Careless Worm New Threat Over Large Cotton Area

Continued heat, which has largely discounted the late August rains, together with careless worms, have many people engaged in the farming industry in Floyd county in a frenzied tizzy this week.

The most expensive cotton crop ever raised in the county, with more than \$3 million dollars expense money already in it, is threatened with destruction by the careless worm.

Careless worms prefer careless weeds as a diet but when they finish with these they attack other crops. Not only have reports come in of damaged cotton crop but also

of volunteer wheat where the worms had erased the dark green and left a dark brown in their wake.

Damage also is being done by extreme dehydration resulting from the unusual early fall heat. Although the crops have ample early fall moisture...

Several new laws governing the people of the State of Texas went into effect this week or will have tomorrow, when 90 days have elapsed after the close of the legislative session. Laws which will be noted by more of the people than any other are the laws which govern automobiles, their operation and maintenance and owner liability. One of these laws, similar to a light testing law of several years ago, probably still on the books but outmoded, is the one which requires a test of motor vehicles for safety before they go on the road, or at least before a license for their operation on the highways can be issued by the tax assessor-collector. Garages and mechanics will be licensed to perform this service and a fee will be charged, following the same old pattern. We are not informed how much this fee will be.

The amended law concerning automobile owners' and drivers' public liability and property damage does not go into effect until January 1. However, it is the one about which there is more beating of the bushes than any other. The state fire insurance commissioner and the state safety head have been jerking up on the reins figuratively curbing the insurance agents in such towns as Floydada. They claim these agents are jumping the gun, some making mis-statements. The fact is the agents are just about right about the matter. It is foolhardy not to have insurance protection against public liability and property damage whether or not any new law is passed. The new law puts the bee on any man who has an accident. Listen to your insurance agent. Honesty and fairness in his category will average as high as that of the people in the state safety organizations or in the state insurance commission. The law does not say buy insurance against public liability and property damage in so many words. But that is definitely what it amounts to. The law will increase the duties of the state safety organization many fold, make a heavy increase in the personnel that works in this department, which is in line with other increased costs of being governed.

Science without morals: "With the monstrous weapons man already has, humanity is in danger of being trapped in this world by its moral adolescents. Our knowledge of science has outstripped our capacity to control it. We have too many men of science, too few men of God. We have grasped the

mystery of the atom and rejected the Sermon on the Mount. Man is stumbling blindly through a spiritual darkness while toying with the precarious secrets of life and death. The world has achieved brilliance without wisdom, power without conscience. Ours is a world of nuclear giants and ethical infants." —General Omar Bradley.

It is said in the trade that the committee on newsprint supply in the government at Washington is now channeling some of the already short supply of sheet news (which country newspapers use almost exclusively) to Europe for some use over there. You can imagine the impact of this news on an industry that is battling for help to carry on and battling for paper to print in sufficient volume to meet ever-increasing costs. For more years than we can remember America has imported some of the pulp from which paper is made from Europe when war conditions would permit, meaning submarine warfare in particular. That is to fill normal requirements. Eastern mills, in particular are being told where in Europe to send their print paper made up into sheets. So far as we know the suppliers of newsprint in rolls are not being bothered in that particular. We are beginning to wonder if there is anybody on our side.

Perhaps the administration is correct in the attitude it takes toward publicizing the cost of living and forecasting the trend ever upward. The administration, instead of taking the kind of a law the congress handed the executive department and doing the best they can with it, has started a griping campaign, blasting the congress for inadequacy. We like the way congress did it better than we like the way the president and the bureaucrats wanted it done. The executive department has too much power already and is getting more all the time. The president can do a lot of things simply by edict now and defy congress in the doing. That's the way the people's rule has gone aforesomes, when the servant became the master.

Matadors Take on Spur Team Friday

MATADOR—Despite the heat Matador Matadors have started the grind to put a team in condition to face the powerful Spurs on Burleson Field Friday evening, September 7 for the season's opener.

The Matadors started training Monday in effort to get a machine in shape to meet the Class AA Bulldogs spiked by the 190-pound quarterback and passing wizard Charles Greenland who boosted the Spur team to a district title last year.

Coach Hopkins says he hopes to give the Bulldogs a play for their money despite the lack of experience at the command of his freshmen and sophomores.

Charles Dudley has resigned his position at the First National bank and will be with the West Texas Gas Company, replacing Dillon Patterson, who was transferred to Lockney by the gas company.

Greenland was re-named by Eric the Red to induce immigration to the island.

TRAIL BLAZER - with plenty on the ball

How long since you lifted the hood of a car, and took a good look at what's beneath? We like to have folks do that with a Buick. You'll find that broad bonnet isn't put there for show. It's packed with horsepower—high, wide and handsome—more horsepower than normal drivers will ever use in full. And—if you're up to date on modern features—you'll find that this bonnet is packed with these too.

Do you know, for example, that every new engine introduced or previewed in recent years is built on the valve-in-head principle? Score one for Buick. No Buick engine has ever been built in any other way.

Do you know what it takes to make full use of high compression? A valve-in-head engine!

Score two: Buick has been stepping up compression ratios for years. But Buick has blazed one trail which other engines still haven't followed—don't ask us why.

Every Buick has a Fireball Engine which, as we've said before, is like having a string of comets by the tail. Fact is, in every flame-packed cylinder there is a comet—rolled into a swirling ball by a special turbo-top piston—touched off by a flashing spark every 5 inches you travel in a Buick.

That's why we're proud to show folks that Buicks have a Fireball Engine—and prouder still to have them take one of these thrilling performers out on the road.

Want to try it? Come in and see us soon.

Equipment, accessories, tires and models are subject to change without notice.

WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM

CLINE & RAINER

The secret of Fireball Power is in the use of dome-and-dip design of the piston shown above.

Here's the piston inside the cylinder. As it moves down, the fuel charge rushes in—sets up a swirl when it hits the piston top.

The piston moves up—compresses the swirling fuel into the comet shape shown here. "Compression ratios" are simply a measure of how much the fuel is compressed.

The ball of fuel is compressed around the spark plug—lets loose its pent-up charge when the spark is fired—delivering a higher percentage of power from each charge of fuel.

"I got the story on 50,000 Miles-No Wear and changed to New Conoco Super Motor Oil!"

says Paul Dobson, Kalamazoo Dealer Alliance, Nebraska

"Every car that leaves my showroom is lubricated with Conoco Super Motor Oil," reports Mr. Dobson. "A man can get top performance with Conoco Super."

"50,000 Miles-No Wear!" Proved Here:

After a punishing 50,000-mile road test, with proper drains and regular care, engines lubricated with new Conoco Super Motor Oil showed no wear of any consequence; in fact, an average of less than one one-thousandth inch on cylinders and crankshafts. AND gasoline mileage for the last 5,000 miles was actually 99.77% as good as for the first 5,000!

ASS'T FIRE CHIEF: "Our engines sit idle for many hours and then are driven at high speed," says Alex Barnes, Ass't Chief, Volunteer Fire Department, Santa Fe, N. M. "That's why we use Conoco Super. Any oil that takes that kind of punishment must be 'super'."

TRAVELING SALESMAN: "I've put 26,000 miles on my DeSoto," says Jim McCabe, Traveling Salesman, Idaho Falls, Idaho. "I've used Conoco Super since the car was new, and I still enjoy new-car performance, and no oil consumption between drains."

Gas Co. Makes Parking Space of Former Curb Area

This week the West Texas Gas company finished a job of making more parking space for the cash customers in front of their office building out of space that formerly was wasted, and Roy Leslie, manager, thinks it is going to be quite a convenience to the customers.

Other brushing up and re-doing of fronts around town include two new awnings with lifted and straightened alignments at Hardware Department store and Arwine drug. New coats of distinctive paint also have been applied at these fronts.

One of the major store front improvements under way and nearing completion this week is at White Auto store, where two openings have been removed to make one new and larger entrance, and on either side distinctive show windows installed.

The Admiral refrigerator went to Mrs. L. F. Adams, of Sand Hill Friday evening of last week her name being drawn from a box containing an estimated 15,000 names at Piggly-Wiggly store.

As the picture shows the store was full of people when the refrigerator was being drawn from the box by young Dale Newberry, son of Mr. and Mrs. Orville Newberry, with Manager Bob Finley officiating.

Upper right, insert, is Mrs. Adams' winning smile, as she received the award. She was not present at the drawing but was notified by telephone of her good fortune by Mrs. Finley. The Adams have lived at Sand Hill for the past four years. They are an Oklahoma couple. They have three children at home.

News of Harmony

HARMONY, Sept. 4—Most everyone is home after their summer vacation and school days have arrived again and our hot summer weather is continuing. The old weather man who has been sending rain every year at the beginning of school will be a little late this year if it arrives at all.

Am sorry the Harmony news did not get to print last week, but my family and I were vacationing in Colorado and New Mexico and since it was the first real vacation the family had ever had I was too excited to think of writing the news a couple of days early.

It seems that more people read the local community news than we realize as I have had several people ask what happened to our news last week. So folks please report your parties and visitors or your visits to other places so I can get it in the news by Tuesday morning before the mail runs. Your friends and neighbors are interested in reading about what is happening in the home community.

Bill Tucker is convalescing nicely in Peoples Hospital from an appendix operation which was performed last Thursday. He expected home in a day or two. His mother is visiting with him this week.

Grandfather Worsham is still in Peoples Hospital and his condition is not much changed.

Donald Finkner is in Lubbock Memorial hospital. He was admitted last Friday. He has been very ill and Mrs. Donald Finkner is staying with him, also Mr. and Mrs. Bill Finkner part of the time. Mr. and Mrs. C. P. Fulkerson, Mr. and Mrs. Sherwood Ramsey, Mr. and Mrs. M. D. Ramsey visited a short while Monday afternoon with Donald.

We hope these sick folks will soon be able to be back home.

Mrs. E. L. Turner left last Friday for her home in Shreveport, Louisiana. Her husband, Maj. E. L. Turner, who has been on duty in England, is expected back in the states some time this week if plans work out as scheduled.

Here's DIESEL ECONOMY with CUSHIONED POWER

THE NEW MASSEY-HARRIS "44" DIESEL

A different kind of Diesel farm power, the Massey-Harris 4-cylinder "44" Diesel brings new efficiency . . . new economy . . . new pulling power . . . new money-saving field performance to the Diesel farmer. It's the result of an amazingly simple engine design. A special firing chamber—called a Dyna-Cell—creates a cyclonic rotary turbulence of the burning fuel on every power stroke. Burning fuel swirls the full-length of the stroke exerting equal pressure on the piston during its travel. Fuel burns slower, smoother . . . delivers a pushing force. It's cushioned power. Dependable power. Greater lugging power because there's full power on every stroke of every piston.

See us soon for complete information . . . be sure to ask about Cushioned Power and Dyna-Cell design.

Dates Are Set For All-County Blood Typing

Blood typing of all individuals is one of the goals of the civilian defense committee of Floyd county, according to an announcement by Mrs. John Hoffman, civil defense chairman. Arrangements have been made for this very important service through the Lockney hospital at Lockney, and the People's hospital in Floydada. Dates have been set for the evening of September 17-18 and the hours are from 7:30 to 8:30 each evening.

It is hoped that every person in the county will avail themselves of this opportunity for it might be of great value in saving a life in case of emergency. Typing will be done for 50 cents a person and it will include the Rh factor as well as typing.

Other civil defense activities planned for the near future are home nursing and first aid. Mrs. Roy Wilkes, who is defense chairman at Pleasant Valley, has just completed a home nursing course at Texas Technological college and will teach this in the near future.

Robison Urges 100 Pct. x-Ray Examinations

Enos Jones, county chairman of the Floyd County X-Ray chest campaign, and Wayne Robison, Floydada chairman, state everything is working fine toward the campaign to be in Floydada September 11 and 12, at the Chamber of Commerce office. Committees are being named. Similar preparations for the arrival of the health unit in Lockney for the two days—Friday and Saturday of this week-end—are being made at Lockney. The unit will set up for business at Lockney Auto company there, it was announced.

Wayne Robison, City Chairman announces the following committees to serve on the X-Ray chest survey, to be held Tuesday and Wednesday of next week:

Telephone Committee, Mrs. A. E. Guthrie, chairman; Hostesses committee; Mrs. Ott Glassmoyer chairman, and clerical committee, Mrs. Rex Brown, chairman. Assisting in arranging the equipment, Al Fuchs, chairman, Louis Warren, and Kenneth Tate.

Location, Chamber of Commerce office; Time, 9 a.m. until 5:30 p.m. Tuesday and Wednesday.

Mr. Robison will have all the committees here at work and everyone over 15 years is asked to stop at the Chamber of Commerce on either Tuesday or Wednesday for three minutes and take the test.

An x-ray should be made every six months or at least once a year to be sure one's chest is not affected by tuberculosis or any other chest trouble it was said.

No Respector of Persons

In a statement urging all-out support and participation in the chest examinations Monday and Tuesday here, local chairman Wayne Robison said:

"Tuberculosis is no respector of ages, creed nor color. The discovery of many cases of tuberculosis and other diseases in Floyd county last year has underscored the necessity for every one not just a few—from fifteen years up to avail themselves of this free confidential service.

Last year these results were found: "A very small number of people had a free x-ray made, only 2,023 x-rays were made in Floyd county. There should have been three times that many made. Of the total films made there were 27 films suggestive of T.B., and 16 films showing evidence of other disease. That's some thing to think about. We don't want to contact T. B.—we certainly want

our children free of the disease. And above all we want to know if we have T. B. or not. If you were to go to your family doctor, or to a clinic to have this x-ray made it would cost you about \$15.00. At that it's worth it to know if we are free of T. B. or not.

"But we certainly can't find out if we have T. B. or not without an examination. That examination comes through an x-ray. A lot of folks can't afford the \$15.00 or so to find out about this. But you don't have to pay for this service. The tax payers of Floyd county are paying for it. Certainly we can't take just three minutes to find out for sure in those three minutes, we might learn a lot. Ask your doctor, he'll tell you too. Have an x-ray made at the Chamber of Commerce on the 11 or 12 of September—Let's make it 100 percent—Tell your friends about it and have it done. We need to know—then we will be sure."
