ED CROSS HOME NURSING

HOW HANDY ARE YOUR HANDS?

HEN YOUR SICK CHILD is tired of lying on her back you hoist her upright, dump a couple of pillows thind her back, and let her slouch in an uncomfortle position? Or do you skillfully make a sturdy ckrest from a cardboard box and place the pillows ainst it so that she will be firmly supported to mainin good sitting posture?

HEN THE DOCTOR ORDERS a steam inhalation to reve the congestion from Sally's bad cold, do you look him in wide-eyed wonderment and say, "What's at?" Or do you efficiently improvise a steam tent om an umbrella and give the treatment by making inhalator from a teakettle and funnel?

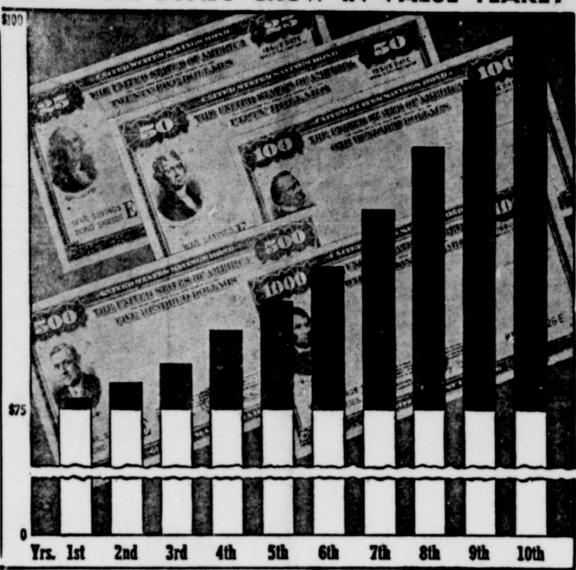

CTORS ARE SAYING, "One person in every household uld know home nursing." Most Red Cross chapters offering free courses in home nursing taught by ofessional nurses. You learn how to improvise hostal equipment, give bed baths, prepare soft and guid diets. The free courses offered by the Red Cross home nursing will teach you to be a capable home sistant to your doctor. He'll appreciate your compence, and you'll earn grateful thanks from your family.

there is no bome nursing course offered at esent in your community, ask your Red ross chapter bow you may belp organize one.

HOW WAR BONDS GROW IN VALUE YEARLY

| Yrs. | Increase In Value | Total Value | Worth the Yr. Before |
|------|-------------------------|----------------|----------------------------|
| 1 | \$ 5.00 | \$ 755 | .67% |
| 2 | 10.00 | 765 | 1.32 |
| 3 4 | 15.00 | 780 | 1.96 |
| 4 | 20.00 | 800 | 2.56 |
| 5 | 20.00 | 820 | 2.50 |
| 6 | 20.00 | 840 | 2.44 |
| 7 | 40.00 | 880 | 4.76 |
| 8 | 40.00 | 920 | 4.55 |
| 9 | 40.00 | 960 | 4.35 |
| 10 | 40.00 | 1,000 | 4.17 |

IT'S SURPRISING-how War Bonds grow in value each year. If held until maturity they earn 331/2 per cent and they have a yearly added value. The hart tells its own story for a \$100 Series E Bond. The scale to the left shows how a \$1,000 Series E Bond grows. The chart shows that the increase in value is greatest in the later years of the bond's life. Note how the rate of interest goes up in the second three years of the bond's life. Study the increase in the \$1,000 bond. Holders of bonds the last few years, considering the above, would prior to maturity. The New York Stock Exchange in the more than 150 years of its existence has ever recommended other bonds than those of the

which drills down through successive strata of shale and rock. Screwed to the top of the bit is a string of hollow, round drill pipe which in turn is screwed into the bottom of a hollow, square pipe known as a "Kelly." The Kelly works through a square hole in the rotary turntable. Thus, when the engines spin the turntable, the Kelly, the drill pipe and the bit also spin, and the bit cuts its way downward. Heavy pumps

Most of our gas comes from Hutchinson,

Moore, Carson and Potter Counties in the Panhandle Gas Field, one of the largest in the world. We purchase some gas in Ector County

for use in the southern portion of our system.

In the Panhandle Field gas wells are generally

drilled by the "rotary" method, so named be-

cause of the rotating motion of the drill bit. A

modern rotary drilling outfit costs from \$100,-

The hard steel drill bit is the cutting tool

000 to \$200,000.

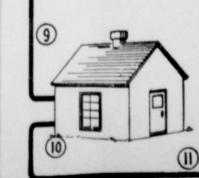

force drilling mud down through the hollow Kelly and drill pipe, through perforations in the bit, then outside the pipe and back to the surface, carrying with it the cuttings from the bit.

As the bit moves downward, additional joi of drill pipe are added below the Kelly.

When the gas producing horizon is reach a string of steel pipe, known as casing, is serted in the hole from the surface of the grow to the top of the producing horizon. After r ning the casing, cement is run through the ing and forced out around the bottom in or to prevent the gas from escaping around the side of the pipe. Then the well is drilled it the gas-producing horizon.

A steel derrick, capable of supporting weig of 200 tons or more, is used to support the d pipe during drilling and the casing when ing is being installed. When the well is co pleted, the derrick is removed. In its place

installed a "Christmas Tree," an odd-looking assembly of valves and fittings necessary in producing, testing and maintaining the well.
