

Doris Campbell Reports on FHA Galveston Trip

(By Doris Campbell)

Let's take a trip to Galveston with Pat Helms, Doris Campbell and Mrs. Enmons.

Wednesday we left Lubbock at 7:15 p. m. by train with over 130 girls and sponsors from Abernathy, Slaton, Matador, Levelland, Lubbock and several others.

We arrived in Galveston at 10:00 Thursday morning. After scrambling with our luggage and pushing through the crowd, we finally arrived at our hotel about 11:00. We stayed in the Galvez, the largest hotel in Galveston, which is very pretty. We had our meetings in the Marine Room on Pleasure Pier, which is out over the water. We had Thursday afternoon to do anything we wanted to do. We looked over the Island and registered at the Bucanero hotel and then went to our hotel to rest.

A very exciting experience was eating at the "Dreamland Cafe." It was also out over the water, and the sea gulls flew all around outside. As we held food in our hands out the window, they would fly by and snatch it.

At 9:00 Friday morning we attended the meeting of speeches group singing, and entertainment. We also had the presentation of colors. Men from the Galveston Color Guard, R. O. T. C., presented the flag and the audience arose and gave the allegiance to the flag. We heard a very wonderful speaker, Rev. Kerr, whose speech was about "Peaceful Thinking—Peaceful Living", which was the F.H.A. convention theme.

We were served lunch in the Exhibition Hall on Pleasure Pier. We had barbecue and that night we enjoyed a fish fry. Over 3500 people were served the meal in about 45

minutes each. At 9:00 Saturday morning we attended the meeting for the installation of state officers; it was a beautiful sight. All the incoming and out going officers were dressed in white and wore red roses.

The night meeting was composed of skits on "Living is Fun" for individuals in home, F.H.A. chapter school, and community.

About 3:30 Saturday afternoon four busses took 130 tired, but happy people to Houston to catch the train for home. Before leaving we were served our evening meal in the diner. We arrived in Lubbock Sunday morning about 7:30. This 1955 State F.H.A. meeting will always be treasured and remembered.

Center News

(By Mrs. J. E. Green)

CENTER, April 27 — We have one still day then two or three windy, dusty ones. If you don't have a good door on your cellar you will look in one day and find it filled up with dust and sand.

Didn't we have a stormy day for the Lighthouse program? But it didn't seem to reduce the crowd much. So much good dinner the club women brought. Surely nobody went away hungry and surely those who drew prizes went away happy.

Bro. Roy Scott of Floydada filled our pulpit Sunday. In the morning service his subject was "Christ, the anchor of the Soul." His text for the evening service was "Choose ye this day whom ye will serve." Bro. and Mrs. Scott and daughter were dinner guests of Mr. and Mrs. J. E. Green and family.

Dionne Quints Reach This May

The following spring the 20-year-old sisters — except Marie whom the others had missed tremendously — returned once more to their home. And then, in rapid succession, came three baffling reports. First, there was the story that Marie would soon be leaving her convent for reasons of health. Then, on July 16th, Emilie was found in a confused condition wandering the streets of Montreal. Twenty-one days later came the shocking news that she had died in a Catholic old people's home in St. Agathe, Quebec.

"Her family had known for years that Emilie was an epileptic, but had seen no reason for making the fact public. She had suffered her first attack shortly before her eleventh birthday, and the illness had been diagnosed, according to her father, by Dr. J. E. Ildor Joyal, a French-Canadian physician in North Bay.

"Later, Olivia told me, he had taken Emilie to a child specialist in Ottawa, and five years before death she had been examined in Montreal by the noted brain surgeon Dr. Wilder Penfield. All of these years she had received expert medical attention and had been given the latest drugs used in the treatment of epilepsy.

"She seemed to tire much more easily than the others, so when last year, she asked to go to the home in St. Agathe for a rest, her parents readily agreed. On the day before her death, Emilie suffered three successive seizures. No doctor was called. The next morning she refused breakfast and remained in her room. A short while later she was found dead, smothered in a pillow during another seizure. It was only then that a doctor was summoned.

"I have no way of knowing whether or not Emilie was neglected at the home," Olivia Dionne told me. "By the time I was notified, she was dead. There was nothing anyone could have done to her then. I didn't even try to find out the details. What was the use?"

"The picture of the Dionne quintuplets today is quite different from the future visualized for them by Dr. Allan Roy Dafoe when they were small children in his charge. The doctor had often spoken of his hope that the girls would be brought up like little princesses, able to hold their own in any company, equally at ease with crowned heads and common people. However, instead of princesses, they have become introverted, confused, unhappy young women. But it seems reasonable to expect that these girls will still be able to surmount the obstacles of adulthood and live fruitful, rewarding lives." —Redbook.

Customers Are Demanding Lean Pork On Table

COLLEGE STATION—Consumers are demanding leaner pork. Because of this, farmers are striving to raise hogs that meet consumer approval. Hogs that yield 50% or more lean cuts such as ham, loin and shoulder are the most valuable on the market.

Pork tops the April plentiful food list of the U.S. Department of Agriculture and prices are lower than last fall.

Lean pork is a rich source of high quality protein and vitamin B, says Mae Beele Smith, extension specialist in consumer education. In quality pork, the lean meat should have a light rose or grayish pink color and be marbled with fat. The outside fat should be firm and the bone center pink.

Pork loins are a good buy, says Miss Smith. The center cuts are more expensive because of the greater percentage of lean meat. The shoulder end is the source of rib chops, rib roasts, and back bones. These have slightly more bone and fat, but are a relatively good buy. The loin end furnishes excellent roasts and is good to boil with vegetables.

It's always desirable to have fresh pork cooked well done. The safest way is to use a meat thermometer and an oven temperature of 325 degrees F, she says.

Hydrogen is the lightest element.

Masonic Lodge Will Honor 25-Year Members

Floydada Masonic lodge has in its membership 46 persons who have been past masters of this lodge, past masters of other lodges, or have been master Masons for a quarter of a century.

These will be honored Thursday night of next week, according to Jack Stansell, master of the lodge. The lodge also has one member who is a 50-year member who also will be on the list to be recognized Thursday night.

In the list of 46 to be recognized are 24 living past masters of this lodge and seven members who are past masters of other lodges. Twelve of the past masters are also on the list of quarter century members.

Tom W. Deen is the member who will get a 50-year pin. He was made a Mason in the year 1903.

Ninety-sixth District Deputy Grandmaster Doyle Hooten, of Tulla, will represent the grand lodge of Texas at the ceremonies and will present the pins.

Dinner at 7 o'clock at the lodge hall will precede the meeting. All master Masons are invited. Mr. Stansell said.

PATTERN OF LIFE

Parental Responsibilities Must Be Accepted in Rearing Youth

(By Mrs. Kinder Farris)

"We the people—in order to secure the blessings of liberty—So reads a portion of our constitution. A very brief portion as far as the number of words, but a very important fundamental in our pattern of life. We never question the fact that our liberty is a blessing; but now and then arises the question as to whether "I" am really responsible for helping to secure that blessing, or whether "My neighbor" can do it just as well without me!

There are many ways to "secure the blessings of liberty". At a recent meeting of the Andrews ward P. T. A., James Word made an outstanding talk on how we may help do this through individual responsibility in the guiding of our youth.

Mr. Word has long taken a keen and active interest in the development of the future citizens of Floydada, and he treated his subject with serious thought and enthusiastic challenge.

WHERE AND WHEN

"Too often we give our children three meals a day, a roof over their heads, and the use of the car. We think we've done our duty," said Mr. Word, "but actually our responsibility has just begun. We need to know where that kid goes in the car and when he comes home!

"If we pay no attention to his activities, seem unconcerned except when he may get caught in some mischievous act, then we can't blame him for what he finds to occupy his time."

Much emphasis was placed on the fact that our boys and girls appreciate and want our attention. "A boy works hard in Scouts to win an award. It means a lot to him and he wants his parents at the meeting to see him receive the honor. Too often we're too tired to go with him—but we make the effort to go somewhere else! It's not fair to the boy."

THE PARENTS JOB

Our youth deserve credit for their accomplishments, and they want praise to come from us. "We must encourage them, take time out to listen to their problems and complaints," Jim continued. "We can't expect the school teacher, the Sunday school teacher and the scoutmaster to raise our children. That's our job."

Recreation for our boys and girls has been an "off-and-on" topic of discussion for some time, but with interest building up, it is well for all parents to consider seriously their responsibilities toward the possible development of better recreation facilities.

It isn't far-fetched to believe that Floydada may have several additional recreation developments in

the future. Boys and girls want them and need them. Whatever these developments may include, however, the parents must participate in order to make them successful and beneficial.

"It will not be the responsibility of a few people, but the business of every mother and dad," Jim offered, trying to impress upon his listeners the real importance of properly supervised play.

"We talk a lot about giving our youth more freedom, but if we are not careful we can abuse that word freedom, literally run it into the ground, so that it ceases to be a blessing and privilege and becomes a detriment."

Mr. Word concluded with the thought that "freedom in anything must be tempered, disciplined; and that is our responsibility—yours and mine."

Mrs. Ruth Daniel Is Club Hostess

Mrs. Ruth Daniel was hostess in the home of Mrs. C. A. Caffee Wednesday, April 20, when the Dougherty home demonstration club met.

CLINIC OF LAST RESORT

Day after day people turn to the clinic of last resort, in search of a flicker of hope.

Sick people of all conditions are trying various methods to get well — after spending much time, during which they usually get worse, and spending much money they are disgusted and depressed because they are still sick.

In some remote way they hear that chiropractic might help them. After much deliberating they decide there is no alternative so they come to a chiropractic clinic as a last resort.

Upon getting under chiropractic care they find themselves getting well. Then they wish they would have tried chiropractic as a first resort instead of last. Below are 3 examples of such people.

CASE NO. 168 Female age 38 complaints: Nervous irregular pulse. Headache each morn, shaking spells of entire body for 2 years.

CASE NO 144 Male 38 Complaints: Pleurisy for 4 years. Sinus for many years. Left elbow numb.

CASE NO 110 Male Age 53 Complaints: Urin burns, feet swell, lungs ache, gall bladder trouble, constipation, hips numb, pain down one leg, 4 - 5 dizzy spells per month.

These people have responded under chiropractic care and are completely free of clinic entrance complaints.

Why didn't these people try chiropractic before? — They had no idea what chiropractic actually is. Why didn't they know? — Because they had heard rumors from people who also didn't know. Secondly, because people do not have the opportunity to learn about it until they get under chiropractic care. One of man's worst offenses is **Condemnation before investigation.** Find out what chiropractic is **From Your Chiropractor.** He will tell you what chiropractic is and after a spinal analysis he will tell you if chiropractic can help you. So long as you are breathing there is still hope

The Taj Mahal in India was built for the favorite wife of the Emperor of India, Sha Jahan.

In the beauty parlor the other day we saw a bouncy little girl of three in a blue-checked frock. Her mother and five-year-old sister were getting their hair done. She sat quietly for awhile then began to squirm. Her mother, with what seemed unnecessary firmness, told her to keep her shoes out of the chair or she'd be spanked. The little one, pouting and hurt, returned to her chair.

Soon she sensed our sympathy and began to play on it. She launched into a fascinating story about "the packing box" which they had opened the day before, describing dress after dress that had emerged from it. As she talked she arched her eyes, turned her pretty little head, and sometimes embroidered the facts. Everyone in the shop was laughing at her antics. The mother, who at first had appeared cruel, was evidently doing a good job at keeping in hand a natural flirt.

Our neighbor's granddaughter, who comes over often, is a charmer, too. Her father is away from home some and she has learned to play him against her mother when he returns. Withholding a decision already handed down, she'll innocently ask for and get his permission to do something. She uses the same technique with grandmother against mama, with the baby-sitter against grandmother, with us against the

baby-sitter. She's a mix, and most of us happily play into her little game—creating a problem for parents who are trying to do a good job.

Almost every grown person is a ham grandparent at heart. We like to enjoy cute children without the day-in-day-out responsibility for bringing them up. But if we've got an ounce of fairness in us, we'll resist their instinctive cunning at making us traitors to the parents who've got to transform them somehow into people instead of toys.

Federated Clubs Hear Play Reviews At Guest Day Tea

The Federated Study Club's guest day was observed Thursday, April 21 in Fellowship hall at the First Christian church.

The plays reviewed were "Anastasia" the story of a Russian princess, and "The Flowering Peach," the story of Noah and the ark. Short comments were given on several of the better plays. Mrs. Rowley's audience was appreciative and entertained. The clubs look forward to each review by Mrs. Rowley.

Following the reviews the club members and guests were welcomed to the dining room by a receiving line of club presidents and chairmen of clubs; Mrs. E. E. Joiner of the 1929 study club; Mrs. Bob

Copeland of the 1950 study club; Mrs. J. B. Jenkins of the 1922 study club; Mrs. H. G. Barber of the 1934 study club and Mrs. Virgie Shaw, chairman of the club council.

The club members were happy to have the privilege of hearing Mrs. Rowley.

Approximately 140 ladies were present.

Yes, indeed... biscuits go like hot cakes when you pour on plenty of delicious Karo waffle syrup. There's nothing like it for good eating. Satisfyin' flavor. So rich it stands right up on top of biscuits (keeps 'em light and fluffy). Keep Karo on your table morning, noon and night... it tops anything!

UNLUCKY DAY 13th Conviction Brings Sentence of Year in Jail

Jesse Walker, Floydada's perennial colored salesman of illicit intoxicants now may well consider the misfortunes that go along with the number 13.

This week he was up before the bar of justice for the 13th time in Floyd county, and on a plea of guilty Wednesday morning was sentenced a fine of \$500 and a year in jail. Heretofore the punishment for possession of intoxicants in quantity has brought fines and sentences but none so stiff as this one.

A year in jail is a goodlong time for a man to spend in meditation.

Stewart had quite a supply of intoxicants that Sheriff Cooper and his deputies Walter Hollins and Ray Hardin confiscated Saturday in a raid on his premises. In one unoccupied rent house belonging to him they found 20 pints of Hiram Walker, 16 quarts of Schlitz beer and 54 twelve ounce cans of Schlitz beer.

At his home they confiscated five pints of wine, 1 pint of Hiram Walker and a little bit of beer. In another unoccupied rent house belonging to him there was a case of Schlitz beer in quarts.

Roy Woodward, Negro care owner, also ran into grief through the possession of intoxicants, which the officers maintained was for the purpose of sale. He turned over 13 pints of wine, 12 pints of Hiram Walker whiskey, six pints of Sunnybrook, 21 half-pints of Haven Hill and a small quantity of Five O'clock gin. His premises were searched at the same time Saturday that the haul was made on Walker's premises.

Woodward's fine was \$500 and court costs.

Judge Grimes was the presiding judge. District Attorney John B. Stapleton acted as state's attorney in the absence of County Attorney Kenneth Bain, Jr.

Cook book business was good Saturday during the annual meeting. Here are shown (from left) Mrs. J. E. Wheelock and Mrs. A. H. Chappell of Silverton, buying from Mrs. Harry Morckel, Lighthouse economist, Mrs. John Smitherman and Mrs. W. C. Snodgrass, of the cookbook committee. The 292-page cook book contains hundreds of recipes tested in West Texas homes. Also it contains several recipes for favorite dishes of notable personages, including two from Mrs. Allan Shivers and one from Mrs. Mamie Eisenhower.

Consumers Fuel Re-Names Same Official Board

The biggest dollar volume of business in its history was racked up by the Consumers Fuel Association of Floydada in their year ending March 31, it was revealed at Monday's annual meeting of the stockholders.

Gross volume for the year was \$375,583.99, up \$43,000 from the year previous. Quantity volume of sales was above last year in all commodities handled by the concern, except for a fall-off in kerosene sales.

J. K. West, president, presided at the session held in the district court room at 2 o'clock. Figures for the report were made by a public accountant. Attendance was good.

Conley Bradford, son of Mr. and Mrs. Floyd Bradford, sang for the group. Attendance awards were distributed during the meeting to a considerable number of those present.

C. O. Spence and R. M. Battey were chosen to succeed themselves on the board of directors. The board was re-organized following the stockholders meeting by re-electing West president, Battey, vice-president and Albert Mankins, secretary-manager.

Mankins is beginning his third year as manager of the cooperative.

VIEWES AND COMMENT

Is Spring Here? Four o'clocks and red buds, hibiscus and goat heads, all seem agreed that it is. Also note that many plum bushes have bloomed. The weather has been all mixed up for four years and it may still hold a stinger but plant life seems to agree that it will not. Red ants would make it unanimous if they made appearance, which they haven't, so far as our observation goes. Note that whereas man carries on his deadly experiments with nuclear fission Nature continues serenely, night following day, good and bad cycles, flood and drouth, the miracle of birth and life and hope.

Time To Plant? Is it time for the irrigation farmer to plant? Some growers have answered the question affirmatively. A few have "stands" of cotton. Others are waiting, fearing high winds would cause them to lose the moisture put into the ground from the underground fountain. The dry land farmer continues to wait, biding his time with what patience he can. The feeling that the end to the long wait may be near is gained from some of the signs one sees about him.

Floydada Garden Club just must succeed in its plans for a permanent program at Napoleon Park. The women who are at the head of the present move to make this playground work, the Lions club which is lending a helping hand, and the city council as well, are reminded that this is not the first time that work and planning have taken the place of wishful thinking. If all the work of all the committees that has been given this park and has gone for nothing in prior years were revealed, the result would be monumental, really stacked mountain high. The key to final success lies in convincing authorities that there must be supervision and protection.

The Swimming Hole. Note how apathy can spoil a pretty plan. Citizens of Floydada borrowed \$25,000 to build a municipal swimming pool, and prevailed on the city council to put another five or 10 thousand more into it from savings of the electric light department. It was a thing of beauty and joy forever as the saying goes. For a time it answered the sour pussers who said it was wasted money. But last summer it was neglected. It became a nasty hole in the ground, with rowdies taking over. Such should not be allowed to happen again this year. Supervision and protection, whatever amount of money may be needed for the purpose appropriated, are the only answers. The little pool and its surroundings should be idyllic.

but they are not unless and until something is done about it.

Fewer Expense Reports. We have lost track of a proposed law introduced into the legislature, as reported several days ago, which would reduce the number of reports a candidate would have to make during the course of a campaign for office and afterwards. As we have it in mind, the present law calls for eight reports in all if a candidate should have to run in both a first and a second primary. This would be three during the course of each campaign and one after each. The reporting period starts sometime in May or June. The basic idea of the requirement is sound, doubtless. But a candidate for office in Floyd county who meets eight deadlines with sworn statements of what he has spent in running for the office has complied with a law that makes him meet himself coming and going and feel silly while he is at it. It has been demonstrated that there are legal ways to by-pass the law, if the situation demands that a person spend more money than the law allows. Half or a fourth as many reports of expenses would do as much good as is now required.

Medical Examiner Law. In the big centers of population there is considerable dissatisfaction with the present law which makes a magistrate or justice of the peace the authority to make findings and pass on suspicious or unattended deaths. An effort is being made to have a medical examiner to take over this responsibility. We have no objection to such a change exactly, presuming that a good doctor is a good citizen the same as a good justice of the peace is a good citizen. However, unless the doctor is to be an elective official, chosen by the people for the purpose, we would object. There is no better restraint, no more sobering influence, yet devised than a sense of responsibility to the electorate for one's official acts. No one should pass on such matters who has not been chosen by the people to do so.

Lawns may suffer from the ravages of a great many insects but the greatest damage is done by beetle grubs. Spotty damage or a general unthriftiness for which there is no obvious cause may be the result of work done on your lawn by beetle grubs. Ask the local Extension agent for L-199 for control measures.

It is better to wear than to rust out.

HOTTEST-SELLING BUICK IN HISTORY
No wonder you see so many '53 Buicks on the highways — they're rolling up bigger sales than ever before in history—topping the popularity that has already made Buick one of the "Big Three" of America's best sales.

Less than some models of the well-known smaller cars!

UNLESS we miss our guess, a lot of surprised people are going to do some new back-of-an-envelope arithmetic when they see the low delivered price of the Buick shown here...

Because we know that many folks still don't realize how little a Buick really costs—that the dollar difference between this big Buick SPECIAL and the leading smaller cars has virtually disappeared.

Buick Sales Are Soaring As Never Before

But more and more of them are finding it out. And that's a major reason why Buick production and Buick sales are soaring to all-time highs today—and why Buick again is outselling all other cars, regardless of price range, except two of the well-known smaller cars.

Big reason, too, for this soaring popularity is Buick's full line of automobiles, giving you a choice in any price class—the rock-bottom-priced SPECIAL, the high-powered CENTURY, the supremely spacious SUPER, and the custom-built ROADMASTER.

But above all, more and more people are discovering that the price you pay for a Buick buys more sheer automobile than the same money buys elsewhere.

More advanced styling, more deep-down comfort, more pure power thrill, more ride steadiness and handling ease and solidity of structure.

More spectacular performance, too, from the modest extra cost of Buick's automatic transmission.

For here you get Variable Pitch Dynaflo[†]—the new wonder drive born of modern aeronautics to give you instant full-power getaway and acceleration when needed—and far better gas mileage when cruising.

Why not come see us this week, for sure? We'll be happy to have you test-pilot a new Buick, just for the sheer thrill of it—and show you quite clearly that if you can afford any new car, you can afford a Buick.

[†]Dynaflo Drive is standard on Roadmaster, optional as extra cost on other Series.

Disease
Immunity

resistance or immunity in chicks hatched from eggs of vaccinated hens.

Lymphomatosis is the most destructive of all poultry diseases. It is infectious, contagious and malignant. The disease affects chickens much as cancer affects man. It is caused by a virus and attacks the internal organs of chickens, causing tumorous enlargement of the liver.

Experiments have shown that immunity to the "big liver disease" can be passed from vaccinated hens to their chicks. Researchers believe that vaccination causes a buildup in the mother hen's blood of protective antibodies which are transmitted through the eggs to the chicks.

For the East Lansing experiments, 14 White Leghorn hens of a strain known to be highly susceptible to the disease were vaccinated. Most of their 300 chicks proved immune or highly resistant to the disease. Their immunity was shown by giving them potent injections of the active virus. Only 3 to 13 percent of these chicks died from lymphomatosis.

depending on the dosage of virus received. Even then, the few susceptible birds survived much longer than most chicks given the injections without benefit of prior vaccination of the mother hens.

Young chicks, themselves, cannot survive the immunization. Since all chickens gain resistance to the disease as they grow older, only mature birds are injected with the vaccination. Before these research findings can be put into general use however, the techniques of vaccination must be simplified and the production of the vaccine must be put on a practical, commercial basis.

As A Farm Woman Thinks

PRAY FOR ME
(By Hazel Hartwell Simon)
"Pray for me!" the pastor whispered
As he climbed the altar stair;
"I shall preach a better sermon
If your thoughts are raised in prayer."

"Pray for me!" the sinner pleaded,
"Lest in weakness I should fall—
There is hope that God will help me
When He hears your earnest call!"

"Pray for me!" The cry is uttered
Like a hand that reaches out,
Pleading for the strength so needed
In the war with fear and doubt.

"Pray for me!" O brother, sister,
Yours the honor thus to serve,
Bringing stores of grace to others
With faith that does not swerve.

"Pray for me!" Oh, heed the summons;
Others burdens you may bear,
And the God of all compassion
Will reward you for your prayer."

The above poem was sent me by my friend, Mrs. Orile Furgeson, who is now living in Oregon. I know her prayers are for me as well as for her own loved ones. What a comforting thought, knowing that others are praying for you. Do they know you are praying for them?

It is hard to take the weather we have been having with good grace, but we know from years of experience things may change at most any time. I remember the year the girls graduated at Crosbyton high. We had not had rain for a long time. We went to Crosbyton for the closing exercises. Rain poured down the windows outside and thunder and lightning took turns with the program.

The next day we went back to the farm, not a drop of rain had fallen. Sunday morning came, two soft yellow dresses lay on the bed but the rain had at last come upon the land, long slanting heavy rain

that soaked in. Twenty-five miles to Crosbyton, a car with only curtains for protection. — slick dirt roads. At any time a car might go in the ditch, not able to climb out.

Our hearts were heavy with the disappointment for the girls not getting to go to the baccalaureate sermon after long years of striving for just this day, even though the rain was making the wheat come out and preparing the ground for another crop.

I may not get to go down-state to see the bluebonnets bloom in all their beauty and glory, but I have three or four in my yard that give me pleasure. I would have had more but Mr. Spikes does not seem to be able to tell them from weeds and hoes them up in spite of all my care.

Old timers will tell you that they have always heard the Plains can promise less and make more, or promise more and make less than any section of the country. At this time it seems to me that the promise is not even "less". So it may be a good omen after all. "Hope springs eternal in the human breast."

I get up in the morning with an expectancy of something good and something interesting to take place during the day. I can hardly wait to get up and get to whatever I have to do. The early morning hours are precious. Even a windy day such as this does not get me down. I will see some of the children there is a length of spider web crocheted to add to — a radio program — a television program we like. It is good just to be able to sit down and enjoy life. We know the time ahead will not be as long as the time behind. Each minute must yield its share of happiness or maybe it is sorrow and grief that comes. These must be met with the best grace I have learned to have.

I love to think of the past, to talk it with others, to write it down so the young will know of it. I do not live in the past. The future is ahead. Now is my time. Today is given me and I am content.

BOILERS AND FRYERS RETURN TO MAY PLENTIFUL FOOD LIST

COLLEGE STATION, April — Rising spring production returns boilers and fryers to the plentiful foods list for the first time this year.

Raisins also are highlighted on the U.S. Department of Agriculture's May list of abundant foods.

After the regular monthly survey of food stocks in this area, the USDA has found that supplies of more than a dozen items are large enough to rate a position on May's list.

They include: beef, pork, canned tuna, frozen halibut fillets, milk and other dairy products, rice, small size prunes and vegetable fats and oils.

Only fresh fruits for May are oranges and grapefruit. Also, processed citrus products are in good supply.

"TREADMILL WORSHIP CAN BE AN IDOL", SAYS DR. McCLAIN

"Man's perfunctory habit in religious worship can easily become idolatrous," explains Dr. Roy McClain, whose message "Graven Images" will be heard by radio audiences of the Baptist hour Sunday afternoon at 2:00 o'clock over station KFLD.

The second commandment dealing with graven images will be discussed by Dr. McClain in this message.

SANDY SEZ ----

Hi ya, politicians! This week will be filled with politics. There will be candidates for the Student Council president and vice-president, Whirl Editor, and the Annual Editor. Since the elections will be on Thursday, I was unable to put the results in this column due to my deadline. In my next column I will let you in on all the dope. Ha?

Since last week the Whirl has been putting out special editions of each of the class papers. Last week the Freshman of F.H.S. did a swell job on their paper. This week the sophomores will try their luck in the journalism field.

The Floydada high school band will travel down Plainview way to participate in contest activities. Soloes from F.H.S. will be Bobby Rainer (baritone sax), Texe Kennamer (alto sax), and yours truly (bass clarinet). Each of the twirlers of

the band are going to do a solo, I believe. Also the twirlers will do an ensemble together.

I would like to say on behalf of the F.H.S. band, we appreciate everyone who is backing us and we're sorry we didn't make a success of selling the calendars.

I would also like to say that whatever place the band wins in marching, concert, and sight-reading, it would be impossible without the aid of our director Maurice Jones. He has really helped us this year and we're going to do our best not to let him down.

The One-Act play was defeated Saturday for regional by Kermit. The play has really done well and each member of the cast should be congratulated. Mrs. I. T. Graves did a grand job of directing. Next year we'll go all the way with such talent and directing. Also Lafaun Ballard and Lourie Johnson were placed on the all-star cast.

The First Methodist Youth have morning worshipping services each Thursday morning at 7:30 a. m. Everyone is cordially invited. It really helps everyone so try to come each week.

From Floydada the students who won in Literary events were: Senior Girls Declamation, Fontaine Fowler second; Senior Boys Declamation, Jerry Coltharp first; Junior Girls Declamation, Gayle Rosson first; Junior Boys Declamation, Dick Galloway first and Joe Smalley second; Poetry Reading, Joyce Hammonds first, LaFaun Ballard second; Boys Poetry Reading, Bobby Rainer third; Typing, Bonnie Upton second, Darlene Dorrell third, Neida Patterson fifth; Short-hand, Carolyn Downing first, Jewell Haggard third; Slide Rule, Cy Whitfill third; Number Sense, Leon Wiley first, Kenneth Robertson third.

Twirl violators had assembly last week and had to suffer consequences.

The Student Council had talent show Tuesday night. My deadline cut the results so I'll tell you next

week.

Daters seen have been Sonja Wilson and Max Crawford, Sherre Darden and Winred West, Cheryl Crawford and Glad Norman, Vanda Carter and Bobby Carmack, D'Leue Witkowski and Waldo Baxter, Fontaine Fowler and Carroll Guthrie, Pat Helms and Johnny West, Jerry Floyd and Jimmy Collins, Beuna Holmes and Jackie Henry, Christine Brints and Jim Bell.

This about "tallies" it up for now, but tune in next week to read about the election returns of F.H.S.

Bye-bye, A politician, Sandy

Fifteen Hundred Attend Annual Meeting of Lighthouse Electric

Fifteen hundred or more persons, including principally members, their wives and families, participated in the day-long annual meeting of Lighthouse Electric Cooperative Saturday at Graves gymnasium.

The members transacted their business for the day, heard their officers' reports, and were entertained by amateur and professional talent as well. These made it a busy day from the opening of registrations at 8:30 Saturday morning until the closing at 4 o'clock.

New president of the cooperative for the year, chosen in a meeting of the directors immediately following the close of the membership gathering, is Oliver Harmel, of Plainview. He succeeds Lee Rushing, who served this year.

Harmel, along with Rushing, John Smitherman of South Plains and W. C. Snodgrass of Blanco are hold-over directors. Herman King of Lockney was re-elected from District 5.

Bill Smith of Dougherty was elected to succeed Earl Edwards in District Two and Frank Moore of McAdoo to succeed H. L. Morris in District One.

The directors elected John Smitherman vice-president and Bill Smith secretary-treasurer.

Ned Bradley of Dougherty again served the all-day meeting as master of ceremonies.

Floydada high school band, which promised sometime ago to play for the event in the forenoon, had their ranks depleted by the Inter-scholastic league meet and director Maurice Jones had to send his regrets.

Melvin Henry, in his manager's report, showed a healthy financial condition of the organization's affairs. The cooperative, he said, did a business in excess of three quarters of a million dollars, serving more than 3,000 customers on 1,858 miles of line.

FEATURE ENTERTAINERS

Entertainers featured throughout the day included the East Plains play boys of Crosbyton and the Serenaders of KCBT-TV station from Lubbock. Other acts were the Crazy Crew and Kathleen Boyd from Crosbyton; the Silver Belles and the Chordettes from Lockney; Joe Nolan, Dale Smith, Juanita Sue Wilson, Gary Wilson and Conley Bradford of Floydada.

Lunch was served in the high school cafeteria by the women of the home demonstration clubs from

Hale, Crosby and Floyd county. Literally hundreds of area women, as well as notables of the state and nation, are represented with recipes in Cook Book No. 2, distributed at the door Saturday. The committee was headed by Mrs. John Smitherman as chairman other members being Mrs. Earl Edwards, Mrs. H. L. Morris, Mrs. Lee Rushing, Mrs. Oliver Harmel, Mrs. Herman King, and Mrs. Carrick Snodgrass.

The 292-page book is plastic bound. It is described as a triumph of long and careful planning, a cookery delight.

Lack of Money Policy Control of Cancer Fund

The policies of the American Cancer society are governed by the job there is to do and the amount of funds which the public, out of its goodness, provides for the work that is being carried on.

This is the burden of a letter from the Texas Division, Curt W. Reimann, active executive director, written to Mrs. James P. Potts, secretary of the Floyd county chapter, under recent date.

The polio foundation, for instance, Mrs. Potts wrote, keeps a part of its funds available locally for distribution to those who need it. The question has been raised with the Cancer Society organization here, why cannot it also provide for some of the needs of the cancer victims, give them hospitalization help, and the like.

To which Mr. Reimann answers that the difference in the respective welfare agencies is quickly apparent when all facts are considered.

For instance, he points out that whereas the public volunteered \$2,700,000 in Texas for polio research and treatment it provided \$700,000 for cancer.

Likewise, whereas there were approximately 1,000 polio cases in the state, with 44 deaths, polio incidence affecting about one out of each 30,000 people, cancer on the other hand affects one out of four. To carry the comparison further, he points out, that whereas there are four known distinct types of polio there are more than 500 different kinds of cancer.

Cancer at this time is the biggest contributor to deaths in childhood and the second biggest contributor to deaths of maturity.

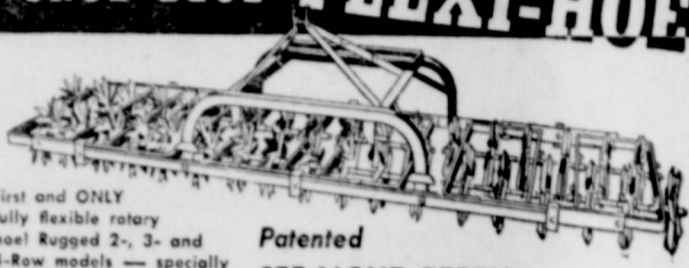

The problem of determining which cancer patient should be helped and which should not would require a staff much larger than the society could afford under the present set-up.

The American Cancer Society, Mr. Reimann concludes, is aware of the things which concern the volunteers in the cancer crusade. He points out that the reason is very real why the Society, in its research, education and service, cannot put money into the support of cancer patients.

The plain deduction, the Floyd County Committee points out, is that there wouldn't be enough money to go around to all the patients, even though research and education were to be abandoned and all the funds concentrated on trying to relieve present instances of suffering.

"I like my water heater because it's ELECTRIC. And since it's ELECTRIC it's completely SAFE!"

...says Mrs. R. L. Crider of East Grand Plains, New Mexico

"Even with two electric water heaters in our home, we never worry about the children playing around them. We have even considered busiding a linen closet over our table top model. To me, the table tops are the best to have because they are so easy to place. Electric water heaters are so quiet, and they have never given us a bit of trouble."

"Of course, we have an electric dishwasher, and we always have instant hot water. With our two electric water heaters, I think we are really a true electric family."

Yes, and a true modern family, for in water heaters, as well as all appliances, if it's modern, it's electric.

"Running a farm is not what you would call the cleanest occupation, and, therefore, we must have plenty of hot water. Besides the three baths, we have an electric laundry, and we just never seem to run out of hot water."

Electric water heating is safe, dependable, and more economical than you might think. Ask about Reddy's special water heating rate, a big bargain in convenience, safety, and dependability."

PUBLIC SERVICE COMPANY

RIGHTS AND RIGHTS FROM STATE CAPITOL

Sanford, Texas Press

Texas — Natural gas, cigars, cigarettes, and beer would be taxable under the new revenue for the next year.

sharp difference of the bill was the fact that the House engrossment bill was to be \$10 to \$15 more than the Senate bill. The Legislature is to spend money than a few examples:

of the teachers retirement by constitutional amendment voted by the House.

Allan Shivers asked for consideration by the Legislature a bill to pay indemnity of sheep and goats destroyed to halt a scabies

Extension of the veterans land program was approved by a Senate committee. (Theoretically, this program is self-financing. The state issues bonds to buy the land, and the bonds are retired as the veterans make payments on their property.)

Requested by the governor was an appropriation to give underprivileged children the Salk polio vaccine.

Proposals were made by the Travis County delegation, that the state sponsor a supplement to state employee retirement benefits in the amount of \$600,000 per year.

CAR DEALERS LICENSES

Seventeen amendments were added in the House before the car dealers licensing bill gained initial approval.

Principal provisions of the bill would:

Make new car dealers pay \$50 for a seller's license, and used car dealers \$25; prohibit offering for sale as a new car any vehicle that had been driven or towed more than 50 miles; and require dealers to post \$10,000 bond.

Original purpose of the bill, before the amendments were added, was to prevent used car dealers from offering latest model cars for sale as "new" cars.

TRINITY BILL FEDES

A big segment of the Texas popu-

lation lives in the Trinity River valley.

Hopes of those people for an organization to administer flood control, water conservation, and irrigation were dimmed when the Senate Water committee rejected a Trinity River Authority bill and sent it to a subcommittee.

Representative Barefoot Sanders of Dallas, who pushed the bill through the House, blamed the railroad lobby for its failure in Senate committee. Said Sanders: "The railroads, in the final analysis, are responsible for this setback because of the propaganda they put out on the effects of this bill."

WATER BILL FALTERS

Trouble was ahead for a proposed constitutional amendment rated high on the list of administration-recommended water legislation.

Purpose of the measure would be to let the people vote on whether to authorize \$100 million in bonds to finance water projects of the state.

Passed by the house, the resolution was patched with amendments. The senate refused to concur and asked for a conference committee.

VETERANS LAND PROBE

Far from abating, the veterans land investigation was expanding and reaching as far afield as Minnesota.

Cecil E. Burney, special assistant attorney general, told the senate investigating committee that two years ago, when Attorney General John Ben Shepperd was vacationing in Minnesota, he happened to see former land commissioner Bascom Giles.

Giles invited Shepperd to visit his Minnesota farm of 8,600 acres.

When the veterans land investigations began, Shepperd sent an investigator to Minnesota.

As a result of that investigation Burney predicted, the people will hear that money from the veterans land program went to Minnesota to buy land for Texas.

"It is amazing," said Burney "that some of the same people who were anxious to buy cheap Minnesota land at high prices were the same persons who were anxious to sell cheap land in Texas to veterans for equally high prices."

\$30,000 IN FEES

Another witness before the senate investigating committee was Alvis Vandagriff, a former officer of the veterans land board.

Vandagriff testified that during a four-year period after he left the board, he received more than \$30,000 to expedite block land sales.

COUNTY ADVERTISING

A bill by Rep. W. W. Allen of Laredo was approved in house committee, permitting counties under 50,000 population and over to use funds for local advertising.

Under the bill, county commissioners courts could appropriate 5c per \$100 assessed property evaluation for the purpose. Under existing laws, counties of 100,000 population and over already are permitted to advertise.

SHORT SNORTS: On foot is a drive for strict enforcement of narcotic laws and passage of new state legislation to help control the dope traffic. Three narcotics bills have passed the house and are in the senate.

Passed by the senate is a bill establishing a Texas commission on higher education to govern the state's nine senior colleges and universities. Sen. A. M. Aiken told the senate the commission is necessary to take care of expanded enrollment and corollary problems of the institutions.

Gas companies would be permitted to sue the state for taxes paid under the unconstitutional gas gathering tax according to a resolution passed by the house and by the senate with amendments.

Texas oil production for May will be reduced, according to an order of the Texas Railroad commission. Allowables will be 3,072,150 barrels daily, lowest of the year. Texas has enjoyed a near record oil flow for the past four months.

EXTRA

protection for depositors

A bank's capital—invested by its stockholders—might be called a "first protection" for depositors. As the bank grows, a surplus is built up, and this becomes an "extra" protection for customers.

Beyond this, banks that are members of the Federal Deposit Insurance Corporation have each depositor's account insured up to \$10,000. Adequate capital, growing surplus, insurance—these are three great factors of strength in the field of modern banking.
