to force a 150,000-man cut in U.S. troop strength in Europe it could derail "the most promising disarmament talks of our time."

But Sen. Mike Mansfield of Montana, leader of the Democratic majority, said he will press his troop cut amendment despite the invitation of Leonid Brezhnev, chairman of the Soviet Communist Party, to NATO nations to start negotiations in European troop and armament reductions.

Mansfield said his effort to force a cut to 150,000 Americans by Dec. 31 will be affected "not in the least" by the Brezhnev suggestion.

He told newsmen he welcomed the negotiations proposal, hopes and assumes President Nixon will accept it.

He said it is immaterial whether the Soviet statement will affect the outcome of the Senate vote on his amendment, scheduled to come late next Wednesday.

"I think we can decide our own policy in this country without outside assistance," Mansfield said.

But Griffin said the Mansfield proposal could undermine any arms reduction talks. "The timing of the Mansfield amendment could not have been more unfortunate or inappropriate," Griffin said.

"The Senate is in danger of going down in history as the Senate which derided the most promising disarmament talks of our time."

Griffin said his check of Senate strength on the troop cut amendment indicates "we've got a tough fight on our hands."

He declined to disclose the exact figures, but said the outlook now is for a close vote.

Wants To Bare Rape Trial

SHAWNEE, Okla. (AP) — A defense attorney Thursday asked permission for his client's entire trial to be recorded on video tape for showing after the verdict.

Attorney Irvin Owen told Dist. Court Judge Lloyd Henry he hoped the presence of television cameras would focus public attention on the jury so the panel would try to be fair in reaching a verdict.

Owen's client, 18-year-old Walter Jefferson, is a Negro accused of raping a white woman.

Owen told the judge the public interest in the case "is heightened by the sexual aspects and the racial overtones of the case."

He emphasized that the trial would be aired on TV only after a verdict and that the woman's identity would not be revealed.

The judge said he would rule Monday.

Draft Call For Texans

AUSTIN (AP) — Texas must furnish 640 men for the draft in June, its part in the national call for 20,000.

State Selective Service said Thursday the men would be chosen from lottery numbers up to 125. An added 1,750 were called up for physical examinations.

Local Residents Invited To Open House At Webb

Commencing with a proclamation by Mayor J. Arnold Marshall, designating this week "Armed Forces Week in Big Spring," Webb AFB personnel and local and area citizens began celebrating.

During the week many Webb personnel, including Col. Anderson W. Atkinson, wing commander, Maj. Phillip Rain and Dean Egan, Chaplain (Capt.) Eugene Welsh, M. Sgt. Robert Butler and T. Sgt. Jim Carnell, ventured into the community to report to civic organizations on Armed Forces Day 1971 — Our Forces for Freedom.

Highlights of this 21st nationwide event will occur Saturday. Area activities will be centered at Webb where between five and ten thousand visitors are expected, according to Maj. Woody Thelin, project officer.

Many continuous events are planned during the noon to 4 p.m. Open House, including exhibits by base organizations such as the Junior Officers Council, hospital fire department, personal (survival) equipment shop, maintenance, weather station, Aero Club, education office, library and credit union.

The Military Affiliate Radio Station will have an exhibit, and personnel are planning on

1971 ARMED FORCES DAY OPEN HOUSE SCHEDULE OF EVENTS

- 12 Noon — 4 P.M.
—Gates open to the Public.
Special exhibits.
—Static Aircraft (including military, aero club, civilian).
—Military Affiliate Radio Hookup (T-1 Hangar)
—Five Watters Club - Ham Radio Operators
—Science Fair Winners (T-1)
—YMCA Gymnastics (T-1)
—Antique Cars
—CAP Mobile Unit
—Various Base Organizations (T-1)
—Open House at John H. Lees Service Club (Bldg. 250)
Special Events
—1 p.m. Lawn Concert
Big Spring High School Band
—2 p.m. Swearing-in Permian High School CAP Cadets and Choral Presentation
—3:30 p.m. T-37 and T-38 Missing Man Flyby
—6 p.m. Softball Game — Webb vs. Reese (Doubleheader)

making MARSGRAMS available to visitors. Big Spring's local cloud seeders, Atmospherics Inc., have accepted an invitation to exhibit, and Ed MacGruder of Midland will fly his Windecker (fiberglass) airplane over for static display.

The John H. Lees Service Club personnel will open their doors all afternoon to the public and will serve cookies and punch to those visiting.

Those interested in the inner working of sophisticated jet aircraft will have a chance to view the complex workings of the T-37 and T-38, at the maintenance teardown exhibit. Three special events have been scheduled for the day. The Big Spring High School Band will give a half-hour outdoor concert in an area near base operations. Col. Atkinson will officiate at the swearing-in of 40 new Civil Air Patrol cadets, all members of the Permian High School choir.

Culmination of events will be a flyover of T-37 and T-38 aircraft in honor of prisoners of war, men missing in action and those who gave their lives in Southeast Asia.

'PLEASE TELL ME THE TRUTH'

Yes, Virginia, There Is A God

VALATIE, N.Y. (AP) — When she was 8 years old, Virginia O'Hanlon Douglas wrote to the New York Sun with a question and was told, "Yes Virginia, there is a Santa Claus."

Thus, Mrs. Douglas, who died Thursday at 81, inspired one of the most widely read editorials in history, a Christmas classic.

RETIRED TEACHER

In ill health in recent years, Mrs. Douglas died at a nursing home. She retired in 1959 after teaching for nearly four decades in Manhattan and Brooklyn schools, much of that time with chronically ill, crippled and blind children. She moved to nearby North Chatham and lived with her daughter, Mrs. Robert Temple.

Virginia wrote in her 1897 letter,

"Some of my little friends say there is no Santa Claus. Papa says 'If you see it in The Sun it's so.' Please tell me the truth, is there a Santa Claus?"

The Sun had a policy of answering all letters, so Francis P. Church was assigned to reply and undertook the task somewhat reluctantly.

He wrote: "Virginia, your little friends are wrong. They have been affected by the skepticism of a skeptical age. 'Yes, Virginia, there is a Santa Claus. He exists as certainly as love and generosity and devotion exist, and you know that they abound and give to your life its highest beauty and joy. Alas! How dreary would be the world if there were no Santa Claus! It would be as if there were no Vir-

ginias. There would be no childlike faith then, no poetry, no romance to make tolerable this existence."

SANTA KISSED HER

Through the years, Mrs. Douglas remained a Yuletide celebrity, often called on to read Church's editorial. She once remarked, "I am anonymous from January to November." But she kept her Christmas spirit. Last Christmas, she was in a hospital where an employe in Santa garb went to her bedside and kissed her cheek.

"Oh boy, what a surprise," she said. "Santa Claus, isn't it wonderful to see you again."

Her survivors include seven grandchildren and one great-grandchild. The funeral will be Monday at Le Clair Chapel.

DIES — Virginia O'Hanlon Douglas, the woman who as a child was told "Yes, Virginia, there is a Santa Claus," died Thursday at the age of 81 after years of ill health. At left she appears in a 1966 photo; at right as a child in

an undated picture. Mrs. Douglas gained fame from a response to a letter she wrote to the old New York Sun, whose editorial reply became a Yuletide classic.

MIGHT COST TAXPAYERS EXTRA \$1 BILLION

SST Grasps An Uneasy Toehold

WASHINGTON (AP) — The supersonic transport has grasped an uneasy Senate toehold as its opponents ponder delaying a final vote and backers, estimate a new start might cost taxpayers an extra \$1 billion.

With its powerful chairman turning from previous support of federal SST subsidies, the Senate Appropriations Committee voted 13 to 7 Thursday to approve House-passed action granting the project \$85 million and giving it one more run through the congressional obstacle course.

STILL DEAD
Sen. Allen J. Ellender, D-La., the chairman, said he doubts

the Senate will accept new costs which he pegged at an extra \$300 million and which the Boeing Co. board chairman said are likely to range from \$500 million to \$1 billion.

"I think it's still dead," Ellender said. "You won't get the votes in the Senate. It's that simple."

A Senate vote confirming two previous anti-SST decisions would throw the whole matter once again into a conference with the House with completely unpredictable results.

Federal aid to the SST was withdrawn in March after Congress debated whether the money could be better spent and whether the plane might dam-

age the environment.

Ellender said he wants to schedule a vote on the issue for sometime next week, if Sen. William Proxmire, D-Wis., leading spokesman against SST, will agree to a time limit on debate.

But Proxmire has said he wants the full implications of extra costs to sink in, and that he is willing to use any of his Senate rights, including the filibuster, to fight the project.

Proxmire assistants said the senator probably will insist on hard cost figures before making any moves.

But no two estimates of those costs are the same.

Boeing Chairman William Al-

len told a news conference that if the SST is revived, all contracts and subcontracts must be renegotiated, and industry must be assured the government will not back away a second time.

Boeing officials said any new contracts must include money not only for production of two SST prototypes, but construction of a full line of the commercial, faster-than-sound, passenger planes.

Sen. Warren Magnuson, D-Wash., estimates the extra starting-up cost at \$150 million to \$200 million. But he said he sees no way the government will subsidize production-line SSTs.

Antelope Changes To Gazelle

GAZELLE, Calif. (AP) — Most towns are named for a founder, or a famous person or

a geographical characteristic. Keeping with that tradition, this town of 125 persons near the Oregon border originally was called Antelope. Hundreds of antelopes ran wild in the area. But there was an Antelope, Calif., and someone suggested a small, graceful antelope. Despite the name, there's never been a gazelle in Gazelle.

LETTERS TO THE EDITOR
Editorial Shouldn't Commend Gov. Smith, Writer Says

To The Editor:

While recognizing your right to publish in The Herald whatever viewpoints you may wish to adhere to and publicize, I think your recent editorial in effect commending Gov. Smith for having vetoed the bill eliminating contributory negligence as a defense in civil suits, and substituting therefore the doctrine of comparative negligence, and eliminating the necessity for a unanimous verdict in civil suits, was erroneous in its viewpoint and represents the trend of thinking which is one of the basic causes of the breakdown of our Courts in being able to handle and dispose of the litigation before them with sufficient diligence to render adequate justice.

Furthermore, I resent the implication of such editorial that the veto of such bill was somewhat justified, regardless of its merits, by the fact that it was supported by attorneys, and therefore was necessarily a bill self-serving to the attorneys, and by reason of such fact should be taken as not serving the public interest.

Of course, such implications as were set out in such editorial are in line with the know-it-all attitude of the greater part of newspaper men, who take the viewpoint that everything that is wrong with our judicial system is the fault of the lawyers or the officers of such judicial system, but then any attempt to reform supported by those very same lawyers is necessarily self-serving. Of course, I do not know the extent of your experience in and as a part of the courts and the mechanics of trial and disposition of civil litigation... but did you ever stop to think that I can't tell you how to run a newspaper, and you're sure as hell not in a position to know what it is that keeps our courts bogged down. While you have a right to express whatever views you may have in editorials, it is obvious that the opinion you expressed in such editorial was not the result of any depth of research into such matters among those who had any experience of the trial of civil cases, and as a matter of fact, if there was any direct selfish interest, expressed and protected, by Gov. Smith's veto, it was that of the vested interest of large insurance corporations, who make no claim to any attempt to seek justice on behalf

of anybody, but merely to make money.

Unquestionably, Gov. Smith is and always has been the fair-haired boy of such interests, and could not have been elected without their money and support, and his veto of such bill was in payment of some of his financial political obligations, and his reason given for such veto was as ridiculously false as the explanation of, and claims of innocence in connection with, the Sharp frauds.

While the self interest of lawyers seems to be sufficient to you as a reason for the veto of such bill, without any serious attempt to discuss the merits or demerits of such bill with reference to the proper workings of the judicial system, it is obvious you do not take into consideration the wide spectrum of opinion of those persons who are probably in the best position to weigh and consider such matters, and who have basically no self-interest — those of the Judges of our District Courts, Courts of Civil Appeals, and the Supreme Court, who are paid directly by the State and do not stand to receive \$1 more regardless of whether the bill became the law or not.

Therefore, for your information, I enclose herewith (a list of letters from jurists), each and all of which express their approval of, and support for the bills attempting to do just exactly what the bill vetoed by Gov. Smith did.

I know that nothing I have said herein, nothing said in any of such letters, and in fact nothing that can be said, can or could change either your viewpoint or the viewpoint of Gov. Smith, just as I'm firmly convinced that both of your view-

points are based upon something entirely different than any attempt to see that the courts actually administer more justice, as distinguished from the protection of vested financial interests.

Yours very truly,
GEORGE T. THOMAS

Red Cross Draws Praise

To The Editor:

On April 23, a late Friday afternoon, my husband, two children, myself and dog had car trouble 30 miles from Big Spring. Our car was towed to a garage. We later found that having a new engine installed was necessary.

Being service people (United States Marine Corps) en route from California to Alexandria, Va., where my husband is stationed, we panicked. Expense of travelling was bad enough, but the prospect of \$500 for an engine was a worry all by itself.

My husband and I discussed the matter over the weekend, and then it dawned on us the only way we could possibly get any help was through the Red Cross. We went to them and met Mr. and Mrs. Nathaniel Roll. He made several phone calls and within a few hours we had the money — to be paid back by us over a period of time, of course, but we could continue on our way. Meanwhile, while the car was being repaired Mr. and Mrs. Roll took us into their home to stay as our finances were getting very low... We since arrived in Alexandria safe and sound. Without people like the Rolls, and our Red Cross, this could never have been made possible for us. Our thanks!

S.SGT. and MRS. BEN JOZWIAK

Nolan County Raises Okayed

A bill introduced by Rep. Jon Davis, Big Spring, raising the maximum salaries to be paid county officials in Nolan County has been passed by the House.

The measure (HB 1053) would allow the commissioner's court to set salaries up to \$12,000 per year for the county judge, county clerk, county tax assessor and collector, justices of the peace and the county commissioners.

Integration Edict Draws New Fire From Governor

AUSTIN (AP) — Gov. Preston Smith sharply criticized Thursday a recent school desegregation decision by U. S. Dist. Judge Wayne Justice, Tyler.

Smith said he was "deeply concerned" that the federal judge told the Texas Education Agency to exercise enforcement powers in all Texas school districts over student transfers and assignments and changes in school district boundaries.

"The court order provides that the Texas Education Agency shall exercise enforcement powers to insure that the independent school districts of our state comply with the court-im-

posed standards," Smith said. "The penalties to be invoked by the TEA range from denial of accreditation status to the denial of state foundation funds.

"In essence, the federal court has ordered the TEA to be the enforcement arm of the federal government. The court has ordered the TEA to assume powers which it has not been granted under the laws of our state and at which at the present time is ill-equipped to handle

Senate Okays Appointments

Two area men are among the appointments confirmed by the Texas Senate.

Dr. Elton Hugh Berkman, Colorado City, was confirmed to a four-year term on the State Board of Chiropractic Examiners, ending Aug. 3, 1975.

Gov. Preston's Smith's appointment of Everett J. Grindstaff, Ballinger, to a place on the Upper Colorado River Authority board was also confirmed. His term runs to Jan. 1, 1971.

Gets Degree

Marshall Jasper Williams, Coahoma, is a candidate for a bachelor of science degree from Howard Payne College in commencement exercises set for Sunday 2:30 p.m. in the Brownwood Coliseum. Charles Edward Jones, Snyder, is a candidate for the bachelor of business administration degree.

ACQUITTED PANTHERS — Curtis Powell and Joan Bird embrace Thursday after they and 11 other members of the Black Panther party were acquitted of bombing and murder conspiracy charges by a New York jury. "I'm dazed — I'm just dazed," said Powell after the verdict. Most of the 13 defendants in the trial had been in jail for more than two years.

13 Panthers Acquitted Of Bombing Conspiracy

NEW YORK (AP) — After an eight-month trial, 13 Black Panthers accused of bomb conspiracy have been acquitted in a verdict reached so swiftly that the jurors surprised even themselves.

The panel, which included five blacks and a Puerto Rican, acquitted the defendants on all 12 counts of an indictment 3½ hours after the case had been turned over to them Thursday.

Goodwin Fund Response Good

Response to the Gary Goodwin fund has been gratifying thus far, the Rev. Jack Clinkscales, pastor of the West Side Baptist church, said today.

Goodwin, now 23, is the victim of cystic fibrosis, which requires frequent and prolonged hospitalization. Until he was 21, the National Cystic Fibrosis Foundation was able to help financially, but since that time, his parents have incurred an insurmountable obligation.

Friends, and many others concerned about the plight of Gary, have been contributing to the Gary Goodwin fund, launched by the West Side Baptist church as agent. An account has been opened in the First National Bank where all these funds were deposited and disbursed for the intended purposes.

So far said the Rev. Clinkscales, friends have given \$1,237.82, and every day brings more gifts. Obligations so far are nearly five times this amount.

Those who would like to have a part in this good neighbor project may send their gifts to the church, or to the First National Bank clearly marked Gary Goodwin Fund.

I'M DAZED

"I'm dazed—I'm dazed," said Curtis Powell, one of the de-

The bidding:
 South West North East
 1 ♠ 2 ♣ Pass 2 ♥
 3 ♠ Pass Pass Pass

Opening lead: Queen of ♠

Today's hand presents an interesting part-score battle in which the defenders ultimately emerged as the victors.

South opened the bidding with one spade and, to West's overall of two diamonds, I cannot give my approval—the state of the score might serve to be mild mitigation of his action. North passed, of course, and East bid two hearts. South now chose to jump to three spades—first in an effort to complete the game and secondly, with the idea of creating an impression of great strength. South was satisfied that his maneuvers had landed him an undoubted contract, but the defenders had to put forth

their best efforts to defeat him.

West opened the queen of hearts and South promptly played the ace from dummy. A better play would have been to duck for, unless East overtakes the heart and shifts to a trump, declarer is virtually home on the hand. However, South feared that West's lead might be a singleton.

At trick two, a small diamond was led from dummy and when East followed with the deuce, South played the ten which dislodged West's ace. West returned the deuce of hearts and East was in. It appeared to him that his partner was trying to establish some trump tricks, so he continued with a third round of hearts. South ruffed with the ten of spades, and West quite properly refused to overruff, discarding a club instead.

The queen of diamonds was led from the closed hand next in the hope that West would have to win the trick, for it was now clear to South that another heart lead thru him could cause considerable damage. When East turned up with the king of diamonds, he played a high heart forcing declarer to ruff with the jack of spades. West was able to apply the finishing touch by discarding another club because, in so doing, he established a second trump trick for himself in the form of the nine of spades. The result for East and West was a well earned one trick set.

Webb Computer 15th In ATC

April 22, 1966, marked the arrival of Webb's Univac 1050 II computer. Webb's installation was the 100th Univac throughout the Air Force and the 15th in Air Training Command.

The computer was positioned in Base Supply and is used to direct activities of the vast supply system at Webb AFB.

Belda Moving To Temple VA

V. J. Belda who for nearly four years was director of the Veterans Administration Hospital here, is being assigned as director of the large VA Center in Temple, it was announced today through the Administration.

Belda recently has been director of a VA hospital in Kansas City, and prior to that directed an institution in California. He went from here to the California assignment in February, 1964. He had come here in May, 1960.

The Temple Center has 700 beds in its hospital complex, plus 392 domiciliary beds. It is one of the major such centers in the Southwest.

Horoscope Forecast

TOMORROW
 —CARROL RIGHTER

GENERAL TENDENCIES: Until noon you are apt to misunderstand others or to give yourself the wrong impression. Afternoon, you may have more security by aligning yourself with those who are experienced in fields that interest you.

ARIES (March 21 to April 19): Being careful in speech and in writing is important now or you could give a different impression from what you really intend. Excellent results come from correct communication. Re-checking transportation arrangements is wise.

TAURUS (April 20 to May 20): Stop all that secret angling, or you could lose some valuable associate as a result of a new approach to important matters. Will succeed. Don't take on problems of others.

GEMINI (May 21 to June 21): Pay no attention to blurt words of another person who is unhappy in a.m. Then you can get much done. Keep promises. Don't argue with loved one in the morning, then p.m. can be happy. Show your affection to loved ones.

MOON CHILDREN (June 22 to July 22): Make sure you keep promises you results. Go out of your way to please others and all is well.

SAGITTARIUS (Nov. 22 to Dec. 21): Forget pleasure for today and devote time to practical affairs or meet with practical people—you can then get ahead financially. Update your budget. Some repair to property is good, also.

CAPRICORN (Dec. 22 to Jan. 20): A day to do pretty much as you please, but avoid that higher-up who is very demanding of you. Social appointments are favored. You must repay some obligation without further ado.

AQUARIUS (Jan. 21 to Feb. 19): Plan some course of action that will make the future better for you and yours. Get needed advice from experts. Much fun can be yours later in the day with people you like, so make appointments early.

PISCES (Feb. 20 to March 20): Ideal day to get in touch with as many friends as you can and show you are devoted. Do some entertaining that will repay you past favor and give you pleasure. Don't be extravagant, though.

LEO (July 22 to Aug. 21): Instead of going out on some foolish tangent in a.m., figure out how to put your affairs in better order; finish tasks of home. Cornering data you need should not make you lose equilibrium. Keep steady.

VIRGO (Aug. 22 to Sept. 22): Forget that grumpy advisor with work to do who tries to keep you from going out all that secret angling, or you could lose some valuable associate as a result of a new approach to important matters. Will succeed. Don't take on problems of others.

LIBRA (Sept. 23 to Oct. 22): Even though outsiders want you to get about with them, your best bet is to stay at home and make kin happy, improve conditions there. Plan important projects now for the future.

SCORPIO (Oct. 23 to Nov. 21): Forget boring tasks and enjoy the company of friends and relatives today and tonight. Sociability can lead to excellent results. Go out of your way to please

Can You Grow 'Big Pumpkin'?

The "Giant Sunflower and Big Pumpkin" contest will be held Tuesday when the club met at the U.S. Experiment Station.

Rainbows Announce New Slate

Cindy Williams was elected worthy advisor of Assembly 60, Order of the Rainbow for Girls, during Tuesday's meeting at the Masonic Temple.

Other officers elected were Mary Alice Terrazas, worthy associate advisor; Susan Smith, charity; Sandra Dickenson, hope; and Pam Wheeler, faith. They will be installed at 8 p.m., June 5 at the Masonic Temple.

Gayle Webb, current worthy advisor, announced that Mr. and Mrs. Carl McGlothlin and daughter, Ayn, are hosting a chicken-spaghetti supper from 5 to 7 p.m., Friday, at their home, 2703 Apache, for members of the assembly.

Plans were discussed for the Texas Grand Assembly slated June 14-16 in San Antonio. Approximately 35 Rainbow girls will attend from Big Spring.

Club Holds Luau, Fashion Show

The TOPS Pound Rebels held a luau at Birdwell Park Tuesday evening then went to the YMCA where members presented a fashion show with a humorous note.

Styles included the box look, plunging fronts and bare backs maternity fashions, a black evening dress and a dress made of newspapers.

Models were Mrs. Al Scott, Mrs. Elton Carlie, Mrs. Lewis Collins, Mrs. Donald Carlisle, Miss Berva Kirby, Mrs. W. J. McNew and Mrs. Harold Bell. A Hawaiian dance was performed by Mrs. Dee Aaker.

Mrs. Carlie presided, and the pledge was led by Mrs. Bell. The April queen title went to Mrs. Collins, with Mrs. N. B. Perkins as runner-up. Guests were Mrs. Aaker, Mrs. E. E. Jones, Miss Amber Jones and Mrs. M. A. Long. The next meeting is at 7 p.m., Tuesday at the YMCA.

The youth gardening contest, which will get under way within the next two weeks, involves the growing of sunflowers and pumpkins by young people, with seeds being provided by the club.

Paul Gross, Howard County agent, was guest speaker Tuesday, explaining the use of native material in landscaping. He gave general gardening tips during a question and answer period.

L. R. Saunders Sr. was a guest. The next meeting will be June 8.

Hear Talk On Pollution

Mrs. Paul Kionka discussed background of the pollution problem, along with aids to its solution, when she was guest speaker Tuesday evening for Affiliates 24, Texas Nurses Association.

The group met at the home of Miss Faye Wells, Coronado Hills Apts., for a luau, with the dinner being served poolside. Each guest was presented a lei.

Mrs. Fannie Clark presided, announcing that a five-county regional seminar on officer orientation will be held here June 16-18 at the Veterans Administration Hospital. The next meeting will be June 8.

Lodge Instruction Given Tuesday

Mrs. A. F. Hill, lodge deputy, conducted lodge instruction Tuesday evening for Big Spring Rebekah Lodge 284.

Certificates of perfection were presented to Mrs. A. R. Cadzow, Mrs. W. A. Majors and Mrs. T. V. Neal. Thirty-four visits to the sick were reported.

Mrs. Neal, noble grand, introduced two guests, Mrs. Henrietta Warren of Levelland and Mrs. Geneva Newman of San Angelo. Recognized for having birthdays in May were Mrs. Newman, Mrs. Majors and Mrs. Nancy Houser. Refreshments were served by Mrs. Earl Wilson, Mrs. S. A. Wilson and Mrs. Melvin Newton.

MIXED BAG — Tuesday's fashion collections in New York produced a mixed bag of new designs, including, at right, a multi-colored cartoon character dress by Stephen Burrows; and, at left, an ensemble of black satin pants, black and white diamond print sweater and a small red satin hat, all by Valentino.

Hints From Heloise

Dear Heloise: If you want to keep your hamburgers nice and juicy, add some tomato juice to the ground beef... then cook as usual.

This keeps them moist as well as giving them a wonderful and an entirely new and different flavor... Jerry Reese

Well, well, well! Bust my britches (as the old folks used to say), if it doesn't work! Scrumptious... Heloise

Dear Heloise: I had two wall lamps that could no longer be repaired and the only place for them was out.

I took out all the electric wiring, removed the top part of the socket (where the light bulb would normally be screwed in) and put in candles. They made the most marvelous candle holders you have ever seen.

If you want to use large candles remove all of the socket. The candles will fit perfectly.

I'm now eyeing a pair of old boudoir lamps. They would make such a lovely pair of candle holders for my table. But they just keep right on burning brightly.

Patience will win — I hope! Jean Valenti

LETTER OF LAUGHTER
Dear Heloise: I wonder if everyone else has a special "pattern" for eating corn on the cob? A Friend

Well, now, you know you're right! I can think of a number of varieties myself: there's the musically inclined corn-eater (harmonica style — from side to side); lumber jack variety (round and round like log rolling); chipmunk style — that's hit and miss. And then, of course, there are those poor unfortunate people whose teeth come out at night. Now that's a real challenge!

Everyone has to do their own thing — even when it comes to eating corn! Right? Heloise

(Write Heloise in care of the Big Spring Herald.)

B&PW Appeals For Items Used In Old Museum

An appeal for information concerning whereabouts of some items formerly displayed in the old park museum was made by Miss Wilrena Richbourg at Tuesday's meeting of the Business and Professional Women's Club.

The club operated the museum for several years, and after it closed, articles were stored in various places. Some of the items have not been located, and the club would like to secure them for the new museum.

The group met in the Pioneer Gas Flame Room for a salad supper with Mrs. J. B. Apple presiding. She announced that committees will be appointed to work on the district conference slated here Oct. 5-6 at Holiday Inn.

Delegates to the state convention in June at Fort Worth are Miss Movelda Rhine, Mrs. Charles Summers and Mrs. Apple.

The club installation will be held May 25 at Big Spring Country Club with Miss Rhine, district director, conducting the installation.

Circles Combine For Luncheon

Mrs. T. C. Richardson led the program, "A Home," for a joint covered dish luncheon of the Lalla Baird and Martha Foster circles, Wesley United Methodist Church, Tuesday in the home of Mrs. W. D. Lovelace, 2200 Carl. Miss Helen Ewing presided.

Participating in the program, which told about the significance of Mother's Day, were Mrs. Ben Boadle, Mrs. Ray Anderson, Mrs. Jamie Cofer, Miss Ewing, Mrs. Alta King, Mrs. Richardson, Mrs. G. C. Broughton and Mrs. Homer Thorp.

The invocation was by Mrs. J. B. Hollis, and Mrs. Thorp led prayer. The Lalla Baird Circle will meet at 9:30 a.m., Tuesday, in the home of Mrs. Dub Bryant, 1602 Tucson; and the Martha Foster Circle will meet at 9:30 a.m., Tuesday, in the home of Miss Ewing, 709 E. 15th.

Mrs. M. Norton Joins Sorority

Mrs. Mary Norton became a member of Beta Omicron Chapter, Beta Sigma Phi, in a ceremony Monday evening in the home of Mrs. Bobby Hughes, 2194 Cecilia.

Mrs. Edward Cole presided, and the following new officers were installed: Mrs. John Knoepfel, president; Mrs. Sid Smith, vice president; Mrs. Bill Fox, recording secretary; Mrs. Billy Truette, corresponding secretary; Mrs. Jack Aultman, treasurer; Mrs. Bill McIntosh, extension officer; Mrs. Hughes, parliamentarian; and Mrs. Cole and Mrs. Leslie Mills, BSP city council representatives.

Mrs. O. D. O'Daniel gave a program about the importance of interesting children in music at an early age.

The chapter will meet for a salad supper at 7:30 p.m., May 24. Phi pal gifts will be exchanged and a white elephant sale held.

Announce Birth

KNOTT (2C) — Mr. and Mrs. Quinton Aihart announce the birth of a daughter May 7 at the Medical Arts Hospital in Lamesa. The infant weighed 6 pounds and 6 ounces.

Mrs. F. Mays Heads Historical Committee

Mrs. Floyd Mays was named chairman of the Howard County Historical Survey Committee at its organizational meeting Tuesday evening at the Heritage Museum.

Other officers elected were Burl Cramer, vice chairman; Mrs. Jimmy Morehead, secretary-treasurer; Mrs. Akin Simpson, reporter. Chairmen of the subcommittees are Miss Helen Hurt, historical preservation committee; Mrs. Tom Barber, historical markers; Mrs. Roscoe Cowper, historical appreciation. Members of the Heritage Museum board will be considered members of the Historical Survey advisory board.

Mrs. Cowper projected colored slides she had made of markings on scenic Mountain (Big Spring State Park). She also alluded to the probability that Cabeza de Vaca made his way to Big Spring in 1535, and that Coronado may have swung this far south on one of his journeys.

The committee will meet the second Tuesday of every month at the museum at 7:30 p.m., and anyone interested in

Awards Go To PTA Workers

"Gilded Keys" was the theme of the Gay Hill Parent-Teacher Association installation and awards meeting Tuesday at the school.

Mrs. Jack Brown, District 16 vice president, installed Mrs. J. M. Wilson, president; Mrs. James Ellison, vice president; Mrs. Bob Wegner, secretary; and Mrs. Phillip Riddle, treasurer.

George Archer, principal, presented certificates of appreciation from S. M. Anderson, superintendent, to Mr. and Mrs. Ross Westbrook, Mrs. R. J. Coleman and Mrs. Riddle. Perfect attendance awards went to Mrs. S. C. Rhoton Jr., Mrs. Archer, Mrs. Brown, Mrs. F. C. Juneck, Mrs. Coleman, Mrs. Riddle, Mrs. Ellison, Mrs. Bill Hyden, Mrs. Wilson and Mrs. Jack Buchanan.

Mrs. Westbrook presented gifts of appreciation to Mrs. Archer, Mrs. Buchanan and Mrs. Fay Newman, teachers; Mrs. W. A. Bynum, teacher's aide; and James Puga, custodian.

Outgoing officers were given gifts from the PTA by Mrs. Rhoton and Mrs. Reiss Fleckenstein, hospitality chairman, expressed appreciation to the group.

Appointed to audit the treasurer's books were Mrs. Archer, Mrs. Juneck and Mrs. Rhoton, and the secretary's books will be audited by Mrs. Riddle, Mrs. Ellison and Mrs. O. R. Crow.

Mrs. Archer announced that pre-registration for first grade will be at 2 p.m. Friday. Refreshments were served by Mrs. Fleckenstein, Mrs. Coleman, Mrs. Buchanan and Mrs. Hollis Puckett. The third and fourth grades won the room.

preserving the history of this area is urged to attend.

Mrs. Tom Barber, historical markers; Mrs. Roscoe Cowper, historical appreciation. Members of the Heritage Museum board will be considered members of the Historical Survey advisory board.

Mrs. Cowper projected colored slides she had made of markings on scenic Mountain (Big Spring State Park). She also alluded to the probability that Cabeza de Vaca made his way to Big Spring in 1535, and that Coronado may have swung this far south on one of his journeys.

The committee will meet the second Tuesday of every month at the museum at 7:30 p.m., and anyone interested in

New Member For International Club

Mrs. Dieter Farmer became a member of the International Women's Club Wednesday in the home of Mrs. Charles Townsend. Mrs. Everardo Vela was a guest. The next meeting is at 7:30 p.m., June 9 in the home of Mrs. Jack Aultman, 217-B Langley.

VIEWED AS PURGE BY PRESIDENT SADAT

Shakeup In Egyptian Cabinet

The Associated Press

Observers today viewed the sweeping shakeup in the Egyptian Cabinet as a purge by President Anwar Sadat to solidify his control.

Six cabinet ministers, including the defense minister, Lt. Gen. Mohamed Fawzi, resigned Thursday night along with three high-ranking officials of the Arab Socialist Union, Egypt's only political party.

UNITY URGED

Cairo Radio broadcast a statement by Industry Minister Aziz Sidky, a Sadat supporter, appealing to the Egyptian people to maintain national unity "in the face of those trying to sow sedition in the ranks."

Sadat scheduled a broadcast tonight.

It was the first major breach among Egypt's leaders to come to the surface since Sadat took over in September after the death of President Gamal Abdel Nasser. The rift began with Sadat's firing of Ali Sabry, his pro-Soviet vice president, earlier this month.

Although more dismissals or resignations had been expected, Israelis and other Arab watchers were surprised at the extent of the shakeup and especially by the resignation of Fawzi, who was not known to have any pronounced political leanings. Informed sources said he apparently had been working smoothly with Sadat on strategy against Israel.

KEEP SILENT

Israeli experts on Arab affairs said all of those who resigned leaned toward extremist and pro-Moscow lines. "This is a bitter pill which the Soviets will have to swallow—and still keep silent," wrote Oded Zorari of the newspaper Haaretz.

Ehud Yaari of the semi-official Davar said the shakeup was "tantamount to a coup d'etat," and the key to future developments was in the hands of the army.

Sadat prefaced the purge with a series of visits Tuesday and Wednesday to army commanders and troops along the Suez Canal front, evidently to assure himself of their support. And he named the army chief of staff, Maj. Gen. Mohammed Sadek, to replace Fawzi and promoted him to lieutenant general.

POLITICAL FOES

The shakeup was seen in Bet-

ut as an obvious attempt by Sadat to rid himself of his political foes.

Another of those quitting was Egypt's top policeman, Interior Minister Shawari Gumah. His resignation was the first announced, shortly after Sadat decreed an immediate end to all special police surveillance including wiretapping. Gumah was replaced by Mahmoud Salem, former governor of Alexandria.

Other cabinet ministers who resigned were Sami Sharaf, the chief of the intelligence services; Housing Minister Saad Zayed; Electricity Minister Helmi el Said, an Information Minister Mohammed Fayek. Fayek was particularly close to Sabry.

The three officials of the Arab Socialist Union who resigned were members of a power group formed by Sabry. They were Labih Shukair, speaker of the National Assembly; Abdel Mohsen Abul Nur, secretary general of the party, and Dia Eddin Daoud, the party's No. 2 man. Their resignations had been rumored earlier this week.

ISRAELI SETBACK

Sabry had opposed Sadat on a number of issues, including his dialogue with the United States over a possible settlement with Israel.

Sadat dismissed Sabry on May 2, just four days before the arrival in Cairo of Secretary of State William P. Rogers on his peace-seeking tour of the Middle East. But there was no indication of what effect the Egyptian leadership shakeup might have on future negotiations with Israel.

Israel meanwhile suffered a setback of sorts as the foreign ministers of the six European Common Market countries approved a controversial report on the Middle East that Israeli Foreign Minister Abba Eban had condemned as "unfortunate and inopportune."

The text of the report was not disclosed. But it reportedly calls for complete withdrawal to the borders Israel held before the 1967 war, and for a demilitarized zone on Israeli as well as Egyptian territory.

Eban had told the Knesset, Israel's parliament, that he hoped the report would be rejected.

'Tumbleweed' Featured In Magazine

Bob Lewis, Big Spring, perhaps better known over the state as Tumbleweed Smith, is featured in the current issue of Baylor Line, the Baylor University alumni magazine.

Harry Marsh, member of the Baylor journalism faculty, authored the story about Lewis' crisp daily radio spice about people in Texas.

"If you still like Texas stories," he wrote, "try Tumbleweed Smith. (He) tells only true Texas stories and he doesn't do it around the campfire or at a Saturday night barn dance. He does it on the radio — five days a week. And he doesn't bore you to death. Each story lasts only 2½ minutes and is preceded by and concluded with a catchy little guitar tune that Tumbleweed and his wife Susan, whipped up and a friend recorded."

"Tumbleweed is plain old Bob Lewis, who got his BA at Baylor in English and drama back in 1957. He spent a summer hitchhiking around the nation, then two years with the Army Security Agency in Europe. The rest has been radio news: in Houston, Des Moines, at the University of Missouri where he got a masters in journalism, and most of the time in his present home in Big Spring."

The story tells how Lewis' first mail out of tape netted him one customer. When he got 10 he resigned from his radio job and hit the road. Now he sometimes travels 2,300 miles in four days to compile "the Sound of Texas," a crackling report of off-beat vignettes of the Lone Star State.

WEATHER EXPERT SAYS: Islands Afford Little Hurricane Protection

CORPUS CHRISTI (AP) — A weather expert says barriers like Padre and Mustang Islands afford coastal areas no protection from the giant tides accompanying a hurricane.

This opinion was advanced Thursday by Dr. Robert Simpson, director of the National Hurricane Center at Miami, Fla.

He spoke at the annual hurricane preparedness conference, held on the eve of a new storm season.

HE'S HORRIFIED

Asserting he is horrified by proposals for offshore barriers to blunt the impact of tidal storm surges, Simpson said, "There has been a misconception for years that a reef just offshore offers magic protection to residents of the inner coastal area."

He was asked afterward if this meant that long and slim Padre and Mustang Islands likewise provide no protection for the Lower Texas Coast and Coastal Bend.

At first he said the islands provide "no significant" protection. Then he added, "Actually, I would say none."

Simpson said that contrary to

popular belief, hurricane surges are not giant waves but huge masses of water forced ahead of such storms by wind pressure on the surface of the sea.

The tidal waters are shoved into bay areas through available channels under "tremendous" pressure over a period of many hours, he said, and reach their greatest height slightly ahead of the highest winds.

FLOOD DAMAGE

In some cases, Simpson said, these surges push into one area of a bay and then return with great force to another area as the wind direction changes. Such reverses, he said, help perpetuate a belief that hurricane surges (tides) are similar to what are commonly known as tidal waves.

Simpson said the islands do offer some protection against hurricane "waves," which are the top layers of the surges.

He added, however, that the effect of the waves normally is limited to the immediate land mass upon which they break, and their effect is primarily erosive.

Primary damage from the surges is due to flooding of large areas of land, he said.

Salutatorian honors went to Bonnie Currey, daughter of Mr. and Mrs. G. D. Currey, Star Route, Lamesa, with a grade average of 91.36.

Mesquite Control Study Has Come A Long Way

Control of mesquite on Texas rangeland has come a long way in the past few years, thanks to an intensive brush control research program being conducted by personnel at Texas A&M University Agricultural Research and Extension Center at Lubbock. Studies show that a combination of 2, 4, 5-T and picloram is especially effective in the battle against mesquite.

Cecil Meadors Jr., a member of the brush control team at the center, reports that aerial application of a combination of one-fourth pound of 2,4,5-T and one-fourth pound of picloram per acre gave an average mesquite kill of 44 per cent of 16 West Texas locations, during May and June of 1968 and '69. Results ran from a low of 23 per cent to a high of 76 per cent kill.

At the same locations during the two years, a combination of one-fourth pound of 2,4,5-T and one-fourth pound of banvel gave an average kill of 29 per cent while treatment with one-fourth pound of 2,4,5-T alone resulted in an average kill of 24 per cent.

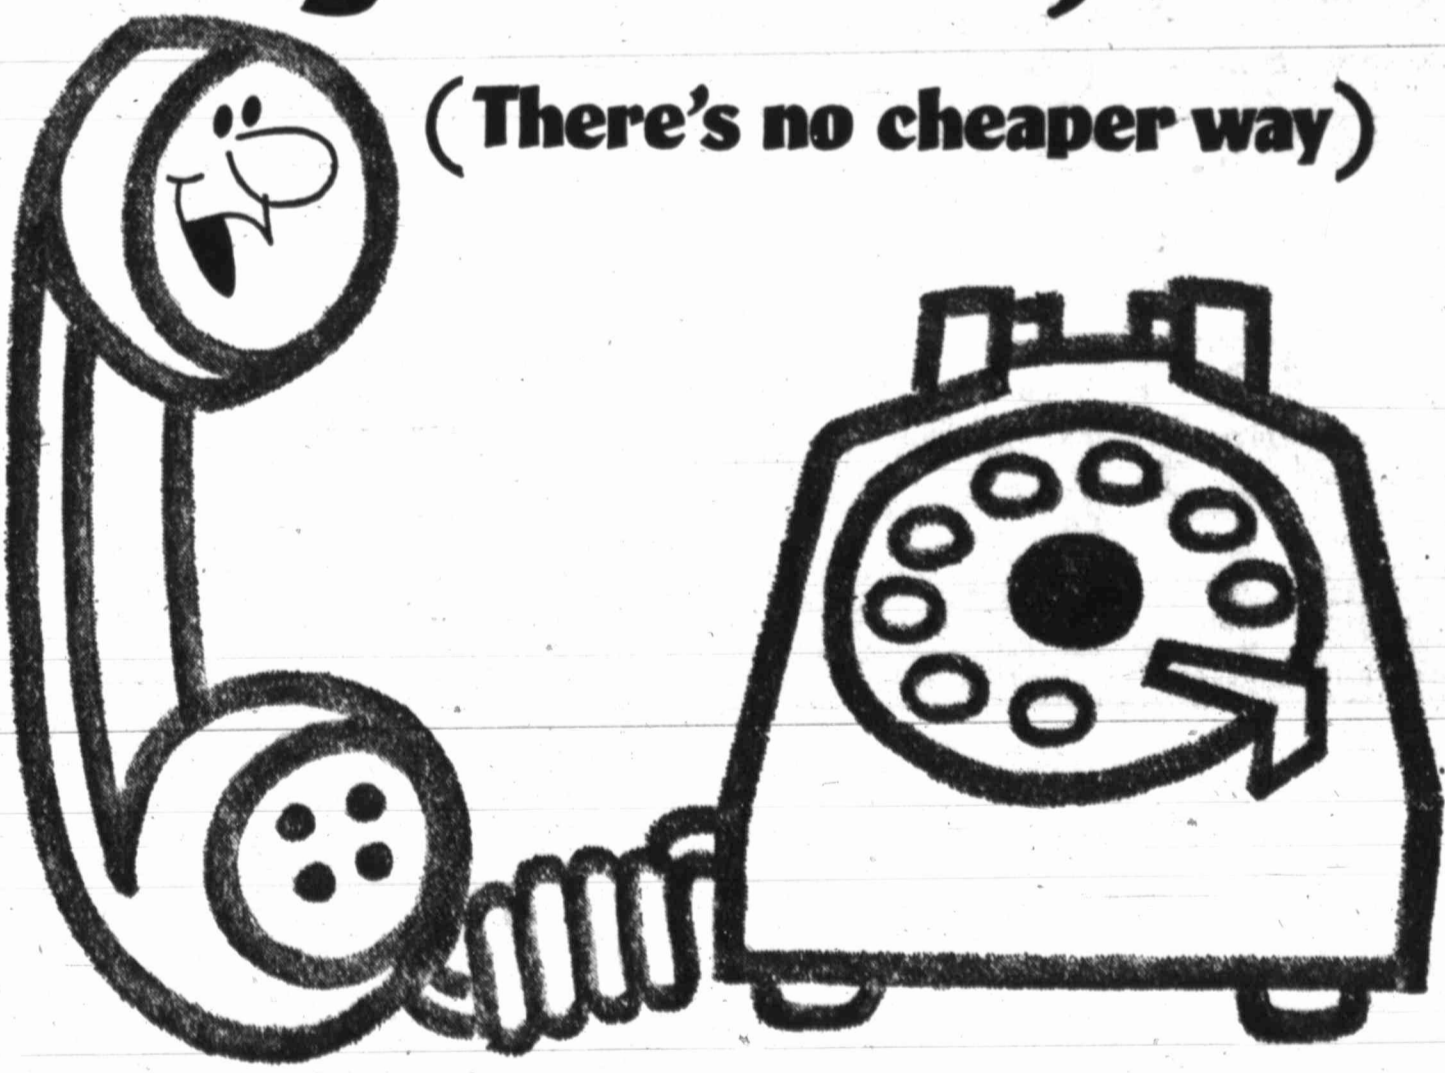

According to the researcher, all three treatments were applied as an emulsion of one gallon of diesel oil and three gallons of water per acre. Aerial application began about 60 days after the mesquite started leafing while growing conditions were favorable for foliage development. Different growth types were treated, including small, many-stemmed plants, small trees and shrubs, medium to large trees and variable regrowth which had occurred following previous treatments.

Soil types at the different locations included deep sand, sandy loam, silty clay loam, clay loam and heavy clay. Annual rainfall ranged from a low of 10 inches to a high of 25 inches.

"All of our test results were obtained during a period ranging from 18 to 30 months following treatment," points out Meadors. "The wide variations in the results indicate that growth types, soils and rainfall are still major factors that influence the percentage kill of mesquite."

JURORS PRODDED BY JUSTICE DEPARTMENT

Returning Mayday Indictments

WASHINGTON (AP) — Last week's Mayday antiwar demonstrations are continuing to send ripples across the nation's legal and political surface and there are indications they will continue to spread.

The latest developments came Thursday in the form of indictments, suits against federal and Washington police officials and a new promise of another round of civil disobedience June 1.

RIOT RAPS

Indicted Thursday for allegedly doing here what he was convicted of doing during the tumultuous 1968 Democratic

National Convention in Chicago was Yippie Abbie Hoffman. He was charged with crossing state lines to incite a riot.

Concurrently, a grand jury in the District of Columbia Superior Court indicted a Connecticut pacifist on charges of assaulting a Washington police officer with a portable loudspeaker. He is Bradford Lyttle Jr., a coordinator of the People's Coalition for Peace and Justice.

Hoffman also was accused of interfering with a police officer during a riot, a violation of federal law. The charges against Lyttle are local ones developed by the Justice Department.

Atty. Gen. John N. Mitchell, whose chief of internal security, Robert A. Mardian, is directing the government's investigation of Mayday and Coalition leaders, reportedly told newsmen Thursday.

PRETTY BUSY

"A lot of these people are going to be pretty busy in court the next few months. The grand jury sitting here will undoubtedly come up with more information that will lead to indictments of more defendants."

Leading to the indictments against Hoffman and Lyttle was the unsuccessful attempt

by antiwar demonstrators to block traffic into the nation's capital May 3.

In Hoffman's case, the government described the situation as a riot; in Lyttle's it did not. Hoffman and Lyttle already had been arrested, bonded and released on the charges.

CLOSE FRIEND

"I had about as much to do with the demonstrations in Washington as the Capital bombing or the earthquake in Los Angeles which I also expect to be indicted for," Hoffman said in Madison, N.J., Thursday night.

Also charged but not yet indicted in connection with the Mayday demonstrations are two other alumni of the Chicago conspiracy trial in which five persons, Hoffman included, were convicted of interstate travel to promote a riot.

The two are Mayday leader KENNIE DAVIS and John Frounes, a former University of Oregon chemistry professor and a close friend of Davis. They are charged with conspiring to violate the civil rights of Washington area residents and interfere with federal workers by blocking traffic.

Steps taken by police to abort the announced tieup, including suspension of standard arrest procedures while hauling in thousands of persons, were cited in the suit filed against Mitchell and Wilson Thursday.

Expected to be the first of many such court actions, the suit contends arrests of the 15 plaintiffs were illegal and part of a government conspiracy "to disregard and deny the legal and constitutional rights of citizens."

Each seeks \$60,000 in damages, nullification of charges and destruction of arrest records. Each contends he was innocent of any wrongdoing when arrested.

Announcing plans to resume civil disobedience and nonviolent action against the war, a coordinator of the People's Coalition for Peace and Justice said at a news conference Thursday: "I expect arrests."

The coordinator, Carl Zeitlow, said no attempts will be made to disrupt traffic during the new wave of protests.

Sixth Graders Enter Contest

Local winners have been announced in the Equitable Life Assurance Society's 1972 art calendar contest.

They are Ricky Touchstone, Kentwood Elementary, son of Mr. and Mrs. Jackie Touchstone; Sally Bunn, College Heights; Mr. and Mrs. B. A. Bunn; and Gary Howell, Kentwood, Mr. and Mrs. Kenneth Howell.

They will be given art supplies by local agents for Equitable Life Assurance Society, Louis McKnight and Morris Holmes.

All local entries, regardless of whether they were winners here, will be sent to New York for participation in the national contest.

There will be 13 national winners, each receiving \$300. These winning paintings will be reproduced on the back of the calendar cover.

Participants in the annual contest are sixth graders from all over the nation. This year's theme was "Beautiful Places and Things."

Each of 12 runners-up will win \$50, and their paintings will be reproduced on the back of the calendar cover.

Legislators Agog Over Redistrict Proposals

AUSTIN (AP)—There is nothing more dear to a politician than his home district, and it's those districts that a Senate committee will start considering today.

Sen. J. P. Word of Meridian, chairman of the Senate Redistricting Committee, said Thursday he will name his subcommittees which will draw the new congressional and legislative districts.

Word said earlier his committee might wait until the last week of the session to pass out redistricting bills for the Senate floor debate.

SEEK RULING

Meanwhile, members of the House minority, the "Dirty 30", have written the chief justice of the U. S. Supreme Court, asking for a ruling soon on the constitutionality of certain multi-member districts.

The court now has such a case pending before it.

"An immediate ruling by the court... prior to decennial redistricting would avert a costly special session of this and other state legislatures," the letter said.

"Texas and many other states have utilized selective multi-member district plans which tend to diffuse and dilute minority, political, ethnic, and racial representation," they said.

The districts, although they will probably be changed several times before a final bill is passed, now reflect these changes:

DIST. 21 (Rep. O. C. Fisher, San Angelo, Democrat) — gains western part of Bexar, Mason, McCullough, Menard, Concho, Coke, Sterling, Glascock, Ward, Pecos, Terrell, Brewster, Presidio, Maverick, Zavala and Medina counties; loses Ector.

DIST. 23 (Rep. Abraham Kazen, Laredo, Democrat) — gains Zapata; loses Duval, Jim Wells, Maverick, Zavala, Live Oak, Bee and Goliad.

IN ANGELA CASE — Superior Court Judge Richard E. Arnsperger poses in Martinez, Calif., yesterday after being assigned as the sixth judge to preside in the Angela Davis-Ruchell Magee murder-kidnaping case.

NO MAP

Lt. Gov. Ben Barnes said Thursday the Senate could handle redistricting in a week's time. He expects the Senate to make "substantial changes" in a House congressional redistricting bill which has been readied for floor debate, he said.

Rep. Delwin Jones of Lubbock, chairman of the House Redistricting Committee, said late Thursday he still did not know when the bill would get some floor action.

His committee approved its bill Wednesday and House and Senate members, as well as Texas' 23 congressional members, have been talking of little else.

The bill makes radical changes in several places:

Jones said as far as he knew, the Senate "hasn't drawn a map."

"I hope somebody makes some suggestions besides me," Jones said. "I don't want to catch all the flack."

Most comment has come from the Houston area where five districts are now lumped into one. District lines will probably be drawn in a Senate-House

Bentsen Says No Time To Drop Draft

WASHINGTON (AP)—Now is no time to change to an all-volunteer Army and drop the draft, says Sen. Lloyd Bentsen, D-Tex., after some visits to colleges.

Bentsen said the country is on an anti-military binge.

He said he found nearly every student favored an all-volunteer military. But when he asked how many of the same people would step forward to volunteer, no one responded.

"We have to change the climate in the country today," Bentsen said.

Bentsen said he favors extending the draft two more years until details of the voluntary army could be refined.

Anti-Pentagon sentiment, he added, will make it difficult to get enough money this year for the military.

Bentsen said on other subjects:

—He is against leaving a permanent U.S. residual force in South Vietnam and thinks more troops should be withdrawn from South Korea.

—Despite criticism of the Democratic Party by Treasury Secretary John Connally, Bentsen said Connally still is in good standing with Democrats in Texas.

—The Democrats can and probably will carry Texas in 1972," he added.

DIST. 16 (Rep. Richard White, El Paso, Democrat) — gains Odessa out of Ector County; loses Presidio, Brewster, Terrell, Pecos and Ward.

BURLESON'S DISTRICT

DIST. 17 (Rep. Omar Burleson, Abilene, Democrat) — gains Dickens, King, Knox, Baylor, Archer, Garza, Kent, Stonewall, Borden, Young, Jack, Parker and Scurry counties; loses Coke, McCulloch, Sterling, Glascock, Hamilton, Mills, Concho, San Saba, Lampasas, Menard, Mason, Llano and Burnet.

DIST. 19 (Rep. George Mahon, Lubbock, Democrat) — gains Parmer, Castro, Bailey, Lamb, Hale, and the outskirts of Odessa in Ector County; loses Motley, Garza, Borden and Scurry.

DIST. 20 (Rep. Henry Gonzalez, San Antonio, Democrat) — re-

Dramatic Book Affects Christian-Jew Relations

By GEORGE W. CORNELL

NEW YORK (AP) — In his library at the Vatican Pope John XXIII sat listening intently as the honored French historian, Jules Isaac, outlined his research and findings. Finally, the Pope leaned forward and asked: "What do you think should be done?"

Isaac replied, "I think a commission should be formed at the Second Vatican Council to re-appraise the Christian teachings in regard to the Jews."

Pope John said, "I was just thinking the same thing as you were talking."

ATTITUDE SHIFTS

That 1960 conversation was related here last week by Isaac's confidante and editor, Madam Claire H. Bishop as the beginning of a basic shift in Christianity's attitude toward Judaism with the effects widening ever since.

Delegates To Attend Conference

First United Methodist Church has named K. H. McGibbon as its delegate to the Northwest Texas annual district conference at Amarillo May 24-27. Some local churches will name their delegates at a later date.

Lutheran Laymen Set June Meet At Serbin

When Lutheran Laymen of the Lone Star District gather at historic old Serbin from all over the state for their annual convention on June 25, 26 and 27 they will return to the cradle of Lutheranism in Texas.

It was at Serbin in Lee County that a colony of Lutheran Wends led by their pastor, the Rev. John Killian, settled in 1854 and established St. Paul's Lutheran Congregation. Seeking complete religious liberty and economic betterment, this group of 588 Slavs from eastern Germany arrived at Galveston on the immigrant ship, The Ben Nevis, and made their way inland by oxcart and wagon to settle in what is now Lee County. The congregation which they founded became the first in Texas to be associated with the Lutheran Church — Missouri Synod.

For many of the lay delegates to the convention the assembly at Serbin will be a return to the community of their ancestors. The descendants of the original Wend settlers have spread throughout Texas and there are few Lutheran

"The full results can't yet be measured" said Mme. Bishop a French Roman Catholic. "The change has begun and great progress has been made in the last decade, but 2,000 years of emotional conditioning can't be changed overnight."

Both Isaac and Pope John died in 1963, prior to the Vatican Council's historic 1965 declaration formally repudiating the long-perpetuated, non-Biblical structure that the Jews killed Christ — and stressing Christian ties to Judaism. But the two men were prime movers of the continuing re-assessment.

They impelled "the turning point," commented Rabbi Marc H. Tanenbaum, director of interreligious affairs for the American Jewish Committee.

Although Pope John's part in it is well known, Americans have been only scantily aware of the influence of Isaac and his jarringly factual exposition of the issue, compiled while hiding in the French underground from the Nazis.

Called "Jesus and Israel," it was published in English for the first time this month by Holt,

Patriotism Is Service Theme

A special "God and Country" service will be conducted by Evangel Temple Assembly of God, 2205 Goliad, Sunday at 7 p.m.

This service will combine patriotism and spirituality in focusing attention on servicemen and servicewomen on Armed Forces Day weekend.

Highlighting this special service will be the showing of the Marine Corps film, "The Story of Old Glory." This fast-moving, 15-minute, full-color film is narrated by Jack Webb of "Dragnet" fame. It is considered by film producers to be one of the finest patriotic films ever produced. "Old Glory" also won the Freedoms Foundation award for film excellence.

Servicemen and servicewomen will be in uniform for this service. Special speakers will include Maj. Sgt. Bill Knight and Lt. Mark Hosmer and Naomi Daniel of Webb AFB. Lt. David Peters, a student pilot at Webb, will serve as song leader.

A trumpet trio and other music arranged by Mrs. Bill Knight. Rev. Calvin, Evangel Temple pastor, Lt. U.S. Marine Corps, (Ret.) will bring the main message, entitled "God and Country."

The public is invited to attend this special service.

Organist To Play Sunday Concerts

Lester F. Hardigree III, Abilene organist, will be featured in two concerts Sunday at Baptist Temple.

He will play a prelude to the morning services from 10:45 to 11 o'clock, and in the evening he will be spotlighted from 6:30 to 7:30 o'clock. Mrs. H. M. Jarratt, church organist and pianist will join him in some duet numbers.

Hardigree did undergraduate work in the preparatory music schools of Stetson University in Deland, Fla., and Rollins College in Winter Park, Fla. He was on full scholarship at Valencia Junior College in Orlando, Fla.

At age 16, he was with the Central Florida Symphony Orchestra under the direction of Henry Mazer, and in 1962-64 he took first place in the Florida State Young Performers competition.

While in military service, he was organist for the chief of Air Force chaplains. Subsequently, he has served as church organist and choir director. He has given concerts across the nation and Europe.

The Sponsors Of This Message Urge You To
Attend Church Sunday
Select The Church Of Your Choice And Be Faithful
In Your Attendance

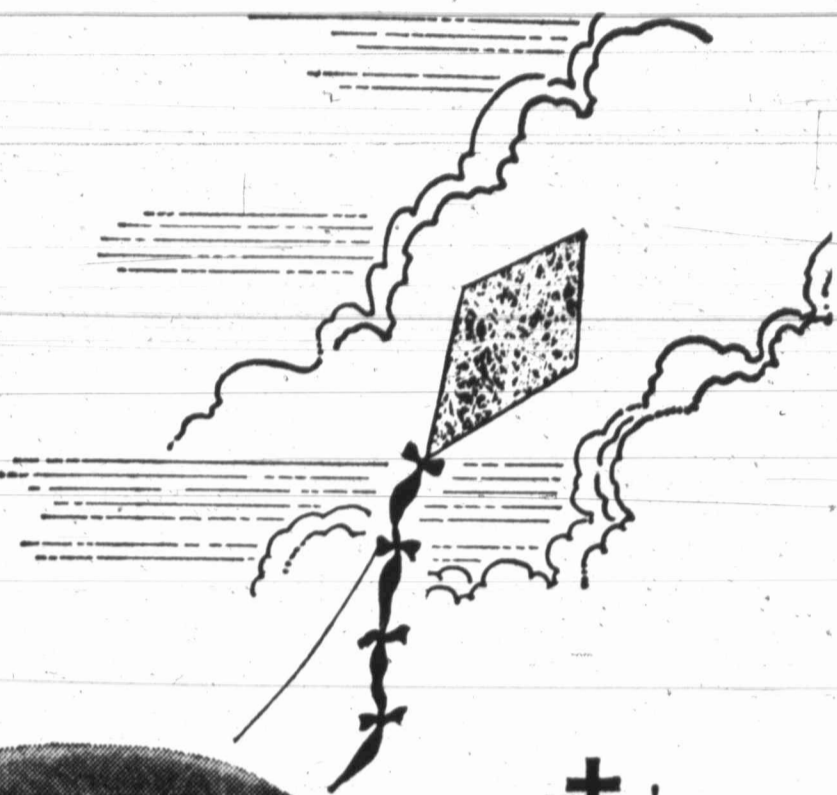

"Look at the red kite up there! See how high it's flying!"
The little boy follows her finger, and she is warmed and gratified by his smile of appreciation.

It seems as if mothers are eternally anxious to make sure that their children get all there is to get out of life—that they miss nothing.

Mothers would, if they could, show their children all that there is to see and give them everything—time for fun, time for play—new clothes, new toys, a television to watch cartoons, endless red kites and bright yellow balloons and, later, skis and sports cars.

Yet, in this eagerness to show and to give, aren't they in danger of overlooking some of the most important things of all? What of beauty, of serenity, of joy—the knowledge of God's goodness, His love, and familiarity with His house on earth... the Church?

FIRST ROUND LEADERS AT HOUSTON
Kermit Zarley (left), Larry Hinson

Zarley, Hinson Share Houston Lead At 67

HOUSTON, Tex. (AP) — Ben Hogan took an incredible nine, Kermit Zarley took a two stroke penalty and Larry Hinson took a new approach to his game. The legendary Hogan, limping badly on once-shattered legs, picked up after 11 holes of the first round of the \$125,000 Houston Champions Invitational Golf Tournament Thursday.

him from sole control of first place, said he still planned on winning "if I can stay out of the Spanish moss." The penalty—he called it on himself—came in a trap on the 11th hole. Zarley brushed some Spanish moss that had fallen off an overhanging tree when he made his backswing. He was penalized for striking a loose impediment.

Table with 3 columns: Name, Score, and other details. Includes names like Hubert Green, Bob Murphy, Dave Hill, etc.

HOUSTON (AP) — First round scores Thursday in the \$125,000 Houston Champions Invitational Golf Tournament on the 7,166 yard, par-71 Champions Golf Club course included: Kermit Zarley 32-5-67; Larry Hinson 33-34-67.

Don Meredith, the former Dallas Cowboy quarterback who never speaks from a prepared text, was invited to deliver the principal talk at the annual BSHS Spring banquet but had to turn down the offer due to previous commitments.

Less than two weeks after the 1971 baseball season opened, the big leagues were up 332,465 in attendance over last year — and the 24 teams set a gate record in 1970.

Hogan Quits On 12th Hole

HOUSTON, Tex. (AP) — It only hurts when you laugh, Ben Hogan said today in contemplating the nightmarish nine he took on the par three fourth hole in the first round of the Houston Champions International Golf Tournament.

Area football buffs may have difficulty in recognizing Odessa Permian next fall. New Panther coach Gil Bartosh goes in more for colorful and effective offenses than in building strong defensive teams.

Stan Lambert, a combination first baseman and pitcher for Abilene, was second in the derby with a .444 mark while still another Abilene player, Clint Thomas, was third with .367.

"I hate to play and quit," he said. "It burns me up. But I just couldn't keep up with the other fellows (partners Charles Coody and Dick Lotz). It was no use trying to take that misery."

They didn't rate much newspaper space in the signing but, from all indications, the SMU Mustangs acquired quite a talent in Darrell McCullough of Dodge City, Kan., who averaged better than 13 yards per carry in Kansas' highest echelon of high school football last year.

John (Red) Davis, who brought a Corpus Christi baseball team here in 1949 to meet Big Spring for the State Class D championship of Texas, is now manager of the Waterbury club in the Eastern league.

Bob Gonnerman Is McMurry Bound

ABILENE — Bob Gonnerman of Frank Phillips College has signed to attend McMurry College on a basketball scholarship.

Contrary to allegations made by that correspondent whose letter appeared in Thursday's edition of The Herald, coach Royce Cox of the Big Spring High School golf team didn't make the decision about switching teams after the Steers played their first match in District 5-AAAAA competition the past season.

The first unit was composed of older, more experienced talent. It was a nice gesture on the part of the second unit players and the play paid off eventually with a berth in the state tournament. Cox approved of the move but he certainly didn't plant the idea in anyone's mind.

Burt Hooton Has Whammy On Pan-Am

EDINBURG, Tex. (AP) — Burt Hooton, who has a 35-2 record in three seasons of college baseball for the University of Texas, also holds a big hex over the Pan American University team. The Longhorns will be meeting May 21 in the District 6 NCAA playoffs in San Antonio.

Hooton has humbled Pan American in three meetings. He owns a lifetime earned-run average of 0.43 against Pan American.

The only run Pan Am has scored off Hooton came in the 1970 playoffs on Al Pierce's single, a wild pitch and two infield outs. Otherwise, the Broncs have failed to score a run off Hooton in 21 innings.

Hooton halted the Broncs twice in one day to wrap up the 1970 playoffs for Texas at Austin. First, he won the opening game, 2-1, on a two-hitter. He walked three and struck out eight. The only hits were Mike Duffey's infield single and Pierce's solid single.

Hooton returned in relief to win the nightcap, 4-3, in 11 innings. He pitched the final three innings. In the ninth, Arnie Alvarez greeted Hooton with a run-scoring single to tie the game, but the run wasn't charged to Hooton because another pitcher put the runner on base.

BASEBALL STANDINGS

Table with columns: League, Team, W, L, Pct., G.B. Includes American League East Division, National League East Division, West Division, and Thursday's Results.

Williams Leading Hitter In 5-4A

Shortstop Wayne Williams of Abilene High has won the 1971 batting championship in District 5-AAAAA with an average of .474.

Williams had 18 hits in 38 times at bat against conference teams. He scored 13 times and accounted for six runs batted in.

Stan Lambert, a combination first baseman and pitcher for Abilene, was second in the derby with a .444 mark while still another Abilene player, Clint Thomas, was third with .367.

Preakness Jockeys Eyeing Elements

BALTIMORE (AP) — The weather and the resulting condition of the Pimlico racing surface is of more concern to the trainers of Saturday's Preakness entries than the post positions.

After the bumping, crowding and blocking in the 20-horse cavalry charge known as the Kentucky Derby, the draw Thursday to determine the starting gate line-up for the Preakness was strictly ho-hum.

Instead, with Pimlico being pelted by rain several days during the past week—including a downpour Thursday—the talk turned to the condition of the racing strip.

FACILITIES SOUGHT Softball Friends Are Organizing

At a meeting of the officers of the Big Spring Softball Association Tuesday evening, plans were made for the future of softball in the city.

Forrest Robinson, president of the association, said the goals of the association are to coordinate all of the softball leagues in the city that now exist and to assist in the establishing of a slow-pitch league for men, a women's league, a teen-age boys league, and a teen-age girls league.

Seniors Face BS Gridders

The Seniors, some of whom have been working out regularly, take on the 1971 Big Spring High School Steers in a 10 o'clock football scrimmage on Blankenship Field Saturday morning.

The controlled drill winds up the second week of workouts for the Longhorns, who have worked long and hard to perfect the game they'll play fall.

Epstein Finds Challenge At Oakland To Liking

The shock is gone and the sock is back for big Mike Epstein, newest production man for the Oakland A's.

Epstein, who was jolted last weekend when the Washington Senators traded him to Oakland, drove in his first two runs for the A's Thursday night as they whipped the Kansas City Royals 6-3 behind the six-hit pitching of Jim "Catfish" Hunter.

Causley Is Hired

WINTERS — Randall Causley, a native of Sweetwater and a graduate of McMurry College, has been named basketball coach at Winters High School. He coached at McCamey the past season.

Coach Checks Out

ABILENE — Gene Cook, tennis coach at Abilene Cooper High School, has resigned. He plans to remain in the system as a teacher.

HAROLD WILDER

HC Coach Will Aid In Camp

Harold Wilder, basketball coach at Howard County Junior College, has been selected to be one of the instructors at the Bill Villines Basketball Camp in Oklahoma City, Okla. The session will begin May 31 and run through June 5.

The basketball camp will be for boys of junior high age through college. Boys will be grouped according to age and ability. Offensive and defensive skills will be stressed during the daily sessions. All players will see league action in the evenings.

Players will live on the campus of Oklahoma Christian College and take part in the dorm life. Campers will be housed in a dorm with rooms accommodating two or three people.

There will be basketball films, guest speakers from the world of sports plus several treats and surprises.

Statistics will be kept on league games. All-star teams will be selected at the conclusion of each camp. Trophies will be presented Saturday to all-star members. Medals will go to League Champions.

Texas players are eligible to participate if they will not be varsity players in 1971-1972. Junior High and Junior Varsity players are eligible.

Entire cost of the camp is \$70. This covers all meals, housing, and facilities, instruction, and a camp T-shirt. Boys from the Big Spring area are interested in knowing more about the camp can contact Coach Wilder at the college.

STRUGGLING BUT GAME — The Abilene Braves, who won three of their first six starts in Texas Little League play here, still have designs on a championship. Front row, from the left, they are Robert Dutchover, Johnny Williams, Tony Rubio and Raul Rubio Jr. Second row, Ricky Lee Ross, David Parris, Ysa Rubio, Joe Diaz and Alex Escanuelas. Third row, manager Paul Rubio Sr., Alvin Williams, Matthew Harris, Oscar James, Frankie Rubio, Willie Ray Maples and coach Joseph Molina. Coach Tony Fierro was missing when the picture was made.

See Thru Problem

Dear Abby
Abigail Van Buren

DEAR ABBY: Tell me honestly how a guy can concentrate in a classroom when right across from him sits a pretty girl in a see-thru blouse.

When I should be concentrating on my studies, I find my mind slipping off on an entirely different subject. Don't get me wrong, Abby. I have nothing against girls looking sexy, but there's a time and place for everything, and I'm in college to prepare for my future. Sublimate and concentrate!

DEAR ABBY: My husband is due home from Vietnam in two months. Already he has planned for us to go on a second honeymoon the day after he gets home!

We have a child, just seven months old. My husband has never seen the baby, except in pictures, so I can't understand why he wants to leave so soon without getting acquainted with his son.

WIFE AND MOTHER DEAR WIFE: Of course he loves his son, but that's not the kind of love he has missed for so long. Line up a baby sitter and be ready to go on that second honeymoon when your husband wants to go. Give him a first class welcome home, with no arguments.

DEAR ABBY: May I use your

column to help all those kids who have dropped out of high school and wish they hadn't?

If you are a dropout and now regret it, you don't have to settle for the lowest paying job all your life, and be referred to as "uneducated." And you don't have to go back to high school for two or three years to get your diploma, either.

Every state in this country offers a high school diploma by examination. The exam is called "General Education Development" test. It is offered to everyone, and is even accepted for college entrance!

MARCIA DEAR MARCIA: Count me among those who had never heard of G.E.D. I checked it out and what you say is absolutely correct. Thank you for writing. Anyone interested in getting a high school diploma may call any high school in his community and obtain the necessary information. Or write to: General Education Development Testing Service of the American Council on Education, 1 Dupont Circle, Washington, D. C. 20036.

For Abby's booklet, "How to Have a Lovely Wedding," send \$1 to Abby, Box 69700, Los Angeles, Calif. 90069.

Public Respect For Judges Dip

SANTA BARBARA, Calif. (AP)—Public respect for judges is on the wane because the courts are becoming bogged down in essentially social issues, says a Washington, D.C., Superior Court judge.

"We are becoming objects of ridicule and not because we are turning criminals loose," said Judge Tim Murphy in a weekend panel discussion on criminal justice.

"If you can get the cab driver or the barber to shut his mouth for five minutes, you can explain these laws to him and tell him why criminals are turned loose," Murphy said. "But you cannot explain why judges are getting involved in ruling haircuts and the length of schoolgirls' skirts."

Murphy suggested that judges should be like specialized surgeons dealing with a very narrow number of sharply defined issues.

BUZZ SAWYER

WHEN DID YOU FIRST NOTICE A CHANGE IN YOUR HUSBAND'S MRS. W. W. WER?

THE MOMENT HE EMBRACED ME AT THE AIRPORT. SOMEHOW HIS ARMS AND HANDS WERE MORE MUSCULAR.

MARY WORTH

IF MY MOTHER WERE LIVING, I'D BE TELLING HER, MRS. WORTH!—BE HONEST! AM I ABOUT TO MAKE A SERIOUS MISTAKE?

I'VE SEEN DR. HOLT ONLY A FEW TIMES, KATHY—BUT HE IMPRESSED ME VERY HIGHLY.

I WISH I COULD BE SURE, MY—THAT OTHER PEOPLE WOULD SHARE YOUR OPINION!

BZZZ!

I'LL OPEN THE DOOR, MAMA!

HI, DARLIN!... MRS. WORTH—LOOK! THINGS ARE QUIET AT THE CLINIC... AND I THOUGHT... ON MY LUNCH-HOUR... WHY DON'T I PICK YOU AND THE KIDS UP AND DRIVE YOU OUT TO THE AIRPORT TO MEET YOUR GRANDMOTHER?

REX MORGAN

I TOLD HIM—I HAD TO DISCIPLINE TIMMY!

KEVIN / WHAT'S HAPPENED? WHERE'S DR. ADAM?

I THINK HE'S ALL RIGHT, MRS. BROWN—BUT HIS LIP IS SLIGHTLY CUT / ALAN'S IN THERE CRYING / YOU'D BETTER GET HIM!

I'LL TAKE TIMMY TO THE DOCTOR!

I HAVE NO CHOICE BUT TO REPORT YOU! I THINK YOU'D BE WISE TO GO WITH ME TO DISCUSS YOUR PROBLEM WITH THE JUVENILE COURT AUTHORITIES!

I'LL DO ANYTHING YOU SAY, DOCTOR!

GASOLINE ALLEY

Rufus!

Yes'm, Miss Elva!

I feel faint agin'!

Mebbe it's somethin' you et!

Can't be! Ain't et!

You needs food! I got doughnuts! Choclit-coated!

They clean! Jes' flat! I kinda fell on 'em!

Brain Wave Test

Your Good Health
Dr. G. C. Thosteson

Dear Dr. Thosteson: Please send me your booklet on headaches, for which I enclose 25 cents and a self-addressed, stamped envelope.

Also could you give me any information on an EEG test? Would that indicate tumors or cancer?—Mrs. A.B.W.

EEG is an abbreviation for electro-encephalogram, also known as a "brain wave test." While it can be useful in diagnosing some forms of headaches, its purposes go far beyond that.

The test amounts to measuring the patterns of the tiny electrical currents which forever coursing through the brain. In that sense, it is very similar to the familiar electrocardiogram, which measures the electrical impulses in the heart.

For the EEG, a number of wires are taped to the head at various specified points. In case you are worried about it, there is no pain. In fact, there is no sensation at all, any more than there is when you have a cardiogram.

Some migraine headaches will result in recognizable EEG patterns; others won't.

So far as tumors (and cancers are one form of tumor) are concerned, the EEG is valuable not only in identifying them but in indicating the exact location, which of course is vital information for surgery.

Among other important uses of the EEG is diagnosing epileptic or seizure disorders by the brain wave patterns.

Since, Mrs. W., you asked for the booklet on headaches, it might be well to point out that the EEG is also of considerable value on ruling out certain conditions — it may not necessarily prove what is causing your headaches, but if it can show that certain things are you've narrowed the field, and that's something.

Dear Dr. Thosteson: What is the difference between myocardial ischemia and angina pectoris?—E.P.

About the same as the difference between "cause" and "result."

Myocardial ischemia means that there is a restricted blood supply to the heart muscle. Angina pectoris is chest pain which can result when the heart muscle is not getting adequate circulation. (There may be other causes of angina, however.)

Shingles can be a painful disease! To receive a copy of my booklet, "The Facts About Shingles," write to Dr. Thosteson in care of The Herald, enclosing a long self-addressed, stamped envelope and 15 cents in coin to cover cost of printing and handling.

Westbury Stars

WESTBURY, N. Y. (AP)—Spring and Summer shows at the Westbury Music Fair are in their 17th season.

Top stars of the show world listed for spring appearances and who were sold out months in advance include the Alan King Show with Lena Horne and a six-day appearance for Engelbert Humperdinck.

Performers with their own shows in July and August include Lana Turner, Sheky Greene, Mickey Rooney, Tony Bennett, Sergio Franchi with Pat Cooper, Robert Goulet, Carol Channing and Jane Morgan.

Miss Morgan will be featured in "Hello Dolly," Aug. 30 Sept.

(AP WIREPHOTO)

HE TAKES ADVICE — Rookie shortstop Chris Speier, who has been playing a spectacular game for the San Francisco Giants, is probably the only major league player to be thrown out of a game by his teammates. It happened Tuesday night when he fell making a play against Cincinnati. A couple of innings later it was noticed he wasn't throwing as he should. Then older Giants told him he should leave the game for treatment. He took their advice. Speier, from nearby Alameda, is expected to be back in the lineup Friday against Los Angeles.

LITTLE LEAGUE

Cabots, Cards Ring Up Wins

The Cabots concentrated their fire power in the first two innings on their way to a 9-2 American Little League victory over the Stars here Thursday night.

The Cabots are 4-3 in the standings. The Stars have won once in seven starts.

Donnie Hanson pitched the win, scattering five Star hits. Danny Robinson and T. Harris each had two safeties for the Cabots while C. Thompson drove out two for the Stars. R. Brown and J. Fortson scored for the Stars in the third to ruin Hanson's chances for a shutout.

The Cardinals made it six wins in a row in National Little League play here Thursday night by struggling to a 10-6 win over the Lions.

The teams did all their scoring in the first three innings. Dick Battle, on the hill for the Red Birds, fanned ten while surrendering eight hits.

Gary Moore struck four hits in as many trips for the Cards. Tony Mann and Battle each had two safeties for the winners. For the Lions, now 4-2 in the race, Terry Kelley drove out three blows.

One of Mann's drives went for four bases while Kelley and John Wrinkle smacked round trippers for the Lions.

The Kiwanis Tigers bruised to a 13-0 Texas Little League victory over the Braves here Thursday night to remain at the top of the standings with a 6-0 record. The Braves receded to 3-3 in the six-team alignment.

Clem Sanchez, the winning pitcher, was helped along by three hits off the bat of Valencia. Williams collected the only safety off Sanchez. The Tigers succeeded in scoring in every inning.

The Colts scored six runs in each of the three innings they went to bat to turn back the Falcons, 18-15, in International Minor Little League play Thursday.

Jeff Huckaba achieved his first mound win of the season for the Colts. Lennie Smith smacked a triple with the bases loaded in the third for the winners.

Scotty Shultz had two hits and Jimmy Jones and Todd Frazier one each for the Colts.

The Comets banked runs in every inning to decision the Sabres, 13-7, in International Little League play here Thursday evening.

Malone had two doubles for the Comets who are currently 3-3 in the standings. The Sabres skidded to 2-4.

Cambell played a fine defensive game for the Comets. Sabres.

The Astros couldn't put 17 hits to effective use and dropped a 7-2 National Minor Little League verdict to the Colts here Thursday.

The Colts are 5-1 in the standings while the Astros dropped back to 1-3-2. Ernie Morgan had two

doubles for the winners while Buddy Collins smashed a home run and a single. For the Colts, Carl Gresham drove out a double. Daniel Barber, Wayne Hooper and Tommy Worsham each accounted for two hits.

515 GREGG 267-2555

Big Spring (Texas) Herald, Friday, May 14, 1971 15-A

Two ridiculous gimmicks of the 1940's.

Everyone laughed when they came out with the television.

A box that could show pictures from 3,000 miles away? Absurd.

But everyone really cracked up when we came out with the Volkswagen.

A car with its engine in the back? Its trunk in the front? And its radiator in neither the front nor the back?

It even looked like a joke.

But time marched on.

The television clicked.

The Volkswagen accelerated.

People liked the idea of a car that didn't drink gas like water. Or oil like water. Or, for that matter, didn't even drink water.

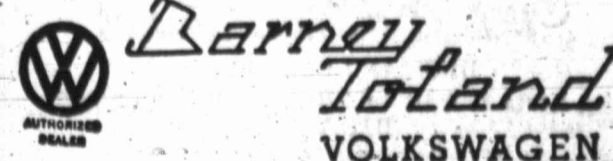

Some strange people even liked the idea that it was strange looking.

In fact, Detroit car makers now like the idea of a Volkswagen so much that they decided to make their own.

And even with all those new small cars around, the fate of the bug is still secure.

This is the first year for all of the others.

We've had 23 years of re-runs.

Air Raids Stalling Infiltration Road

SAIGON (AP) — North Vietnamese engineers are trying to build a major new infiltration route from Laos into South Vietnam, but military sources say heavy U.S. air raids appear to have stalled the project.

The road, running east from the frontier just north of Khe Sanh, apparently was begun after U.S. and South Vietnamese forces pulled out of the area in March at the end of the 45-day Laotian invasion. "One U.S. officer who has seen the construction called it 'an autobahn.' Officials said they are uncertain whether it is just a

supply road or is intended to move heavy artillery to within range of allied base camps.

TONS OF BOMBS

Since it was first spotted from the air in early April, U.S. planes have hammered it with saturation air attacks that included some 40 B52 strikes in 33 days plus numerous fighter-bomber attacks.

The B52s dropped more than 3,500 tons of bombs on the area through which the road passes, some 15 to 16 miles northwest of Khe Sanh.

U.S. sources said the concentrated bombing has halted all apparent activity by the North Vietnamese engineers. Several trucks also have been knocked out. At the time construction ceased, the road had reached some six miles into South Vietnam, but its total length through winding ravines and river valleys is estimated at about 14 miles.

One theory advanced by officials is that the North Vietnamese planned to link the road with a tank trail which the Americans cut through the jungle between Khe Sanh and the natural formation called the Rockpile, 12 miles to the northeast, during the Laotian operation. Officials say this would give the enemy a new way to move men and supplies toward the coast or to move their big

122mm and 130mm artillery into range of Camp Carroll and other South Vietnamese and U.S. installations to the east.

BIG GUNS ROAR

Big North Vietnamese guns in the demilitarized zone two to eight miles to the north now can reach these bases, but "the political ramifications of shooting from the DMZ are bad," one official said. In the air war Thursday night, two U.S. F105 fighter-bombers carried out the 37th so-called protective reaction strike this year against antiaircraft batteries in North Vietnam near the Mu Gia Pass. The U.S. Command said the F105s fired two missiles at North Vietnamese surface-to-air missile—SAM—sites 75 and 82 miles northwest of the demilitarized zone with unknown results.

The command said the F105s were threatened by the SAM sites while conducting operations north of the Mu Gia Pass along the Laos-Vietnam border.

Brig. Gen. James H. Watkins, the top U.S. Air Force adviser in Vietnam, said today that the training and expansion of the South Vietnamese air force won't be completed until mid-1973, an indication that American air forces will remain in Vietnam at least two more years.

Senate Okays Girl Pages

WASHINGTON (AP) — The Senate thrust aside 150 years of tradition Thursday and agreed to permit the appointment of girl pages.

The action was on a non-record vote, after several senators raised fears for the safety of girls 14 to 17 years old on the streets after dark.

Sen. Jacob K. Javits, R-N.Y., one of three senators who forced the issue by proposing the nomination of girl pages in December, called the adoption of the resolution part of the "historic breakthrough of women."

The measure will require the appointing senator to assume full responsibility for the safety and well-being of his female page nominee in travel to and from the Capitol, and at her place of residence.

JERRY LEE LEWIS, CHILD BRIDE GRANTED DIVORCE

MEMPHIS, Tenn. (AP) — Singer Jerry Lee Lewis and his wife agreed to a divorce and a property settlement that would give her more than \$148,000 over the next five years.

The uncontested divorce decree was issued by a circuit court judge, ending the 13-year marriage of the entertainer and his first cousin whom he married when she was 13 years old.

She charged cruel and inhuman treatment and accused Lewis of drinking constantly and "acting improperly with other women."

Mrs. Lewis filed for divorce last Nov. 9 giving her age as 26 and his as 35.

4-H Horse Show Slated For Saturday

Local and area 4-H Club members are getting in their last practice sessions in preparation for the first annual invitational horse show and play day sponsored here Saturday by the Howard County 4-H Club.

The event will be held in the sheriff's posse arena on the Andrews Highway.

The show and play day will be open to all 4-H members at 8 a.m. A county agent's signature (or assistant agent) must accompany the participants and parent's signature on the provided entry blank.

Halter classes will be divided into geldings and mares, 5 and over, and 4 and under, registered and grade. One showmanship class will be held for ages 9 and under; 10 through 13 and 14 through 19, and will consist of western pleasure, western riding, reining, barrels and poles.

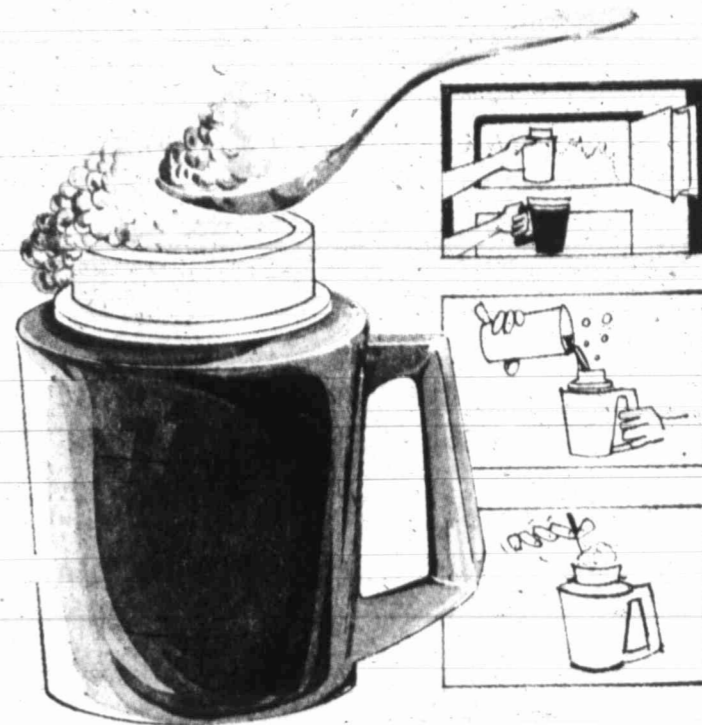

Fees for the show will be \$3 for the first event and \$2 for each additional event including halter.

Points toward high point horse will be given in each event except showmanship.

Prizes will include silver trays for grand champion mare and gelding; showmanship and high point horse; and silver belt buckles will be awarded to the first place winner in each performance class in each age group.

Professional Lift

Freedom isn't the top prize in an amateur contest. Freedom is such a priceless commodity that its defense requires the utmost in professionalism — people with special skills and a special pride in their high calling of standing behind the men who stand between us and the nation's potential enemies. Shown in front of a T-38 supersonic jet trainer at Webb AFB is just a part of the team of professionals who back the instructor pilot in his mission to produce another pilot in the mold of the world's best. The wings on which these men fly are not those of the T-38, but that formed by a clerk, security policeman, fire chief, supply technician, chaplain, mechanic, weatherman, nurse, hospital corpsman, lawyer, physical fitness specialist, personal affairs technician, academics instructor, rescue pilot, secretary, and the many, many more who give Webb that professional lift.

(Photo by Danny Valdes)

Big Spring Daily Herald

BIG SPRING, TEXAS, MAY 14, 1971 ARMED FORCES EDITION

A Webb Professional

**Lt. Dale Johnson
Weather Officer**

**College Degree
Air Force School
Of Meteorology**

Local Base Is Named For Young WWII Pilot

The Air Training Command installation at Big Spring bears the name of a young lieutenant who saw combat action in World War II and gave his life in a crash while on a routine mission off Japan several years later.

He was James L. Webb Jr., whose mother, Mrs. Rilla Webb, resides at 1802 Wasson Road in the Spring City. She was employed at both the Big Spring Bombardier School and Webb AFB until she retired in 1967. Her son's name was chosen by the Secretary of the Air Force from a list of several submitted locally.

Lt. Webb was born July 20, 1924, in Sweetwater, and his family moved here when he was 4 years old. He attended school in Big Spring, played football

and was an avid horseback rider. He completed high school at New Mexico Military Institute during 1940-42, getting good marks, including those in military science.

In March, 1943, he enrolled at the University of Texas and entered as a cadet at Foster Field, where he was graduated as a pilot in May, 1944.

He was assigned to a fighter group and went to Europe in January, 1945, completing 49 combat missions before being redeployed to Japan. He returned to the United States at the end of the war and was discharged from active duty in September, 1945.

The lieutenant worked for a while in private business and in January, 1948, returned to

the Air Force. Once more he was assigned to Japan. While on a weather mission off the coast of Japan, his P-51 Mustang unaccountably went out of control, dived and then shot up into the clouds, and plummeted into the bay.

The Japanese honored Lt. Webb by naming a beautiful stadium the Webb-Byerly Field at Itazuke, Japan. A painting of him hangs in the base headquarters here.

While at the University of Texas, he met his future bride, Miss Doris Taylor. They were married following his graduation from pilot training school. Two children were born to the couple, Karen and James Taylor. With their mother, his mother, and sister, Mrs. W. L. Walker, they were present for the dedication of the base when it was reactivated in May, 1952.

STUDENTS TRAINED TO ANTICIPATE PROBLEMS

Pilot Candidates Laboriously Taught

An Air Force officer enters pilot training because he wants to fly and because he has undergone preliminary tests that qualify him to try to become an Air Force pilot.

After he enters undergraduate pilot training, like that conducted at Webb, other tests that further identify an individual's physical capabilities of flying are given. These tests and re-

lated instruction are the responsibilities of the Aerospace Physiological Training Branch. Although physiological training is not unique here (there are 30 such units throughout the Air Force), training at the branch is essential and may someday save the student's life.

The three officers — two of them members of the biomedical science corps, the other a rated pilot — and 15 technicians assigned to the branch must teach and demonstrate to the student everything that might happen to him while flying.

The course, outlined by an undergraduate pilot training syllabus, Air Training Command and Air Force regulations, begins in the classroom before the student has begun training in the T-37 aircraft. The 45-hour classroom portion of training begins with instruction in basic physics of the atmosphere. The student learns how it changes, effects the body and its physical divisions.

He receives instruction on problems of respiration and circulation at high altitudes, hyperventilation (breathing too deeply or rapidly, caused by stress or anxiety) and hypoxia (a deficiency of oxygen in cells of the body).

According to Capt. Allan Fox, a physiological training officer, "The student learns to be his own physician, to recognize when something is wrong, to cope with the problem and to find a cure, as quickly as possible. Sometimes all this must be done in as little time as three seconds, depending on the altitude, or the consequences could be fatal."

The student's next hours make him familiar with oxygen

equipment. He learns the different types in use in Air Force aircraft, their function, practical use and how to deal with malfunctions. In conjunction with this training he is taught about aircraft pressurization and rapid decompression.

He is now ready to find out how to get out of the aircraft should something irreparable happen. Capt. Fox added, "We want to make him familiar with the emergency escape apparatus and to give him the ability, knowledge and systems to come back down from a crippled aircraft." This training is the first to bring the student to an operating model of what he will be working with.

At Webb an ejection seat is mounted on a 20-foot rail and fired with ballistic charges. This device is an apprehension alleviator that shows the student the physiological effects of speed and acceleration, and his personal tolerances to the forces of gravity.

Next comes training concerned with every day occurrences connected with flying. He learns about noise and vibration hazards, vision problems, night flying difficulties and spatial disorientation (not knowing up from down). Spatial disorientation is common but dangerous. A pilot can merely drop a map in the cockpit, reach down to retrieve it and come up with a spinning head. To demonstrate these occurrences an instrument called the Barany chair is used. A spinning chair placed on ball bearings, it can make the student experience anything from looping to rapid diving and climbing.

With most of the classroom instruction now over, the student moves on to what is most commonly connected with the physiological training branch — the altitude chamber.

The 28 by 10 foot structure, housed within the branch building, has the capability to take the student from a simulated altitude of 8,000 feet to 23,000 feet in one and one-half seconds. This is accomplished by using a pump to rapidly suck the air from the chamber.

The student takes two long and one short chamber flights. In Types I and II flights he is taken to 35,000 feet then to 43,000 feet, where he experiences induced hypoxia symptoms. This is done to acquaint him with his personal reaction to sparse oxygen. With trained technicians inside and out, the student then experiences rapid decompression during the third flight.

His next phase of instruction involves the use of parachutes. He learns about pre-flight inspections, activation, mid-air modifications, descent and landing, how to turn the chute with wind currents, and landing procedures on solid ground, in water and trees. The parachute landing fall is demonstrated by using a four-foot platform over a gravel pit. The student is taught the correct method of falling and the stress of a parachute harness.

After these hours, it's time for him to go to Martin County, to the Webb parasailing range. In parasailing, the student wears a parachute connected to a 900-foot rope and pulled by a truck. As he runs behind the moving truck, aerodynamic lift pulls the chute into the air, taking him 300 to 500 feet above the ground.

He is then released and falls exactly as if he had just bailed out of an aircraft at 20,000 feet. On three occasions he puts into practical use his instruction on turning and controlling the chute and landing procedures.

Before going on to training

in the T-37, his last classroom hours deal with survival training, first aid, signaling and equipment used for survival. Since the training given at the Webb physiological branch is a basic course, the student must undergo full survival training before he is assigned a permanent flying job.

He now goes to the T-37 primary jet training. After completion of this training, the student returns to the branch for a physiological review, highlighting certain areas. Prior to training in the T-38 Talon, the student must receive additional emergency escape training, since that aircraft's system is different from the T-37's escape system.

Capt. Fox said that although most everyone thinks the branch is here solely to instruct student pilots, the branch in actuality supports others. Everyone with a flying job, and some passengers, must take refresher courses in physiological training every three years. Anyone who rides in an ejection seat aircraft must also have the emergency procedures training.

The branch's several sections have compiled quite a record of training. Since April, 1965, there have been 8,400 parasail runs, an average of over 600 chamber flights, and by the end of 1971, individuals training each year will have reached nearly 3,000.

Yachtsman Is Back In Plymouth

PLYMOUTH, England (AP) — Sir Francis Chichester's unsuccessful trip at sailing alone 4,000 miles across the South Atlantic in 20 days has ended here.

The 69-year-old yachtsman sailed into Plymouth this week. He sailed from Plymouth on Dec. 18 for the South Atlantic bid, but failed to cover the distance in the time he had set for himself.

Sir Francis arrived in San Juan del Norte, Nicaragua, 22½ days after leaving Bissau, Portuguese Guinea, in West Africa. He had described his goal as the yachtsman's "four-minute mile."

Attend Open House Tomorrow

PILOT TRAINING Ground-Level To Sky-High Classes

Webb AFB's pilot training program is similar to the operation of any college or university; however, many complicated aspects of training must be taken into account.

Student pilots attend classes, whether they be on the ground or 20,000 feet over West Texas. Half of the student's day is spent attending classes in academic instruction and the other half flying in the synthetic trainers or the jet training air-

craft. The instructor pilot's day begins at 5 a.m., if he has morning periods; or shortly after noon if his squadron is flying afternoon periods.

Prior to the arrival of the students, instructor pilots attend a pre-flight briefing. The first thing on the agenda is a report on up-to-the-minute weather conditions. Cloud cover, weather fronts and conditions that might affect the day's flying are discussed.

The squadron's flying safety officer briefs the instructor pilots on various safety regulations and current safety procedures.

After flight commanders have completed their briefings, instructor pilots assemble their students for pre-flight "table briefings." It is during these table briefings that the day's training mission is introduced.

Once this is over the instructor and student are ready to fly. While each student is flying with his instructor, the other students assigned to that instructor are preparing for their mission or receiving training in the synthetic trainer.

After every training mission, the instructor pilot completes a critique of the flight. He and the student discuss the mission at another table briefing while other students listen.

The key to the instructor pilot training technique is to achieve polish and professionalism in every maneuver the student is taught. This instructor grades the student on his individual progress and in line with how other students comprehend the material.

BEST WISHES

We often overlook the basic things that make our American way of life so secure . . . like the day after day vigilance of our Armed Forces . . . so this Armed Forces Day we would like to say that we appreciate their efforts and offer a prayer for their safety.

Ike Author Of Military Code

The code of conduct was drawn up by former President Dwight D. Eisenhower as a result of defection of Korean prisoners of war to Korea. The code was accepted by Congress as a creed for the military fighting man.

CODE OF CONDUCT

I am an American fighting man. I serve in the forces which guard my country and our way of life. I am prepared to give my life in their defense.

II—I will never surrender of my own free will. If in command I will never surrender my men while they still have the means to resist.

III—if I am captured I will continue to resist by all means available. I will make every effort to escape and aid others to escape. I will accept neither parole nor special favors from the enemy.

IV—if I become a prisoner of war, I will keep faith with my fellow prisoners. I will give no information or take part in any action which might be harmful to my comrades. If I am senior, I will take command. If not, I will obey the lawful orders of those appointed over me and will back them up in every way.

V—When questioned, should I become a prisoner of war, I am bound to give only name, rank, service number and date of birth. I will evade answering further questions to the utmost of my ability. I will make no oral or written statements disloyal to my country and its allies or harmful to their cause.

VI—I will never forget that I am an American fighting man, responsible for my actions, and dedicated to the principles which made my country free.

I will trust in my God and in the United States of America.

Family Services Theme 'To Take Care Of Own'

The Air Force Family Services program is predicated on the concept that the Air Force should "take care of its own." With this in mind, the program was designed to provide information, assistance, and guidance to members of the Air Force family in solving personal and family problems beyond the scope of their resources.

Service provided by the Family Services program may include information about state-side and overseas bases, financial assistance, relocation and transportation. The program also offers a personal affairs indoctrination for Air Force wives, aid in solving complex personnel problems and emergency assistance to dependents.

The Family Services program is an activity which must be supported by volunteers. These volunteers are normally dependents of active duty and

retired Air Force personnel. However, all military and civilian dependents may participate. These volunteers receive guidance from the unit or base personal affairs officer.

A Family Services volunteer donates her time without compensation to assist in the performance of functions of the Family Services program. To be fully qualified, she must complete the personal affairs orientation and specialized training for the committee work she is assigned.

Junior-volunteers, preferably in the 14 to 18-year-old age group, may serve in the Family Services program at the discretion of the base advisory council. If used, the volunteers receive appropriate training and an adult volunteer is assigned as the counselor or chairman of the junior volunteer group. A significant Family Services

function is to insure that wives, particularly those newly married to Air Force personnel, are informed on matters affecting their security and welfare as members of the Air Force family. The personal affairs orientation serves this purpose. It has the educational aim of acquainting wives with the special rights, benefits and privileges available to them and their children. In addition, it serves to inform the wives about the mission of the base and command to which their sponsors are assigned.

'Old 300' Is Memorial

Monday, Feb. 24, 1964, the final T-33 assigned to Webb AFB, left the base permanently and was towed to its new home — the campus of Howard County Junior College on the eastern edge of Big Spring.

After many months of preparation and negotiation, the T-33 was given as a permanent memorial to the City of Big Spring. About 9 a.m. Feb. 24, the T-33 was towed from the base through the north gate, down U.S. 80 eastward to Big Spring. The transfer cross-town to the college campus was made on a dreary, misty morning. Crews towed the aircraft through the heart of downtown on Fourth Street to Birdwell Lane and then onto College to the dedication site.

Dr. W. A. Hunt, of HCJC, expressed appreciation for the memorial to a famous aircraft and its base on the college campus. Old 300 (the aircraft serial number) came to Webb exactly 12 years before the dedication.

On Feb. 25, 1952, number 300 arrived at Webb to begin chalking up the 6,000 hours she would eventually fly. Number 300's flying was terminated in 1961 because the supersonic T-38 Talon was coming into the Webb inventory.

In its nine and one half years of flying, number 300 was used on 7,238 missions.

ORDERS, ORDERS — Mrs. Pat Coates, in charge of administrative orders at Webb AFB, checks a permanent change of station order for accuracy. Everyone departing Webb for a new assignment receives orders to travel from Mrs. Coates.

NCO Backbone Of Military

It has often been said that the noncommissioned officer is the backbone of the military. Most commanders agree — or even insist, that the statement is true. From the days of the Roman conquerors up to the present, a military force is only as good as its noncoms.

Noncoms, the men who lead small units, help train men, and carry out responsible jobs, determine the ultimate success or failure of any mission. They are the men who deal directly with the airmen, who handle the tough details of leading, training, supplying, administering, and disciplining men. They are, in essence, the commanders, foremen, and supervisors.

Basically the noncom has two major responsibilities: he is responsible that his section carry out the mission for which it is created; and, he is responsible to his men that they are properly supplied, supervised, and have full opportunity to develop themselves and advance.

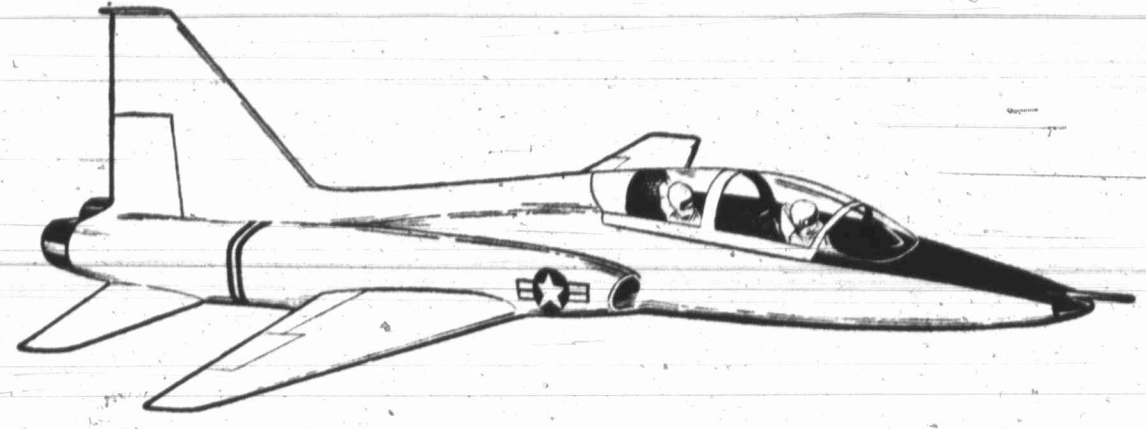

Best Wishes to all

Training Foreign Officers Not New

MDAP Program Began Here In January, 1953

Foreign students graduating as jet pilots still makes headlines at this Air Training Command installation. However, the training of foreign students is not new. The first group of Mutual Defense Assistance Pact (MDAP) were graduated Jan. 31, 1953, when pilot training here was less than a year old.

Members of class 53-A, the six MDAP students were part of the 108-member class. Three of the foreign officers were from Belgium, three from Denmark.

During the six-month period from July to December, 1953, 494 jet pilots graduated from undergraduate pilot training at Webb. Of these, 136 were MDAP students. Added to the Danes and Belgium officers were students from the Netherlands, Norway, Italy, and the United Kingdom.

The arrival of class 54-N late in February, 1954, saw the arrival of the first officer trainees from Turkey and Columbia. The four Turkish officers were in training under MDAP.

That was not the case, however, with Webb's three pioneer students from Columbia. They were trained under a special agreement between the United States and Columbia.

By that time, France and Iran had added students to the growing international list. Class 54-N included nine French students. With the seven from Turkey and Columbia, foreign students totalled 16 of the 37 members.

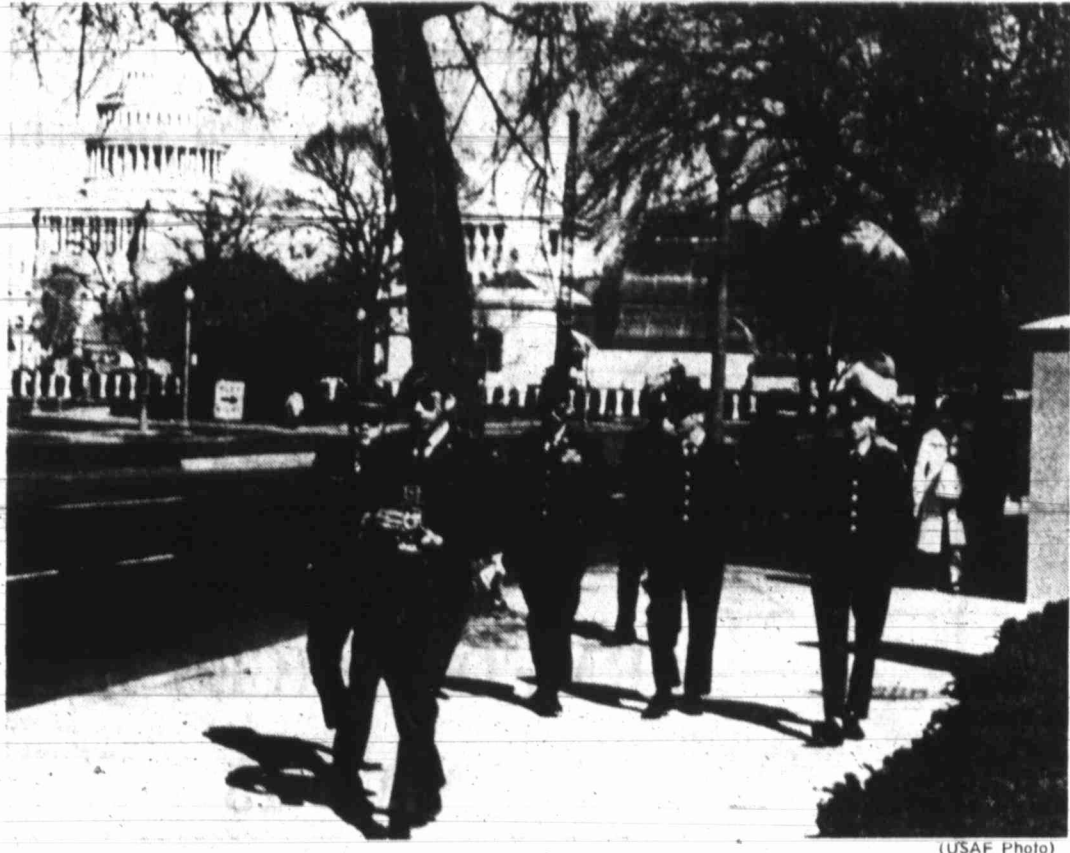

Four candidates from Chile entered the program in March, 1954, with Class 54-O, which graduated in August. Trainees from El Salvador and Cuba entered with Class 54-Q.

There were pilots from France and Turkey in every class during the remainder of 1954. The 2000th pilot to graduate from Webb was a Turkish lieutenant. He was a member of Class 55-H which graduated Feb. 2, 1955.

Spain's first graduate received his wings here April 28, 1956. He was a member of class 56-M, which also saw the 3,000th pilot graduate from Webb.

The Military Assistance Program (MAP) a fairly recent redesignation of MDAP, was begun in 1950 on a nationwide scale to help European and other allied nations bolster their military strength.

In addition to countries pre-

(USAF Photo)

CAPITOL STROLL — Foreign students in undergraduate pilot training at Webb stroll near the nation's capitol during a recent trip to Washington. Students from many foreign countries have received training at Webb through the years.

viously mentioned, Webb's I. Sorenson, student squadron leader, was foreign training officer, was foreign Flores, current foreign training officer as an additional officer.

In a two-part program, the duty and continues now under

Not all of the foreign trainees at Webb have been engaged in pilot training. Many have been occupied with on-the-job training (OJT) in a diversity of base areas. Personnel, safety, operations, aerospace mechanics, transportation, communications, navigation, radar, supply, procurement and other skills have been studied by base trainees.

During the past several years, more emphasis has been placed on the MAP information program. This emphasis began during the time that Capt. Jake

Gets Degree

PITTSBURGH (AP) — Apollo 14 astronaut Edgar D. Mitchell will receive an honorary doctorate of engineering degree next Monday at commencement exercises of his alma mater, Carnegie-Mellon University.

office and the base place emphasis on formal training first. Then every effort is made to afford students the opportunity to learn about America.

Eleven objectives are included in the program of better understanding. Foreign trainees are given the chance to learn more about U. S. Government operation, judicial systems, political parties, the press, diversity of American life, minorities, agriculture, economy, labor-management relations, education and public and social welfare.

At the local level, foreign students are frequently guests in private homes in Big Spring. They participate in community events such as rodeos, banquets, concerts and sports events. They may tour hospitals, courts, businesses and are encouraged to take part in community affairs.

Also, during the years, foreign students at Webb have made sponsored tours to Washington, D. C., New York City, Houston, Austin, Lubbock, Dallas, Carlsbad Caverns and many other interesting places.

Presently there are 22 foreign students at Webb; 21 are in pilot training and one is in OJT. Countries currently represented here are Belgium, Norway, Italy, Vietnam, Denmark, Iran and Nicaragua.

Financier's Widow Plans To Marry

PITTSBURGH (AP) — Constance Prosser Mellon and Peter E. Burrell of Newmarket, England, plan to marry this summer. She is the widow of financier and philanthropist Richard King Mellon.

Burrell is director of the government-owned National Stud of the United Kingdom, an organization dedicated to improving horse breeding. Announcement of their engagement has been made by the business offices for Mrs.

Mellon and her four children. The time and place of the wedding were not announced. It will be the third marriage for Mrs. Mellon, an expert horsewoman who is in her early 60s. She married Mellon in 1936 after an unsuccessful marriage to Vance McCaulley. Mellon died last June 3.

Town Welcomes Gen. Bradley

MOBERLY, Mo. (AP) — Moberly has bestowed a rousing welcome upon its most famous

citizen, Gen. Omar N. Bradley. A crowd of 100 persons turned out to greet Bradley at the airport and for him, high school auditorium to mark Gen. Omar N. Bradley Day, proclaimed by Missouri Gov. Warren E. Hearnes.

Bradley, the nation's only living five-star general, reminisced about his boyhood in Moberly, saying, "It is here where I learned the values by which I have tried to live."

Bradley, 78, is retired from the Army and is chairman of the board of Bulova Watch Co.

WIDE VARIETY OF SKILLS INTEGRATED INTO ONE MISSION

DCM Personnel Professional In Carrying Out Jobs

The complex now grouped under the deputy commander for materiel (DCM) function at Webb AFB was formerly known as maintenance and supply (M&S). Old M&S men would not be totally out of touch in the current regime since maintenance (of aircraft) and supply are still the two divisions of DCM.

The professional expertise which DCM personnel use in carrying out their jobs has increased with the years and the sophistication of aircraft systems. Also the use of computers has speeded supply operations, while at the same time the electronic marvels have created the need for a new breed of experts — those who talk with computers, feeding them information and extracting needed facts.

There are countless kinds of professionally trained experts in the maintenance and supply divisions. It is not only the wide variety of skills, but their integration into one mission purpose, that makes DCM's story one of teamwork.

People on the operations team gear to teach students to fly. Maintenance and supply people work to have a sufficient quantity of high quality, safe aircraft available for the training program. Both achieve outstanding results.

SUPPLY

It is the duty of the Supply Division to furnish materiel to every function on base. Centered on the Univac 100-II, the supply system is almost instantly responsive to shop and office needs. In the most vital areas, remote control units speed requests into the supply warehouse, reducing time required for essential parts and supplies.

Supply people order, stock and store — as they issue and in many cases deliver — all the parts and components necessary to repair Webb's more than 150 jet trainers. Many of the black boxes — radar, radio, and IFF (identification friend or foe) — as well as the engines are supplied and repaired as units. Supply people keep these accounts and see that these items go to the proper place at the proper time.

Additionally, computer crews in supply print out scheduling listings for the flying program. Hundreds of other documents that assist in the operation and close coordination of the base functions are handled by these highly-skilled specialists.

MAINTENANCE

Flightline and dock maintenance is handled by the men of the 2560th Organization Maintenance Squadron (OMS). These men are among the earliest on duty at Webb, preflighting the aircraft, starting the engines for a warm-up run, and making sure that all systems are functioning properly.

Members of the flightline crews service the aircraft before each flight, turning them over to instructors and student pilots. They are there to recover the aircraft when each training flight is completed, making timely turn-arounds so that each craft will be ready for its next launch period.

In the event that some system is not functioning properly, OMS mechanics work hurriedly to effect repairs prior to launch time. Crews of specialists in the various aircraft systems are available to assist in these repairs. They may be radio-dispatched to any row to work on a specific problem and avoid a schedule deviation.

At regular intervals — and these are meticulously kept in record form — each aircraft is scheduled in for dock maintenance. This is a thorough "by the book" check of all systems, and complete coverage by OMS and shop specialists. Following dock repair, the aircraft are test flown by maintenance test pilots before they are returned to the training program.

FMS

For the most complete repairs — so detailed that it classes as almost 100 per cent self-sufficiency — aircraft or their components go into the in-

dividual shops of the 2560th Field Maintenance Squadron (FMS). Manned by a mixture of civilian and military technicians, these shops can and routinely do perform an amazing variety of jobs.

For example, the precision measurement equipment laboratory calibrates and checks measurements so exacting that a human hair seems to be a large diameter. Engine shops for the J-69 (for

T-37 trainers) and the J-85 (for T-38 Talons) repair and furnish enough engines to supply two to each trainer, plus some spares. These engines, of course, are test run at the test cell before they are put back into service, after each repair.

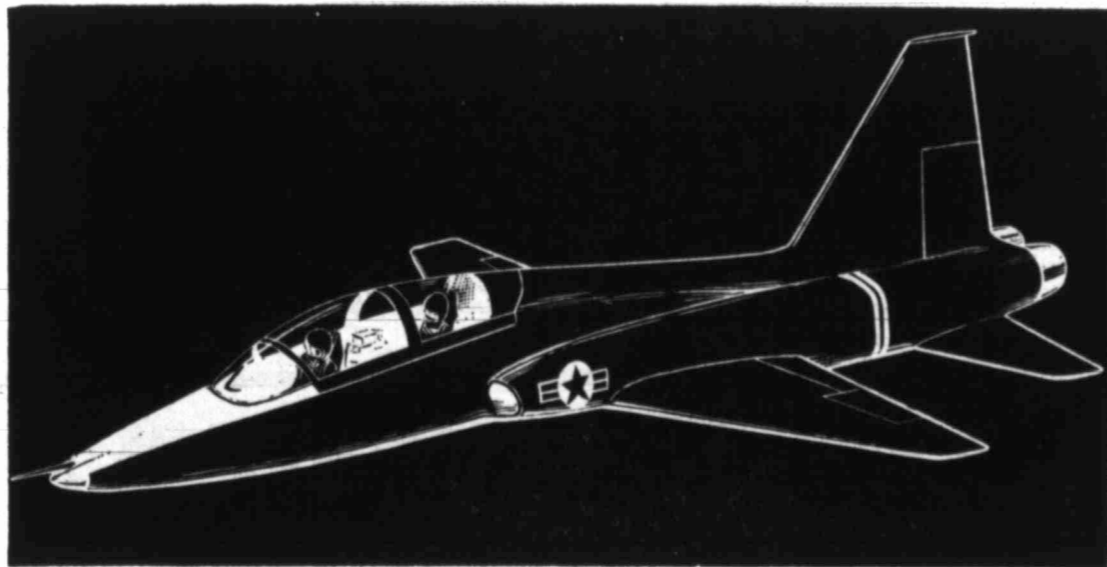

There are radio shops, instrument shops, tire repair shops, welding, fabrication, painting, pneumatic shops, and scores of others. Each has its function and all are essential to the flying training program.

To the uninitiated, it is a maze of barely comprehensible specialties. But each man is mission-oriented; he knows exactly how what he does fits into the over-all job of training aircraft at Webb is demanding work. It is not simple. But given the highly-skilled, thoroughly-trained specialists who man the Complex? You bet. Supplying and maintaining the training crews, it is made to seem simple.

Big Spring (Texas) Herald, Friday, May 14, 1971

ARMED FORCES DAY SATURDAY, MAY 15

We Salute Webb Air Force Base...
Helping Hold Freedom's Torch High

It's time again for Big Spring to pay tribute to the men and women of Webb Air Force Base on Armed Forces Day. Time to express our appreciation to those who are on duty to help protect freedom for all of us... and yet, who still find time and spirit to be leaders in many civic endeavors. Join your fellow citizens tomorrow at Webb's open house and take time to say thank you.

Attend Open House At Webb
Tomorrow

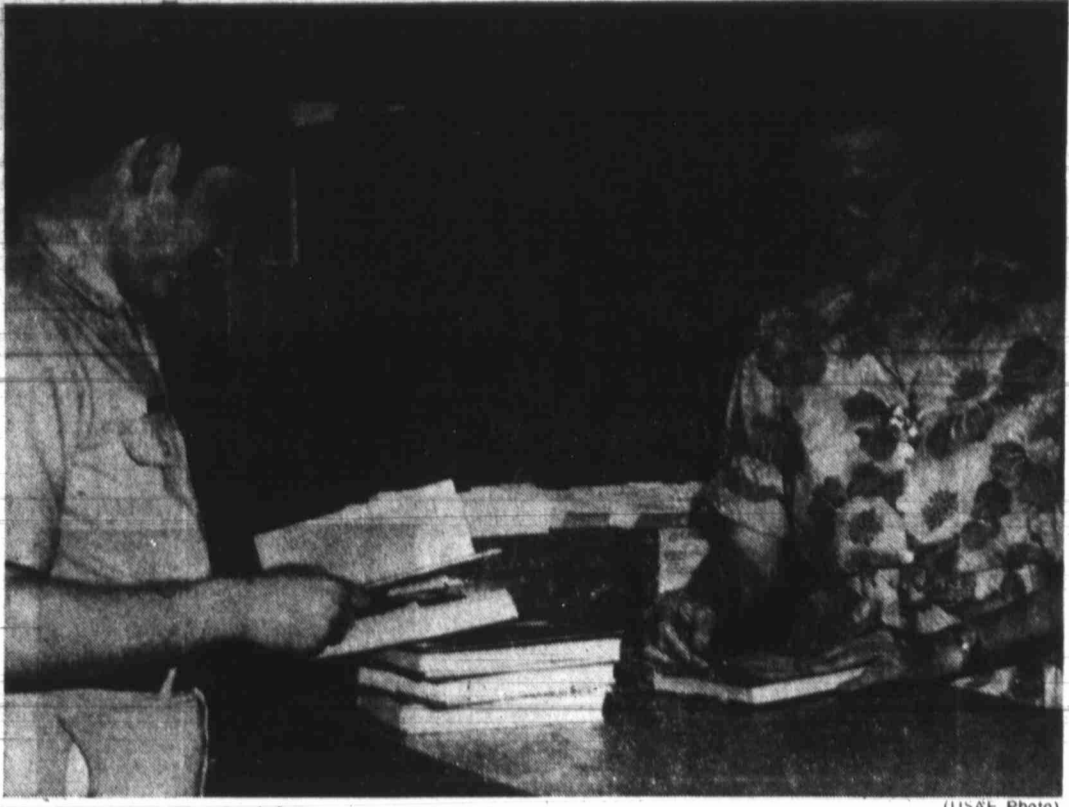

Cosden Oil & Chemical Co.

A Wholly Owned Subsidiary Of American Petrofina, Incorporated

Wood Hobby Shop Provides Tools

Just about everything from sailboats to furniture can be made in the base Wood Hobby Shop, located on Warehouse Avenue in building 610.

A large assortment of hand and power tools is available in the shop. One qualified woodworker is on duty at all times. There is room for many large and small projects. Included in the equipment available are: a cut off saw, table saws, jointer, planer, band saw, shaper, drill press, lathe, sander and jig saw. Portable power tools are also available.

CHECK OUT TIME — Mrs. Zonita Redman, base librarian, checks out a book to 1st Lt. Ray Ortega. The library at Webb is open 53 hours each week for the convenience of base personnel.

Building 201 Offers Many Excursions Through Books

When one enters Webb's Building 200 he can travel to Spain, ski in Sweden, dance the hula in Hawaii, learn karate from Japan's experts, trek through Siberia, take the time machine back to Krakatoa and do almost anything else he desires. He can do these things through words, because he has entered the base library.

Operated by Mrs. Zonita Redman, library technician, and Airman I.C. Robert Berglund, administrative specialist, the library has been an integral part of Webb since the base opened.

Over 13,000 volumes, including non-fiction, fiction and reference books, and juvenile books fill the library's 10 double shelves. The library also maintains 31

base office collections. The books are received at the rate of approximately 90 each month, obtained through appropriated and non-appropriated funds. In addition to these permanent volumes, the library has McNaughton Books, a lend-lease system of today's best sellers.

The library is open 53 hours each week — from noon till 9 p.m., Monday through Friday, and from 1-5 p.m., Saturday and Sunday. The average daily attendance at the library reaches 94. Between July 1 and Dec. 31, 1970, the library had a circulation of 16,905 volumes, plus a juvenile circulation of 5,380 volumes.

During the summer months the library operates a Bookworm Club, for children ages 6-12. These children come to the library, read specific books chosen by Mrs. Redman, and at the end of the summer receive a certificate showing their accomplishments.

When asked whether more officers than airmen, or more women than teenagers used the library, Mrs. Redman replied, "We have good circulation with all groups on base. Of course, those in school use our special reference section more than others, but in general everyone has an occasion to visit us at least once."

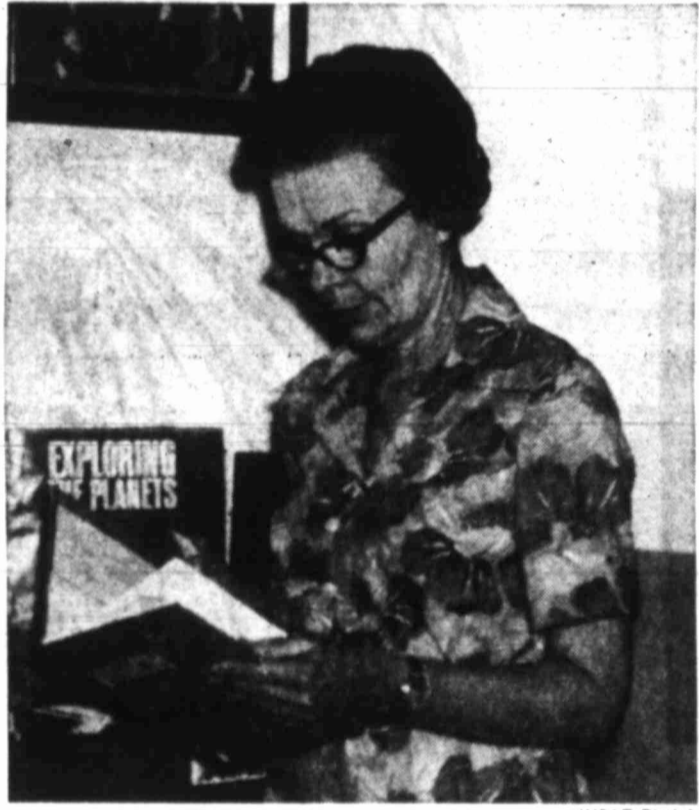

Parasailing Just Practice

April of 1966 saw the advent of parasail training as part of the required courses to be completed by the student pilots at Webb Air Force Base.

The purpose of the program is two-fold; to build the pilots' confidence in the parachute and to give him the experience of a parachute descent.

Parasailing requires a pickup truck, 900 feet of tow rope, release device and a specially designed parachute. Louvers in the parachute act as air foils, much like an aircraft wing. As air flows over and through the louvers, lift is created, pulling the jumper into the air. When towed by truck, the parachute rises rapidly to carry the student to an altitude close to 500 feet before he is released.

During the 13 feet per second drop the student may practice parachute control and landing techniques.

SHE PRESIDES OVER THE LIBRARY — Mrs. Zonita Redman, library technician at the base library, scans through a book she has selected to place in the juvenile section. Mrs. Redman has been working with the Webb library six years.

ATC Mission Simple, 'Prepare The Man'

The mission of Air Training Command (ATC), simply stated is to "Prepare the Man" in skills necessary to effectively man the Aerospace Force.

The ATC mission encompasses both procurement and training of personnel. The procurement mission is accomplished by the USAF Recruiting Service, headquartered at Randolph AFB, Tex., and commanded by Brig. Gen. William C. McGlothlin, former commander of the 3560th Pilot Training Wing at Webb. This organization operates seven groups, 46 detachments and more than 750 recruiting offices throughout the nation. Its personnel roster exceeds 3,500, among them more than 2,000 recruiters.

The diversified training necessary to provide qualified personnel for the United States Air Force is the sole responsibility of ATC.

Basic Military Training is conducted for new Air Force officers and airmen at Lackland

Military Training Center, Tex. The student load at Lackland, "Gateway to the Air Force," ranges from 9,000 to more than 23,000 depending on recruiting requirements. This training in fundamentals of military discipline and tradition lasts six weeks.

In officer-level basic training at Lackland the primary categories of students are officer applicants who are college graduates and persons such as lawyers and chaplains who have received direct commissions.

Technical training in non-rated Air Force specialties is provided both officers and enlisted personnel at four ATC Bases: Sheppard, Chanute AFB, Ill.; Lowry AFB, Colo.; and Keesler AFB, Miss. About 165 field training detachments, about 100 guided from Sheppard, instruct students at bases throughout the free world.

Flying training, ranging from basic principles of piloting and navigation through highly advanced courses in these fields, is accomplished at 11 ATC bases.

The undergraduate pilot training program for the U. S. Air Force is conducted at 11 ATC bases, and takes the student from the novice level to a highly proficient jet pilot ready to operate first-line aircraft. These bases are: Webb, Sheppard, Laughlin, Laredo, Reese, and Randolph Air Force Bases in Texas, Craig AFB, Ala.; Moody AFB, Ga.; Vance

Subsidized Home Loans Are Still Rare

WASHINGTON (AP) — Conservatism in the savings and loan industry is making it difficult for thousands of moderate-income Americans to obtain subsidized home loans under a new government program, the Federal Home Loan Bank Board says.

Since last week, when the board announced it had less than two months to spend more than \$45 million set aside for the subsidy program, there has been a rush of persons seeking to buy homes with reduced monthly payments.

Many were turned down by lenders who said they didn't offer it or didn't have information on the program, the board said.

"The composition of our membership is very conservative, a fact of life that we can't change by fiat from Washington," said James A. Coles, director of bank operations for the board. This attitude is particularly prevalent in the Southwest, Midwest and Upper New England, he added.

The program is designed to help families earning between \$7,000 and \$12,000 annually to become eligible for conventional home loans. The subsidy would reduce their monthly payments \$20 over five years.

The \$45 million represents the balance of \$85 million available this fiscal year. The board has expressed fear future appropriations may be cut if the full amount is not spent this year.

Technically called HOAP, for the Housing Opportunity Allowance Program, the project has a \$25,000 loan ceiling.

Webb Pumps Million Monthly Into Economy

Webb Air Force Base pumped more than a million dollars each month into the economy of Big Spring during calendar year 1970.

The 717 civilian employees at the base received \$8,120,834 while the 2,245 military personnel received \$18,000,000. In addition — the base — contributed another million and a quarter to the economy in the purchase of goods and services.

Of this, \$347,095 was for utilities (gas, water, electricity). Procurement contracts of \$972,711 or 22 per cent of all

the contract awarded during the year by the base were awarded to Big Spring businesses.

One big item was 27,338,357 gallons of JP-4 fuel purchased by the base for the inventory of aircraft which was purchased from the Cosden Oil & Chemical Co.

Military personnel alone spend about \$1.50 million annual for housing in the Spring City.

According to one theory of economics, each \$1 million spent generates an additional \$2 million in spending.

MARS SYSTEM IS COMMUNICATIONS BACK-UP

No Matter What--Webb In Voice Contact

This is Alpha Gama Four Alpha Mike calling — That might sound like double talk, but it is really MARS talk.

MARS talk — not martian talk — is the language of the Military Affiliated Radio System. This is a communications system used to back up normal channels. Should anything happen to the land lines the MARS station at Webb would be able to maintain voice contact with the rest of the world.

This is done by employing what Marconi (the father of radio) had in mind; the possibility of talking without wires. The MARS station makes use of the basic concept by using certain assigned radio frequencies. The lines of communications must be kept open at all times so that in case of an emergency and they are needed they are in working order. Thus, instead of just having someone babysit the equipment the Air Force and Webb put it to use. It is used as a service to military personnel as a form of communications link.

The link is in the form of a MARS gram or a phone-patch. The MARS gram is like a free telegram — a short personal message to a friend or

loved one anywhere in the world.

First a person has to pick up a MARS gram form at the Service Club, Officers Club or the Flight Line Cafeteria — fill it out and drop it in the MARS gram collection box. Like the part of a letter the sender's part ends at the collection box.

The MARS personnel make daily rounds to pick up the completed MARS gram forms and within minutes of pick up the messages are on their way to the addressee.

The MARS operator here will raise his connection and read the message — it is copied at that point and sent on to a teletype-sending MARS Affiliated station.

The message in teletype form is routed to a regional point near the final destination. It is there that the message takes on the voice characteristic again and is relayed via another MARS affiliated member in the destination town. The final receiver will copy the message and call the party intended to finally receive the news. All of this can take a couple of hours or less.

This is a very smooth and efficient operation because of the cooperation of the Air Force MARS members and the thou-

sands of volunteer MARS affiliated members throughout the world.

This is a different, interesting and fast way to send holiday, birthday or just regular messages. An easy and economical way to get out of almost forgetting that special occasion.

Still another service is the

Officers' Wives Active Group

The Webb AFB Officer's Wives Club is an active social organization with more than 500 members participating in its varied activities. The monthly luncheons take place on the first Thursday of each month.

Newcomer coffees are held each month and an active bridge party also meets monthly.

All of the events take place at the Officer's Club.

The Webb Officers' Wives Club donates to many causes, including the Howard County Rehabilitation Center, March of Dimes, Christmas Cheer Fund and the International Little League.

phone patch system. This is a system which encompasses the use of two telephones in two different parts of the world connected not by telephone wires, but by two radios. One, the Webb MARS station, the other a MARS affiliate, in the vicinity of the call's destination. This is all done by phone patch facilities. The only two differences are no long distance operators and one just has to say "over" when they finish and want a reply. . . a small price to pay for a great convenience. Right now the Webb MARS system has limited phone patch capabilities, but

they soon hope to be able to expand.

The Webb MARS station is constantly ready to process messages and phone-patches during duty hours and other times on request.

The Webb unit is affiliated with many Big Spring residents willing to work the messages. They also process many of the messages for the Veterans Administration Hospital in Big Spring.

Why not talk to home — either by phone patch or message via MARS. . . just think you don't have to be an astronaut to see MARS — work.

MORE THAN 400 PILOTS GRADUATE EACH YEAR

Aircraft, Students, Teachers Do Job

The only mission of Webb flying training. All are an important part of the mission. The mission directive, from Air Training Command (ATC) Headquarters at Randolph AFB, Tex., is shared with eight other undergraduate pilot training bases.

To carry out that mission, Webb graduates more than 400 of the world's finest jet pilots each year.

Three elements are required: jet training aircraft, students who are qualified to complete the rigorous training, and a team of professional experts to conduct their training.

In the truest sense of the word, Webb is a vast graduate school — most of the student pilots come to their training here from colleges throughout the nation, where they have completed Reserve Officer Training Corps training, or from Officer Training School, after their college graduation.

Some, of course, come from other jobs in the Air Force seeking the rating as qualified jet pilot. Some are from Air National Guard units and some in each class are representatives of friendly nations, training here under the Military Assistance Program.

Whatever their source, these officer students are one of the essential ingredients of a successful training program, just as are the aircraft and the training instructors.

In an operation that is largely self-supporting, it follows that many of the 3,000 military and 700-plus civilians at Webb are not directly concerned with

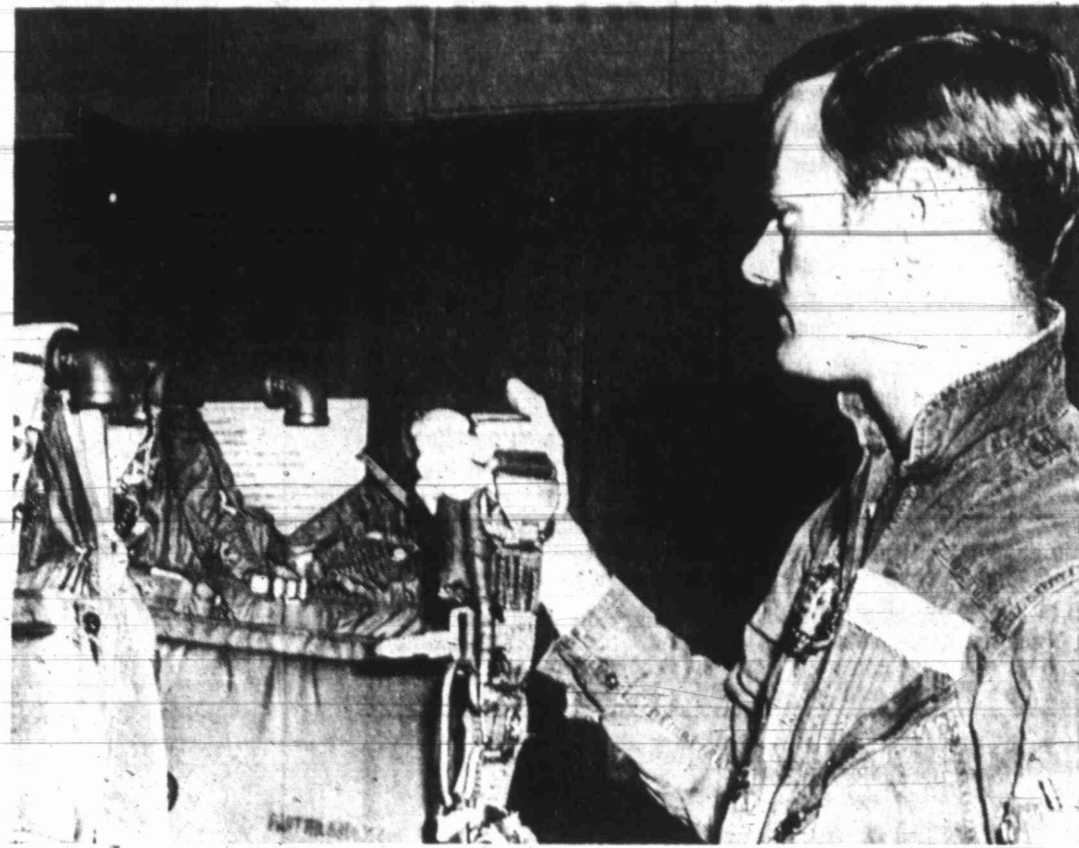

the flying training. All are an important part of the mission. The mission directive, from Air Training Command (ATC) Headquarters at Randolph AFB, Tex., is shared with eight other undergraduate pilot training bases.

At regular time intervals — traditionally each six weeks — a new class of student pilots arrives at Webb. Size of the classes entering during the past year varied from 62 to 74 members. By graduation time, about a year later, the class has been pared to some 59 to 54 members.

A change in the UPT program which started in July, 1970, reduced the training time for jet pilots from 53 weeks to 48 weeks, bringing the flying time down from 240 flying hours to 208.5. Under the old set-up, student flyers spent 30 hours in the T-41 Cessna trainer, 90 hours in the T-37 trainer, and 120 hours flying the T-38 Talon, a supersonic jet. Currently the flying hours break out at 16, 82.5 and 110.

In phase I (T-41s) students fly 14 hours dual and two hours solo. In phase II (T-37s), dual time is 68.9, while 13.6 hours are solo. In the final phase III (T-38s), students fly 30.5 hours solo and 79.5 with their instructors.

The first phase of flying training is conducted by civilian pilots under contract. The program is monitored by Air Force men, but flying training

(USAF Photo)

MAKE SURE — A member of Class 71-08, 2nd Lt. C. A. Wood, checks his parachute before preparing for takeoff on a training sortie. The parachute is just one of the many precautions taken to insure the safety of Air Force pilots.

and maintenance of the T-41s student studies the many responsibilities of the systems of the T-37 — the canopy system, the electrical system, the J-69 engine (two of which power each Tweet), the fuel system, the hydraulic system, the air conditioning, ventilating and defrosting systems.

Other academic courses, which occupy half of each student's day, include principles of flight, flight instruments, navigation, instrument procedures and radio aids, flight planning, weather and flying safety.

Sound like a rigorous schedule? Most students going through the course agree that it is.

But that is not all the student pilots do. They are also scheduled for an active sports program throughout their flying training schedule. Besides running and calisthenics, there is a year-round intramural program of athletics. Classes compete in football, basketball, volleyball, and softball. There are also individual sports competitions in golf, tennis, Ping-pong, and other games.

Some students credit these activities as an escape valve or tension release from the frenetic pace of the training program.

Each instructor pilot has certain students assigned to him and he is responsible for their progress through the program. During the training period, however, each student will fly with several different IPs, on check rides, or in the normal course of events.

Lessons in the syllabus are standardized, so that any IP can substitute for another in case of necessity. Academics instructors, class commanders, squadron leaders, as well as IPs may and routinely do fly in structural flight.

The two flying squadrons — 3561st for T-37 and 3560th PTS for T-38s — Eash have about 90 instructor pilots, including officers who serve as flight commanders and below.

Consider, too, that before each series of sorties is actually flown in the training aircraft, it is pre-flown in the synthetic trainers for T-37s and T-38s. These practice sessions, which simulate the real mission almost exactly, are flown under the direction of airmen who take seven months training in instructing student pilots in Link trainer flying.

These are more of the professional crew members, who though not rated flyers, are vitally essential to the training effort. As are the flight surgeons, para-sail training men, parachute and personal equipment men, who train or outfit the flyers.

Try to imagine all the planning, coordinating, and arranging that must be done to make sure that each student pilot has a flying time, an instructor pilot, an aircraft, a runway time for takeoff and landing, each time. These things must all be done for each member of each of the seven or eight classes, with wide variations in skill and experience. Sound complex? It is, and yet when it is done by the professional team, it moves with great smoothness, safety and perfection, as if it must be so that each class completes all the lessons on schedule and in time for graduation.

Then, try to project the necessary work force that goes into servicing, repairing, launching and recovering those aircraft, keeping all their sensitive and complicated system in perfect working order. The supplies that must be obtained, stored, and rushed out for timely repairs make another story. And all the many professional specialists who tend to the housing, morale, feeding, paying, entertaining, and training of other troops — these have a story for each of their trades.

All these — the more than 3,000 military and 700 civilians — make up the expert team at Webb whose duty it is to "Train Jet Pilots."

Each instructor pilot has certain students assigned to him and he is responsible for their progress through the program. During the training period, however, each student will fly with several different IPs, on check rides, or in the normal course of events.

Trainers Play Major Role

Instrument flight trainers play an important and essential role in the pilot training program at Webb AFB.

The T-4 synthetic trainer simulates the T-37 aircraft, while the T-7 simulates the T-38 aircraft.

These complex trainers duplicate the cockpit equipment and approximate flight characteristics for their respective aircraft. They are specifically designed for use in teaching basic instruments, navigational flight procedures for normal and emergency situations.

The student wears all the equipment including helmet, oxygen mask and parachute and harness in the simulator. The trainer functions to maintain the pilots' proficiency as well as provide students an opportunity to become familiar with the location of the location of the cockpit instruments and controls.

Student pilots are instructed by qualified airmen instructors who are formally evaluated twice per year in a similar manner to the flight line instructors semi-annual Stan-Eval system. This system insures current knowledge and newer teaching techniques. The instructor's duty consists of teaching procedures, demonstrating maneuvers and evaluating the student's performance in the trainer.

1018 JOHNSON

John H. Lees Service Club Celebrates 11th Birthday

The John H. Lees Service Club at Webb is 11 years old this week. As a prelude to the Armed Forces Day celebration in May, 1960, the formal opening of the Club took place May 20.

Wing Commander Col. Donald W. Eisenhart gave the dedication address and among the honored guests were Mr. and Mrs. Harry Lees of Big Spring, for whose son the club is named.

A Texan, with pioneer ancestry, Sgt. John H. Lees was homeward bound from a strike deep into Northern China in World War II, when his B-25 was shot down. Also dedicated to the sergeant's memory was a 16-by-25-inch portrait. The portrait hangs today on the wall near the entrance to the main ballroom.

Originally more than \$126,000 was spent in improving the club. The original color

scheme embraced walls of ivory and furniture in bamboo terra cotta and greenish-blue. The wood finish is called fruitwood, and the lamps are of tall ceramic bases. The sofas are of naugahyde leather.

Currently serving as Service Club Director is Mrs. Ellen Rogers, who arrived at Webb recently from Forbes AFB in Kansas.

'IS THAT TIGHT ENOUGH?' — Capt. Allan Fox, physiological training officer, adjusts an oxygen mask on a student about to take an altitude chamber flight. This flight took the student from 8,000 to 23,000 feet in one and one-half seconds.

Capt. Boorman, First Assigned

The first man assigned to Webb AFB after announcement of its reactivation in December, 1950, was Capt. William O. Boorman, who became the base installations officer.

Capt. Boorman, a native of Mineral Wells, Tex., and an engineer, arrived here May 24, 1951.

Pilots Receive Wings, Poem

Each student pilot who graduates from Webb AFB receives a copy of this poem when he gets his wings.

HIGH FLIGHT

By John Gillespie Magee Jr.

Oh, I have slipped the surly bonds of earth and danced the skies on laughter-silvered wings; Sunward I've climbed, and joined the tumbling mirth of sun-split clouds — and done a hundred things you have not dream of — wheeled and soared and swung High in the sunlit silence. Hov'ring there, I've chased the shouting wind along, and flung my eager craft through footless halls of air. Up, up the long, delirious, burning blue I've topped the windswept heights with easy grace Where never lark, or even eagle flew. And, while with silent, lifting mind I've trod the high untrespassed sanctity of space, Put out my hand and touched the face of God.

ARMED FORCES DAY

Best Wishes W.A.F.B.

We are proud of Webb . . . and grateful for their Spirit in Community affairs as well as their contributions to our national defense. We hope you enjoy Big Spring as your home away from home.

AF Military Police Make 'Impression'

The adage "A first impression is a lasting one" is especially true in the military.

A visitor to a military installation often forms his impression of the Armed Forces by the first man he sees as he comes onto a base — the security policeman.

Big Spring and area residents will have the opportunity to see these men in action during Armed Forces Day Saturday.

A security policeman will be on duty at both Webb gates to direct visitors to the display areas. Numerous other policemen will be on duty directing the flow of traffic and assisting in parking cars.

Their presence is an assurance of safety, and they will provide assistance in many ways. In general, all policemen at Webb will be doing their best to provide every service, assistance and courtesy.

The police division at Webb is under the direction of Capt. J. P. Culbert. The mission of his division is to provide law enforcement and security support for the base.

C.M. Sgt. V. K. Hendrix serves as police superintendent and it is his responsibility to handle the administration and supervision of the division.

The operations section is divided into four security flights which function on a rotating basis so that one flight is on duty at all hours.

The corrections section is responsible for the rehabilitation of personnel confined as the result of court-martial and for the detention, confinement and processing of all prisoners.

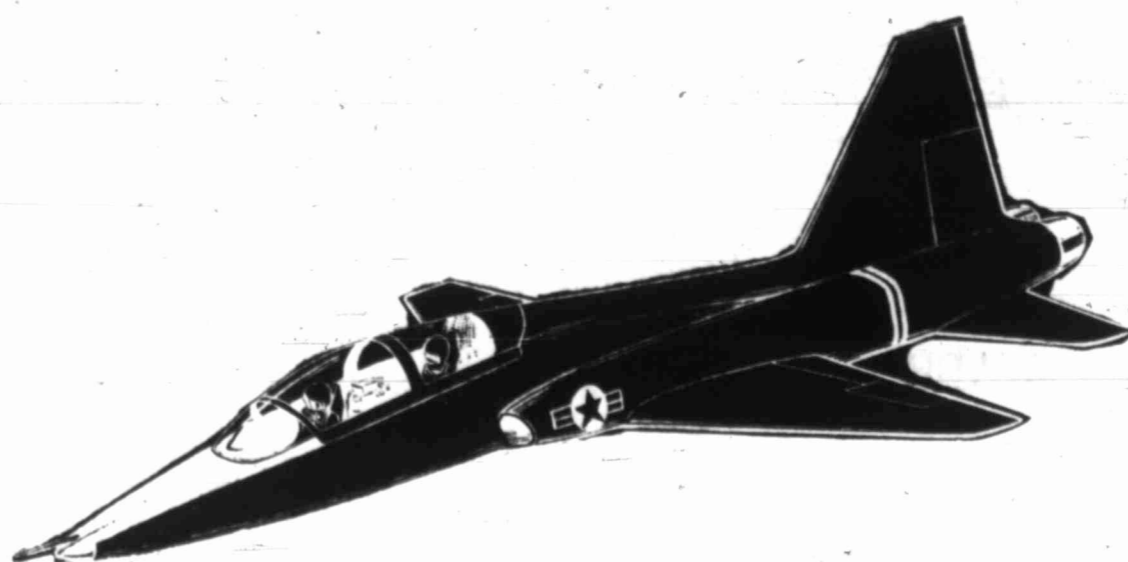

The Security Police investigations section investigates offenses committed on base and has liaison with local civil law enforcement agencies.

The administrative security branch processes requests for security clearances, and monitors physical security reports, conducts spot checks of security procedures and supervises the security education program.

The pass and registration section registers privately owned vehicles, and processes and issues identification cards. The section is also responsible for maintaining registration on all privately owned weapons on Webb.

All security policemen at Webb receive their continuous training from personnel in the training section.

It's Open House...

...let's support the celebration...

Webb Air Force Base has helped Big Spring for 29 years . . . recent evidence is the addition of several new industries to Big Spring. We owe more than can be figured in dollars and cents to Webb . . . so let's support the people who make it work . . .

CENTER IS HOME AWAY FROM HOME

Offers Professionally Planned Program

Its 6 p.m., do you know where your children are? An interesting question, but not a difficult one to answer for a Webb parent as most of the young Webbiters may be found at the Webb Youth Center.

Webb's Youth Center, which is part of the personal services, is just that, a center where the youth of Webb can congregate and have a good time away from home. According to the director Frank Shea, "This is really a home away from home for many of the 300 members of the center."

This home away from home is open Tuesdays through Thursdays 1 p.m. to 9 p.m.; Fridays from 1 p.m. till 10 p.m. and Sunday till 6 p.m. During those hours the youth center offers a place for the young people to participate in games, contests, watching TV, listening to the stereo, and of all things, studying.

"It would surprise many of the parents to know that many of the kids come in here and actually sit down in a quiet room and study until their homework is done, then they join in the programs," Shea continued. "I have never seen a more self-disciplined group and was totally surprised myself."

It is a professionally planned program with something scheduled for almost every minute it is open though there is always enough to do so that if a young person doesn't want to be a part of a particular activity he can still keep busy.

With summer approaching, the youth center is looking ahead and has planned an extensive activity package for the young people. Planned activities such as tennis, archery, skeet, swimming, softball, judo, basketball, to name a few, for both boys and girls. At the moment Shea is planning to split the summer session into two parts. Most of the summer activities will be conducted during 9 a.m. and 1 p.m.

The first one to last until July 15 and the other until the end of the summer vacation. This is being done so as to give the parents a chance to enroll their youngsters in either or both, thus maybe helping with the summer leave problems. Of course the magnitude and variety of the summer youth program is dependent upon the number of volunteer instructors and coaches.

Though these programs are professionally planned, the youth themselves have a definite voice in what does go on. This is done through two representative councils (the pre-teen and the teen councils). They meet regularly and discuss with Shea the problems and suggestions that come up in the meantime.

"This does give them a chance to have a voice in the program, and it gives me a greater insight into their likes, dislikes, problems and needs," Shea added.

Another program to be added soon is that of an occasional speaker. One topic to be discussed soon is drugs, when Dr. Samuel Laufer from the base hospital speaks to the young members of the Youth Center.

As can be seen the youth center isn't just a place to play ping pong, pool, games, basketball, tennis, drink cokes, do homework, listen to stereo, work with and around other people, and just have fun... it is all of those and much more at Webb.

THIS IS THE WAY TO DO IT — Frank Shea, youth director at Webb, instructs a group of the more than 300 youngsters that participate in youth activities at Webb, in the art of table tennis. Programs offered at the center include swimming, basketball, charades, tennis, archery, skeet, judo and many others.

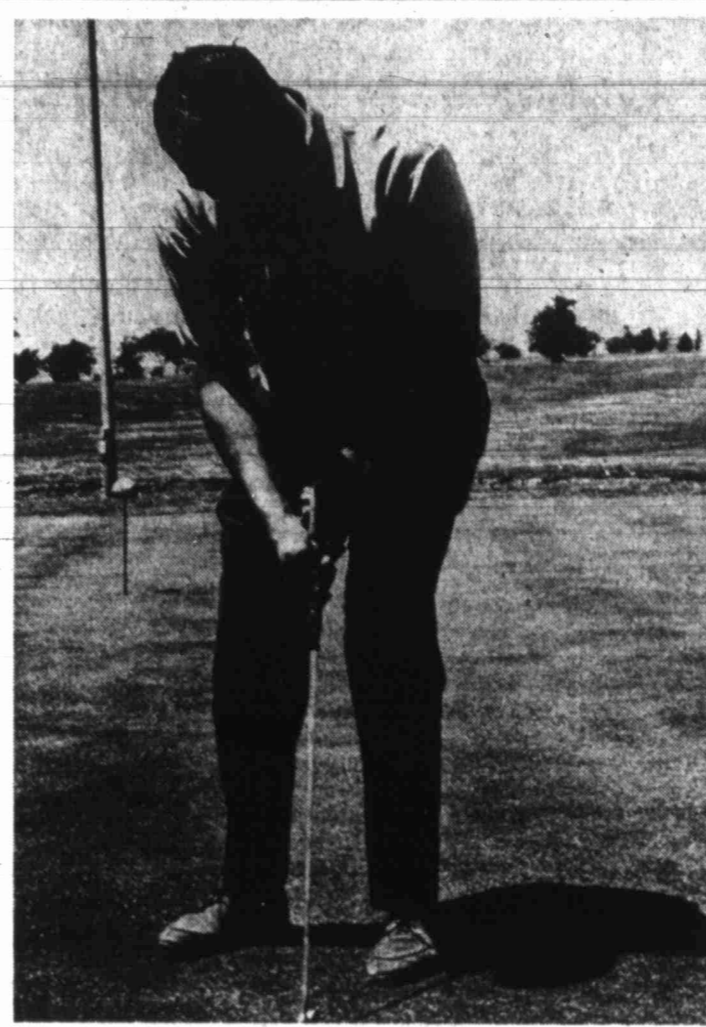

PERU, Ill. (AP) — Older Americans are moving to the south and west of the United States, a preliminary report of a Social Security study shows.

Paul A. Schmidt, manager of the Social Security district here, said the study of the nation's retired — about 1 per cent of the total — moved permanently from one state to another during the year surveyed.

Population Shift

PERU, Ill. (AP) — Older Americans are moving to the south and west of the United States, a preliminary report of a Social Security study shows.

Paul A. Schmidt, manager of the Social Security district here, said the study of the nation's retired — about 1 per cent of the total — moved permanently from one state to another during the year surveyed.

SHADES OF ARNOLD PALMER — Jerry Northbrook, golf course manager at Webb, gets in a few practice rounds on the base links. The nine-hole course is one of the finest in the area and is constantly crowded during the summer months.

Recreation Office Plans Off-Duty Fun

"Your Play Is Our Work" is the motto hanging in the Base Recreation Office and this motto pretty well sums up the recreational activities at Webb AFB.

When everyone else is off enjoying themselves, people operating the recreation branch are busy making the off-duty time as enjoyable as possible.

Some of the activities offered Webb personnel are three swimming pools, an extensive athletic intramural program both indoors and outdoors, with a complete gymnasium equipped with a steam room and exercise equipment.

Other outdoor activities include five tennis courts, four playgrounds, a nine-hole golf course with putting green, chipping green and driving range, a lake pavilion, two picnic areas, and several lighted athletic fields.

Also included in the recreation complex is a 10-lane bowling alley, auto hobby shop, wood hobby shop, ceramics shop, aero club and theater.

Base Began With Army

In 1942, during World War II, the Big Spring Army Airfield was opened to provide advanced training for bombardiers. After the war the airfield became the Big Spring Municipal Airport.

Then, in 1951, when the 3560th Pilot Training Wing was activated, the City of Big Spring again leased to the Air Force the land and facilities for the new base. On Oct. 1, 1951, Big Spring Air Force Base was opened.

The first pilot trainees, who were aviation cadets, arrived March 28, 1952. And, the first class, Class 52-D, graduated a short time later on June 20, 1952.

Earlier that year it was decided that Big Spring Air Force Base be renamed to memorialize 1st Lt. James L. Webb, a Big Spring native.

Today Webb AFB is one of 11 Undergraduate Pilot Training Wings operated within the Air Training Command. The Wing trains students from the Air Force Academy, other service academies, AFOTC units, Air National Guard units and Officer-Training School. Allied officers and cadets from numerous nations also receive their pilot training at Webb.

Lightning Costly

CHICAGO (AP) — The Lightning Protection Institute says playing the odds against a lightning strike cost some 3,200 American business property owners over a quarter billion dollars in 1970.

The institute said the average loss to each building struck by lightning was \$88,000.

Additional millions of dollars were lost by homeowners by lightning damage to roofs, chimneys, wiring, TV sets and other appliances.

Lightning-ignited fires leveled or gutted more than 2,000 houses. Each homeowner's loss was more than \$5 thousand.

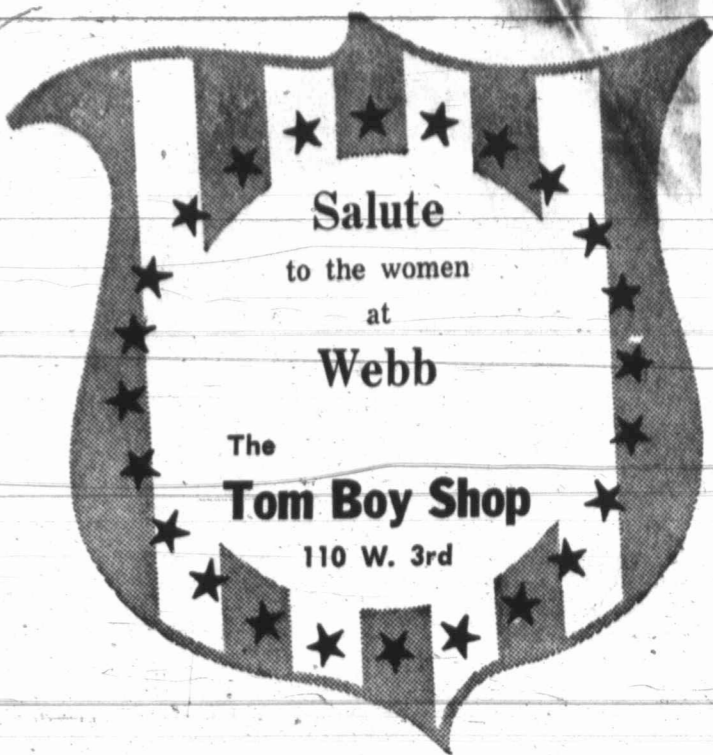

Rescue, Recovery Squad Detachment Unique Unit

One of the most unique units stationed at Webb is Detachment 18 of the 42nd Aerospace Rescue and Recovery Squadron. Commanded by Maj. C. Pearson, the squadron's alert crews stand ready to scramble to cover emergencies an average of three times during a normal duty day.

Always the anticipation is present that perhaps "this time" the emergency might not terminate happily; thus the motto, "That Others May Live," becomes a daily concern for members of Detachment 18.

At the sound of the alarm, the rescue alert crew runs for their chopper. Within 90 seconds a highly trained crew of pilot and two fire fighters are airborne with a 1,100-pound fire suppression kit slung beneath the chopper. Their mission is to provide on-the-scene crash coverage to the distressed aircraft.

Local base rescue coverage, while the primary mission of the detachment, is by no means its only one. It also provides search and rescue coverage to support the National Search and Rescue Plan, including response to local disaster and civilian emergencies.

Subcommittee Calls Hearing On Cancer Bill

WASHINGTON (AP) — A Senate subcommittee on the verge of endorsing a cancer-research bill sponsored by its chairman has backed off to call hearings on a new plan offered by President Nixon.

Nixon unveiled his plan this week, and Democrats said their first impression was that it contained neither enough money nor enough administrative revision to get the job done.

Nevertheless, the Senate health subcommittee deferred approval of a bill proposed by Sen. Edward M. Kennedy, D-Mass., to allow time for studying the Nixon measure.

Kennedy said the subcommittee will act quickly on one of the proposals, both of which are aimed at finding a cure for cancer.

The Nixon plan would keep cancer research under the National Institutes of Health where the Cancer Institute has been at work for years.

But the agency would report directly to him and have an independent budget including an extra \$100 million above what is now provided. The President promised these funds in his State of the Union message.

The Kennedy bill, introduced Jan. 25, would take cancer research out of NIH and the Health, Education and Welfare Department, and put it under an organization with the sole purpose of fighting cancer.

The senator said this step is essential if the battle is to get the necessary push.

Kennedy proposes an extra \$200 million in funds for the work in the next year, and \$400 million in the following year.

Health subcommittee aides said they understood only \$30 million of the sum Nixon proposed would be spent in the fiscal year starting July 1, and \$70 million would be authorized for future years.

Congress voted \$230.4 million for the Cancer Institute for the current year.

In his January budget, Nixon originally asked \$232 million for fiscal 1972.

A Senate Appropriations subcommittee headed by Sen. Warren G. Magnuson, D-Wash., already has voted to add \$100 million to the President's 1972 request.

Webb Village Houses Families

Webb Village is the family housing area for Webb AFB. It consists of 465 family units; 189 for officers and 276 for airmen. The Capehart housing was constructed in 1959 at a cost of approximately \$6,000,000.

Assignments to the housing area are made by application, by rank and date of rank. Waiting lists are maintained separately for officers and airmen for the two- or three-bedroom houses according to family composition.

PAY DAY — Pat Clark, cashier at the Webb finance office, gives a partial payment to an officer just signing in to Webb. The finance office is probably the most popular place new arrivals visit when they first get to Webb.

Research For Defense Systems Is Important

Through the ages man has depended upon his inventive talents. He progressively developed the stone wheel into the rubber tire, and the maze of controls and instruments required for man's first moon landing vehicle. By-products also have played an important part in man's progress.

From crude oil came the kerosene for lamps during the Victorian era. It was later refined into gasoline to power the horseless carriage. Leftovers were developed into medicines, plastics, and synthetic wash-and-wear fabrics.

Even the search for new systems for defending our country or for investigating the mysteries of space, produced scientific advances for mankind. In the Air Force, major research and development is directed toward scientific advances required for military applications.

Aircraft have developed in the same manner. Starting with the X-1, X-2 and X-3, the Air Force applied knowledge gained from these projects to the fighters and interceptors developed for our operational forces. Then

came the X-15, XB-70, YF-12A, and the SR-71, incorporating the knowledge gained from each. Today, scientists are pouring over the tons of data from the Air Force experimental aircraft to find answers for the supersonic transport (SST).

It would be difficult to estimate the vast sum of money saved through this stepping-stone procedure. It would be even more difficult to evaluate or pinpoint all of the benefits and specific items used in industry, commercial aviation, medicine or in the home, that began in an Air Force laboratory or in the development of an Air Force system. However, all of these benefits represent scientific progress contributed by the Air Force to our economy, safety, health, and standard of living.

Lunch-Hour Theft

PORT ELIZABETH, South Africa (AP) — Somebody walked into the deputy sheriff's office during lunch hour and stole a typewriter and adding machine worth \$322.

Mo-Pac Declares \$1.25 Dividend

ST. LOUIS — Fifteen members were elected to serve on the board of directors of the Missouri Pacific Railroad for a one-year term at the company's annual stockholders' meeting here.

At a subsequent meeting, the directors declared a regular quarterly dividend of \$1.25 per share on the company's Class Warren, Ark.

A stock, payable June 30, to stockholders of record June 18.

Directors elected include: William B. Bates, Houston; Sam B. Cook, Jefferson City; Robert H. Craft and T. C. Davis, of New York; Arthur W. Manley, of William G. Marbury, Downing B. Jenks, John H. Lloyd, Mark M. Henneley and Raymond V. Terry, of St. Louis; Herbert Gussman, Tulsa; James M. Kemper, Jr., Kansas City; Richard A. Goodson and J. T. Suggs, Dallas, and S. M. Dixon.

Wounded Sped To Hospitals By Med Evac

Since the fighting began in Vietnam, aeromedical evacuation flights have quickly sped thousands of wounded to the security and care of medical facilities in Vietnam, the Western Pacific and the United States. Both Military Airlift Command and Pacific Air Forces aeromedical evacuation units operate in Southeast Asia.

When a soldier, sailor, marine or airman is wounded, he is sent by the most expeditious means, usually helicopter, to the nearest medical facility capable of handling his particular injury. The evacuation aircraft may be an Air Force rescue helicopter or any type of Army aircraft.

The Air Force medical evacuation job begins after the patient's condition has been "stabilized" at a surgical or evacuation hospital. There, it is determined whether he should be treated in Vietnam or elsewhere in the Pacific area, or if he should be returned to the United States. The type of injury, care required, length of hospitalization, and time remaining on the individual's tour of duty are considered.

Should aeromedical evacuation from Vietnam be necessary, the patient is reported to a medical regulating office, where his destination hospital is determined.

Never before has a wounded serviceman received treatment more rapidly and had a better chance for survival. Undoubtedly, quick and responsive aeromedical evacuation has resulted in the saving of thousands of lives.

Training For Special Jobs

Communist leaders have made it clear that they hope to further their aims toward world domination by inciting, subverting, and exploiting insurgencies. The so-called "wars of liberation" usually occur in the newly independent, underdeveloped areas of the world which are not prepared to meet many of the challenges of today.

The United States policy on counterinsurgency is based on the principle that all nations should have an opportunity to shape their own future without outside interference.

The U.S. Air Force Special Operations Force (USAFSOF), headquartered at Eglin AFB, Fla., has a major role in the counterinsurgency program. It is responsible for training American and allied personnel for world wide special operations.

BROWNIES AT WORK — Members of Brownie Troop 367 are busily making purses for their mothers during Brownie Scout session. The youngsters are, from left, Daphne Theelin, Connie Mayfield and Jody Norton. (USAF Photo)

CAP Similar To Air Force

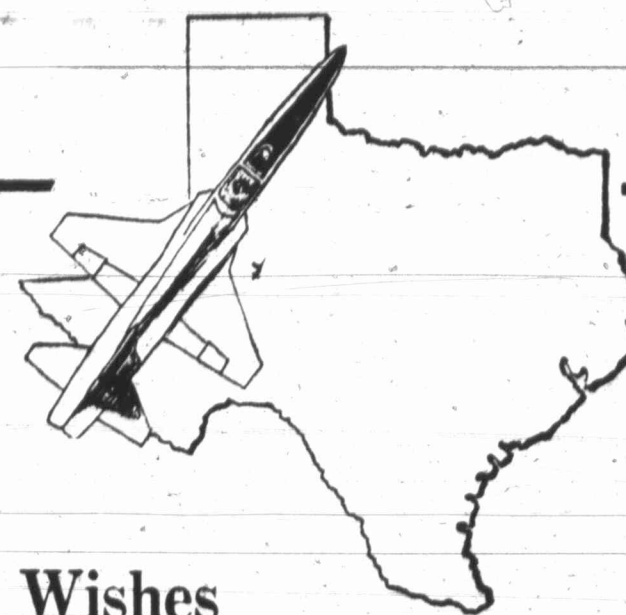

The Civil Air Patrol organization is similar to that of the Air Force. It consists of a national headquarters, eight regions and 52 wings. The wings are subdivided into groups, squadrons, and, in some instances, flights. As in the Air Force, the squadron is the basic operating unit.

The governing authority is the National Board, comprised of a chairman, vice chairman, national commander, national finance officer, national legal officer, and regional and wing commanders. The board meets annually. At other times CAP affairs are directed by the National Executive Committee which includes all national board members except the wing commanders. This committee meets quarterly.

The national commander, CAP, who serves as the organization's chief administrator, is a senior Air Force officer designee of the Secretary of the Air Force. He is assisted by a staff of 127 Air Force personnel, who are assigned to Headquarters, CAP-USAF liaison office, located at Maxwell AFB, Ala. This staff is assigned under Headquarters Command, U.S. Air Force.

CAP-USAF regional and wing liaison officers provide advice and assistance to regional and wing commanders (CAP colonels). Approximately 90 officers and 85 airmen at 60 liaison offices are under the command of the eight CAP-USAF regional liaison offices headed by USAF colonels.

A CAP wing is located in each state, the District of Columbia and the Commonwealth of Puerto Rico. There are more than 2,300 individual units.

Best Wishes

Weather Service Keeps Eye On Climate Data

Weather is unalterable in at least one respect — it never stops changing. This fact and the resulting effects weather has on military operations are the major reasons for the existence of the United States Air Force Air Weather Service.

Determining when the weather will change and how much, understanding why it changes — and even attempting to change it — is a worldwide challenge for this technical service of the Military Airlift Command. Perhaps an even greater challenge is relating weather and weather changes to requirements of military decision-making.

The nearly 1,000 members of AWS observe, measure, study, report, analyze, and forecast weather conditions from the earth's surface to well out into space to meet the requirements of globally-dispersed U.S. Military Forces and other Federal agencies.

Seeking to improve the speed and reliability of their service in the space age, Air Force weathermen have turned to space-age devices such as weather satellites and high-capacity electronic computers.

They employ high-speed communications networks to rush ever-changing weather information from observer to user. The Air Force also pioneered the development of weather radar and devised new techniques to forecast violent storms.

Air Weather Service is continually improving its extensive network of service observing stations and its system of weather tracking and sampling flights to enhance its forecasting capability. Aerial weather reconnaissance reports and data from satellites and ground stations are used by weather centers to prepare detailed atmospheric analyses. The centers then use this information as a basis for production of ready-to-use mission-related data distributed to units throughout the world.

With space travel now a reality, AWS scientists have begun to extend their capabilities above and beyond the atmosphere. The Space Environmental Support System

facilities observe and forecast space "weather" affecting the near-earth environment.

Air Force weathermen have been able to expedite air terminal operations by actually improving the weather for short periods. At many military airfields visibility-restricting fog curtails operations. By seeding supercooled fog at selected

bases, AWS has demonstrated the capacity to create temporary clearing over areas many square miles in size.

The weather service carries out its mission of providing military operational support while striving to fulfill its broader mandate to serve the nation through the peaceful application meteorology.

(USAF Photo) PRACTICE MAKES PERFECT — 2nd Lt. Danny Allen Payseur, a member of class 72-03 gets invaluable practice in the T-37 Link Trainer at Webb. Student pilots spend many hours in the trainer before they ever get to fly the real thing.

(USAF Photo) LOOKOUT POST — Sergeant Kim A. Czako, an air traffic controller in the 2050th Communications Squadron, uses binoculars to scan the Webb flightline while monitoring the movement of aircraft.

CHANGES LIE AHEAD Air Force Looks To The Seventies

As the Air Force looks to the seventies, many changes and challenges lie ahead. Hopefully, the security of all nations will be enhanced as a result of current Strategic Arms Limitation Talks (SALT). But, regardless of the outcome, the Air Force mission of the 1970s remains clear — to provide airpower necessary to meet each challenge to our national security while faced with austere defense budgets and shrinking manpower.

To insure Air Force mission accomplishments, three goals must be met: Avoiding obsolescence; insuring adequate forces, including "ready flow" reserve forces; and having top quality people at all levels with know-how and the leadership to best employ these forces.

Major incentives have been adopted and more are being considered to provide the Air Force with top quality people. As pay increases, improved

housing, and elimination of basic irritants are only a few of the areas being studied to retain the qualified people essential to a strong, dynamic Air Force.

Air Force Chief of Staff General John D. Ryan put it this way in a recent issue of the Air Force's Airman magazine in which he discussed ways and means of improving the quality of Air Force life:

"More... people oriented programs will be forthcoming in the near future.

"Air Force life must offer increasing challenges, satisfaction and rewards if we are to attract and keep the high quality personnel we need to do our mission in the best possible fashion.

"I am proud of our accomplishments of the past, but for 1971 and thereafter, more than ever before, the emphasis is on people.

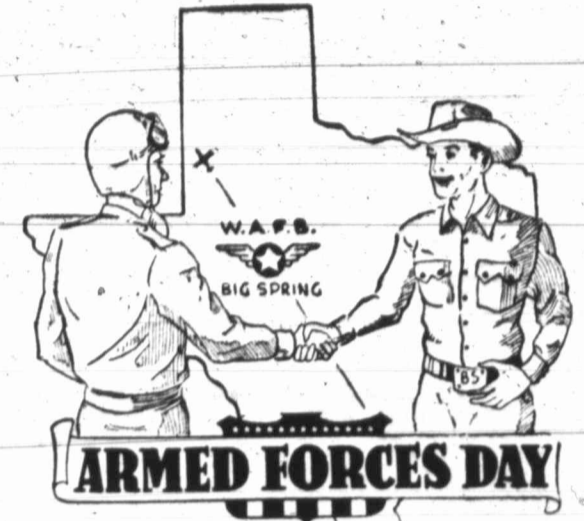

We Salute The Personnel of W.A.F.B.

Vietnam Airlift Unparalleled In Military History

Unparalleled in previous military history, Air Force tactical airlift in Vietnam comprises a logistics operation which dwarfs accomplishments of the past. Its magnitude surpasses the scope of such forerunners as the World War II "Hump" flights over the Himalayas, the famous Berlin-Airlift shuttles, and tactical airlift in the Korean War.

Demilitarized Zone. Air transportation of men and materiel through Vietnam is statistically staggering. Every 82 seconds an airlift aircraft takes off or lands somewhere in the country. In a year, crews airlift 2.5 billion pounds of cargo and personnel, or 4,687 pounds every second around the clock. More than 3.5 million troops and passengers are airlifted annually, or the equivalent of the combined cities of Boston, Cincinnati, Dallas, Oklahoma City and Omaha.

Daily dramatic episodes unfold in Vietnam which vividly depict responsive and reliable airlift operations, meeting the ever-expanding and changing needs of ground commanders from the Mekong Delta to the

But stark figures and statistics, however impressive, are by no means the true measure of success for tactical airlift in combat. The primary role of airlift is rapid response to the combat commander's emergency requirements. The ground commander, engaged in battle, wants his ammunition, weapons, supplies and troops delivered immediately.

Airlift in Vietnam is an extension of the battle. It plays a genuine role in the U.S. effort to see cumulative victories on the battlefield; an integrated role, not divorced in any way from the realities of success or failure on the battlefield.

In Vietnam, there are no fronts. Battle lines are not drawn. Because of the fluid tactical situation, troops and supplies are moved daily from one area of the country to another. With ground routes often impassable and in constant danger from enemy fire, airlift becomes essential. Thus, the entire airlift system is geared to providing a rapid response to ground commander's requests, no matter what the conditions.

The primary mission of our nation's strategic aerospace power is to maintain a force capable of deterring aggression.

In the event of war its mission becomes one of destroying the enemy's warmaking capability.

Communism, in drive and accomplishment, has become the strongest imperialist force in history. Its leaders seek to control the world; their avowed goal is total domination.

The existence of our nation's nuclear delivery force of manned bombers and tactical fighters, augmented by sophisticated intercontinental ballistic missiles, and submarine launched ballistic missiles has been instrumental in thwarting the Communist's aspirations.

The size and strength of our retaliatory forces have rendered any potential enemy's heartland vulnerable. An enemy's doubtful ability to destroy our forces, which are prepared to react immediately if general war erupts, has deterred the outbreak of global warfare for more than two decades.

Because of their advanced state of readiness, aided by worldwide dispersal, our strategic aerospace forces can be launched at the onset of hostilities.

Since a high percentage of our bombers, tankers, and hardened missile sites would survive even a massive attack, no potential enemy is capable of destroying our retaliatory potential.

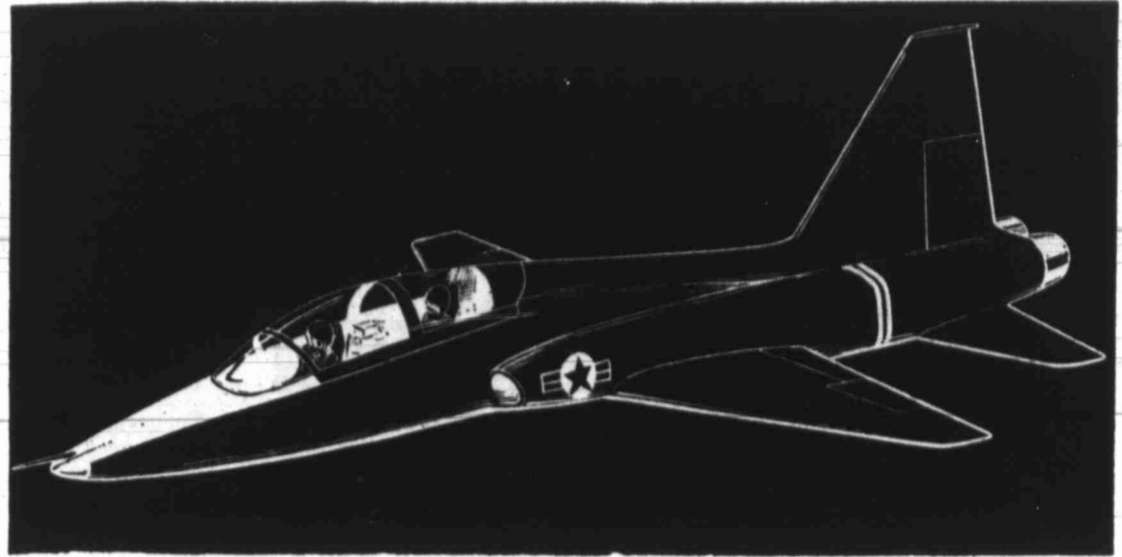

Furthermore, while enemy defense would inflict some losses to our strategic aerospace forces, successful penetration by a part of our offensive force will be both inevitable and devastating. Knowledge of these facts has served to deter enemy aggression.

Chapel Panes Honor Those Lost

On Aug. 22, 1965, a large congregation met in the Webb Base Chapel to dedicate the stained-glass Memorial Window. The window, designed by 2nd Lt. Lance C. Faust, a student pilot in Class 66-D, depicts the light of God shining on the universe, the hand of God holding the world, and the Air Force emblem, representing people who guard the peace. Military and civilian friends of Webb AFB donated the \$3,000 needed to create the window in memory of all who had lost their lives while serving in Webb's pilot training mission, and as a tribute to the living.

Congratulations
W.A.F.B.

ARMED FORCES DAY

A Salute To The Women Behind The Men

Fittingly, we salute the Armed Forces of the United States, the men and the women behind the men of Webb Air Force Base, with pride and appreciation for their strength, stature, and patriotic purpose. We feel that there's a lot of truth to the old saying a woman being the motivating force behind every man . . . and we're proud of the Webb Air Force Base wives who contribute so much to the good of our community.

Best Wishes
to the men
