Perhaps Newspapers need to do a bit of public relations worse than most any other type of business. The kind of business they are in calls for outspoken attitudes in the run of the years and most any newspaper which has any ideas worth advancing is going to say the wrong thing, take the wrong track, so as to make some sore spot that rancors and eventually lose a business friend when a business friend is needed worst. Instance is the attitude of the legislature toward the press in Texas. Newspaper people who sponsored some wholesome legislation since the mind of man runneth not to the contrary always get what the little boy shot at when they get to Austin. The newspapers have offended enough candidates who finally become the legislators that they can't get anything done. Most of the legislators are lawyers. While the lawyer always believes the lawyer is worthy of his hire he certainly has his doubts about the paper man, sometimes with some reason.

Cotton crop in Floyd county, particularly on dry land has deteriorated in the two weeks of heat and dry. Farm operators report many crops which were nothing short of marvelous in their promise on August 1 now getting poorer and poorer by the day. Old Man Dry, who caught up with many parts of Texas two years ago, is working on Floyd county now. The dryness has been responsible for some hurried irrigation well drilling and some new spots of excellent water sands have been developed. Among these is an area northwest of South Plains where a number of good wells have been developed. Also in other areas in northeast and southeast Floyd county the land owners are finding sand stratas that bear water in paying quantities. New farmers are reminded that irrigation is an art which demands study. They can go see how old heads at the game are doing and profit by it.

Since Nomination for a local office in Floyd county is tantamount to election the business of running for office is settled for another two years and every-body including the unfortunate (?) who lost, can make their plans. Either to begin running again now for two years hence or to get into something else and forsake the business of seeking office. One thing you note about office holding, about the time you get in the position that you must have the office the voters decide to turn it over to somebody else and turn you out. A good thing for a young man not to do is to seek public office.

A critical shortage of sulfur—used in making sulfuric acid—is a serious factor in the 1952 shortage of superphosphate.

What price will we have to pay for the hay, Governor Shivers wanted to know. And the question made the federal administrator so mad he spurred further conferences on the question. Governor Shivers, for the sake of the people who have been so hard hit by the drouth made the application for the federal aid in a telegram to the president. When you go to fooling with Uncle Sam you'll find that you have to fill out a good many pages of blanks and sit on the doorstep waiting until the man who has charge of the relief you pray for gets back from coffee. A drouth that has been raging in Texas for three years begins to get attention when several other states begin to suffer from eight weeks of it. Inference the governor drew from the call for the conference was that while Texas had been suffering for three years there wasn't any election coming up until this fall.

Floyd county cattlemen are going to need all the cotton moats and burrs they can get hold of for their cattle this winter. By their use some cattlemen estimate they can carry through a bunch of stocker cattle on half the cost it would usually run, assuming they can get hold of the burrs at the cost of hauling as they formerly did. The pink boll-worm extinction program, declared to be the number 1 problem of the cotton industry at this time, of course, calls for the immediate destruction by burning of all refuse from the gins. Gins for the most part, have set up elaborate burners that consume the burrs and moats as fast as they emerge from the stands. The two needs are diametrically opposed to each other. Report has it that there will be some easing up of the regulations to give the farmers a chance to use the cheap filler instead of buying cottonseed hulls at a prohibitive price. Whether this will develop into something tangible is yet to be seen and on the outcome hangs the question of how many cattle farmers will try to carry through the winter and back into a cycle of rainfall for range pasture and forage crops.

Belles on Their Toes At Capada For Three Days

The lovable Gilbreth family of "Cheaper By The Dozen" fame returns to the screen in "Belles On Their Toes," a comedy in color by Technicolor, which comes to the Capada Drive-In Theatre on Sunday, Monday, Tuesday, Jeannine Crain Myrna Loy, Debra Paget, Jeffrey Hunter and Edward Arnold have the stellar roles and the supporting cast is headed by Hoagy Carmichael, Barbara Bates, Robert Arthur and Verna Felton.

"Belles On Their Toes" is based on the novel by the same authors, Frank and Ernestine Gilbreth, of "Cheaper By The Dozen." The story reveals the further adventures of the uproarious clan and tells what happens when the Gilbreth boys get growing pains and the girls discover romance.

Producer Samuel G. Engel and Director Henry Levin used eight musical numbers, some new and some old, to heighten the human interest qualities of the story and to give the entire family a chance to show-off vocally as well as sentimentally. Among the songs are "Beans," a new song by Mack Gordon, which Carmichael and Debra Paget sing with the family chorus chiming in; "Whistle and Walk Away," by Gordon and Sammy Fain; "Lazy," and old song by Irving Berlin and such nostalgic numbers as "Any Rags," "Japanese Sand Man" and "Love's Old Sweet Song."

"Belles On Their Toes" captures the spirit of the flapper age with such dances as the "Shag," the 1923 vintage Pierce Arrow which the family used as a carry-all and the familiar racoon-coat-college boys.

In their screen play, Phoebe and Henry Ephron have given "Belles On Their Toes" a wider scope and more emotional punch than "Cheaper By The Dozen." "Belles On Their Toes" has been rated as the great American family picture of the year by those who have seen advance previews of it.

HERE IS THE PATTON 48

This is the Army's newest Tank, the Patton 48, described as the most modern medium tank ever made for our troops. The new combat vehicle has just been unveiled at the Chrysler Delaware Tank Plant where it was built. Design of the tank was completed by Chrysler Corporation in specifications of Army Ordnance. Extreme maneuverability of the Patton 48—its low silhouette—one piece cast armor hull and improved fire power all combine to make the Patton 48 a formidable fighting machine.

Modern—But Mellow

An inviting kitchen containing cabinets and counters with a natural wood finish has walls painted in a velvety gray-green. Against this background the copper pans that hang near the range show to especial advantage. The wood tones of the cabinet appear again in the brown and buff patterns of the linoleum. On the chairs at the breakfast bar are cushions of a rosy terra cotta tone that is repeated against in the paint used for the ceiling.

Andrews Opens 9 a. m. Monday

The opening of Andrews Ward school will be September 1 at 9 o'clock, in the same manner as for the past few years. There will not be a general assembly for students. They will go to their assigned grades as they were last year. For instance, students in 1A last year will assemble in 2A, those in 2A go to 3A, etc. This information for the benefit of parents with children in the school is given by Principal A. D. Fultz, who adds:

The first grade students will meet in the first grade rooms where they will be divided into sections. Again this year birth certificates will be required of students born outside of Floyd county; also required are immunization certificates for diphtheria and whooping cough.

Parents of children who have moved into the Floydada district since the first of April are requested to come to the principal's office during the first week of school to complete registration of their children.

Again this year children having communicable diseases such as mumps, measles, scarlet fever, polio, trench mouth and others are required to have a doctor's written statement to re-enter school, which is necessary in preventing further spread of the diseases.

School will start at 9 each morning. The first grade will be dismissed at 12 for the first month, thereafter at 3 o'clock. The fourth and fifth grades will be dismissed at 3:15 and the remaining grades at 4 o'clock.

Culver Gets Heavy Majority in Floyd

Frank P. Culver, the Fort Worth lawyer, was given a smashing majority in Floyd county in the run-off primary Saturday for associate justice of the supreme court of Texas, place No. 1, over Spurgeon Bell, the Harris county man, despite the efforts of Bell's friends to overcome the "geography of the situation".

The unofficial tabulation gave Culver 1,575 votes, Bell 540 votes. Returns from over the state indicate that Culver is winner of the race by a modest majority.

Brown Apples

What causes an apple to turn brown after it is exposed to the air? In apples, potatoes, etc. there is a compound called tyrosin. When exposed to the oxygen of the air, a very complex reaction occurs, involving another material called tyrosinase which is also present. This leads to the formation of a pigment called melanin, causing the dark color. Melanin is very wide-spread in nature. It is also responsible for the color of dark-skinned races, dark hair and brown eyes.

Mock Turtle Soup usually is made of calf's head.

First-Born Child of Floyd County Died at Age of 66

That time must claim its inevitable toll is reflected in the news this week of the death of Floyd W. Maxwell, 66, at his Oklahoma City home August 18.

He was the first white child born in Floyd county, the son of Mr. and Mrs. Z. T. Maxwell, who settled in Floyd county, later moved to Hale county and thence to Indian Territory, now in the state of Oklahoma. Born in 1865 in a sod-covered dug-out on Blanco canyon he was given the name of Floyd after Floyd county. When the family moved to Hale county they lived on the land which is now the original townsite of Plainview. His father and a man named Lowe dedicated the Plainview town site.

Floyd W. Maxwell lived the last 11 years of his life in Oklahoma City. He is survived by three daughters, two sisters, and three brothers. He was a nephew of the late Arthur B. Duncan, first county judge in Floyd county.

POLIO TREATMENT—Danny Rodriguez, 5, of Dallas, is one of hundreds of Texas youngsters stricken this summer by infantile paralysis. Danny is shown receiving muscle-loosening treatment in a \$5,000, stainless steel tub at Texas Scottish Rite Hospital for Crippled Children, at Dallas. The hospital is supported by donations from generous Texans and, since 1923, it has treated 2,600 young polio victims from all over the Lone Star State.

Floating Steel

A solid piece of steel will not float but the ship will because there is a lot of open space inside the hull. Buoyancy depends on the relation between the weight of an object and that of the water it displaces. A body that weighs more than the displaced water will sink. However, if the ship were entirely watertight, and it could be pushed completely under the water, the water displaced would weigh considerably more than the ship itself. Actually a ship automatically sinks to such a depth that its own weight is balanced by the weight of the displaced water. Since the salt in sea water makes it heavier than fresh water, a ship rides higher in the ocean than it does in a river.

Salad Dressing

A little touch of seasoning can make the difference between a salad with personality and one that is flat tasting. Most salad dressings can be made from three basic recipes—French dressing, mayonnaise, and cooked salad dressing. They all keep well if tightly covered and stored in a cool place, so make a batch of each to have on hand for the busy shopping and holidays at hand. Try adding a pinch of "this" and "that" until you get the flavor to suit your taste. Basic French Dressing: 1/2 teaspoon salt, 1/4 teaspoon paprika, 2 tablespoons vinegar, 4 tablespoons oil. Mix in the order given and shake well just before serving. Serve on any kind of vegetable salad.

"Open Wider, Please"

A dentist's equipment must always be immaculate and attractively finished, preferably in pleasant and harmonious colors. Such factors help create an atmosphere which contributes to the patient's comfort. Probably no other industry—except furniture manufacturing—requires a more exacting finish on its products than the dental equipment industry which produces dental chairs, dental X-ray equipment, dental operating units, dental engines, and other accessory products.

MEANS GREATER LUGGING POWER IN THE MASSEY-HARRIS 55 D

Confining the explosion in the Dyna-Cell of the main combustion chamber eliminates pre-detonation and controls burning to assure constant, maximum force on the pistons. The result is greatest power output per gallon of fuel... less cost per acre worked.

The 55 Diesel is a big tractor... handles big tools for volume production. It has a 382-cubic-inch full diesel engine... requires no auxiliary starting mechanism. 14-34 tires assure firm traction in the toughest going and wide, roomy platform plus easy handling mean more land covered per day.

See the 55 Diesel, drive it... it's a new kind of Diesel with the efficiency of gasoline, the economy of low-cost fuel.

THE BATTLE FOR COTTON

Down in the Lower Rio Grande Valley, an all-out war is being waged against a dread enemy — the Pink Bollworm.

The battlefield isn't confined to the southern tip of Texas, however. It encompasses 189 counties, extending from Val Verde in the Big Bend to Orange County on the Louisiana Border.

The spoils of this war is cotton—the King of Texas Agriculture. The weapons are strict regulatory measures and practical insect control methods. And the battle has attracted the attention of economist as well as farmers all over the state, who realize that if the insect wins—then cotton can no longer be grown profitably in Texas.

Perhaps the first major victory will be won in the Rio Grande Valley Aug. 31, when cotton stalks in the four southern-most Texas counties will be turned underground. This action will help destroy the winter breeding place of the Pink Bollworm. Three weeks later, 12

counties farther north will follow suit, as will the remaining 45 counties in subsequent weeks. By Oct. 20, all counties under planting and plow-up controls of the Texas Department of Agriculture will have done their bit to reduce the Pink Bollworm population.

The next step will be up to nature. With adequate moisture during the winter, the cotton debris will rot—and victory will be nearer—but not complete.

Due to a comparatively mild and dry winter last year, and to delayed plow-ups brought on by an acute shortage of labor, the Pink Bollworm build-up was astonishing. Actual counts in four counties showed thousands more "Pinkies" than in 1951. Representative sample bushels of gin trash from Cameron County had a count of 15,000 worms per bushel as compared to only 151 (correct) last year. Hidalgo had 3,000 as compared to 103; Willacy, 7,000 as compared to 13; and Starr, 6,000 as compared to 169.

The insect multiplies so rapidly as the season progresses that it can wipe out a whole crop of late cotton within two weeks. The importance of late planting and early plow-ups in infested areas cannot be overestimated. But it is not the problem of the South Texas farmers alone. Every Texas farmer should clean his fields and ditches as soon as the cotton crop is gathered. For as the breeding grounds are destroyed in the south, there is little to prevent the insect from moving farther north in a search for winter quarters.

The government of Mexico is combatting the Pink Bollworm with similar measures. With the cooperation of every farmer in the infested areas and over the rest of the state, we can look forward to crops comparatively free of the destructive insect.

COLORS OF COURAGE

Who selected the red, white and blue that made up our nation's standard? We'll probably never know for sure, but we are glad his tastes were simple and his interests right.

We are glad he looked at the limitless stretches of the sea and chose BLUE, symbol of freedom and integrity. We are glad he remembered the blood of heroes, and chose RED, symbol of vigor and valor. And we are glad that, watching clouds against the background of the heavens, he decided to use WHITE, symbol of purity and faith.

But most of all, we are glad he was an American, brave, strong and true, and that there is no YELLOW in the flag of the United States. —By Kathryn Henry, Curry Co. Times, Clovis, N. M. Reprinted in Santa Fe Magazine.

Better Prices For Eggs Seen At Early Date

COLLEGE STATION, August — Poultrymen who have raised a normal number of pullets this year should soon begin to receive a profit on their investment. This encouraging word comes from Professor E. D. Parnell of Texas A. & M. College's poultry department.

The outlook for egg prices wasn't good last spring, says Parnell, and producers reduced their flocks and also their pullet replacements by 7 per cent. Now the picture has changed. Storage stocks are being reduced and prices have strengthened. The future looks good. It is true, says the professor, feed prices remain high but feed-egg ratios have become favorable for the first time in several months. Therefore, egg producers should be operating on the profit side for the remainder of the year.

It is now too late to do anything about raising pullets for egg production this year but Parnell points to the present situation as a reminder that profits are seldom made by those who are in the business one year and out the next. Trying to outguess the market, he adds, is usually a good way to get out of the poultry business.

For those who have the egg producers, Parnell says, feed them well; give them plenty of room; practice sanitation and keep them in good health. It is his belief that poultrymen who raise only the number of pullets they can care for well, and do it year after year, are the producers who are most successful.

Easy to Make It

A few camellias, leaves, green Emex, and a bunch of white grapes are all you need to duplicate the formal flower arrangement. A classic example of how to obtain maximum effect from a few flowers, it is one of nearly fifty different designs in Good Housekeeping's 34-page book of flower arrangements in the May issue. The volume here includes glaucous camellia leaves and the swordlike spines of pandanus. The limes and grapes are wired to sticks and secured in a holder. The color effect is striking white against several shades of green.

John L. West who is convalescing from recent surgery had the numerous visitors recently including Mr. and Mrs. W. M. West, Mrs. Roy Andrews of Walnut Springs, Texas, C. D. and O. N. Saturday morning, David Huckabee, 11 and his brother, Gary 13 were helping their father at the irrigation wells on the farm and were going from one set of water tubes to another, near their home, when the pickup, driven by Gary overturned in a bar ditch. Yakima, Washington. The death of the Huckabee lad in a pick-up mishap is the second of the kind in this area this year. In an almost identical type of accident little Teddy Smith, 3, son of Mr. and Mrs. Bill Smith, of Dougherty, was fatally injured on May 24.

Mr. and Mrs. Lloyd Allen and family have recently purchased the Oscar Nelson home in southwest Floydada and have moved there.

E. O. Northcutt Has Substantial Majority

Floyd county voters were on the winning side in every one of the state and district races they balloted on Saturday in the majority primary, including the race for associate justice of the Court of Civil Appeals at Amarillo. The county gave Northcutt, of Amarillo, for that office 1,389 against a vote of 1,183 for the lawyer-approved candidate, Joe S. Moss, of Post.

Northcutt surprised local political observers in the first primary when he pulled enough votes in a five man campaign to get into the runoff, and went along Saturday with an early lead to win by a substantial majority.

Crystal for which they were intended.

But handwork has come of age. Women's hands have gone to college, and have learned they're all tied in with their minds and emotions, with correct appearance and the bank account. Now instead of design, we say applied arts or creative design.

Today's creative arts are really an approach to the philosophy of living; or so we're told. It's no longer so smart to know how to make something as it is to know when to make it and when to buy it already made. Instead of worrying about a tiny imperfection in a handmade object, we learn to lose sight of the small error in the whole effect. What was once a flaw may be freedom of design, which gives the finished piece life.

We are learning self-confidence through an appreciation of good design. Whether we select it or make it ourselves, under the new plan, our heads, our hearts and our hands come out of the experience in harmony with life.

We like the new approach. It has a satisfying sound. But somehow we still feel that old-fashioned handwork has simply been psychoanalyzed. About all we've done is go out the side door and come back in by way of the front.

Shower Compliment To Miss Anne Self, August Bride-Elect

We used to call it handwork. Its purpose, like its name, was simple. Mainly, it was busy work for ladies who, supposedly, had time on their hands. Millions of daydreams have been woven into as many yards of crocheted or tatted lace. Scores of dozens of embroidered pillow slips have been stacked on the shelves of as many troubled minds. And hundreds of hand-painted sugar bowls hold more of a desire for self-expression than do of the tiny sweet

KITCHEN AND *** FIELD NEWS

(from Floyd County Rural Electric Cooperative, Inc.)

by Nancy Morekel and Claude Weatherse

Irrigation wells have been connected during the week for Tommy Byrd, Petersburg; Edward Baird, Harmony community, Floyd county; and Charles Francis, Silvertown.

Mr. and Mrs. J. D. Rainer of Wichita Falls, visited over the week-end with his sister, Opal Rogers and other relatives.

Coy McDougald of Lubbock, who is with RTA (Rural Telephone administration) was in the Co-op office last Friday.

Mr. and Mrs. Elmer Dazey of Clovis spent Sunday with the Hickersons.

John Nay says— The latest definition for a door knob:

It is an implement, made in the shape of a man's head, so it will be easy for a woman to turn.

H. J. Bontke, Plainview, was an office visitor on Monday. They have a new upright model food freezer.

The appliances in the co-op kitchen are all on school-plan. This means they are kept up-to-date by the manufacturer. Each time a new model is released one is sent for the kitchen. A new frost-free Westinghouse refrigerator was installed yesterday by the Radio Electric company.

Now that school time is just around the corner let's not forget that sandwiches, yeast breads and rolls, quick breads, cookies and cakes freeze satisfactorily and are on hand and ready to put into the lunch box. Cookies may be frozen baked or unbaked, whichever you prefer. Both methods will produce excellent results.

Wayne Collins is back at work after a nice vacation trip to Califor-

nia. Karl Dahlgren, district engineer for RTA, and Joe Walker, manager of the Telephone co-op of Lubbock were office visitors during the week.

One of our members brought the co-op employees a bucket of nice fresh, vine ripened tomatoes that surely were nice — and of course the nicest thing about it is the fact that some one has thought about you.

Milton Harrison and Wayne Bettey brought some fresh roasting ears too.

Thanks a lot for thinking of us.

This recipe was used for beans at the roaster demonstrations workshop style that were held in the Kitchen recently:

2 cups dried red kidney, pinto or great Northern beans
1 quart cold water (4 cups)
1 cup thinly sliced onions
2 minced cloves garlic
1/3 cup minced, green pepper
1/4 pound bacon diced
one 8 oz. can tomato paste
1/2 teaspoon pepper
2/3 teaspoon salt
1 to 2 tablespoons chile powder
2 tablespoons cold water

Pick over and wash beans; cover with 1 quart of water and let soak several hours or over night. Drain, measuring liquid; add enough water to make 5 cups. Add to beans with all but last three ingredients. Cover, cook 2 1/2 hours, or until tender, adding boiling water if necessary.

Add salt during the last hour of cooking, stirring gently with a fork. About 15 minutes before done, mix chile powder with 2 tablespoons cold water and stir in.

FINISHES NAVY ENLISTMENT

James Finley, son of Mr. and Mrs. Bob Finley, is at home following four years spent in the navy as an electrician mate with a ship in southern waters.

James was separated from the service on August 21.

SECRETARY VACATIONING

Mrs. Wanda DuBois, secretary for the Floyd County Extension Service agents, is on her vacation this week.

Mrs. DuBois did not elect to make a regular vacation trip, but to stay at home and take it easy for a week, and go to ball games with husband, Bill.

Mrs. Vera McKay and daughter, Mrs. Peggy Wright and baby have returned home from a vacation after visiting points in Oklahoma.

Mr. and Mrs. M. F. Williams have returned home from a visit with relatives in Frederick, Oklahoma.
