PLASTICAL TESTING LABORATORIES INC. NEW YORK, N. Y.

A Study of America's Freedom of Religion

IN THE early part of the 18th Century a small group of God-fearing people from western Germany, Switzerland, and Alsace Lorraine, representing many of the finest artisans and craftsmen of the Old World, banded together to follow their own form of worship. In 1842 they sought the freedom of worship and the freedom of opportunity they so devoutly desired, in a new land—America. They settled on a tract of nearly 8,000 acres located near Buffalo, New York. After 12 years at this site, the pressing need for additional land led them to the newly admitted state of Iowa.

They established seven villages in a beautiful section of farm and woodland, 25,000 acres in area, southwest of Cedar Rapids, Iowa. The villages formed what is now known as the Amana Colonies. The people were self-sufficient, they established their own woolen mills, wagon and implement factories, furniture factory, meat industries. As the needs changed, so did the industries. The one priceless resource was that each member possessed some particular skill, some devotion to a special trade handed down from father to son in the Old World tradition. The group lived a communal life until 1932, when the members formed a joint stock corporation.

Amana's industries—furniture, woolen textiles, baked goods, hickory-smoked ham and bacon, were originally intended for the supply of home needs but the excellence of their quality attracted many visitors who created an ever-widening demand for Amana products.

Amana wood and metal workers concentrated their skills, and pioneered in the construction of frozen food locker plants all over America. Again the demand of the outside world was heard, and Amana turned to the manufacture of a complete line of food freezers.

In all of America there is no other community quite like the Amana Colonies. For here are blended the old ways with the new... the time honored, fine craftsmanship and individual pride in workmanship, and the efficiency of 20th century industry. The plant where Amana food freezers are made is modern in machinery and methods. But located in Amana, employing Amana people, the old spirit of fine craftsmanship persists. Every Amana freezer reflects this heritage of technical skill, quality of workmanship, and highest quality standards.

SOCIETY

Vows Unite Ruth Standefer, Bill Johnson March 16

On March 16 before an improvised archway of fern, Miss Ruth Standefer, daughter of Mr. and Mrs. W. D. Standefer of Plainview and Bill Johnson, son of Mr. and Mrs. W. H. Johnson of Plainview were united in marriage before friends and members of the immediate families, in the W. H. Johnson home. Dr. A. Hope Owen officiated at the candle-light double ring ceremony.

Tall white baskets of white mums and white stock and candelabra added to the decor of the home.

The wedding music was given by Miss Jeanie Green preceding and following the ceremony. She also accompanied Miss Muriel O. Imoti, as she sang, "Oh Promise Me" and "Because."

For her wedding the bride chose a street length dress of white sylvia cloth fashioned with key hole neck-

line and cut work medallions over the shoulders. Her shoulder length veil of illusion was caught at the top with a halo shaped crown of white stock. She carried a white bible topped with a single orchid.

For something old, the bride wore a diamond brooch, something new was her wedding attire and something borrowed was a strand of pearls from her sister-in-law, and she wore the traditional blue garter.

Mrs. Frank Standefer was the matron of honor and Frank Standefer served as best man. Mrs. Dick Standefer and Mrs. Earlie Johnson lighted the candles.

A reception following the ceremony in the Johnson home, with Earlie Johnson of Edmonson greeting the guests and presenting them to the bridal couple and the parents. Mrs. Nelson Standefer of Andrews presided at the guest book.

The serving table was covered with a white cut work cloth, having for centerpiece a fan shaped arrangement of white carnations with orchid stock and orchid ribbon. Silver appointments completed the table decor. The three-tier wed-

d cake was decorated with white and orchid flowers.

For her daughter's wedding Mrs. Standefer wore a blue lace gown with a corsage of pink carnations. Mrs. Johnson wore a navy cape with red carnation corsage. After a trip to South Texas the couple are at home at 1209 Utica, Plainview. The bridegroom is engaged in farming.

"turns out she was right after all"

Jane kept harping about not having hot water enough for her new automatic washing machine. I said nonsense—we have a good water heater! But to keep peace I called our plumber. "Only one automatic water heater heats fast enough to run these modern appliances," he said, "and it's Gas. It's 3 times faster than any other all-automatic fuel." He said also a Gas heater would be cheaper to buy, install and run. Must say I've got hotter water for shaving, too! Ask your plumber—he'll tell you there's nothing like Gas for automatic water heating.

This is a Coleman automatic Gas water heater... one of several fine brands on the market today. Your merchant plumber or Gas appliance dealer will gladly advise you about the right size for your family.

And there's nothing like Gas for automatic cooking... refrigeration... house-heating... air-conditioning... clothes-drying... incineration.

Allen & Field To Benkleman, Nebraska Town

Ted Allen and Adron Field are hitting out for themselves after several years with Oden Chevrolet company in Floydada.

This week they are taking over a Ford agency at Benkleman, south-west Nebraska town in the Republican valley. Their new location is four miles from the Kansas line and 35 miles from the Colorado line.

In addition to the Ford line in the little city they will have Oliver farm equipment, M-M farm equipment, Norge appliances and RCA Victor radios.

The firm they are buying is the A. G. Kirschmer company.

Allen has been with the Oden agency for years, in charge of the service department. Field has been in the sales department.

"We know we're going to like our new home, but we know we already like Floydada and it is sort of a tug to pull up and leave such good people," said Allen. "In my own family we've had so much thoughtful attention during a lot of illness we know just how good people here can be to you." "I would like to add, too, that Conner Oden has been a mighty good man to work with and for. Apparently, we have a chance that comes once in a life-time and we have to take it. Benkleman is a good trading point. It has good folks, too, of course."

The families of the two partners will join them in Nebraska in the course of several weeks.

HALF-MINUTE INTERVIEWS

Barkley Cheanutt: "I saw 50 or 75 plovers — more than I ever saw before in my life — in Joe Smith's wheat the other day. I always thought they were a sure sign of rain."

Kinder Farris: "I'm sure is right about the red lions in the wheat. But I don't think there's anything wrong with the dry land crop that a two-inch rain wouldn't cure."

The purpose of the school is to acquaint Coleman dealers with the newest developments in the field of home heating.

Check Enumeration Scholastic Census

Chas. B. Dickerman, who has completed the census of scholastics for Floydada Independent School district, this week urged a re-check by parents and guardians to see if he had enumerated all the eligibles in the district.

"It was a big job and I think we have missed some children," he said. He urges those who think it possible or probable he missed some names to call it to the attention of Principal Estle Baker at the high school, Telephone 34, or Principal A. D. Fultz at the ward school, Telephone 22. Children which should be enumerated in the district are those six years of age before September 1 and under 18 years of age on the same date.

Apparently the enrollment this year will show a substantial increase over last, Mr. Dickerman says.

'No More Tree Pulling,' Says City

The city has been finding it an expensive practice to use the street maintainer for tree pulling, said Mayor J. A. Patterson this week, so expensive in fact that it can't be done any more in fairness to the taxpayers.

Repair bills is the answer. The street maintainer is a good machine for what it is made for, but it isn't built heavy in the right places for tree removal.

Norman,
Officer Wed
Lynchburg, Va.

MRS. F. M. KINNIER

After a short wedding trip the couple are now at home at Calhoun Towers in Greenville, South Carolina.

The bride attended Floydada schools and the Colorado College for Women at Denver. The bridegroom received his education in Lynchburg school, Bluefield college and at Virginia Polytechnic Institute.

For her son's wedding, Mrs. Pollard wore a grey satin gown with green orchid corsage and the mother of the bride, Mrs. Norman, wore bronze satin with black accessories and wore a green orchid corsage.

The parents of the bride, who flew in for the wedding, accompanied by Miss Ann Deakin of Floydada, gave a reception at the air base officers club following the ceremony, where the wedding note prevailed in the decorations and refreshments. The reception table, covered in a white nylon cloth and gold was centered by a large three-tiered wedding cake topped with a miniature bride and groom music box that played the wedding marches as the cake was cut by the bride and groom. Large containers of white and yellow glads and snapdragons and lighted candles were at either end of the table. Mrs. M. Norville Obenchain of Roanoke, Virginia, aunt of the bridegroom assisted in the serving of the cake.

Motoring to Greenville for the ceremony were Mrs. Pollard, her daughter, the maid of honor, the best man and sister, Mrs. Obenchain of Roanoke, and niece, Mrs. Frank Mobley of Danville, Virginia.

Wedding Date Set

Mr. and Mrs. Arthur V. Womack announce the engagement and approaching marriage of their daughter, Joyce, to William Dan (Bud) Cotham of Lubbock, son of Mr. and Mrs. Dan Cotham of Littlefield.

The wedding date has been set for Saturday, May 3, 1952. D. W. Burke, K. Terrell and R. T. Jones, of Floydada, accompanied by Glenn Terrell, of Plainview, left this week for South Dakota, where they will start wheat land plowing as soon as the weather opens.

Really "good" cooks are, of course, born that way. But those whom the world classes as "fair," usually, have had to learn it step by painful step.

The cookbooks give little real aid to these struggling souls. Like Thomas Jefferson on democracy, the editors of cookbooks assume you've got a good education on the subject before you begin reading. So, for example, a roll recipe will read: "Scald the milk." "Add crumbled yeastcake dissolved in lukewarm water." But it rarely bothers to suggest that "scald" really means "scald, then cool." This results in a couple of trips to the alley with a mass of paste dough before someone thinks to tell you whatsa matter.

Then there's the little item of adding vanilla. We once made three beautiful batches of boiled custard, "right by the book," only to have its creamy smoothness turn into curdled failure. This one baffled us for nearly six weeks before an astute "natural born" figured out we were adding the vanilla while the custard was still hot. — So obvious that the recipe just ignores it!

The real cooks, incidentally, are often less help to the novice than the cookbooks. They'll rattle off a recipe on the way home from church, something like this: "Then add flour." "How much?" you ask timidly. "Oh, you know, just enough to give it the right consistency." or if you inquire how long to cook something: "Well, you can sorta tell when it begins to get firm." Ten minutes? Four hours? Find out for yourself!

If you're one of the unlucky women who've had to follow this tortuous path to passable cookery, you'll know when you've arrived. The first time you forget yourself enough to tell an anxious beginner, "Don't cook it too long!" or "You can sorta tell when it's done," then you're ready for your diploma.

Bostick-Smallwood Rites at Matador

MATADOR — In a single ring ceremony preformed Friday, March 21, Miss Cora Mae Bostick, daughter of Mr. and Mrs. G. B. Bostick, became the bride of Billy Dean Smallwood, son of Mr. and Mrs. E. L. Smallwood all of Matador.

The wedding vows were exchanged at 2 p.m. in the First Methodist church with the pastor, Rev. M. G. Brotherton officiating. Attending the couple were Miss Mariene Bailey, bridesmaid and Kenneth Thompson, who served his uncle as best man.

The couple will live in Matador, where the bridegroom has been engaged in farming since graduating from the Matador High school in 1949.

New Telephone District is Set Up By Company

The continuing rapid growth of Floydada and the South Plains area has made it necessary for the Southwestern Bell Telephone company to create a new telephone district, embracing eight exchanges in this section, with district headquarters at Lubbock, according to E. J. Ernest, division manager of the company.

The new district includes Lubbock, Floydada, Hale Center, Lockney, Plainview, Slaton, Spur, and Tulia. Floydada formerly was included in the Amarillo district.

There will be no change in the local telephone personnel, and J. C. Oakley will continue as manager here.

The move brings three new district department heads in charge of telephone service here.

Cecile H. Cale, Manager at Lubbock for the past 10 years, has been promoted to district manager, in charge of all telephone business matters here and in the other exchanges of the new district.

Earl Richards, supervising wire chief at Lubbock, has been named district plant superintendent in charge of the construction, maintenance, and repair of the company's facilities throughout the district.

Kenneth L. Kirkpatrick, assistant district traffic superintendent at Fort Worth, has been appointed district traffic superintendent, in charge of the handling of all local and long distance calls in the district.

E. J. ERNEST, division manager of the company.

C. H. CALE, Manager at Lubbock.

KENNETH L. KIRKPATRICK, assistant district traffic superintendent.

Growth Is Phenomenal

"Since the end of the war, the communities in this area have grown so rapidly that we feel the additional district is necessary," Ernest said. "In the period since the war, the eight exchanges involved have gained about 26,500 telephones. At the end of 1945, there were only about 15,500 telephones in service in these communities; today there are more than 42,000—more than double the number only six years ago."

"The number of telephones in Floydada alone has more than tripled in that period, growing from about 500 instruments in service at the war's end to more than 1,600 today—a gain of 1,100 telephones."

"With such rapid growth, and so many more customers to serve, it was felt that we can render better service to telephone users at these

points by establishing an entirely new district, with Lubbock as headquarters, for this area."

Cale a Company Veteran

Cale, a veteran of 24 years service with the company, all in West Texas, began as a clerk in Fort Worth in 1928. He later served at Abilene, and in 1942 went to Lubbock as manager, his position until the present move.

Richards also began his telephone career in Fort Worth in 1928, and later saw service at Abilene, Childress, Pecos, and Amarillo. He went to Lubbock in 1948, and the following year was named supervisor wire chief there.

Kirkpatrick joined the company in 1948 in St. Louis as a traffic assistant. The following year he went to Fort Worth, and in 1951 was named assistant district traffic superintendent there.

25 YEARS WITH PHILLIPS

Vernon E. Stewart, Phillips, Texas, will receive an award April 1 from Phillips Petroleum Company for the completion of 25 years of service with the company. Stewart is employed in the natural gasoline department.

His brother, Jim Stewart, is a resident of Floydada.

A shift foreman at the Rice plant is Stewart's present position. He began with Phillips in the Canadian plant, later being transferred to Pampa.

BOLLWORM — II

near-panic among and government agencies and the discovery of Bollworms in Texas in "hot zones" were promptly everywhere the boll weevil had been a serious pest of the world, including Brazil, Argentina and its habits and life history was as much concerning those trying to combat early days in Texas as hardship among the boll weevils suffered from the "one" proclamations. We know that no cotton in Texas as long as the boll weevil is a pest. It is learned that since its way deep into

the cotton boll we can't get at it successfully with insecticides.

We are coping with it effectively, however, by following cultural practices based on the knowledge we've acquired of its life history. The cotton grower can change his procedure—the Pink Bollworm can't change its fixed habits.

We know it propagates in the growing season. So in the warmer areas, with a long growing season, we shorten the breeding time with planting and plow-up deadlines.

We know that in the fall it goes into hibernation. So we destroy its place for passing the winter by stalk destruction and field cleaning.

At gins and oil mills we have fumigated, sterilization and burning of "gin trash" to prevent spread by way of seed, lint, burrs, cotton products, etc.

Commercial damage from the Pink Bollworm in the past has been as high as 50%—now it is negligible.

Our success is due to the almost 100% cooperation of growers, ginners and oil millers in the program for control and eradication under the Texas Pink Bollworm Law.

As long as the moth can make long-distance flights, however, it can invade any part of Texas. And it is important to get at it quickly when it shows up in a new area.

Anyone finding a worm resembling the Pink Bollworm in cotton areas thought to be free of the insect should place it in a bottle of diluted alcohol and send it to the Entomologist for Pink Bollworm Control, Texas Department of Agriculture, Austin, with full information as to the date and place of collection.

THE VALUE OF SCHOOL

Many students can be heard to ask, "What good will this do me anyway?" Without an education a man or woman cannot easily get along in life. What would people do if they didn't know arithmetic or how to sign their own names? Without education people would have no idea of how our government should be run, and a few unscrupulous men could control us completely.

It is hard for one to think of the superstitions that science has disproved. Without school many persons would never have a chance to know and to appreciate the finer things of life. There is much more to life than eating, drinking, working, and sleeping.

Americans are the finest, and they are some very good reasons that Americans aren't suckers for things like Communism, which keep the people ignorant in order to enslave them.

A MAN

Just give me a man
 With a million or two

 Would happily do.

 Is swell any day.
 Or one who is famous
 Would suit me okay.

As A Farm Woman Thinks

(by Nellie Witt Spikes.)

Taking up your cross is carrying whatever you find is given you to carry as well and as stoutly as you can without making faces or calling people to come and look at you. All you have to do is to keep your back straight and not think of what is on it—above all do not boast of what is on it.— John Ruskin.

We are packing up to move to Ralls after two years stay in Floydada marked with much joy and happiness. For many years when away from home if anyone asked for all visitors to stand up for Floydada, or Ralls and Cone, I always got up, for I was equally at home in all those places, which were near our farm home. I am proud that we have lived in Floydada, happy about the kindness and consideration of its good citizens, sad at the parting of our way, but we have decided to be nearer our children would be the best for all concerned.

These lines by an unknown writer come to my mind:
 I know I've never told you
 In the hurried rush of days
 How much your friendship helps me
 In a thousand little ways;
 But you've played such a part
 In all I do or try to be.
 I want to tell you THANK YOU
 For being friends with me.
 I hope to keep on visiting you in
 The Hesperian.

I met an old friend yesterday, Mrs. W. Ferrier, and we recalled that Mr. Ferrier was "the best farmer in the county." We knew the Ferris at McCoy many years ago.

Will try to do better when we get over our move, so will finish up this column and go pack some more.

Assembly of God Audience to Hear Missionary Talks

Rev. Pinkenbinder will have with him two of the Latin American boys of the bible institute, who will speak. This service will be in interest of the Latin American work of the Assemblies of God in Central South America. We are confident that Rev. Pinkenbinder will have a well rounded program, which will be of interest to everyone.

We invite the general public to attend, and hear this man of God speak and present the work among the Latin American in our neighboring countries, to the South of us.

One To Another

GERALD HALL, applying at the recruiting office — "I suppose that you want a commission too?" said the officer in charge. "No, thanks," was the reply. "I'm such a poor shot I'd rather work on a straight salary."

GUY — "I saw a baby to day that gained ten pounds in two weeks on elephant milk."
 EDWIN "Whose baby was it?"
 GUY "The elephants."

JAMES — "Did you hear that 70% of the doctors who switched to camels have switched back to automobiles?"

TWO seniors were in the woods hunting:
 ROY — "Don't shoot! The gun ain't loaded."
 HUBERT — "I've got to. The bird will never work!"

BARY, who was crossing a pasture, called to the farmer:
 "Say, there, is the bull safe?"

RAMBLIN.....

Nice to have two eyes visit with us they are sailors, Hargis and Burgett. When asked whether they had any advice for our students we got this answer, "Just stay in school and work!" Sound advice it seems to yours truly.

Hear the good news about our chorus at the League meet at Canyon? They did extremely well and we are very proud of each member. Special orchids go to the director, Miss Beville. Might even say thanks to Copeland, the chauffeur.

Speaking of the chorus brings to mind the assembly held Tuesday morning in the auditorium. The chorus began with three songs then came our guest speaker who was a member of the State Dept. of Health. He and our own local representative then showed a film on the control of disease and flies.

Ah, Spring has sprung it seems. You can see the special signs in the lawns, trees, shrubs, in the halls, and..... Seniors are very excited lately. Reckon' ordering invitations, passing courses (must have enough credits you know), and a trip to Galveston could have a tiny bearing on this excitement? Sh! Don't tell a soul! Did you hear about the.....? My almost told about the decoration for Junior and Senior Banquet myself. But do be quiet about the theme. "Mum" is the word, Joe!!

not be so feminine that she can't help herself. She should respect my financial status.

BRUCE HINKSON — I would like a girl that is neat and attractive. I would also like her to do the things I would want to do. I also would not want my girl to think she was better than anyone else.

GROVER SMITH — My kind of woman is any kind of feminine female member of the fairer sex.

PETE HOPPER — My kind of woman must be neat and most of all have a good personality! She must not get mad over little things and always be understandable. She must like to do the things that I like to do. She would never gossip to other women. She would be attractive and like all kinds of sports. That's my KIND of woman!

JOHNNY BRYANT — My kind of woman must be neat in appearance and always be nice to me and other people too (Even boys). She would like to go to the places that I care to go. She would have nothing to do with gossip or people who spread it. She would be understanding and never get angry because of idle rumors.

NOOPER

What have you done? Jackie D. and Nettie D. Well, well, all's well that ends well. I see Lou S. and Ernest S. are still doing fine. Is Patsy G. off boys completely? Fine I reckon. Marilyn J. is it Sonny, Don, or

Edwin. Come on now one at a time please.

Office trips get to be a habit seems like with some girls..... We want to congratulate Mr. and Mrs. Graves on their new grandson, Mike.

Is Glad really awake when we hear him talking about Carolyn? Don and Lorraine seems to be doing ok. Best to ya.

Wonder why Dennis doesn't open his eyes toward the sophomores. A certain girl sure eyes the Seniors. (Girls you had better watch these boyfriends a little closer.)

Where is this girl, Corky, David? Come on, Dave, give with the dope.

THE CRY OF THE SENIORS.— Sweepston is comin' there's a test in sight.

What about these slumber parties, Eugene T? Who are these guys by the name of Billy Bob and Franklin! (Aren't they from Lockney.....) What ya say Ruthie and Delores.

What about this flat the "Wonder Girls" had. Some flat I heard. Adrain and Sue talking?? What about it Sue?

Who are these girls from Lockney that attract John Kerns and Douglas R. so much here lately. Could it be well!! some..... girls.....

It seems like this lil' ole' Padueah guy, Don Biddy, has stolen dear lil' ole' Patsy's heart. Well, well, miracles can happen.

Say! Am I going deaf or did my ears hear Everett Hill ask G. A. for a date! HUH!

Sorry Fern, to hear Troy is leaving for Japan April 9. But maybe

it won't be so bad. Say not now! Oh yes, Betty B. and Glad N. at the Drive-Inn Saturday night. Carolyn do you have anything to say.

Has Gayno Scott turned his eyes a different way??? What do you have to say..... if anything.....

W. R. and D. I. seen at who's house when?? COME on Boys give with details.

Say Norman robbing the cradle aren't you. Wonder what Barry thinks! Sure glad we can't read his mind.

Barbara B. still waiting. What now Billy B.

Billy M. seen in the show with Alyne R. Saturday night.

All Dickie S. is asking is just a fighting chance and can't even seem to get that.

Keith M. going to Plainview??? What about Floydada, Keith.

Has anyone seen a two-toned Mercury that it takes two to drive it. What about this Red.

Well no mo' for this week. Now Kids let's get on the ball so we can keep this column. It requires your help.

What Would U Do?

(If you were Principal of F.H.S. for a day) MRB. COOPER — Declare a holiday. BOBBY CARMACK — Have assemblies, let every room out early for lunch, make the teachers stand in line to eat, and let the "Sandhill Busriders" out of school early (Bobby, could it be cause you ride

that bus?) If any upper classman got out of hand, I would whip him. EDWIN LEATHERMAN — Pass everyone in English IV for the rest of the year. (Sure do wish you were Principal)

HUBERT RING — If I were Principal for one day, I would run the school to the best of my ability. I would see that the students had an assembly in the morning, and one in the afternoon. If a basketball game was possible, everyone would be allowed to attend. If there was a track meet, school would be dismissed. School would be dismissed at 3:30 so the students could go home early. Also if anyone got out of hand one little bit, I would give him 25 licks, and if any girl got out of hand, she would have to sing a

song on the next assembly program. (Whew! what a Principal!) EVA NELL PRATT — I would let the boys and girls chew gum in class. I would let them be in the hall without permit. I would not make them have an absentee slip for being absent and I would let the student body have some privileges. GUY ROY — I would have an assembly put on the first period (Miss English IV) I would let the Seniors have a week for their trip, and I would try to help the Seniors to make more money.

NOTE: It is the opinion of the Hesperette Staff that perhaps some would not make good school executives. We say this with all due respects to those quoted above naturally.

THE FLOYD COUNTY HESPERIAN
Published by the Hesperian Publishing Co., Inc. at 212 South Main St., Floydada, Texas. HOMER STEEN, Editor.
THURSDAY, APRIL 3, 1952

Established 1896 by Charles H. Steen, first office at Floydada, Texas, under the act of Congress 1897.

Views and Comment

If Texas had a bureau or commission down at Austin, like most of the states in the United States have, that would hold hearings and issue orders, amounting to ordinances to the various communities, saying what public utility service should sell at — if Texas had such a bureau established by law—there would not be any controversy over telephone rates in Floydada. Long since the commission would have acted and some kind of a rate would have been set. Many claim this is the way it should be. Such a commission, they claim, can understand the involved procedure by which the public servant, in this instance the telephone company, arrives at its need for revenue, and could issue its orders in accordance with the findings. But even if they could do such, which we definitely doubt, still it is better that a firm or corporation get on the ground and have it out with its or their customers about whatever is in controversy than to have a commission with such tremendous powers over the lives of the people. Until such time as it becomes apparent that a rate-setting body is needed to head off total bankruptcy of the utilities people (which serve the public and do a wonderful job of it at that) we are opposed to this "progressive" plan. Anybody or any corporation needs to do business with his customers on a basis which his customers can understand and see (and pay). Unless he can do so he needs to go broke and get out of the way and let somebody take over that can get along with his customers and make enough money to survive and prosper. It's hard on the telephone company, the gas company, the light company, for it to be that way — its hard on them in a way, but is it any harder on a telephone company to have to meet the demands of its customers than it is for a printer to have to face his customers with a bill that is scrutinized or for a grocer to have to have it out with the food buyers? Would you think it well for a commission at Austin to set the price of bacon?

The comparison to us is not illogical. We do not expect it to happen but if it should, that the telephone company and the city council of Floydada should battle until Doomsday over the exchange rates here, we'd still be unfavorable to a public utility commission sitting in Austin. In the Floydada telephone rate "case" (it would be docketed and numbered and numbo jumbo without end if it were handled in Austin and many, many pages to be added to the musty lore)—In the Floydada case there is no reason why

some kind of a "settlement" will not be reached between the telephone company and the city council. Probably the "settlement" will not be fully satisfactory to anybody. In our view the parties to the talks are too far apart for them to reach any kind of an agreement that won't compromise their varying beliefs as to what is fair and reasonable. But this thought remains from the old saying that when two men of good will meet there is bound to come good of the meeting.

As proof that things look different now to what they were a year ago, that some sort of thing is happening to business, that money is not easy for everybody that seeks it, is the return of the high tension salesman. We had forgotten until the other day, a dapper young man dropped in, unfolded his accordion-like prospectus across what we were trying to do. "I think you'll want to be in on this thing that everybody is taking the first time they see it." We tried to get out from under in a nice way, although he was perfectly rude to do the way he did, and was not entitled to any nice-ness. Plum nostalgic. The boy didn't look hungry, but he sure did act that way.

Texas agricultural landscape has made rapid changes in the past 25 years. According to one Texas banker it is due to make such great changes in the next 25 years, at least within the lifetime of a man, that the "whole agricultural landscape will be changed beyond recognition". What all the banker means by this statement he does not indicate. But he does add the intriguing statement that "this inevitable change will raise the level of living on the land." He thinks the march of the sciences and mechanization are to be the instrumentalities through which this will transpire. We already see the transformation so far as mechanization is concerned in the West Texas area. Presumably the sciences also are at work and we'll see more results from this angle as time goes on. One concludes the banker, who is a Dallas man— Ben H. Wooten—has the blacklands in mind more than some other regions when he speaks of "rebuilding the productive capacity of our soils." Parenthetically, we should add, perhaps, that if the blacklands could be worn out in 130 years that the high plains land also could wear out in time and have to have a face-lifting, if it is as badly mistreated as the blacklands have been.

In these days of uncertainty, the only thing you can count on is your fingers.

Conservation District News

W. W. Edwards, of Petersburg, was discussing his bench leveling with SCS technicians recently when he remarked that it saved him one irrigation last year. His bench levels held a big rain, while his other land had runoff. Land that was not bench leveled had to have an additional watering, in order to make a crop. Edwards plans on bench leveling more land in the future.

Raymond Williams, of Floydada, has completed a waterway, which was shaped with a maintainer and seeded to western wheatgrass. After the grass is well established, Williams expects to build a diversion terrace and have it empty into the waterway. The area below the diversion will be bench leveled and planted to improved pasture grasses.

The senior singles contender from Lockney, Orland Gilbert lost his first round to a Tulsa boy who went on to win the district title.

District winners will enter the regional meet at Lubbock April 19.

Mr. and Mrs. A. H. Kreis left last week for a stay in Mineral Wells.

Look, too, for a powerful engine, easy steering, short turning ability, and extra payload capacity.

You'll get all these advantages when you choose a Dodge "Job-Rated" 1½- or 2-ton truck.
