Mayor Hopes Clean-up Will Prevent Epidemic Of Polio

Despite all-out efforts of official Floydada to maintain a state of adequate sanitation in the community, Mayor F. C. Harmon this week said that inspections in addition to the formal ones made by the city marshal and the city health officer. These reports all unkept places. Ordinance Number One of the City of Floydada provides a penalty for unkept and filthy premises and this ordinance will be invoked if need be.

The city is bearing down on the need of eliminating the fly so far as possible, and is stressing the desirability of garbage cans with lids. Yesterday Chamber of Commerce Secretary Robt. H. Crowell pledged the full support of that organization of the community behind the city in this major effort at sanitation. Crowell pointed out that there is no known drug that can cure polio, no known vaccine that can prevent it in man. In spite of wide re-search only known present-day mode of battle against polio is sanitation. What, if any, the relation between filth and polio may be is not definitely known. However, there must be a point of contamination and filth is the breeder of contamination. "Should we have an outbreak of polio in Floydada all the citizens would be insisting that something be done immediately," said Crowell. "What we need to do is to work with the city before the first case breaks and scares us out of our wits."

Polio Situation in Texas Calls for Basic Sanitation, Declares Dr. Cox

AUSTIN.—With the alarming total of 922 Texans having been attacked by the dread disease poliomyelitis, 1949 bids fair to be the worst polio year the State has ever experienced, and health officials in every section of the State are exerting every effort to bring the disease under control.

Dr. Geo. W. Cox, State Health Officer, has re-iterated his appeal for every citizen to cooperate in a continuous clean-up program, ridding their premises of all rubbish and trash and other disease-spreading insects. "This polio situation will never be controlled without the observance of stringent basic sanitation measures," the State Health Officer declared. "The filth on your premises may cause the disease to attack your neighbor; and the same condition on his premises may cause polio in your home. This problem of controlling polio is one demanding the closest possible cooperation, and until a program of continuous cleaning up is instituted and stringently enforced, we shall continue to face the menace of polio in all sections of the State."

Dr. Cox emphasized to parents whose children are suffering from poliomyelitis, the comforting knowledge that about 60 per cent of all cases of recognized polio recover completely, and at least 25 to 30 per cent of recognized cases recover with only minor disabling paralysis. "Only about 8 per cent of polio victims develop the deadly bulbar type, which affects the nerves at the base, or 'bulb' of the brain," Dr. Cox said. "Most patients suffering from bulbar polio die within a short time. But it is a comforting thought that 92 per cent of polio patients never develop bulbar polio, and make a partial, or in many cases, complete recovery and are restored to health."

July Permits Reveal Increase in Building

Despite a let-down in building activities in Floydada during the harvest and immediately preceding it, while every effort was put forth to save and store a big wheat crop, the construction of new homes did not come to a complete halt, and considerable activity in this line has been in evidence following the harvest period.

Not only is there talk of new homes to be constructed, but also actual construction is under way on eight new homes which have been started since the first of July, in addition to a backlog of work from May and June building permits.

In view of the fact that builders indicate only nominal figures as to cost of new construction or repair proposed in permits sought at the city hall, any approach to actual outlay now being made for new homes is not possible.

Among the new homes started in this month are the following: Residence of Mr. and Mrs. Jno. F. Lewis on Lot 19 of Block G, Andrews addition; Residence of Mr. and Mrs. Paul B. Murff on lots 17 and 18, Block 7, Bowers & Price addition; Residence for Earl Crawford on Lots 14 and 15, Block 3, New Home addition; Residence for Bert Lee Emert, Lot 12, Block A, Bowers & Price addition; Addition to home of L. H. Christensen, Lot 14, in Block 88, original city limits.

Carry-over from building work started in May and June makes a figure of upward of 12 new homes or re-construction in process at this time within the city limits, including the work started in July.

Cafe Re-Opens Friday Morning

Ferrell Gant this week said that the B & M cafe, which was closed Monday night so that the interior of the cafe could be brightened up with paint and re-arrangement, will re-open tomorrow (Friday) morning. Meanwhile the 24 hour a-day eatery has workmen busy completing the new dining room as an annex to the lunch room to make it give a wider service in the community. A dining room that will accommodate 60 or 70 persons is in process of completion now.

Although there is no probability the new dining room will be finished in detail by Tuesday night, service in it will begin on that date when the Caprock Water and Sewer Men's association will gather there for their quarterly get-together. City Water Superintendent Floyd Johnston and the City of Floydada will be hosts for the evening. The waterworks men are constantly being prodded to maintain high standards of sanitation in the water supplies of Texas cities and towns. The Caprock association studies latest methods and best means of meeting this demand. Gant said 40 or more association members of this association are expected to feast at the inaugural meal. Next on the schedule is Floydada Lions club luncheon on Thursday in some four years.

The Gants did not know this week just when the new dining room would be finished, but the date is not far distant. Meanwhile the new operators of the cafe are hoping it is going to be as popular as advance indications foretell.

Elza at Consumers; To Take Over Soon

Jewel Elza, who has been with the First National bank here since January of 1946 and has been assistant cashier there the past two years, is due to succeed C. C. Huckabee as manager of Consumers Fuel association sometime in the next 30 days. After resigning from his post at the bank Elza has been working at Consumers since under the tutelage of the retiring manager. Huckabee resigned as manager of Consumers after 14 years of service, his resignation to take effect at a convenient early date. Yesterday he said he had no plans until after finishing his job with the big retail fuel cooperative.

Other changes incident to the new arrangement include: Resignation of Collis Roland at Consumers to take a parts and service detail with Terrell Bros. Case Implement house, and the naming of Gene Collins, Jr., as a new member of the bank's family of employees. Roland had been with Consumers since 1941. Collins recently graduated from West Texas State college and is making his first business venture in taking employment at the bank.

Students in seven Floyd county common school districts are affected this year by the rule governing transfers from one district to another. County Superintendent Clarence Guffee pointed out this week. All students whose grades are not taught in their home districts must transfer during the month of July, the application to be in the hands of the county superintendent before August 1, to be eligible for transfer of funds for scholastic purposes. Districts affected are South Plains, Sand Hill, Lakeview, Lone Star, Cedar, Dougherty and Providence.

Crowell In Week of C of C Training

Robt. H. Crowell, manager of Floydada Chamber of Commerce, returned last week-end from Dallas where he spent a week of intensive study in a school for executives of commercial organizations. Included in the study was "laboratory" problems, including everyday problems of southwestern communities. Outstanding speakers addressed the sessions and conducted panel discussions on various phases of civic and commercial demands of cities and towns.

RAT PROOFING CAMPAIGN IN FLOYDADA TAKES SHAPE WITH INSPECTIONS IN BUSINESS AREA

Disease carrying rats are on the march in West Texas, but public authorities are warning residents of such communities as Floydada to make preparation for them so as to minimize their spread of typhus by refusing to make places for the rats to harbor.

Representative of the federal Bureau of Health working through the Texas State Department of Health, has been here for several days and will continue here for an indefinite period to make inspections and talk preparedness to the people of the community.

Two or three blocks of the business area have been covered by the representative in minute inspections of buildings in the community. Todate recommendations that the property owners make changes and improvements to bar rats from their buildings have been made to several property owners. Business establishments are being contacted first, with other property owners to be contacted later. Menard O. Field is employed by the city to work with the representative of the federal bureau. Field said screens recommended to be used in business establishments appear to meet every requirement in the prevention of entry through openings. Where defective foundations or walls are found definite recommendations for their repair are made, Mr. Field said. Several business houses are undertaking to meet the requirements of the sanitary code in this respect, he said.

Judge on Vacation

Floyd County Judge G. C. Tubbs and Mrs. Tubbs, in company with their daughter, Mrs. Mary Louise Clark, of Biloxi, Mississippi, left Floydada Friday of last week for the west coast, where they are vacationing, while guests of relatives there. Judge Tubbs' mother, Mrs. G. W. Tubbs, and a sister, Mrs. J. W. Nevius, live at Mendocino, California, and his daughter Mrs. Wilmer O. Jones, Jr., at Anaheim, California.

Others are yet to be contacted. Many campaigns to control the rat have been tried, with varying degrees of success. Rat-proofing buildings so as to furnish the rodent no place for harbor is today the most successful expedient found, say bulletins of the Bureau of Health. The campaign here will continue for an indefinite period. An ordinance recently enacted by the city council gives the public health authorities full authority to act.

Merchants Are Dominant In League Play

The world of local baseball took the Floydada Softball League and revived play in the city champion.

The merchants seem to be the most dominant in the number one league but one game in the league games. Up to and including the games that ended the season of play, the standings are as follows:

Team	W	L	Pct.
Merchants	7	1	.875
Builders	5	4	.555
South Plains	4	5	.444
Plains	1	8	.111

Merchants had been in the league since the time out for harvest had to drop out because of a busy time of the year was a week placards are being posted in the business by the association to let the public know at who plays and when. Some merchants have missed games they had to see and now the association those folks are taken

Merchants team with their South Plains, taking South Plains, Mart, Lockney and REA in order and with some ease. Dave's superb pitching was the answer. Merchants has been winner in two out of three games. Builders Mart vieing for place and Lockney and South Plains wanting to see who gets the cellar. REA, with Joy in the box, has had a hex hammer and cement boys. Merchants night's schedule calls for game between Lockney and Mart and the second between South Plains and the Merchants.

World of Fun in a-Swimming

World of fun in a-swimming municipal swimming pool has enjoyed the past week by the merchants of this and other communities, reports Mayor F. C. Harmon.

Architects do get wrong and things on paper that do not show on the ground is illustrated by the fact that the deep part of the pool is "too far north" for high spring board. Skinned and bumps on the forehead and deep divers is plenty proof statement. Also that high time to keep their eyes on the ladies rest room, unless there is a change in the arrangement of all of the work is completed.

Robt. Montgomery New Phillips Man on N. E. Corner

Robt. A. (Bob) Montgomery and his wife and child have returned from Alaska to make Floydada their home after 2 1/2 years in the nation's biggest territory.

The one-time football great of Alaska made a considerable record while in Alaska as a service man for automobiles in his brother's garage. Hitting out on his own, Bob has an idea he can be of considerable value to the motor public here as a service station operator.

Accordingly he announced last week he had bought Carthel's Phillips service, northeast corner of the square, and is now out bidding for a chance to prove his ideas as to motorist service.

Washing, lubrication, wheel packing, motor cleaning are among the services at which Bob's Service station hopes to excel. And the station will continue to feature Phillips gas, motor oils and greases.

A. C. Carthel, whom he succeeds, is giving all his time and attention to the Curry Motor Freight service in Floydada.

County registrants for self-service, born in the month who registered with Selective Service Board No. 45 have been as follows: Bruce Davis and Charles Patrick of Route 1, Floydada; Strickland Thomas, Route 1, and Ewell Lee Kelly, of Herman Edward Nelson, registrants included Sidwell Randolph, Jr., and L. EDITORIALS

Any precaution that can be thought of is not out of line in efforts to prevent the spread of disease. Work of city authorities in particular to make sanitation the number one project in a community for the protection of the lives and the health of the people should have the immediate sympathetic help of the residents of the community. The fact that polio and typhus threaten homes is enough reason. Any home which has not been visited by these plagues is just a more fortunate home than one which has. Perhaps Floydada city authorities have been as insistent on cleanliness and sanitation as any other in the whole territory for the past two years in particular. Fogging with DDT on the chance that it would and could be helpful, inspections and insistence on sanitation also have their part in the general scheme. Whether any one certain theory on the source of contamination is correct is not exactly a matter of argument in our minds. It is that whatever toward cleanliness and sanitation in the community the authorities see desirable to do they are entitled to full support from the people - warm support and not just a lukewarm attitude. There is the practical side, of course, but even in the difficult case where it seems impossible to comply with ordinances and orders an attitude of willingness will get some kind of an arrangement that will be conducive to better health conditions and not so burdensome that the property owner cannot go along.

Biggest self-propelled combine to operate in the southwest harvest fields this year (and that means in the whole world, of course) was a shop made model that operated in the fields of John Mayo and his partner, Walter Galley, at Hereford during July. This self-propelled cut a swath 20 feet wide, plus a few inches. The machine was Galley's brain child and Mayo did the financing. They named it the Creeping Beetle. There was quite a bit of curiosity and comment. The machine worked.

The types get much fun out of playing tricks on the man that handles them. The compositor, the desk man, the proof reader and all watch all the time. That is what makes it fun, presumably. Last week this newspaper had a good one that gave a chuckle to a few of the customers and a belly laugh to some of the others whose risibilities were hit a bit harder. It was about the Lygus bug. The word "similar" in the copy came out "smaller" when the office got through mauling it around. It was a county agent story. The county agent said that the Lygus bug is "similar" to the fleahopper but is five

times as large. We had the bug with the interesting name looking "smaller" but being five times as large. Pretty good act for a cotton patch insect to put on. County Agents get used to such things happening in newspaper offices. They also get used to things happening out where they work, and, apparently, are never fazed by any of it.

The increasing use of irrigation in Floyd county means that Johnson grass will be an increasing botheration and an increasing source of contamination for the purebred seed grower. In the Pecos valley they fought Johnson grass in the irrigated belt unsuccessfully for many years. Finally they hit on what seems to be a most practical way to combat the grass in cultivated fields. The solution, they say, is so simple most anyone might have thought it up. Instead of sweating it out and spending a lot of money for deterrents the cotton men in the spring turn a flock of geese loose in their fields, the bigger the field the more geese. A goose is a goose for Johnson grass one big cotton raiser said. They do not kill the grass but they bore way down into the ground for the tender shoots. Seems like geese like tender Johnson grass sprouts and roots better than anything they can be offered. They leave the other growing things alone.

Some Floyd county men, who have begun to be known as veterans at irrigation, have learned to keep their irrigation work from being the back-breaking job that irrigating used to be and still is for some people. Some of these operators also are trying to solve the Johnson grass problem on their ditches, especially the permanent ditches they have thrown up. On the farm tour last spring one set of ditches was seen where the farm operator spent a bit of money poisoning weeds and grass. He said it was worth it, whatever the cost to have the ditches clean so that the water could be easily handled. He hadn't asked the cost and was not looking back, he said, since he had his irrigation water under control.

Mentioning typographical errors, one all the newspapermen saw and laughed about recently was in a nationally-circulated periodical for publishers. It was in a laudatory story about C. W. Warwick, publisher of the Canyon News. It said that Warwick had been publisher of the Canyon newspaper "for a century." Some one quipped that it probably just seemed that long.

The largest holder of Southwestern Public Service stock owns less than 2% of the total shares!

To us it is reassuring that so many folks have invested their money to help us progress with the area we serve. It means also that ownership of Public Service is vested in thousands of folks right around here... teachers, ranchers, small businessmen, churches.

In other words, your Public Service Company belongs to the Panhandle - Plains - Pecos Valley - Eastern New Mexico. Somehow, that's the way things work best... free enterprise and sound business management... together... for a better way of life.

Cut your plowing costs in half with the original M-M big disc Wheatland plow—because of its wide cut and light draft in comparison with any moldboard plow. The Moline does a better job of plowing, from 3 to 9 inches deep. It scours well and is remarkably free from clogging with its big 26-inch discs, spaced 19 inches apart. The plowing job compares favorably with a moldboard plowed field that has been nicely harrowed.

Prepares an ideal seed bed for small grain—BECAUSE it mixes trash and stubble with the soil in such a way that there are no air pockets, and there is good capillary action between subsoil and seed bed.

The Moline Wheatland disc plow is strong, sturdy and rigid, built entirely of strong steel bar angles and castings. Farmers say it "can't wear out or give." Other important points also make it the outstanding plow of its kind on the market today.

Come in and get free literature and complete facts. Let us show you how it cuts your plowing bill. The Moline Wheatland is also ideal for summer fallowing... gets the weeds and moves all the ground.

Coronet Hails Those Amazing Penney Stores

The J. C. Penney company is saluted by the August issue of Coronet magazine in an article titled, "Those Amazing Penney Stores."

The article, which was written by Lawrence Galton, describes the company which in 47 years grew from a single, tiny store to a nationwide chain of more than 1,600 by being friendly and helpful and giving good merchandise values.

The Penney store here is located at 116 East California street, and is managed by John W. Reue. Penney's caters to the average

American family, declares Coronet. "What Penney's has accomplished is to combine all the advantages of modern mass-merchandising with the old home-town store idea, sacrificing none of the latter's friendly helpfulness towards customers."

For 47 years, says Coronet, it has been an ironclad Penney principle to quote comparative prices. "Sales are not held. 'We Don't Deliver' is an unbreakable rule, and not 'a single dollar's worth of goods has been sold across the counter on credit.'"

Much of the credit for Penney's spirit and success goes to James Cash Penney, who was born 73 years ago and now is honorary board chairman of the company he founded. Today, he still is seen at his New York Office, when he isn't lecturing in churches and before business and civic groups.

Coronet concludes its tribute to the Penney stores with these words of J. C. Penney: "Today's greatest challenge is human relations. You won't find a finer example of good

human-relations that between our people and our customers. The answer lies in the spirit within our company, built up because everybody has an opportunity to get ahead and participate in profits."

Weed Burning Idea

LOCKNEY—Bob Miller, a member of the advisory committee in the present sanitation campaign, told this week of a weed burning idea he had found that works. He took an old tire, filled it with kerosene or gasoline, tied a wire to it set it on fire and drug it over the weeds.

The tire makes such a fierce fire that it gets the weeds pretty good, he said. At least it kills them and a repetition of the process a little later will complete the job, a reporter in the Lockney Beacon said.

Clean Up Era Program IN FLOYDADA

From Now Until August 3, 1949

There is no need for us to try to tell the public how serious the polio epidemic is and the grief it can bring to a community and individual families and the maiming of our children for life. You can read about it in all the daily papers.

We are hoping that polio will not hit Floydada and are doing all that a city like Floydada can do with the means we have to do with, BUT we need help from all the citizens of the city and are declaring a clean up period beginning now to be climaxed on August third by asking all places of business to close the morning of August 3 until 12 noon, except eating places will be allowed to serve breakfast.

Start now and get your weeds and grass burned and put all unburnable things in the alley. Be sure it is all ready early Wednesday morning August 3rd.

This being for the purpose of assisting the city in a mass movement of garbage and trash from our town and completing personal clean up of our area.

Alleys are for use by the people as a whole and trees must be kept cleared out so that cars and trucks can pass thru them easily. Nothing is allowed to be stored in the alleys.

Inspectors will be appointed for each district and all unkept places will be reported.

I again call your attention to ordinance number one which provides for a penalty for unkept and filthy places.

The time has come when authorities cannot afford to be lenient on any one for lack of interest in their homes.

The state health department is working with the city in the cleanup program.

We are asking that all grocery stores and cafes or others who place foods and refuse fruits at the back for some one to pick up later, to put those things in a garbage can with a lid and keep the lid closed.

We must have the co-operation of all to make the city safe from disease.

By Order of the Council,
F. C. Harmon, Mayor

West Texans Gather at Ralls August 4-5

RALLS—Plans for the 24th annual West Texas Old Settlers Reunion got under way here this week. The celebration is to be held in Ralls on August 4-5. Invitations and notices to members of the organization will be in the mail this week-end.

J. Edd McLaughlin, president of the reunion, met with officers and directors of the old settlers' and of the Ralls Chamber of Commerce to be guests of the town on those days.

Present for the meeting were Will Ezell, Mr. and Mrs. Walter Gillon, Roy Terrell, Mrs. Temple Ellis, McLaughlin, C. W. Mann.

A special program has been arranged for the members, some of

whom will come from as far away as California for this annual event. Those in the immediate vicinity of Crosby county are asked to bring basket lunches to be spread, picnic-fashion, with the others. Those who come from distant points will have baskets prepared for them by local committee.

The first day will be entirely devoted to the traditional doings of the pioneer visitors. The city auditorium is being equipped with air conditioners, ice water, loud speakers and other conveniences to aid visitors in meeting and talking with friends of former years.

In the evenings, the town will be thrown open to the public. A square dance will be held each night on an outdoor pavilion at the Ralls high school baseball park. Burl Griffith and Harvel Littlefield, in charge of the square dances, estimate that about 2,000 persons will be on hand for the dances. A platform large enough to accommodate 30 squares is to be built for the occasion. Callers from all over the area are being invited to attend.

The Ralls rodeo is preparing an important matched roping, and invitations have gone out for guest speakers to entertain crowds at the auditorium.

Among the activities to be enjoyed by the pioneers will be an old fiddlers' contest, a memorial service at Old Emma cemetery, singing and special music.

Mrs. Walter Gillon, Mrs. Nellie Witt Spikes, secretary of the old settlers' and Mrs. Temple Ellis compose the program committee. Emmitt Lynch is in charge of entertainment; John Justice, music; Frank Benson, cleaning of grounds; and Walter Watkins and Percy Eason, table committee.

LAWN PARTY HELD

A lawn party was given in honor of the Pastors' Helpers Sunday school class of the Methodist church at the home of Mrs. Will Snell.

In Mrs. Snell's lovely back yard, ice cold watermelon was served as refreshments to Misses J. N. Bartlett, O. B. Olson, P. M. Felton, R. M. McCauley, J. J. McKinney, M. R. Johnke, W. E. Walker, R. H. Willis, Bob Henry, Sam Thurmon, C. Meek, D. D. Shipley, Addie Thagard, J. E. Laughlin, Lula Slaughter, and the hostess, Mrs. Will Snell.

S. G. BISHOP CLAN GATHERS

Visiting Mrs. S. G. Bishop, of Floydada over the week-end were her sons and families, Mr. and Mrs. Buck Bishop and family of San Diego, California; Mr. and Mrs. Harold Bishop and family of Lordsburg, New Mexico; Mr. and Mrs. Gayle Bishop and family of Morten; Mr. and Mrs. Therman Bishop and family and Mr. and Mrs. Daily Bishop and family of Wichita Falls and Mr. and Mrs. Beryle Bishop and family of Sherman.

Mrs. W. D. Newell returned home Sunday by plane from Munford, Tennessee, where she has been for the past two weeks visiting her daughter and family, Mr. and Mrs. G. H. Shirey and children, Betty and Judith Anne.

Mrs. Newell is employed by the ACA where she has been bookkeeper for some time.

Cull Loafers In Your Flock

COLLEGE STATION—It is a direct loss to the poultry producer to feed non-layers during the summer months, says W. J. Moore, associate extension poultry husbandman of Texas A. & M. College, and it's also one of the reasons poultry producers are not doing a better job of maintaining high egg production during the summer months.

He advises poultrymen to sell non-producers just as soon as they are noticed. Chances are they'll not come back into production until late fall or early winter, and during this time, feeding them is a dead loss.

Hens that show a shrunken, dried up comb, yellow beak, new feathers, yellow shanks and yellow vents should be culled and sold. Hens that lack vigor and spend their time

from the flock. A good producer has to eat good feed and drink lots of clean cool water and they can't do this unless they rustle. Of course the poultryman must do his part by supplying this feed and water, adds Moore.

The poultry producer who does a good job of culling continuously will be well paid, and at the same time he'll be following one of the important practices of efficient poultry management, concludes Moore.

Mr. and Mrs. Leo Jackson, of Greenville, are here visiting in the home of Mr. Jackson's parents, Mr. and Mrs. A. C. Jackson. The Greenville residents will be here until July 26 when they will go to Beaumont, where Mr. Jackson will attend a coaching school for a week. Jackson had been lead coach at Cameron for some time before going to Greenville. The Jackson's daughter, Myrna Gail, has spent the summer here with her grandparents, while her parents attended school at East Texas State Teachers college at Commerce.

Rural People Double the Use Of Electricity

Use of electricity by rural people served through the REA program has nearly doubled in the last two years according to the announcement made by the U. S. Department of Agriculture in a report on the Rural Electrification Administration progress during the 1949 fiscal year. This is attributed to the greatly expanded use of electricity by old customers as well as the addition of new customers to the rural lines. 170,000 miles of lines were energized, which was an increase of

42% over the year 1948. On June 30, 1949, REA borrowers were operating a total of 836,000 miles of lines. During the last quarter of the year 1948 REA borrowers added consumers to their lines at the rate of 2,750 each working day. On June 30, 1949, REA borrowers were serving approximately 2,765,000 consumers.

More loans were approved during this fiscal year than in any previous year and nearly as much as was approved during the first years of the REA program.

In Texas 124,449 miles of lines serve 280,946 members.

On the local scene the Floyd County Rural Electric is serving some 1,700 consumers on 1,000 miles of lines. Under construction at the present time is 258 miles to serve an additional 350 members.

Mr. and Mrs. Clarence Glover and son, Lindy, of Mineral Wells, are here for an indefinite stay in Floydada.

Showing new Buick At Dealer Meeting

H. O. Cline, of Cline & Rainer, local Buick dealers, left for Fort Worth Tuesday to attend a preview of the new Buick special model which will be introduced to the public next month. The preview is being held today.

Some 800 dealers from the Dallas zone will be present at the all-day session to be held at the municipal auditorium, the meeting being described as Buick's most important full-fledged dealer convention since before the war.

The special is Buick's lowest priced model and is reported to be completely redesigned. It has been eagerly awaited by the industry since the former model went out of production last December.

Mrs. Cline accompanied her husband and the couple spent Wednesday in Waco with relatives before going on to Fort Worth.

Faster, more accurate seeding with A MASSEY-HARRIS GRAIN DRILL

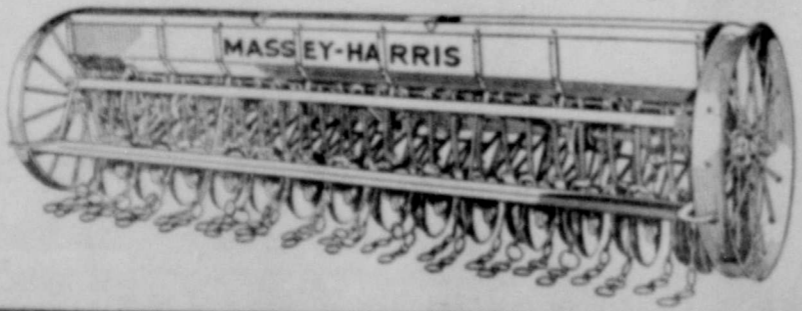

A fast operating, accurate seeding Massey-Harris Grain Drill goes a long way toward holding your production costs down . . . keeping profits up. What's more, your seed costs are cut to a minimum . . . yields are increased. Massey-Harris drills seed all of your grain properly . . . exactly as you set the per-acre quantity. There's no bunching or skipping.

When your grain is up, it's an even stand from fence line to fence line. Harvesting is easier. An even flow going through your combine results in cleaner separation, more grain. Look into these Massey-Harris drills with their huskier construction, constant height lift, front pressure tension on the discs, and dependable center seed delivery. See us soon for complete details.
