Road Bond Election Called For March 26

The bond election intended to provide \$300,000 for the purchase of right-of-way through Floyd county for a four-lane highway on U. S. 70 and a widening project on Highway 207 south from Floydada to the Crosby county line, was called by the Commissioners court Thursday afternoon of last week.

The date set for the election is Saturday, March 26. Petitions asking for the election were filed with the court on Monday of last week. The court delayed long enough to check the petitions and to obtain a commitment on an advantageous sale of the bonds.

A two-thirds majority of the vote cast is required to carry the issue. The same proposal, with a \$25,000 provision for right-of-way financing on Highway 97 added, was turned down by the taxpaying voters at the general election on November 2.

One hundred thirty-five more votes would have been necessary to carry the bond issue in November. A delegation which presented the petition told the court they considered favorable action on the proposal a vital matter for the progress of the county during the next five years.

Members of the court are sympathetic to the proposal, too, and told the delegation they will actively favor the measure. Reasons mentioned include the fact that favorable financing is now possible, also that the roads must have attention

Farmers Urge Maize Support

About two thousand farmers in Amarillo Tuesday received an attentive but apparently unsympathetic hearing when they presented their case for an increased grain sorghum support price before a top agricultural department official.

Walter Berger, representing the USDA in Amarillo, acknowledged that government action in reducing support prices on non-basic feed grains from 85 percent for the past two years to 70 percent for the 1955 crop has his personal recommendation.

The farmers united in approving a resolution to send a delegation to Washington who will seek to obtain higher support prices for grain sorghum. Arlon Hartzog, of Farwell, elected moderator of the meeting, called for a resolution to guide the group's action after a number of farmers presented their cases for action from both the speaker's stand and the floor. Hartzog is a former Floyd County agriculture agent turned farmer.

Attending the four-hour session from Floyd county were Roe Jones, Fred Battey, E. L. Thomas, Henry Willis, B. A. Robertson and Milton Ashton.

LIPSTICK LOGIC
LOUISE ALLEN

A truly old-fashioned man is one who kides his wife by saying if she lost the can-opener, she couldn't keep house.

What he would have us think is either that she's lazy, a poor cook or throwing his money away. What he actually does is express a viewpoint that's a throw-back to days when opening cans was the shortest route to preparing meals.

Then, the ordinary cooking routine was for the little woman to go out and chase down a chicken wing, pick it, dress it, and cook. To get vegetables, she donned gloves and sunbonnet and went to the garden to gather beans, pick tomatoes, and dig potato hills. Bread, a necessity, had to be home baked. So did pies and cakes.

In those days, table economy came out of Mama's back instead of Papa's billfold. Naturally, it cost a little more to buy things in cans. Not so any more. The woman who's trying to get around her spouse in the kitchen buys individual chicken pies, frozen and ready to pop into the oven. Ice cream, pies and vegetables are bought the same way. Homemade cakes and ready-to-brown rolls come from bake shops.

If the man of the house would like to go back to the good old days, he might give up his electric razor, a car with automatic gear shift, and his television set. Airplanes, central heat, and golfmobiles could go back to the inventors. He could, in short, have a heck of a good time roughing it, too.

So let him kid the little woman about her can-opening technique. She can laugh and laugh—because nowadays that's really work.

CARD OF THANKS

Words cannot express our appreciation and love to Dr. Pitts for his devotion and medical aid to our husband and father, to nurses Mrs. Gregory and Mrs. Murff, to the men who sat up with him during his illness and to all the women who brought food and served it, to Bro. Allen and Bro. Armstrong for their comforting words and visits to the members of the choir and the organist, for the special song and all the beautiful offerings.

Attendance prize winners named from among those who registered during the day included Homer Newberry, O. G. Mayfield, Robert Hinsley, T. W. Richards, L. D. Simpson, and Robert Porter.

On hand for the occasion, in addition to the regular working staff of Witkowski's and members of their families who assisted in welcoming the guests, was C. A. McClanahan of Plainview. Mr. McClanahan is case blockman for the Amarillo district.

I WAS CURED OF TV

The story of a confirmed addict and his long hard fight back to life as appeared in February Issue of "Coronet"

by E. A. BATCHELOR

When in the course of human events, an individual has recovered from a malady previously believed to be incurable, a respect for the good of mankind requires that he declare the cause of his recovery. If that is reminiscent of the first paragraph in the Declaration of Independence, the resemblance is purely intentional. Specifically, I have been saved from a fate worse than death—hopeless addiction to television. I have rejoined the human race from which I was snatched by Channels 2 to 7 a matter of approximately five years ago.

Today, I can either take television or leave it. But instead of the intolerance that frequently characterizes the reformed, my resurrection has left me with a heart filled with sympathy and compassion for those many people who still are in bondage. To them I relate my story.

First of all, let me warn my readers that there is no quick and easy way to shake off TV addiction. It is a long and a hard process, fraught with disappointments. Your gain will come slowly: one day of backsliding may wipe out all the progress made in a week. But it can be done and whatever the price, you will find it worth paying.

Doubtless there are skeptics who will say that my jubilation over reformation is premature. But there is no such danger, for I have passed the supreme test—I have read a book! By a book, I mean a big 600 page, semi-scientific book. And actually read it, instead of merely staring at the pages. Also, I am reading magazines and newspapers regularly—yes, daily!

Furthermore, I have passed another test. I have carried on a conversation with my wife on general subjects, instead of arguing with her as to what channel to tune in on the set, as had been my custom during the period of TV enthrallment.

Once upon a time, I was considered reasonably intelligent by those who did not make too intensive an investigation of the facts. True, I was never the life of the party, but I was a splendid foil for those who sought to be. I couldn't play the saxophone, never could remember funny stories, couldn't do card tricks, nor even play cards well. But for all these shortcomings, I was not considered a social blight. Then I got a television set!

With the installation of this apparatus, my mind lost the power to create anything or to receive anything that did not come over a coaxial cable. I could not contribute a thing in the way of diversion, information or inspiration to my fellow men. Indeed, I asked nothing of my fellow man except that which came over Channel 2, 4 or 7.

I still went to the office, but it was merely to kill time. On Saturdays and Sundays I mooned around the house until the first of my programs was scheduled. Just so long as the set was active, I would sit and stare at it.

Of course, there really are some things on TV that provide provocative discussion for intelligent people. For instance, the closest I ever came to getting into a fist fight in many years was when a friend said that he didn't like Kukla, Fran and Ollie. It was a shock as great as if a child had said he didn't like ice cream. Fortunately, I remembered my manners in time to avoid slugging this heretic, but I did order him never to darken my door again.

To my mind, Ollie was a greater actor than all the Booths, Barretts

Dependable Pumping Power

Here's another dependable MM power unit designed to furnish low-cost, trouble-free performance. Smooth, 6-cylinder high-turbulence power and counter-balanced crankshaft reduce torsional vibration for longer engine life. Newly designed heat exchanger base plan keeps oil at proper operating temperature, greatly increases engine life and lengthens period between oil and filter cartridge changes. Fan acts as a cooler as well. Sight oil glass provided in base pan can be converted to oil-flow control valve for adding oil directly to crankcase from a barrel of oil, thereby keeping oil at a constant level. Fan attaches directly to an SAE standard flywheel housing and provides a rigid mounting of the power take-off for heavy belt drives, etc. Double-disc clutch and power take-off are of heavy-duty design.

MM heavy-duty power units are noted for their long life. Nine models to choose from. Stop in soon. Let's talk over your power needs.

Commissioners Issue Warrant on Cedar Route

The Floyd county commissioners court is beginning to meet its relatively heavy commitments for right-of-way on the extension of the Cedar Hill road to Flomot and a connection with a hard-surfaced road at the Motley county boundary there.

Right-of-way for the route, now known officially as Highway No. 97, was difficult to provide since it cut up some pieces of land into tracts difficult for the owners to handle after the highway was built.

The court issued a 6 per cent interest-bearing warrant to Ford Johnson for land taken and damages to a 220-acre tract that lies at the brow of the caprock on the roadway, carrying out an agreement with Johnson and others. The court will pay an additional \$3,500 for the roadway and damages to the property when and if they also demand right-of-way for a road that will connect with the Quitaque road that extends southward now past Edgin. The final result will be that the 220-acres will be cut into four tracts if the court asks for the added road bed.

Checks have been issued to W. E. Lackey for \$2,500 for land and damages to his tract on the route, and to Mrs. Aline Welch for a \$1,928.50 award made by a commission in a condemnation proceeding.

Two outstanding claims not yet paid are to Vaughn Hall, of Quitaque, who by agreement is to be paid \$1,500 for right-of-way and damage to his land, and to R. Fred Brown on a \$1,890 award made by a commission in condemnation proceedings.

Complete schedule of the school programs will be presented next week in The Hesperian. This year individual work of the student will be emphasized more than of students as a group.

Commissioners Issue Warrant on Cedar Route

The Floyd county commissioners court is beginning to meet its relatively heavy commitments for right-of-way on the extension of the Cedar Hill road to Flomot and a connection with a hard-surfaced road at the Motley county boundary there.

Right-of-way for the route, now known officially as Highway No. 97, was difficult to provide since it cut up some pieces of land into tracts difficult for the owners to handle after the highway was built.

The court issued a 6 per cent interest-bearing warrant to Ford Johnson for land taken and damage to a 220-acre tract that lies at the brow of the caprock on the roadway, carrying out an agreement with Johnson and others. The court will pay an additional \$3,500 for the roadway and damages to the property when and if they also demand right-of-way for a road that will connect with the Quitaque road that extends southward now past Edgin. The final result will be that the 220-acres will be cut into four tracts if the court asks for the added road bed.

Checks have been issued to W. E. Lackey for \$2,500 for land and damages to his tract on the route, and to Mrs. Aline Welch for a \$1,928.50 award made by a commission in a condemnation proceeding.

Two outstanding claims not yet paid are to Vaughn Hall, of Quitaque, who by agreement is to be paid \$1,500 for right-of-way and damage to his land, and to R. Fred Brown on a \$1,890 award made by a commission in condemnation proceedings.

In Floydada the special programs have been arranged for Thursday March 10, when the three local schools will open their doors and show school patrons the fruits of their learning. Other schools of the county also will be taking part in the activities but have not completed arrangements as yet.

Complete schedule of the school programs will be presented next week in The Hesperian. This year individual work of the student will be emphasized more than of students as a group.

J. M. Willson, jr., is chairman of the county committee on observance of schools week.

VIEWS AND COMMENT

Price of Maize. Restoration of a support for the forage feeds, maize and kaffir, in line with the support that will be given corn this year by USDA, is being pushed with vigor in the southwest. Retirement of cotton acres to a degree that is quite painful has the farm operator bothered. The plan that has been followed by most farmers in the past has been simply to turn to maize to fill the breach. But the support for the crop has been set at a figure that the crop will be produced at little, if any profit. The southwest people point to the fact that maize has been less of a burden to carry than corn has been. At the time corn is running over the capacity of the storage bins, presenting considerably more marketing pains than has maize. Accordingly they have thought there should, in fairness, be an adjustment. The department of agriculture seems to see it in a different light.

Money is cheap now for political subdivisions that want to do financing for public improvement. Cheap, that is, compared with the price of money that prevailed in former decades. This is one argument for going ahead with any kind of a needed public works. Spending public money just to get it spent is one thing, spending it for a definite need another. City of Floydada has just finished financing a considerable program with revenue bonds that bear interest at half the cost of hard times money, and the county is offered even cheaper money to finance its right-of-way purchases through the county, if the people decide in favor of the project.

Relief Feed Program. Somehow stock farm and ranch operators of the dry land areas of Floyd county got a bad deal—at least an expensive deal—in the relief program for cattlemen designed to save foundation herds until more promising weather conditions made feed and range more plentiful. A cattlemen operating in Floyd county for several months now has seen his neighbors across the county line—in Motley, for instance—getting feed at about \$20 a ton less than the Floyd county man could obtain it. Don't think the going has not been rough. The Floyd county dry land rancher does not feel too happy about it.

Navy and Marines. Recruitment men of the navy and the Marines, the contact fellows whose job it is to get the actual notices put in the newspapers, usually leave The Hesperian office in an unhappy frame of mind. They bring a notice around for the newspaper to publish, and on the next trip drop by to pick up a tear sheet to prove to their superiors that they got the job done. We can't ascribe much news value to the usual stories we are offered relating that sergeant so and so is going to be at such and such a place and is urging young men of the right ages to do their duty by their country by investigating and joining up. Another angle is that all boys who can meet the mental and physical requirements are going to see military service and will have ample opportunity to do their own picking and choosing when the time comes. If they do not want to exercise a pick or choice they will go anyhow. Boys are having a hard enough time getting themselves adjusted to the new way, without being ding donged at from every imaginable angle, including stories in country newspapers. Maybe we view the matter from the wrong angle.

Red Cross Drive. It affords some pleasure to announce that Floyd county people are not organized to conduct a drive for funds for the American Red Cross this March. Not that they have abandoned the idea. Not at all. It is that the drive was done under the United Chest plan weeks ago. Red Cross has already been allocated its share of the fund. This is likewise true of the Heart and Cancer funds. They have been cared for and the people who have been doing the leg work for these worthy causes can turn their attentions and efforts to other matters.

The driverless tractor, so far has been found to be somewhat of a mixed blessing on plains farms. While there is no doubt the idea is too good not to be used more and more as time goes along, many experiments have been costly. Control gadgets have not come to perfection. Accordingly, power machines jump the track and begin doing damage instead of serving their intended purpose. A machine with practically unlimited power roaming the premises in the night—or daytime for that matter, if the attendant turns his attention to other matters at the wrong time—is a scary thing to contemplate. But what a man can imagine he can do, within limits. The driverless tractor is certainly within limits. The idea will not be abandoned. It will be followed up and perfected.

More Will Come. More disappointment than good news is in the reports of oil development in Floyd county. Dry holes have come to be the accepted fact. But the "pictures" show the formations are there and we haven't seen the last of the search. There'll be more tries. The first bunch well just had to be it, but it was not. We don't know that Floyd county will be another Scurry. But searchers punched that county full of holes and several companies gave it up until one morning when the big news hit.

Blotto Says: There's really only one thing wrong with the younger generation... a lot of us don't belong to it any more.

Most publication bills, which have been presented to the legislature for passage in the past, have been emasculated to such extent that the real need of the taxpayer for full publicity was thwarted. The bills now in the hopper are relative short in their wording, are plain now in their import and should not be amended out of their meaning. A visit to the comptroller's office in Austin would reveal that everything all over Texas is not like we think it is in Floyd county. There are more dubious counties than Duvall and more school districts than Benches in Texas now. Good publication laws would throw a protecting arm around the future for all time for all taxpayers.

The chicken-of-tomorrow program in Texas has been replaced by the Texas Broiler Festival program. The state committee believes the change will add interest, especially among consumers, for marketing will get major emphasis along with production.

A recent estimate shows that 14 percent of Texas cropland is irrigated and from it come 35 percent of the state's income from crops. Some 5,439,603 acres on 33,937 farms located in 225 Texas counties are now under irrigation.

Reputation is character minus what you've been caught doing.

An automatic gas clothes dryer will save you money, clothes and time. Gas for drying clothes costs approximately 1 cent an hour... or about \$2.60 a year (for average family use). Fewer clothes are needed when you own an automatic gas clothes dryer, because the gentle, tumble-action of a gas dryer eliminates wear and tear of wind-whipped clothes. With an automatic gas dryer you can select your wash... no need to wait for favorable weather. See your dealer. Buy an automatic gas clothes dryer... a dryer you can afford to use.

KERCHOO!

Why is it, a person never troubled with hayfever, should suddenly develop that aggravating ailment? It is because some change in the quality of the tissues has taken place, rendering them susceptible to certain substances.

Prof. Metalnikov, Pasteur Institute of Paris, after long years of research, has demonstrated that the nerve system controls the state and condition of tissues of the body.

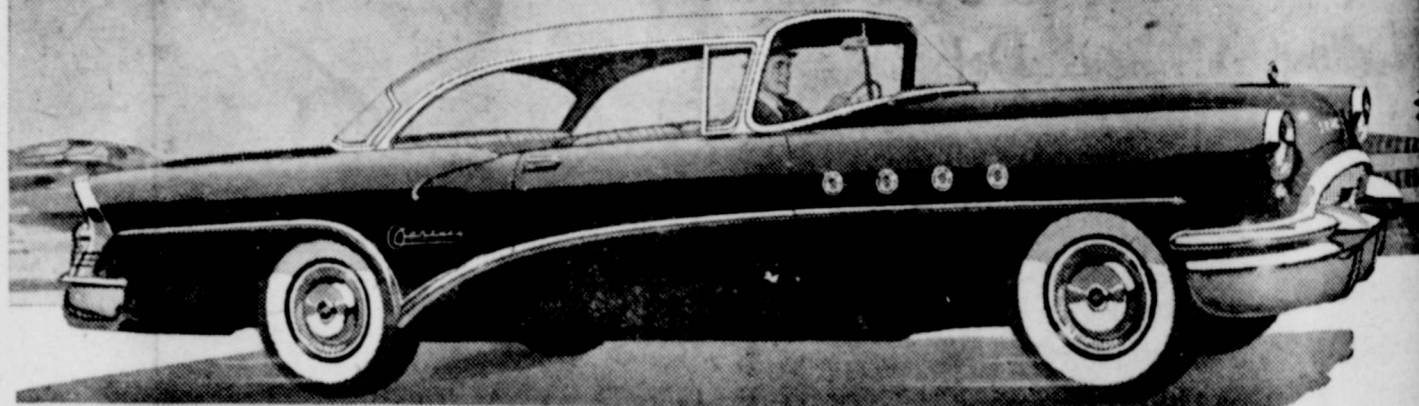

This fact explains why chiropractic can obtain such wonderful results in allergy. By locating and removing nerve impingements thru correction of spinal misalignments the body is enabled to restore hypersensitive cells to a normal healthy condition.

Good health depends on a normal functioning nerve system.

Not a shift, but a switch of the pitch

And man! What that does for Dynaflow!

This is for sure...

There's never been anything in your car-driving experience like the feel of Buick's new Variable Pitch Dynaflow*—because there's never been anything like it in a car before.

In a modern plane, yes. For this is the principle of variable pitch propellers used on airplanes. Their propeller blades change "pitch" for quick take-off—then change to another "pitch" for better gas mileage in cruising aloft.

Now you can do the same thing on the ground—in a 1955 Buick.

Twenty propeller blades have been ingeniously engineered into the Dynaflow unit. They pivot—one way for a big boost in gas mileage while cruising—another way for brilliant new performance.

You switch the pitch for instantaneous

acceleration just by pressing the pedal way down. Then it happens...

A build-up of momentum as smooth as oil—and as quick as a split second. Dazzling new response on getaway—or a spectacular burst of instant safety-surge power when you need it out on a highway.

It's pure thrill—and a happy surprise in its far better gas mileage in cruising. Yet Variable Pitch Dynaflow costs not a penny more than earlier versions of this wonder drive.

How about you trying it?

That way you can also look into the sizzling new horsepower, the fresh new styling, the envied ever-level ride, the eye-opening low prices—all of which are making the 1955 Buick the hottest seller in all history. Come in this week, won't you?

HOTTEST BUICK IN HISTORY

No wonder you see so many 1955 Buicks on the highways—they're rolling up bigger sales than ever before in history—topping the popularity that has already made Buick one of the "Big Three" in total sales.

*Dynaflow Drive is standard on Roadmaster, optional at extra cost on other Series.

'Plant Texas'

Texas is like an uncut diamond. Skillful treatment will enhance its natural beauty.

Just as a precious stone needs the art of a jeweler to increase its value, so does Texas need the cooperation of its citizens in a program designed to restore much of the vegetation lost in the recent drought.

"Plant Texas" is a slogan that will be heard often in 1955. It isn't just an empty phrase. It is the rallying cry of a movement to restore the fertility of Texas soil and save the land from the hazards of destructive erosion.

In Texas and other states, land was once abundant. Man could ravage the land and move on to more virgin territory. This led to abuses by uneconomic cutting of forests; denuding much other land of vegetation and fertility; reducing water resources and leaving eroded, water scarce, unsightly landscapes.

Man, alone, hasn't been the only culprit, however. Four years of harsh drought have completed the job of land and plant destruction begun by the careless pioneer. Now is the time to start correcting these early mistakes of man and nature.

Early this year, the Governor of Texas issued a memorandum proclaiming an official "Plant Texas" movement. The program is sponsored by the Texas Department of Agriculture in cooperation with the

Texas Nurserymen's Association. The idea is to encourage better soil conservation practices and to promote more and better plantings around homes, schools, churches public and industrial buildings.

This is an opportunity for every homeowner to participate in a project for the betterment of the state and, at the same time, improve his own holdings. Civic clubs, too, are encouraged to push the program on a community-wide basis.

Additional information and suggestions are available from the Texas Department of Agriculture at Austin. So plant that extra tree or shrub! Seed that plot of barren soil! It is an investment in the future productivity of the state.

As A Farm Woman Thinks

(By Nellie Witt Spikes)

"As the Spanish proverb says, He who would bring home the wealth of the Indies, must carry the wealth of the Indies with him," so it is in travelling, a man must carry knowledge with him if he would bring home knowledge."

Master, the tempest is raging, The billows are tossing high, The sky is o'er shadowed with blackness,

No shelter or help is nigh; "Carest Thou not that we perish?" How can Thou lie asleep, When each moment is threatening.

A grave in the angry deep? The winds and waves obey Thy will, Peace be still! Whether the wrath of the storm-tossed sea, Or demons, or men, or whatever it may be

No water can swallow the ship where lies, the Master of ocean and earth and skies! They all shall sweetly obey Thy will, Peace be still, Peace be still!

What a comforting thought these lines of the old precious song brings to us when every day it seems the world will be swamped with greedy men. May these lines help you as they do me to bring peace in my heart in all the tragedy of

the world.

Today I would like to tell about the Sunday night singings we used to have on the farm where we lived for some forty-three years. As I have told you, we were on the edge of three communities. The smoke from the McCoy gin poured out and made the gin look like a ship at sea. Our children's horses were tied at the school house, we bought some of our groceries at the little store.

We belonged to the Methodist church at Cone, some five and one half miles southeast of us. We were in the Farmer school district, where our children attended school two years. We had to transfer to McCoy, which was only three and one half miles and Farmer was four saving a half a mile's ride on cold mornings in a buggy or horseback. So we took our dinner to three communities when they had dinners at church and school.

So our neighbors went to three different communities. It was too far for us to go to Sunday night services so we had Sunday night singings at each other's homes.

When the evening shadows began to darken the farms, the buggies and horseback riders began coming.

If it was at our home, I had everything as clean as I could. The long kitchen bench was brought in the front room and covered with a folded quilt. Nail kegs, wooden boxes, also covered, were used. If you ever attended one of those old time singings you know just what I mean when I tell you much happiness was had by all from the children to the old folks.

Any one who could play the organ or piano, even tho they could only play the chords, was soon at the instrument. One of the young men held the number two lamp so the player could see the songs, the rest stood near, some holding lamps, the others song books. The boys stood as near their girls as they could, whispering now and then. In the summer the girls wore soft white dresses of voile, or pastel organdies. In the winter they dressed in bright woollens, or gay whispering silks. But I always thought the accordion peated skirts of wool were the very drestiest of all.

I can hear the infectious giggle of Eulalie McDermott, which thank goodness she has not lost altho a grandmother. The loud laughter of Ed Cox who loved all the girls in his friendly way but courted

none. Myrtle and Maude, Mrs. McDermott's daughters as we distinguished them from Rilla and Eulalie, Mr. Mc's girls, then Beulah and Chester, children of both. All were there, Myrtle rather quiet, Maude always laughing and talking.

Everyone had a number they loved. Mr. and Mrs. A. W. White who had their glass-top buggy at the front gate, always wanted, "Will there be any stars in my crown?"

The song over the crowd took seats and talked awhile, fanned with hats and palm leaves if the weather was hot, got as near the red-hot stove as they could if it was cold outside. They laughed and talked and courted. Coleman McSpadden looked with longing at Rilla, Frank loved Eulalie, who was not indifferent. Both couples have been happily married many years. Miss May McSpadden teased every one and for a time was paired off with Jud Cox.

My, how the beautiful voices blended and the room was filled with music as we sang, Master the Tempest is Raging, and if you don't think it takes good lungs for such songs as Saved, Saved, Saved and He Lives On High, just try it with

a crowd. And then sing When He Rings The Golden Bells For You and Me. Then you will want to sing some slower, quieter songs such as In the Garden, Softly and Tenderly Jesus is Calling. Cookies and cakes were passed around, with coffee or lemonade.

Then came the time for individual singers. Maude always had a cute number and would then have to sing two or three more. Then I was always asked to sing Mother McCree. This was a good time for the courtships to make time, but was it not a good time and place for the young to be together? Singing songs and being with friends and neighbors. Now one of the singers, Joe McSpadden, lies on his bed or sits in his wheel chair in Lubbock, but I know many times the old singings around McCoy make his shut-in life easier and brighter.

The Lincolns also came. Mr. and Mrs. Lincoln, Buster and Luella. Once in awhile Artie would be there. The St Smiths, Flora and Myrtle and Hazel and Albert and Thelma. The Jim Crumps. Many of them are singing in the Other World today.

My, the years once went as slow as an oxen team, then they picked

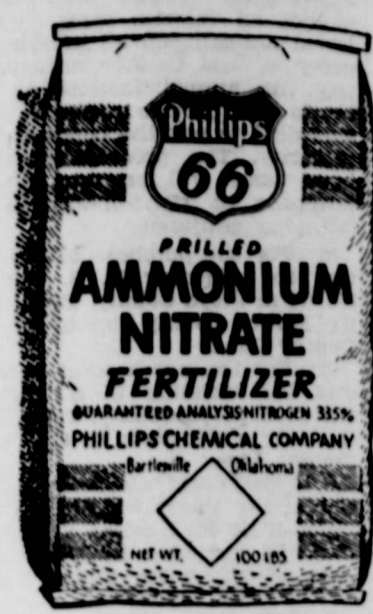

up in the horse and buggy days. Then rolled faster on rubber on the pavements. Now the years are as swift as jet planes and they take me so fast I can hardly get my breath.

God bless you and yours and may you have stored up and are still putting away precious memories to feed your soul some day.

It's highway robbery!

For sheer fun out on the road, Chevrolet's stealing the thunder from the high-priced cars!

Up to this year, maybe there were reasons for wanting one of the higher priced cars. If you demanded something extra in driving fun... something really special in the way a car handled and felt and responded to your wishes... you simply had to pay a premium to get it.

Not any more! The Motoramic Chevrolet for 1955 has changed all that. In fact, it's stealing the thunder from the high-priced cars on their own home-grounds—out on the highway.

Talk about excitement! You have 162 high-compression horsepower under the hood with the

new "Turbo-Fire V8" (180 h.p. is optional at extra cost in all V8 models if you want it.) Or you can take your pick of two new "Blue-Flame" 6's—the hottest, highest powered sixes in the low-price field! Any one of these three engines brings you all the good things that come from Chevrolet's long leadership in valve-in-head design.

As for drives, just name it. Chevrolet offers new Overdrive, Super-Smooth Powerglide (extra-cost options), or a new and finer Synchro-Mesh transmission.

You're headed for fun in the Motoramic Chevrolet! You're headed for a ride such as you'd expect only in highest priced cars. You're headed for "heads up" stopping, too, and easier steering. All this, with Chevrolet's traditional economy. Come in and put this "show car" on the road!

Donald of Tyler and Representative Douglas Bergman of Dallas Rowan said it was "unfair" but he couldn't remember names of the others.
Dennis Wallace, longtime chief clerk of the Land Office, reported that his name had been "signed" by someone else, to minutes of the Veterans' Land Board.
So far Atty. Gen. Shepperd has filed nine suits for forfeiture of block sales and recovery of a total of \$1,539,505 to the state.

Tax Slow Down

With land sales taking legislative precedence, taxes, the Legislature's big problem, have taken a back seat.
Rep. Jerry Sadler sharply reminded the House revenue and taxation committee that the session was one-third over and no revenue bills had been reviewed or acted upon. He demanded an "immediate" hearing on his bill for a \$3.30 per barrel hike on beer tax.
Rep. Charles J. Kirkham of Cleburne offered a new tax plan—a "road use" tax as a substitute for the administration's two-cent gasoline tax hike proposal. So far the gas tax hasn't been heard by committee.

Kirkham's plan would levy a \$5 fee on commercial motor vehicles plus a graduated tax scale based on gross weight, ranging from six mills to 22 mills, all estimated revenue to go to highway purposes.

Insurance Clean-Up

Final passage of the first major bill to "clean up the insurance mess" was voted by the House. Control of the stock and securities of insurance companies, under the bill, will go to the Board of Insurance Commissioners.
This bill is in for a fight in the Senate where a counter measure would give insurance stock supervision to the securities division of the Secretary of State's office. The Senate bill has been heard and parked in sub-committee.

Water Bills, Too
Favorable report has been given by a Senate committee to the administration's \$100 million state bond issue plan for aid to water districts. Rival measures for the same amount of bonds have been put in House sub-committees.
Passed by the Senate were two of the water bills, regulating pollution from oil wells, and requiring reports to the state by water districts.

Advertising and Newspapers

Representative Vernon E. Smith of Fort Worth introduced a bill specifically prohibiting the Board of Examiners in Optometry from

making any regulations restricting optometrists' advertising.

Attorney General Shepperd had previously ruled void, such an order made by the board but rescinded.
Rep. E. "Kika" de la Garza of Mission introduced a bill to prohibit any court, grand jury or legislative committee from attempting to compel a newspaper or press service employee from revealing the source of his information.

Rudder Honored

Newly appointed Land Commissioner J. Earl Rudder received honors this week. He has been promoted from colonel to brigadier general in the U. S. Army Reserves.
He also received appointment to a commission to revisit the Normandy Invasion Beachhead, where he made part of his outstanding military record in the Invasion.

Red Ink

"In the red" for the first time in 13 years is the State Treasury's general revenue fund. Treasurer Jesse James announced that banks have agreed to cash warrants without discount.
Treasury calls were set for the 5th and 20th of each month, and James said the time lag would not exceed 20 days. The general fund is to get back on a cash basis around May 1.

Auto Dealer's Fight

Authorized car dealers won the first round of a bitter fight with the "independents" or used car dealers. A Senate committee voted a favorable report on Sen. Gus Strauss' bill to license all dealers. The bill also would prohibit sale of new cars by dealers not having agreements with manufacturers or distributors.

Sidelights

Expunged from Senate reports was a resolution by Sen. Kilmer Corbin calling for the retirement of Maurice Acres, chief executive aide to Gov. Allan Shivers. Only Corbin voted for it. . . . Rep. J. O. Gilham's bill to double college fees was parked in sub-committee, after much discussion in which a large representation of students from the University of Texas took part. . . . Sen. George Parkhouse's labor bill to prohibit payment of unemployment benefits to workers in an integrated industry was favorably reported by the Senate state affairs committee. The bill is based principally on a case in which Texas Ford Motor Co. employees were idled because of a strike in the East. . . . Offices of the federal district attorney for West Texas are being moved from Austin to San Antonio San Antonian Russell Wine has succeeded Charles F. Herring of Austin as US district attorney.

FB Membership Near 800 Mark

After the kick off breakfast of last week, S. J. McIntosh, membership chairman of the Floyd County Farm Bureau, and some 30 committeemen canvassed the county to bring the organizations membership up to par. After the final check from the local office secretary Ida B. Puckett, reported the membership the highest it has been since the opening of the office in June, 1952. According to the record as of date of membership now stands at 785.

Due to the turn of the year in handling gas tax exemptions, water well drilling for irrigation, and other activities of the organization, Mrs. Pat Rucker and Bobbie Green have been helping to handle the traffic through the office. The number of well applications since spacing was started by the High Plains Water District in February 1953 has now reached 771.

The activities of the organization have not been confined to the county, for according to a newsletter from the Farm Bureau office maintained at 601 Nalle Building in Austin during the session of legislature, they report much activity at this time, with bills on highway use tax, water, Brucellosis, 4% butterfat in milk, feed control bill, noxious weed control, and others. C. H. Devaney, state vice-president, and Lois Barbour, state director from Iowa Park report that the Farm Bureau's position on many of these bills are sought after by the committeemen and legislators.

These news letters are kept on

file in the office, together with a list of house standing committees. Anyone desiring to get in touch with the right parties on any bill pending, when the bill is up for consideration when in committee etc., are welcome to come to the local office and use them.

In the clothes you sew at home, the difference between "so-so" and "just so" is the final shape of the garment. And for shape-making and shape-holding there's nothing in the world like PELLON® non-woven interfacing. PELLON® on the inside of the things you sew means a crisp, fresh look on the outside. And working with PELLON® is a joy not a job. It cuts in any direction (as easy as the paper pattern) with no unraveling, no fringing buttonholes. It's light and porous, washable and dry-cleanable. Amazingly wrinkle-resistant, miraculously crush-proof, this Wonder-Under® comes in a wide variety of weights, colors and textures for every sewing need. Get PELLON® today—sew like a "pro" tomorrow!
