

The Floyd County Plainsman

Col. R. Y. Bradford Will Get Charge Soon

Floydada, Texas, October 25. — Months overseas service in the Army Air Forces, Lt. Col. Bradford of 421 West Calhoun street, Floydada, Texas, is honorably separated from the United States at the Antonio District installation of the AAF Personnel Distribution Command.

After entering the service, he received several appointments as a member of the Baptist church. While in the service he was a Command Chaplain serving with the 4th Air Force in the European Theater of Operations.

Col. Bradford is the husband of Mrs. Ila Wright Bradford, whose children have made their home in Floydada during her absence.

Moses Made Chief of Publications

Floydada, Oct. 25. — Tad Moses, for the past two and one-half years assistant director of the A. and M. College department of information, has been named chief of publications of the Agricultural Experiment Station, succeeding A. D. Jackson, who served for 21 years as chief and assistant secretary of the Texas and Southwestern Cattle Raisers Association, and editor of its monthly magazine, the Cattleman.

Mr. Moses is a native of Burnet county, Texas, and attended Texas A. and M. for two years prior to service in World War I. The next three years he was inspector and chief of the Livestock Sanitary Commission of Texas.

On returning to Texas A. and M. College, Moses has been especially effective in disseminating information on agricultural and livestock subjects to various state publications and newspapers, and in his position he will continue to use the press and radio with the latest agricultural information as developed by scientists on the staff of Texas A. and M. Agricultural Experiment Station.

Rabies is More Prevalent in Winter

Floydada, Texas, October 25. — According to popular belief, rabies is more prevalent in winter than in the so-called "dog-days" of summer.

A statement released this morning by Dr. Geo. W. Cox, State Health Officer, it was disclosed that in the mid-winter month of January last year the State Laboratory examined 312 animal brains, 100 per cent of which tested positive, whereas in August 1944, 250 brains were examined, 100 per cent of which were positive.

Stray dogs were destroyed and all pets vaccinated for rabies. "We would go far toward eradicating this justly feared disease," Dr. Cox said.

Root Rot Can be Controlled in Growing Cotton

Dallas, October 18. — Root rot, which destroyed 20 per cent or more of the 1945 cotton crop in some leading blackland counties, can be controlled by steps which also increase soil fertility, C. B. Spencer, agricultural director, Texas Cottonseed Crushers Association, said today in a statement released by the Cotton Production Committee of Texas.

"Experiments and experience prove that root rot can be controlled by using legumes in a crop rotation and by putting back into the soil such crop residues as green cotton and corn stalks, and grain sorghum and small grain stubble," Spencer said.

"Unfortunately, too few farmers know this. When it is generally realized that growing and turning under legumes will reduce root rot damage 20 per cent or more, on the average, the use of legumes is expected to increase greatly."

Hairy vetch, Austrian winter peas, Hubam and other sweet clovers are the legumes best adapted for use in controlling root rot.

Only 3.8 per cent root rot damage resulted in 1943-44 at the Temple Experiment Station when cotton on Houston black clay followed Hubam clover that had been harvested for seed and the straw returned to the land, and the cotton produced 306 pounds of lint per acre. Root rot damage was 38.6 per cent when cotton followed corn, and the yield was 200 pounds per acre. Cotton planted continuously showed 63.6 per cent root rot damage.

In addition to the value in controlling root rot and improving the soil, the plowing under of green cotton stalks is one of the most effective methods of reducing boll weevil damage, Spencer added.

"Plowing under cotton stalks and planting legumes are two things that cotton farmers can and should do right now to lay the foundation for a more productive and more profitable crop in 1946. They are two steps that will pay big dividends next season," he said.

Livestock Parade Kickoff to Big Show at Dallas

Dallas, October 25. — Special entertainment features and the year's biggest livestock show will combine to make Greater Pan-American Hereford Exposition, to be held in Dallas November 9-18, an event that the people of Texas will long remember, it was declared Wednesday by Fred F. Florence, Dallas banker and chairman of the Exposition's Board of Directors.

Dallas, top-ranking livestock center, is prepared to demonstrate its own famous brand of all-out hospitality during the 10-day show.

Approximately 600 animals have been entered in the breeding and Junior Cattleman's Baby Beef classes of the gigantic Hereford show, according to Jack Frost, Exposition president, and Lloyd Wheelock of Corsicana, president of the Texas Hereford Association and superintendent of cattle for the Dallas show.

Funeral Services For Mrs. Minerva Ann Broyles

Mrs. Minerva Ann Broyles, 82, passed away October 19, 1945, at the home of her son, Sam Broyles at St. Vrain, New Mexico, after an illness of several months. The body was brought to Floydada Sunday by the Clovis Funeral Home and services were held Monday morning at 11 o'clock at Harmon, Funeral Chapel. Interment was made in Floydada cemetery beside her husband, William E. Broyles, who preceded her in death September 18, 1923. Rev. L. D. Ballard, pastor of the Presbyterian Church conducted the service.

Mrs. Broyles was born Minerva Ann Masoner, October 30, 1863, in Green County, Tennessee. She was united in marriage to William E. Broyles September 30, 1883. They moved to Floyd County in 1911, where they made their home until a few years ago.

Deceased is survived by three sons, Sam Broyles, St. Vrain, New Mexico; Esphrián Broyles, Albuquerque, New Mexico; Carl Broyles, Plainview, Texas; and one daughter, Mrs. B. M. Reynolds, of Arizona; twenty grandchildren and several great grandchildren; two daughters preceded their mother in death, they are: Mrs. Jim Cope, who passed away August 17, 1945, and Mrs. A. Shipley, who died September 4, 1945.

Pallbearers were: P. W. Thorp,

James Robert Denison Training at Norfolk, Va.

Chicago, October 25. — James Robert Denison, 21, machinist's mate, third class, USNR, of Floydada, Texas, has arrived at the Naval Training Station, Norfolk, Va., to undergo instruction for duties aboard a new destroyer.

Denison, a veteran of 24 months of duty aboard the destroyer, USS Hutchins in the Pacific, wears the American ribbon, the Asiatic-Pacific ribbon with six combat stars, and the Philippine Liberation ribbon with two combat stars.

Before enlisting in the Navy, Denison was employed by the Armour Packing Co. He attended Floydada High School. Son of Mr. and Mrs. Arthur Paul Denison, of 401 West Kentucky street, Floydada, he has two brothers in the armed forces. Leroy Paul, 24, is a machinist's mate, second class, in the Navy, and Charles Tracy, 26, is a staff sergeant in the Army Air Forces.

Wayland Hale Writes Parents From Japan

Following is a letter received last week by Mr. and Mrs. J. S. Hale, from their son, Wayland, who recently arrived in Japan:

Dear Folks:

We left Okinawa a week ago today and got in here last night. We had to work pretty hard on the boat, but the food was wonderful, and we had hot water showers. We had to tie the trucks etc., down with large chains and it was quite a job. We docked in Yokohama bay and drove from there to our base which is about 43 miles. It took us five hours to drive that distance. We drove through Tokyo and even tho it was the third largest city in the world, it is only a pile of ruins now. There are some of the industrial buildings standing but the larger part of the homes are burned to the ground.

The field where we are stationed at one time was used by the Jap fighter planes. The hangars are too small for our planes, but the barracks are pretty nice. They cleaned the barracks then sprayed them with D. D. T. They are large enough to put the whole 336th in one building. It is divided into rooms, some for eight, sixteen and others with four. The one I am in has room for four. Up stairs there is a large room which took up half of the upper floor. They used it for a briefing room and we

Mexican and Texas Youths Will Tour Texas

Youth of Mexico and Texas will cement good neighbor relations in a 12-day joint educational tour of south, central, north and west Texas.

According to an itinerary released by Director Ide P. Trotter of the A. and M. College Extension Service, 12 students of the National School of Agriculture of Mexico and 14 members of Texas boys' 4-H clubs will meet at Laredo on November 3 and live and travel together until November 15.

The tour will be sponsored by the Foundation of nation-wide merchandising company in cooperation with the Texas Extension Service. The visit of the Mexican students is a good will response to one made by 24 Texas 4-H Club boys to Mexico last May 28 to June 7. On that occasion the Texas club boys were guests for a day of the students at the School of Agriculture, and a group of English-speaking students remained with the Texas visitors during a four-day stay at Mexico City.

are going to use it for our club room. The wash room is at the end of the building and the bath house is about 200 yards from where I live. The bath houses are queer to us, but we soon got used to them. The room is about 20x50 and to one side there is a large tub built in the floor about 8x6. This is full of hot water and is about four feet deep. You have small wooden buckets to dip in the tub and you shower that way. The hot water is really O. K. too. The grounds around here are pretty good. In front of our barracks was a potato patch, but we turned that into a baseball and football field. We are putting basketball courts on the cement floor where hangars used to be. We have a theatre where we are going to have a show every night. However, the shows so far, we have already seen.

We have Japanese washing for us. They sweep the halls, burn the trash, wash the wash stand in in other words they do just what we want them to do. They all seem to be eager beavers. Its pretty cold here, but after we get used to it, it should be just about right.

The food so far hasn't been any good at all, but we have hopes of having some good. The mail has also been mixed up too. I had one letter here when I got here, it was from Mona. In a month or so everything should be going pretty good.

They have sent all the guys home with 80 or more points. They say that all with 70 or more are to go the 5th of October. They say that if we get our other two battle stars we will only have 17 of our original men left in the squadron. Naturally I am one of those guys. However, they say we will be either home or on our way home by the first of the year.

I didn't get to see Jay before I left Okinawa, he was about 60 miles from me and even tho we used the same A. P. O. it was about an 8 hour drive to see him.

Pass this letter around because its too hard to write that again. I'll write again soon.

Love you,
WAYLAND.

J. T. L. McNew V-Pres. Zone 4 Society

College Station, Oct. 25. — J. T. L. McNew, vice president for engineering of Texas A. and M. College, has been elected off-nominee for vice president of Zone 4 of the American Society of Engineers. Nomination is to amount to election. The zone includes southern Mississippi, Louisiana, Texas, New Mexico, Arizona, California, Nevada, Utah, Idaho, Oregon, Washington, and western Montana. The vice presidency is for a period of two years beginning January 1, 1946.

McNew graduated from Texas A. and M. College with bachelors and master's degrees in civil engineering. In 1925 he received degree of Civil Engineer from Iowa State. He was connected with the A. and M. department of Civil Engineering as an instructor from 1920 to 1940 when he came head of the department. Since February 1, 1945 he has been vice president for engineering.

Election to the vice-presidency of the American Society of Engineers is the third office McNew has held in that group. He was secretary-treasurer of Texas section in 1927-28, a member of the board of directors from 1941-44, the first engineering teacher in Texas to be honored.

This is the first time a civil engineering employee of Texas A. and M. has been nominated vice president. McNew served both world wars in the corps engineers. He was released recently with the rank of lieutenant colonel after service in the Burma, India theater of operations.

Rats Considered Serious Menace To Mankind

Austin, October 25. — Because of the economic losses they cause to industry and commerce and annoyance they create in homes, rats have been considered a serious menace to mankind since long before their role as vectors of disease was understood. Today at least six diseases are known to be transmitted to man from rats, according to Dr. Geo. W. State Health Officer. These diseases include the dread plague, typhus, trichinosis, a form of jaundice, tapeworm, and food poisoning. Typhus fever, in the few years, has become a major health problem in Texas.

"It is necessary to protect public health," Dr. Cox said, "that a tinuous rat control program be maintained in every urban and rural area throughout Texas. This is of especial importance on farms where rats may flourish by feeding on grain and other farm products."

WHAT DOES A VICTORY BOND LOOK LIKE?

| | |
|--|--|
|  <p>1. A funny question? Well, maybe. A Victory Bond looks like a Victory Bond. Like these . . .</p> |  <p>2. But wait a minute! Hold those Bonds till maturity, when "E" Bonds will pay back four dollars for every three you've invested—and keep buying more Bonds—and they can look like this! Your home—all yours!</p> |
|  <p>3. Or this. That rolled-up scroll is a college diploma for your boy. His assurance of a good start in life—and the opportunity to make himself into the kind of man you want him to be!</p> |  <p>4. How about this? That man, able to take it easy in his maturer years, can be you. Your Victory Bonds can add up to a sizable nest egg. They're the safest investment on earth! Hang on to them!</p> |

40 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

RED CROSS HOME NURSING ARE YOU AS SMART AS YOUR BABY?

WHEN YOUR BABY CRIES do you fly into a panic, wring your hands and wonder, "Oh dear, what can the matter be?" Try giving him a bottle of water if he cries between feeding times. He might only be thirsty. Or loosen his clothing so that he can move freely. Your baby's cries are not always a sign of serious trouble. He just wants to tell you that he needs attention.

WHEN JACK REFUSES HIS CARROTS do you angrily force him to eat them or threaten, "I'll take you to the doctor unless you do?" A wise mother would substitute another food of equal value or gradually teach him to like carrots by feeding them to him in small amounts. Young children have taste likes and dislikes just as adults do. And never instill fear of the doctor in a child's mind with threats.

RED CROSS HOME NURSING teaches you how to care for yourself before the baby is born and how to care for him during the pre-school years. You also learn what precautions will prevent illness in your family and how to be of assistance to your doctor when illness does occur.

If there is no home nursing course offered at present in your community, ask your Red Cross chapter how you may help organize one.

Texas Tech Red Raiders Draw Good Crowds

Lubbock, October 25th...The Texas Tech Red Raiders seem destined to set a new high record for attendance of games this year, with 50,000 persons witnessing their first four encounters and sell-outs in prospect for remaining home games.

Only two Southwest conference teams have played to more spectators.

About 9,000 persons witnessed the opening game here, September 22, with Southwestern university and 10,000 or more saw the contest in Tech Stadium with Tulsa. Hundreds failed to get through the gates when standing room also was filled.

The largest crowd ever to pack into Alamo Stadium at San Antonio, 23,681 paid admissions, was on hand for the Sept 29 Tech clash with the Texas Aggies and the following Saturday 16,000 saw the Texas Longhorns meet the Red Raiders in Austin.

Two of the five reserved sections in Tech Stadium are sold out for the Baylor game next Saturday and the Homecoming contest with TCU here November 10. Athletic Director Morley Jennings expects a sellout for both engagements and a near sellout for the West Texas State game here Oct. 27th.

Childrens Clothing Can Be Flame Proofed

College Station, October 18th—Simple flame-proofing treatment will reduce the fire hazard of children's clothing made of cotton or rayon materials with a napped surface. Mrs. Dora R. Barnes, clothing specialist for the A. and M. College Extension Service, recommends this treatment for sweaters, night gowns and pajamas, and also for blankets and draperies.

The secret of flame-proofing is to dip the materials in a solution of borax, boric acid, and hot water. Both of these well-known chemicals can be obtained at any drug store. Recipe for the fire-proofing solution requires seven ounces of borax and three ounces of boric acid to be added to two quarts of boiling water. Stir the borax and boric acid until the solution is clear.

Best way to apply the slution is to dip the garment into it, Mrs. Barnes says. She cautions that the garment must be dry when it is placed in the liquid, and it must be thoroughly saturated. Wring it out and hang it on the clothes line to dry.

"When you press a fire-proofed article, use only a moderately hot iron," Mrs. Barnes says. It's better to iron a flame-proof article when it's damp rather than to let it dry and "sprinkle it down."

Unfortunately, this fire-proofing method is not permanent, since the borax-boric acid solution washes out of the material. Each time the article is laundered it will have to be fire-proofed again. Therefore, it saves time to make up

large quantities of the solution for frequent use.

only a visitor from Lubbock
 he planned to attend
 day morning service at a

certain Washington church. I
 cautioned him to arrive at the
 church by ten-thirty or he probab-
 ly could not get a seat. He later
 reported that he followed my in-
 structions, but was only able to get
 standing room in the rear of the
 church. The minister of this
 church began last Sunday a sys-
 tem whereby he will conduct two
 identical services on Sunday morn-
 ings, one at nine o'clock and one
 at eleven. This practice is already
 being followed by a few other
 churches in the city. There are
 many churches in the city where
 people have difficulty in getting
 seats at the eleven o'clock hour.

But unfortunately the people of
 Washington are not breaking any
 records for church attendance.
 Only eighty thousand out of a
 population of well over one mil-
 lion in metropolitan Washington
 attend church on Sunday. Accord-
 ing to a report recently made,
 twenty-three percent of the white
 children of public school age at-
 tend religious services on Sunday;
 the attendance rate for the negro
 children is thirty percent. There
 are five hundred churches in
 Washington, of which one hun-
 dred and sixty-one are colored.

For weeks there has not been an
 issue of a Washington paper that
 did not carry some kind of story
 in regard to the atomic bomb.
 Many have been the speculations
 as to the future of the bomb. One
 editorial writer had this to say:
 "The atomic bomb is here to stay
 ...but are we?"

Sheriff's Sale

THE STATE OF TEXAS,
 COUNTY OF FLOYD

NOTICE IS HEREBY GIVEN
 That by virtue of a certain Order
 of Sale issued out of the Honor-
 able District Court of Floyd Coun-
 ty, on the 20th day of October,
 1945, by Mrs. P. G. Stegall, Clerk
 of said District Court of Floyd
 County, Texas, for the sum of
 SEVEN HUNDRED NINETY-
 THREE & 79/100 (\$793.79) Dol-
 lars and costs of suit, under a
 Judgment, in favor of Plaintiff,
 First National Bank of Floydada,
 Texas, a corporation in a certain
 cause in said Court, No. 3490 and
 styled FIRST NATIONAL BANK
 of Floydada Texas, vs. F. P.
 Merry, placed in my hands
 for service, I, Lee Howard,
 as Sheriff of Floyd County,
 Texas, did, on the 22nd day of
 October, 1945, levy on certain
 Real Estate, situated in Floyd
 County, Texas, described as fol-
 lows, to-wit:

An undivided One-Sixteenth
 (1-16) Interest in and to all of
 the oil, gas, and other minerals in
 and under, and that may be pro-
 duced from the following describ-
 ed lands situated in Floyd County,
 Texas:

All of Survey Number Twenty-
 Nine (29), Block "K", Abstract
 No. 484, Certificate No. 714, T. T.
 Ry. Co. Survey, Assignee Isaac P.
 Cox, patent record in Vol. 1, Page
 385, Patent Records of Floyd
 County, Texas, containing 640
 acres of land more or less.

And the East Five-Eighths
 (E-5-8) of the Northwest One-
 Fourth (N. W. 1-4) of Survey
 Number Thirty (30), in Block
 "K", Abstract No. 1467, Certifi-
 cate No. 714, T. T. Ry. Co. Sur-
 vey, containing 100 acres of land,
 more or less.

A total of 740 acres more or
 less.
 Together with the right of in-

gress and egress at all times for
 the purpose of mining, drilling,
 and exploring said land for oil,
 gas and other minerals, and re-
 moving the same therefrom.

Said Assignment being subject
 to the rights of Standard Oil
 Company of Texas, and levied up-
 on as the property of F. P. Merry
 and that on the first Tuesday in
 December, 1945, the same being
 the 4th day of said month, at the

Court House door, of Floyd Coun-
 ty, in the Town of Floydada, Tex-
 as, between the hours of 10 a. m.
 and 4 p. m., by virtue of said levy
 and said Order of Sale I will of-
 fer for sale and sell at public ven-
 due, for cash, to the highest bid-
 der, all the right, title and interest
 of the said F. P. Merry in and to
 said property.

And in compliance with law, I
 give this notice by publication, in

the English language, once a week
 for three consecutive weeks imme-
 diately preceding said day of sale,
 in the Floyd County Plainsman, a
 newspaper published in Floyd
 County.

Witness my hand, this 22nd day
 of October, A. D. 1945.
 LEE HOWARD,
 Sheriff Floyd County, Texas.

**THE RIGHT TRACTOR
 FOR THE PARTICULAR JOB**

THE proverbial Jack-of-all-trades was
 master of none. The modern world of
 science and technology passed him by.
 The same principle applies to farm
 tractors. The tractor that does a wide variety
 of jobs unsatisfactorily can't possibly pro-
 duce the greatest results at the least cost
 in any job.

But that's what the farmer—particularly
 the small operator—has got to do to meet
 postwar competition: he's got to produce
 the most food possible with the least effort
 and, consequently, at the lowest cost.

The farmer with 10 acres in truck crops
 needs one kind of tractor. The farmer
 with 100 acres in wheat alone needs an-
 other kind—or, as is usually the case, two
 or more different tractors. The trac-
 tor which does a good job on the
 Plains may be useless in the

rice territory. And so it goes.
 Conditions of climate, the lay of the land,
 and the character of soils in the different
 parts of this vast country, together with
 wide variations in the nature of crops and
 the size of operations, combine to pro-
 duce wide differences in the requirements
 for tractors. Harvester's policy is to meet
 all these requirements.

That is why Harvester's postwar line in-
 cludes a great variety of Farmalls and other
 specialized tractors and attachments rather
 than a single tractor with a single system
 of tools. Every tractor in the line was de-
 veloped after scientific research and testing
 under actual operating conditions showed
 the specifications needed for efficiency
 and economy.

Every Harvester-built tractor is the
 right machine for its particular job.

A. Williams' Dies in California

(Perry). Williams, age 34, suddenly Tuesday of a heart in Los Angeles, California. He received his discharge from the Army August 15, 1945. The body will arrive in Lubbock Thursday morning, October 25, and will be brought to Lubbock by Harmon Funeral Home.

At this time funeral arrangements are incomplete, his father, A. Williams, is waiting to hear from a brother who is stationed at San Francisco, if he is unable to attend the funeral will likely be held Friday at Carr's Chapel.

Plum Peach and Plum Tree Borers

At this time of year has come to control plum and peach trees for borers, says Paul Gregg, entomologist for the A. and M. Extension Service. In the north of Waco trees should be treated as near October 25 as possible, and by November 20 in the south of Waco. If gum with frass is noticed coming from the trunk just below or above the line the borer is at work. The true borer, or base borer, is the one to watch for, Gregg says. It works underneath the bark of the tree just above or below the ground line. If it is not controlled it will weaken a tree and make it more susceptible to other active parasites.

Control may be obtained by applying PDB crystals around a tree after removing weeds and grass for a distance of 18 inches from the trunk. Dosages are one ounce of crystals for a tree three years of age; three- eighths ounce for a tree just coming into bearing; one ounce for a young or mature tree, and one-half ounce for an old or neglected tree. Treat only those showing signs of borer damage.

The crystals are applied in a trench one inch wide and one-half to two inches from the trunk. If the borer's entrance is above the ground, build a mound around the tree so that the crystals will be placed directly at the entrance. After the crystals are applied to the soil cover them with a few shovelful of dirt and water it down. After about 30 days remove the mound with the care to prevent damage to the tree.

Gregg says that borers working on the branches of peach or plum trees can be controlled by painting the entrance holes lightly with a solution of one pound of PDB crystals dissolved in one-half gallon of raw cottonseed, or raw linseed oil. Remove the gum from the bark before painting and do not paint all the way around the trunk or branch because the sun will injure it. The PDB crystals generally can be bought at most drug or feed stores, Gregg says.

TH TEXAS STATE SITES PORTABLE HOUSES

Waco, Texas...North Texas College has leased 50 prefabricated, portable homes from the War Relocation Authority and will move them here for the use of ex-servicemen and their wives enrolled at the college, President W. J. McCall said Wednesday.

BEING GIVEN ON TUITION in Austin, Texas. Persons who are not called to active duty in the Army and Navy reserves are entitled to free tuition in state supported colleges, Attorney General's Department has announced in an opinion.

is found generally throughout the world.
