SMALL TWISTER PUTS ON SHOW

At 6:00 o'clock yesterday evening a twister that threw plowed dirt a mile or more into the air put on a show for R. J. Hinsley and his wife, who live five miles southwest of Dougherty.

The disturbance was no larger than an automobile when it first began, said Hinsley over the telephone last night. It didn't move at all for five or six minutes then slowly to the northeast where it hit his plowed land and made a terrible fog. It seemed to be headed right for his house, he said, and he and Mrs. Hinsley jumped into their car and ran south to get out of its path. After it traveled on northeast a piece it seemed to widen out and the funnel pulled back up into the cloud.

People in the area were much alarmed. On the outer fringes of the disturbance there was some hail, no big damage reported. Dirt pulled up into the cloud from the bare fields was falling four miles distant 20 minutes after the funnel disappeared.

In Floydada the fire department sounded the fire alarm to alert the populace and Floydada Radio Station KFLD warned the people to be on the lookout.

Trickle Of Wheat To Market; Harvest Halted By Weatherman

CONTRAST this neat street scene in the outskirts of Lubbock with your mind's picture of Houston and Second streets through Floydada. It takes curb and gutter to complete the picture and set off the many attractive homes and shops which line the nearly two miles of the highway. Similar opportunity is presented on East Missouri, where property owners could add greatly to their values with a curb and gutter improvement program.

With an eye cast cloud-ward for signs of hail and/or storm, Floyd county farmers this week had started the trickle of wheat to the market places over the county, with the biggest movements of grain reported from Floydada elevators.

Yesterday afternoon five carloads had been dumped here. Tuesday the movement was about 16 to 15 truckloads to the elevator. This means that only a few fields actually had harvesting machines in them, mostly around Floydada and around Lakeview.

However, machines by the score were being tuned up yesterday and only the weather man can prevent a considerable movement of grain by the week-end and whatever rush there is going to be by the latter part of next week. Some areas of the county had showers to heavy rainfall late yesterday.

Last night it appeared that no wheat will be cut in Floyd county today. Showers to heavy downpours are indicated in meager reports obtained by The Hesperian. Some scattered heavy hail fell and some damage by hail is reported.

Yields to date have been satisfactory for an "off year." One elevator man made the guess that a 10-bushel average would catch the crop that is being harvested. However, figures have been going up on yields as a few have finished. One 13-bushel crop, to illustrate, wound up at 16 bushels on a field of 60 acres.

First Reports Encouraging
First wheat cutting in this portion of the county, and probably the first loads to reach market from Floyd County soil in 1951, came from the farms operated by M. H. Martin, Glen Jarnagin and John P. Moss. Martin gets credit for the first wheat cut in the season. Eight acres of a 58-acre field did 99.3 bushels with a test of 62 plus. It had a 13.8 per cent moisture test. The variety was Early Wichita.

Glen Jarnagin, four miles east on the Dorrell lands, started his harvest Friday in 20 bushel wheat, Early Wichita, that tested 62 pounds at the elevator. It had a moisture content of 11.4 per cent.

Johnny Moss' first cutting was on the Charles Massie lands six miles southeast of Floydada. His estimate of the yield was 17 bushels, possibly a bit more. The wheat looked like 10 bushels per acre a month ago.

At Robert Muncy's elevator, Muncy, Shirley Race delivered the first load of the season Saturday from a high corner in his field. The grain tested 62 pounds, with moisture content 13.8 per cent. A good deal of dry land wheat will be harvested in the area and is likely to average up at about 10 bushels, Mr. Muncy thinks. A very considerable per cent (See Harvest Halted back page)

Chest X-Ray This Week-end Will Be At Petersburg

Two days of free chest x-ray by a state health department mobile unit will be given Friday and Saturday at Petersburg, it was announced this week.

Yards and Homes Tour Friday By Home Demonstration Women

A tour of yards and homes will be held Friday afternoon, June 15. This tour is an annual affair sponsored by the Home Demonstration Clubs of the County and the purpose is to see the achievements of the club members visited.

The tour on Friday has been held to a small area so that more time may be taken. Other tours in other parts of the county will be held from time to time.

Leaving at 2 o'clock from the Agriculture Building in Floydada the group will first visit the back lawn at the home of Mrs. Claude Price in Floydada. Mrs. Price belongs to the Sunnyside Demonstration Club.

The home of Mr. and Mrs. R. H. Tinsley will be visited next, then, in order, homes of Mr. and Mrs. H.

Move To Pave Houston Gets Several Okeys

The Houston Street highway paving project seemed to be gaining momentum this week, as the committee members began to contact property owners along both sides of the street from Third to Tenth Street.

The proposed project will widen the present street by an estimated 30 feet. Property owners are being asked to pay the cost of constructing concrete curb and gutter in front of their own property. Committee members stated this week that the response had been very favorable, and that signing of the agreements would likely be completed within a week.

When the agreement between the property owners and the contractor, J. D. Colville is completed, the city council will negotiate with the Texas Highway department to widen the asphalt paving to the concrete curb and gutter at no additional cost to the property owners or the city.

The streets and highway committee of the Chamber of Commerce has charge of getting the agreements signed. This committee is (See Paving, back page)

Two New Farm to Market Roads Projected by County and State

Two new farm to market road improvement projects were put into the hopper in Floyd county this week when it was announced that the county officials and state highway department have selected for improvement 4.1 miles of road from a point three miles south of Floydada on Highway 207, west to the road intersection;

And also a road about 5.3 miles long from FM Highway 786 at Rushing Chapel south to U. S. Highway 70.

A note of the understanding was made in the minutes of the Commissioners court in which the State Highway department is indicated to undertake "construction in the most feasible and economical manner and assume the road for maintenance." At the same time the Commissioners court is pledged to cooperate in every way with the highway department, designating the routes specified and pledging to furnish right-of-way free of cost to the state.

It was not indicated at the court

house when the project would be activated, and effort to contact the highway department was not successful at the moment.

'House Warming' For Storage Plant at Dougherty Held Tuesday

The fine new plant at Dougherty of the Producers Cooperative elevator was given a cordial reception Tuesday when officers and directors joined in with Mr. and Mrs. C. A. Caffee, managers of the Dougherty plant, to welcome visitors for inspection tours and to serve them coffee, doughnuts and cold drinks.

Being celebrated with the welcome sign out was the modern elevator authorized by the stockholders last fall and contracted for early in this year. It has a capacity of 150,000 bushels and was erected at a cost of \$95,000. Johnson-Samson company, of Salina, Kansas, were contractors. The crew began foundation work on March 1 and the plant made ready in mid-May. Some last year's wheat had been delivered to the elevator Tuesday, when the party was held, but no new wheat was in prospect for this week. The original elevator plant there, accommodating 14,000 bushels, also will continue to be used as a utility handling facility as well as for storage.

More than 1,000 feet of new yard track was laid by the Quannah, Acme & Pacific Railway company to accommodate the new elevator and make better service for other industrial users in Dougherty early this year.

Good Wishes Are Broadcast
At 10:30 the formalities were held with A. H. Kreis, president, expressing a welcome to all and inviting radio listeners over Station KFLD to be present during part or all of the day. Other officers of the organization are P. J. Wilkes vice-president and Tom Porter secretary. Roe Jones is general manager. These with J. P. Moss and Henry Willis constitute the board of directors. There are about 765 members in the organization. Storage facilities of the cooperative, in addition to the new Dougherty plant at Floydada.

Mr. and Mrs. C. A. Caffee will manage the business at Dougherty.

Thrip Threaten Damage to Potential Greatest Cotton Crop in County History, Says Gibson

(Floyd county has a cotton acreage probably in excess of 140,000 acres that is up to the best stand, the cleanest of weeds and cultivating the most nearly ideal of any cotton crop in the history of the county. Furthermore it has an excellent season in the subsol and is beginning to send a tap root down into this moisture. Consequently the following story obtained from the county agent relative to a threat to the crop will be of general interest.)

Examination of growing cotton the last two days reveals that much of it is infested with thrip, states Bob Gibson, county agent. Thrip are evident by observing the new leaves that are forming. These leaves, when attacked by thrip, appear to be rough and deformed. You will also find small holes in the leaves, broken edges and spots. The new leaves appear to have been in a sand storm. When the leaves appear this way examination of the growing tips will reveal a very small straw colored insect in the folds of the new leaves forming.

Gibson said ninety percent of the cotton in Floyd County that is ten days old is slightly to heavily infested. Thrip can be controlled by applying 1/2 to 1 1/2 lbs. of toxophene or equal parts of a mixture containing 2 parts of toxophene and one part DDT per acre. Aldrin 1/4 to 1/2 lbs or dieldrin 1/10 to 1/5 lbs per acre will also control thrip. Cotton should be treated at least twice at 7-10 day intervals to stop the thrip until the plants are large enough to overcome their damage.

Thrip will not kill cotton, but will stunt it and cause later maturing. In 1950 the cotton crop in Floyd County was reduced twenty to forty percent because of thrip. Early last year the cotton was severely attacked by thrip and was stunted two or three weeks. The full effects were observed when our cotton failed to

reach full maturity and the yield was greatly reduced by the frost.

Some of the later cotton is affected by damping fungus. This fungus causes the young plant to die. Examination reveals a black spot on the stem just above the seed. Seed treatment will help eliminate this fungus. Nothing can be done now. The damage is not expected to be great. Only very young cotton is attacked.

There is a large number of large worms migrating from lakes and heavily weeded areas. These worms do not readily attack cotton. They much prefer ground pursley, tumble, and other weeds. Whenever they are attacking cotton treat the area with 15 to 20 pounds of 10 percent Chlordane dust or DDT. If using a spray the equivalent of chlordane or DDT should be used. These worms are the black and yellow worms with a horn on the last segment of their body—they are often 3 to 4 inches long.

While the steel industry has on its drive for scrap metals it is not untimely to suggest that you take advantage of the fact that buyers are accepting, in fact bidding for, metal in several forms which were not marketable formerly. We note tin in various forms, old motor car bodies, barbed wire and the like. This is the time to clean up your premises of all of these accumulations. You probably can pay the clean up bill with what you get for the metal, which dealers formerly shied from. Please note, however, that this is not to suggest you permit irresponsibles do your cleaning up for you for what they get out of the metal. Unfortunately all kinds of metal objects begin to look alike after you spend a few hours picking up scrap, especially if you are the type who has not had to spend good money for machinery. Being present or attending to the job yourself will save you the trouble of a visit to the junk yard to reclaim your property, or, perhaps, to the dealer in new equipment to replace some of the things that you did not intend to give up for awhile. Carload after carload of old car bodies, barbed wire, sheetmetal and the like have been leaving town the past several weeks in addition to what you have been used to seeing shipped as scrap or junk.

NEW TAXES. We urge you, do not spend this year on the basis of your past experience with the income tax man. You will pay this year, in addition to what you have been thinking of as burdensome, another 10 per cent, possibly 15 per cent, more than you spent with the income man a year ago. This is going to tax your pocket book more heavily than ever. If you spend ahead of the tax man you'll possibly find yourself some morning on an unexpected visit to your banker to raise ready cash on a credit for the money you spent, that, according to law, belongs to Uncle Sam. Sure enough, we mean it. The added tax burden will be such that it will not only tax your ability to pay while keeping your affairs in the shape of a going concern, it will also tax your honesty. No doubt about it, the country must be in a tremendous need for more money to carry on. The powers that be must, they do, realize that the added tax burden is going to be harmful to the morals of the country, which fact they chance to raise more money to do more things required by the emergencies of the cold war and to attempt to carry on the other activities of the government.

The announcement that came out of Lubbock last week-end saying that officials of Q.A.&P. will make an active bid to extend their lines westward to Lubbock is in line with the dreams of old Sam Lazarus who started out to extend his line southwestward to El Paso 40 years ago when he built from Quannah to Roaring Springs and later to Floydada. The Quannah (and the Frisco) people maintain that a line from St. Louis tying in with the great central industrial belt of the nation, to the Mexican border would be a "natural." Developments of the past quarter of a century have fully justified their claims that the line would have been serving an area of great commercial and industrial possibilities had the federal regulation of railway construction not have prevented the line's building. The Lubbock press is greatly elated over the prospect. The Chamber of Commerce in Lubbock, led by the able Mr. Davis, is beating the drums. Conferences have been going on for a year or two, following a long period during which the railway people made eyes at the Lubbockites in an effort to get this initial extension westward. The railway company has already the right-of-way through the boundaries of Floydada, and carrying out their plan does not necessarily involve any conferences or discussions locally.

"Communism is a revolution of, by, and for 'the proletariat.' And what is the proletariat? Many think it means all poor people everywhere. But it doesn't. Webster correctly defines proletariat as 'one of the wage earning class, especially a laborer for day wages not possessed of capital.' That is the way Marx conceived it, to begin with. That is the way Moscow is executing it today. And Stalinist Communism was planned for factory and wage-earners and was never made to fit farmers, it will never be accepted by farmers. My lifetime work as a farmer and my world-wide study of farm reaction to Communism convince me of the conclusion given in the title of this article—Farmers Will Stop Communism."

A new insecticide highly effective for insects but not only for insects but also for animals has been developed commercially. It is known under the trade name "Parathion" and has proved effective for certain agricultural pests.

Of its high toxicity it should be borne in mind that this is another poison about as dangerous, if improperly used, as is parathion. It should only be used under competent medical direction.

swallowing contaminated substances, or by absorption through the skin. The latter may be indirect absorption such as from contaminated clothing.

Safe use is dependent on the use of precautionary measures so as to prevent contact. The user should seriously study and observe these precautions. The user should also be alert for symptoms of poisoning so that a physician may be in attendance without delay should be needed.

As A Farm Woman Thinks

(Nellie Witt Spikes)
TO A MESQUITE TREE
 O' mesquite tree, gnarled and old,
 Widely flinging your curls of gold,
 Make where lights and shadows pass,
 Golden carpets on the grass.

Softly wave your pale-green laces,
 O'er the sunny grassy places
 Swing your fruit leaves so sweet,
 That the hungry cattle eat.

You are like no other tree,
 On the prairie wide and free,
 Dear to every Texan's heart,
 Of the Old west you are a part.

The above poem is very expressive and as we passed through the canyon the other day, the above lovely lines by an old friend came to my mind. The canyon hills looked like a well clipped lawn, with small trees set here and there as if by hand. Yes, it was a Master Hand that made the canyons.

The cottonwood leaves tried to stop us and tell secrets, perhaps of Indians, or Coronado's ragged, velvet, lace trimmed "gentlemen" army viewing the beauties of a new world in amazement and wonder after days and days of endless prairies and shimmering mirages of false water. Maybe they wanted to tell of the pioneer's creaking wagon pulled by ox teams, or of the very first Camp-meeting held just below where our car was smoothly running at the home of Arthur Duncan. Or did they whisper of the Baptist encampment that is making church history in our day? Or do they want to tell us of the young couples that pledge their love and loyalty under their sun-flecked shadows?

The purple flowers of the Sweet Sultan are opening their thistle-like blossoms, filling the canyon with sweetness. The yellow flowers are yellow sheets spread out to dry. Tiny balls of the wild currant are turning black, and the algerita berries are getting red. Oh, I love the canyons! Every crossing is a pleasure, combining the memories of the past with the joys of the present.

Death is always sad, the parting of loved ones, but the pioneers found it with no compensating surroundings to make it more bearable. For instance Mrs. Robert Day of Floydada tells this experience in her own family history:

"My grandparents were part of a wagon-train coming from Tennessee to Arkansas. My grandmother died. The wagon-train could not stop, so a few close friends stayed with grandfather and helped with the burying. Grandmother was put in a coffin made from the sideboards of the wagon. They placed a quilt in the rude box—perhaps it was one of her beautiful quilts she had made as a bride—and the pine box was covered with the dirt of the mountain where the sad, bereaved man and his two small children and friends left her, and hurried to short-cut to catch up with the slow-moving wagon train.

Grandfather died not too many

years long after reaching the end of the journey near Bentonville, Arkansas, and no one ever knew where grandmother was buried. But a story is told of a coffin made of wagon side-boards being unearthed when a highway was being put through the mountains. Was it my own grandfather, who knows?

To bury by the side of the road and go on, oh, stout hearts of pioneers, who can measure your love and your steadfastness of spirit?

"I was wearing a corsage of cloth roses and little Dale put his finger on a petal and wanted to know, Grandmover, is de flowers dead?"

We had such a nice visit in the Day home, which smelled of cedar of the lovely polished cedar articles of furniture she had brought back from their recent visit to Arkansas.

"We brought back some eighty pints of frozen Strawberries. Put them in a locker. Frozen berries, oh how the long roads have changed to short roads! And would we not have liked to have been there to help gather the immense crops of strawberries?"

We were so happy to have Mr. and Mrs. Carr Surginer as visitors Sunday. Pleasures of yesterday and pleasures of today, make a full happy life.

POWER-PACKED -and then some!

THERE are a lot of reasons you can expect a new GMC to keep hauling a lot longer than any other truck you can buy.

First is the fact of horsepower. Whether it's a gasoline-powered 1/2- to 2-tonner with horsepower unbeaten in its class, or one of the new heavy-duty Diesels—you can't beat a GMC for "go"!

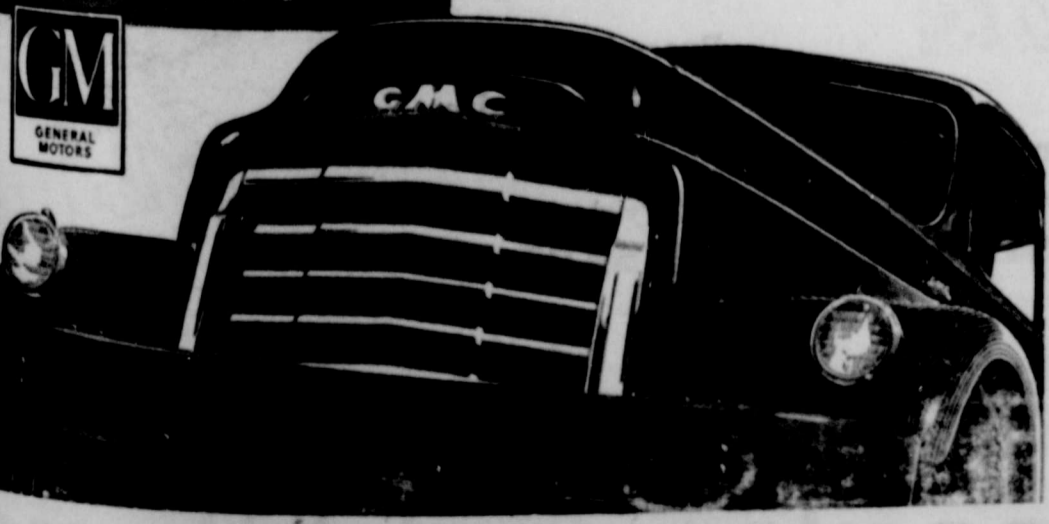

But the extra value you find in these great trucks doesn't end at the power plant.

There's the smooth GMC Synchro-Mesh Transmission linked to a sharp-shooting drive line, pouring every ounce of power back to the rugged rear axle. And the solid way horsepower becomes wheel-action—you know there's extra depth of truck performance engineered right down through a GMC's broad-shouldered frame!

And standing guard over these long-time trucks are husky brakes with more area than most—the surest, easiest steering ever devised to direct a pay load home—all controlled from a spacious "Six-Footer" Cab that's Weathersealed for a lifetime.

GMC's come in the widest range of engine-body-chassis combinations to fit any trucking need. The prices? No better buy anywhere! Come see for yourself.

Mrs. Goins Hostess Center News For Class Meeting

CENTER, June 13—Weather is still cool, some misty mornings. Heavy rains and some hail have fallen in some neighboring counties, but we haven't had any lately. We would sure like a steady inch or so soon. Only it is near wheat harvest. Some are already bringing in the wheat.

Our Vacation Bible school closed Friday night. Because of the nature of the program which included a three-act play from the Book of Ruth and needed the stage, the closing exercises were held in the school house. Since we and Fairview church had combined forces we were fortunate in having over 40 enrolled in school with an average of 39 in attendance. On closing night it seemed like the good-old-days when the auditorium was practically filled the days when we had school at Center.

We find we have a new group of high school youngsters who show as much talent and ability as those of the past. Jackie Wright of LeFors spent last week visiting the J. D. Welborn family and attended V. B. S. here. Mr. and Mrs. Melvin Ross and son, Ronnie, of Sterley, visited Sunday with Melvin's parents and sister, Mr. and Mrs. R. C. Ross and Norma June, and with the Waggoner family. Bro. and Mrs. Hodges and Jerry were Sunday dinner guests of the J. R. Robertson family.

Mr. and Mrs. G. L. Bryant and son, recently of Wellman, have moved into the brick home on the Guiffee place. Mrs. Bryant attended our evening church services. We are glad to have these new neighbors. The Welborn family and the R. C. Hodges visited Sunday afternoon in the Leo Frizzell home. Mr. and Mrs. Frank Dunn visited Mr. and Mrs. Welborn Miller Sunday afternoon. Mr. and Mrs. H. B. Mankins were Sunday dinner guests in the R. C. Ross home.

Mrs. Betty Ellis of Kelterville, California and her sister, Mrs. Harry Stanley, visited Monday in the J. E. Green home. Mr. and Mrs. Victor Green of Plainview were Sunday dinner guests of his parents, the J. E. Greens. Mr. and Mrs. Floyd Montgomery of Bovina were in the Frank Dunn home Monday. Floyd went on to the Youth camp to help his fellow members erect a cabin. Mrs. Montgomery visited the Dunn family and attended the W.M.U. there in the afternoon. Monday afternoon our men were busy putting screens on the church. We hope thereby to keep some mosquitoes out. The Greens attended workers conference at Lone Star Tuesday. Come to church Sunday.

Here's 180 Horsepower... on regular grade gas—Now!

NEW YORKER NEWPORT

It's always interesting to hear about future-looking experiments with new super engines to run on new super-octane fuels...someday. But it's even more interesting to hear today's real life, on-the-highway talk about Chrysler's new super-performing FirePower engine. FirePower takes any regular grade gas you care to buy . . . and adds its own new mechanical octanes to the power-giving octanes of the gasoline itself. The result is 180 horsepower performance such as no other passenger car built in the U.S. today can equal.

If you haven't driven Chrysler FirePower yet, your Chrysler dealer invites you to do so now. It's the most revolutionary engine in 27 years. It offers highway satisfaction and safety such as you've never known. And it's a sounder engine other ways than any other on the road. Its new design keeps it almost completely carbon-free. It is smooth and quiet . . . but also rugged and strong and free from need for great attention and repair.

Now remember that this same new Chrysler offers you the new Hydraguide power steering* . . . plus the amazing new rough-road stability of Oriflow shock absorbers . . . plus Water-Proof Ignition, and Vacuum-Ease Chrysler Cyclebonded super-brakes . . . then come see what we mean when we say the car of your tomorrow is right here for you to drive . . . today, and for years to come!

*Hydraguide regular on Crown Imperials, optional at extra cost on other Imperial and New Yorker models.

son Dorsey ed as JC the Year

Vernon Dorsey . . . Assistant firemarshal of Lubbock, hailed as Jaycee of the year in that city.

Dorsey, son of W. M. Dorsey, Floydada, has been cited as Jaycee of the year by the Lubbock Chamber of Commerce. The Jaycee Club, club publicist, is featured for his record achievement and service to the community, and he is declared to deserve the award of distinction for service, which was bestowed by the state president, L. D. Smith, at the May installation of the club paper.

Says the club paper: "More than a Jaycee, less than a Jaycee, and by the time his membership month old he had established a record as a Fair Booster, a characteristic sincerity, and he out-sold all other Jaycees in terms of derby hats and medals. With scarcely a pause he waded into the Crusade for the Campaign. At about the time when asked to start an Jaycee Publication, he refused to know anything about newspaper business, but I'll do it can wherever you thing I can be the Jaycee best." Thus he is the winner of the outstanding Jaycee in Texas—The Jaycee. Not only was the Jaycee outstanding publication—it is a financial success. Commencing with its first issue, it accrued a net of \$85 to our treasury.

On the Membership Committee helped with the membership. He played an important part over the chief profit-making project—Teelandia, and it's no wonder why shows all the stars. At any rate he is a Jaycee.

is married, and has two children, a son and a daughter. His kids get their charm from their father, Lou, who is an active member of the Jaycee of The Christian gentleman. He is active in church work and is a member of the Methodist Club and the Friendship Sunday School class. He is a member of the Methodist Church.

They Go Fishing On the Stiles Land in Hamilton County

Mr. and Mrs. Cleo Stephens who returned home last week from a fishing trip reported Mr. and Mrs. W. T. Stiles as doing well in the stockfarming business there on the Stiles land which was owned by Mr. Stiles' father before him. The Stephens', after completing their re-do of the interior of Curley's cafe, took a few days off for recreation. They lived in the Stiles old homestead house while fishing guests of the Stiles'.

Not too much luck, said Mr. Stephens. Seiners, dynamiters and fish poisoners last year made a raid on the fish population on that portion of the Cow House and it will take time for nature to re-stock the stream. The Cow House is the crooked stream in the United States. It has been factiously said. It empties into some stream or other east of the Stiles' several miles, but nobody knows what stream or where except the man who lives in the last bend of the creek, claims Stephens.

He reports the former Floyd county couple, Mr. and Mrs. Stiles, as doing well. Mr. Stiles is running 100 head of good stocker Herefords on his land.

It came up a cloud just after we got trot lines set and we had to leave them and get up on higher ground as the river had a head rise and took our trot lines out with the trees as they came down stream.

LOOK HERE

for the **SERIAL NUMBER**

☆ 8N-99432 ☆

Plain for all to see, easy to find and read, is the serial number of the Ford Tractor. It's a key identification to look for—a mighty important "birthmark" to keep track of, through the Ford Tractor's long life. Tractors produced by present day manufacturers leave the plants of their origin with serial numbers that are intended to identify them for life.

A serial number does these important things for its owner:

1. Helps establish the tractor's value, whether new or used.
2. As a general practice, it is a "vital statistic" which banks and finance companies want, before lending money on the tractor. Insurance companies want it before issuing a policy.
3. The tractor's serial number is a guide in getting replacement parts quickly, and without error.
4. The serial number is the best means of tracing and identifying a stolen tractor.
5. A serial number is a big help in defining the warranty period—valuable alike to owner and manufacturer.

Through your entire ownership of a tractor, its serial number backs your investment; it is your protection and guarantee. Make sure your new tractor wears its pedigree—its serial number. We hope it will be a Ford Tractor.

Geo. Kneirim Pays Vacation Visit Home

George Kneirim, of Sacaton, Arizona, who is carrying on agricultural research and development work on the Pima Indian reservation, has been an interesting visitor in the area for several days.

In Floydada briefly this week in company with E. B. Chesnut, Mr. Kneirim told of numerous interesting experiments being carried on with both long and short staple cotton in the desert of that southern Arizona area.

Nearly 400 varieties or crosses of cotton are being studied annually and experimented with. Not only is cotton raising but cotton ginning is being studied. Kneirim told of one gin with a capacity of five bolls in a midget stand, used for handling the tedious small plots that are planted experimentally.

Kneirim was accompanied on the trip to Texas by his wife and two children. They were guests of his sister, Mrs. Frank Pohl at Matador and of the Chesnuts and others here. His parents, Mr. and Mrs. C. L. Kneirim, former Floyd county residents, are now located at Jal, New Mexico, he said.

of the irrigated wheat was plowed up early in the year when insects made stands ragged, he said. This land was put into condition for a row crop.

Motley, Dickens, Crosby, Brisco and Hale counties, surrounding neighbors to Floyd, had their first loads of wheat at about the same time. The Motley and Dickens county grain was delivered to the only elevator in Motley county at Roaring Springs. Tom Edwards of Whiteflat cut the first Motley county wheat, E. M. Lime and Chert at 10,029 Feet in Lackey Test

Mighty little hole has been made at the Houston Oil test on the J. S. Lackey land two and a half miles northwest of Cedar this week. A fishing job in hard lime and chert at 10,014 feet took three days of the drillers time when the bit hung in a hard formation sometime Friday night.

Yesterday the drill was back in the hole and boring away at 10,029 feet, more than 200 feet below the contract depth of 9,800 feet. The bit is still in hard lime and chert, says the report from the well.

Two possibilities now—one the Ellenberger formation, the other granite.

On the No. 1 Hickman, Section 2, Block 13, northeast Crosby county, test by Tidewater Oil company, a drill stem test was started Tuesday at 8,100 feet. The formation found was thought to be the Mississippian. Results were not known in Floydada last night. The Pennsylvanian formation yielded salt water in a test reported made at 6,482-500 feet.

People Interested in Frozen Foods

Sponsors of the frozen food demonstration at the REA kitchen on West California street found that many people are interested in improving their techniques in the handling of frozen foods.

Audience of women from all portions of the area served by REA watched the processing of vegetables for freezing as well as the preparation of poultry by Mrs. Harry Morckel, home economist, asked questions and made suggestions in the long afternoon session. The demonstration was planned for and arranged by Mrs. Susie Johnson, of Amarillo, district supervisor for Farmers Home administration.

The crowd at times taxed the capacity of the kitchen and the adjacent rooms, the large list of registrants proving gratifying to the sponsors, said Melvin Henry, acting manager of the electric cooperative.

OPS Deadlines

All businesses offering retail services to the public—from auto repairs to either repairs—must file a list of ceiling prices before June 15, the Lubbock district office of Price Stabilization reminded today. The address is 1202 Texas Avenue, Lubbock, Texas.

On the same date, lists of ceiling prices must be posted where customers can plainly see them. OPS added.

These requirements are called for by Ceiling Price Regulation No. 34. It applies to all service trades—barbers, dry cleaners, laundries, washateria, shoe repair shops, beauty shops, service stations, parking lots, etc.

Operators of such businesses need only to write down a list of the highest prices charged for each service between December 1950 and January 25, 1951. They must mail one copy to the Lubbock district OPS office at 1202 Texas Avenue, Lubbock, Texas, and display another copy in the place of business.

Any questions regarding this regulation should be addressed to the district OPS.

Meanwhile next Monday, June 18, ceiling prices of beef must be posted for all consumers to see in retail meat shops, the district office at Lubbock reminds all butchers and consumers.

At the same time cuts must be displayed with the various grades in separate trays and with each tray price tagged. This is the first of three postings.

On August 1, retailers, as well as wholesalers and slaughterers, will put into effect lower beef prices. On October 1 still lower beef prices will become effective. Every consumer has the right to see these prices and the right of complaint on any violation.

Price reports required from manufacturers must be sent to the Office of Price Stabilization, Washington, 25, D. C., not to District Offices. OPS has announced.

These reports, made on OPS Public Form No. 8, are now required by July 2, from manufacturers of consumer goods and machinery under ceiling Price Regulations 22 and 30, OPS pointed out.

Registered mailing with return receipt requested is recommended for this form.

OPS pointed out that it is to the advantage of manufacturers to file Form 8 quickly, since any adjustments due to cost changes cannot be made until 15 days after the date of the OPS receipt posted June 18.
