

"By Helping Business You Help Yourself" The Floyd County Plainsman

FLOYDADA, FLOYD COUNTY, TEXAS, JUNE 24, 1943

NUMBER 29

Son at Camp Livingston, La.

Mrs. Grady Parker and Mrs. Newell Parker, left for Dallas and Fort Worth, Mr. and Mrs. Parker returned home the previous week. Mrs. Parker is at Camp Livingston, La. She is with her son, Newell Parker, who is in the U. S. Army.

Medical Center Plans in Dallas

Dr. R. L. Slaughter, dean of the medical center, is in Dallas. The center is planning to build a new building and equip it with the latest medical equipment. Temporary buildings are being erected to house the equipment until the new building is completed.

Lubbock Child, 7, Drowns on Picnic Near Stamford

Jerry Crofford, seven year old son of Mr. and Mrs. W. B. Crofford of Lubbock, was drowned at California Creek about 20 miles northeast of Stamford Saturday night.

The child, his parents, and Mr. and Mrs. Frank Griggs, his aunt and uncle, also of Lubbock, were among a group at a picnic. About 10 p. m. he child was missed and members of the party began a search for him.

H. S. Fitzgerald recovered the body from deep water of the creek about 1 a. m. Funeral services were held in Lubbock Monday afternoon.

Survivors are the parents; a brother, Donald Wayne of Floydada; three sisters, Virginia Sue, Ella Marie, and Helen Louise; and grandparents, Mr. and Mrs. W. Z. Crofford of Sweetwater, J. J. Davis of Fort Worth, and Mrs. Mary Davis of Floydada.

Texas Civil Court Speed up Handling of Cases

Austin, June 24.—Texas civil courts have speeded up their handling of cases in recent years from a 35-year average of 4 1/2 years to about a year and a half by the University of Texas study shows. Judge Robert W. Stayton, University professor of law, and research assistant M. P. Kennedy have investigated records of cases filed in district courts and moved on through courts of civil appeals and through the Supreme Court. Peak occurred for cases filed in district courts in 1910—almost seven years to receive final disposition by the Supreme Court.

Mrs. Ella Hargis returned home last week from Oklahoma City, where she visited the past six weeks with her mother, Mrs. Maggie Carr.

Mr. and Mrs. Arthur B. Duncan, Jr., and son, Arthur Bailey, of Canyon, visited Sunday with Mr. and Mrs. John A. Hollums and Mrs. Sarah K. Duncan.

First Lady of the Lone Star State Is Fifth To Be Featured in Cotton's Portrait Series

Mrs. Stevenson's Picture Appears In Mademoiselle

Joins Other First Ladies In Praising Cotton's Serviceability

Memphis, Tenn.—The First Lady of the first state of cotton will be featured in the July presentation of the cotton industry's "Governor's Lady" portrait series. She is Mrs. Coke Stevenson, and her state is Texas. Her portrait, the fifth to be published, is being sponsored by the National Cotton Council and Cotton-Textile Institute. It will appear in the July issue of Mademoiselle. With Mrs. Stevenson will be shown her two lovely daughters, Scottie Gayle and Linda Fay. All three of course will be wearing cotton to show women all over America the lovely-looking long-lasting garments that can be made of this favorite family fabric.

Made at Mansion
The portrait, taken in front of the stately Governor's Mansion at Austin, was made by Wynn Richards of New York, one of the nation's leading photographers, who has been commissioned to do the portraits of the First Ladies of all the cotton-producing states. For the picture, Mrs. Stevenson selected a smartly tailored dress of white pique, with matching hat. She dressed her daughters in delightful big and little sister costumes of striped chambray, with eyelet ruffle pinafores.

Wearing cotton is nothing new for either Mrs. Stevenson or her daughters. "Cotton is my choice because it is cool as well as cool-looking," Mrs. Stevenson said. "I like its freshness and durability. In fact, my daughters wear nothing else because it's so easy to keep clean."

Mrs. Stevenson, a native of Cleburne, Texas, is a Texan from start to finish. Consequently she appreciates the value of cotton to her state. She attended the University of Texas where she met and married Coke Stevenson, Jr.,

Mrs. Coke Stevenson Jr., First Lady of the State of Texas, poses with her daughters, Scottie Gayle, standing, and Linda Fay, in front of the stately Governor's Mansion at Austin. An ardent supporter of cotton, Mrs. Stevenson is wearing a tailored dress of white pique. The little girls are wearing big and little sister dresses of striped chambray, with eyelet ruffle pinafores. This portrait will be published by the cotton industry in the July issue of Mademoiselle as the fifth presentation of the industry's "First Lady" series.

son of the Governor of Texas. Mr. and Mrs. Stevenson Jr. made their home at Junction where the Governor's family had settled almost a century ago, until the death of Governor Stevenson's wife last year. The young Mrs. Stevenson then moved to the 80-year-old mansion at Austin to serve as official hostess for the Governor. The portrait series, presenting for the first time a typical picture

Athletic Coaches May "Give Lift" to Their Students

Austin, June 24.—Texas athletic coaches can now "give a lift" to their students on the way to University of Texas Interscholastic League games and other contests without endangering their occupational "B" ration book.

A new ruling has been obtained from the OPA, according to Roy Bedichek, director of the League, which clarifies the heretofore somewhat muddled situation.

Briefly, the ruling is this—athletes can not be considered members of a share-the-ride group and used as the basis for the coach obtaining a "B" ration. On the other hand, "if the coach has obtained his supplementary ration on the basis of the impossibility of forming a ride-sharing group and the inadequacy of alternative means of transportation, he may transport athletic teams on his ordinary occupational trips if no additional mileage is involved," the ruling said.

The sixth class of naval aviation cadets has enrolled in the naval flight preparatory school at the University of Texas, and the fourth class has been graduated, Navy officers have announced.

J. A. NOBLE

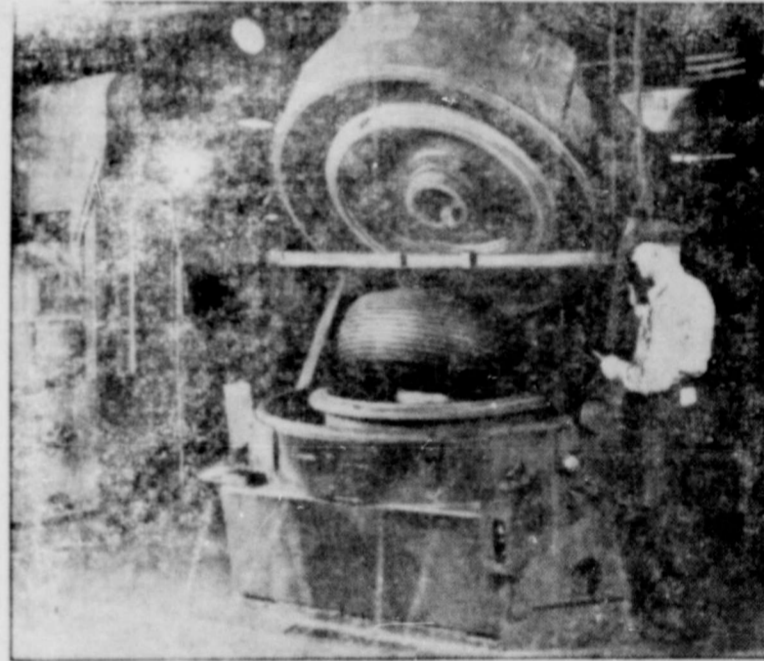

J. A. Noble, newly appointed District Engineer of the Southern territory of the Santa Fe Western Lines. His headquarters will be at Amarillo where he succeeds W. H. Rochester, named Assistant Chief Engineer of the Coast Lines.

ART WORK IS RECOGNIZED

Austin, June 24.—A University of Texas artist is now represented in the permanent exhibit at the Witte Museum in San Antonio, art department professors have announced.

The work is a religious statue, "Christ and the Children," by Charles Umlauf, nationally known as one of the Southwest's most distinguished sculptors.

Air-Minded Synthetic Rubber

Evidence of the way synthetic rubber already is taking over even the toughest assignments formerly handled by natural rubber is this scene at a B. F. Goodrich plant showing one of the new synthetic tires for airline planes coming out of the mold. The air-mindedness of Texas is expected to help make this state an outstanding market for the synthetic rubber made in Texas plants in the coming postwar era of "personalized aviation." Recently the Civil Aeronautics Administration granted, for the first time, approval for use of synthetic tires on commercial transport planes, on the basis of extensive tests the B. F. Goodrich company had made, along with performance records of its Ameripol auto tires, first put on general sale in June, 1942.

Leatherneck Tankman

U. S. Marine Corps Photo
Sergeant Floyd O'Moore of Creede, Colo., commander of a Marine Corps tank, sights his 50-caliber machine gun, mounted for anti-aircraft firing from his tank's turret. Photo was made during maneuvers at a Marine Corps base in the South Pacific.

Loan Rates For Floyd County are Announced

The 1943 wheat loan rate for Floyd County was announced officially by the local AAA office as \$1.19 per bushel for number 2 wheat stored in local elevators or warehouses.

Farm stored wheat will bring \$1.26 per bushel for number 2 wheat which includes the seven cents storage advance.

Number 1 wheat will bring \$1.20 and \$1.27; number 3, \$1.17 and \$1.24; number 4, \$1.14 and \$1.21; number 5, \$1.11 and \$1.18, elevator and farm stored respectively.

Most wheat is testing from 61 to 65 pounds which means a maximum rate of \$1.20 per bushel in elevator or \$1.27 per bushel in farm storage facilities.

The fees for wheat loans are the same as last year, one half cent per bushel for warehouse storage with a minimum of \$1.50, one cent per bushel for farm storage with a minimum fee of \$3.00.

Also announced are the barley loan rates as follows: No. 1, 75c per bushel of 48 pounds; No. 2, 73c; No. 3, 70c; No. 4, 67c; No. 5, 60.

Previously announced were grain sorghum rates as follows: No. 2 or better, 85c per bushel of 56 pounds; No. 3, 80c; No. 4, 70c.

All of the above loans are available in the AAA Office, Agricultural Building, Floydada, Texas. All producers of Floyd County are eligible for the loans since the 90 per cent war crop goal has been removed.

Floyd County Men Are Forwarded on June Call

Filling June Call for Selectees, the following men were sent to Lubbock last week for Examination and Induction, and will proceed to Ft. Sill Reception Center:

- Meredith Ray Switzer, Floydada; Ewell Samuel Johnson, Floydada; John Charles Colville, Floydada; Edwin Shelby Cook, Floydada; John Bryan Mayer, Floydada; Joe Cline Rigdon, Lockney; Milton Doe Zimmerman, Lockney; Donald L. Pemberton, Lockney; Henry Lem Roberson, Lockney; Henry Clifton Payne, Floydada; Udell Oliver Cunningham, Lockney.

The last two men were accepted for Naval Service. Also, Donald Cornelius was inducted for the Air Corps, and will be subject to call when training facilities are available.

The call for July is for the latter part of the month, and for very few men; however, it will require most of the available I-A men to complete the June Call, and take care of July.

Mr. and Mrs. B. B. Caudle, of Amarillo, spent the week end with Mr. Caudle's sister, Mrs. J. B. Bishop and Mr. Bishop and family.

Mr. and Mrs. Buck Sims, and children, of Vernon, spent the week end with Mr. Sim's parents, Mr. and Mrs. C. B. Sims.

Mr. and Mrs. Richard Tubbs, of Pampa, spent the week end with Judge and Mrs. G. C. Tubbs and Mr. and Mrs. W. E. Turner.

James A. Toliver New Roadmaster For Santa Fe

The appointment of James A. Toliver to the position of Roadmaster at Clovis, New Mexico, succeeding Willard Baker, recently deceased to the post of Pecos District Engineer, was announced today through the office of G. C. Clevinger, general manager of the Santa Fe Railway, Western Lines.

Toliver has served on the Pecos Division since entering employment of the Santa Fe in 1917, when he started as section laborer and rose to the position of track supervisor.

The appointment of J. R. Clayton, of Amarillo, to the position of maintenance clerk in the vice president's office, Chicago, was also announced.

Clayton has been with the Santa Fe 24 years and until the present change served as accountant in the chief engineer's office of the Western Lines.

Cadet Richard Tubbs Soon to Receive Wings

Cadet Richard I. Tubbs, son of Mr. and Mrs. George Clifford Tubbs of Floydada, will receive his silver pilot's wings soon from Pampa Army Air field.

Tubbs is a graduate of Floydada High School and attended Texas Technological College. He received his primary flight training at Muskogee, Okla., and his basic training at Independence, Kansas.

4-H's "All Out" To Prevent Accidents

"Every accident and fire you prevent is another knockout blow at Hitler-Hirohito."

The foregoing is the battle cry of more than 1 1/2 million 4-H Club boys and girls throughout the nation who are "all out" to make rural America safety conscious for victory. Enrolled in the National 4-H Farm Safety Activity, they're impressing upon rural residents that accidents and fires—which exact staggering annual losses in lives, labor, livestock, and property on American farms—can be prevented. The 4-H's are pointing out that extreme vigilance should be exercised this year because hundreds of thousands of inexperienced helpers will work on the farms.

Among their recommendations to prevent accidents and fires are to keep tools, when not being used, in racks—dangerous animals in secure pens—electrical and mechanical equipment in repair—install fire-fighting equipment—establish fire lane—mark containers of inflammable and explosive liquids. In short, they are impressing upon farm people the 4-H principle of the coordinated use of the Hands, Head and Heart for Health.

Outstanding records of achievement in this activity will receive honor awards provided by the Mennen Company, which include medals, special plaques, \$100 War

Savings Bonds, and trips to the National 4-H Club Congress in Chicago. The activity is being conducted, along with other wartime projects of production and conservation, under the direction of the U. S. Department of Agriculture, State Agricultural Colleges and County Extension Agents. The last named will furnish full details.

—V—

Figure It Out Yourself. How can you effectively join in saving all the little children of the world from human slavery, death and injury from the Nazis and Japanese? Put more and more of your pay into war bonds every payday. Your savings will go to war in the form of war equipment and other munitions. How much more should you put into war bonds? The only ones who can answer that are—you and your family. It's up to you to decide just how much more you'll do to win the war. If you were fighting in the Solomons or in Africa or forcing a landing in Europe you'd like to feel that the folks at home were back of you—all the way—you'd be proud of your family and your friends if you knew they were buying war bonds not at 10 per cent or 15 per cent, but with every cent beyond that which they need for necessities.

U. S. Treasury Department

Listen to Morgenthau-Marshall Tell Power of Payroll Savings!

Washington, D. C.—How important is the average worker's war bond purchases out of his pay every payday in the grand strategy of the Allied High Command? Does the extent of his or her War Bond allotment have a part in determining when, where and the strength of our military blows?

Any worker listening in on a recent conversation between General George C. Marshall, President Roosevelt's Chief of Staff, and Secretary of the Treasury Henry Morgenthau, Jr., learned the answers to these questions.

Said General Marshall:

"Mr. Secretary, I want you to answer a question for me and to answer it with complete frankness. Can we military leaders plan to fight this war in an orderly way—in the surest and most effective manner—or must we take extraordinary risks for fear the money will not hold out?"

Replied Secretary Morgenthau:

"General, the American public will take care of that. What they have done in the Second War Loan drive—the money they have produced and the spirit they have shown—is proof enough for me that they will not let our fighters suffer from lack of support until we achieve complete victory, no matter how long that may be nor how much it may cost."

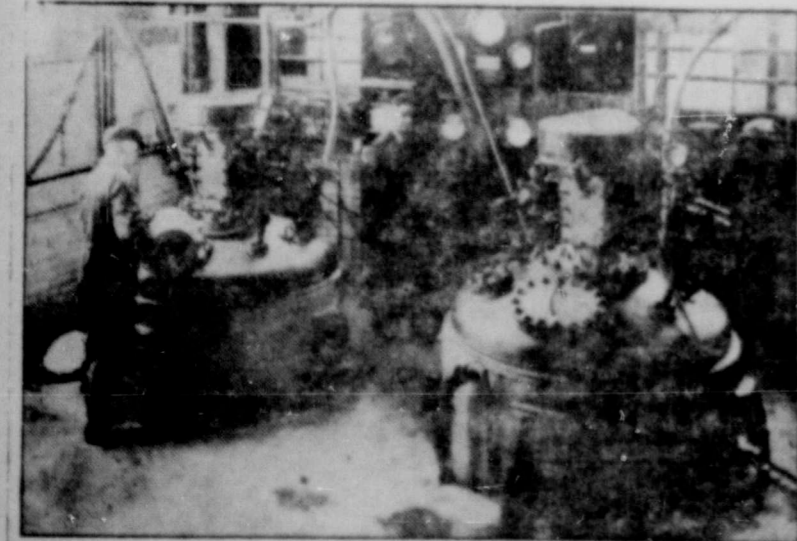

Up your War Bond allotment out of your wages today. Figure it out for yourself how much above 10 per cent it should be.

Henry Morgenthau, Jr.

U. S. Treasury Department

Birthplace of Tire-Type Synthetic

The polymerization tanks in which Texas plants will mix up hundreds of thousands of tons of synthetic rubber latex under the government program dwarf these two units operating in Akron. But these tanks, in a plant operated by B F Goodrich and Phillips Petroleum company as early as 1939, are in a sense the birthplace of American tire-type synthetic rubber, being the ones in which the first such rubber used in regularly-sold tires was produced.

Sheeting Man-Made Rubber

Synthetic rubber is converted from the 'cottage cheese' stage—which is the curds-and-whey form of the butadiene-styrene latex—into large sheets similar to the sheet form of natural rubber. Here a workman in a B. F. Goodrich plant is removing a sheet of man-made rubber from the rollers of a "wash mill."

Sheep Keep John Tarleton Campus Mowed

June 27.—It's a far cry from running a lawn mower on a college campus to piloting or navigating a flying fortress over Germany or the Solomons. Payroll records at John Tarleton Agricultural College show that many present day bomber pilots, as well as scores of officers in all branches of the armed forces, earned their table board at the Tarleton dining hall by pushing lawn mowers over the bermuda and clover that sods the 40 acre campus. In the years before Pearl Harbor, it had become the established custom at Tarleton for cadets, short on cash

but long on energy and ambition, to keep the lawns neat and trim with hand mowers; and as a result the college owns no power mower equipment.

In recent months cadets in the college, eager to complete as many courses as possible before entering the armed forces, have been attending classes from 8:00 a. m. to 1:00 p. m., leaving little time to mow the lawns. In the meantime, spring rains have caused a bountiful growth of campus grass. Dean J. Thomas Davis has solved the labor shortage by placing sheep from the college farm on the campus lawns. As a result, the grounds are keeping heir well groomed appearance and at the same time, cheap food is being produced for the college dining hall.

"People are very nice about it"

"Sure! I'll be glad to limit my Long Distance calls to 5 minutes"

Sometimes when you've a long distance call to a war-busy place, the operator will say—

"Please limit your call to five minutes. Others are waiting."

This doesn't happen all the time, because many long distance calls go through about as usual.

But whenever we have had to ask that calls be kept to five minutes, there has been a fine spirit of co-operation from the public.

We want to say thanks for that. Your help and understanding count double these days.

What You Buy With WAR BONDS

Many of the women of the Women's Auxiliary Army Corps are already overseas serving in various capacities to help win the war. The WAACs go through a strenuous training to fit them for the arduous duties they must perform.

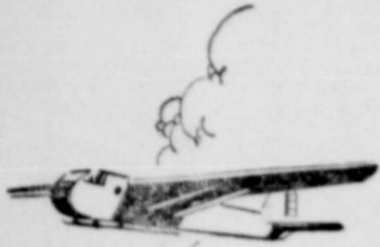

A uniform for a WAAC, complete costs approximately \$170.00. The quartermaster's department must provide thousands of them. Your purchase of War Bonds helps pay for these uniforms. Invest at least ten percent of your income in War Bonds every payday through a Payroll Savings plan at your office or factory.

U. S. Treasury Department

What You Buy With WAR BONDS

While we have not heard so much about them, our air-borne command is inferior to none. We have thousands of these especially trained troops and the glider is a necessary factor in their successful operation.

We build gliders in three types and their capacity is a military secret. The type shown here costs about \$19,000 each. Buy War Bonds with at least ten percent of your income every payday and help pay for these gliders for our intrepid fighting men.

U. S. Treasury Department

What You Buy With WAR BONDS

Women at War today are saving for Women at Peace when the War is won. They are buying War Bonds as thrifty housewives, saving to buy those handy, convenient and necessary electrical appliances when their Bonds mature.

Women know that money saved now will help win the peace, putting their menfolk to work in our domestic factories when the war is over. They know purchase of War Bonds today will help their family and the whole country tide over the readjustment period from War to Peace.

U. S. Treasury Department

What You Buy With WAR BONDS

Nurse that heating plant along for it must do you for the duration. Metal . . . every bit we can rake and scrape up is going into War Production to provide the tools for our boys on the fighting fronts.

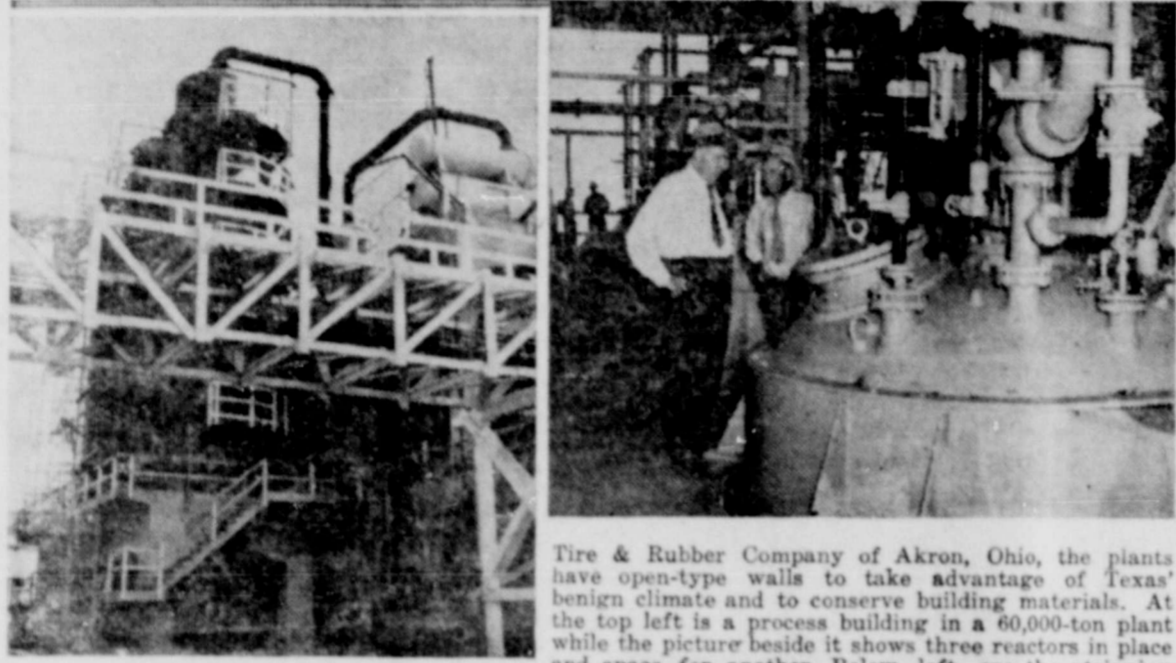

But start saving now for that heating plant by your purchase of War Bonds every payday through a Payroll Savings plan. War spending goes on month after month. So War Savings must keep pace, month after month. Put at least ten percent of your income in War Savings through War Bonds.

TEXAS SYNTHETIC RUBBER PLANTS NEAR COMPLETION

First Construction Photographs In State's Newest Industry

These synthetic rubber plants in southeastern Texas, nearing completion and scheduled to start production this summer, are the first in Texas' newest industry. Built by the Goodyear Tire & Rubber Company of Akron, Ohio, the plants have open-type walls to take advantage of Texas' benign climate and to conserve building materials. At the top left is a process building in a 60,000-ton plant while the picture beside it shows three reactors in place and space for another. Below, left, are the stripping towers which remove excess butadiene and styrene from the latex while beside it, is a picture of Glenn A. Barber (white shirt), project manager for one of the plants, examining a reactor with an employee.

Feeding Beef Cattle Should be Done Systematically

College Station, June 24.—Beef cattle feeding is a system of beef enterprise which is adaptable to the different farming sections of Texas. According to George W. Barnes, animal husbandman for the A. and M. College Extension Service, the cotton, peanut, grain sorghum, wheat or corn crop areas, or any combination of these, are suitable for carrying it on.

Barnes says that in feeding experiments different grains and grain combinations have been fed with an without protein supplement. But conclusions drawn from experience are that a ration for fattening a steer or calf comprises (1) roughages (hay, silage, hulls, corn fodder, etc.); (2) protein supplement (cottonseed meal or cake in Texas), and (3) grain (corn, milo, barley, kaffir, etc.). From the start to the completion of the fattening period a steer may be given all the roughage it will eat. With protein supplement, a specific amount should be fed from the beginning period. Weaned calves, regardless of weight, should receive two pounds of cottonseed meal or cake of 43 per cent protein content daily per head, and they should be eating all of it before being fed any grain. They should be doing that in a week or two, and that takes care of the roughage and protein.

Farmers and feeders should experience no trouble if they: Begin by adding one-fourth of a pound of grain daily per head to the two pounds of cottonseed cake, and continue adding the one-fourth pound until the steer or calf indicates that it has had enough. The animal will show that by leaving feed in the trough. Accordingly, no further increase is necessary for a few days. After that lapse the feeder may again start adding the one-fourth pound increase, and it will not be long until the steer or calf is finished.

By following this method cattle gradually are placed on feed. This, Barnes says, is very important if the feeder desires a maximum of gain with a minimum of trouble in the feed lot.

Tilla Jo Smart Becomes Bride of Billy Woody

Miss Tilla Jo Smart, daughter of Mr. and Mrs. C. B. Smart, and Billy Woody, son of Mrs. B. P. Woody, were united in marriage Wednesday afternoon at the Methodist parsonage by Rev. H. P. Cates. Immediately after the ceremony the couple left for a short honeymoon, returning to Floydada Thursday. Mrs. Woody has been employed for several months at Arwine Drug Company and Mr. Woody for the past two months has been employed at Bishop Drug Company, before that he had been with Consolidated Air Craft of Dallas.

Mr. and Mrs. Woody will make their home in Floydada.

FLOYDADA OFFICER IS HONORED BY AIR FORCE

Washington, June 19.—Silver Stars for gallantry have been awarded to eight members of a United States army air forces Flying Fortress bomber crew for spotting the Japanese fleet of 14 ships before the battle of Santa Cruz and for shooting down three Japanese Zeros last October, the war department announced today.

The crew included: Ralph C. Johnston, second lieutenant, co-pilot, Floydada, Texas.
