The Floyd County Plainsman

FLOYDADA, FLOYD COUNTY, TEXAS, THURSDAY, MARCH 30, 1944

April 27 to May 3 is Proclaimed Texas Aviation Week

Senator Coke Stevenson has proclaimed the week of April 27 to May 3 to be Texas Aviation Week and called upon all agencies and individuals interested in aviation to avail themselves of the opportunity of attending the 3rd Texas Aviation Planning Conference to be held at the Agricultural and Mechanical College of Texas, May 1, 2 and 3.

In 1942, the Texas Aviation Conference is sponsored by the school of engineering of Texas A. and M. College in cooperation with Southern Flight, a magazine. Between 400 civilian and air corps representatives registered at the aviation conferences held in 1942 and 1943.

On account of the increasing importance of the air arm of the United States in the war and in the peace to come, a larger attendance is looked for on May 1, 2 and 3.

The program for the 3rd Texas Aviation Planning Conference shows the discussions will be divided into two general fields, as stated by Howard W. Brown, head of the Texas A. and M. Department of Aeronautical Engineering, are: (1) present day aviation problems of a national all-out effort to win a victory including industrial training, personnel, production, public relations; and (2) future problems, involving private flying, commercial air transportation, and aviation legislation. Resolutions have been extended to individuals interested in aviation to attend their annual or regional meetings at the Texas A. and M. College during the Aviation Conference. These are National Aviation Trades Association, Aviation Association of America, National Association of Colleges and Universities in Aviation Training and Civil Air Patrol.

Agencies participating in the Aviation Conference are schools, colleges, manufacturers, operators, engineers, civic groups and others. Also scheduled to be well represented are the flying branches of the armed services.

The State of Texas has become increasingly important to both the military and training in aviation and the manufacture and maintenance of aircraft," Governor Stevenson said. "Particularly the true concerning army and navy training and aircraft production and use." His proclamation tribute to the "large and growing Department of Aeronautical Engineering" of the Texas A. and M. College.

Floyd County Men Volunteer for Service

The following registrants of the Floyd County Local Board, have volunteered for service, and have been inducted:

Delbert T. Morse, Floydada, forwarded for Air Corps Cadet Training; Joe T. Alexander, Floydada and M. W. Norton, Floydada forwarded for Naval Service.

Registrants who sign an application for voluntary induction, and a request for immediate induction, are forwarded to Induction Stations immediately, instead of holding until regular call date, and are credited to the next regular call of the local board with whom they are registered.

George Edward Allen, transfer from Portales Board, was also forwarded as a volunteer for the Naval Service, and has been inducted.

Recent rulings of National Headquarters for Selective Service, affecting registrants between ages 18 and 26, will make very little difference in the numbers reclassified by the Floyd County Board, since there are very few registrants in that age bracket, that are enjoying occupational deferments, except in the farming class, which is not included in the groups to be reclassified. However, all farm classifications will be regularly reviewed, to determine that the registrants so deferred are essential, and that the farm production meets the requirements. It is not anticipated that this board will fail to meet all calls for men, at least for the present. However, care will be taken, that those men absolutely essential to the War effort, will be given deferments, where they actually qualify for same.

Rationing Calendar, April 1 to April 15th

Sugar: Stamps No. 30 and 31 Book 4, good for five pounds, indefinitely. Stamp No. 40, Book 4, good for five pounds sugar for 1944 home canning.

Meats and fats. Book 4 red stamps A8, B8, C8, E8, and F8, good for 10 points each—valid indefinitely.

Processed Foods: Book 4, blue stamps A8, B8, C8, and E8 are good for 10 points each, valid indefinitely. F8, G8, H8 J8, and K8, good for 10 points each, valid April 1, good indefinitely.

Shoes: Book 1, stamp No. 18, expires April 30. Book 3, stamp one with airplane picture, is good for one pair indefinitely.

Gasoline: (Coupons must be endorsed on front.) "A" coupons, 3 gallons each with No. 11 expiring June 21. In B-2, B-3, C-2, and C-3 books the coupons nationally have a value of 5 gallons each. Other "B" and "C" coupons, including B-1 and C-1 still outstanding, will retain their two-gallon value. "R", 5 gallon (valid for bulk delivery only), "T", 5 gallons, "D", one and one-half gallon, and "E", one gallon each.

Tire Inspection: "A" book holders before March 31, 1944; "B" before June 30; "C" before May 31; and "T" every six months of every 5000 miles, whichever comes first.

Mrs. Ama Smalley, of Clovis, New Mexico, visited with relatives and friends here over the week end.

Cut yourself a piece of world

AFTER THE WAR, this world is really going to be something . . . provided you start carving a piece for yourself right now!

There's an easy, profitable way to do it. That's by buying War Bonds. By sticking every dollar you possibly can in interest-bearing War Bonds.

Let Uncle Sam take care of this money for you. At the end of ten years he'll give you back \$4 for every \$3 you

gave him to hold for you. There isn't a safer investment in the world!

In this way, when the bonds mature, you'll have security—peace of mind with which to enjoy the peace.

Most likely, you are buying Bonds. But remember—the more money you invest in them now, the more you're going to get back later! So start increasing your War Bond Savings. Start in right now!

WAR BONDS to Have and to Hold

[This is an official U. S. Treasury advertisement—prepared under auspices of Treasury Department and War Advertising Council]

The Sugar Supply Situation is Still Tight

"The sugar supply situation is still tight," Regional OPA Administrator Max McCullough declared this week, "despite mishandling of information on the subject which has led the public to believe there will be a surplus this year." McCullough pointed out that previous statements, attributed to another agency in charge of production and supply, to the effect that there would be a sugar surplus in 1944 of 1,800,000 tons brought about this erroneous idea.

"We have asked our War Price and Rationing Boards to issue sugar for home canning purposes as sparingly as possible this year because of the tight supply situation," he said. "We realize that we can't hold down the average to 10 pounds per person on the basis of misleading information which has been widely disseminated.

"The true sugar supply picture is that this nation will have a total of 6,529,098 tons of sugar for use this year by all civilians, the United States armed forces and our allies, and more than 1,000,000 tons will go into the manufacture of industrial alcohol for war purposes.

"The share for civilians this year is approximately 5,074,906 tons, or 6 per cent less than the 5,400,000 tons consumed by them in 1943."

These figures were supplied by the War Food Administration,

which said: "The shortage of labor and equipment as well as shipping conditions to limit the supply of sugar available for civilian, military and lend-lease needs."

Rationing Boards will be requested again to hold down on canning sugar issuances, but where definite need can be established, home canners will receive sugar as they did last year, the Administrator stated. "The people who got the sugar last year for canning purposes and then did little or no canning are those who will have to do without this year."

1940 SILAGE BOOSTS PRODUCTION OF DAIRYMAN

When Marshall McKenzie, Hopkins County dairyman, began feeding some 1940 silage to 10 cows a few weeks ago, he found it was in excellent condition. By the end of the month, he has reduced his cows to nine and still was getting an increase of more than 50 per cent in milk production, he told his county agricultural agent, Mark Buckingham. The amount of hay the cows consumed was considerably decreased.

OLD CHAIRS ARE BEING PUT BACK IN SERVICE

Four chairs more than 100 years old recently were re-caned by home demonstration agent, Marie A. Neff. One rocking chair put back into use was a wedding gift of 50 years ago. Demonstrations on re-caning in seven communities soon resulted in the completion of 25 chairs.

A New Work Text "Exploring the Industries"

College Station, March 30.—Covering many fields in work-shop and laboratory techniques in industry, a new work text, "Exploring the Industries," has been compiled by Chris H. Groneman, acting head of the Industrial Education Residence Department, and E. L. Williams, head of the Department of Industrial Education of the Agricultural and Mechanical College of Texas.

Although primarily designed to be used as a text book in connection with laboratory courses in college work, the book will be invaluable to industrial shops and laboratories as well as to laymen following crafts and trades as a hobby.

Profusely illustrated, "Exploring the Industries," takes up practical application of theories in drawing and planning, wood-working, benchmetal crafts, forging, sheet metal and art metal work, and electricity.

The book already has been placed into use in the Texas A. and M. shops and laboratories, both in the college proper and other branches of the educational system.

Miss Muriel Fagan, of Lubbock, visited over the week end with her mother, Mrs. Pearl Fagan and other relatives.

Throw your scrap into the fight.

Plane Victims Announced In Floydada Crash

Colorado Springs, Colorado, March 28.—Nine persons were killed Sunday night when an Army Liberator bomber from Peterson Field here crashed and burned three miles west of Floydada, Texas, Col. William Lewis Jr., station commandant, announced Monday night.

The dead: Second Lt. Leslie A. Porter Jr., Oakland, N. J.; Second Lt. Donald Novak, Throop, Pa.; Second Lt. James A. Garvey, New York City; Second Lt. Frank P. Czighuth, Allentown, Pa.; Sgt. Joseph M. Miller, Chicago; Sgt. Harvie S. Vance, Kernersville, N. C.; Sgt. George L. Thomas, Cochranville, Pa.; Sgt. James L. Driver, Memphis.

Control of Garden Insects Will Boost Home Production

College Station, March 30.—Destructive insects take an estimated toll of 20 per cent of the possible yield of home gardens yearly. But Paul Gregg, assistant entomologist for the A. and M. College Extension Service, assures gardeners that vegetable insects may be controlled by inspecting plants often, and when the first invaders appear dispatch them with poison or picking by hand before they can lay eggs and hatch a new generation.

The most effective control will be obtained by applying insecticide uniformly to all parts of the plant. The lower surface of the leaves should be covered as thoroughly as the upper side so that every insect present gets a dose of poison quickly. Don't apply an excessive amount because lavish dusting or spraying is wasteful and sometimes injures plants.

Another important factor in the program of control is a ready supply of the most commonly needed insecticides. If rotenone is obtainable, it can be used to destroy cabbage worms and beetles which suck the juices from plant leaves and stems. If rotenone cannot be had, cyrolite or lead or calcium arsenate may be substituted in dealing with the leaf eaters, and nicotine sulphate for the juice-sucking cutworms, sow bugs, grasshoppers, mole crickets and wingless May beetles. Spread it near the base of plants in the late afternoon.

Gregg says that plant lice are probably the most common and destructive of pests. They attack most vegetables, especially turnips, radishes, mustard, cabbage and similar plants, and control measures should begin as soon as they appear. Rotenone dust or nicotine sulphate as a dust or spray give best results. But since lice are killed only when hit by the insecticide thorough application on both sides of the leaves is essential.

Inspect plants frequently, Gregg recommends. Attack the bugs early and half of the battle for control is won.

.65 OF AN INCH OF MOISTURE FELL TUESDAY MORNING

Floydada received .65 of an inch of moisture early Tuesday morning, following which light snow and sleet continued most of the day. The temperature was reported as low as 12 Tuesday night. The moisture will greatly benefit the wheat at this season.

Annual School for Firemen to be on May 29, June 2

College Station, March 30.—Dates for the Annual School for Firemen, conducted by the Department of Chemistry of the Agricultural and Mechanical College of Texas under auspices of the State Firemen's and Fire Marshals' Association of Texas, have been announced as May 29 to June 2, after a poll taken of the fire departments of Texas cities and towns showed almost unanimous approval of again holding the instructional short school this year.

These schools are conducted at the Texas A. and M. College each year for the particular benefit of volunteer firemen in the smaller towns and rural areas. With fire departments undermanned and some of the younger and more capable men called for similar duties in the armed services, the 1944 firemen's school is more important than any of the fourteen held in the past from the standpoint of civilian protection, Dr. C. C. Hedges, head of the Department of Chemistry, pointed out.

Three primary courses highlight the program for the 15th annual firemen's school: Red Cross Lay-Instructor's First Aid Course, General Basic Firemen's Training, and Fire Department Instructor Course. The latter course is designed for those who have acquired the fundamentals of fire prevention through completion of the general basic training course. Where a community has a fireman completing general basic training or the instructor course and returns to his home department, his community gets a 3 per cent credit in the whole town fire rate.

Dates for the 1944 firemen's school have been arranged to come between terms in regular student curriculum at the Texas A. and M. College, thereby assuring sufficient dormitory space for the 400 to 500 Texas firemen expected to attend.

Work is under way at this time in drafting the full course of instruction details, selection of speakers for general assembly sessions, and designation of leaders and assistants for the various fire prevention drills and evolutions.

In addition to the benefits derived from this annual school for firemen here at the Texas A. and M. College, Frank Williams, chief of field instruction for the firemen's school, works through the year with the fire departments of Texas cities and towns, meeting with high school superintendents, mayors, fire commissioners and others interested in fire prevention work, and teaching the basic fire department evolutions to new members of these departments.

YARD UPKEEP IS SMALL—ABOUT 50c PER MONTH FOR THIS LADY

College Station, March 30.—Cost of the upkeep of her yard demonstration averages about 50 cents per month, Mrs. Leroy Williams of Willacy County estimates. This cost covers the purchase of new plants and trees. Mrs. Williams explains to Mrs. Hazel Martin, county home demonstration agent of the Texas A. and M. Extension Service, that the use of native shrubs enables her to keep the cost of her yard demonstration so low. She also does her own pruning.

He who sleeps like a log often sleeps like a log with a saw going through it.

Throw your scrap into the fight.

No-Point—Low-Point Foods Campaign Stressed

In co-operation with the War Food Administration's campaign to encourage greater consumption of No-Point; Low-Point Foods, the Independent Retail Dealers of this area are conducting a "Fresh From Keith's Week", March 27th through April 1st, calling particular attention to the abundant supply of "No-Point" fresh fruits and fresh vegetables now available from the winter garden districts.

This campaign is intended to help (1), create larger sales of unrationed and low-point value foods, and (2), advise the public of the most practical method of sharing the nation's precious food supply by giving emphasis to the nutritional food value of fresh fruits and fresh vegetables in the daily diet.

Of Special Interest to Discharged Navy Men

Dallas, Texas, March 30.—Former enlisted personnel of the Navy who hold certificates of discharge previously issued "under satisfactory conditions" may now exchange them for "Certificates of Discharge Under Honorable Conditions." The change in the title of this class of discharge, authorized by the Secretary of the Navy, was effected to express more clearly the circumstances of the discharge, Eighth Naval District Headquarters has pointed out.

Ex-Navy men or women desiring to make the exchange may apply in writing, forwarding the certificate they now hold, to the Chief of Naval Personnel, Navy Department, Washington 25, D. C.

Naval activities authorized to issue new certificates include main Navy recruiting stations, the Commandants of all Naval districts in the continental United States, the Commandants and Commanding Officers of U. S. Naval Training Stations, the Commanding Officers of receiving ships and stations in the continental United States, and the Chiefs of Air Training Commands.

Only those who hold certificates of discharge "under satisfactory conditions" are eligible for the new "Certificate of Discharge Under Honorable Conditions," which is now being issued in place of the discharge "under satisfactory conditions." Those who hold any other type of discharge from the Navy are not eligible for an exchange.

The Navy now issues three types of discharge certificates. They are (1) Honorable Discharge, (2) Certificate of Discharge Under Honorable Conditions, (3) Certificate of Unfavorable Discharge.

MRS. CHARLIE HOWELL DIES IN AMARILLO

Mrs. Charlie Howell, former resident of Floydada, died in an Amarillo hospital Tuesday night according to information received here early Wednesday morning by Miss Beatrice Davis. Mrs. Howell had been ill about two weeks.

During the time Mr. and Mrs. Howell lived in Floydada Mrs. Howell was employed at King's Variety Store and Mr. Howell at the Consumers Fuel Association. They moved from Floydada to Amarillo about two years ago, where they were employed in defense work, and the latter part of 1943 they moved to a farm near Tulla where they had resided since.

Mrs. Howell's parents, Mr. and Mrs. Proctor, live in Crosby County, and it is understood that burial will be made at Crosbyton.

Mrs. Ersel Matthews, of Lubbock, spent the week end with her parents, Mr. and Mrs. W. G. Collins.

State Land Sale Is Announced By Bascom Giles

Bascom Giles, commissioner of the general land office, has announced the sale for May 2, of 225,000 acres of state school lands located in more than 75 counties throughout the state. In the announcement he said diversified soil and locations of the land should, in a large measure, meet the present unusual interest in and heavy demand for land purchases. One of the purposes of the sale is to convert property, now in the hands of the state, which in some instances, produces small revenue, into private ownership for development so that it will be rendered for taxes which will be beneficial to the schools and the counties as well as the state.

The terms for sale of public free school lands are attractive. An initial payment of one-fifth is required, and the remainder may be carried over a period of 40 years in an on-or-before note. The state retains a free royalty of one-eighth of the gross production of sulphur, and one-sixteenth of oil, gas and other minerals.

"Interest in the purchase of land is exceedingly high at this time due to the security of land investments which are comparable to the purchase of war bonds, and in addition thereto have the element of speculation which makes the purchase of land even more intriguing," Giles said.

Anyone interested may receive a list of the lands offered, together with instructions for bidding, by writing Bascom Giles, commissioner of the general land office, Austin, Texas.

Memorial Fund Is Left to Mary Hardin Baylor College

Belton, Texas, March 30.—One thousand dollars for the establishment of a memorial to Dr. and Mrs. John Hill Luther has been left to Mary Hardin-Baylor college in the will of their daughter, Mrs. Ollie Luther Jones, Waco, who died last year. Announcement of the memorial, the fourth to be established for outstanding individuals who have been connected with the college during its ninety-nine years, was announced this week by President Gordon G. Singleton.

An additional \$100 gift for the memorial also has been made by Miss Doris Jones, a daughter of Mrs. Jones and former student of the college, who is now director of her own puppet theater.

Dr. Luther was president of Mary Hardin-Baylor college from 1879 to 1891, having been president of the college when it was moved from its original site at Independence to Belton in 1886. He also is remembered for having written the Baylor Hymn, outstanding college song, and for his leadership in establishing the Memorial Baptist church of Temple, Texas.

Mrs. Jones was graduated from the college in 1893 and served on the faculty until her marriage to W. Goodrich Jones, prominent citizen of Temple for many years, who is now a well-known writer living in Waco, Texas. She was a sister of the late Anne Luther Bagby, first protestant woman missionary to South America and two of her grand-nieces, Priscilla Bagby and Helen Frances Smith, both of Brazil, are now enrolled at the college. Another of her daughters, Mrs. C. R. Voges of Beaumont, was graduated in 1918.

In announcing the two gifts President Singleton said that "we greatly appreciate these gifts for the establishment of a memorial to Dr. and Mrs. Luther. Dr. Luther steered the college through one of its most difficult periods of history most successfully. Unfortunately the college building memorializing Dr. Luther was burned in 1929, so that the college does not now have a memorial to this distinguished president and his brilliant and lovely wife.

"Surely the students who were here with Dr. and Mrs. Luther, together with those who have known and loved their children and grandchildren, all of whom bear beautiful and impressive testimony to their greatness and goodness, will wish to join with the members of the family in the establishment of a worthy memorial properly honoring them," pointed out Dr. Singleton.

FOR VARIETY'S SAKE

Serving beans or peas in white sauce is an excellent way to make a few look like more. For variety's sake, Mrs. Julia Kiene, director of the Westinghouse Home Economics Institute, sometimes adds finely grated cheese and uses one fourth teaspoon of dry mustard to bring out the cheese flavor.

NOT MARES OR LAMBS BUT LITTLE GOAT EATS WYOMING LICENSE PLATE

Worland, Wyo. —Regardless of what mares and lambs do, little goats eat Wyoming's 1944 plywood license plates. L. Z. Swing, Manderson, found out because he lost his rear plate to his neighbor's goat.

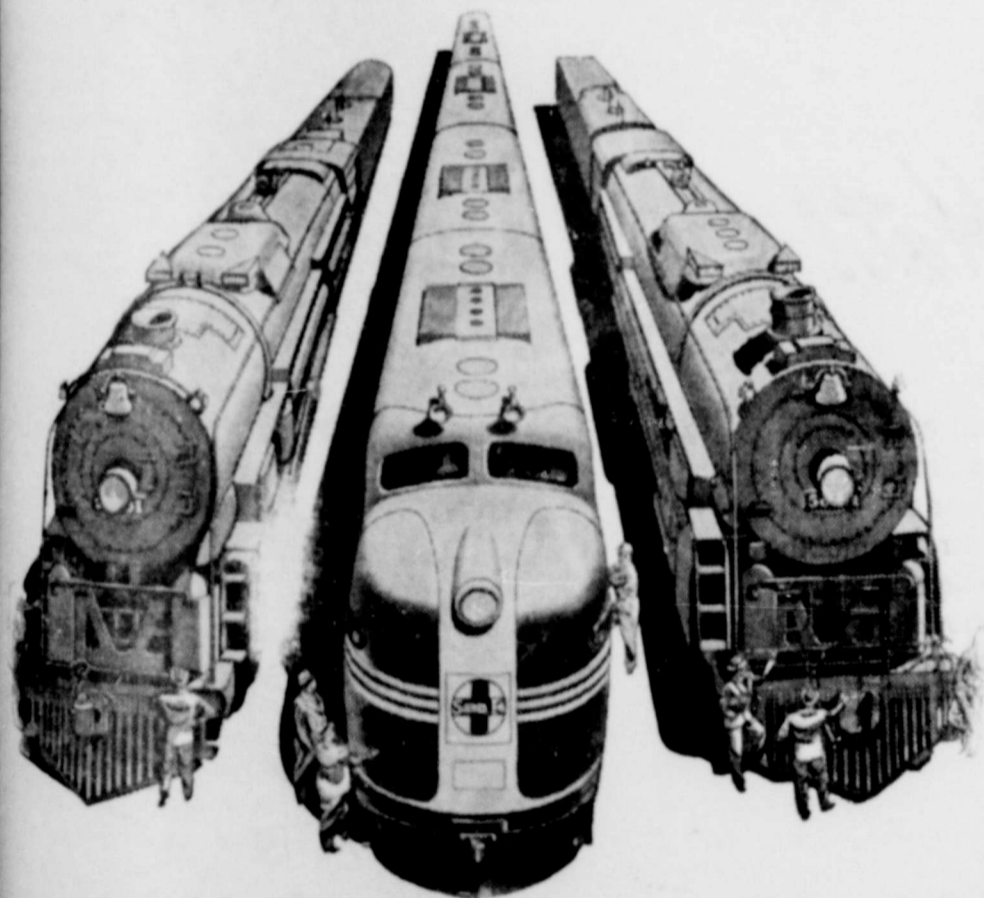

STEPHEN B. LEACOCK, FAMED HUMORIST, DIES

Toronto.—Stephen B. Leacock, Canadian economist and humorist, died in the Toronto General Hospital Tuesday night after an illness of several weeks.

TO DRY THOSE TEARS

Peel onions under running cold water and you won't shed a tear, say Westinghouse home economists, who also find that rubbing a little salt on the hands will absorb any remaining odor.

(Another chapter in the story, "Working for Victory on the Santa Fe")

New Steel Beauties on the Santa Fe

There isn't yet the ceremony in taking delivery of a new locomotive that there is in christening a ship.

But, just the same, it's a great occasion on the Santa Fe when we receive those super-powered, high-speed locomotives so badly needed today.

For every new one means "rolling" more and longer freight trains loaded with war materiel, and more trains operated for the increasing troop movements.

The three locomotives shown above are among the first delivered of the big fleet of powerful locomotives ordered by Santa Fe. And more are coming!

★ Locomotives illustrated above—new "4-8-4" steam locomotive, "2900 class"; 5400-horsepower freight Diesel; "2-10-4" steam locomotive, "5001 class." You can bet your driving wheels they'll pull a lot of freight cars fast!

Fit Deserters For War Front

Over Half of AWOL Men
Put in Fighting Trim at
Processing Center.

CAMP EDWARDS, MASS.—Within a heavy, barbed wire enclosure covering more than three acres of this military outpost the army is proving that it can make a good soldier out of a deserter from overseas duty.

It is here that the army has established its east coast processing center. It is one of the two in this country and until now has been veiled in military secrecy. Into the center pour men who have gone AWOL and have been picked up in states east of the Mississippi.

Program Is New

The program in operation is new. In World War I, men who went AWOL from their outfits at the embarkation points got little individual attention. Disregarding their psychological and sociological problems, the army thrust them back into the life from which they had fled and branded them as misfits.

Now, however, the army has recognized the individual weaknesses of such men and believes it has hit upon a method of returning its "black sheep" to embarkation ports fit, both mentally and physically, for battle. It is rebuilding their moral stamina, sapped by the fear of danger at the front.

Since the center was set up here, about 7,000 men have been processed. Its population varies with the movement of troops overseas and cannot be told, but it is revealed that 4,000 soldiers have been turned back to staging areas for overseas duty. About 450 have been judged misfits and discharged.

Specialists on Job

In command at the processing center is Lieut. Col. George A. Parker, a Boston attorney before being recalled to service. He rose from second lieutenant to captain in the First World War and came here from the 756th Military Police battalion at West Springfield, Mass.

On his staff are 13 doctors and two psychologists who weed out the "physical and mental unfit."

A soldier going AWOL is sent here after being picked up. The most frequent reason he gives for deserting is that he "wants to go home" to see his family or girl friend.

The deserter's civilian and military records are studied closely. Then a court martial is ordered and a sentence is pronounced. If a man appears to be what Colonel Parker terms a "bad actor," he is turned over to other military posts for more rigid rehabilitation or is discharged.

When a man, who has successfully passed through the center, is returned to an embarkation port, an effort is made to assign him to the same type of outfit from which he deserted. His background is kept confidential, however, and no stigma remains to endanger his future. If his record remains clean he gets an honorable discharge upon completion of service.

Smiths Replace 'Macs'

As Most Numerous Scots
LONDON.—The Smiths have now conquered Scotland. Whereas names beginning with "Mac" used to predominate, now the surname Smith outnumbered all others.

After Smith, the commonest names are MacDonald, Brown, Wilson, Thomson, Robertson, Campbell and Stewart.

These facts were disclosed by J. G. Kyd, registrar general for Scotland.

Dilution of the original Scottish stock is partly attributable, said Mr. Kyd, to the fact that 1,500,000 Scottish young men and women have emigrated from Scotland in the past 80 years—900,000 of them since the beginning of the century.

"The vitality of Scotland is being or has been sapped by export of the most virile of her people," Mr. Kyd complained. "The population is gradually growing older."

There has been a dramatic increase in the marriage rate during the war, but unless this is kept up after the war he could not anticipate an increase in the birth rate, Mr. Kyd said.

This Dentist in a Rut

Even When He Is Fishing
DES MOINES, IOWA.—Dentists get in a rut, too. Dr. T. G. Wheeler just couldn't get away from the extraction business even while fishing. The dentist hooked what seemed to be a sizable fish. After a tussle, the line went limp, and he reeled it in. You guessed it: the hook was imbedded in a tooth, which had been "extracted" from the fish's mouth.

Last of Warsaw Jews

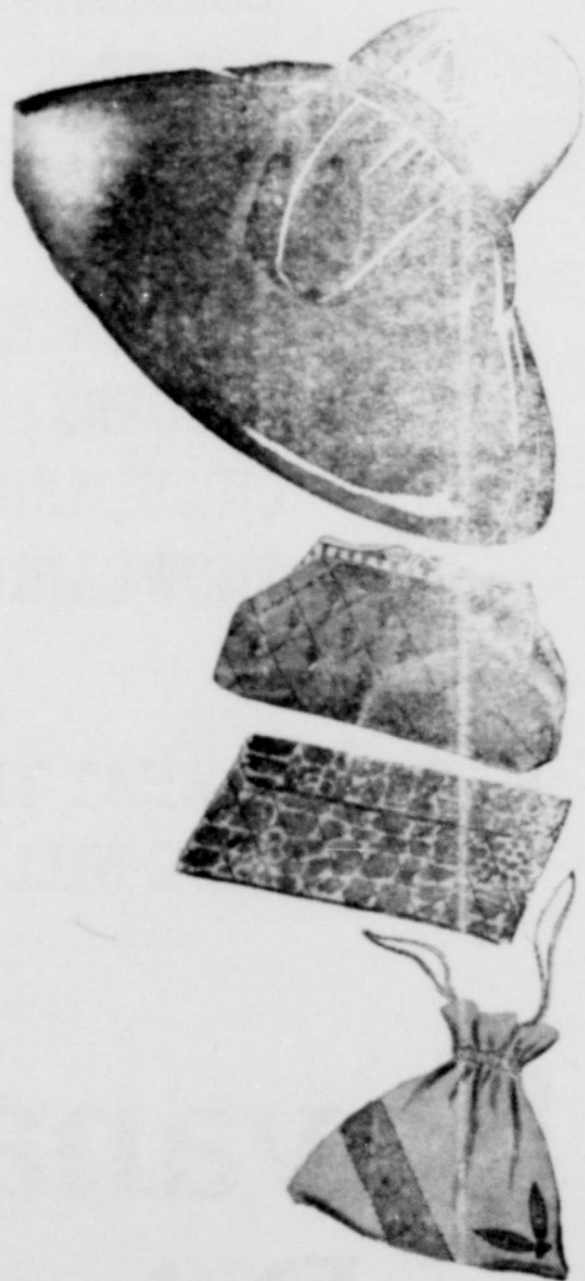

Interned, Poles Report
NEW YORK.—The Polish Telegraph agency said that the last 200 Jews in Warsaw had been shipped to Bernabostel, a concentration camp near Hanover, Germany. These were the last of the 40,000 Jews left in the Polish capital at the time of the battle of the Warsaw ghetto a few months ago. Before the war, Warsaw had a Jewish population of 300,000, one-third of the city's inhabitants.

Detailed With a Fine Hand—Glamour for Your Hands— SPRING GLOVES

The simplest of these fabric gloves features lovely detailing—whether in picked stitching, self fringing or surface ornamentation. Use them to brighten and heighten interest in a spring wardrobe, old or new!

Black, Navy, Gray, Brown, Gray, Purple,
Green, Red, and Pastels.

PUT YOUR MONEY IN A GOOD BAG! LEATHERS AND FABRICS

Nothing "cheap" about these bags. That's why they'll outwear and out-smart by more than one season other bags, cheap in price—and therefore in quality.

Handle, envelope and drawstring styles in every seasonable color. Each bag is beautifully fitted.
