

"By Helping Business You Help Yourself"

The Floyd County Plainsman

FLOYDADA, FLOYD COUNTY, TEXAS, JULY 15, 1943

NUMBER 32

Demand for Tires Expected to be Greater in July

Lubbock, July 15.—"The demand for tires in July will be greater than in previous months because of wheat harvest on the North Plains and hotter weather," Howard Gholson, district director of OPA, said in announcing only a two per cent increase in the July quota. July quota of grade one and three passenger tires for the district is 14,735 while allocation in June was 14,449 tires. There were only 3,207 grade three tires in July to 4,858 in June and the decrease reflects a definite shortage existing in dealers' stocks of grade three tires, the director pointed out.

There was a slight decrease in July quota of truck tires, the OPA official said. June's quota was 5,740 tires and the July quota 5,722. Applicants for passenger car tires with mileage of 240 miles per month or less will be placed on an eligibility list if they can show need for essential driving, Gholson said. He warned that the tire outlook for several months would continue to be critical.

Market News for One Variety Groups

Free cotton classification and market news serve for the 1943 crop will be available to organized improvement groups in Texas if applications are filed within fixed time limits. According to M. C. Jaynes, cotton work specialist for the A. and M. College Extension Service, applications from counties lying east of the one hundredth meridian must be filed by August 1, and for the remainder of the Texas counties by August 15. This information comes from the office of L. J. Cappleman, of Dallas, regional administrator of the Food Distribution Administration.

Jaynes quotes J. R. Kennedy, regional chief of FD's cotton and fiber division, that more applications already have been received for this service than ever before. Last year samples were classified for 117,841 members of more than 1,276 organized improvement groups in the state. Total applications this year are expected to exceed those of 1942.

The classing and market service began under the Smith-Doxey act in 1938. Since then the increasing demand for it from farmers has caused the service to spread progressively throughout the cotton producing states, Jaynes says. Reasons for the popularity of the service are attributed to increased production per acre and higher prices per pound for the cotton produced. Some cotton improvement areas in Texas have reported increases in return of more than \$7 an acre.

Application forms for the free classing and market news service may be obtained from county agricultural agents or from the regional office of the Food Distribution Administration at Dallas.

PART TIME COACHES MAY BE EMPLOYED

Part time coaches for interscholastic League athletic teams may be employed during the war by schools in Conference A and B, school officials voted in a recent poll, University of Texas League Authorities have announced. Conference AA schools voted against the change in rules.

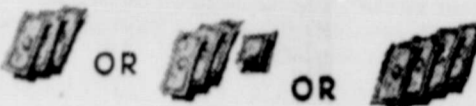

How well do you know your War Bonds?

Q. Why does Uncle Sam want you to put money into War Bonds—
.... to pay for equipping our fighting forces?
.... to help keep prices down?
.... to give you extra money after the war?

A. Check all three! The money you lend in War Bonds works hard—for the government and you! It helps pay for victory, helps keep prices down. And it comes back with interest!

Q. If you put \$3 into War Bonds, how much do you get back—
.... \$3.00? \$3.50? \$4.00?

A. For every \$3 you put into War Bonds you get \$4 back when the bonds mature! And how those extra dollars mount up! Look at this: You buy a War Bond today at \$18.75. In 10 years you get \$25.00. You buy a War Bond today at \$37.50. In 10 years you get \$50.00. You buy a War Bond today at \$75.00. In 10 years you get \$100.00.

Q. How much money should you put into War Bonds—
.... 10 percent of your pay? 12 percent? 15 percent?

A. Every loyal American ought to be putting at least 10 percent of his pay into War Bonds. And more if he can possibly do it. War Bonds make good sense—for selfish reasons as well as patriotic ones! Put every cent you can into War Bonds—and both you and your country will benefit!

HERE'S WHAT YOU SHOULD DO

If you are—
Already setting aside 10 percent of your pay for War Bonds through the Pay-Roll Savings Plan—boost that 10 percent if you can.

Working in a plant where the plan is installed but haven't signed up yet—sign up tomorrow. Working in a plant where the Pay-Roll Savings Plan hasn't been installed, talk to your union head, foreman, or plant manager—and see if it can't be installed right away.

The local bank will be glad to help. Unable to get in on the Pay-Roll Savings Plan for any reason, get to your local bank. They will be glad to help you start a plan of your own.

SAVE WITH U.S. WAR BONDS EVERYBODY...EVERY PAYDAY...

Funeral Services Sunday for Charlie Adolphus Cumbie

Last rites were held Sunday afternoon at 3:30 o'clock at the First Baptist Church for Charlie Adolphus Cumbie, age 58, who passed away early Saturday morning, July 10, in a Lubbock hospital. Rev. Ben D. Johnston, Lubbock, conducted the services, assisted by Rev. L. A. Doyle, local pastor, and Rev. Jarrett Martin, of Lubbock. Interment was made in Floydada cemetery with Harmon Funeral Home in charge of arrangement.

Mr. Cumbie was born in Texas, and lived most of his life at Athens, Texas, having moved to Floyd County November 1, 1929. He was married September 14, 1902 to Miss Mae Taylor, of Athens, who died November 7, 1903. His second marriage was to Miss Carrie M. Tendil, December 18, 1904. Besides his wife, he is survived by two daughters, they are, Mrs. Lockie Hood and Mrs. R. T. Jones, Floydada; five sons, Joe B., Athens, Truman, Wichita Falls, Lloyd and Drue, in the U. S. Army, and Weldon at home. Four brothers, Veach, Artmas and Edgar Cumbie, of Athens; Sam Cumbie, Corsicana; three sisters, Mrs. J. M. Brownlow, Dougherty, Mrs. A. L. Bolin, Eldorado, Oklahoma, Mrs. Lillie Garnett, Larue, Texas; five grandchildren survive, also his step-mother, Mrs. J. H. Cumbie, of Athens, Texas.

Flower bearers were: Helen Jones, Modena Caldwell, Syble Teeple, Bety Jo Sims, ODeene Breed, Berthadell Jernigan, Verne Eubanks, Murl Mayfield, Veeva Holmes, Almeta Sargent, Oma Mae Jones, Willie Mae Rucker, and Zenaba Reed.

Pallbearers were: J. B. Claiborne, J. B. Jordan, Gordon Mayfield, Roe Jones, Elmer Warren, Jim Morrison, W. P. Sims, Dr. E. A. Guthrie, and E. W. Nichols.

GEORGE A. BUTLER
Houston, Texas

United War Chest Makes Plans for United Drive

Houston, July 15.—The United War Chest of Texas has completed plans for the first state-wide unified war appeals drive ever conducted in Texas, George A. Butler, Houston attorney heading the organization, announced this week.

Plans to raise approximately \$5,000,000 as the share of Texas in the National War Fund are now being worked out following the perfecting of the state organization in Dallas, July 7. At the Dallas meeting Butler was named president and campaign chairman of the State War Chest. Gov. Coke Stevenson was named honorary chairman. Other officers include Roy Farrar, Houston banker, treasurer, and Wayland D. Fowner, formerly of the San Antonio Community Chest, secretary and general manager. Twenty-one vice presidents representing every section of Texas are yet to be named by the board of directors.

"Each community and each Texas county will determine its own role in the National War Fund program," Butler announced. "In every instance, the campaign will be carried out by the local leadership," he said. "The program is one of aid to our own boys on all the fronts of war, to our allies in every corner of the globe, and to the home front."

President Roosevelt's War Relief Control Board has approved the following agencies for participation in the National War Fund which plans to raise \$125,000,000 in its national campaign this fall: The USO (United Service Organizations), United Seamen's Service, War Prisoners Aid, Belgian War Relief Society, British War Relief Society, French Relief Fund, Greek War Relief Association, Norwegian Relief, Polish War Relief, Queen Wilhelmina Fund, Russian War Relief, United China Relief, United Czechoslovak Relief Fund, United Yugoslav Relief Fund, Refugee Relief Trustees and the United States Committee for the Care of European Children.

More than 1,500 Navy overcoats for V-12 trainees—engineers and pre-medical students—and for aviation cadets arrived at the University of Texas recently. The temperature was 99.6 degrees—the hottest day of the season to date.

Texas farmers sold 74 million dollars worth of agricultural products during May, compared with 54 million in May, 1942, a University of Texas business research statistician reports. Higher prices

Congressman Geo. Mahon Leaves Washington

Washington, D. C., July 12—Congressman George Mahon left Washington this week for Texas where he expects to visit and confer with the people in each of the twenty-five counties of the 19th District during the Congressional recess. In commenting on the general situation prior to leaving Washington, Mahon said: "It must be frankly admitted that on the home front the situation is not altogether wholesome. There has been too much bungling and waste and too much bitterness even among high officials of the Government. On the other hand there is no cause to despair; our Country is fundamentally united and there will be no home front collapse."

Mahon added: "We must also be frank with ourselves in regard to the war. We have a long road ahead and we have no reason to feel that all is over but the shouting. But there can be no doubt that we are on our way to victory. Our cause is just; we have an unshakable determination to win; we have the best fighting force in the world, both from the standpoint of men and equipment, and this force is growing stronger by the hour. We are greatly outstripping the enemy in the production of planes and weapons and our margin of superiority is rapidly increasing. We are licking the submarine and this makes possible a closer approach to an all-out offensive. Nine million Americans are in uniform and our military leadership is superb. This all adds up to final victory."

LET CAVANAUGH DO YOUR JOB PRINTING

Car Owners May Learn How to Use Ration Books

Lubbock, July 15.—There are going to be some awfully red faces and some motorists who are going to get used to the idea of walking Howard Gholson, district director of the Office of Price Administration, advised today. Through-out the Lubbock district covering 71 counties ranging from the top of the Panhandle to Brewster on the Mexican border, legal investigators have been busy checking license numbers and A, B, and C windshield stickers.

There have been some very interesting findings, the OPA chief revealed. For instance, if a man from Breckenridge is seen at a Lubbock night club or a Lubbock man at a fishing resort on the Pecos, they may have some tall explaining to do to their local War Price and Rationing Boards on how they are using their gasoline coupons. The "B" and "C" coupons are special allotments for business or emergency purposes and not to be used in wearing out tires on pleasure trips, Gholson said.

Local ration boards are authorized to call in a motorist found to be violating regulations and take away his rations or refuse renewal of coupons when he next applies, the OPA director pointed out. Many boards in the district have found that motorists who were tempted to speed have slowed down to the legal limit when they learned they were in danger of losing rations, he added.

Texas has an abundance of mineral springs and wells, and the manufacture of mineral crystals has become an industry in several places.

Mus' Transfer School Students This Month

Clarence Guffee, County School Superintendent, announces the deadline on transfer of children this week. July is the last month in the year for you to transfer school children Mr. Guffee stated. Applications for transfer may be made in the County Superintendents office.

Special attention is called to parents who are under the impression that if a child starts to a certain school that automatically transfers him. There is no such thing as automatic transfer. Keep this in mind and see that your children are transferred during the month of July.

List of Grand Jurors for Regular Term

Following is a list of grand jurors which were empaneled Monday to serve this term of District Court:

L. L. Jones, B. F. Harper, Earl W. Edwards, A. D. Monk, J. W. Jennings, W. M. Knight, G. L. Snodgrass, Geo. Finkner, W. E. Miller, Hary Hartman, A. T. Erment and P. F. Bertrand.

The grand jury was in session two days, adjourning Tuesday afternoon.

Thirty-one new student nurses started training recently at the University of Texas College of Nursing in Galveston. Another new class will open October 15 to help meet the demand for trained nurses for work at the war fronts and on the home front.

Turnips Prove to be Money Maker in Victory Garden

Members of the A. C. Curlee family of Pledger, Matagorda County, had a three-acre turnip patch from which they grossed \$360. In addition, they ate lots of turnips at home and gave many away.

Another turnip story comes from Washington County where Doris Koester of the Wonder Hill 4-H Club has kept turnips stored in sand in her cellar for five months. Those which remain still are in good condition.

Eastmen Urges Civilian Travel Easement

"Everyone must realize that the appeal to refrain from unnecessary travel 'means me' and applies today as well as tomorrow," Joseph B. Eastman, director of the office of Defense Transportation, asserts. "The type of travel represented by trips home for the week-end, trips to other cities to visit friends, and other trips for purely social or pleasure purposes, is strictly non-essential and should cease. In every town and city in the country the people ask—every day—'what can I do to help win the war?' One of the ways is to cut out unnecessary travel. And remember—that applies to you as well as the other fellow."

Beeswax Is Needed In War Work Materials

War is a glutton for raw materials. It wants more or less of practically everything made by man and nature, even a rather obscure product like beeswax. Beeswax has been found to be an excellent ingredient for making coatings for fighting planes, lubricant for shells, and for many other purposes in the military forces.

Before the war began a substantial part of the beeswax used in the United States was imported. But since most of this supply no longer is available domestic beekeepers have been asked to make up the shortage.

Dr. H. G. Johnston, entomologist for the A. and M. College Extension Service, suggests that one big opportunity to get more wax is to save all of the odd bits which ordinarily go to waste. For example, keepers should scrape all of the burr combs from the

frames when honey is being extracted—in fact, scrape the wax from everything about the hive, and save every bit of comb no matter how small.

A further supply may be obtained by culling out the poorest comb in ten, along with combs which have large patches of drone cells. The drone cells are good only for storage, and are last to be filled. While culling, Dr. Johnston adds, weed out crooked and broken combs and any combs which have been chewed by mice. Replace them with sheets of foundation to obtain better built combs during this year's flow of honey. Culling will not seriously cut production of honey.

In addition, says Dr. Johnston, culling is a paying practice at any time. With good worker combs the bees can work more efficiently, the hives have fewer drones to feed, and the worker bees are less likely to swarm. And with wax bringing 41 1-2 cents a pound cash, culling also pays for the time it takes.

The wax may be sold to beekeeping supply dealers, and is a valu-

able contribution to needed war materials, Dr. Johnston says.

Only one Texas business concern had to go into bankruptcy in May and one in April, as compared with pre-war monthly totals which sometimes went as high as 20 or 30, University of Texas Bureau of Business Research records show.

If Hitler wins, the issue for you will be living itself and not just the cost of living. Think that over and figure it out for yourself how much beyond 10 percent of your family income you should put into War Bonds every payday.

Throw your scrap into the fight.

Don't spend your pay in competition with your neighbors for scarce civilian goods. Save, America, and you will save America from black markets and runaway inflation. Buy more Bonds every payday. How many bonds? Figure it out yourself.

Restrictions
Placed on
Building Material

Recent months there has
been a tremendous increase in the
building, repairing, or
altering in Floyd County. Very
restrictions have been set
by the War Production Board
and Federal Housing Administration
approval of building.
The Justice Department in-
terference these regulations
the desire of the Floyd
County War Board that no
one be penalized because of
not understanding the order,
the following information is given:

War Production Board approval
is necessary for farm construction
except for certain exemptions.
Construction in a city must be ap-
proved by the Regional Office of
Federal Housing Administration,
Dallas, Texas, except for similar
exemptions.

The following types of construction
are permitted without War
Production Board or Federal
Housing Administration approval:

1. Ordinary maintenance and repair without change of design. Maintenance and repair is not exempt where a single job is partly maintenance and repair, and partly new construction.
2. Residential construction where the total cost is less than

\$200 over any continuous 12
months period after September 6,
1942.

3. Agricultural construction
(not dwellings) serving a single
farm where the total cost is less
than \$1000 over any continuous
12 month period after September
6, 1942.

4. The reconstruction or restora-
tion of residential construction
damaged or destroyed by fire,
flood, tornado, earthquake, act of
God, or public enemy, provided
the construction does not exceed
\$5,000 and an application is filed
within two weeks.

5. The reconstruction or restora-
tion of agricultural construction
damaged or destroyed by fire,
flood, tornado, earthquake, act of
God, or public enemy, where the
USDA determines that immediate
reconstruction is essential to the
agricultural program provided an
application is filed within two
weeks.

In considering the cost of con-
struction the materials and the
labor must be included.
Construction should be avoided
if it does not help the war effort.
The test for all construction should
be: "Will it help win the war?"
Postpone all construction not ab-
solutely necessary for maintenance
and repair.

MANY THANKS, WHEAT
FARMERS

The Farmers Grain Company is deeply ap-
preciative of the excellent patronage it has received
this year. As in past seasons, we have done
everything possible to run our elevators in keeping
with the times and needs.

The patronage we have received at our elevators
of Floydada and Boothe Spur has been most
encouraging. The Farmers Grain Company is op-
erating for the benefit of our customers and we are
pleased to serve you during this harvest.

Texas Home Dem-
onstration Ass'n to
Meet in August

Rural women who are fighting
the Axis with war bonds, pressure
cookers, and sharp hoes will re-
port their progress at a war-time
convention of the Texas Home
Demonstration Association sched-
uled in Dallas August 17-19. "The
Battle on the Home Front" will be
the theme of their meeting.

Plans for the convention were
made at a recent session of the
executive committee held in Dal-
las. Executive members predict
that approximately 300 delegates
of the Association's 48,000 will
come to share their ideas, despite
the pressure of work on the farm
and in the farm home.

Mrs. W. G. Kennedy of Hamil-
ton County, the Association presi-
dent, has announced that the con-
vention will be streamlined in ac-
cordance with war demands—no
banquets or elaborate entertain-
ments. Speakers will be drawn
largely from the Association's
membership, and one feature of
the program will be pageant por-
traying the Association's activities
during the last year. Episodes will
be presented by the 4-H, market-
ing, education and recreation com-
mittees under the direction of Mrs.
Leon Sullivan of Ellis County,
vice president at large.

An election to determine the
the Association's officers for the
next two years also is scheduled
according to Helen H. Swift, soci-
ologist for the A. and M. College
Extension Service, who serves as
an adviser to the organization.

This is the Association's first
convention to be held in Dallas.
Mrs. John Peavy, chairman of the
Dallas County Home Demonstra-
tion Council, is serving as chair-
man of local arrangements.

Contrary to the old saying,
lightning usually strikes more than
once in the same place. Engineers
of the Westinghouse Electric &
Manufacturing Company took a
photograph in North Carolina of a
thunderbolt that consisted of 31
consecutive separate strokes, all
occurring within six-tenths of a
second.

The 1,111 Navy engineers and
pre-medical students assigned to
the University of Texas for train-
ing under the new V-12 program
must stay within three blocks of
the campus during the week, and
"bounds" for their week-end lib-
erty is a five-mile radius of the
Capital Building!

Mrs. Mollie A. Morton, Owner

Whole Family Attend College at Denton

Denton, Texas, July 15.—Dad, Mother, a son and two daughters—they're all students on the North Texas State Teachers College campus this summer.

The cause back of it all was an NT romance in 1917 with its setting in a history class where S. W. Rollins met Corine Smith. He helped her with history lessons; she found it such a fascinating subject that she promptly changed her major. The following spring,

he influenced her to change her name.

Now, 26 years later, Mr. and Mrs. S. W. Rollins have returned to North Texas with their three children. They are both classified as juniors, with Mrs. Rollins still majoring in history and Rollins majoring in industria arts.

Daughter Carolyn, age 17, is a college freshman and a library major; Evelyn age 13, is a sophomore in the college Demonstration High School; and Proctor, age 15, is a senior in the same school.

Flour milling is one of the pioneer industries of Texas.

Let Cavanaugh do your printing

Reduction in Moisture Prepares Grass for Silage

Farmers in recent years have proved that grass silage keeps satisfactorily and makes excellent feed for all types of livestock, but most of the silage has been made by using molasses or phosphoric acid as a preservative. Ohio State university agronomists say grass silage will keep well without preservatives if the silo really is airtight and if the forage contains between 60 and 70 per cent of moisture when placed in the silo.

Standing grass or legumes contain more moisture than 70 per cent so they should be allowed to wilt after cutting if the material is to be made into silage without using a preservative. Usually the moisture content must be brought down from the original content about 78 per cent to a safe 68 per cent. The removal also makes the grass at least 10 per cent lighter to handle.

Silage is preserved by the formation of acids that are derived from the fermentation of sugars in the plants. Removing part of the water from a plant does not increase the total amount of sugar present but it does increase the proportion of sugar to total weight after part of the water has been evaporated.

Leakage from the bottom or sides of a silo is likely to occur if silage contains more than 70 per cent of moisture, and the liquid which is lost contains an important amount of nutrients. Forage which is properly wilted will not lose liquids by leakage.

Rabbits Can Be Controlled If They Damage Crops

Rabbits may sometimes invade home gardens and cause serious damage, as they return day after day to feed on the carefully tended crops. If weeds, grass, and brush are near the garden, these animals are likely to cause some damage.

A good wire fence around the garden will keep these animals out, but it is expensive. Furthermore the wire for such a fence is not available to a gardener at present.

In the country, or in suburban districts where shooting is safe, a gun may easily be used to control rabbits if the law allows this where rabbits are damaging crops. Rabbits are most active from twilight until early morning.

Repellents are not often effective, since strong chemicals of this sort damage the plants. Nicotine sulfate may reduce rabbit injury, but it must be sprayed on the plants every few days, and after every rain.

Simple box traps, baited with apple or carrot, are probably the best means for rabbit control. Several of these placed in the garden near the borders where the animals enter, will enable the gardener to put a stop to their damage.

Rogue Raspberry Mosaic

When symptoms of red raspberry mosaic are most easily detected agriculturists advise growers to take advantage of it and start roguing all diseased plants immediately. Although this virus disease is most serious on black raspberries, it can also be very destructive to red and purple varieties. The best control measure is the removal of all plants showing the symptoms.

You can identify red raspberry mosaic by large irregular green blisters or swellings on the leaves, surrounded by yellowish green tissue. Diseased plants are stunted and the leaves have a dark green and yellow speckled appearance. New growth is shorter than that of healthy plants, and fruits of diseased plants are usually dry, seedy and tasteless.

When roguing, remove and destroy not only the young shoots showing the symptoms, but also the entire mother plant from which the shoots grow.

Fortunes Told on Ox-Bones

The Bronze age Chinese predicted future events or tried to learn the outcome of their plans by consulting their ancestors. To do so they inscribed a question on the shoulder bone of an ox or on a piece of tortoise-shell. Then they applied heat to the other side of the bone. This produced a crack upon the face. The direction in which the crack ran was believed to indicate a positive or negative answer to the query. It is due to this practice of divination, known as scapulimancy, that we know as much as we do about the Shang people at Anyang, because great piles of used oracle bones have been discovered and translated. Thus we know what the Shang people worried about, and what was foremost in their minds. The Black Pottery people also practiced scapulimancy in a primitive form.

Counsel Women in Plants

The field of personnel administration in industry was virtually closed to women prior to the war, but today production heads find it necessary to adjust policy and practice when employees in slacks replace workers in overalls. The women's counselor, between the actual job supervisor and the executive personnel officer, is charged with the duty of fostering good employer-employee relationships. Successful accomplishment of the counselor's functions will lessen the resentment of foremen and male employees against women as co-workers and will aid the woman in adjusting herself to factory life.

26,741 Farm Laborers Placed Early in June

College Station—A total of 26,741 farm laborers were placed on Texas farms during the first two weeks of June by county agricultural agents with the assistance of the U. S. Employment Service and local farmer committees, according to reports compiled at the headquarters of the Texas A. and M. College Extension Service. Placement offices have been opened by the agents in 226 counties.

TEACHERS TO BE SCARCE FOR COMING SCHOOL YEAR

Teachers for Texas schools are going to be even more urgently needed this year than last, predicts Miss Miriam Dozier, secretary of the University of Texas Teachers' Appointment Committee.

The committee has on hand calls for more than twice as many teachers as it can fill with the applicants in its files.

Since January 1 more than 1,000 requests for teachers have been placed with the committee, she said.

The greatest shortages, explained, are in commercial work, science, mathematics, and physical training-coaching.

UNIVERSITY OF TEXAS IS SELECTED AS DEPOSITORY

Austin, July 15.—Selected by the government as a depository for government-issued war motion pictures, the University of Texas Visual Instruction Bureau is one of a very few film libraries to receive this growing collection.

Purpose of the government in this move is to preserve the films as a permanent historical record of the war. The University bureau is permitted to issue them for occasional showings, bureau officials said.

Cool Summer Things

NEW MID-SUMMER COLLECTION OF DRESSES

Printed Sheers! Sheers and Cottons!

Our dress buyer hand picked an extensive collection of summer fashions—they're the most popular—they're the fabrics—they're the styles favored this season—all fittingly styled with elegant cut, line and fit—all makers long noted for their excellence of tailoring and leadership—find solids, medium or large prints, checks and plaids in one piece models—and the prices all very reasonable.

A LOVELY SELECTION OF COOL SUMMER HATS ARE AWAITING YOUR CHOICE

Lighthearted hats with a genius for flattery. We've tailored darlings and frivolous styles in fabric, felt and straw, all expertly fashioned in the season's latest styles. They're the kind of hats that evoke more and more compliments with each wearing!

"ARE PERSONAL LONG DISTANCE CALLS OUT OF THE QUESTION?"

"NO INDEED!"

"We usually have plenty of circuits to any town within 100 miles. Especially if it is not a busy war town, and is not near big cantonments."

"I wouldn't want to delay war calls."

"A great many of our shorter lines do not carry war calls. Only when the operator tells you the lines to a town are busy is it necessary to consider whether you need give up the less important, personal calls."

SOUTHWESTERN BELL TELEPHONE CO.

Vanilla ICE CREAM

<p>1/2 cup Sugar 1 tablespoon Flour 1 cup Milk 1 teaspoon Vanilla 1 cup Light Cream</p>	<p>1/2 cup White Corn Syrup 1/4 teaspoon Salt 1 Whole Egg, or 2 Egg Yolks, slightly beaten</p>
--	---

Mix sugar, corn syrup, flour and salt, stir in milk, cook over boiling water, stirring constantly, until slightly thickened. Cover and continue cooking for ten minutes. Stir a little of the hot milk into the egg, then stir into the remaining hot milk. Cover and cook about 5 minutes or until mixture coats the spoon. Cool, add vanilla and cream.

ICE

War has brought many restrictions, but there is no SHORTAGE OF ICE—use it freely! It's so easy—so economical to assure freshness and vitality of your precious foods with ICE. It's so important to the war effort to let ICE remove the danger of food-spoilage.

Funny How Everybody Still Calls it the "Light" Bill

Funny, isn't it, how we still call it the "light" bill?

"I can remember when it really was the 'light' bill... and we were mighty proud to have just electric lights.

"In those days we paid about as much every month as we do now, and all we got was light. Sometimes we weren't even too sure of that.

"Just think how much more we get now for our money. To start with, we light our homes a lot better... then we wash and iron the clothes, protect our food, clean the rugs, toast the bread, run the radio and give electricity dozens of other jobs to do every day... and that's what I call getting a lot for our money!"

Yes, Mr. and Mrs. Homemaker, Electricity is today's biggest value. Despite the general trend of upward prices, your Electric Rates have continued to come down.

Our constant aim is to keep on giving you better and better service at less and less cost!
