The Floyd County Plainsman

NUMBER 16

FLOYDADA, FLOYD COUNTY, TEXAS, THURSDAY, NOVEMBER 22, 1945

NUM

General Services Day for Mrs. L. West

Marcella West, 65, died at 4 o'clock on November 15, 1945, at her home, after an illness of several months. Funeral services were held at the First Methodist Church Friday afternoon at 3 o'clock with Rev. Phil H. Pritchard, pastor, officiating, assisted by Judge G. E. Hamilton of the pioneer friend of the interment was made in the cemetery with Harmon Home in charge of arrangements.

Mrs. West was born in Stephens County, Texas, Marcella McCarty, daughter of Mr. and Mrs. J. F. West. She was married to L. West February 14, 1903 in Floyd County, Texas. She moved to Floyd County from Palo Pinto County, Texas. Mrs. West was a member of the Methodist Church and an active member of the Circle.

Her husband, she is survived by four children; one son, L. West; three daughters, Lillian Murff and Miss West, Floydada; Mrs. E. Matthews, Los Angeles, California; one brother, Edgar West.

Survivors were: Will Ferguson, Eldon Cumbie, S. Yeary, Homer Miller, and Homer Miller.

Bearers were: Mesdames West, Walter Brown, Cecil N. W. Williams, Weldon Murrett Dorsey, Geo. Homer Miller, Will Sims; Ariene Beedy, Agnes Cooper, Mrs. Frank Brown.

The National Food Situation Looks Brighter

College Station, Nov. 25.—Civilian families will have a larger choice and supply of food this fall and winter than in the first nine months of the year. This conclusion was arrived at by the Bureau of Agricultural Economics of the U. S. Department of Agriculture after a survey of the national food situation.

A report of the survey received by the A. and M. College Extension Service said that the domestic civilian stocks of meat, canned fruits, vegetables, turkey, chickens, fluid cream, potatoes and other food supplies will be larger than in the same period last year. The report forecasts that more potatoes, more eggs, and more lower grades of beef may be available than civilians will demand at present prices.

As a further easing of the situation, some increases are expected in supplies of butter, cheese, pork and veal. But little change in lamb and mutton supplies for civilians is looked for because non-civilian takings will be larger in the next few months, the report said.

Some relief from the tight supply of sugar is expected next spring if the Cuban crop turns out well. But no substantial increase in world stocks seems likely before early in 1947 when there will have been opportunity for larger production in the Philippines, one of the large producing areas.

Viewing the meat situation from the civilian consumer standpoint, the BAE found some favorable and some unfavorable aspects. Present indications are that supplies will be considerably higher than in the first half of the year and may exceed an annual rate of 140 pounds per capita this winter. Prices of lower grades of beef may even decline from ceilings.

On the other hand, military and export needs probably will be so large as to keep civilian supplies of pork, lamb and mutton below full demand at present prices, and below the heavy rate of consumption in the last quarter of 1944. This seems likely to develop in spite of the probable output of these meats in the last quarter of the year.

The survey indicated, the report said, that prices of most classes of meat, other than the lower grades of beef, are likely to continue at ceiling levels at least through the first part of 1946.

VALLEY SHIPS FIRST SQUASH—BROCCOLI CARLOTS

Weslaco.—The first solid carlot shipments of squash and broccoli to leave the Rio Grande Valley this season were included in marketings reported last week, while heavy shipments of green beans to be canned outside the Valley came as a surprise to local canners.

The squash and broccoli rolled in a heavy one-day loading of 93 cars of winter vegetables; almost the equal of 113 cars of citrus that moved by rail the same day.

VETERAN ALLOWANCE PAYMENTS INCREASE

Washington.—The Veterans Administration reported Monday a sharp increase in readjustment allowances paid to veterans of World War II.

In the week ended Oct. 27 allowances paid 155,154 veterans totaled \$3,626,644. This compares with \$3,005,424 paid to 126,663 veterans in the preceding week.

"Our dollars in VICTORY BONDS will work wonders for us...!"

"Buying Victory Bonds gives me such a safe feeling. Now we can go ahead and plan the home remodeling we've talked about these last few years..."

"There's the new kitchen... and the water system... we'll pay for them from current income, of course... but Bonds will give us peace of mind to go ahead..."

"For if farm income should drop, we could still pay for the improvements. Victory Bonds yield a fine return... and are just like cash in case of need!"

LET'S ALL DO OUR SHARE!

Floydada Defeats Crosbyton by Score of 37-0

The semi-final game of the Floydada Whirlwinds against the Crosbyton Chiefs was a rout for the local team.

In the first quarter Carmack kicked a 37 yard field goal and plunged the line for a 37 yard touchdown. First quarter ended with a score of 6-0.

In the second quarter Carmack kicked a 30 yard field goal and plunged the line for a 37 yard touchdown. Second quarter ended with a score of 13-0.

In the third quarter, the same game was thrown at the Crosbyton line and were made by Robertson Jones. At the end of the quarter, the score was 31-0. Carmack made the final tally, the score 37-0, late in the fourth quarter.

WAGNER TEST BLOWS GUSHER

Woodward, Texas.—The Gregg Company, Houston, gas test on Woodward 353 acres, M. A. Curvey, Coleman County, as a gusher Monday while gushing at 1,400 feet.

Well, located 14 miles west near the Santa Anna gas field, the first oiler in the area, estimated to be over 200 barrels per day.

Multiplying Sweet Sudan Seed is Demonstrated

College Station.—Starting with a handful of seed last year, J. R. C. Moseley, a leading field crop demonstrator in Palo Pinto County, harvested a large yield of sweet sudan seed this year.

County Agricultural Agent Ralph E. Lindsey reports that in the spring of 1944, Mr. Moseley obtained four ounces of the seed from the Texas Agricultural Experiment Station and planted a half acre. Nursing this small planting carefully he harvested two cuttings and obtained 250 pounds of seed. This year Mr. Moseley went all out for a seed crop. He supplemented the home-grown seed with a purchase of 200 pounds of seed and planted about 200 acres.

The result, says County Agent Lindsey, was one of the finest crops of sudan ever produced in the county. Yields of 500 to 600 pounds of seed an acre as well as a good crop of hay were obtained. The seed will be made available to other farmers in the county who have been influenced by Mr. Moseley's demonstration to grow this new type grass.

Lindsey says that Mr. Moseley has been producing vetch and Abruzzi rye for the past three years, both for seed crops and for demonstration of the value of these legumes as sil builders.

When raindrops hit the ground running they pick up a load of top-soil. Slow them down to a walk by farming on the contour.

NAVY MEN SERVING ON THE USS KASKASKIA TRAVEL MANY KNOTS

Chicago 11, Illinois.—Willis Andrew Bunch, seaman, second class 514 East Virginia, Floydada, Texas, and other Navy men who served on the fleet oiler USS Kaskaskia helped take that ship approximately 271,000 miles during the Pacific campaign to keep the U. S. Fleet supplied with essential fuel, newly revised Navy records on the ship have disclosed.

The Kaskaskia serviced 900 ships, pouring 210,585,346 gallons of fuel into the thirsty fighting ships.

Crewmen of the oiler regarded her as a lucky ship, since she was caught several times in enemy air raids, but came through undamaged. The vessel took part in almost every important operation or strike of the Pacific Fleet, and often entered the harbor under attack on the day our forces landed and while there still was plenty of enemy opposition.

CLEMENT ATTLEE LEAVES CANADA ON HOME FLIGHT

Ottawa, Canada.—Prime Minister Attlee, after a weekend in Canada, boarded a Douglas Sky-master at nearby Rockcliffe Air Field at 4:10 p. m., central standard time Monday and took off for Britain.

Construction of contemplated irrigation projects by the Bureau of Reclamation would increase the purchasing power of the West by one and one-quarter billion dollars annually.

Every day is wash day with running water on terraced fields.

State Garden Contest Winners Announced

Winners in a state 4-H garden contest conducted by the Texas A. and M. College Extension Service in cooperation with the Texas Seedmen's Association were announced recently. First place went to Bernice Matejka, of the Edge community in Brazos County, whose garden investment paid her one hundred fold.

She will receive a silver loving cup at the Seedmen's Association meeting in Dallas, November 28-29. Her 4-H garden demonstration cost her \$2.95 and her total income from it was \$305.40. In reality there were two gardens comprising about 7,000 row feet, and Bernice did 90 per cent of the work herself.

Other high ranking winners in the contest include Roland M. Harrod of Cass County; Myrtle Beckman of Austin County; Joe Price, of Palo Pinto County; Fulton Smith, Jr. of Hockley County; Franklin Dale Simmons of Harris County; and Joe Halbert of Hunt County.

KELLY RUSH FIRED FROM TEXAS RANGERS

Austin, Texas.—Kelly Rush of Fort Worth was dismissed from the Texas Ranger force effective 10 a. m. Saturday because of refusal to accept transfer from Fort Worth to Raymondville in the Rio Grande Valley, State Police Director Homer Garrison Jr., announced Monday.

The national 1945 honey crop is estimated at 226 million pounds.

SIDELIGHTS FROM WASHINGTON

BY GEORGE MAHON

Shall the Army, Navy, Marine Corps, Coast Guard...all our fighting forces...be merged under one single unified command by an act of Congress? That question has not reached the show-down stage, but hearings on the subject are now being held by a Congressional Committee.

Last week, following the testimony of General Jimmie Doolittle before the Committee in which he accused opponents of the idea of being hypocritical, Secretary of Navy Forrestal wrote a letter of protest to Secretary of War Patterson, bringing out into the open the intense jealousy which exists between certain members of the Army and Navy high command. The Army favors the merger; the Navy high command, generally speaking, oppose it. The prevailing thought in Washington is that the majority of the people favor the merger.

It is admitted that good arguments can be offered on both sides of the question. Advocates of the idea, however, contend that we will gain more by unification of the services than we stand to lose. There is no doubt but that closer cooperation among the services in the future would be in the public interest. The merger should not obliterate the identity of the various branches, and we should not lose the wholesome traditions of the fighting forces.

The Prime Minister of Great Britain, Mr. Clement Attlee, successor to Winston Churchill, addressed a joint session of Congress on November 13th. In doing so, he was following in the footsteps of Winston Churchill who just three weeks after Pearl Harbor addressed the Senate, and who in May, 1943, addressed a joint session of the House and Senate.

The procedure was typical of the procedure usually followed at joint sessions of Congress. Perhaps the details would be of interest.

The meeting was held in the House of Representatives because of the greater availability of seats. Members of the House took their seats in the rear and central sections, leaving all the front seats for the Senators and official guests. Just prior to the convening of the joint session, the Senators, led by Senator McKeller, President pro tem of the Senate, marched in and took the seats reserved for them, Senator McKeller occupying the platform with Speaker Sam Rayburn.

Then came the diplomatic group led by Lord Halifax, British Ambassador. Next to enter the chamber were members of the President's cabinet. Seven of the ten were present for the occasion. Mr. McKenzie King, Prime Minister of Canada, was next to enter. The Doorkeeper of the House announcing Mr. King to the session and escorted him to his seat, the Doorkeeper having gone through the same ceremony for the groups which had previously entered.

The Doorkeeper then announced Prime Minister Attlee of Great Britain, and a Committee of the House and Senate escorted Mr. Attlee to the speaker's platform. Mr. Attlee shook hands with Speaker Rayburn and Senator McKeller, and having been introduced by Mr. Rayburn in one sentence, began his thirty minute speech. Then in line with the usual custom,

Funeral Rites Held for Tom Michael Vick

Last rites were held Thursday for Tommy Michael Vick, 2 years, son of Mr. and Mrs. Vickers, who passed away at home of his parents in the community, November 14. Funeral rites were held Thursday at 3 p. m. at the Harmon F. Chapel, conducted by Elder Pricer. Interment was in Floydada Cemetery with H. Funeral Home in charge of arrangements.

Deceased is survived by his parents, Mr. and Mrs. J. R. V. six brothers and six sisters.

Texas 4-H Delegation to Congress

Big hats and cowboy boots identify Texas' delegation members of boys' 4-H clubs, National 4-H Club Congress, Chicago December 2 to 6. They were chosen by competition in honor of representing their state at the annual affair.

According to announcement, E. C. Martin, assistant state director for the A. and M. College Extension Service, 19 of the club will attend as guests of a boy's road system, while the remainder will be guests of sponsors, national contests in which they came through as state winners.

This group is Ray Adams Swisher County, state winner of the Field Crops contest sponsored by a farm machinery manufacturing company; Clyde Jacob Goliad County, state winner of the Horse and Mule contest, sponsored by the Horse and Mule Association of America, and E. Carroll Fowler of Hall County, state winner of the Better and Home Methods Electrotest, sponsored by the Education Foundation of an electrical factoring company. At Chicago they will be judged with a view of similar contests in other states for award of national scholarship offered by the sponsors.

The winners of the various company's award were selected on the basis of outstanding leadership in their communities, for wartime production of food, and for purchase of war bonds and stamps.

JOSEPH W. GRIGSBY ASSIGNED TO USS PRINCETON

Chicago 11, Illinois.—Joseph Grigsby, 23, signalman, first class, USNR, son of Mr. and Mrs. Grigsby, Floydada, Texas, has been assigned to duty on the USS Princeton, a new Essex-class aircraft carrier soon to be commissioned.

Members of the newly-activated Atlantic Fleet's Naval Training Station at Newport, R. I.

He shook hands again with Speaker of the House and President of the Senate and escorted from the chamber having sat down during the procedure. He was followed in reverse order by the other guests. The Speaker then his gavel and adjourned the session.

Mr. Attlee lacked the shipping and eloquence of Winston Churchill, but his frankness well received. He made a better understanding of labor Party Government and international cooperation.

Suggestions for the Thanksgiving Holidays

BETTY ROSE DRESSES FOR THE THANKSGIVING HOLIDAYS
 These Dresses take top honors with all the elegance of the New Season. All New High shades . . . So easy to slip on.

EXCITING HEADLINES

High, low, brimmed or no brim, file, defining, bejeweled, sparkling, veiled and jeweled, these are the hats you'll see everywhere this fall and winter. Youthful, flattering, "exciters" - designed to really "turn things" for you to keep turning to reap the admiring glances every woman loves.

Exciting Headlines

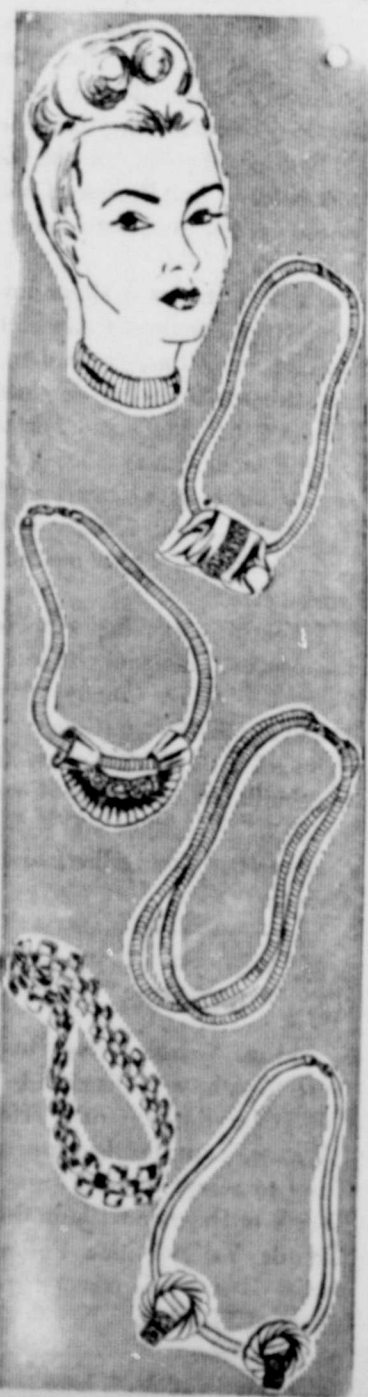

LADIES BLOUSES
 All New Fall Colors and Styles. Long and Short Sleeves.

Betty Rose dresses up this warming spring coat of all wool crepe with trapunto work laurel design . . . a soft, flattering, dressmaker coat that'll match your mood and your manners everyday and Sunday. Sizes 14 to 42

You'll adore its breadth and brevity . . . the broad-shouldered look of this Betty Rose coat is accomplished by way of pleats . . . its fingertip length gives it an air and a flair . . . pockets, too. You'll see it in Charm, and in Glamour . . . of all-wool suede . . . and the colors will almost stop your heart. Sizes 10-16.

HANDSOME FALL BAGS
 Roomier Interiors . . . more beautiful surfaces, colors perfectly keyed to Fall Fashions.

COSTUME JEWELRY
 We are showing many pieces of beautiful and "gaudy" Costume Jewelry which anyone would delight in wearing. They look like a million . . . when used as decoratives.

KIRSHMOOR
 COATS & Suits

SUPREMELY SATISFYING . . . THE KIRSHMOOR CHESTERFIELD

Wonderful! . . . how easily it slips on over all your suits and dresses. Kirshmoor has given it the new flange shoulder and arm-hole depth. Tailored from all-wool Melton cloth—interlined with lamb's wool. 10 to 20

KIRSHMOOR
 Coats & Suits

A LUXURY COAT AT EXCEPTIONAL PRICE!

Truly a splendid coat . . . with slenderizing lines that go beautifully with suit or dress. We did great planning for these precious Kirshmoor classics. Hydrophobia Uncommon Among Men and Animals

Two or three things can be said definitely about hydrophobia," late Dr. Logan Clendenning wrote. "Hydrophobia is a rare disease even among dogs. It is even rarer in human beings. Only about one per cent of dogs who are actually bitten by another mad dog develop rabies. And if 100 people were usually bitten by a rabid dog so that the virus entered the skin, only out 10 per cent of them would become infected.

"In order for infection to occur, the skin must be broken and infective material from the dog's saliva enter the wound. The skin, of course, is usually broken by the dog's bite. But here again there is sort of preventive instituted by nature, because when the saliva is avily infected, the dog has usually reached the paralytic stage that its jaw muscles are paralyzed and it cannot bite.

"Still another piece of comfort is that even if infection occurs in a man being, prevention is pretty certain with the Pasteur treatment. This treatment can be begun even several days or weeks after the bite occurred and still be perfectly effective. A full course of this treatment reduces the possibility of the disease developing in a person who has been bitten by a mad dog from 100 per cent, as mentioned above, to less than one-half of 1 per cent."

Old Rinse Removes Milky Film From Utensils

An advance rinse in clear, cold water will save time and trouble in washing dishes and glasses. Calcium and protein — two of the important food values in milk — cause filmlets in dish washing. Most housewives know how hard it is to wash glasses, pitchers and other milk containers clean. The reason is that calcium forms an insoluble curd which affects not only the looks but the sanitation of the container. Bacteria and other organisms may be held under this film. The protein in the milk also makes cleaning difficult, because the heat of the dish water hardens or coagulates it, making a film that is difficult to wash off the surface.

Milk on clothes, dish cloths, table cloths and towels may leave a stubborn stain after washing. A cloth used to take up spilled milk may come out of the wash tub permanently stiff. The effect of the soap on calcium and heat on protein show up.

If milky dishes and fabrics are washed with clear cold water before coming in contact with warm soapy water, much of the calcium and protein will be rinsed away so that the washing may be done satisfactorily.

Lunch Container

The desirable lunch container is large enough for a good lunch, easily cleaned and well ventilated. Satisfactory containers for carrying lunches include the basket with attached cover, a well ventilated light lunch box with thermos bottle for hot or cold drinks, a tin, aluminum or granite bucket with case-fitting cover and holes for ventilation. Newspapers, paper bags, cardboard boxes, fiber or cloth boxes are not very satisfactory for carrying lunches. The lunch box should be cleaned well every day and re-lined with fresh waxed paper to keep food from taking up moisture and odors. It should be sterilized by boiling water at least once a week and kept in sunshine over the weekend. Soda dissolved in the rinsing water will help rid the box of fats, acids and odors.

Better Cotton

Too much moisture in seed cotton greatly reduces the quality of the lint, and sometimes causes the cotton to sell for as much as four-fifths less than it would have brought had it been ginned dry. If the cotton is a bit green or is wet with rain or dew, if the weather permits, it should be spread in the open to dry. Storing damp or moderately wet seed cotton on the farm will make it gin better, provided it is dried during storage. Cotton picked in the season, after exposure to a weather, is often several grades poorer than the same kind of cotton picked early in the season. Picking cotton early not only results in better colored fiber, but also cleaner cotton. Later in the season, when the leaves and trash are dry and break easily, it is much harder to pick cotton free from trash.

Tanning Technique Ancient

Tanning of leather and the manufacture of shoes dates from prehistoric times. Part of the story has been gained from crude drawings, unearthed by archeologists, says the National Geographic society. When a cave man cut or bruised his foot, he wrapped them in animal skins, and fur foot coverings gradually became as popular as present-day saddle shoes. Various articles of leather, more than 33 centuries old, have been found in Egyptian tombs. The ancients discovered an early means of refrigeration when they learned that leather "breathes" and water remains cool in a leather bag. The Arabs, artisans in saddle-making, probably did the first really satisfactory tanning, using flour and salt to cleanse the skins, then placing them in the sun to dry.

Root Vegetables Keep Well in Basement

Having fresh vegetables to serve the year around on the table—those raised during the summer in the home garden — is quite possible. Proper storage space is all that is necessary. Root crops, such as beets, carrots, turnips, rutabagas, salsify, parsnips and winter radishes, also late varieties of cabbage and potatoes, may be stored in the basement.

In a house heated with a furnace, a satisfactory storage room can be built by partitioning off a section of the basement, preferably in a corner where a casement window can be used for ventilation and control of storage temperature. Both outside and inside walls, as well as ceiling and door, should be covered with insulation board, and a fill-type or blanket insulation should be put on the ceiling to prevent heat penetration. For the floor, use moist sand covered with a slatted framework.

Ventilation can be provided in the storage room by removing a window sash panel and inserting a cold air flue with outlet near the floor. This flue should have a damper that will permit easy control of the ventilation and temperature. It is also well to provide an outlet for warm air by replacing another pane in the window with a small door. These openings should be screened to keep out flies and rodents. Darken the remaining portions of the window, as light will damage the vegetables.

Women Face Tough Fight in U. S. Politics

Those women who succeed in American politics do so, with certain significant exceptions, by playing the game according to the men's rules, declares Coronet magazine. For American politics is still a man's game.

When suffragettes chained themselves to the White House fence to the dismay and annoyance of William Howard Taft and Woodrow Wilson, their battle cry was for women's rights. They proposed to "take politics out of the saloon," to bring "a woman's touch" to the legislative halls, and to end the making of laws in an atmosphere permeated by the fumes of Pittsburgh stogies. Yet today only nine women sit in congress — about 14 per cent of congressional membership — and on a census basis there should be more than 20 women members.

By and large, the influence in congress of the "gentlewomen" is much greater than would be expected from their numbers. Their biggest fight is to get a nomination from the local organization, for few women are trying to move up the ladder from precinct, to ward, to city, to legislature, and finally, to congress. It has been said that a woman needs much more ability and energy than a man to break into congress.

Main Jap Island

Honshu, or Main—as the name is literally translated—is the largest and most populous of Japan's home islands. Honshu can be compared to southern New England and the Middle Atlantic states in the United States, or to England in the Scotland-England-Wales make-up of Great Britain. On this island is the ancient capital of Old Japan, Kyoto, now sometimes called the western capital, and Tokyo. Besides its urban centers, Honshu holds the largest and only extensive plain of Japan proper, a productive area highly important in this mountainous hard-to-cultivate country. Honshu, like the rest of Japan, has considerable resources in timber. It produces some copper, gold, iron pyrites, coal and a little petroleum, as well as small quantities of iron. Its mountain streams provide hydroelectric power on which much of the modern industry has been based.

Lost and Found Department

The U. S. army operates what is probably the world's largest "lost and found department" at Folembray, Aisne, France. There, at the quartermaster personal effects and baggage depot, over 100,000 pieces of baggage and parcels of personal property, including everything from toothbrushes to stuffed snakes, await the claim of their soldier owners. The depot handles all personal property which has become lost or separated from its owners in the European theater. Some of the items were left behind in combat units by evacuated battle casualties, some belonged to captured or missing men, and some were lost en route during rail and truck movements.

Mixing Insecticides

Keep children and pets away when mixing insecticides, and wash all utensils thoroughly and promptly after mixing. In both mixing and using sprays and dusts, take great care to keep them out of mouth, eyes and nose, and also away from the skin as much as possible. Shorts and sun-suits are not suitable wear for these jobs because they leave so much skin exposed. After handling and using insecticides, wash hands and face thoroughly. Garments worn when spraying and dusting should be washed frequently. Bags and packages which have held insect powders should be burned out in the open air and empty cans and any leftover insecticides should be buried at least a foot in the ground.

Some Victory Loan Facts

Washington, D. C. — Victory Loan facts, honoring the men and women who won the war, are as follows:

Dates: October 29 through December 8.

Quotas: \$11,000,000,000; 4 billion in individual sales, 2 billion in Series E sales, 7 billion from other non-bank investors.

Reasons: Treasury balance will be drained by December. Money is vitally needed for hospitalization, rehabilitation, retraining, feeding and clothing men overseas, transportation home, payment of munitions already used.

Special Victory Bond to Honor Late President

Washington, D. C. (Special)—The Treasury has called attention to a special Victory Bond to be sold during the Victory Loan campaign, starting October 29, for \$11,000,000,000.

The bond is in memory of the late President Franklin Delano Roosevelt. It will be on sale at all agencies authorized to issue United States Savings Bonds of Series E.

The bond will be in the denomination of \$200, to be issued at \$150. It will constitute an additional denomination of Series E Bonds, and will have the same terms and attributes as other denominations. It will carry a likeness of Mr. Roosevelt.

VICTORY LOAN

Farmers Have Less to Worry Them This Time

Washington, D. C.—Farm prices stand at 206 per cent of the 1909-1914 average—higher than the prices of 1918—and will drop again but not as sharply as in 1921 because the Government is required by law to maintain support prices of at least 80 per cent of parity for two full calendar years following the year in which the war ends. The Department of Agriculture has announced.

The announcement indicates the farmer will not be a victim of a drop in prices similar to that which followed the last war in 1921 when prices hit the low of 115 per cent of the May, 1920, level which was 235 per cent of the 1909-1914 level. Thus the farmer will have more money than after the last war.

War Finance Committee officials said that in addition to the maintenance of the price level for two years, that non-farm families already have, and are accumulating, weekly savings through the Payroll Savings Plan of the War Finance Division of the Treasury. This, they claim is proof the non-farm front will be much better able to support itself than after the last war during the normal lull of reconversion. Buyers of farm products will have the money to buy, it was said, and farmers should avail themselves of the opportunity to acquire War Bonds during the Victory Loan so as to have the money with which to modernize and handle the non-farm market demands that will be backed with cash to pay sustained prices during the two years after fighting ceases.

The Payroll Savings Plan has sold \$18,000,000,000 in War Bonds to wage earners, that great bulk of non-farmers who will, if need be, enjoy the fruits of their savings in the reconversion period and have the cash with which to support themselves.

Secretary of Agriculture Clinton P. Anderson adds that "prosperity of the farm depends primarily on purchasing power in the city."

The Annual Bargain Days Mail Reduced Rates are now in effect. The same low price prevails; there has been no increase. However, this year on account of the print paper shortage, the offer is open ONLY to OLD subscribers.

We are distressed that we can not accept new subscriptions.

To renew, bring your label to this newspaper office. This newspaper is an Authorized Home Town Agency.

FROM THE PAGES OF VOGUE...

TWO-TONES are twice as Fashionable

Soft flattery touches the tailored frock . . . embroidery goes to your heart . . . and you look slimmer, trimmer. In Paca Rayon Crepe . . . Black with Cupid Pink or Ocean Aqua, Brown with Riviera Sand or Blue with Hero Blue.

Sizes 38 to 44.

"Always Showing Newest Things First" Mrs. Mollie A. Morton, Owner

"HERE'S WHY..."

1. They pay for the care and cure of our wounded . . . supply the finest of medical aid. They help to bring our boys back home . . . to pay for all the colossal cost of Victory.
2. Held by millions of Americans, Victory Bonds will provide a solid reserve of buying power to assure steady jobs for veterans.
3. Buying Bonds rather than scarce goods helps keep the lid on prices . . . prevents inflation and its follow-up of depression.

4. Bonds form a reserve for future repair and replacements . . . for modern buildings, improved stock, better homes.
5. They hold dollars in store to pay for our children's education . . . right on through college.
6. E Bonds return \$4 at maturity for every \$3 you invest.
7. They give security to enjoy later years with peace of mind.
