Americans Are Rolling Up Their Sleeves!

PLUMBERS AND WAITERS AND PHONE OPERATORS...

All Kinds of People Are Giving Blood So That Our Wounded May Live! BUT—WHAT HAPPENED TO THAT PINT OF BLOOD YOU WERE GOING TO GIVE?

There is no ceremony to mark the occasion when you give blood. No brass bands... no waving flags... no medals. A volunteer worker simply thanks you—and away you go!

But this you carry away with you: The pride that comes from an unselfish act, the good feeling of being an American who has held out a hand to an American who was wounded in battle. Money can't buy that wonderful feeling!

In hospitals—at home and overseas—the need for blood is urgent. Many men require four and six transfusions during delicate operations. So give the most

precious gift of all—the gift for which there is no substitute—*your* blood!

Be assured that giving blood is neither difficult nor distressing. It can actually be a soul-satisfying experience because it will give you the deep, sincere feeling of knowing that because of you, a wounded man may live to smile upon the world again.

under the guidance of the Junior clubs, and the new department of Americanism, so vital in the thinking of every citizen today.

Mrs. Roy Lindsay of Berger is head of the new department on Americanism and introduced the keynote speaker of the day, J. Everts Haley of Lubbock. In keeping with the theme of the day, Mr. Haley spoke sincerely and enthusiastically on the three guaranteed privileges of every citizen of America: Life liberty and the pursuit of happiness. In our country, the individual is supreme and the individual must have the right to work out his problems and his life to the best of his ability and in whatever manner is best suited to his capabilities, said Mr. Haley.

"After our constitution and bill of rights were drawn up, the government was instituted among men in order to secure the just rights of individuals according to these documents and not to restrict or limit them in any way," concluded the speaker.

A few of the projects discussed during the meeting were: the making and sending of U.S.O. scrapbooks to be distributed among our fighting men, the sending of warm clothing, coal and food to Austria; greater emphasis on our family liv-

the Quarterback club says a "must" meeting of the club will be held sometime in the hour from the opening of the pep rally and the beginning of the football game. He wants every member of the club who possibly can make it to be present. It will be a short, snappy business session, he said.

NEW CONCEPT OF CAUSE OF MIGRAINE HEADACHES TOLD

A new concept of the cause of migraine headaches—that they are the result of the disrupted equilibrium between love and aggressive or hate instincts—was expressed by Dr. A. R. Furmanski, of Van Nuys, Calif., associated with the Ross-Loos Medical Group, Los Angeles.

The basic incompatibility of these instincts requires that they be alternately expressed, or that one become dominant and the other inhibited, Dr. Furmanski stated in the Archives of Neurology and Psychiatry, publisher by the American Medical Association.

As long as this compromise can be maintained little conflict results, he said. However, when certain needs are frustrated or the aggressiveness stimulated, the equilibrium is disrupted by the increase in hostility, and a migraine becomes manifest. This hostility is sometimes an unconscious one.

Dr. Furmanski based his theory on a study of 100 persons suffering from migraine, 65 of whom were women, and 35 men. The duration of the migraine ranged from one year to over 30 years, and appeared from between puberty to after the age of 40 years.

Article Says Strip-Mined Lands Will Support Trees

"How Strip-Mined Lands Grow Trees Profitably"—That is the title of an article recently published in "Coal Age" magazine and written by Glenn H. Deitschman and Richard D. Lane, of the Carbondale, Illinois, Forest Research Center, Forest Service.

Written in non-technical language the article briefly points out the possibilities of growing successful forest crops on stripmined areas. Research has shown that the growth rate of trees planted on these areas is equal to or better than that of the same trees on unmined land. An indication of the future value of these spoil bank plantings was recently

obtained from a small experimental plantation in a 20-year-old pine plantation in Indiana. Although the trees were immature, the harvest of posts and poles returned a gross income of \$335 per acre.

Up to 1950, the coal companies in Illinois had planted more than 12 million trees on 11,246 acres of strip-mined land. Many of the earlier plantings are coming to the age where cultural treatments, such as thinning and pruning, will be needed to maintain a rapid growth rate and eventually produce high-quality timber. Studies of proper management methods in these plantations are soon to be initiated by the Carbondale Research Center, in cooperation with the coal companies.

Mrs. Zeb Lee, of Lubbock, spent Saturday here, a guest in the home of her parents, Mr. and Mrs. W. O. McNeely.

PROCLAMATION

Office of

FRANK L. MOORE, JUDGE
OF FLOYD, STATE OF TEXAS

It has been called to my attention by the citizens of Floyd County that the rare privilege of donating blood to our sons and brothers — the men — in Korea, in the two-day

on Friday, October 16, at Lockney; on Saturday, October 17, at Floydada

by the Bloodmobile of the Armed Forces, under the leadership of the Floyd County Chapter, Red Cross, is asking for 300 pints of blood to be assembled quickly and sent to the Korean front;

Therefore, I, as County Judge of Floyd County, Texas, urge that every citizen of our county make himself available for the purpose of donating our full share of blood to our sons and brothers; and that each of us arrange his affairs so as to facilitate the greatest contribution to this enterprise;

Let this proclamation officially to the citizens of Floyd County as a notice of our responsibility for the lives of our men and women in Korea, whose very lives may be dependent on our liberal attitude on this matter.

IN WITNESS WHEREOF, witness my signature this 9th day of October, A. D. 1952.

FRANK L. MOORE,
County Judge, Floyd County, Texas

Americans are Rolling Up Their Sleeves

Yes, all kinds of people are giving blood so that our wounded may live!

But -
WHAT HAPPENED TO THAT PINT OF BLOOD YOU WERE GOING TO GIVE?

It's a fine thing to give blood—and it gives you a wonderful feeling. The deep, inner-satisfaction of knowing that you have helped make it possible for a man to live.
Right now the need for blood is urgent in hospitals at home and overseas—many men require four and six transfusions during delicate operations. And the blood must be there—when it's needed. So give the most precious gift of all—the gift for which there is no substitute—your blood! It will flow back into the veins of a human being, give him a new lease on life—help him along the road to recovery.
If you have already given blood, you know that it is neither difficult nor distressing. So—mark your calendar and donate again. And tell your friends and neighbors about your experience. Let them share the wonderful feeling Americans get when they roll up their sleeves—and give blood.

Views and Comment

The political arena is going to be covered with a considerable bit of fur before the general election on November 4. Nearly all the preliminary shots have been fired, and the heat is being turned on now. President Truman has the best record of name-calling of any of the national figures who are participating, but the general and his aides have called in some good adjective men and barb-makers and are expected to balance the thing up by the end of the campaign. Danger of the heat of the campaign is that the participants in the struggle for the presidency may wind up with a considerable percentage of non-voting cynicals. These may decide just not to participate in the election. If so, they will join the millions who have regarded the general election with jaundiced eye in times past. The country needs for all to vote. A majority of the great mass of the people, by and large, have a way of being right fundamentally. By the nature of things the campaign has to become acrid, but it will be regrettable if the going gets so torrid as to drive people from the polls in disgust.

Reading Reports of various speeches in the past week you see where Speaker of the House Rayburn is credited with conjuring up some new phrases to express himself in the struggle for the mind and the vote of John Q. Public in Texas. The speaker is, we have thought, a quiet, effective campaigner. The ghost writers, if any he has, put a new twist in one of his recent speeches. He refers in it to the opposition in the Democratic party as "fat cats and money bags." Mr. Rayburn has returned to Texas to take charge of the national campaign. Many of the younger men in the party are in rebellion against the national ticket. It is Speaker Rayburn's job to whip their ears down.

Part of the spanking being administered to Governor Shivers by the national administration is in the administration of the relief loans and the feed-at-cost program for the farmers and cattlemen in such dire distress for feed in portions of the state. These men with their backs to the wall and fighting for their very financial salvation, are in position to be greatly influenced in their thinking by the way and by whom the feed relief program is administered. The federal department of agriculture has some regional man dishing out the relief, giving out the interviews and reporting on the situation. The governor of the state would be getting in the headlines taking the credit for leading this humane effort were the political situation different.

The general election ballot is being whipped into shape for the opening of absentee balloting which can begin on October 15. The ballot will have eight columns this year—Democratic, Republican, Prohibition, Progressive, Christian Nationalist, Constitution, Independent, and Write-in.

"Write-in" is for the man who "wears no man's collar," meaning he is just pretty well a political dissident. Always there are one or two votes in every county out in this last column. Wonder to us is how easy it is to get a party organized and candidates put on the ballot. The die-hard Democrats who wanted a "Texas Democratic" party couldn't get the

job done but the Christian Nationalists, the Constitution, the Prohibition, and the Progressive parties did it. Of these a baker's dozen will be the figurative sum total of their votes. The Prohibitionists will get more than any other of these four named. There is a considerable belief of some pretty good people throughout the nation that prohibition would solve most of the social ills of the country. They are either wrong or prohibition was bungled by the authorities when we had it.

The Ballot form will have definite instructions on how one may vote in Texas. For the candidates you can follow the old Texas style of marking out the candidates you want to vote against and leaving the ones you favor. Or, if you are a modern or come from Oklahoma, you can use the check mark in front of the names of your choice, for which provision is made. But on the amendments to the state constitution (there are two) you can use only one method, that is the old style "scratch or mark out one statement so that the one remaining shall indicate the way you wish to vote."

Of the state candidates in the general election in November, John C. White, the young commissioner of agriculture, was the only one who refused to permit the state republican party to name him as their candidate for office. All the others did not object (You had to refuse to let your name be used, otherwise it went on the ballot.) There is a difference of opinion as to the effect of this in the future years if one has political aspirations. But most of the state candidates went on the theory that it is not good politics to refuse to let anybody vote for you that wants to.

Friday Night's ball game will be a good time for a man who wants to know how many football fans there are in Floyd county, to come along and bring his automatic counter. When Lockney and Floydada high school teams lock up in county championship battle those who do not attend are immune to football fever or are incapacitated by illness. The two athletic funds ought to "get well" if the expense bill is not too high. Football is running into the high cost of doing business, the same as other types of activity that involves hiring hands and the like.

The suggestion has been made (and most everybody has thought of it at one time or another) that the Lockney and Floydada school authorities ought to get together on their football calendar and avoid scheduling games that would be in conflict. The two coaches usually have to make up their calendars of 10 games somewhat as the available opposition will permit. The arrangement to have the teams playing at home and away from home alternately would pay off at the gate because the attendance at the home games would not be divided. And as most everybody knows the average high school athletic fund always needs all the help it can get. The coaches are up against a proposition of having to do as they can do, however, in the matter of scheduling games.

Worrying is like sitting in a rocker. There's a good deal of agitation without getting anywhere.

AMERICANS ARE ROLLING UP THEIR SLEEVES!

Co-Eds and Actors and Building Contractors—All Kinds of People Are Giving Blood So That Our Wounded May Live!

But —

WHAT HAPPENED TO THAT PINT OF BLOOD YOU WERE GOING TO GIVE?

Today's medical and surgical techniques are sending back more and more wounded men to lead normal, constructive lives. These techniques require repeated transfusions of whole blood for operations, for skin grafting, for plastic surgery. That's why America has been asking for voluntary blood donations at the rate of 300,000 pints a month.

But . . . the quota is far from being filled.

That's the picture. And now that you know it, we think that you, too, will thoughtfully give your blood.

Be assured that your Red Cross, its nurses and doctors, will allow you to donate only if you are physically capable of doing so. As to after-effects, any doctor will tell you that you'll continue to feel fine—that your body quickly and easily manufactures lots more new blood to replace that which you've given. In many instances, people say that giving blood has helped them feel better; sharpens appetites, and makes them feel "simply wonderful!"

So make your appointment before you leave on vacation. Roll up your sleeve along with all the other Americans who give the gift for which there is no substitute—life-giving, health-giving, joy-giving blood!

Winds Defeat Dragons 52-0 Using Combinations Click

Watson's Whirlwind and around the Friday night game. The Dragons dominated the play and defense from the whistle. It was the game on their home ground. The Dragons were down to the last kick on a single play. The Paducah captured three first downs. The Winds it was a touchdown parade with almost everyone getting into the act. Quarterback Billy Carmack was the offensive star of the game as he ran for one touchdown and passed for five more. Penalties kept this number from being even higher as two long runs were called back against the Whirlwind quarterback and also two passes to Brooks Chapman went the distance and were then nullified by the officials.

Start Passing Offense

The scoring got underway in the first period after the Winds ripped off several nice gains on running plays with Clark and Helms carrying only to have them called back on penalties. The Dragons then

DANE CLARK—wearing No. 46 for the Whirlwinds is their hard running fullback. Dane has been recognized over the area as an outstanding back, and has scored 43 points this season for the green and white.

pulled their defense up tight to try and stop the hard running 'Winds' Franklin Stovall, the 'Winds' master mind at calling the shots, then decided to try and loosen things up a bit and Carmack shot a pass to end Chapman who had worked his way down field about twenty yards. Chapman took the heave on the run and never let up until he had sped 64 more yards for the first TD. Carmack's kick was good and the score was 7-0.

The next score came in the first quarter also and found Carmack back to pass. None of the receivers got in the clear so he tucked the ball away, found some good blockers in front of him and took off for the promised land 53 yards away. The kick was no good. Score 13-0.

Half Score is 26-0

In the second period the Winds mixed it up a bit with Clark and Helms carrying and drove to two more TDs. On the first Clark drove from the 2 and the point was no good. Helms added the second on a nifty 45 yard scamper. Carmack's kick was good and the score at the half was 26-0.

Only one counter was made in the third quarter and this was a Carmack to Bearden pass good for 27 yards and a score. The kick was good this time and the score stood 33-0.

By this time the Winds were content with their passing game and only ran an occasional running play. Carmack to Chapman 40 yards and TD. Point was missed. Carmack to Stovall 37 yards and TD. Point missed. Carmack to Stovall 57 yards and TD. Point good and final score Floydada 52—Paducah 0.

Defense Is Good, Too

For the record the Winds made 15 first downs, were penalized 60 yards, completed 9 of 15 passes for 271 yards, gained 283 yards rushing and lost 23 yards on set backs for a net gained rushing of 250. On defense they yielded 53 yards

on running plays but threw the opposition for losses amounting to 42 yards leaving a net gained of 11 yards rushing and 2 of 6 passes gained 12 yards.

The 'Winds' have gained area-wide recognition with their fine play this year. Standouts mentioned have been mainly in the backfield. The line play and all around blocking and tackling have made it difficult to mention others on the team without naming all of the team on many of the plays. A defense that has yielded more yards to the officials than to the opposition speaks for itself. On every pay-off run there are the boys up front and down field to lay the ground work.

All the boys who made the trip for the 'Winds' got into the game before it was over and all gave a good account of themselves.

'B' Squad Loses to Spur

The 'B' squad lost a scrimmage contest by a long score to the Spur 'B' team 52-7 last Thursday night. The Spur team was a big fast crew made up mostly of reserves for their first string and handled the Floydada boys fairly easy. The Floydada team was made up of freshmen and sophomores who play a regular schedule of games and do not suit out on Friday night.

Andrews Ward—1 Win, 1 Loss

The Andrews Ward boys broke even at Plainview Thursday night. The eighth grade won 20-0 with Wayne Smith carrying the mail and Robert Stovall the backbone of the defense. The seventh grade lost 12-0.

HELPING BUILD WEST TEXAS SINCE 1927

We are doing our best to sail a straight course over the sea of time toward a New World ruled by Peace, Love, and Justice. Though, at times, this land may seem far away, we must hold, with faith and courage, our course.

The message of Columbus comes to us clearly across the centuries—“Sail On.”

Anybody care to run for this office?

Candidate Wanted: Must be efficient, honest, experienced. Pay and term of office uncertain, since public will vote every day to see if candidate stays in office.

We bet you don't want that job of being forced to get elected every day. Yet it's a reasonably accurate description of what a manufacturer must do to hold his job.

Every day at the sales counter, millions of women and men vote General Electric in or out of a job.

When you stop to think of it, we don't hold office for four years—or even two. We have a daily fight on our hands.

Hands at the sales counter pick up G-E products—hold them, turn them over, inspect them, try them against competitive articles for value and price—then decide for or against.

The only way we can win the election is by constantly improving our product. Thousands of engineers are paid to think up ways to improve, redesign, simplify. We use every known device of mass production to deliver more for the money. And our employees are as keen on winning our daily “public election” as is the salesman at the counter.

Manufacturers sell products on the basis of “be good every day—or get out of office.” The result is the American public has the world's highest standard of living.

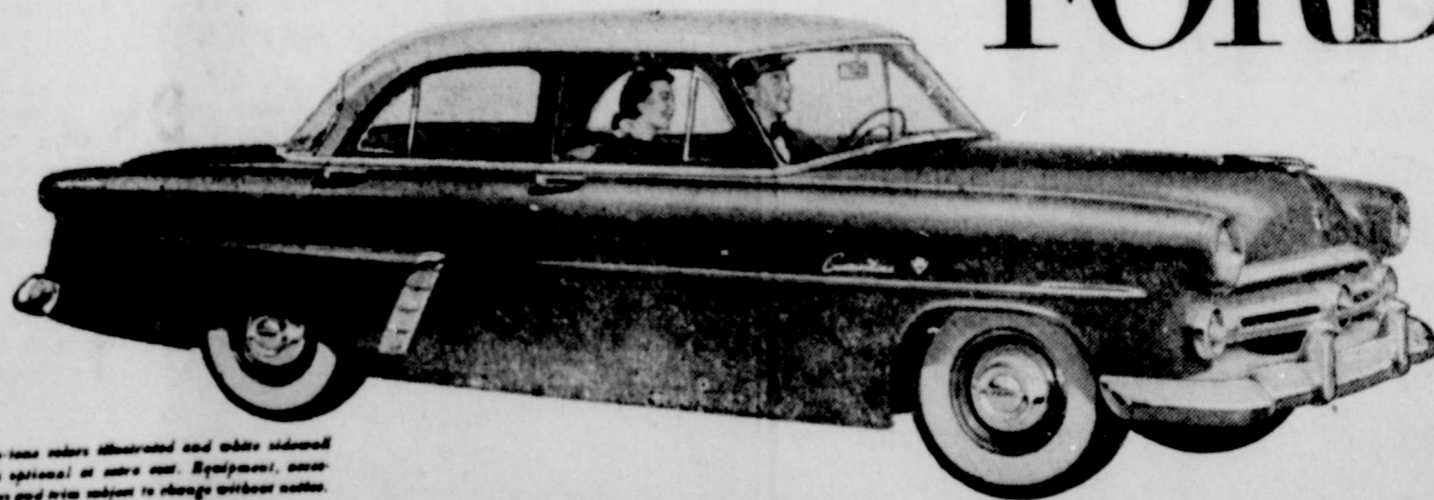

You can put your confidence in—

PAY MORE? WHAT FOR?

Before this year, if you wanted a big-car ride... a high-compression engine... a complete choice of interior-exterior appointments... or a curved one-piece windshield and a car-wide rear window, you had to pay hundreds of dollars more. Now FORD offers all these features at no extra cost. It's the one fine car in the low-price field. Take 10 minutes and “Test Drive” a Ford. You'll agree... you can pay more but you can't buy better.

Americans Are Rolling Up Their Sleeves

YES, ALL KINDS OF PEOPLE
ARE GIVING BLOOD SO THAT
OUR WOUNDED MAY LIVE!

• Today, the blood of a Boston bookkeeper may be flowing through the veins of a wounded kid from a Kansas farm... the blood of a pretty Southern housewife may have saved the life of a grizzled leatherneck. For, blood is blood, a God-given miracle for which there is no substitute... and when a man's life hangs in the balance and blood is needed, there is nothing else to take its place!

Right now the need for blood is urgent. In hospitals—at home and overseas—many men require four and six transfusions during delicate operations. And the blood must be there—when it's needed. So give the most precious gift of all—your blood!

Be assured that giving blood is neither difficult nor distressing. And what a thrill there is in knowing that you've performed a really unselfish act! So call your local American Red Cross today and make an appointment. And tell your friends and neighbors about your experience. Let them share the wonderful feeling Americans get when they roll up their sleeves—and give blood.

But—
