

Quotas, Cents Are for Vote

STATION—A national quota of 10 million bales of cotton is being allocated for the 1956 crop of cotton. The quota has been proclaimed by the Department of Agriculture.

At the same time was a referendum, Dec. 13, on the issue of extra long staple cotton. The quota for extra long staple cotton is 35,300 bales and for the 1956 crop is 45,300 bales. At least two-thirds of the extra long staple cotton must be approved by the growers.

A Tax-Supported Public Service

(Ed. Note. The forthcoming visit of the mobile chest x-ray unit of the Texas State Department of Health, underlines the importance of the accompanying news story to Floyd County people, especially to those 55 years old and older.)

AUSTIN, Nov. 3.—A new record of public service was established between September of 1954 and August of 1955 when 715,192 Texans passed before the mobile chest x-ray units operated by the State Department of Health.

Of that number 18,192 showed evidence of chest "abnormalities", the department recorded.

The tax-supported mass chest x-ray surveys, limited to persons 15 years of age and over, worked in 152 counties during the period covered by the report.

Among the abnormal findings were 9,887 cases of "suspicious, minimal, moderately advanced, or far advanced tuberculosis", 7,276 cases of heart involvement, 1,029 cases of other "nontuberculous" cases such as tumor shadows, diaphragmatic hernias, etc.

Past experience has shown that findings of chest abnormalities in children under 15 are so few that it is not economically feasible to include youngsters in the mass surveys. Also, health authorities hold that since the source of tuberculosis is in the adult population, finding a case in an adult presents sufficient opportunity to closely examine the children in that adult's family.

Although no age breakdown was available for

abnormal conditions discovered in last year's surveys, indications were that most of them occurred in persons over 55. Said Health Commissioner Henry A. Hollie: "We are concentrating on this age bracket."

"Both tuberculosis and lung cancer are most easily curable in their early stages," the health official stressed. "But since both are almost symptomless in their early stages, early detection is virtually impossible without a chest x-ray."

The health agency adopted the mass x-ray surveys as part of its program of public service in 1946. Five units are in operation, each one staffed by two technicians.

Units are assigned to individual counties only on the request of the county medical society.

Tuberculosis, heart disease, and lung tumors are the conditions most frequently found. Cases of abnormality are reported to the private physician named by the individual involved.

Specific diagnosis is left to the private physician. It usually requires 4 weeks from the time the x-ray is taken until the report is forwarded to the individual or the physician of his choice.

The usual procedure in cases of defects is for the person to visit his family physician for further study.

The number of people receiving x-rays in mobile units last year was the greatest in the 9-year history of the program.

Several scores of cotton harvest crews, including Mexican nationals, have been placed this week. The housing situation had begun to be tight in some localities yesterday.

The maize harvest, long past the half-way mark, is still being delayed in some fields by high moisture content. The sucker crop is the answer for the most part. However, elevator men were doing a brisk business Wednesday.

Big Parade Will Herald Approach of Christmas

Christmas is coming to Floydada on November 29. That is the news from the Retail Trades Committee of the Floydada Chamber of Commerce which is winding up its Christmas plans this week.

Bill Hale, chairman of the parade committee, announced his completed plans for the Christmas parade. The parade which is set for 2:30 P.M. on November 29 will offer \$115.00 for the best parade floats. A \$50.00 grand prize will be awarded the best float in the parade with \$30.00 going to second place and \$20.00 to third place. The best decorated bicycles will receive \$7.50, \$5.00 and \$2.50.

The Floydada High School band will lead the parade which will feature old Santa Claus, himself, and other area bands.

At least 11 floats are guaranteed for the parade at this date, Hale said. Local and county organizations and business firms planning floats include the 1934 Study Club, Methodist Woman's Society of Christian Service, South Plains Community Club, 1922 Study Club, Sunbeams I and Sunbeams II, 1950 Study Club, Home Builders Home Demonstration Club, Floyd County Library, White Auto Store and The Builders Mart. The High School band and other school classes are also expected to have floats.

Eight of the floats reported will have a religious theme, and the parade committee hopes to have enough floats to tell the complete Christmas story.

Clubs and business firms planning to participate in this Christmas event are urged to call the Chamber of Commerce office or Parade chairman Bill Hale.

Community Christmas decorations this year will be spruce covered colored lights strung across the downtown business streets according to John Reue, Decorations Committee Chairman.

Twenty-one strings of lights furnished by the Chamber of Commerce will be hung by personnel from the City of Floydada, Southwestern Public Service Co. and Lighthouse Electric Co.

Nine hundred yards of Colorado spruce have been ordered to cover the lights.

The 1929 Study Club will decorate the community Christmas tree on the court house lawn.

Decorations will be up by parade time on November 29.

Mitchell Parrish heads the Chamber of Commerce Committee to finance these Christmas activities.

'LANCE CORPORAL' COMES BACK TO ARMY ROSTER

FORT HOOD, Texas — The designation "lance corporal" has cropped up again in the U. S. Army.

In recognition of his future abilities, patriotism and character, Charles David White, son of Chief Warrant Officer and Mrs. Isaac E. White, Markham, Tex., received membership in the Fourth Armored Division as a lance corporal.

Lance corporals just about disappeared from the U. S. Army at the turn of the 20th century. Established in 1834, the rating was used for about 65 years to encourage and reward recruits.

Young White's designation was in anticipation of this "ability." He was a month old at the time.

Plans are being made for the P. T. A. Carnival to be held Nov. 18 at Andrews Ward. The carnival will begin at 6:30 p. m. with supper served to the public at the cafeteria.

Home-made candy, snow cones, popcorn and peanuts will be on sale to the public.

Entertainment for the evening will consist of a wishing well, grab bag, fortune telling, shooting galleries, fun house, dart throwing, country store and other various things.

Garden Club Talks Of Bulb Planting

The Floydada Garden Club met at the home of Mrs. R. E. Fry last Friday with 15 members and one guest present.

Mrs. Bill Norman gave a fine talk on fall bulbs and gave each member a package of tulip bulbs to be planted now.

The guest speaker was Mrs. F. V. Payne. Her topic was chrysanthemums. She had several specimens to show and she spoke on fall planting of these beautiful flowers.

The next meeting will be Nov. 11 with Mrs. Wilson Kimble as hostess.

We overheard a conversation the other day between two women who are building beautiful new homes. They really have problems.

Each has a perfectly good house to live in while the new one is being built, so it isn't that. And each has plenty of money — it isn't that, either.

Much of their talk was of trials with carpenters, electricians and decorators. They abuse your property. They oversell you. They expect you to visualize a room with a few tiny samples. They're slow. They're expensive.

For once we basked in the sunshine of poverty. When we built our home, we were both so busy making money to pay for it that we decided such things as door hinges and cabinet finish as quickly as possible, then left them to the contractor. Oddly enough, he did pretty well without our close supervision.

We had no trouble at all with a decorator. We just placed our few belongings in the larger rooms so they'd fill up as much space as possible, then gradually furnished the house as we could afford it.

After fifteen years, we're still "decorating" — piece at a time — but at least it has been a source of pleasure, not distress.

Many of the things we do that should make us happy seem instead only to intensify our anxiety and tension. What's the matter? Are we afraid to turn loose and enjoy living?

Mrs. Turner Hunter, president, presided. The council report was given by Mrs. John Fowler.

The day was spent in making dolls and clowns. The demonstration was given by Mrs. Tom Porter and Mrs. S. L. Holmes.

Another demonstration on "three-in-one ice cream" was given by Mrs. Tom Porter and Mrs. John Shipley.

Members present were Mrs. John Fowler, Turner Hunter, Harvey Tardy, George Smith, John Shipley, O. L. Lowrance Sr., O. L. Lowrance Jr., J. E. Holmes, S. L. Holmes, G. H. Day, Leon Ferguson, two visitors, Mrs. P. L. Orman and Mrs. J. T. Myrick.

The next meeting will be this Friday at 9:00 a. m. in the home of Mrs. O. L. Lowrance Sr.

Some people are even tempered only because they are in a bad mood all the time.

Class Entertains Husbands at Party

The Joy Sunday School class of the First Baptist Church were hostesses to their husbands at a tacky party at the American Legion Hall annex Halloween night at 7:30 o'clock.

Mrs. Thurman Battey and E. D. Morgan were prize winners on costumes.

Pie and coffee were served during the evening.

Those enjoying games of 42 and murder were Messrs. and Mmes. Watson Jones, Jack Stansell, Doyle Moore, Bob Alldredge, Thomas Warren, Glenn White, Brac Biggers, Bernie Parkey, Elmer Biggs, William Blair, E. D. Morgan and Ralph Rucker, Mmes. Mitchell Parrish, Earl Allen, Parnell Powell and Thurman Battey.

Mr. and Mrs. Bob Collier announce the engagement and forthcoming marriage of their daughter, Sandra, to Jackie Jarrett, son of Mr. and Mrs. Carl Jarrett.

The couple will exchange vows at 5:00 p. m. Thanksgiving day, Nov. 24, in the home of the bride-elect's parents.

Starkey HD Club Will Meet Friday

Mrs. Turner Hunter, president, presided. The council report was given by Mrs. John Fowler.

The day was spent in making dolls and clowns. The demonstration was given by Mrs. Tom Porter and Mrs. S. L. Holmes.

Mrs. W. W. Trapp gave the council report. It was voted to send a Christmas box to the club's friend in Abilene.

Plans were discussed for the club to have a float in the Christmas parade.

Mrs. B. A. Robertson had charge of the religious program. A prayer was given by Mrs. H. W. Roberts and the responsive reading was by Mrs. Howard Gregory. A poem, "If Jesus Should Come to Your House" was given by Mrs. W. H. Bunch.

Are All Cold Remedies Alike?

No! For example, 666 is the wide-activity medicine, which combines 4 of the most effective, widely-prescribed drugs known, to relieve all cold ailments sooner. 666 is more potent and gives positive, dramatic, rapid relief from miseries of all kinds of colds. That's why 666 is unsurpassed in effectiveness. Try it.

No other cold remedy can match 666 liquid or 666 Cold Tablets. **666**

LIBRARY NEWS

In the Library reading room, starting Thursday, Nov. 3, will be a display of art work by Douglas Walding and Darryl Lindsey. The display will consist of ink, water-colors, pastel, pencil and oil drawings which have been made during the past year. Douglas and Darryl are art pupils of Mrs. E. J. Barker.

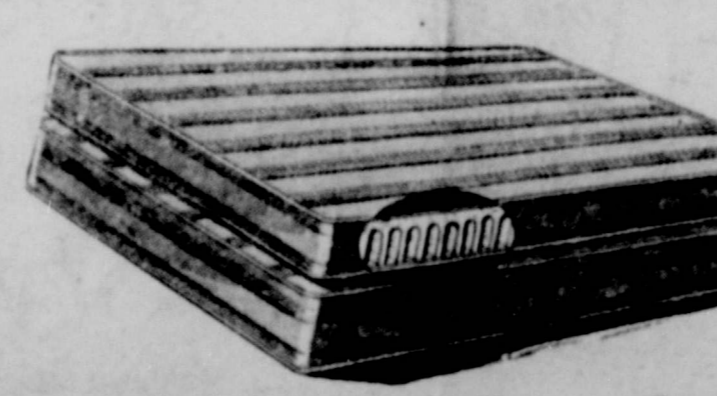

In the weeks to follow, other art pupils of both Mrs. Barker and Mrs. E. B. Chesnut will display art work in the library. Since there is a limited amount of space at the art shows, this will give the pupils an opportunity to display more of their work.

The public is cordially invited to come to the Library any time during library hours to view the art displays.

About three weeks ago, Mrs. J. W. Reue, 4th grade teacher at Andrews Ward, checked out 16 books to be used in her room at school. These books were checked out by Mrs. Reue to her pupils. Whirlwind Tackle — Wt. 175

Score Comes Easy

The next score came easily for the 'Dogs who kicked off to Floydada with Waller taking the ball on the 5 and running it back to the 20. Then lightning struck when Spur pounced on a fumble in the Floydada backfield on the first play from scrimmage to gain possession on the 18-yard line. Only a few plays were needed and Snodgrass plowed over from the 4 to score. Williams kick failed and the score was 20 - 0.

JAMES HARTMAN

Whirlwind End -- Wt. 140

Spur again kicked off this time to Don Colley on the Floydada 10 and he got a 19-yard runback to the 29. When the 'Winds put the ball in play from scrimmage again it was more of the same as Max Gabriel recovered another fumble for Spur on the Floydada 28 and the 'Dogs were on the way again.

JAMES TEAGUE

Whirlwind Center — Wt. 148

This time Dunaway drove over from the 2 and Williams added the point after to end the scoring for the night. Spur 27 - Floydada 0.

Clock Runs Out On Drive

The 'Winds put on an offensive attack worthy of their namesake following the next kick off and had carried from their own 15 to the Spur 6 inch line with passes from Waller to Watts and Colley, but let the clock run out on them getting off only 3 plays in the last 2 minutes of the game.

Spooky Spirits 'Jump The Gun' Saturday Night

Hallowe'en in Floydada was quite quiet in contrast to some of the former years, and down-town business people were pleasantly surprised Tuesday morning to find signs in tact, their store fronts neither mud-splattered nor otherwise defaced.

Dealers in farm machinery also got lucky. Their clean up crews, who often spend a half-day gathering up misplaced machinery the next morning, had little to do.

Added patrolmen and privately-employed night watchmen may have had something to do with the fact that damage was down to a minimum.

Scores of mothers and fathers and elder brothers and sisters in Floydada helped to make the trick or treat evening a jolly one for the budding generation. Their harmless mischief was enjoyed in neighborhoods all over town.

This week Mayor Lewis Norman took occasion to commend the youngsters of the community and express the appreciation of city officials and the city police for their excellent conduct on Hallowe'en and their cooperation, while enjoying a hilarious evening, in recognizing the rights of their neighbors and respecting them.

Not So Saturday Night

Saturday night the spirit of Hallowe'en became somewhat rampant in anticipation of the hallowe'en. For quite some hours there was turning on of city fire plugs, the turner-oners using a Stilson wrench or something similar. The water department did not indicate how much damage the wrong-way wrenches may have done to the hydrants.

At the Palace Theatre the management had some disturbance during a mid-night screen show. A fire extinguisher was kept handy as the ushers moved about trying to uncover the source of fire cracker popping.

The show management did not report these incidents to the police nor extensive damage to the big Cinemascope screen, punctured in at least four places by small black walnuts. The little walnuts were found behind the screen, the punctured places showing evidence of the smudge at the edges. Bill Baker surmised "nigger shooters" were used.

The incidents were not reported, Baker said, because the more you air things like that the more ideas you "put in their heads". The theory is that the theatre doesn't want to get caught in the "cross-fire" in a game of hide and seek between the hoodlums and the law enforcement officers.

SOIL CONSERVATION DISTRICT NEWS

STOP SOIL BLOWING

It is possible to prevent soil blowing in Floyd County this season.

Soil blowing occurs when fields are left smooth and unprotected.

"Stubble mulching" is one method of protection to the soil. This means leaving all of the stubble and stalks on or near the soil surface. Grain and forage sorghums make excellent "stubble mulching" crops. Any crop that makes a lot of residue is suitable. These crops can be mulched by using sub-tillage equipment or tandem discs.

This conservation practice also increases water intake of the soil. The cover left on the ground prevents the surface from sealing over during a rain. By this means all of the moisture, or nearly all of it, can enter the ground. Washing and gully-lyng occur when water cannot enter the soil and runs off.

Stubble and stalks must be left on the surface throughout the blowing season to be effective.

"Stubble mulching" is a year-around system of maintaining a stubble mulch on the soil surface. It may be started any time after the harvest of these crops.

The Board of Supervisors of the Floyd County Soil Conservation District and the technicians of the Soil Conservation Service heartily recommend this conservation practice. It is one of the best means of preventing soil blowing.

Penney Founders

Day Anniversary

The J. C. Penney stores throughout the United States are celebrating Founders Day starting tomorrow and continuing through Monday. This, the anniversary of the founding of the first Penney store years ago in a small town in Wyoming, has grown to be the biggest merchandising event of the year for each local store of the Penney chain.

In Floydada Rush Wheeler, local manager for the Penney Company, along with his entire staff has been busy for days preparing for the event.

Local shoppers can find many bargains listed on the founders day advertisements on other pages of this week's Hesperian.

Mitchell Parrish returned home Tuesday night after a three-day stay at the Dallas market centers. Parrish was making selections in mens and boys wear for the Beall Brothers store in Floydada.

"Gretchen is 16 now, and I really should have a talk with her," complained a woman over a cup of tea. "If I only knew how to go about it!"

"That's not so hard," replied the mother of several daughters. "Just try to look self-assured and act as if you knew as much about it as she does."

Cobb To Speak To Brotherhood Of Baptist Men

Morris Cobb, Amarillo lawyer, prominent as a Baptist layman, will address the quarterly meeting of the Floyd Baptist Association Brotherhood Monday night of next week at the First Baptist Church in Lockney. It was announced this week by John B. Stapleton, associational president of the men's organization, and Brat Biggers, secretary.

The brotherhood of the Lockney Church will be hosts for the occasion. Supper will be served in Fellowship Hall at 7 o'clock and the program will follow.

Two hundred to 300 members of the Brotherhood are expected to be present, representing 29 Baptist churches in the association.

T. L. Holland, president of the First Baptist Church of Floydada brotherhood and Henry Young, president of the Calvary Church men, anticipate attendance from here will be good.

The Amarillo speaker is a former member of the state legislature and has been in demand as a lay speaker.

Census Takers

Continue Work

Approximately 200 persons gathered Sunday afternoon at the First Christian Church where from that point they covered the town to initiate and complete a church census of the community. The Floydada Ministerial Fellowship were leaders on this occasion.

The group opened this project with a song and prayer. Rev. Tilden B. Armstrong explained the cards to be used by the "census takers" and gave instructions for completing the survey.

The community was divided into districts, using a map of the city as a guide. Each church was assigned a territory to cover and that territory was covered by members of that church.

The "census takers" luck was not too good in some parts, but Monday, Tuesday and Wednesday were spent in finishing the final cards. A count is to be made today by the ministers of Floydada to see if it was a complete survey or not.

CAUTION

In 1868, the New York World printed the following news item on its front pages:

A man about 43 years of age, giving the name of Joshua Copper-smith, has been arrested for attempting to extort funds from ignorant and superstitious people by exhibiting a device which he says will convey the human voice over metallic wires. He calls the instrument a "telephone" which is obviously intended to imitate the word telegraph and win the confidence of those who know of the success of the latter instrument. Well-informed people know that it is impossible to transmit the human voice over wires as may be done with signals of the Morse code. The authorities who apprehended this criminal are to be congratulated and it is hoped that his punishment will be prompt and for a long prison duration.

The infantry division has undergone some changes since World War II. One is the inclusion of two tank battalions equipped with M-48 medium tank mounting a 90-millimeter gun instead of the single tank battalion that was separately attached to the division in World War II.

There have been so many people who asked me what the figures were on each end of the football field last Friday night. I decided to announce it. The figures which blew up in fireworks were a "Bulldog" and "Rhapsody in Blue." All you people who didn't see it really missed a show.

The after-game party was at the First Christian Church. "Sixteen Tons" was sung by Noland Turner and Carl Brock accompanied by Otis Shipp. They really did a good job. Joy Porter sang and David Badgett did a magician act.

As A Farm Woman Thinks

(Nellie Witt Spikes)

The frost is nipping here and there, and many flowers and vegetables are blacking out, not to be revived until the sun goes north again. For a time it makes us sad, but many neglected duties in the house come to our attention and soon we are sewing on gay flowered materials and opening up jars of vegetables and fruits and find happiness in the changing of the season.

The happy have whole days, and those they choose; The unhappy have but hours, and those they lose.

—Cibber.

I see in a gift catalogue a contraption to hold up the covers off one's feet. Our grandfathers solved that problem long ago. They just put their youngun's at their feet, and they kept the covers held up.

I can just see my aunt Ella pulling out the trundle bed from under her's and Uncle Frank's big bed. The two older boys slept on the trundle bed, the little ones at the grownup's feet. Auntie held a wet rag in her hand and the children's faces, hands and feet were washed.

The little room with a dobie kitchen was set on the endless prairie. Purple morning glories bloomed at the small windows in the summer, white snow and frost made pictures on the panes in the winter. Sand pushed in around the cracks in the spring. The children went to sleep as Aunt Ella sang sweet songs.

Not much comfort you say? But there were things of the spirit to keep one warm and happy. Faith in the future was there, faith in God. Hope and love and joy. What if the bare pine walls were covered with stickers and the cracks stripped with pieces of used clothing.

What did it matter if the water had to be brought in a tin bucket from the well some distance away? Did it not quenche one's thirst? And clean one's body and clothes? Didn't the cowchip fires cook as good a meal as gas does now? Weren't the feather beds and good thick quilts as warm as the electric blankets of today?

I can see what matters most in any generation and any time is to make the best of what one has, to be content, to live for others. I like to read Galatians, part of the 16th verse. Paul says in this letter: "But the fruit of the spirit is love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, self control; against such there is no law."

Now I am not saying the way of the pioneer was better than now. Of course I like the comforts as well as any one. But as I see it, fruits of the spirit do not have to have comforts to grow on, but can be attained by any people in any generation.

I have always been kind of a weather barometer as far as northerners are concerned. I feel them a day or so beforehand. My children did not like for me to forecast one for

as they said, "Mama can always tell." Now we are not told we will have a norther. It is a cool wave or a cold wave and before I even have time for any symptoms for a change in the weather, it is taken from me by some weather forecaster and I do not have to bother.

Can you look back with me if you never experienced a Blue Norther or if you did will you remember with me? The day would usually be beautiful, the sun would warm the earth. Mother would put out her feather beds and pillows to sun. There was usually a washing on the barb wire fence. Children played out without wraps, all the earth was still and peaceful. But we would see mother now and then looking to the north. We could see a dark blue line rising higher and higher. All at once the old windmill would whirl around and point to the north. We helped mother get in the clothes, the bedding. Some would go to the barrel for water, and if the tubs were forgotten they would blow away. The cows and horses ran and jumped, then the wind struck with a fury, freezing as it came. The blue norther was on in full force and might last for several days. Precious coal, hauled from the

railroad some one hundred miles away, was used instead of the cowchips and mesquite, for it was bitter cold. The water bucket froze over the tin dipper stuck fast. The roller towel was stiff as a board, the milk "white ice," the floor as cold as a skating rink; getting into bed was like plunging into a snow bank. Now you see that the younguns at the foot of the bed were not only cover holder-uppers but were foot warmers as well.

I miss the word, norther, from our western vocabulary but I do not care if the Blue Norther does not come again, do you?

Good thing we got that old stove put up last week in this column for the blue norther this week.

Blessings of X-Ray and the great service its discovery has done to mankind in 60 years which have elapsed since its discovery, brings to mind the now-amusing furore which its discovery created. Fraudulent clothes manufacturers offered "x-ray proof" under-garments to modest women at ridiculous prices and a wave of moral indignation swept the country when others proposed x-ray opera glasses. Finally, doctors, experimenting, began to learn of the machine as an invaluable aid in diagnosis for diseases in all parts of the body, and even mass x-ray is now the practice in Texas for early discovery and diagnosis of disease. Last year alone the tax-supported mass chest x-ray revealed 18,192 evidences of chest abnormalities and called their attention privately to those who had passed through the x-ray line.

Just political talk is the way the plight of the farmer in 1955 is viewed in industrial and commercial circles of the Deep East, where information vital to moneyed people is sifted with greatest care and where, at the same time, naive provincialism is often evident. One journal, highly regarded on Wall Street, says that while this talk (of the farmer's plight) is good campaign fodder it has "scarcely a nodding acquaintance with the facts." It quotes the Northern Trust Company as declaring that in 1954 the farm income per capita was up 315 per cent while that of the non-farm population was up 209 per cent. The article, however, does not say up from what. In 1955, the argument continues, "the farmers post-war gain is being shrunk to, say, one-third more than that of the rest of the nation, as against one-half or better differential they enjoyed before." The article goes on to say that lower prices for cattle and hogs have been the real cause for the index to dip. "How farmers really feel about their business shows up more accurately in their bids for farm real estate. By mid-year (1955) land prices had climbed back to their postwar peak." When a Deep Easterner gets a firm grip on a statistic you can't shake him loose. The results present a real problem in public relations for the farmer. The problem is considerably more than political.

Keep Plugging Away. Reports of dead oil in a North Motley County test last week and a similar report that another try for oil in southeast Crosby County has been successful, is a reminder that the oil fraternity keeps plugging away. Somewhere in the area there is oil and probably several somewhere. More tests will come eventually in Floyd County and the county's lone well at Lakeview will some day have company. The big companies are not anxious to open new fields probably, but an independent, whose success depends on getting production, is most likely to get the ball rolling some of these times.

State ASC Committees, state highway departments — practically all public bureaus and commissions — remind one of a commissioners court in their mode of operation. They attack the problems which are nearest to them, where the howl is the loudest. They may have more important things that should have attention but first they must get the noise stopped so they can go ahead. The plight of the East Texas cotton raiser where the cut in allotments prospectively leaves too few acres to live on got the ear of the

state ASC committee. Result is that such counties as Bowie, Titus, Harrison, Camp and Cass have 139 per cent for 1956 of their 1951 acreage of cotton, where the most any West Texas county we know of has 57 per cent of their 1951 acreage. A six-man committee composes the state ASC board. Their problem is one of equity between the big acreage West Texas farmer against the little acreage East Texas farmer. They tipped the scales in favor of the cotton man in the east part of the state again this year it is evident.

The world cotton growing and marketing affairs are getting into a bad way, Barron's Weekly reports, quoting Anderson, Clayton & Company. Controls at home have encouraged growers abroad to blanket some of our better markets while we argue about allotments, parity and the like. This seems to be one of the hard facts of the matter. The American state department may be straining to get along with the world neighbors, and probably is, but the hard fact remains that we have a tremendous surplus of cotton that needs selling, after you've finished with such arguments as what congress ought to do about parity, allotments and good neighbor relations.

Pinto Beans may be the answer on some Floyd County farms to the problem of what to do with "lay out" land for 1956. However, this ground will grow most anything that a man plants. So the coming year may be the one in which farmers branch out experimentally in most every direction. Most every kind of temperate climate vegetables grow prolifically, and everything from pumpkins to lettuce can be figured on. The fact that there is a support price on beans makes them more attractive to some, while others might like to gamble on other crops because they pay a lot more when they do pay.

Still a Few Left An effort started some years ago to preserve the species of the Texas Longhorn almost came to an end recently when a herd of 80 was decimated to only 20 head, now on a gulf coast pasture. Hard times that came with the prolonged drouth made something drastic a necessity. An auction of the surplus cattle resulted in their dispersal to various parts of the southwest. The longhorn made Texas history but his time has passed. Only these remnants remain to tell of the past glory that was his.

Just About Ideal. The totally killing freeze may have come to Floyd County before these words get into print. Saturday night all but the least exposed vegetation was bitten and Sunday morning's wilt from prairie and field could be smelled by any who desired to sniff it. The final freeze coming on gradually as it has has been of inestimable value in drying out cotton by degrees following the heavy rains of early October. The old-timers who sensed it could be that way had it all "figgered out" that this week would come the freeze that would wind up the gradual drying out. They called the date November 3.

The use of artificial lights to keep hens on the job for 13 hours each day during the short days of fall and winter is a management practice which pays dividends. The extra hours of light are needed for stimulating hormone production.

Trucker Fines In Year Equals Near \$2 Million

The state and county treasuries of Texas were nearly \$2 million richer at the end of August due to the activities of the License & Weight Division of the Texas Department of Public Safety.

The annual report of the DPS unit, released Oct. 27, indicates that \$1,876,003 was collected and paid into the state and county coffers as a result of cases filed during the fiscal year, September 1, 1954 through Aug. 31, 1955, for violation of Texas' trucking laws.

The money represents payment of fines assessed and additional registration fees collected in 26,626 cases filed by the License & Weight Division of the State Safety Department.

The report shows a total of 272,782 equipment checks during the period which, actually, make the truckers look pretty good in view of the fact that the 26,626 cases filed indicated that violations were found in only 9.7% of the trucks checked.

The largest number of cases filed (5,968) was for failure to have a Railroad Commission permit.

been suggested. "I hope to get into the West, the Middle West and possibly the East," he said.

Creeping Harmony

Harmony in the Texas Democratic Party moved slowly. Speaker Sam Rayburn, leader of the liberals, has demanded a state delegation pledged to support the party nominee. Governor Shivers, conservative leader, has opposed an advance pledge to support "any nominee."

Rayburn, however, has spoken approvingly of Lt. Gov. Ben Ramsey, recently named national committeeman with the hope of bringing the two factions together.

Meanwhile the conservative Democratic State Executive Committee has launched a drive to get 3,500,000 persons to pay poll taxes or secure exemptions, for a big turnout next year. It expressed hope for 30,000 delegates at the convention set for May 26 in Dallas.

Rival liberalists have charged that the State Committee has "frozen" hotel space in Dallas with the design of keeping the liberals away.

Committee Clears Shepperd

In a closed session, a Texas Bar Association grievance committee voted to take no action on remarks Atty. John Ben Shepperd made about the Court of Criminal Appeals and Judge Lloyd W. Davidson.

Shepperd frequently has expressed himself as being opposed to closed sessions. He went to the meeting with a marked rule book containing passages on open and closed sessions of grievance committees, and requested that the hearing be open. The committee overrode the request.

Newsmen sent by their respective newspapers to report the committee meeting, were told to leave the room before the committee convened. No previous announcement of the session's being closed was made.

The hearing resulted after the election of Judge Davidson brought an about face in 104 indictments in turbulent Duval County. Shepperd

commented that Davidson had expressed an opinion on the cases before they were presented to the court.

Following their four-hour session, the grievance committee said they had considered the matter and found that "no action should be taken. The matter is closed."

Highways Become Laboratories

Research to determine specific causes of injuries in passenger automobile accidents begins on Texas rural highways this week.

Sponsoring the cooperative program are the Texas Highway Patrol, Texas State Department of Health, and Cornell University Medical College.

Purpose of the project is to discover exactly what kills persons in traffic accidents. The inquiry may lead to a major revolution of car design.

Centex Chiefs Meet

Police chiefs from seven cities and patrolmen from Central Texas Counties met in Austin to discuss measures for slowing an area traffic toll which now nears an all time record.

Safe Driving Day, set by President Eisenhower for Dec. 1, will begin this year ten days before that date and extend 10 days after, according to an announcement by Capt. Jim Musick, at the meeting Musick is manager of the Texas Safety Association.

He called on policemen and patrolmen to be particularly alert and much more severe on traffic violations during the period.

New Secretary Of State

Texas' third secretary of state in nine months has been appointed by Governor Shivers, effective Nov. 1.

He is 34-year-old Tom Reavley, Jasper attorney.

Reavley succeeds A. M. Muldrow of Brownfield who took office last February after C. E. Fulgham of Lubbock resigned. Muldrow will return to business interests.

Reavley is a World War II Navy veteran, graduate of the University of Texas and a Harvard law graduate.

Court Gets Giles Appeal

Texas Court of Criminal Appeals is to hand down a decision, probably within a month, on Bascom Giles' first conviction.

Appeal was filed in the court on the two-to-three year sentence imposed on the former land commissioner by an Austin district court in July.

Slated, but not yet filed, is a perfunctory appeal on a two-to-six year conviction on the case in which Giles pled guilty. It is designed, according to the defendant's son, Attorney Rogan Giles, to "gain time."

SHORT SNORTS: Texas draft call for December will total 873 men for the Army and Navy, as compared with 1,006 in November. Texas population has reached an estimated 8,479,000, a 10 per cent increase over the official census report in 1950, according to the latest Federal

Census report. A booklet seeking to distinguish right from left in the Texas Legislature is being circulated by state labor groups. A group of 10 Russian housing experts visiting in Austin, scooped up armfuls of pamphlets at model homes and said principles used in the "Air Conditioned Village" will be used in Russia.

Newspapers Used In Dodge 'Car for Life' Contest

DETROIT — Because of their great impact on the American reading public, nearly 4,000 newspapers will be used to convey news of the "Car for Life" contest which will be sponsored by Dodge Division, Chrysler Corporation, beginning Oct. 31.

Jack W. Minor, sales manager in charge of advertising for Dodge said that a heavy schedule of newspaper advertisements is being prepared. The ads will give details of the unique contest, termed the

"greatest safety campaign in history", which will provide a new car every year of their lives for four lucky motorists. Eight "runners-up" will receive a new 1956 Dodge.

The contestants will appear on the Lawrence Welk show (ABC-TV Saturdays, 8 to 9 p. m. EST) for four weeks beginning Nov. 12, being flown to Los Angeles from all over the nation. Application blanks will be available at all Dodge dealers, Oct. 31 to Nov. 28, Minor said.

Deer Shoot is About Set For Three Counties

AUSTIN — Harvest of between three and five thousand antlerless deer in six Hill Country counties may be authorized on the basis of plans now underway, said the Executive Secretary of the Game and Fish Commission.

Slightly more than three thousand head of antlerless deer were taken last fall when this method of reducing deer overpopulation was given emergency status in Mason, Llano and Gillespie counties.

This year the special harvest has been approved in those three counties. Commission action has paved the way for the antlerless hunts in Medina, Kerr, and Blanco counties, subject to final approval of county commissioners' courts.

"These special harvests are dictated by sound game management policies in the face of overpopulation of deer on drought stricken, overgrazed ranges," said the Executive Secretary. "Removing surplus deer in these counties this fall will be another step toward balancing the herds and will mean a higher survival rate next winter. We know that this action improves the vigor of individual animals and generally improves deer hunting in the long run."

Hunters will get the special permits from landowners. The limit will be two antlerless deer or one buck deer and one antlerless deer.

Give them a Faith to live by

Worship with them this week

When you worship with the children every week, they see you . . . the biggest, smartest, most important people in their world, asking God for help, thanking Him for blessings.

Soon it becomes clear . . . here they can always find the strength they need, always find the happiness they want.

Published as a public service in cooperation with The Advertising Council

Hunting lease cost is expected to range from \$10 to \$25, depending on prices set by landowners for hunting privileges. Dates for the special hunts in all counties affected will be from December 2 to 11 inclusive.

"Our reports indicate the deer generally are in good condition up to this time," said the Executive Secretary. "Feed temporarily is adequate and the venison made available under these special harvests should be choice."

Petersburg Gift Shop Occupies New Larger Quarters

A gift shop at Petersburg, opened four years ago as a hobby in one corner of the office of The Petersburg Journal, has grown so marvelously that a new building to house the business has been occupied.

The owner is Mrs. J. L. Suits, wife of the Journal publisher.

A formal opening of the new gift shop was held Saturday with flowers for the ladies and special attentions to all visitors throughout the day.

The new shop is not entirely disassociated from the newspaper business, however. Built adjacent to the Journal office the shop has a passage way that connects the two.

Among Saturday evening visitors at the opening were Mr. and Mrs. Harold Huggins of Floydada, Mr. Huggins was an associate in former years in the Journal mechanical department and a friendship has long existed between the two families.

The 1956 Chevrolet has more than 19 bodies in three series more than were offered in 1955. The new line is the result of production in 1955 and nearly all are available 10 years ago. The outstanding are the 1956 sedans introduced in the Air and the Two-Ten series. The new design has a lower silhouette and a new four-door sedan body which is the same as the sport coupe which is shown in the exterior and interior views. The design of the sport coupe is a completely new design above the belt line. The center pillar, which was worked out, is a new design which was obtained by a reshaped rear bumper that arches rearward to the body mounts. The passenger station wagon has a new design which is a completely new design. Available also in the Air or Two-Ten series. The models have a new design for a rear passenger seat. The station wagon, put in in 1955 after the reception as a new design in the GM Motorama. The new sport coupe, also since last Summer, in the 1956 array of models in the three series.

Gasoline Filler Pipe Concealed HIGH STYLE WEDS PRACTICALITY

Beauty of design combines with functionalism to give the 1956 Chevrolet a touch of novelty. In the 19 body styles the company is introducing, the gasoline inlet pipe is concealed behind the left rear tail lamp. The lamp is hinged and swings downward out of the way when the tank is being filled.

Miss Stephens, driver of the 1955 Chevrolet, was driving south on the Ralls highway when she came up behind a truck and tried to pass. Another car was coming from the south and kept them from passing. Kay threw on her brakes and took to the right turning over in the ditch in front of the old King place. Sheriff Earl Cooper and deputy Ernest Huckabee made the investigation of the accident. There was no other car involved. The girls were taken to Pitts Hospital for check-ups, but no injuries were reported. The car was not a total loss but several hundred dollars damage was done.

Miss Alene Warren, Mrs. J. O. Warren and Mrs. T. R. Noland were week-end visitors of Miss Ima Jean Noland in Abilene. Ima Jean is a student at Hardin-Simmons University.

HEADACHES?

Why do you have them? Is there a chance to get over them? Have you had a chiropractic examination? You have headachings kept recurring. A chiropractic examination will reveal the cause of your headachings. In many cases, pressure upon spinal nerves which go back into your head is the actual causative factor of your headachings. By locating and correcting that pressure your headachings can no longer exist. Below are a few of some such cases. Boy, age 10, had headache at least once per week. Received first adjustment 4 months ago and has had only one headache since. Woman, age 61, weekly headachings with stomach upsets. Both stopped after chiropractic adjustments. Man, age 72, headache for last 4 years almost constant. Since chiropractic care for short time he has no headachings at all. Man, age 32, headachings twice per week. After chiropractic he now has headachings 1 per month and still getting further apart. His headachings are less severe also. In each of these cases, when they came to our clinic a complete spinal analysis was made which showed us and the patient where the nerve pressure was and what was causing it. Our job then was to correct it, which we did, as you can see by the above results. Chiropractic gives you the possibility to get well. Take advantage of that possibility.

South Plains News

(By Mrs. Murray Julian)
SOUTH PLAINS, Oct. 31 — Halloween was a quiet time here, with most of our young people attending the Halloween Festival held at the school house on Saturday night. Hot dogs, sandwiches and pies were served, and there were booths, and fun to fit all ages. The costumes were a sight to behold, with little Katy Taylor taking the prize for the preschool group in her Red Riding Hood costume. Jay Frank Parks in the school age group, had everyone laughing, with his Edgar Bergen character get up, and Mrs. Shelby Calahan as a sailor boy, won the prize in the adult class. Judges had a hard time picking winners from the many grotesque costumes. P-TA and Community Club sponsored the Halloween Festival, Monday night several spooky and frightful looking characters as trick or treat groups came around to the homes, and to most of us, their identity remains a secret.

Bible Teacher Preacher
A large crowd heard Dr. B. P. Maddox, from Wayland College speak from the pulpit Sunday morning and night at the South Plains Church, and his sermons were wonderful. Dr. Maddox is teacher of bible at the college. Rev. Larry Paus is due to be home this Monday from Loving, N. M., where he has been helping hold a revival meeting the past ten days.

Dalton Thompson with his combines, and John Wilson, with his trucks, have been cutting grain in the Priona area the past two weeks, and still have more to do.

Mr. and Mrs. Fred Marble, who formerly lived in Floydada, have moved to the Ernest Huckabee farm, where Fred will be nearer his farm work.

Mrs. Ollie Jordan, from Floydada, spent Sunday and Sunday night as the house guest of Mr. and Mrs. George Weast. They visited several friends in Silverton on Sunday afternoon, and that evening they went to Sterley, where they visited in the

home of Mr. and Mrs. Pete Thornton. The gin at Sterley has the yard stacked full of cotton. The cotton has really begun to open in all localities now.
