Robbers 'Clean' 'Wye' Station And Attendant

In a robbery and a stick-up which apparently went on at the same time, H. K. Permenter, attendant at the Wye Service station in Southwest Floydada, was relieved of \$20 in cash and the station cash box was cleaned for about \$30.

It was the first reported robbery in Floydada in several months. Permenter said the stick-up man who accosted him with a long, razor-like knife, made him go behind the station and fork over his money.

In a few minutes, when he was released and got back into the station, he found that the cash box there had also been rifled.

Through the city hall flash system Permenter notified night officer Horace Cage, who arrived 15 minutes after the theft and robbery had been done. City and county authorities have been following faint clues since.

Permenter said his assailant was a man probably 40, who had on blue jeans, a light blue shirt and a red leather cap. He weighed about 140 pounds. Permenter was crippled four years ago by a paralytic stroke and was not able to offer any resistance. So far as is known no one saw the man who robbed the station till.

Being held up is not a new experience for Permenter. Once he was robbed as he walked down a street, once he was stuck up while driving a fruit truck, and in 1944 he was victimized while operating filling station in Lubbock. In the latter case the robbers were caught up with. Permenter says getting held up is an experience you don't get used to.

Since the end of the holidays of 1954 and running consistently throughout the first three months of the new year, a modest but quite substantial building boom, in both residence and business property improvement, has been under way in Floydada.

Extension of waterworks, sewer and light and power lines to new areas have helped to spark the increased building activity.

New residence construction is largely by the younger set of business and professional people, many of whom are owning homes of their own for the first time.

Spent or in process of being spent is more than \$150,000, the heaviest portion of which is going into new homes.

However, spending for business expansion also makes an interesting and notable contribution.

Since the beginning of the new year 14 new residence permits at the city office have been issued, representing an expenditure above \$80,000. Of these a few are completed and are being occupied. Others are nearing completion and a few are in the framework stage.

Several additions and private garage building permits run into a total above \$5,000.

In the business district two buildings, still under construction represent the major portion of the new improvements.

West California street, where new quarters are under construction for Floydada post office and Southwestern Public Service, and East Missouri street, where the S. J. Latta Implement house will be housed the areas of business development.

Expenditures to make a livable labor camp represent an outlay of upward of \$10,000 in a business venture for Floydada Producing & Marketing association. Tenants will be planting and harvest laborers in the main.

A report that Southwestern Bell Telephone Company will soon be ready to announce the building plans to house their new dial system had not been confirmed by The Hesperian as late as Wednesday.

A check with building firms in the community this week indicated no appreciable let-up in new home planning, no immediate indication of slackening of interest.

The talks with builders indicate that new home building is not confined to the boundaries of the municipality.

At least one new home each is being built at Allmon, Blanco, Cedar, McCoy and near Floydada, these reports indicate. The country homes, for the most part, are elaborate residences.

Ground Floor Office Latest to add to the construction of new buildings in the 200 block on West California street is Richard F. Stovall, who said he had contracted with Jimmy Willson for a building which he will utilize as a ground floor office when completed.

Stovall will have an office with 35 foot front, 45 feet in depth, Roman brick front with cinder block walls, centrally heated and cooled with a refrigeration unit.

At the same time the remainder of 50 feet of frontage will be taken up with a 15-foot structure 30 feet deep of the same materials, which will be for rent.

The site, the east side of which is 100 feet west of the Lighthouse Electric headquarters, was acquired by Mr. Stovall in a recent purchase from Mr. and Mrs. L. J. Welborn.

The new owner hopes to occupy the quarters with his law offices and the Floyd County Abstract Company plant by June 1.

MRS. A. C. COLLINS RETIRES Mrs. A. C. Collins, employed as saleslady with J. C. Penney Floydada store for 10 years, retired as of March 31 and will not be employed, steadily with the firm in the future, J. W. Reue, manager of the store, said.

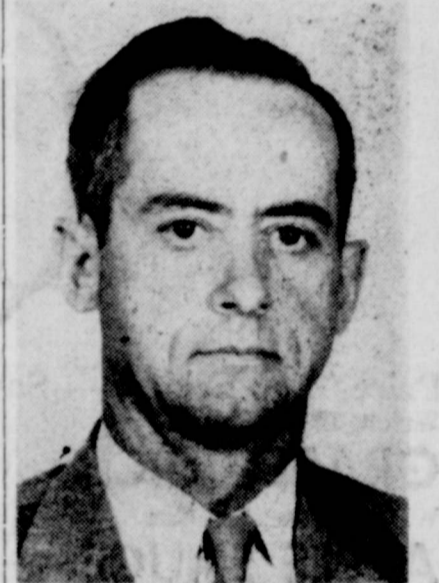

Mrs. Collins will participate in the company's thrift and profit-sharing retirement plan, Reue said. She will continue to make her home in Floydada.

FLOYD COUNTY SERVICEMAN IN STIMULATED AIR ATTACK BEPPU, Japan—Cpl. Bryan M. Smitherman, son of J. B. Smitherman, South Plains, Texas, recently participated in Operation Tomahawk, an Army-Navy airborne maneuver in Japan.

His unit, the 187th airborne regimental combat team, parachuted to its target and simulated the capture of an airfield and the destruction of a missile launching site. The troopers then withdrew to the seashore for evacuation by the navy.

Smitherman, a rifleman in Company G, entered the army in February 1953 and has been with the team 14 months.

S. E. (BUD) SPARKS

S. E. (Bud) Sparks has been appointed Continental Oil Company agent at Floydada, Texas, according to a recent announcement by T. H. Joyce, division marketing manager, Albuquerque, New Mexico.

Born at Floydada, Texas, Mr. Sparks attended elementary and secondary schools at the Lakeview schools. Prior to his recent appointment at Conoco agent, he was manager-operator of a Conoco service station in Floydada for four years.

Mr. Sparks is active in civic affairs and is a member of the Floydada Methodist church.

Sesame Merits Meeting Called

With some of the farm operators of the county interested in the possibilities of sesame as a crop on lay-out ground, County Agent W. G. Rodgers this week said a discussion meeting has been called for the night of April 15.

Four Floyd county farmers tried the crop last year and Mr. Rodgers hopes to have them present at the meeting to give their experiences. The four had about 100 acres all told.

In addition, Rodgers said, Robert Parker of Paris, manager of the Texas Sesame Seed Growers association, will be on hand to present the possibilities of the crop in this area, including methods of planting, harvesting and marketing, and costs.

The meeting will be held in the county court room at 8 o'clock the night of April 15.

Lt. Johnston Is Assigned to Reese

REESE AIR FORCE BASE, Lubbock, April 5—First Lt. Harral S. Johnston, son of Rev. and Mrs. Sidney Johnston, Route 1, Floydada, has returned to Reese Air Force Base to serve as adjutant of the 3501st Maintenance Squadron.

Lieutenant Johnston is a 1947 graduate of Floydada high school and later was a history and education major at Wayland college, Plainview. He enlisted in the United States Air Force in 1950 and served for a time at Keesler AFB, Mississippi. He became an aviation cadet late in 1951 and was graduated from the Reese AFB multi-engine pilot training program August 2, 1952, in Class 52-E, at that time getting his silver pilot wings and receiving his second lieutenant's commission. He was promoted in September, 1953.

From Reese AFB, near Lubbock, Lt. Johnston went to Randolph AFB, San Antonio, for B-29 transition, then to Lake Charles, Louisiana, for a brief tour, and thence to the Far East for the spring and summer campaigns in Korea, where he flew 17 missions. He returned to the states in September, 1953, and was an aircraft commander at Bergstrom AFB, near Austin, until recently re-assigned to Reese AFB.

City Voters Choose Clark As Alderman

Citizens and taxpayers of Floydada indicated Tuesday that they are pretty well satisfied with the way their city government is being handled.

They chose and re-elected every old official of the city who offered for a place on the city council and elevated to the mayorship without opposition a councilman who is now finishing his eighth year as an alderman.

The new mayor, come April 11, will be Lewis Norman, who succeeds J. A. Patterson, also a veteran member of the council and mayor.

For aldermen the city will have Farnell Powell, D. T. Mayo, Leonard Matler and Carl L. Minor, jr., all re-elected. One new face on the board will be that of L. L. Clark, jr.

No two of the five are in the same line of business. Powell is a grocer, Mayo an automotive agency operator, Matler a restaurant operator, Minor a radio station official. Clark, the new man on the board, operates a cleaning establishment.

All lead the ticket It is a notable fact, in connection with the election, that of the five high men the members of the old council lead the ticket, in voting that represented approximately 40 per cent of the city's voting strength.

Matsler with 217 votes led the candidates for places on the council. Minor received 212 votes, Powell received 180, and Mayo 154. Clark got 136 votes.

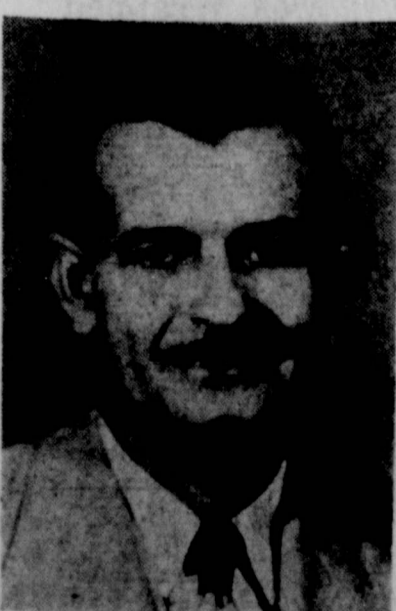

Of the six other candidates J. E. Perry received 116 votes, Melvin Henry 94, Floyd Johnston 81, K. C. Crouch 47, Leroy Burns 36, and Wiley Rogers 30.

In the vote for mayor there were write-ins for two others than Lewis Norman who received 230 votes. Carl Minor, jr., got three votes and J. A. Patterson, retiring mayor, got 11.

In the past two years an ambitious program of expansion for light and power system, for waterworks water supply, for sewer disposal and for highway widening through the city, has been carried out.

The three projects have represented an outlay of approximately \$700,000, raised by taxes, by revenue bonds and by voluntary assessments against property owners. That the voters consider these jobs done in

your confidence in me in giving me the opportunity of serving the city as your mayor. Such an expression of confidence supposedly carries with it a certain amount of honor, but when one becomes involved in the unending and thankless task of trying to answer the demands and complaints of the public it makes one wonder if the honor hasn't all been removed.

"I would like to ask the indulgence, tolerance and cooperation of all the good people of Floydada in trying to make this a better town in which to live. Your suggestions and constructive criticism will always be welcome. I am sure I speak for the entire city council and all the employees in promising you our best efforts in trying to make the complaints fewer and the service better.

"It's your city, your light plant, your waterworks. Support them and help us to make them serve you better."

A glad note in the progress of their church life first sounded 16 years ago, in 1939, by the members of the First Christian church with an Easter Sunrise service, began a custom among the church congregations of the city, which will be followed again on Sunday morning.

The hour for the service Sunday will be 6 o'clock when the call to worship will be made by W. D. Reaves, minister of the First Christian church, and the message of the early hour will be given by T. W. Condon, jr., minister of the Cumberland Presbyterian church.

Many Easter worshippers, representing other congregations of the community annually join in the service with the host church.

Dr. R. Earl Allen, pastor of the First Baptist church, will present the scripture, keynoting the worship period.

Rev. Tilden B. Armstrong, pastor of the First Methodist church, will lead the responsive reading.

Following the Easter message Rev. S. L. Wood, pastor of the Church of the Nazarene, will say the benediction.

The general public, as well as church members of all faiths, is invited to participate.

Members of the First Christian church announce that refreshments will be served in the church fellowship hall following the close of the service.

Church Plans for Easter Other services during the day, marking Easter Sunday, have been announced as follows:

First Baptist Church Dr. Earl Allen will use for his topics on Easter Sunday, "The Resurrection" at the 11:00 o'clock service and "The Ascension" at the 8:00 o'clock service. Baptism service will be Sunday night following the service.

Dr. Harold K. Graves, of Golden Gate Seminary, will conduct a revival for the church which will start April 18 and continue through April 24.

The Brotherhood will sponsor cottage prayer meetings April 12 through April 15 in some 12 homes in the community.

The W. M. U. circles will have visitation from Tuesday thru Friday morning April 12 through April 15.

Routine Voting Names Trustees

In routine balloting Saturday Floyd county school patrons named their school officials for the ensuing two years.

In this voting residents of Precinct No. 1 re-elected M. F. Goen as member of the county school board from that precinct and residents of Precinct No. 2 returned Ewald Quebe to his place on the county board. Thus the county board personnel remains the same as last year, with Fred Bettey, trustee-at-large, Bill Beedy, Precinct 3, and F. M. Covington, precinct 4, as hold-overs.

With less than three per cent of the electorate participating Goen was elected by 22 votes, 18 at Floydada, four at Sand Hill.

Quebe's vote was more lively. Of 135 counted for him Lone Star cast 19, Providence 17, Lockney 91, and northwest Floydada 8.

Floydada independent school district returned R. G. Dunlap and John P. Moss to their places on the district board, to serve with E. L. Thomas, A. T. Hull, Ralph Johnston, E. M. Collins and Aaron Carthel, holdovers.

Lockney independent district has two new trustees in Melvin Potts of Irick and John T. Carthel of Prairie Chapel, who succeed Homer Bartram and G. E. Tannehill respectively. Potts received 64 votes, Carthel 49, Bartram 43, and Tannehill 13.

South Plains district elected Bryan Karr and Grigsby Milton on the board, Sand Hill voters named R. L. Bullock, Lakeview, Louis Pyle, Lone Star, Tom Word, Dougherty, L. B. Campbell, S. J. McIntosh and Joy Ward, and at Providence the choice was Albert Scheele.

Floydada District Vote In Floydada Independent School district the vote was very light, a total of 35 votes being cast.

R. G. Dunlap and John P. Moss, whose names were petitioned on the ballot to succeed themselves as trustees, each received 33 votes, according to the unofficial returns.

Mr. Kinder Farris received one write-in vote.

THAT DID IT!
A genealogist was employed by Mrs. Newrich to work up an impressive family tree for her. The only ancestor on record turned out to be noteworthy by virtue of having been electrocuted for a crime. After some thought, the genealogist finally reported to his employer that her ancestor had "occupied the chair of applied electricity at one of our better-known public institutions."

STYLE SHOPPE
MRS. MOLLIE A. MORTON

When a friend has troubles — either at home or as the silent partner in her spouse's business — how do you take it?

Do you leave her alone, saying to yourself, "She'd probably rather not see people for awhile." Then as the days go by and you find it harder and harder to act natural with her, you allow a little estrangement to grow up.

Do you dash right over, while the embarrassment is still new, before she has time to get her poise back? Do you encourage an unwilling discussion of the whole thing? Then maybe, become the "authority" on the subject in all the gab sessions for the next few weeks?

Do you send her flowers, or bake a cake, or send a little gift, as silent token of your sympathy?

Or do you try to be with her as naturally as possible, talking of other things and not even mentioning the family trouble unless she brings it up?

If you've never had any such awkward chapters in your own family story, it may be hard to decide just what course to follow. But if you've been there it isn't hard to "put the shoe on the other foot."

Some women know instinctively what to do. And maybe the right thing will be different with each friend, depending on how close you are, the disposition of the woman who is on the spot, and the seriousness of the "spot." But if you're sincere, and fair, chances are ten to one your offer of friendship — in whatever form you make it — won't be misunderstood.

Calvary Church Revival Opens Friday Night

Cottage prayer meetings and distribution of material advertising their revival to begin Friday night have marked the activities of the membership of Calvary Baptist church this week.

Services at the church will be held twice daily, with week-day morning service at 7 o'clock and evening worship at 7:30.

Saturday morning at 6 o'clock the brotherhood will serve breakfast at the church, when the men will hear a brief message from the visiting minister, Rev. Lollar.

Reasons Why The Church of Christ IS WORTH INVESTIGATING:

You may read about it in the Bible. (Romans 16:16).

Jesus is its builder. (Matthew 16:18).

It exalts Christ at the only head of the church (Colossians 1:18).

It was purchased with the blood of Christ. (Acts 20:28).

It is not a denomination, but the spiritual body of Christ. (Ephesians 1:22-23).

It has no creed but the Bible, accepting God's Word as sole and final authority in all religious matters. (2 Timothy 3:16-17; 1 Peter 1:3).

It speaks where the Bible Speaks and is silent where the Bible is silent. (1 Peter 4:11).

Its members wear no name but Christ's. (Acts 11:26; 1 Peter 2:11).

Its acts of worship are patterned after the New Testament. (John 4:24).

It pleads for the unity of all believers in Christ (John 17:21).

It is the custodian of God's wisdom. (Ephesians 3:10).

It teaches that Scriptural unity can be attained on disputed doctrinal questions. (1 Corinthians 1:10).

Its aim—to save souls by preaching the gospel, teach godly living, and help all those in need. (Corinthians 15:1-4).

Its destiny—eternal glory with Christ. (Thessalonians 4:17).

League Changes Are Submitted To School Vote

(By Kenneth Rimmer, staff sports writer)

Member schools over the state will vote this month on several recommendations which have been offered that would change the Interscholastic League set-up.

The League's special football and basketball classification committee made seven recommendations that are appearing on the April ballot. Among these are such important issues as eliminating the "voting in" rule in all classifications, the creation of 16 districts in AAA and AAAA, that the enrollment figures be re-evaluated in two years, and several other matters.

Some of the objections raised by present alignment procedure are (1) traffic hazards due to long trips (2) financial loss because local fans are unable to attend the games, and (3) loss of school time.

Skim Off The Larger

The recommendation on increasing the size of the big school set-up in the state to 16 districts in both AAA and AAAA has created a bit of interest in the voting locally. Football and basketball fans can see that if the number of teams participating in these classifications are increased these new members will have to be moved up from the class AA bracket to fill in the ranks.

The 4A teams now number 53 schools and are divided into 8 districts. To increase to 16 they would have to skim off the larger schools in 3A. Some thirty of these would move up to the higher class. This would probably catch such schools as Plainview and Big Spring in west Texas.

The 3A schools now number 58 throughout the state and are formed into eight districts. But if this class loses 30 members to 4A they must then dip into AA ranks to be able to form 16 districts. To do this they would need to pick up 44 schools.

Lower Top Enrollment

As class AA now stands the enrollment runs from 225 to 550. Under the new plan the top enrollment would probably be set at around 390 in order to move up a sufficient number to fill the ranks. This probably would not change anything as far as district 5AA goes and would not change anyone on the Whirlwind schedule. It would move up Littlefield out of Lockney district.

When you take a look at who it would move up then you can see

how it would change the state playoffs at the end of each season.

The big boys of class AA who number above 390 are Dumas, Hereford, Phillips, Electra, Colorado City, Brownfield, Kermit, Littlefield, Monohans, Pecos, Graham, Mineral Wells, Weatherford, Birdville, Carrollton, Sulphur Springs, Carthage, Gladewater, Jacksonville, Huntsville, Spring Branch, Ennis, Waxahachie, La Vaca, Waco Tech, Killeen, San Marcos, Brenham, Bay City, El Campo, Lamar, (Rosenberg), Beeville, Fort Lavaca, Alvin, Silsbee, Vidon, Eagle Pass, Uvalde, Edgewood, South San Antonio, Robstown, Mission, Weslaco.

Picks Off The Champs

This change if made would get about half of the district champs in football from last season and get both of the state finalists. From the point of view of most Whirlwind fans the suggested changes would seem ideal. After being a small school in AA ranks for a number of years they would become big dogs for awhile, just under the 390 cut-off point.

With a spread of from 225 to 390 (16) the AA districts should then be very closely matched and produce some of the closest games in the scoring columns. A district champion from either Floydada or Lockney would have a much better chance of going on to state and would not come up against a school twice their size in the play-offs.

If nothing else it will reshuffle things to where some new schools would be the big wheels for a while—if the propositions pass as recommended. The new classification would probably go into effect in 1956.

Three Floydadans Leave Today For Military Service

Five Floydada ministers have agreed to work on the project of getting 50 pigs for shipment and have been promised the encouragement of local Extension Service people. Rev. Tilden B. Armstrong said.

Details of the need and plan will be given out at once. The pigs, if they are provided, must sail from Houston on June 1.

ripe apples serve the same purpose when the hormones cannot be used — as in the case of seed potato stock. According to Donald Comin, horticulturist at Ohio State University, ten pounds of ripe apples give off enough gas, ethylene, to stop the bud growth of one bushel of potatoes in an open bin. But if the potatoes are stored in lined packages which confine the gas, one apple per bushel is sufficient. "As I read the above I couldn't keep from thinking how welcome this information would have been years ago - as a child I grew up in the Ozark Mountains where we raised our vegetables, fruits, and most of our foodstuff. The potatoes and apples were stored in bins in the cellars for winter use. When the potatoes sprouted they were gone over and the sprouts broken off to keep the potatoes from shriveling — of course, the children were just the 'right size' for such as these — now, wouldn't it have been nice had they known the secret of putting some apples in the bin with the potatoes?"

VIEWS AND COMMENT

IMMORTALITY OF TRUTH
(Contributed Easter Editorial)

Those who put Jesus to death feared His teachings. His execution was to put an end to His disturbing influence, once and for all. Let him die in pain and disgrace, they said, as a warning to all who dared to be counted among His followers.

He stood before His accusers, before Pilate and the priests. He neither protested at their lies nor showed anger at their derision. He walked the lonely road to Calvary and died on a Cross between two common criminals. That should have been the end of the story, if His persecutors were right.

Yet almost 20 centuries after this happened we celebrate Easter as the commemoration of the triumph of the spirit over death. The Cross on which He died has become the symbol of the immortality of truth. The ideals He taught, which were to die with Him, remain as the best hopes of man.

The drive for cancer research funds is on in full swing over Texas and presumably over the nation. Note the lack of a campaign in Floyd county. Reason: the fund was raised in the campaign in November, in the United Chest drive, and the Cancer Society has already had a check for the amount that was asked for. The single shot one-drive idea continues to save leg work and time and expense for Floyd county people.

Although Mr. Mahon and other farm country representatives in Congress are battling for a higher per cent of parity for the sorghum grain crops of the southwest, they write back home of frustration, inability to get their point over in the Department of Agriculture. The department insists that it is going to be good for the country for the price of maize to look down. May be a good thing. It will be hard medicine to take.

The mounting expense of the military establishment of the country is brought into relief by a not-too widely quoted statement of Representative George Mahon of this district. Mr. Mahon is chairman of an important subcommittee of congress which has the job of loose herding the \$34 billion military budget. The billion 800 million dollar increase in pay for the personnel may or may not be

wise. It was justified by the statement that the army had to give an increase in order to hold their trained men in the service. Mr. Mahon's statement expressed a doubt that the military is prepared to mount an all-out war. He also doubts that the guided missile program is as well along as the general public believes. The guided missile program may be in about the same state of readiness as the army was when the Korean conflict broke out. With all the billions the bigwigs of the service were spending of the taxpayers money they could not put a fully equipped, ready to fight division into the field for 60 days.

Long range weather prediction of the U. S. weather bureau for the next 30 days is that this area will have more than the usual amount of moisture and will have temperatures lower than the average. It is true the rains have crept westward from the coastal areas and the Mississippi river. There is reasonably good underground moisture as far west as nearly to the caprock. In some periods of dryness in former years the old-timers speak of the rainfall as "gradually moving west." We can take some of it.

It is not a gripe but a statement of fact that whereas the cost of the things that go into the production of a crop and the maintenance of a farm continue to edge upward the price for farm-produced commodities continues to edge downward. In the squeeze the remainder for profit is getting to be razor thin in good many farm lines. This applies to the man who has been having a crop. To the west Texas man who has tried but has been routed by dry weather at each attempt for two or three years the situation is a ready-made depression, regardless of what may be parity, fair or unfair prices.

CODE OF THE ROAD

Courteous driving will save lives. My code is Courtesy. I will not be the cause of an accident. I will:

Adjust my driving to road, traffic and weather conditions.

Social Security Has New Angle For The Disabled

"Workers and self-employed men and women under 65 who have been totally disabled for at least six months and who have worked in jobs covered by social security for a substantial time may benefit from an entirely new provision in the Social Security Act," Mr. John G. Hutton, manager of the Lubbock, Texas social security office said today.

This amendment applies equally to those who are now disabled and to those who become disabled in the future. Similarly, some retired workers who are now receiving monthly social security checks may be favorably affected if they are still disabled as the result of a disability which began before they reached 65.

"This does not mean that cash payments based on disability are now possible under the social security program," Hutton cautioned. "It does mean, however, for the first time, that periods of prolonged disability will not count against some

wage earners or self-employed persons in figuring the amount of their average monthly wage on which old-age and survivors payments are based.

Mr. Hutton explained that under the social security law in effect before the 1954 amendments the average monthly wage had to be figured from a specified starting date until the worker became 65 or died. Those who could not work over a long period of time because they were disabled had their average earnings reduced by these periods of no earnings or of low earnings. In addition, the months of disability also had to be counted in figuring whether or not the individual had worked sufficiently long in jobs covered by the social security law to be eligible for any old-age or survivors insurance benefit.

"Under the new law, average earnings and eligibility requirements will not be affected by the period of disability," Mr. Hutton stated. "In effect, this means that the amount of the social security benefit at death or at 65 would not be impaired by inability to work during lengthy disability periods.

Qualification for use of the "disability freeze" depends on these factors:

1. The worker must be totally disabled by a medically-determinable illness, injury, or other physical or mental impairment which can be expected to be of long-continued

and indefinite duration. This condition must have existed for at least six months, and he must still be disabled at the time of filing his application for a determination of disability.

2. The worker must have been employed or self-employed for a substantial period of time in occupations covered by the social security law before onset of his disability. A "substantial period of time" means 5 years of coverage out of the 10 years before the disability, of which time 1 1/2 years of coverage must have been in the 3 years prior to disability.

"Any worker under 65 who believes he qualifies under these conditions should get in touch with his nearest social security office to file an application for a determination of disability," Mr. Hutton advised.

Hutton said a representative of his office will be in the court house, to assist in matters pertaining to social security.

As A Farm Woman Thinks

(Nellie Witt Spikes)

May the joy of Easter be yours this blessed time of year. Altho on the plains we see not much sign of the spring, we know it will come in its time. The dormant seeds will come forth from the dark earth and our land will be green and lovely again. The following poem by Flora Smith Dean is one I love and I am sure you will find a place for it in your life.

Easter

The world is often dark and dreary; Cold and sad our hearts are weary; Death and winter rule the land But in our hearts we understand. After winter comes the spring After death we live again; After darkness comes the light, Day must always follow night. Out of earth's cold winter prison All things must wake, our Lord has risen! When He left the tomb on Easter morn For this sad earth, new hope was born. After the winter so cold and dark Sweet to our ears the song of the lark. Out of the warmed earth, lilies spring, And in our hearts, the angels sing. . . .

Some how some of the recipe of the Divinity Fudge Cake icing was not in my last week's column, so I will give it again. Sorry.

Chocolate Fudge Icing

Mix—2 cups sugar with 2 tablespoons flour or cornstarch. Two tablespoons cocoa. Then add 2 tablespoons Karo and one cup milk. (When done add 1 tablespoon butter and 1 teaspoon vanilla.) Cook the icing till it makes a firm ball in ice water. Ice cake while still warm and place under a covered cake dish. Wilma cooks the cake in two layers and ices between the layers and on top. . . .

Mrs. Fred M. McGinty of Tahoka took time to send me a recipe for chess pies. She writes of a treasured friendship with my cousin, John Witt and his wife, Vera, also of Tahoka. And also she tells me that Ella Wheeler Wilcox is the author of the poem I used recently called "The Two Kinds Of People. Thank you a million, Mrs. McGinty.

Grandmother McGinty's Chess Pie
3/4 cup butter. 1 1/2 cups sugar. 1 heaping teaspoon flour. Mix these together and cream. Six eggs separated. Beat yolks slightly and add to above mixture. 1 cup milk and mix well. Place in two raw crusts and bake until firm. The recipe does not say but I am sure the egg whites are beaten and baked as a meringue on top. . . .

Mrs. Emma Noble was buying groceries yesterday and added some aspirin to her list. "They say there will be a sand storm tomorrow and I want to be prepared," she laughed. My arms are sore from hoeing up wild rye out of the lawn. It is very bad this year.

Big news about

Buick's 4-Door Riviera

THIS brand-new kind of automobile—the sensation of all the Auto Shows this year—is now rolling off the Buick assembly lines in volume numbers. That's the first news.

And the second is just as wonderful—this dramatic new model is very definitely everything that eager buyers hoped it would be.

For the 4-Door Riviera is the first "hardtop" ever available with separate doors for rear-seat passengers—plus rear-compartment room big as a Buick-size family sedan.

It comes breezing in with all the low-lined sweep and wide open visibility of Buick's original 2-Door Riviera—and with luxurious new spaciousness in

its sizeable and full-length 4-door body.

With windows down, no posts appear for the rear doors, and you get a completely unobstructed view at both sides.

You find rear doors are hinged at their front edges to swing wide and free, and assure easy entrance and exit.

And you'll find legroom, headroom and hiproom extra-generous both front and rear—with interiors tailored in fabrics and patterns specially reserved for the 4-Door Riviera.

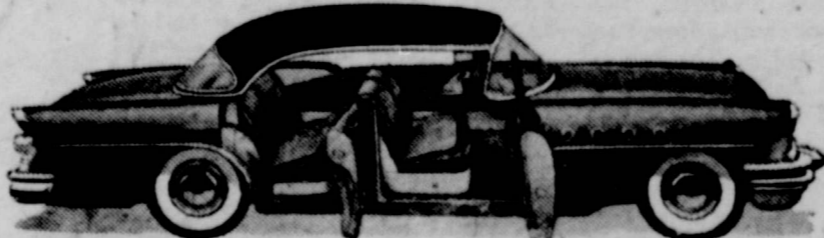

Best of all, this new Buick beauty comes off the line in both the low-price SPECIAL Series and the high-powered CENTURY Series.

So you can pick your 4-Door Riviera with the potent performance of a 188-hp or 236-hp Buick V8 engine—the swift get-away and gas saving of Variable Pitch Dynaflo*—the velvet stride of the Million Dollar Ride—the long list of Buick bonus features at no extra cost—and all at "great buy" prices that have helped move Buick into America's "Big Three" of best sellers.

But—better come see us about the 4-Door Riviera now.

With all-out production—and a prompt order—this newest excitement in cars will be yours that much sooner.

*Dynaflo Drive is standard on Roadmaster, optional at extra cost on other Series.

The hard working men and women of our local school boards have often done the "impossible" in coping with our rapidly growing school needs. For what they have accomplished—they deserve our greatest gratitude.

But with school needs still growing, they need more than our thanks. They need our active support, individually and through other community groups.

Let's help them, not only to solve current problems, but to plan a program that looks at least ten years ahead to insure the future education of our children.

Highlights And Sidelights From the State Capitol

Austin, Texas—Two big proposals for the state's water conservation program won in the Senate.

One is Sen. Dorsey Hardeman's \$100 million state bond issue for aid to local projects. It calls for a constitutional amendment vote in September. The other is an enabling bill to start operations if and when the amendment is passed.

House sponsors on this, and on the Parish \$200 million bond bill to aid local projects have delayed calling for final action. They don't think they have enough votes.

TAX BLANK

An openly hostile revenue and taxation committee shunted Rep. Jerry Sadler's \$160 million-a-year gas processing tax bill to sub-committee.

It would levy a 1-cent tax on all Texas gasoline and repeal the 4-cent gas sales tax. Opponents said it would bring a 19-cent cut in crude oil prices, costing Texas \$190 million a year.

The committee left buried the two bills embodying Gov. Shivers' original tax program. It included a 2-cent hike in the 4-cent gas tax and a 1-cent boost in the 4-cent cigarette tax.

This confirmed last week's report that administration forces had abandoned the two single-shot revenue bills and pinned new hopes on Revenue Chairman Stone's omnibus bill. It would permit increases in any of the 100-odd present taxes.

The billion and a half dollar House general appropriation bill (for two years) was passed by the senate which substituted its own version.

When the house refused to concur in Senate changes, the way was opened for a joint conference committee to resolve the differences. Lieutenant Governor Ramsey has named five senators to the committee and House Speaker Jim Lindsey five.

DELAYING ACTION

Special session speculation again comes up.

Sen. Jimmy Phillips saw his filibuster record fall this week to Sen. Wayne Wagonseller.

Like Phillips, however, Wagonseller lost his battle. As soon as he stopped talking, the senate tentatively approved the bus registration fee measure he was fighting.

When it was all over, weary Senators suddenly discovered the marathon talks had killed two full "house bill" periods in the senate, with only one house bill passed in two weeks.

Observers saw that, with Shivers' entire program still hanging fire, and four more Wednesday filibusters in the senate capable of killing all of it, a new switch in administration strategy might be possible.

Thought was that Governor Shivers might ask the Legislature to lay aside the tax bill and the appropriation whopper, and pass other legislation before theoretical adjournment May 11.

That would mean his calling a special session on taxes and the appropriation bill. Appropriations must be in effect September 1 to keep the wheels of government turning. He would have control in a special session, lacking now.

POINT WON

At any rate, the Governor won his point on the bill regulating securities.

As the legislature headed for what looked like its worst jam in the final month of session, he made a firm request that the house adopt a senate bill regulating securities, particularly bringing certain trust company stocks under state supervision.

"I hope the House will disregard frantic efforts of certain speculators, promoters and others, . . . and vote final passage," he said.

It did.

LAND CASE

Bascom Giles' legal troubles mounted when a group of San Antonio GIs filed a civil recovery suit in 53rd district court.

Asking \$33,000 judgement against Giles, the veterans charged that he made that much in "personal profit" out of a veterans land deal.

At the latest count, Giles faced two criminal indictments, charging conspiracy to commit theft of state funds and accepting a bribe; four felony theft charges, and four civil recovery suits.

Twice Giles has refused to testify in court about the veterans land scandals and charges against him.

"OPEN DOOR" BILLS
Attorney General Shepperd has expressed "deep hope that action will be taken on the open door to good government bills during this session of the Legislature."

Most of the bills have been reported favorably by house committees, he pointed out, but some still are being held for further committee study.

"They are sound, logical proposals to aid better government in Texas, to give the people a bigger voice and to more quickly reveal official wrongdoing," he said.

Shepperd referred to 13 bills dealing with full public disclosure of public records and funds. All are pending in the house of representatives.

Most of the 13 bills have been introduced and backed by the Texas Press Association and other groups interested in good government.

Dr. Kenneth McFarland, educational consultant and lecturer for General Motors Corporation, is one of the featured speakers on the golden anniversary conference of District 163 of Rotary International, to be held in Midland, April 10, 11 and 12. Rotary president Bill Brown said several will attend from Floydada.

CROSS FILING

Cross filing in political races is out as a result of a bill passed by both houses and signed by the governor.

This bill by Representative Maury Maverick of San Antonio, removes from the law a sentence allowing candidates to run "as the nominee of two or more political parties for the same office."

Controversy arose over cross-filing when Governor Shivers and other state candidates were listed in 1952 as the nominees of both the Democratic and the Republican parties.

Here's why **MORE PEOPLE ARE BUYING PONTIACS** than ever before!

1. You can buy a big, 200-H.P. Pontiac for less than many models of the lowest-priced cars and much less than stripped economy models of higher-priced makes!

2. Only Pontiac gives you luxury-car size plus the sensational Strato-Streak V-8!

Biggest car at its price (122" and 124" wheelbases) • Most powerful car at its price • Only car at any price with distinctive Vogue Two-Tone Styling and the riding and driving ease of the Shock-proof Chassis.

You don't have to look far to find the reason for the tremendous surge to Pontiac. No further than the fact that only Pontiac produces cars that compete with the costliest in size, smartness and power, yet carry a price tag that is well under many in the lowest-price field.

That's what brings people in to see and drive a Pontiac—a value story they simply can't afford to overlook. And once they do—once they get a close-up of America's most distinctive styling . . . once they sample the superlative roominess and comfort of

Pontiac's luxury interiors . . . once they try the pulse-racing thrills of exclusive Strato-Streak V-8 performance—they lose interest in every car but this.

Come in and get the rest of the story. See, drive and price this high-powered future-fashioned beauty. You'll find that if you can afford any new car you can easily afford a Pontiac.

Deadline Nears On Income Tax Report for '54

The same period in 1954 Internal Revenue received 1,968,679 letters. The 510,000 pieces of mail difference is caused by the change of the tax filing deadline from March 15 to April 15. Based on the mail receipts, revenue officials estimated that 450,000 North Texas taxpayers have taken advantage of the April 15 deadline granted by Congress last year.

Mr. Barkley concluded by urging taxpayers that have not filed their tax return to promptly study their instructions, prepare their return check the return carefully to avoid errors, and mail the return. The 450,000 taxpayers who have not yet filed can help the government avoid a last minute deadline filing rush.

Hybrid Grain Outlook

Present plans call for the distribution of this hybrid seed to farmers in sorghum producing areas for field trial and comparison in 1956. Seed growers who participate in production this year will be eligible for larger and more extensive production next season, also. This should result in the availability of a large supply of hybrid sorghum seed in 1957.

Production methods are somewhat technical, requiring the planting of two rolls of pollinator seed adjacent to six rows of male sterile growths. The hybrid seed is produced from the male sterile rows and the pollinator seed rows are discarded for seed purposes.

Inspection will be made by TDA men. Rules and regulations of production have been tentatively adopted by the State Seed and Plant Board. These "Seed Certification Standards" help assure the producer of high quality seed.

These objectives are the primary purpose of field seed certification activities of the Texas Department of Agriculture.

One tax return may be processed and the check mailed out in a very short period of time—even less than a month. Another may have been mailed on January 1 and because of hitches in processing the return the check may not be mailed until June.

Taxpayers can help the Internal Revenue Service to expediate the mailing of their refund checks by being patient and not writing or calling to inquire why they have not received their refund. Mr. Barkley stated the Internal Revenue Service is not in position to expediate the processing of any refund check, no matter what the circumstances may be.

The mail receipts from January 1 through March 24 amounted to 1,458,369 letters. Most of the letters contain income tax returns. During
