Doctors at the hospital described the injuries as "fractured and restless" late in the afternoon following the accident.

He was unconscious for about 2 1/2 hours. Thursday afternoon his wife Thursday told him he remembered what happened when he was brought to the hospital.

Board Members See Equipment For New School

Members of the board of education of Floydada School District spent Monday afternoon looking over samples of various types of seating, desks, chairs and furniture they will be called upon to spend heavily for during the next several weeks for the new high school.

They had five bidders present to show samples of seating, tables and chairs and three bidders on stage and auditorium curtains and draperies.

Biggest item they will have to decide upon will be the 800 or more seats needed for the new auditorium.

The board will have to select and give orders for auditorium seating, desks for school rooms and study halls, chairs and tables for vocational science, industrial art and library departments, and furnishing for the principal's and superintendent's offices which will run into a considerable sum of money.

Other members of the board are Aaron Carthel, J. P. Moss, R. G. Dunlap, Ernest Lee Thomas, Gene Collins Sr. and Ralph Johnston.

FCIC Coverage For Cotton In 1956 Is Boosted

New, increased coverage rates for Floyd County irrigated cotton by the Federal Crop Insurance Corporation for the year of 1956 have been announced by Bill Darden, local agent of the corporation.

This investment protection for the crop year is being made despite the fact that the corporation lost considerably in 1955 due to the June hail and the early freeze. Nearly one-third of the irrigated cotton producers in this county who had the all-risk insurance collected on their policies. Losses in the county paid by the corporation were \$38,900.

The new increased coverage rates are: For cotton in the first stage, after it is too late to plant cotton but before the first cultivation, \$11.02. Second stage: After the first cultivation but before laying by, \$17.40. Third stage: After laying by but before harvest, \$32.77.

Fourth stage: Harvest, acreage guarantee, \$43.50. The premium rate is \$3.13 per acre with a 4 per cent discount on each full 100 acres in each unit. Premium may be paid at any time following fall without interest.

Several cotton farmers are already signing applications which are being accepted at Darden's Welding Shop. "A Federal crop insurance policy will protect money invested to produce an irrigated cotton crop. While it does not replace the cotton crop, it does return through an indemnity check the money spent to produce it, which otherwise would be lost," Darden said.

As to hail insurance carried by the farmer in addition to his federal crop insurance indemnity the two are not competitive. The indemnity will not be reduced because the farmer also carries hail insurance.

Cheryl's Chatter

(about events at Floydada High)

Everyone seemed to be rather sleepy after Saturday night. The telephone lasted all night and lots of the kids had slumber parties. Also I don't know any girl in town that wasn't waiting to see Elvis Presley Saturday night. He'll be on again this Saturday night, too!

Our basketball team is continuing to do a fine job. They beat Post last Friday night and all the players seemed to be "on" last Friday. Have you noticed Susie Huntington, the girl's team mascot? You'll recognize her by her number 0!

Quite a few of the exes were in town last week-end. Some of them were: Beuna Holmes and Carolyn Downing of ACC; Gerry Graves, Ginger Tunna, Donny Grundy and Leon Barber of Tech; D'Ann Witkowski, Glynell Armstrong, Dane Clark, and Billy Carmack of McMurry; Gordon Joiner, Jimmy Collins, and Roger Poage of Hardin-Simmons University; Glad Herman, Gary Cartmel, and George Chapman of Texas U.; and Sammie Copeland of West Texas. It surely did seem good to see them back again!

D'Lene Witkowski was ill last week but she is back in school now and feeling better. She is counting the days till Waldo comes home. Some of the couples seen around F.H.S. last week-end were Leora King and Jim Womack, Billie Holmes and Bobby Weiborn, Roger Poage and Bo Dean Pate, Joy Sparks and Laron Fulton, Pat Hickerson and Stan Burleson, Vaughn Ginn and Linda Weiborn, Kay Callaway and Keith Armstrong, Randall Jones and Kay Robertson.

Mary Cogdell and Bob Delk, Ronnie Downing and Rene Peacock, D'Ann Witkowski and Stanley Vickers, Nita Jo Lightfoot and Billy Carmack, Vanda Carter and Carroll Gutzrie, Charlie Viney and Pat Robertson, Linda Jones and Billy MacPhillips, Don Colley and Carol Lawson and Fontaine Fowler and Robert Stovall.

Ballots for the Mr. and Miss F.H.S. contest were passed out Monday morning. The nominees were: Boys, Kenneth Robertson, Max Crawford, Jerry Coltharp and J. E. Waller; one girl, Gayle Clark, Becky Potts, Carolyn Collier and Bonnie Upton.

I must apologize for making a mistake last week. The band didn't give an assembly last week (certain difficulties), but they will give one in the near future. Mrs. Graves presented excerpts from "Our Town" last Friday, quite good. The play was very good and the cast and Mrs. Graves really worked! The mothers of the cast gave a reception in the Home Ec department immediately after each performance.

A special "hello" for my readers at Texas University! If you've "got an inferior," you're embarrassed! See you next week! —Cheryl

REDDY'S Farm Report

FROM THE AGRICULTURAL DEVELOPMENT DEPARTMENT SOUTHWESTERN PUBLIC SERVICE COMPANY

Inexpensive lamp kit, put together at home, looks good and gives plenty of proper light for reading, sewing, studying and other close tasks.

Getting the correct lighting for reading, sewing or studying is easy with an attractive lamp kit which you can assemble at home and to suit your decorative tastes.

Many 4-H's have found fun in the project, and only recently Mrs. Harriet Brummett, County Home Demonstration Agent in Floyd County, Texas, assembled one of the kits in less than one afternoon. "My husband thinks it is the best reading lamp in the house," says the proud Mrs. Brummett, who adds, "the amazing part about this quality lamp is the low cost. The kit and the approved R-40 bulb cost only about \$4.00."

Your Home Demonstration Club, 4-H Club or other groups can set up a craft lamp-building project with the help of your County Extension Agent. It's not only fun, but the kits come in a variety of colors permitting the homemaker to choose lamps which harmonize with the motif of the home. The Floyd County Home Demonstration Clubs are already planning similar craft lamp projects for this winter.

Important is the fact that although the lamp is extremely attractive, it still entails the design of good lighting. Good lamp lighting requirements call for a shade that is open at the top for upward reflection of light, sloping sides which direct a soft but adequate flow of light downward on the subject matter being seen. The shade may be opaque and lined in white for maximum light output, or translucent and light in color.

For proper "seeability" a lamp is actually only as good as the bulb used. In this lamp recommended usage calls for a 150 watt, 150 R. W. white indirect, bulb. This inside white bulb acts as its own diffusing reflector thus eliminating the use of a glass bowl for that purpose.

Again, the lamp is tall enough to cover a wide working area, and its base is large enough to prevent tipping.

Every home needs several good reading lamps, and here is your opportunity to have as many good reading lamps as you need at a cost you can well afford. With the school season in full swing, good lamps are an investment in good eyesight. Lamps can be replaced as styles change, but eyes are non-replaceable and should be given the proper light to see by.

Chiropractic For Migraine Headaches

Did you ever see a person suffering from an attack of a migraine headache? The victim is most miserable. The pain usually settles in one side of the head above the eye. The pain is made worse by light, noise, or movement. Without any special cause, apparently, the pain at times becomes nearly unbearable. Usually there is nausea and frequent vomiting.

Migraine is one of those diseases and frequent vomiting.

Much clinical research has demonstrated that this condition is a result of a nerve disturbance interfering with normal circulation of blood to the head and brain.

Chiropractors have been remarkably successful in caring for migraine. No pain killing pills or injections are used, no gland treatments. Your chiropractor looks for the nerve disturbance which is the basic cause. By careful analysis of the vertebral column he can locate the root of the trouble. It is usually in that part of the spine where the nerves control circulation to the brain.

This explains why spinal adjustments are the most effective way for dealing with the most aggravating condition.

One day last week we ran into a buzz saw:

Someone we see almost daily sharply criticized a piece of work we had done. There was nothing unusual about the job; or, really about the way we did it. But our behavior was quite usual. When his voice rose, and accusations flew,

our answers became shrill and we made counter-charges that would never have come out had he not entered the conversation armed for a showdown. Later, we tried to think what had "brought it on." Could we have seen the argument coming and avoided it? Were the criticisms justified?

Most of us are quick to claim error as well as credit. We move along, doing an average-to-good job in our daily chores, with occasional bursts of real quality. But in our hearts most of the time, we're saying "I could have done better." Therefore, a direct criticism, whether or not it is just, is nourished by our own guilty conscience.

A few days later, a speaker observed that "criticism of others sometimes stems from self-hate." All of us, he continued, have periods

of hating ourselves. When that happens, we begin to cast around for a scapegoat—someone to lay the blame on. Such an attack, he said, "reflects a lack of self-esteem on the part of the fellow who makes it."

"It isn't important that such things happen," he concluded. "What is important is what we let them do to us."

When something especially upsetting happens, it's hard to remember that in a few months the incident may be completely forgotten. Time has a way of healing many hurts, and what seems a tragedy today gets back into perspective as life returns to its normal pattern.

My desk is piled with unanswered letters. A month has gone by and now I am trying to get caught up. My mind wanders and goes so many ways it is hard to concentrate. It seems like it would be easy to just quit. I get up and water the tall geranium in the window, write a bit, then do some needed dusting after the storm of yesterday. I must settle down and finish my writing. See you next week. . . .

I found the following in the Christian Herald and was much impressed by it so will pass it on:

"Here is one man's picture of a friend, a well known Federal Judge. He is possessed of that zest of life which precipitates joyfulness in others. He has a gift of immediate intimacy, and a flattering memory for past encounters. When he comes into a room many agree that it is as if all the lights had suddenly been switched on, and a match put to the logs on the hearth."

"Think of that. Isn't that tribute a finer thing to say. He was worth a million dollars?" Is it candle lighting time when we come around, or do people look for the nearest light? At a dinner of him, who is the Light of the World, we should be light-bringers."

Organize State 42 Association

C. F. Weekley, Dallas advertising man, has been named president of the Texas 42 Association, an organization formed for the purpose of stimulating interest in the game of "42". Other officers of the group are Norman H. Brock of San Antonio, vice president, and R. P. Wall, Dallas, secretary.

The game of "42" is widely played in the Southwest, with the number of players estimated at several hundred thousand. It is one of the few native American games, played with dominoes, but with rules more closely akin to those of auction pitch. The history of the game of "42" as played in Texas, dates back to the 1880's.

One of the first projects planned by the association, according to Weekley, is an invitation state tournament. Members of "42" clubs throughout the state will be invited to participate.

Miss Jeannette Seaton, of Plainview, spent the week-end here, as guest of Mr. and Mrs. A. T. Emer of Route 5.

We enjoyed visiting in Crosbyton with Mrs. Frank Smith and Stanley and Kare Carter last Saturday. My uncle, Eli Jones of Lovington, N. M., took Mr. Spikes, Dale and myself over for the visit. The nannies at Mrs. Smith's home, the Smith house, are beautiful, glowing with red leaves and berries with here and there golden yellow leaves. We always like to see the many lovely plates and vases, pictures, a collection of paper weights and many, many other interesting things she has collected in her many years as hostess of the Smith House.

We were happy to find Stanley much improved and he laughs as merrily as he did when he was a schoolmate at the Emma School which we both attended.

It is not very good to get out and water shrubs and trees at this time of year, but it means the life of them to do so. Everything is covered with a thick coat of dust which needs washing off to let the things breathe.

Thanks to so many of you who have so kindly inquired about mother. To all who have sent a pretty card, or called to say hello. And to Mr. and Mrs. Will Marr who brought me such a delicious angel food cake which we and our visitors greatly enjoyed.

To Mrs. Eddie and Mary Lee Waddell for the sweet flowers. To our son, Dr. Spikes, to Dr. Holmes and all of the hospital staff who so patiently waited on her, we give

our thanks and God bless each of you for what you have done.

Wylie Will Head Service Program Of Oil Industry

Arthur Wylie has been appointed to head the Texas oil industry information and service program for local residents.

Appointment of Mr. Wylie was announced by M. C. McNichol, area chairman.

Objective of the American Petroleum Institute-sponsored information program is to make clear how well the people of this area are served by many oil businesses and to gain support for conditions under which they can continue to be privately managed, fully competitive and financially sound.

The local OIIC will concentrate on two projects: a School Program providing supplemental teaching materials to junior and senior high classes and Oil Progress Week. The latter is an October event placing particular emphasis on the importance of local service station operators.

HALF-MINUTE INTERVIEWS

Baird Bishop: "It rained on us from Miami, Florida, to 30 minutes this side of Vernon on our way home last week."

Mr. and Mrs. Will Hambricht wish to thank their friends for all the nice cards, gifts, flowers and other attentions while Mrs. Hambricht was in the hospital. May God's rich blessings be upon each of you.

Mr. and Mrs. Wm. Hambricht and Family.

New Booklet Is Guide To Better Roads In America

A "how-to-do-it" community guide to improved highway and traffic conditions has been published as a public service by Ford Motor Company.

Titled "Freedom of the American Road," the 120-page volume contains actual case histories of what many local communities and states have accomplished in solving traffic problems, and the stories of the people responsible.

The book is a result of nationwide research by Ford Motor Company assisted by members of leading highway and traffic safety groups. More than 200,000 copies are being distributed free to interested individuals and organizations.

Some of America's top writers, photographers and safety planners were assigned to find out how successful communities were helping to improve the nation's highway network, reduce traffic injuries and deaths and eliminate urban traffic bottlenecks.

The reports were fitted into a "town hall" format in the belief that the experiences of one community may serve as an example of what can be duplicated in other areas.

The book is divided into three sections, titled "The Highway," "The Traffic" and "The Driver." It contains color illustrations and more than 50 articles.

Marketing, Processing, Are Big Challenges In Vegetable Growing

Marketing plan of some kind from the start is Mr. Marshall's belief. Trial plantings that won't break a man were recommended by Mr. Rosborough as feelers for individuals and communities that want to go ahead. "You get the feel of the business and an occasional taste of the profit of it that way," he said. Mr. Marshall points out in his report to The Hesperian that the Californian's plans have been successful and says it would pay this area to follow their example. "In that country they sell to freezer plant buyers. They have freezer plants in every town just like we have here. Their plan is successful. The farmer generally contracts his crop before he plants it," he said, adding that he would have to go into this kind of a plan, or any other marketing plan that is adopted.

The water situation and our increasing population make it inevitable that we raise crops that pay more per acre and have smaller farms, said the Floyd County vegetable and fruit growing booster.

Meanwhile, he reports the 20 county representatives are to meet again in Plainview on Feb. 14 at the Hilton Hotel.

Named from Floydada to attend the meeting as an advisory board member was Arlon Miller of Sand Hill. Several others also attended.

Thespian Club Has Smash Hit In 'Our Town'

Outlining the history of Grover's Corners, N. H., and something of the character of its citizens, going into the houses of the Gibbs and Webb families, substantial homes containing substantial folks, was the scene as the curtain rose on Act I in the three act play, "Our Town" written by Thornton Wilder, presented on Monday and Tuesday nights in the high school auditorium by the Thespian Club, speech department organization of Floydada High School.

The cast, directed by Mrs. I. T. Graves, consisted of Fontaine Fowler, in her leading role of 16-year-old Emily Webb, Emily's father, Mr. Webb, publisher and editor of the Grover's Corners Sentinel, was played by Max Crawford. Her mother, played by Virginia Taylor, was a crisp little woman in the thirties. Louise Johnson played the role of Emily's 11-year-old brother, Wally.

In the supporting role was Joe Smalley, who played the role of 16-year-old George Gibbs. His parents, Dr. and Mrs. Gibbs, were played by Jerry Coltharp and Vanda Carter. Doc Gibbs was a pleasant portly man in the thirties and Mrs. Gibbs a pleasant woman also in her thirties. Donnie Young played the part of his little sister, Rebecca.

In the all-important role of Frank Craven, stage manager, was Elvis Lowrance. He directed and explained the action of the town and took minor parts of several characters. Joe Crowell, a newspaper boy of 11, was played by Dennis Whitfill. Dennis also played the role of Si Crowell, a boy of 14.

Meivis Lowrance played the role of Howie Newsome, the town's milkman of about thirty years old. Professor Willard of New Hampshire's state college was played by Bob Rainer.

Billy McTeignolds was cast in the role of Simon Stimpson, leader of the church choir.

Mrs. Soames, the town gossip, was played by Darlene Dorrell. Constable Warren was played by Jerry Crawford and Dick Galloway was in the role of Joe Stoddard.

The "Woman-in-the-balcony" scene in the auditorium, and "The Lady-in-the-box" was played by Billie Goode, Bill Thomas and Gayle Ross.

The second act concerned the love affair between young George Gibbs and little Emily Webb, and thus culminated in a moving wedding scene, which contained all the elements of poignant sorrow and abundant happiness that makes for solemnity and impressiveness.

In the third act the audience was led to the cemetery on the hill, where many of the townspeople they had come to know so well are patiently and smilingly awaiting "judgment" but greater understanding. Into their midst was led the bride, a little timid at first, a little wishful to go back to life to live again with her memories. She is shown how impossible the past cannot be re-lived. Truth is to be found only in the future.

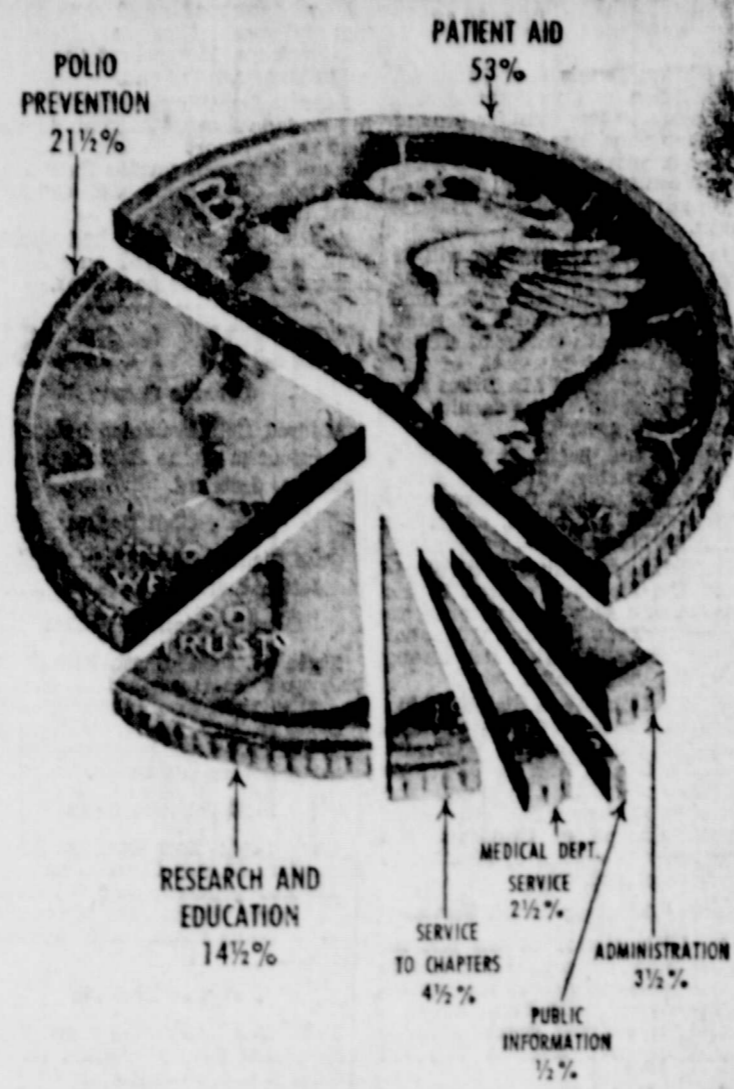

Following the marvelous production, the play cast was honored with a reception in the homemaking department by several of the Thespian members and their parents.

New Constitution And By-Laws Govern Floydada Country Club

At a meeting Monday night in the district court room in Floydada members of the Country Club voted overwhelmingly to adopt a new constitution and by-laws.

The group discussed the proposition for more than two hours giving each article and section special consideration before passing to the next. Richard Stovall served as moderator for the directors who were busy making notes and rewording parts of the constitution offered. About sixty members were in attendance with more than that number represented by proxy.

Principal changes in the new rules of the club allow the directors greater powers in transacting business and carrying on club affairs. Guest privileges may be regulated by the board of directors and guest fees may be charged as set by them. Local guests are not bound by the constitution but may be by directors if they deem this desirable.

Dues may be set as high as \$15 per quarter plus taxes which at present could put the figure at \$18 per quarter if the directors deem this necessary.

Emphasis was put on attendance at business meetings of the club

which can now amend the constitution by a vote of two-thirds of those present and represented by proxy. In the past it took a two-thirds majority of all the members to transact such business and non-attendance was in effect a negative vote on any matter.

The membership is limited to 150 and associate membership to 120 as in the past.

Aaron Cartmel, president of the board of directors, said Wednesday morning there had been no directors meeting since the Monday night membership meeting and no action taken under the new powers. The new constitution is effective immediately.

MOD Fund Not Reach Goal

With the Mothers March completed in both Floydada and Lockney and most of the final stages of their fund campaign for the March 1st it appears the campaign is a little short of the goal.

A hurried check Wednesday showing \$2514 on deposit bank at Floydada and a total of \$1050 at Lockney. This is a total of \$3564 of the goal set for the county.

Still incomplete were rural communities. Also the more of the dime cards to be ed up in the business houses would add to the total.

Reports since last week among others the receipts of Mothers March which totals in Floydada and \$148 in Lockney.

Drive Chairman Bill Henry yesterday that the complete turns might bring the desired when the job is finished and suits tabulated.

The vast amount of slow hand labor involved in the project extending over several years. Then an idea was developed that hastened the examination.

A special room was designed and built so that the controlled humidity and heat would provide ideal hatching condition of the larvae into the moth stage. Special nets were erected to trap the emerging moth.

By knowing the exact number of seed involved and obtaining an accurate count of moths, the rate of kill by ordinary ginning processes could be determined. This improved process speeded up the research program by at least a year, experts said.

Data is now being compiled at the various experiment points. The result should be known within six weeks—and the sterilization project will be continued or abandoned, depending on the outcome.

If sterilization is declared unnecessary, ginners in 127 Texas Counties will be relieved of a heavy responsibility which slows their operations. Ginners over the remainder of the state can be assured by the knowledge that they may not have to install expensive equipment at a later date. They also can breathe easier knowing that their gins will not be materially helping spread the insect infestation through the release of cotton seed into other areas.

However, the experts emphasize that if results of the projects are the least bit doubtful, then present seed sterilization methods must continue to be enforced by Texas and federal agencies.

Farm Bureau News
 (By Chester Carthel)

Here we are back again for the Farm Bureau news. This may not be too much news this week, but we will do the best we can.

I notice that the Floyd County Farm Bureau is sending out renewal notices for the members whose memberships expire in the next few months. You might be wondering just why you are receiving your notice before your expiration date. I might just say that you will not be paying double for part of the year.

If your membership expiration date is March 1, 1956, and you receive a notice, you will note on it that your expiration date shows to be the third month of the year. Now, suppose your expiration date is March 1, 1956, and you pay your membership dues Feb. 1, 1956, this will in no way affect the expiration date of your membership for the next year. It will still be March 1. I thought this example might help to clarify the situation a bit.

We are sending these notices out now in order to try to receive as many of them back in the county office as possible before our county membership drive begins. This will enable Mrs. Puckett to check the ones that have been paid by mail; and therefore, it will not be necessary for some of your neighbors to call on you for your membership dues. So let us all try to send in our membership dues as soon as possible. It certainly will be a great help.

I imagine many of you saw the program on TV last Thursday night showing the agriculture condition in three or four of our states. There was one statement that was made by a dairy farmer in Wisconsin I believe that struck me as being interesting. That particular farmer replied to a question asked him by the reporter about belonging to some sort of a farm organization.

He said that he believed that we all should belong to some kind of a family farm organization. Well, isn't that just what Farm Bureau is? It is most definitely an organization for the entire farm family. So, to you that are not members of any farm organization, we would like for you and your family to join the other farm families in Farm Bureau, and let's all strive together to better our economic and social position. We want you in the Floyd County Farm Bureau.

Now some of you might wonder just what Farm Bureau can do for you. There are many ways that Farm Bureau helps you every day. For a fairly recent example, your Farm Bureau was the principal cause of CCC agreeing to take discolored grain sorghums in the loan last fall. Service that Farm Bureau renders to its members is only limited by the demand for those services.

Remember, if you have anything

A PLEDGE to and a REQUEST of
the FARMERS of the SOUTH PLAINS

About eight years ago Gifford-Hill-Western, Inc., entered the South Plains committed to developing satisfactory irrigation systems which would economically and efficiently serve the Farmers of the area for years to come. Although pioneering, with the aid of you and others, we are proud of the results which speak for themselves.

In an exacting and complex business we have striven to deserve a reputation for efficiency, integrity and reliability. Further, our Company, which stems from Texas companies with over thirty years' performance in the Southwest, was established to grow with and aid in developing the South Plains. It is our purpose never to misrepresent our products to you; but to explain both their capabilities and limitations to the best of our knowledge.

Our past developments, we hope, justify our being classed as the leader in the irrigation pipe industry in the area in originating products and applications producing increased efficiency and more economical farm irrigation.

It is hoped that most of you know of Gifford-Hill-Western, Inc.—its products, its policies, and some of our experienced personnel! However, for fear some may have the impression that our Company's quality performance and guarantee carries a higher price tag than others,

WE PLEDGE TO YOU:

WE WILL CONTINUE, AS WE HAVE IN THE PAST, TO MANUFACTURE PRODUCTS AND INSTALL IRRIGATION SYSTEMS ONLY ON THE BASIS OF FURNISHING YOU AN INSTALLATION WHICH WILL RENDER SATISFACTORY SERVICE FOR YEARS TO COME, AND,

Few Minutes to Spare? If you have a few minutes to spare and you haven't sent off your income tax report, the Internal Revenue Collector has a suggestion as to how you might spend 10 minutes of it. He says that literally thousands of income tax reports come into their office that have one or more of these faults: (1) Either husband or wife failed to sign the return; (2) Taxpayer has not attached Form W-2, statement of earnings from employer; (3) taxpayer failed to list names of dependents; (4) Taxpayer filed return under a different name from the name used on the estimated tax; (5) Taxpayer does not use plain, readable writing. The revenue department loses thousands of hours of clerical time and has to write thousands of letters that embarrass and annoy the taxpayers on account of these five errors that are common.

That Kelley Girl. Our wagering department is now taking bets on the prospective wedding of Miss Grace Kelley, the Philadelphia Irish girl, to the Prince of Monaca. We bet she doesn't wed the gambling house operator and slot machine man.

Our weather luck and high standing as a successful purveyor of weather information depends on what happens in the next few weeks. If the storms that keep whipping in from the west can make that hump in the back of the Rocky Mountains right away instead of sliding off to the east we've got it made. It will be hard for the weather to break away from a pattern that has been the rule for nigh on to five years. However, it must happen sooner or later. We are staking a tremendous reputation that it will happen. Here and now we issue a storm warning. Get some chunks handy to thaw out the water tanks, dig out those long handles, grind up feed to the rafters of the self-feeder. Might be handy to have some gunny sacks ready to wrap your feet up before you get out into it. These hard cold days sure are tough when you're not used to them.

Another good feature of the bad spell we are predicting is that it will kill out the insects that are going to take the country like Grant took Richmond if we don't get some cold weather to kill them out. Already greenbugs are showing up in wheat fields and it barely February 1. Grasshoppers have laid many an egg that will plague the plains this summer unless a cold freeze gets the larvae down below the eight-inch level. Also there are bollworm and pink bollworm larvae lurking in the turn rows.

History of Floyd County. Boone McClure, director of Panhandle-Plains Historical Museum, advises that copies of Dr. Hall's History of Floyd County are available at \$5 in the hard back and \$5 in the paper back bindings. Probably you would like to have

a copy in your library. If so, you can write Mr. McClure at Canyon, Texas, or you can leave an order at The Hesperian office. Also, we might remind you that Mrs. Spikes' History of Crosby County is still available at this office in the hard back only at \$8.

VOICE OF THE TEENAGERS

(Mary Jo Smith in The Whirl, FHS student publication)

Are the teenagers of FHS really as bad as they say? Are we really a menace or becoming one? Being teenagers, we are prone to say that we are not, and we have good reason to say it.

For instance, in the local newspaper recently an article on teenage driving stated that the teenagers were racing two to four cars abreast on the Sandhill highway and other county highways. I ask you this question: Just how wide is the Sandhill highway or for that matter, how wide are any of the local county highways? Are they wide enough for four cars? Of course, the bar-ditches may have been paved recently.

Also stated in the article was the fact that residents in some parts of the city were complaining about teenagers who were roaming the community after midnight. If we, as teenagers, were to take up the argument, isn't it logical that we could fire right back with this statement. What are the residents doing up after midnight themselves? Trying to find something else to add to the "teenage menace"?

One thing that the article failed to state was that these things do not apply to all teenagers. Any teenager in our town is going to admit that many of the wrecks in Floydada are due to the teenage driving, but there are many in the city who drive much more carefully than the majority of the adults. The article failed to state that the students of FHS are trying desperately to get a Hot-Rod club started in our town, but how many adults are helping us. Very few, yes. Perhaps if the adults of the town would spend less time complaining about teenage driving and the fact that teenagers are out after midnight (forgetting to say how many of the teenagers are at home in bed before midnight) and more time helping us, we would have a place to spend our spare time. No teenager likes to just go to a show all the time. If the adults would help the teenage group to have something to do there would be much less "roaming the streets", as they put it.

As teenagers, let's try to do away with any menace that we may be creating in the adults' eye. When we see a teenager driving recklessly, let's remind him that we do not want it said that our generation is going to the dogs. In the meantime, let's get the adults to help us to have something recreational to do in our community.

Talk Problems Common to Area Electric People

Appliance dealers, power suppliers and representatives of press and radio were guests Thursday night of Southwestern Public Service Company at a supper and program at Commercial Hotel. About 30 were present for the feed and discussion of problems, which were common to all.

Highlight of the program was a skit and chalk talk by "Mystic Martiner" (Brac Biggers) which was presented with black light color in the darkened dining hall. The Mystic saw wider use and popularity for electric clothes dryers throughout the country in coming months.

Representing the City Light Plant were Mayor Lewis Norman, Councilmen L. L. Clark, Carl Minor Jr., D. T. Mayo, Leonard Matlier and City Engineer J. D. Parks. Lighthouse Electric was represented by Claude Weathersbee and Nancy Morckel.

Other Southwestern personnel attending included managers Joe Parish of Lockney and Ralph Glover of Silverton, and Kenneth Tate and Herschel Thaxton of the Floydada office.

Appliance dealers and sales people of the three town district were honorees and most all had personnel in attendance.

Tom F. Nelson Is Denied Recovery By Supreme Court

The Supreme Court of Texas, after having the case for almost a year, handed down an opinion this week in the case of Tom F. Nelson vs. C. P. Fulkerson in which they affirmed the ruling of Judge Chapman and reversed the Court of Civil Appeals of Amarillo.

This is the third time in recent years in which the Supreme Court has reversed the appellate court at Amarillo and affirmed the district court of this district.

Under the opinion in the Nelson-Fulkerson case the plaintiff was denied recovery under the "joint enterprise doctrine." The jury denied the son, Gene Nelson, recovery but had given the father, Tom F. Nelson, \$3000.00.

Judge Chapman, in writing the judgment denied recovery for Tom F. Nelson because the jury had found the son guilty of negligence, and the facts, according to the district judge, showed the father and son on a joint enterprise at the time of the collision and made it legally impossible for the father to recover from a collision in which his son was driving where the jury found him guilty of negligence.

Ireland was known to the ancient Romans as Hibernia.

It's In The News!

Electric cooking to be made available for home use in '56.

Homemakers desiring more speed in cooking may have the answer to their wishes this year when the new electronic range for home use is put on the market. The Tappan Stove Company announced recently that the new range would be available soon after the first of the year for about \$1200.

In an introductory demonstration for the press last month, Allan P. Tappan, president of the company, showed the range's outstanding speed by cooking eggs in 22 seconds, frozen broccoli in four and a half minutes, bacon in 90 seconds and a 5 pound roast in 30 minutes.

The cooking is done by microwaves with the result that the oven walls, which are not insulated remain cool. Tappan engineers explain the principle of electronic range as being similar to the sun's rays which stream through a window and warm a person but not the window glass. In the new oven, only the food becomes hot.

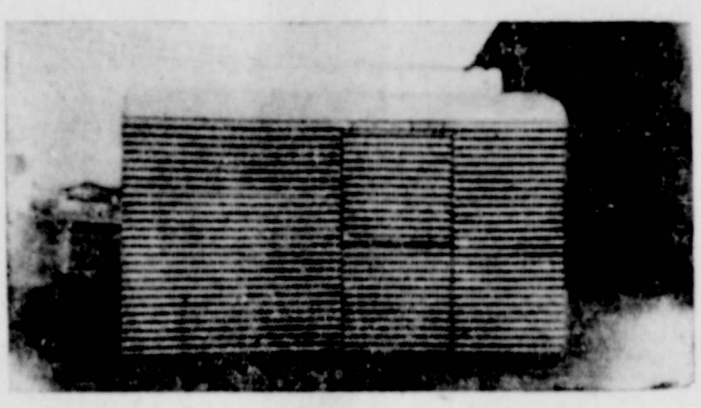

The range which operates on 230-volt electric current can be installed as a built-in unit or stacked on cabinets.

Irrigation Is Showing Gains In Motley Area

MATADOR — Economy of the farming area below the Cap Rock is beginning to reflect a more stabilized position as new irrigation wells are developed in Motley County and along the boundaries of Blaine, Hall and Dickens counties.

B. J. Braselton Jr., manager of Braselton Implement Company of Hoarding Springs said last week that his firm has a number of new locations "booked" for development and that several new wells have been "brought in" recently.

Motley County now has 42 irrigation wells, Braselton said, and approximately 100 wells are located within a 30-mile radius of Matador. He said, however, that within another year or two, the area will begin to reflect a more distinct benefit from irrigation.

A 6-inch producer was brought in on Bob Coopers place 1 1/2 miles east of Hoarding Springs, from which he expects to irrigate 100 acres.

A new 500 gallons per minute well has recently been developed for Avery Payne, five miles east of Hoarding Springs. The well is 150 feet deep.

Mrs. Byron Clark entertained Saturday afternoon from 3 to 5 o'clock for her daughter, Mildred Jo, who was six years old. Thirteen guests were present for the occasion.

When nation-wide Daylight Saving time becomes effective Monday morning at 2 o'clock, all official time will be run up one hour, but in Floyd County most businesses and schools will follow their former schedules by the sun as more convenient and effecting the greatest saving for the present.

The temperature reached a low for the week Monday when records of the R.E.A. showed 29 degrees. High for the week was recorded Thursday of last week at 71 degrees.

C. D. Bird, superintendent of drilling on the Montague No. 1 Phillips oil test in Briscoe County,

reported this morning a depth of 7310 feet. The formation of the earth at this depth is a lime and grey shale, he said.

company to influence legislation.
McDaniel said he sponsored a bill to bring such companies under securities regulation and voted for a similar bill which passed. He said he abstained from voting on HB 240 which would have placed US Trust under the state banking laws.
Former State Sen. R. C. Lanning of Austin also said he knew of no payments by Shoemaker to legislators. Both McDaniel and Lanning, an attorney who resigned from the Board of Control to represent Shoemaker during the legislature, said they had done nothing illegal or unethical.
Renne Alred Jr., former Insurance Commission examiner, declared that bank affidavits on insurance company assets cannot always be taken at face value. He cited a case involving the now-defunct Commercial Security Insurance Co. of Houston. It showed a bank deposit of \$250,000. But, said Alred, this was \$50,000 in cash and a note for \$200,000 with a restriction against drawing on the account.
Bank officials immediately denied this. They declared they had proven in court that there was no restriction against this account.
Alred also testified that the Insurance Commission received information in a report in September, 1954, that would have enabled it to close down US Trust then.

Two executives of large legal reserve life companies presented industry views in an appearance before the senate committee. Emphasizing Texas legal reserve life companies' long record of no loss to policyholders, they declared they felt such companies had been unfairly damaged by recent developments.
Present insurance laws are adequate, they said. The problem is enforcement. Along this line they suggested the possibility of a single commissioner with sole power. This drew quick fire from Gov. Allan Shivers. These companies, he said, had asked his help during the last session of the legislature to set up the present three-man board system.
US Trust operated without a license from May 31, 1955, until put into receivership Dec. 12, an Insurance Commission attorney told the senate investigating committee. Paul Connor said that all company licenses expire May 31, but by "tacit understanding" they continue operating until the commission takes action to deny a new license.
Quizzing of employees brought only a stentorian conception of US Trust as a "one-man business," but shed no light on whether more than \$50,000 in cash withdrawals was used to buy influence. Former state auditors told the house committee that money from checks drawn to "cash" went to the president, and they had no knowledge of what he did with it.
Both House and Senate committee chairmen stated they want to question Shoemaker as soon as he is able to appear. He has been in the hospital since his Jan. 7 suicide attempt.
Meanwhile, the Insurance Commission began work on a revised plan to hasten the examination of Texas companies. All will be required to prove solvency by May 31 or lose their licenses.
Also being considered is a requirement that insurance companies publish financial reports such as are demanded of banks and other institutions handling vast sums of money belonging to depositors.

Revenue Fund in Red
Texas general revenue fund is \$1,100,000 in the red, and it is expected to dip lower.
State Comptroller Robert S. Calvert said the deficit likely will continue until May when income should exceed expenses again. Meanwhile, the shortage may hit ten million dollars. Nobody will lose, said Calvert, since banks have agreed to cash warrants without discount.
A similar state deficit developed last year and continued until the spring payment of corporation franchise taxes replenished the general fund.
Four Elections in 1956
There will be an extra election in 1956 as the result of a legislative boner. The error will cost the state and some counties \$200,000.
Nine constitutional amendments will be voted on in November. Eight were drawn properly. One, however, calls for a vote on the second Tuesday in the month. General election day is Nov. 6 — the first Tuesday. Therefore the state must call an election the following week in order that the ninth amendment may be legally voted upon. That will be Nov. 13.
The troublesome amendment would permit the state to spend up to \$1,500,000 a year in aid of dependent persons over 18 years of age who are mentally or physically totally disabled.
Supporters Write Shepperd
Rumors that Attorney General John Ben Shepperd planned a quiet retirement to private life following this term of office have sparked a drive by his friends to keep him in public office. Not only has Shepperd been besieged by calls, wires and letters urging that he stay in Texas government, but reports have it that supporters have raised a campaign chest ample for any contested race.
