Cotton Is Slow Moving to Gins

Probably less than half a dozen Floyd county cotton fields have harvest hands at work this mid-week as the raisers and ginners made their pre-harvest preparations for the season.

But the harvest will gradually gather momentum and soon the gathering will be under way unless disaster in a big way overtakes the crop.

This week Wayne Russell of Lakeview was the only raiser delivering cotton to a gin here Monday.

More Gins This Season Only a few bales of cotton has been turned out at the Lockney gins, said R. E. Patterson yesterday.

Lone Star has had a bale or two as has Aiken. But Sterley, Dougherty, Lakeview and Barwise had not ginned any cotton Tuesday.

Alton B. Chapman

Judge Chapman 'Official Visit' At Rotary Due

For the second time in its quarter century of history, Floydada Rotary club will have one of its own members as an official visitor.

Last time of such an experience for the club was during the governorship of J. M. Willson, who was governor of the then constituted district.

Judge Chapman was a member of the Rotary club at Spur before moving to Floydada and was one-time president of that club, which has long had an annual Alton Chapman day to honor him.

The "visit" will be none the less "official" since he is visiting his own club. He will confer, as the duties of his office require, with President Guy Ginn and Secretary Clarence Guffee and other officers of the club on Rotary administration and service activities.

As of the first of the week Howard crews were working on the cut-off at Lockney. The grade and drainage structure had been finished and something more than half of the caliche had been piled on the road bed.

Wherever Rotary clubs are located, their activities are similar to those of the Rotary club of Floydada. (See Rotary Club, back page)

Tri-Captains of the 1952 team of the Floydada High School Whirlwind are three seniors who began their public school careers together at Andrews Ward school and will campaign for the green and white the last time this year.

The three seniors are leading a first-string team, all of whom are seniors except their center, who is a junior. The three captains have tasted a lot of defeat in their three years of high school football.

Crosbyton Chiefs Will Be Opponents

The Floydada Whirlwinds will play host to the Crosbyton Chiefs Friday night at Wester field. It is the first home game for the charges of Coach Preston Watson and the opening game of the season for the Chiefs.

The Winds are at near top strength for the contest, having made it through the Post game with only minor injuries. The local boys showed up well in the game last Friday night and with the same determination and spirit

that will represent the purple and gold here Friday night.

Fred Edwards, senior tackle for the Chiefs, tips the scales at 297 pounds, and is backed up by two more tackles listed at 185. Other members of the Crosbyton team appear to be of about equal weight to the Winds.

The turf at Wester Field is in excellent condition and the west stands have been overhauled and painted for the safety and comfort of the fans.

Game time is 8:00 o'clock p.m. Price of admission is \$1 for adults and 50 cents for students. Attractive programs will be sold by the Quarterback club for 10 cents.

Officials for the game are: Shorley Hayhurst, headlinesman; Benlie McWilliams, umpire; Sandy Waldrip, referee.

Pep Rally Tonight Tonight the green and white pep squad will stage a big rally in Graves gym as a prelude to the opening of the football season in the home stadium.

Several hundred persons are expected to be present for the rally.

'Surplus' Road Building Lags

Work of building the "surplus bond" road mileage in Floyd county continues to lag this week, with the prospect now looming that the job will not be finished before the customary deadline of October 15, a report from the county judge's office indicates.

As of the first of the week Howard crews were working on the cut-off at Lockney. The grade and drainage structure had been finished and something more than half of the caliche had been piled on the road bed.

Wherever Rotary clubs are located, their activities are similar to those of the Rotary club of Floydada. (See Rotary Club, back page)

Most extensive mileage is at Irick, connecting that community with U. S. Highway 70 east of Aiken, and in South Plains, where a five-mile stretch of road extends eastward connecting with highway 207 two miles north of South Plains. The jobs in Floydada and Lockney are cut-offs to facilitate through traffic. The Lockney job is in Precinct No. 2, the Floydada job in Precinct No. 4.

## Good Program, Fine Food, at Harmony Again

With Mrs. Riley Holmes, as chairman of the committee on arrangements, the Harmony Home Demonstration club entertained approximately 200 persons with a smoked hickory barbecue last Thursday evening at the Harmony community center club house.

Long tables, with ginger bread cakes made in the forms of horses, cowboys and other western figures, iced in bright colors, were placed in the middle of the tables, with small ropes, chuck wagons, cactus and toy horses forming the center piece for the speakers table. Club members dressed in bright colored western attire served a bountiful plate, barbecued red beans and salad with coffee and ice tea.

Mrs. Don Finkner, as toastmistress, welcomed the guests, who were from Plainview, Lubbock, Floydada, Lockney, Petersburg, Houston, El Paso and California.

Following the meal, Conley Bradford, son of Mr. and Mrs. Floyd Bradford entertained the audience with songs, playing his accompaniment on a small guitar, assisted by his daddy on a larger guitar.

Miss Barbara Perry, talented daughter of Mr. and Mrs. Everett Perry, in her readings took her audience to the railway station to see "Rosy leave for Syracuse." Her reading was clever and the group proved they liked it by the applause.

Bernie Howell, the maestro of the electric organ, was there accompanied by Mrs. Howell and son, Phil. Bernie brought the organ along too, and favored the guests with organ music, playing numbers both his favorites and requests from the audiences. Bernie now makes his home in Lubbock where he has a radio program. He was formerly in Amarillo, where he had a radio program with "Uncle Jay."

The Harmony community center club has a "party" every three months when they invite the public to their community. The next hostess chairman will be Mrs. Walter Hanna, who with her committee and club, will have more fun, entertainment and eats for the

## Birthday Supper For Jimmy Barnett

Monday evening September 8, friends and relatives of Jimmy Barnett gathered at Silver Falls picnic grounds for a family-get-together and birthday supper before his departure on Tuesday for Pearl harbor, where he is assigned to two years shore duty.

Jimmy had just completed two years combat duty aboard the USS Rochester. He is the son of Mr. and Mrs. W. T. Barnett of Wake.

The occasion was three-fold in that it was also Jimmy's 22nd birthday and that of a cousin, Mrs. Jack Thornhill nee Peggy Barnett. An enjoyable evening and wonderful supper was enjoyed by Messrs. and Mesdames J. W. Seigler and sons; Charles Thornhill, J. R. Miller, Leslie Miller and family, A. E. Moore and family, C. H. Fleming and family; A. G. Barnett, C. B. Leatherwood and family, H. B. Barnett, Forrest Dendy, and Messrs. and Mesdames W. T. Mr. and Mrs. Tom J. Boyd of Amarillo were week-end guests of Mr. and Mrs. W. S. Poole and Mr. and Mrs. Ned Bradley. Mrs. Boyd is a sister of Ned Bradley.

A favorite complaint is lack of time. If we had more time, we'd visit the sick, be nicer to new people in town. We'd read good books, learn to play golf, take part in community affairs. To hear us tell it, we'd extend our horizons in a dozen different ways.

Yet what do we do when we actually get a little leisure? We spend an hour reading the newspaper instead of the fifteen minutes it deserves. We listen to a soap opera and darn socks that are ready for the rag bag. We become geniuses at frittering away time.

The tendency to hurry, to get one thing done so we may take up another hasty pursuit, can become habit to the point of fault. We heard someone say the other day that American women, in their eagerness to get to the next thing, miss all the fun in living today. "They don't even take time to enjoy their children," she said. They've anxiously pushing on to the next stage. And often it's the same way with the spouse. During his brief lunch hour, we rarely have time to walk around the yard and enjoy the growing things; we have too much to do in

Floyd County Hesperian, Floydada, Texas, Thursday, September 18, 1952

the kitchen.

On the other hand, inactivity is not always an improvement over haste. Unless we're thinking through a problem as we manicure our nails, or building up reserve for greater family happiness as we rest, we might as well keep buzzing.

Whether too busy or too relaxed, we actually reveal the same trait; a surface-deep attitude toward life. Fully half of our troubles result either from imagined urgency or empty dawdling. We're hiding behind them to keep from facing up to things.

Mr. and Mrs. C. W. Denison, jr., and children of Brownfield, Mr. and Mrs. Gilmer Denison and children of Lubbock and Mr. and Mrs. Johnnie Parrack of Plainview were dinner guests Sunday with Mr. and Mrs. C. W. Denison.

Hygiene authorities advise us not to moisten our fingers when counting our money. We're not worried. No germs could live on our salary.

## Beautiful Cotton Plaid For Autumn Study Club Hostess

COLLEGE STATION, September 16. — Fall cottons have blossomed out in plaids of beautiful colors and designs, Nena Roberson, clothing specialist with the Texas Agricultural Extension Service, points out that before plaids are bought they should be considered in relation to the pattern if the finished garment is to have that smart look.

For plaids, choose a pattern of simple design with few seams. It is also well to study the pattern in relation to the slant of edges to be matched.

Miss Roberson says the larger the plaids the more material must be allowed for matching and that fewer pieces and joinings mean less waste of fabric. Remember that in an unbalanced plaid, with up and down and/or right and left designs, all pieces must be laid in the same direction and yardage must be allowed accordingly.

There is a choice between fabrics of printed plaid and woven plaids. The specialist advises that printed plaids are off grain and that it is impossible to match the grain and the plaid. A professional look cannot be achieved in the finished garment unless the plaids match, so think twice before buying a printed fabric.

Plaids emphasize the lines of the figure. Miss Roberson suggests that women and girls with full-busted or irregular figures avoid plaids and be satisfied with very small checks and plaid fabrics.

## Young Men And Boys In Court

Burglaries and forgeries, together with lesser offenses, all charged to young men and boys have had the principal attention of local criminal courts in the past three weeks.

Among the cases handled are seven based on grandjury indictments returned late in August in which three alleged forgeries, three burglaries and one aggravated assault.

On forgery indictments, defendants have not been apprehended to date.

In the grand jury burglary indictments are involved three young men, who are charged with burglary of Cooper's garage and the Marvin Cox electric shop at Lockney. They are Buddy Joe Williams, 22, a former penitentiary inmate, who is in custody at Graham, Milton Ray Carter, 23, and Roland Swilling, 21. Swilling is also at Graham. He has a previous record of conviction on felony charge.

Yesterday Sheriff Leland A. Hart took young Carter to Graham and is expected to return with all three of the defendants to stand trial here later.

Other Burglary Cases

Now at liberty on \$1,000 bond is Ernest Mallard, 18, who is charged by complaint in Justice Olson's court with the burglary of Capada theatre concession stand Sunday night, August 24. The same night three other places — Grundy's Iron & Metal, King Tractor and Hickerson Butane company were forcibly entered. Mallard is identified with three juveniles in charges growing out of these forcible entries.

Of the juveniles one was sentenced to five years in the reformatory and two were probated to their parents for three years. One of the juveniles is 15, another 14. Judge Frank L. Moore ordered that each of the juveniles report to the sheriff of Floyd county once a month (on the 13th day) for the period. The children also are required to make restitution and reparation within three months, and be at home before 10:30 each evening on penalty of being confined by the officials.

Sheriff Leland A. Hart took the boy given the sentence to Gatesville to begin serving his term.

Other requirements made in prosecuting the juveniles include a rule that the child must attend school regularly, that he avoid persons and places of bad repute, commit no offense against the state, nor drink any intoxicating liquors. Furthermore the child must be obedient to his parents and must attend the church of his parent's choice each and every Sunday.

The grand jury which was empanelled in August and returned the seven indictments sat for the first time on August 29. Bill Beedy is foreman of the body, other members of which are Carrick Snodgrass, Glen Watson, J. P. Moss, Guy Sama, R. R. Killison, J. B. Bishop, Paul Cooper, Webb Taylor, Ernest Lee Thomas and L. L. Jones.

were thus able to take ad-  
vantage of a rising market.

### Changes in 1952 Loan Program

The 1952 CCC Cotton-Loan Program has been changed so that its operation is largely handled locally. For example, (1) a producer may obtain a loan immediately at local approved lending agencies. If a loan is not available from a local lending agency, the county PMA office in the county in which the cotton was produced can make the loan; (2) a producer can repay the loan and repossess the cotton immediately, as the loan documents will be held locally; (3) a purchaser of an equity transfer can repay the loan locally.

In addition to the loan program, purchase agreements are available. A producer may obtain a purchase agreement and hold his cotton for sale at any time prior to delivery of the warehouse receipts to CCC. Warehouse receipts must be delivered by August 3, 1953. Under a purchase agreement the producer has an option to sell a specified quantity of cotton to CCC at the end of the season at the applicable support rate. A small fee is charged for this service. The producer retains ownership of his cotton throughout the season and can sell it at any time in the open market. The purchase agreement provides price protection without a charge for interest. For further details consult your local county PMA office.

### How the Loan Program Works

Who can get a loan: Individuals, partnerships, or firms producing cotton in 1952 can get a loan on cotton grown by them.

How to obtain a loan: The producer takes his classification card and warehouse receipt to a loan clerk who assists him in preparing the loan documents. To get the loan these documents and warehouse receipts are taken to an approved local lending agency or the PMA office in the county in which the cotton was produced. At either place the loan is available immediately.

Loans on farm-stored cotton may also be obtained. Farm-stored loan documents must be prepared in the PMA office in the county in which the cotton was produced. After the loan documents are prepared the loan is obtained in the same way as for warehouse-stored cotton.

Members of approved cotton marketing cooperative associations can obtain loans through their associations.

How to repay loan or sell equity in a loan: The borrower may pay off his loan and repossess his cotton at the local lending agency or county PMA office holding his loan documents. This may be done any time prior to maturity, July 31, 1953.

The borrower who wants to sell his equity in loan cotton can get an equity transfer certificate from the PMA county office of the county in which the cotton was produced.

The loan rate: 90 percent of parity as of August 1, 1952.

For Middling 15/16 inch cotton, the loan rate will average not less than 31.96 cents per pound. In Floyd County it will be 31.78 cents.

Departing Minister — Rev. J. Young has words of thanks for friends here.

Rev. J. E. Young has been called as pastor of the Fundamental Baptist church of Childress and

The minister, his wife and two sons, Don and Jerry, have made their home here the past five years, during which time he has been active in the ministry. Preparatory to taking his leave he expressed appreciation for himself and family of the help of local friends in the following manner:

"We wish to thank our many friends for their kindness toward us the past five years. We especially want to thank and express our appreciation to Drs. Bess, Smith and Pitts, Mrs. Jewel Teague, the Floydada Drug and W. U. White. They have made our stay here more pleasant.

"We also express our thanks to, and leave our love and best wishes to, P. I. Roberts and wife, Bob Finley and wife, and all the boys who are employed in Piggly Wiggly store. We have enjoyed working with them."

### FIRST SUGGESTION

The first recorded suggestion that the Earth and other planets revolve around the Sun is generally attributed to Aristarchus an astronomer who lived on the Greek island of Samos about 285 B.C. Most of his books have been lost, including the one in which this suggestion was made, but we know of it from a reference made a little later by Archimedes. However, most men continued to believe that the Earth was fixed, with the Sun and other planets revolving around it or until after Nicholas Copernicus revived and developed the ideas of Aristarchus, in a book published in 1543, did they become generally accepted.

The difference between a mirror and a woman is that one talks without reflecting and the other reflects without talking.

After a woman has had the last word she is just dying to know what her husband is thinking about.

People are taking more stock in peace. We hope it isn't watered.

## HERE'S A BIG TIP - Put Your Best Salesman to Work!

"Twas months upon end  
And all through the store  
Not a thing had moved,  
Not even the door.

The goods had been placed  
With the greatest of care,  
Still waiting for business  
That hadn't come, there.

Real situation, saddening sight,  
No sales, no profits; what a plight.  
Gotta do something quick,  
Else all the goods will stick.

It's a recognized fact  
With merchants who sell,  
They run some good ads  
Their story to tell.

So "he" stepped to the phone,  
"He" needed help soon.  
So we dropped in the store,  
Being of help, more and more.

Wasn't so bad for one who knew;  
Selling Goods is our favorite stew.  
Placed his copy in the HESPERIAN—made news,  
Things started to happen, give us our dues.

MORAL: If you want to increase sales . . . reach the most people at low cost . . . CALL No. 8 today! Those who are going out for business today aren't apt to go out of business later on.

# Baptist Church Shows Record Growth As Week Revival Plans Are Announced to Begin Sunday

First Baptist church of Floydada opened its fiscal year of 1952-53 on September 1, with the announcement of a revival meeting which will open Sunday morning next and continue for a period of a full week through the following Sunday.

Ministerial and song leadership for the meetings are announced this week as Rev. Aubrey Short, pastor of the San Benito First church who will preach for the revival, and Earl Rogers, of Borger, who returns for the second year to the church here to lead their service in song.

There will be two service daily, the first at the early morning hour of 7:30 o'clock, the second in the evening at 7:30 o'clock.

Pastor R. Earl Allen announces that the church nursery will be open for the evening service hours, thus giving mothers with small children an opportunity to attend and enjoy the revival.

**Successful Pastor-Evangelist**  
The San Benito minister, Rev. Short, who comes to the church for the week of the revival, is a successful pastor-evangelist. He receives more than 50 invitations a year to hold meetings. He is a graduate of Hardin-Simmons university and attended Southern Baptist Seminary, and holds many places of leadership in the denominational work.

Resume of the First church's activities for the year closing August 31 showed that it had a banner year in every way, and has had remarkable and consistent growth in the three years the present pastor has served the church.

**History Making Figures**  
The biggest budget in the history of the church was recorded in the year just closed. Total gifts for all causes was \$74,946.26. This compares with \$40,975.51 in the year ending in 1950 and \$39,212.04 for the year closing August of 1951. Principal figures in the gifts show \$58,684.80 for local gifts, \$16,261.46 for missions, \$5,064.99 for the cooperative program.

The church is accumulating a building fund which now stands at \$10,000.00.

**THE POLK GOES ENJOY OUTING WITH ARMY SON**  
Mr. and Mrs. Polk Goen have returned home from a 19-day trip to Lake Norfolk, Arkansas, where they enjoyed an outing and fishing trip. Dale is in the military service, in the army antiaircraft. He will leave here on September 22 for Seattle, Washington. Mrs. Goen will remain in Amarillo while her husband is in Washington.

**HALF-MINUTE INTERVIEWS**  
Dr. C. M. Thacker, "Bill Greer, the new dentist in our office, is a San Augustine county man. I told him I wouldn't norate it around."

Rev. Aubrey Short who will preach for the revival at the First Baptist church beginning Sunday, is pastor of the San Benito church.

Earl Rogers, Borger is returning to Floydada to lead the revival singing in his second meeting with the church here.

at \$20,373.94, according to the report for the year ending August 31. The church has a net increase for the year of 76 resident members, a net increase in Sunday school enrollment of 124. A record year for baptist was recorded with a total of 68. At this time there are 444 families represented in the church. Sunday school enrollment at the end of the year was 1,058, the average attendance being 475. Training union enrollment stood at 347, bible school enrollment 373, WMU enrollment 143, and brotherhood enrollment 85 men.

ada because they are based on the same general objectives — developing better understanding and fellowship among business and professional men, promoting community-betterment undertakings, raising the standards of business and professional, and fostering the advancement of good will, understanding and peace among all the peoples of the world.

Each year, this world-wide service organization continues to grow in numbers and in strength. During the past fiscal year, for example, 219 new Rotary clubs were organized in 32 countries of North, South and Central America, Europe, Asia, Africa, and the Islands of the Pacific.

# Whatley Takes First Money in Roping Contest

Red Whatley, of Crosbyton, late Saturday said he had come up to the Floydada Roping club's contest to take the first prize Bob Crosby \$250 saddle home with him. Late Sunday he left with it.

Whatley deserved the title. He roped four calves in the 27-man contest in the average time of 15 seconds flat.

For the fastest calf tied Jimmy Bird, of Post, won the \$80 silver belt buckle. He did this chore in 11.9 seconds.

It was speed all the way. The young woman who won the \$50 silver belt buckle in the girls' barrel race was Miss Florence Youree, of Addition, Oklahoma, with a total of 33.8 seconds on two rides.

There were good crowds (meaning better than average as Floydada roping and rodeo events crowds go) out for both the Saturday night and Sunday afternoon sessions of the jackpot roping contest. The first two go-rounds were roped off Saturday night, the second two Sunday afternoon. The girls' barrel race was done the same way.

There were 27 ropers entered in the four-calf event. Of that number only five men came up with four-calf totals to be eligible for the saddle. One of the reasons for the few who qualified was that the calves were scored over an 18-foot line. Lots of horses are not used to such a long score, result many broken barriers.

**Saturday Night Leaders**

## Cotton Harvest

(Continued From Page One)

**Gin Investments Bigger**  
Two brand new gins at Lockney makes six there in all this season. Two brand new plants at Lide switch, one additional at Lone Star a new one each at Barwise and Lakeview, and other plants at Floydada, Dougherty, Sterley, Aiken and McCoy will spell a big difference in the way Floyd county cotton will move to and through the gins this season.

At Barwise Jack Coffman is moving in another good gin from Goree and is rapidly completing its erection as well as housing facilities for personnel.

At Lakeview the management has discarded last year's plant and in its place put up a five stand modern gin plant. At Dougherty J. E. Newton is completely re-doing the gin plant.

The general opinion is that there will be ample labor to handle the crop. Only raisers who may have trouble is the man with poor production, whose laborers are apt to jump to heavier yielding fields. In the area around Lockney and Aiken it seems certain that a considerable population of Mexican nationals will be moved in. Growers there were well-pleased with the Mexicans they used last year under contract with the Mexican government.

Daily ginning capacity of the county's 21 gins is expected to be above 2000 bales.

# Floydada Natl Farm Loan has Annual Meeting

Floydada National Farm Loan Association stockholders in their annual meeting last Saturday night re-elected Raymond Rucker and Edell DuBois to places on the board of directors and named G. M. Watson to fill the place of Sim Reeves, who has moved from the area.

Everybody's always "misunderstood" when a considerable controversy arises as in the instance of the present Democratic political situation in Texas. Doubtless there are more "misunderstood" people to the square inch in Texas now than in a long time. If you are "going to vote her straight" you are "misunderstood" by those who are "unwilling to wear a yoke" to keep somebody from calling them a "traitor" to the party. Those who can't take the "strange doctrines" which the president and the candidates call "democracy" are "misunderstood" by those who are not kicking out of the harness. In a small community, such as Floyd, these examples of varying opinion and conviction are pointed up by the familiarity of general acquaintanceship. No reason in that for any elector to do anything but what his conscience directs. By the date of the general election, however, these "misunderstandings" could grow considerably.

Our own situation, as we see it, is that of the good old boy who has hung around home a long-long time, carried in the wood and water, helped pa about the place, let him be right some of the time, wrong some of the time, but all the time right at heart. Finally old man Democrat gets obstreperous. He pushes the son in the face, kicks him in the pants and tells him to get out or get right. It is the old man who needs to get right. Now the boy in sorrow stands around in the yard waiting for the old man to come to his senses. Is the old man listening to the wrong folks? He may be losing his mind. He talks a strange language, makes excuses for inexcusable things. The affairs are in a bad way. The clear thinking and good sense of past years has been replaced by confusion loud talk, calling names. What to do and how to do it when the old man, a good old boy if there ever was one, gets that way, makes worry wrinkles for the son, who aint going to get out and can't stay in. Then he becomes a "misunderstood" also.

Pocketbook prohibition—Excessive liquor taxes are putting a severe restriction on the American consumer—a squeeze that amounts to "pocketbook prohibition." Harry G. Serlis, president of Schenley Distributors, Inc., recently cited the fact that tax-paid withdrawals of domestic whiskey—regarded as an accurate barometer of consumer buying—declined 25,017,008 gallons in the first six months after the new \$10.50 federal excise tax went into effect. The Schenley executive also noted the total of direct and indirect taxes on a \$5 bottle of whiskey have reached the staggering total of \$3.80. This, he says, is "pocketbook prohibition," in that the tax-inflated price of legal liquor has forced many consumers out of the legal market and has brought a dangerous increase in the

bootleg whiskey traffic. Increased consumption of "moonshine" has been accomplished by the growth of a new criminal element to carry on bootlegging. And besides, said Serlis, although the purpose in raising the federal excise tax was to increase revenues actually the government received \$127,268,728 less in revenues from domestic whiskey than it had the previous six months when the tax was lower and more consumers could still afford to buy legal liquors.

Costs too much to have a fire now. Reflect on this fact and think of it not as part of a campaign trying to tell you how to run your affairs but as an idea that may save you a good deal of money. Inflation has raised the cost or replacing property a great deal. Your insurance policy will do all it can but is limited by the amount of money indemnity you paid for. The rest you'll have to dig up or go in debt for. It is the little things that start fires, the little carelessnesses. The three most vulnerable places in residences are the kitchen, the heating system, the garage, collection of rubble in basements or closets, and short circuits in electrical wiring. Any time you have a fire nowadays it is going to catch you short.

Geese flying high early in the morning, long before sunrise, and long before September more than is on its way. What's that a sign of? It's a sign for one thing that frost has already hit along the northern rim of the country and that frost-bite has already made itself felt in the climes where the geese have just finished their summer play. Enroute south they are supposed to spend sometime on the plains but not many of them will find a good stopping place anywhere in this vicinity. On to the gulf coast and on out to the palm-fringed beaches of never never, far far away.

A good friend, who reads Capper's Weekly or some other good farm literature, also has some first class signs of his own, has it estimated that the rains will begin about September 22. He says it won't hurt cotton but mighty little, will make post toasties out of late feed and will put the wheat farmer back into business. The wheat man certainly has his land in good condition from the fortunate mil-summer rains, some more of which he now dearly craves.

A friend has submitted the following which he thinks is a good thing to reflect upon: Two commandments (law of God,) 28 words; Lord's prayer, 56 words; Gettysburg address, 266 words; Ten Commandments, 297 words; Declaration of independence, 300 words; O. P. S. order putting price on head of cabbage 26,911 words.

## As A Farm Woman Thinks

(by Nellie Witt Spikes)  
Life's not all light and sunshine. Nor is it all joy and cheer. For each has its share of worries. His share of doubt and fear.

Seems that life's just a pattern Like the patches on a quilt. And bits of shade and sunshine Are the squares from which we're built.

All the sunshine squares are pretty. While the shadow one are plain; But you know just how much brighter Is the sunshine after rain.

And you know that the pretty patches Simply never would be seen. Were it not for the plain ones. Sewn so neatly in between.

These bright days are so full of work and interest. Tomatoes are filling clear glass jars, orange-red. I place them on the shelf by the jars of green beans and brown black-eyed peas. They also keep company with the deep purple of the grape jam and the red, red

caroon grape jelly. There won't be any juicy pears on the big pear tree this fall, but there are some peaches. Yesterday we went out to Wilda's to get some peaches and when we got there no eager little girl and boy came running to the car. We went to the peach tree and there they were, busy gathering us some peaches. "Grandmother," breathlessly said Margaret Nell. "When we saw you coming it seemed we had a hundred hands, we worked so fast."

Mike, our niece's son, had it lucky last week, even if he had to go to the big city to see a doctor. As he went through the house, his mother, Lois Omega, handed him a dollar bill. He went on into another room and his daddy, T. Graves, handed him another dollar bill. Mike then made this statement to his folks. "That is what I call good citizenship."

Our little grandson, Billy Lowell Wheeler, has been wanting a baby brother like Margaret Nell and Dale have. He told his mother we do other day. "What would we do with him?" Wilma asked. "We would have to stay at home, not go to the variety store or to the show." Billy thought this over and his face lit up as he said, "Why, we could take him over and leave him with grandmother."

Today we are saying goodbye to a friend of long, long years, C. F. or as we loved to call him, Laim Carmack. A pioneer of Crosby county, a pioneer Methodist circuit rider, a staunch friend, a grand father to his children, a loving faithful husband, one who loved his Lord and followed him in rough as well as smooth paths. The words of Ruskin came to our minds as so very fitting to this good man, as we know he builded well and forever:

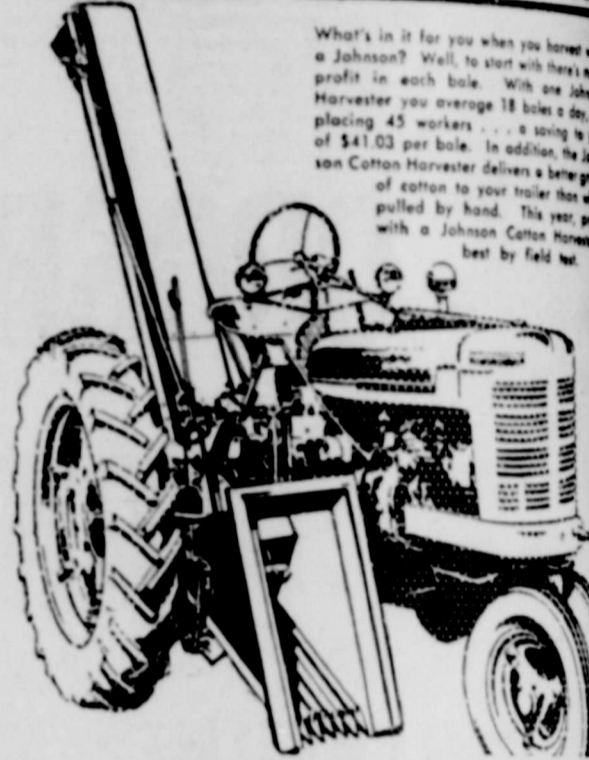

"THEREFORE, when we build, let us think that we build forever—let it not be for the present delight, nor for the present use alone. Let it be such work as our descendants will thank us, for and let us think as we lay stone on stone, that a time is to come when those stones

will be sacred because we have touched them and we will say as they look upon them, See, this our fathers' us."

Good thought for the heart than reaching down to bring people up.—John Ruskin

### Capada to Show 'Outcasts of Poker Flat' Sun., Monday

The Texas Department of Agriculture... One of the steps taken by the Texas Commissioners of Agriculture was the joint appeal with state officials for emergency relief from the federal government.

Angs more of the smaller operators will be wiped out. A program has now been developed which will make hay available at reasonable prices in order to encourage farmers and ranchmen to retain stock which would otherwise be uneconomical.

Present plans call for the delivery of hay directly from railroad cars. The county committee will arrange with local feed dealers to supervise the unloading and delivery of orders.

'The Outcasts of Poker Flat.' Twentieth Century-Fox's new suspense western based on the classic Bret Harte story...

Set in the raw, lusty, violent California gold rush era, the Harte story narrates the gripping account of four outcasts - a misguided girl, a professional gambler, the dance hall queen and the town derelict...

Anne Baxter returns to the screen after a short absence to play the wayward girl who seeks happiness in the arms of the gambler.

Dale Robertson incorporates his rugged personality in bringing the gambler to life. Making one of her rare film appearances, Miriam Hopkins plays the caustic "Dutchess," bitter and resentful towards life.

### Harve Pennington Is Newest Victim Infantile Paralysis

LOCKNEY - Harve Pennington of Lockney and Ted Chapman of Sterley are new Floyd county victims of polio, but neither are seriously ill, it was reported last Wednesday.

Mr. Pennington, local business man, became ill Saturday and was treated by local physicians. His illness continued and Tuesday a spinal tap revealed that he had a mild case of polio. He is now in the polio ward at the Plainview hospital and will probably have to stay there for another week, physicians say.

Ted Chapman of Sterley was admitted to the polio ward Thursday of last week. He is 45 years of age and is employed by the South Plains gin. He has no paralysis. Chapman's son-in-law, Carl Brewer of Sterley, was admitted to the polio center September first and was dismissed this week.

Chester Mitchell, left, and Frank Lee look over fine field of vetch. "This vetch really does wonders for the soil," Mitchell said.

These registered Beef Type Shorthorns graze on vetch pastures. Original foundation for Mitchell's herd came from Tribble Brothers, Seward, Oklahoma.

## Registered Cattle, Pastures to Match Make Profits More Certain

This story written from Floyd county, Texas, South Plains  
By Sam Whitlow  
Texas Editor, the Farmer-Stockman

I knew Chester Mitchell years ago when he was a county agent—and a good one—in Oklahoma. But I also know that pretty soon he would move back on his farm in Floyd county in his native West Texas. And that's exactly what Chester did.

Today Chester Mitchell is a diversified irrigation farmer. His operations include Shorthorn cattle, alfalfa, cotton, milo, and Duroc hogs.

When he moved to the 240 acres of irrigated land in 1946, he started work to balance his crop and livestock operations. In 1947, he started in certified milo seed production, in co-operation with the Lubbock Experiment Station and the Texas Certified Seed Growers. This year, he had about equal amounts of Redbire 6 and Martin Milo—about 60,000 lbs of each variety.

"Growing good seed is just as important in a good farming program as a good bull is on a cow herd," he observed.

Mitchell grows only storm proof varieties of cotton—Macha and Stormmaster. The Stormmaster, a new variety recently put out by the Lubbock Experiment Station, is "very good and adapted to the cotton stripper, which I use almost entirely."

Since 1946, he's been growing registered Duroc hogs. "I am trying to balance my farming with both livestock and crops. It has been a losing proposition the last 2 years because cotton has been so profitable, but I am gambling that this balanced program will stand by me when times change and the going gets rough," he said.

Now let's talk about those Shorthorn cattle, because Chester is really interested in them. He has developed his herd of about 25 head of registered beef type Shorthorns from 6 heifers purchased in 1946. One of his bulls placed high in the Shorthorn Show and Sale at Fort Worth in January, 1952.

When he was a county agent at Othello, Okla., I visited many vetch fields with him and heard farmers

sing extravagant praises about the crop. Chester is still singing vetch praises, and uses it abundantly for feed.

In May of this year he had some of his cattle on 12 acres of vetch, and the cattle couldn't keep it grazed down.

The vetch was seeded the first week in August of 1951 at the rate of 20 lbs. of seed per acre. It was seeded on bench leveled ground, and irrigated.

"Vetch really does wonders for the soil," he observed.

Chester has 20 acres of grass under irrigation. The important thing here is that he can get water when he needs it and where he needs it for pasture, thereby keeping his beef production on a progressive basis.

Which is most important—good cattle or good pastures? Mitchell says they're both important. Good cattle will do better on good pastures. Or to put it another way, if you're going to have registered cattle, why not have registered pastures? The registered pastures can be attained through good management.

True, you can't get papers on a registered pasture like you can on cattle. But registered pastures do have a certain type of registration papers—more greenbacks coming to the farmer that can be neatly filed away in the pocketbook.

Mitchell works hard at his farming operation, but he enjoys it. The success of his work is reflected in his selection as the Outstanding Conservation Farmer in the Floyd County Soil Conservation District in 1951. This was in connection with the "Save the Soil and Save Texas" program.

### Drive-In Eating Place is Opened

The Skinny Winns have added something at their East Highway 79 Lunch Box cafe. It is a drive-in food service.

Winns this week said they are featuring chicken in the basket and burger basket.

A considerable gravelled area, with a serving entrance has been added on the west side of the premises to accommodate cars in numbers at the Lunch Box for those who want to be served on the outside.

The only thing harder than paying bills is collecting them.

## Story of Long Journey East Is Concluded

(The briefed story of his journey to the Holy land is here concluded by R. Earl Allen, pastor of the First Baptist church. Delayed by pressure of many affairs of his church, it was intended for last week. The period of his stay in Israel is covered in this chapter. The pastor's trip was made possible by a love offering of members of his church and other friends. — Ed. Note.)

By R. Earl Allen

The journey from Amman to Jerusalem was conducted late in the evening in some 17 cars. The modern limousines weaving among the ancient hills was a sight of contrast. When we came to the Allenby bridge that spans the Jordan river we realized fully that we had arrived at the Holy places of Jesus. The river is not very wide but deep and its current is swift in the deeper areas.

We saw the place traditionally known as the place of Jesus baptism. We tried to visualize the happenings 2000 years ago when John the Baptist was preaching the Gospel of Repentance. Later we were aroused from our meditation and hastily took our pictures and made ready to start the ride to Jericho.

Particularly is Jericho enjoyable to the christian making a pilgrimage. Modern Jericho is built close by where the archaeologists have made their diggings of the ancient city. We had our first opportunity to observe the scientific work of biblical archaeologists. It was a most interesting sight to see the earth open up and reveal the rooms of yesterday's houses. It was late in the evening when we came upon Jericho.

### The Walls of Jericho

Three places crowded our time for emphasis. One was the huge tree with branches that overhung the highway, where Zacharias was waiting for Jesus when he made his journey to Jericho. The highway is higher than most of the city, hence not in the section that is being uncovered. Another interesting sight to anyone, who has biblical interest was the diggings that have uncovered much of the walls that fell when Joshua blew his trumpet at the command of God and witnessed the walls of Jericho collapsing. The third sight that was thrilling and filled in understanding of bible statements was witnessing the people of the village at evening time coming to the well for water. Many people with their animals waited their turn for water with every conceivable container imaginable. There were metal containers in sight as well as many bags made of animal skins. The hides of sheep made into water bags were plentiful. Mostly the crowd was made up of women and children with a few men around visiting with one another.

### Viewing the Dead Sea

We arrived at the Dead sea just before dark. It is reported to be the lowest spot in the world, being some 1300 feet below sea level. It reminded you of a huge bowl, put there to catch everything that comes in that direction. It is called the Dead sea as it only receives water and gives none out. Anything or anyone is dead to use or life if it only receives and gives nothing back. The sea is very salty. From the sight there by the shores the mountains around look much higher because of depth below sea level.

We started the climb toward Jerusalem. This is the road that Jesus talks about concerning the Good Samaritan helping his neighbor on the road to Jericho. The journey is very steep as you are below sea level and have to climb more than 2000 feet above sea level to Jerusalem. The words of Jesus, "A City that is set on a hill cannot be hid," comes into your mind as you glimpse your first sight of Jerusalem. You can see it for many miles. It is a wonderful sight to a weary traveler. It was very late when we had our first meal in the small hotel near the Mt. of Olives. The weather in and near the city of Jerusalem is much like our own. The days are hot, but the nights are generally cool requiring a sheet for comfortable sleeping.

### Three Days in the Walled City

We spent nearly three days inside the old walled area retracing the steps of Jesus. Traditional accounts are often confused with fact. This is acceptable to the casual tourist, but many things are viewed with question by any bible student. The old Arab city is a dirty crowded mass of human faces. The little streets are narrow and you must press the walls to permit the donkeys to pass. There seems to have been no changes. When you pass into the walls it is something like pulling a curtain that has hidden a city that for 2000 years has been unmindful of any changes in the world. You can see commerce carried on in its ancient traditions and customs. Poverty, disease and suffering are evident here as elsewhere in the eastern world. The police go with any group of tourists to keep begging children and adults from completely surrounding you. A person is blind if he thinks there is no suffering in our land, but never have we seen such poverty and suffering so universal and so desperate. It seems that there is no solution for the ills of any nation or people whose forefathers forgot God. We went to the Church of the Holy Sepulchre as well as the tomb outside of the city wall and viewed the place of the skull from the garden by the tomb. The Garden of Gethsemane and the Mount of Olives tugs at the christian heart.

### Bethlehem and Bethany

It is impossible to list all the bible places of interest as every place is important in this area. There are a few excursions that we will endeavor to list. The trip to Bethlehem and to the place of Jesus' birth is important. We saw the "Fields of the Shepherds" as well as the church. We spent one night here which was by far our most uncomfortable. The group sang Christmas carols here but few seem to understand their meaning and none seem to grasp their message.

Greatly did we enjoy our trip to Bethany, where Jesus spent many hours in the home of Mary and Martha. We also went into the tomb of Lazarus.

The trip to Samaria was of interest. There we saw Jacob's well where Jesus talked to the woman Samaritan. You can see the mountains that were included in the conservation. Many things of Old Testament interest are found along this road.

Finally we went to The Frontier, Mandelbaum Gate, to cross over from Arab Jerusalem that is a part of the Hashimite Kingdom of the Jordan to Jerusalem, Israel. We had to make our way with our bags across "No Man's Land" into Israel. There you know the feeling that exists between countries at war.

Jerusalem, Israel, for the most part, is as modern as Arab, Jerusalem is ancient. In few places in the world can you glimpse such a contrast. The Arabs remind you before you make the trip over that if the United Nations and the wealth of the Jews in America were at their disposal, they, too, could have a modern nation. You do not know how much of this is jealousy and how much naked truth.

### The City of Tel Aviv

Our trip was hurried in Israel because of the late crossing of the border. We had our lunch in the modern Y.M.C.A. and then made our way by orange groves and irrigated farms by bus to the modern city of Tel Aviv. We finally reached Haifa late at night, which was place of destination for the night. Never was the group more weary, but we were never more rewarded for a long drive than when we stopped our bus on the hill above the city and looked down on the lights of the city and harbor. We have never seen a sight more beautiful.

The next day we went to Nazareth where we visited the boyhood places of Jesus. We also had a good visit in our Baptist church there as well as our school and the George Toett Orphans home. We found that one of the missionaries was a former pastor at Miami, Texas. We continued our trip to the beautiful Sea of Galilee by bus and then by boat to the ancient city of Capernaum. Close by we could see the Mount Beautiful. We finished our day by going to the Lydda airport which is one of the best in the world. We stayed in small rooms above the airport. It was our best bed in days but our rest was somewhat disturbed by the huge airplanes flying through our room to various places of the world.

Our flight was made from Israel to Athens. We had our most severe heat there. It was one of our greatest thrills to go to Mars Hill, where Paul preached his famous sermon to the people of Athens. There were many things of interest close by. Corinth was a days trip. Many of the pagan temples have been somewhat restored. Athens will be remembered as the birthplace of foreign missions. Many Americans are here under the U. S. government employ of the American mission. We also visited the Rotary club here as we did in other places.

### On the Way Home

Because of the heat, more of our party became sick here than all the other places together on the trip. All were glad when it came time to fly out to Switzerland.

Switzerland was the most beautiful land that we saw. It was a huge resort. It is a neutral land and has never known the debts or scars of war. We also saw much of churches and schools that had a part in the Reformation led by Calvin and Knox here while Luther led the movement in Germany. We saw the League of Nations and the headquarters of the International Red Cross. Also we had a trip into Germany while here.

We flew from Geneva, Switzerland, into London. London was a place of many interests. There are many scars of war evident here now. We saw the parliament buildings as well as Westminster Abbey and also viewed the colorful changing of the guards at the palace. One of the most interesting trips in London was our visits to various churches made famous by preachers of yesterday. G. Campbell Morgans church has been restored. The Spurgeon tabernacle is still in ruins. No one since Spurgeon needs that large a building. Also we visited Spurgeon's College, which is the seat of Baptist Education in England.

A delightful trip was made to Shakespeare's House at Stratford upon Avon. We visited Oxford university along with many places of religious history. Many places in the life of John and Charles Wesley was visited. There were many important places left to see, but we were not disappointed when it came time to fly home.

Thankful in heart, the group approached the Statue of Liberty and New York City. I bought no real estate over there and Dr. Thacker

# Trample Antelopes Season

Whirlwinds blew both in Post Friday night game as the Antelopes and the Winds played some of the most exciting football at times and some of the most spirited. The Antelopes were a spirited team of fight but lacked in most positions.

The game was played in front of a large crowd and was well represented. The game was marred by many anxious boys and girls in the rule book much to do with the defense held the Antelopes on all occasions with

the exception of one drive in the third period. Floydada received the opening kick on their own 16 and Carmack got no return. Helms picked up 2 and Stone intercepted the Winds pass on the Floydada 32.

Post then lost 4 with Evans carrying, brought down by Clark. Long made 2 down the middle. Reddy dropped Stone for 3 yards loss. Stovall set back Stone five more and ball went over on downs.

**Scampers 68 yards**

With Winds in possession Helms picked up 5, Bearden made 1 and Clark went around right end with some good blocking and some nifty ball carrying on his own part and scampered 68 yards for the first tally. Carmack's kick with Bearden holding, was wide — score 6-0.

Floydada kicked to Post on their 20 and Stone returned to 30. The Winds then held for 3 downs and Carmack recovered an Antelope fumble on the Post 35. From the 35-yard line the Winds then drove to pay dirt making 3 first downs and drawing 20 yards in penalties enroute. Carmack scored on a quarterback sneak from the one. Kick for the extra point was again wide. Score Winds 12 - Post 0.

Post received the following kick off and on a series of plays and penalties picked up a first down before getting into trouble and punting out.

**Scores on Returned Punt**

Helms took the punt on the Floydada 15 and with some good blocking and maneuvering he burst into the clear and went the distance. Helms then attempted to circle right end for the point after but was stopped short, and the score remained Floydada 18 - Post 0.

After Carmack kicked off to Post on their 15 the Antelopes were held and forced to kick. The Winds took the ball on the 31 and made little yardage and the ball over to Post

on downs on their 39. Stone then hit Evans with a pass for 5 and on the next attempt Bearden intercepted on the Winds 30 to stop the threat. Floydada was penalized 15 yards and Bearden was sent to the side lines. The Winds picked up 3 yards on running plays and punted to the 40. Post failed to make a first down and the ball went over on the 36. Floydada made 5 and punted to the Post 30. The run back carried to midfield but a clipping penalty set the ball back to the 35. Two incomplete passes and a line buck netted no yardage for the Antelopes and the half ended 18-0.

**Defense Play Is Rugged**

The third quarter was a see-saw affair with rugged defensive play by both teams. The Antelopes got rolling on a drive late in the quarter and with the aid of penalties pushed over a score. The scoring play was a pass from Stone to Evans from 6 yards out and Stone made the TD. Score 18-7.

In the opening of the fourth period both clubs had trouble on the offense with the ball changing hands on an intercepted pass, fumble, punt and fumble until the Winds got possession just outside the Post 30. From here a drive got under way and 9 plays later Helms scored from about the 2 yard line. Carmack drove over for the extra point. Score 25-7.

Post received the following kick and picked up enough yardage for a first down on three line bucks and an off-side penalty. Dunn of Floydada and Evans of Post were removed from the game at this point for rule infractions.

**Scores on Interception**

On the next play Clark intercepted Stone's pass on the Post 40 and treaded his way to the goal line. Clark then battered over the point after and this ended the scoring for the night. Floydada 32 - Post 7.

The game ended a few plays after the next kickoff, after Helms had been benched for the Winds.

Floydada was penalized 15 yards. Post threw an incomplete pass, and Stone made 10 yards around end.

In the first down department Floydada made 9 to the Antelopes 7. Floydada was penalized 15 yards to 35 for Post. The Winds gained 202 yards rushing and 15 yards passing to 94 yards rushing and 11 yards passing for the Antelopes. From scrimmage Floydada lost 16 yards and Post 18 yards.

Starting for Floydada were Brooks Chapman, Kerwin Baxter, Lewis Reddy, Don Barber, Berf Grimes, Charles Hartman, Franklin Stovall, Billy Carmack, Adrain Helms, Connie Bearden and Dane Clark.

Also entering the game before the end, and playing a considerable amount of the time for the Winds were Gordon Joiner, W. J. Hartline, Billy Baker, Stanley Vickers, Jackie Henry, Glad Norman, Jackie Jarrett, Bobbie Carmack, Jimmy Dunn, Zack Cummings, Ronnie Tip-ton, Jack Womack, Walter Simmons, Waldo Baxter and Kent Covington.

### 'What Price Glory' Famous Play Re-Do Coming to Palace

Next week — Wednesday, Thursday and Friday — Floydada picture show fans will see "What Price Glory," a modern re-do of the great play that emerged from World War I, in which are seen the immortal Captain Flagg and Sergeant Quirt, at the Palace theatre.

For yesterday's audience grown up the new picture will stand well in the comparison with the first of the title. For the younger trade it will be a dramatic comedy of war and men and all that goes with it. Basically the story is a comedy of the rip-roaring rowdy kind. There is, too, the underlying feel of horror, the futility and manpower waste of war.

The picture is rated excellent as a box office attraction in the Reviewer's rating. James Cagney is Captain Flagg and Dan Dailey is Sergeant Quirt in the new version. Corinne Calvet is the Chairmaine of the story.

Jack Deakins, manager of the Palace, has booked the show for three days and believes it merits the third day showing here.
